"Prison Writing: A Message from Inside,"

New titles for librarians...

Three volumes in the LIBRARY INFORMATION SCIENCE Series...

LIBRARY TECHNICAL SERVICES

Operations and Management

Edited by IRENE P. GODDEN

FROM THE PREFACE: This text is intended to give an overview of current operations and techniques associated with the acquisition, organization for access, and physical processing and maintenance of collections of library materials. Typical organizational patterns and representative examples of workflow are included.

CONTENTS: *I. P. Godden,* Introduction. *L. A. Manning*, Technical Services Administration. *K. L. Horny*, Automation: The Context and the Potential. *M. T. Reid*, Acquisitions. *B. G. Bengtson*, Bibliographic Control. *A. D. Larsen*, Preservation and Materials Processing. *L. A. Manning*, Circulation Functions. Index.

May/June 1984, 288 pp., $32.00/ISBN: 0-12-287040-9

SUBJECT ACCESS SYSTEMS

Alternatives in Design

JESSICA L. MILSTEAD

Subject Access Systems, Alternatives in Design is the first book on indexing to examine the elements of subject access systems in relation to their effect on the system as a whole. Rather than try to cover the whole field of subject access, the author has limited her discussion to documentary systems.

Every choice limits other choices in subject access system design. The book is organized around the choices that have to be made, beginning with alternatives at the level of the file as a whole, proceeding downward to the document, the terms, and the authority for the terms, at the same time integrating all forms of subject access such as cataloging, indexing, classification, and machine search. This scholarly monograph will serve as a helpful guide to practitioners sorting their way through conflicting objectives in subject access system design and will provoke researchers to consider new relationships within such systems.

Subject Access Systems, Alternatives in Design will appeal to designers of indexing and other documentary information systems and will be useful as a supplementary text in any course which considers how documentary information is organized for storage and later retrieval.

May/June 1984, 224 pp., $28.00/ISBN: 0-12-498120-8

MANAGEMENT TECHNIQUES FOR LIBRARIANS

2nd Edition

G. EDWARD EVANS

Judiciously expanded and revised since initial publication in 1976, this work applies basic management concepts to libraries, media centers, and information centers, following a philosophy that emphasizes the importance of the individual. Subjects receiving expanded coverage include current trends in collective bargaining, leadership, and the merit system used in civil service.

1983, 330 pp., $21.00/ISBN: 0-12-243856-6

To obtain a copy of **Management Techniques for Librarians** on approval, address your request to the attention of the Sales Department and give the title and estimated enrollment of your course.

ADVANCES IN LIBRARIANSHIP

Volume 13

Edited by WESLEY SIMONTON

Topics emphasized in **Advances in Librarianship, Volume 13** include:

- the importance of management information for decision making in libraries;
- subject access in online public access catalogues and videotex systems;
- information and referral activities and the provision of local and public policy information;
- familiar and new elements of collection development and management including recent trends in research, methodology, and practice;
- qualitative and quantitative methods for identifying the important literature in science;
- the recent growth of organized international librarianship;
- major advances in information systems and library automation in Latin America.

July/August 1984, 288 pp., $32.00/ISBN: 0-12-024613-9

A HIGHLY COST-EFFECTIVE "EASY-GROW" SYSTEM FOR

10,000 TO 150,000 TITLES!

IMAGINE YOUR LIBRARY WITH THIS POWERFUL, EXPANDABLE EASY DATA SYSTEM!

Public libraries, school libraries, plus "Fortune 500" companies, all have chosen the Easy Data integrated library system from Sydney. It's expandable...it grows as your library grows, from a small but powerful mini-computer to a multi-processor distributed network.

Modules available:
• Acquisitions • Cataloging • Inquiry • Circulation control

Features include:
• On-line authority control • Fully browsable • Powerful on-line inquiry with boolean logic • Fund accounting and management statistics • Microfiche and printed catalogs • Records management applications • Run on Datapoint hardware • State-of-the-art networking capabilities.

Please get in touch. We really have unique advantages for small and medium-size libraries of all types.

Available in public or special library versions. Serials system coming soon.

swers for the Librarian and the Patron." A panel moderated by Peter Van Wingen includes university, public, and federal librarians and a bookseller. ACRL Rare Books & Manuscripts Section/24/2–4p, Convention Center Room E410.

Reference

"Ready Reference Use of Online Resources: Part I, Ready or Not?" Speakers include Eileen Hitchingham and Elizabeth Titus. "Part II, A Fair Exchange," an informal bazaar. RASD Machine-Assisted Reference Section/24/9:30a–12:30p & 2–5p, Convention Center East Ballroom D.

"The Use of U.S. Federal Documents in Historical Research." Speakers are Peter Hernon, Frank Lee, Bruce Morton, and Steven D. Zink. RASD History Section and GODORT/24/2–5:30, Convention Center Room W101–102.

"Getting Down to Business—Online!" RASD Business Reference Service Committee and RASD MARS/26/9–11a, Convention Center Room W104.

Rural libraries

"If We Can Do It, So Can You—Cooperative Resouces for the Small Rural Library Service." Janet Stuckey, Jane Knezek, and Amy Owen will provide ideas and answers. PLA Small & Medium-Sized Library Section & ASCLA/26/9–11a, Convention Center Room W104.

School libraries

"The Way We Were; The Way We are Now; The Way We Want to Be: Paths to Achievement." AASL/25/9:30a–noon, Hyatt Reunion Ballroom. Speaker is Christopher Dede of the University of Houston. AASL President's Program/25/9:30–noon, Hyatt Reunion Ballroom

Standards and statistics

"Access to Special Format Statistics: The New ANSI 739.7 Standard and Problems of Implementation." Keynote speaker is Deanna Marcum. LAMA SS Statistics for Nonprint Media Committee, LAMA SS Statistics for College and University Libraries Committee, & RTSD Audiovisual Committee/25/9:30–11a, Convention Center Room W112.

"Output Measures—First National Picture." Douglas Zweizig will present the collected data, Sandy Stephan will summarize group discussions of the issues, and Karen Krueger will report on the task force. PLA President's Program/25/2–5:30p, Hilton Grand Ballroom.

Telecommunications

"The Telecommunications Revolution." PBS show host Nicholas Johnson will provide insight into the new technology. LITA President's Program/23/2–4p, Convention Center West Ballroom B.

Trustees

"Dynamic Interactions: Professionals and Trustees." Speakers include Anna A. Curry, Frank J. Dempsey, Edward Holley, and Shirley Lang. ALTA/23/9–11a, Convention Center Room E409.

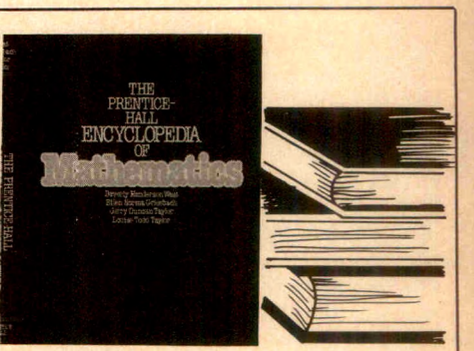
"First WILL and Testament." Participants will report on how the workshop enhanced trustee education. ALTA/24/9:30–11a, Hyatt Cascade Ballroom.

Vendor Relationships

"Ethics of Vendor-Library Relations" will be keynoted by Harry Stein, author of *Ethics (and Other Liabilities)*. Librarian Hank Edelman will face a panel of reps from publishing, film, and hardware/equipment industries. Committee on Professional Ethics/25/2–4p, Convention Center West Ballroom C.

"Exploring Management of the Vendor/User Relationship on Jointly Sponsored New Projects." The Faxon LINX Union List Project and a University of Florida circ system developed as a component of NOTIS will be discussed. LITA Vendor/User Discussion Group/26/9:30–11a, Convention Center Room E301. □

"If asked to select just one mathematical reference book, I would choose this one *without reservation...*



A pleasure to read, THE PRENTICE-HALL ENCYCLOPEDIA OF MATHEMATICS has broad appeal: experts or beginners, teachers or students, even those who have math anxiety. The 80 different articles from algebra to zero each have a similar format: definitions and formulas; explanation and examples; history, if appropriate; and annotated bibliography for those interested in further pursuit of a topic. The key words, italicized or set in boldface, aid those scanning for information. The abundant drawings, diagrams and photographs blend well with the text and stimulate the browser's curiosity. . . A two-page time line . . . a biographical list with topic notation . . . tables of information . . . a bibliographical index arranged by author and titles—these features seem to reflect the authors' concern that the information be easily available from a variety of entry points."—School Library Journal

Chosen as an **OUTSTANDING REFERENCE SOURCE** 1983 by the American Associations Reference & Adult Division Committee

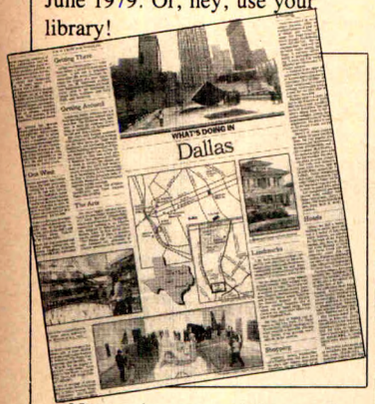
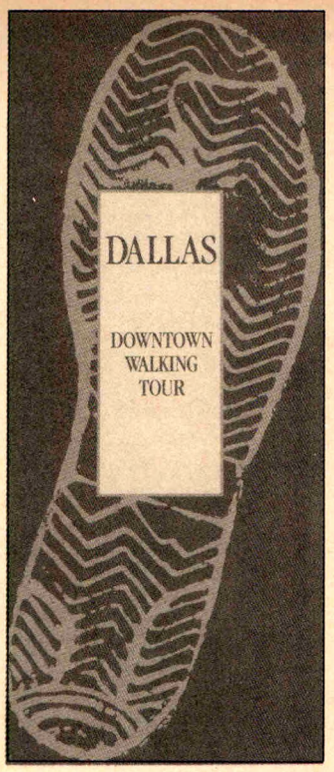
ALA DALLAS: HOW TO GET IT WHEN YOU GET THERE

This year, *American Libraries* departs from its usual presentation of conference-area maps and offers instead a guide to visitors' information easily available on site. The reason: Scads of first-rate material *is* available, thanks to the committees working on local information and hospitality. For those who insist on a little advance background, however, here are two handy sources: A page on Dallas in the Feb. 19 *New York Times* (Sec. XX, p. 10), shown below, and *American Libraries'* look at the 1979 conference city, p. 376–79, June 1979. Or, hey, use your library!

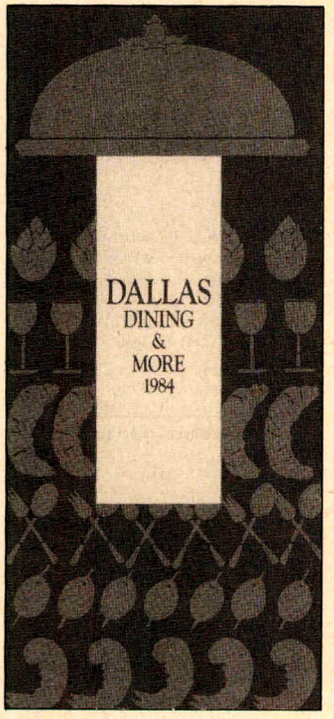


Now, when you get there, get thee directly to the Information Booth, on the mezzanine above the registration area of the Dallas Convention Center. There, the friendly folks of the Information Booth Committee, chaired by Richard Miller, will provide you with the materials shown on the rest of this page plus miscellaneous items and advice. Hours: Fri., June 22, 9–4; Sat.–Tues., 9–5; Wed., 9–noon.

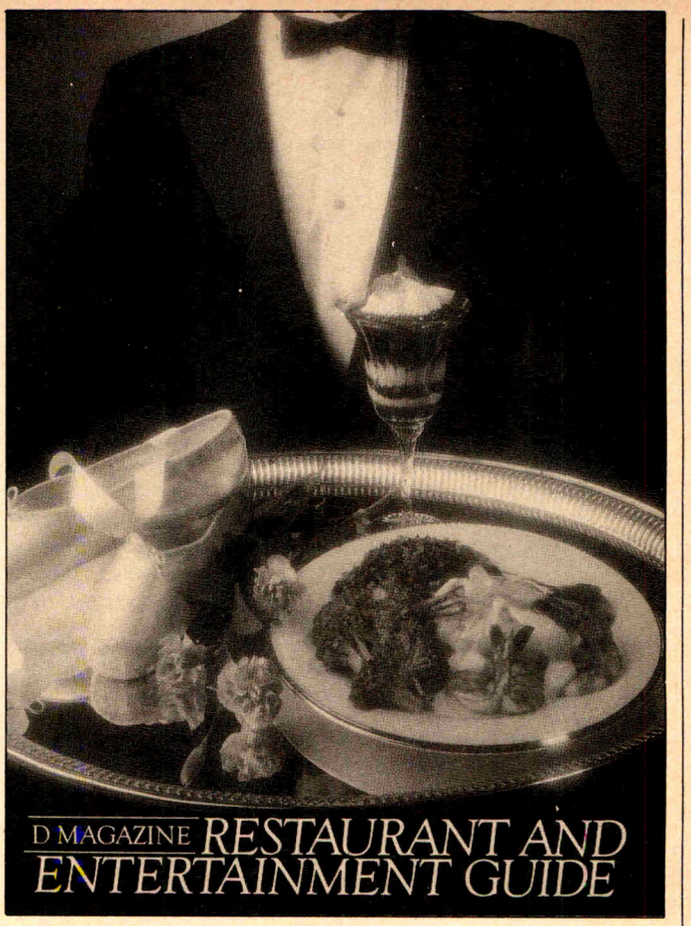
If you arrive before Friday, remember that the Dallas Visitor Information Center (telephone 747-2355) is open 9–5 daily at Union Station, just east of the Hyatt Regency on Houston. And if the Visitor Center can't help, you know one place that always will: the Dallas Public Library, a block east of the Convention Center on Young.



The walking tour brochure has a dandy downtown Dallas map, with locations and descriptions of 62 sites and major hotels. Find the Kennedy Memorial and historic Warehouse District with ease.



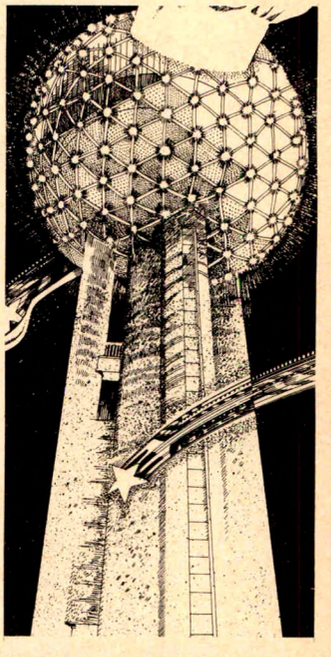
This up-to-date pamphlet lists scores of eating places by type of food, giving location and price range. The "More" is night life, arts, attractions, shopping, and sports. Pick one up and locate J.R.'s Bar.



"We talkin' lean, high-quality meat heah, boy." That's the opening comment on Dickey's barbecue in *D Magazine Restaurant and Entertainment Guide,* which rates dozens of the best eateries with authority. Shown in the magazine, at right, is one of the top Dallas restaurants—by altitude: Antares, in the Hyatt Regency's dome.

The single best pocket guide is this one, updated monthly and loaded with features, calendars, directories, and maps. Among the "Dallas Facts" it provides: Average June temperatures range from 70 to 91.

(Continued on p. 434.)



NEW

PUBLIC LIBRARY CATALOG

EIGHTH EDITION

A Collection Development and Reference Tool

Acquisitions and reference librarians in both public and college libraries rely on *Public Library Catalog* as a practical tool for collection development, cataloging and classification, book selection and purchasing, and general reference. The all-new Eighth Edition of *Public Library Catalog* represents a well-balanced collection of some 8,000 of the best currently-in-print, adult, non-fiction, English-language books. Chosen by a panel of distinguished public librarians from all parts of the United States, the listed books encompass a broad spectrum of contemporary topics meeting the diverse reading habits of adult American library patrons.

Organized for Quick Access and Maximum Utility

The Eighth Edition of *Public Library Catalog* is organized in three sections:

- **Classified Catalog**—lists almost 8,000 books by author's name, arranged by Abridged Dewey Decimal Classification. Entries provide complete bibliographic data, brief descriptions of each book's scope and contents (often a review), price, publisher, and page count. Paperbacks are included when they are the only available format for a title and when they accompany a hardcover title. Information on multiple editions is given where appropriate.
- **Author, Title, Subject, and Analytical Index** to the Classified Catalog—includes nearly 13,000 analytical references to books or topics that appear in *sections* of composite works (pagination provided). References are made to significant variations in authors' names. Subject headings are based on the *Sears List of Subject Headings*.
- **Directory of Publishers and Distributors**

A Versatile Selection Tool and Reference Aid

Public Library Catalog can help you make decisions crucial to the maintenance of your collection by indicating which books have been superseded by new editions or more current titles. Its organization makes it useful as a classification and reference aid, as well. You can browse through the section of the Catalog that covers a given Dewey number, read the descriptions, and pinpoint the books that best satisfy your patron's query. Analytical entries refer users to sections of composite works, thereby supplementing your library's catalog.

Public Library Catalog Stays Up To Date for Five Full Years

Your subscription to the Eighth Edition brings you five full years of service. You receive:

- The initial hardcover volume, which lists approximately 8,000 titles currently in print.
- Four paperbound supplements to be published at one-year intervals, listing approximately 3,200 additional titles, covering the years 1984, 1985, 1986, and 1987.

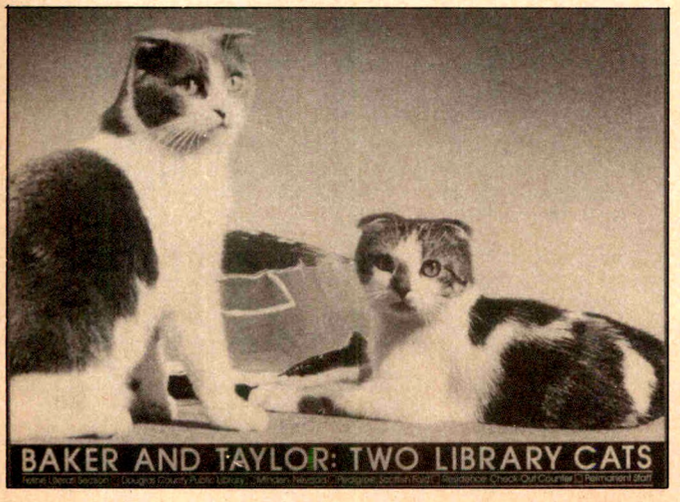
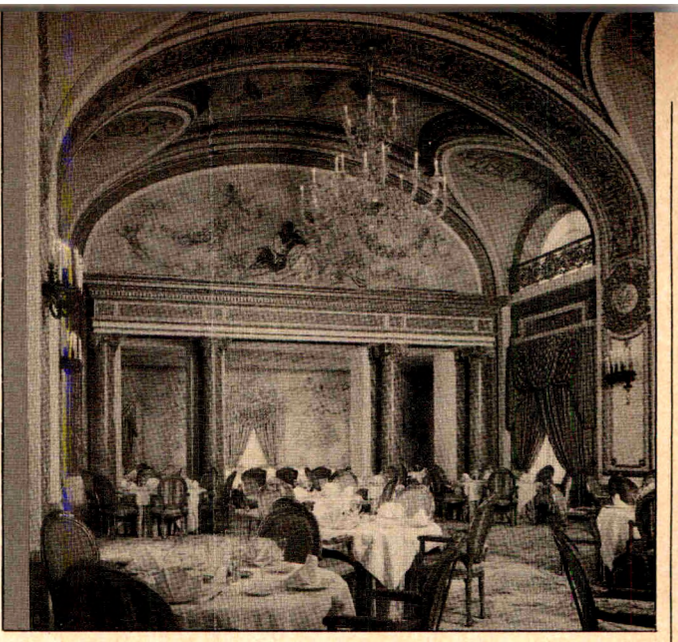
ALA DALLAS: HOW TO GET IT WHEN YOU GET THERE (cont. from p. 432)

Who needs Neiman-Marcus when you have the ALA Store, a new feature of the Annual Conference Exhibits? Occupying booths 753–755 the store will offer new ALA publications, the Library Symbol collection of mugs, T-shirts, etc., National Library Week posters including "Return the Adventure," Banned Books kits from the Office for Intellectual Freedom, *AL* designer tote bags, division publications, T-shirts from the Resources & Technical Services Division, buttons from the Young Adult Services Division, tip kits from the Office for Library Personnel Resources, and even Snoopy in his library T-shirt, priced at $15.

Grab those totes and head for the world's largest library trade show, June 23–26 at the Dallas Convention Center. Check the ads in this *AL* for good leads; when you get there, use the conference program exhibits directory to find your way. ALA's new conference manager Walter Brueggen (left) and his staff will be on hand for personal assistance. A popular freebie, the Baker & Taylor library cat poster, will be available again (booths 627–33). Staff members of the Douglas County (Nev.) Public Library, the cats are of Scottish Fold breed and named—what else?—Baker and Taylor.





In pursuit of beauty. Guests at the Adolphus and nearby hotels need go no farther than the Adolphus French Room restaurant, whose rococo murals are part of the hotel's $45 million restoration completed in 1981. The room has regained its grandeur of 1912, when Adolphus Busch opened it as the jewel of his baroque hostelry.

With one's appetite whetted in the French Room, the logical main course is the new Dallas Museum of Art, 1717 North Harwood, open every day but Monday. Pick up a "Gallery Guide" when there, as well as the monthly calendar and a brochure on the museum's Research Library (which is open Tues.–Sat.). African, Oriental, and other ethnic collections (right) complement the classical and contemporary items in this major museum.

"Night on the Town" buses will get you there

Thanks to Gale Research-sponsored buses and the Night on the Town Subcommittee chaired by Kathy Connell, conferees can enjoy a "secure and adventurous evening" at many of the top attractions of greater Dallas. Shuttle buses will run the nights of Fri. June 22 and Tues. June 26 from the Fairmont Hotel. Night spots along the route include the Tango (rock), No Whar but Texas (country western), and Cafe Dallas (singles). Dinner options range from the ferny San Francisco Rose burger joint to the three-star-quality Seascape Inn. Shopping addicts can be let off at The Corner, Caruth Plaza, and Northpark shopping malls.

The Subcommittee will distribute (from the Information Booth at the Convention Center) color-coded suggestion sheets with ideas for living it up on your evenings out.

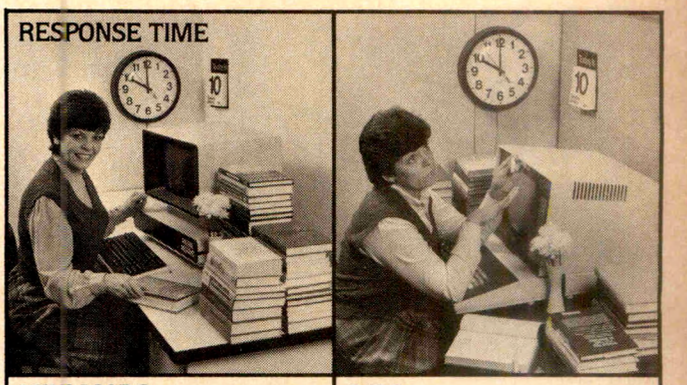
Among other good people assuring good times in Dallas when you get there are: Gayla Stapels-Cloud, chairing the Students to ALA activities; Dona Wiseman, JMRT Local Arrangements chair; and Dallas Local Arrangements Chair Dick Waters. □

MINI MARC vs. OCLC

(6 Points OCLC hopes you won't consider)

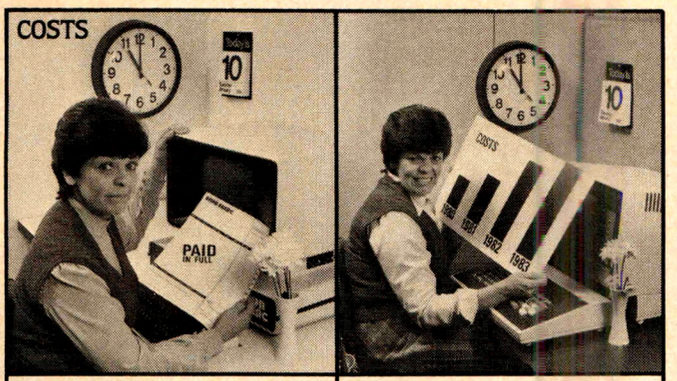
MINI MARC
40 Catalog entries per hour

OCLC
12 Catalog entries per hour



MINI MARC
Instantaneous

OCLC
Up to 45 seconds



MINI MARC
One time capital investment

OCLC
Spiraling operating costs

MINI MARC
Immediate access

OCLC
Minimum of 7 to 10 days

MINI MARC
You own

OCLC
OCLC owns

MINI MARC
Quality cards on demand

OCLC
Minimum 9 days wait

WE REST OUR CASE FOR MINI MARC: THE VERDICT IS OBVIOUS.

library life

Anniston honors "Miss Mildred"

Mildred Goodrich came home again recently at the age of 84 to be honored by the library she helped build, the Public Library of Anniston (Ala.) and Calhoun County.

An audience of 200 well-wishers listened as library board president Grace Gates read a resolution proclaiming that the reference department would be named the Mildred Goodrich Reference Library. Goodrich took over Anniston's Carnegie library in 1920, fresh out of Columbia University library school. She served as city librarian—often with memorable style—until 1957.

When she arrived in Anniston, the library owned 8,000 books; when she left, the collection had grown six-fold.

David Eden, the present library director, told *AL* that Goodrich was one of the co-founders of the Alabama Public Library Service.

At the recent Anniston event Doug Wilson, Friends president, unveiled the new plaque bearing Goodrich's name. Friends and colleagues added a comment or had their letters read from a scrapbook commemorating the event. Among them were state librarian Anthony Miele.

Eden said that the former librarian sat through the entire ceremony "on the edge of her chair, absorbed in the details associated with almost four decades of service."

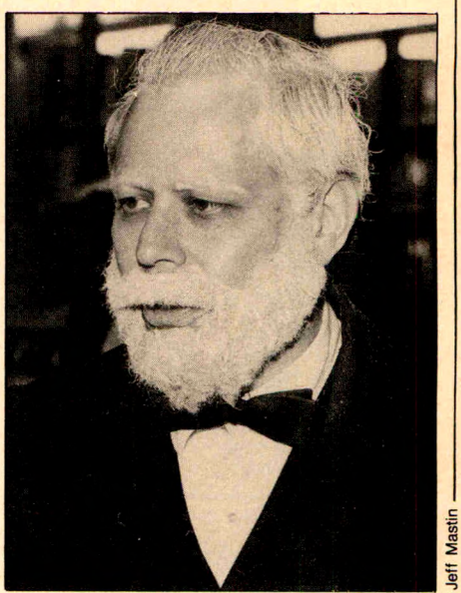
"Old librarians never die," he said, "but live on in the hearts and minds of those they served."

Carnegie for a day at 80th anniversary

At a recent reception celebrating the 80th anniversary of the Muncie (Ind.) Public Library Carnegie building, director Arthur Meyers dressed as Andrew Carnegie to greet visitors.

Meyers, who bears a slight resemblance to the philanthropist without the aid of cosmetics or costumes, adopted the role with some enjoyment. "The mayor even asked me for $10 million," Meyers said.

More than 100 people attended the event to view renovation plans for the old building, which include better access for the handicapped and energy improvements.



Jeff Mastin

Fred Friedman

Not just another chain gang

No, it is not a "three-minutes-to-midnight" drama; nor a hidden-camera shot of a library heist.

The photo catches librarians and Reading (Mass.) community members forming a human chain to move boxes of books to the Reading Public Library's new quarters. The move to a converted elementary school increased library space three-fold.

Nearly 300 community members moved the bulk of the collection in late February, saving the town more than $20,000 in professional moving costs. They responded to the library call for volunteers and transported the 78,000-item collection.

Local Jaycees hoisted reusable furniture into vans donated by a local moving company; the Lions Club and Boy Scouts moved a current fiction collection; and individuals carried a fragile local history treasure.

Two teams took on the bulk of the collection. One worked to transfer pre-boxed, labeled, and coded materials into vans; another adopted the chain principle to unload and, under staff supervision, reshelve books and AV materials into their new home. Library Director Barbara Nelson directed their efforts.

Larry Murphy

John Henry Faulk, left, folklorist and entertainment personality, shares stories of his work and memories of his friend John Lomax (in portrait) with Don Carleton, director of the Barker Texas History Center.

Sounds of Texas history echo through Barker Center

From a Texas governor's 1905 comments on the future of the state to a 1941 recording of gospel singing the day Pearl Harbor was bombed, the sounds of Texas history echo from an exhibit now at the University of Texas Barker Texas History Center. Part of the UT/Austin Libraries, the center will host the exhibit through Aug. 31.

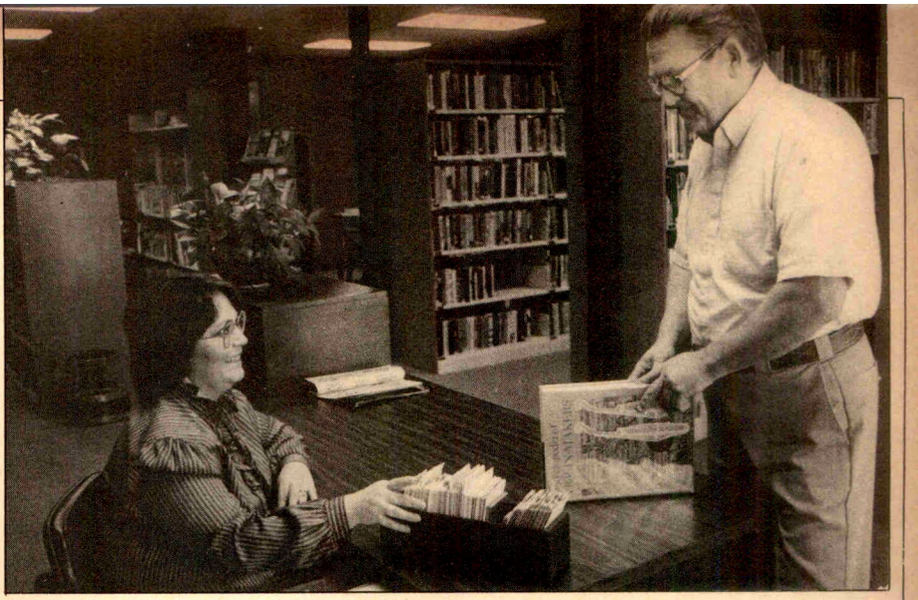
"For the Record: the Barker Center Sound Archives" includes many sound recordings in the center's historical collection and reflects four general areas: Texas history, pioneer field recordings of Texas folklorists, UT history, and Texas music.

Included in the folklorist section is a tribute to John Henry Faulk and John A. Lomax. Lomax is credited with first recording numerous songs of the cowboy, including "Home on the Range."

Through his interest in the songs of Texas prisoners, Lomax discovered blues singer Huddie Ledbetter, also known as Leadbelly.

Faulk concentrated on recording spirituals and folk songs from the black culture. A special highlight of the Faulk collection is a Sunday worship service at an Austin Baptist church the day Pearl Harbor was bombed. The service included a song titled, "I See Trouble in the Air."

Faulk is perhaps most widely known for his successful 1956 lawsuit against Aware, Inc., the ultra-patriotic group of McCarthy sympathizers who generated the blacklist against members of the entertainment industry.



Librarian Trotter and Mayor Barker reap bibliographic benefits of a gas well.

Town is fuming—and that's good news for library

Ever since the town of Attica, Kans., (population: 740) inherited seven-eighths of the rights to a natural gas well last year, life for its public library has drastically changed.

The city struck the pay zone several months ago when prospectors drilled on municipal property for natural gas. The first well, Attica I, went to water, but Attica II has been netting about $100,000 a month.

According to librarians Hallie Carpenter and Sandy Trotter, people wouldn't even come into the old library. "They would get claustrophobia being there," said Trotter. The library was about 6 feet wide and 36 feet long, and mismatched shelving ran along the length of the room.

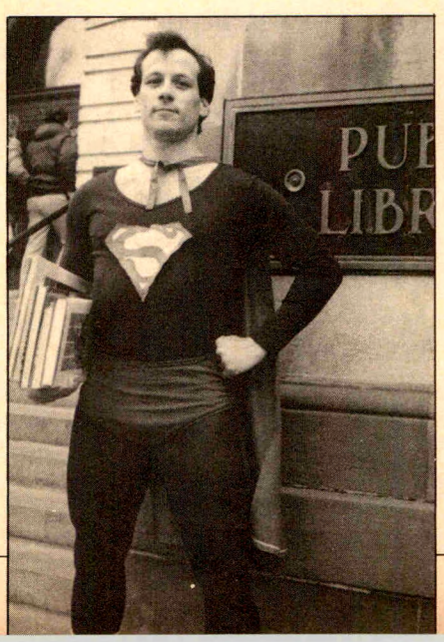
But on Valentine's Day, thanks to a share in the city's good fortunes, the library was reborn in a well equipped, remodeled building. The library formerly received an annual budget of about $3,000; this fiscal year the City Council allocated $50,000 to remodel the newly acquired building.

Mayor Johnny R. Barker reported that his wife was on the library board and one day came home and asked, 'Why can't you keep the library open four days instead of two now that there's money in the treasury? I told her that you needed something to stay open *with*, like a bigger building."

The city purchased the cafe next to the old library and put city employees to work on remodeling the structure. Some retired members of the library board who had carpentry skills pitched in, too.

"There's no comparison to what we had before," Trotter told *AL*. "We have beautiful steel shelving with end panels in burnt orange and inside shelves in cream color. Preschoolers now have kidney-shaped tables.

"We have projects that cost $800,000," said Mayor Barker, but they don't mean as much to me as this one. Passing the library and seeing those kids reading at those little tables . . . it's something that's there after you're gone."



Superman promotes Milwaukee NLW

Superman got the National Library Week message across when he visited Milwaukee's new downtown shopping mall, the Grand Avenue, on April 8. With him was his friend, Wonder Woman, who helped the superhero talk up the library's resources.

Both were hired from a local novelty telegram business called Celebrations.

They handed out calendars and bookmarks promoting the system's NLW events.

The calendars, heralding Superman's (and ALA's) message that "Knowledge is *Real* Power," were available at all library locations, advertised in local newspapers, and mailed to the library friends group.

MODERN SUBJECT ACCESS in the Online Age

by Pauline A. Cochrane

with Charles Bourne, Tamas Doczkocs, Jeffrey C. Griffith, F. Wilfrid Lancaster, William R. Nugent, and Barbara M. Preschel

The impact of technological developments on subject access

EVEN AS WE GET A BETTER FOCUS ON THE changes in subject access brought about by computers, we notice changes in the computers themselves. We must ask what those changes are and how they will affect both the user in search of information and the systems we have created to provide subject access. The terms "information technology" and "information industry" have come to include a great deal more than computer technology, although the computer is central to the storage and retrieval of information. Anthony Oettinger of Harvard University and Forest Woody Horton, Jr., have developed an integrated model of the U.S. "infostructure" that includes communications and integrating technologies as well as information technology. Broadcast and communications channels and content services and deliverers complete their structure.[1]

In the figure we have used to show the subject access environment (Lesson One, *AL*, Feb., p. 83), we show several computer systems merging at the user interface. A user in one library can access many computer systems because of recent telecommunications developments. One computer system can be linked to another so that data and programs can be automatically transferred or "downloaded" from one to the other. Such developments were hardly contemplated when library automation efforts began some 20 years ago. These developments are having a tremendous impact on *what* and *how* we catalog or index, *how* we search for information, and *what* information we search for.

The hardware at the user interface is called "terminal equipment" because we think of it as the end of the line, the point where we can send commands to and receive messages from the large computer, also called the "mainframe." More recently, we have been using "intelligent terminals" or "microcomputers" at this point. These machines are computers—albeit microprocessors—that at first had more limited capacity and less storage than a mainframe. Now microcomputers are being built with as much as or more capacity than mainframes.

Rosenberg's article on the Personal Bibliographic System is a harbinger of things to come.[2] The technological developments he describes could revolutionize subject access even more than the advent of computers in libraries. Think of it. Users will soon be able to devise their own information systems at their own microcomputers as they use our information systems. Eventually they will look at our information services as back-up systems or places to download records from.

Libraries have been "downloading" from OCLC and other bibliographic networks for some time, transferring catalog records from the utility's computer to their own systems and performing additional operations with the data. The *library user* may soon be able to do something similar. This is an earth-shattering thought, because it may mean that we will no longer "control" the way people search for information or that we could control that process even more if we focus on the potential of both micros and mainframes. It's as if we could help graduate students organize their own "card catalogs" from all the shoeboxes of 3x5 cards they generate while writing dissertations. This challenging possibility places our focus squarely in the middle of the subject access environment figure in Lesson One—at the user/system interface.

The technological developments we see in television commercials for office automation and computer games will have an impact on our subject access efforts, because such systems will influence our system design. The *user friendliness* of these systems is not just a gimmick. It is a revolution in the design principles underlying information technology. The fact that an 11-year-old at an Apple IIe can help his father with the company's monthly financial report shows the simplicity of computers today. Subject access systems in libraries should be as easy-to-use as home and office computer systems.

Such developments are quite a challenge for the information profession, which does not yet have a sound theory explaining information-seeking behavior. We cannot model that process in the same way that VisiCalc models standard accounting practices. Without a model, many think our system designs will continue to be as varied as the individual designers—back to the six blind men and the elephant again! Without a blueprint of how most people want to search, we

will continue to force them to search the way we want to search. Margaret Beckman's comments in Lesson Three of this course (*AL*, April, p. 252) alluded to a breakthrough in subject access because Artificial Intelligence research is far enough along to provide some useful models. Luckily, researchers in our profession are contributing to those developments.

Much will happen in the next few years to affect all aspects of subject access. One person cannot monitor all developments; so I have cast the net again for up-to-date opinions, this time on technological developments that could affect subject access. I am very grateful to the six people who took time to come to our "class in print" and present their thoughts on subject access and information technology. Each is viewing a different aspect of the subject access "animal." But their remarks raise important issues also raised by the respondents in Lessons Three and Four: Can we afford to ignore the impact technology has on subject access, for example, free-text and possibly full-text searching? How should we design access in multifile systems? How will we make our systems more user friendly?

Notes

1. Horton, Forest Woody, Jr., "The Information Industry Talks to Wall St.," *Information Management* (Dec., 1983), 30, 34.

2. Rosenberg, Victor, "A 'front end' to the online library" *American Libraries*, 15 (Jan., 1984), 46, 48.

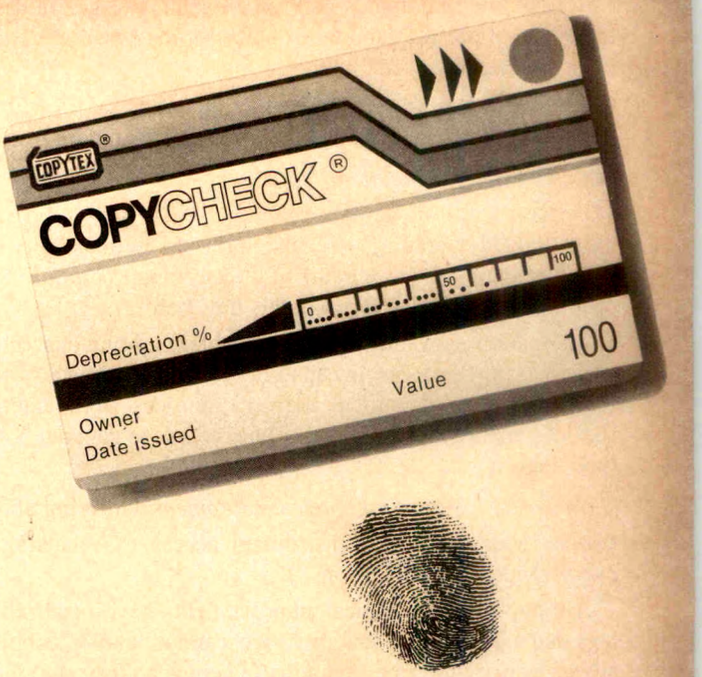
The experts speak on subject access and technology

I've assumed that "online catalogs" means "public online catalogs." What is provided for the library staff member would probably be more than for the public user. The major impacts on these systems will be in the storage and communications areas.

Storage costs will continue to decrease, resulting in such features as:

- Storage of documents text that was not considered technically or economically feasible earlier. (At one point in online history, we could not afford to create and store index entries to article titles; we passed that point. Later, it was feasible to store the index terms and the display record associated with article abstracts. Now it seems feasible to store the full text of the articles themselves.)
- Storage of expanded index terms and fewer coded or abbreviated index entries.
- Storage or record augmentation (e.g., addition of tables of contents, captions, reviews, holdings, or local headings information to a bibliographic record).
- A need for fewer stop words. (Every stop word is someone's search word—e.g., Vitamin *A*, *in* vitro, "*To* Be or Not to Be," "Gone *With* the Wind").
- The ability to handle larger files and larger answer sets and permit multifile searching.

(Continued next page.)



NO TWO ARE ALIKE.

Finally, security with a guarantee.

The new Copytex debit card copier control system offers absolute security. The Copytex system uses a revolutionary technique which makes CopyCheck cards the only debit cards impossible to duplicate or counterfeit. Each user card is inspected for its individual microstructure, which is as unique as any fingerprint. If the card's microstructure does not match what is encoded on its mag stripe, the card is rejected. Security is guaranteed.

One system above the rest.

No two debit card systems are alike, either. Copytex offers several outstanding advantages in addition to total security. Unique accounts can be assigned to individuals or departments. Troublesome key counters are replaced with convenient account cards, thus eliminating unauthorized copying. An optional printer is also available for analysis of copier use and system performance. **Plus, each card has a visual indicator of its current value.** No surprises and no more arguments over credits. Get the unduplicatable original...get Copytex and get the benefits and total support from Infortext Systems, Inc., the recognized leader in copier control systems.

Infortext® Systems Inc.
Get your copy costs under control.

(Modern subject access continued.)

• More online search aids and search helpers (e.g., guides to the different prefixes and index entry formats used in various files and search systems).

• More dynamic file maintenance (updating a file during regular hours instead of when a system is not in use).

Enhanced communications capability will mean:

• Higher speeds of access.

• Unattended operation (e.g., the ability to automatically call up a terminal in the wee hours of the morning to produce SDI prints or offline prints from the day before).

• Automatic logon, downloading, and text-editing capability, as well as post-processing capability (e.g., re-billing a system for searches or document delivery services from external services; extracting data from online records to generate SAS-type reports).

Lower cost for terminal/modem equipment will bring about:

• More widespread and distributed access ("A catalog in every student's dorm room").

Although great technical improvements have occurred in terminal equipment capability, we cannot ignore technical advances in mainframe capability. There is no reason to think centralized systems won't have the same potential for improvement as decentralized (terminal-based) systems. You can put extra "smarts" in the terminal, the central facility, or both.

CHARLES BOURNE, head
Product Development
DIALOG Information Services

For the sake of simplification, I have grouped my comments into three areas:

Information generation/analysis/synthesis:

The most important developments for subject access in these areas are:

Electronic publishing;

Powerful new capabilities expected from the pragmatic application of artificial intelligence, language analysis, and techniques for automatic indexing of machine-readable texts, and the integration of new information into the existing electronic storehouse(s) of mankind;

Integrated text, numerics, coded data, graphics, and image handling capabilities.

Hardware/software storage/access:

Parallel processing and distributed processing will enable very large central electronic information repositories/utilities supporting very large databases and tens of thousands of simultaneous users to come into wide use. (There will be high speed data transmission capabilities via cables and satellites.) Early forerunners of such systems are OCLC and CAS Online (Chemical Abstracts Service).

Local processing will have unprecedented capabilities. Consider the trend shown by IBM/PC/XT 370, which puts the full power of a large IBM 370 into the IBM/PC, or the one-billion-character micro disk drives announced by Shugart at $5,000 per single unit, or the videodiscs interfaced to 16-bit and 32-bit micros and supermicros.

Special hardware devices for searching will be available and widely used. Notice the trend toward associative hardware search engines, e.g., GESCAN 2, a General Electric computer built specifically for searching rather than for general purposes.

Distributed access/processing will be facilitated by user transparent network and local switching software/hardware capabilities. AMA/MINET (American Medical Association and GTE), CSIN (Chemical Substances Information Network), micro-CSIN, SCI-Mate (Institute for Scientific Information) were early trend setters.

User interface:

Multilevel, multisystem interfaces will support novice, occasional, and expert users with natural language subject searching strengthened by artificial-intelligence-type processing and automatic system selection/switching. The early (and primitive by future standards) examples are Knowledge Index, BRS After Dark, BRS Colleague, and CITE (Computerized Information Transfer in English, from the National Library of Medicine).

TAMAS DOCZKOCS, researcher
National Library of Medicine
Bethesda, Md.

I work in a multisystem, multifile environment developing online retrieval services. I also teach both professional searchers and end users how to use those services. The online catalog for my institution is just one of the files available for searching. The catalog is neither the most complex, in terms of data elements, nor the most sophisticated, in terms of retrieval capabilities, that I must help users search. Trends that I see among the systems I work with lead to these comments concerning subject access in the online catalog:

1. *Searching the full text* of the bibliographic record with boolean capability is essential. More powerful machines and more efficient software will make this possible. More importantly, however, users will become (indeed already are) more demanding and will require it. A file or a system that allows only controlled term searching will be incomplete. The opposite, however, will also be true, i.e., files or systems that allow only text word searching, as some of the more recent systems do, will also be incomplete.

2. *More records will contain more text,* including many that will include the full text of an item. This will occur in at least two ways: improvements to existing technologies will allow many more of the complete works represented by catalog records to be both searchable and displayable; and developing technologies such as the optical disk will allow a complete work to be displayed, although not necessarily made directly searchable.

As these developments occur, the need to improve our methods of subject access will become more, not less important. Controlled vocabulary systems that help the user manage the search process become critical with technologies that allow more and more words to be searchable online. It

An important role for you in a major national program

THE PROBLEM IS BIG:

AT LEAST 23 MILLION ADULTS ARE FUNCTIONALLY ILLITERATE.

The financial cost to taxpayers is in the billions. The losses in self-respect and quality of life cannot be priced.

But this is a problem we *know* how to solve. The role you play, with your library, will be critical in making this national assault on illiteracy a success.

Here's what's backing you up: a massive national advertising campaign involving print, radio, and television developed by one of the country's top advertising agencies.

1-800-228-8813

A toll-free hotline number—already in service—referring callers to local agencies that can provide help. A recent national television program on literacy generated over 7,000 calls to the toll-free number.

But *your* telephone won't ring unless you and your library are registered in the national directory of organizations that have volunteered to join the coalition.

Here's what you and your library can do:

- Organize, coordinate, or just participate in a local coalition that provides a volunteer service and teaching for adults.
- Sponsor public-awareness programs that focus local attention on illiteracy problems in your community.
- Develop a collection of special materials for beginning adult readers. Prepare literacy packages from your collection (booklists, pamphlets) to circulate to individual readers, tutors, and other literacy agencies.
- Provide an information/referral service to direct people to other agencies to receive learning assistance. Compile a directory of local literacy programs.
- Offer services to new readers: counseling, bibliographies, book-discussion groups.
- Coordinate library-sponsored tutorial programs.
- Cooperate with other agencies to develop tutorial/learning programs.
- Help publicize community literacy programs in the local media.

You can register your library with the national Coalition by pledging to take action on any of these suggested activities.

Just complete the attached form and mail to the Coalition for Literacy/OLOS, American Library Association. A packet of helpful information will be returned.

Tear off and mail

Yes, we want to help combat illiteracy in our community. Please register our library in the Coalition for Literacy referral databank. We understand callers from our local area will be given our name and may contact us either to volunteer or to receive reading help.

As a local resource we pledge to:

- ☐ Help create a community coalition.
- ☐ Strengthen our collection of special materials for beginning adult readers.
- ☐ Serve as a clearinghouse for community literacy programs.
- ☐ Sponsor tutorial programs in the library.
- ☐ Offer services to new readers.
- ☐ Sponsor public awareness programs on literacy.
- ☐ Help publicize community literacy efforts in the local media.
- ☐ Other_____

Note: you must list at least one activity to be registered with the **Coalition for Literacy.**

a

There are literacy programs throughout the country

IN CALIFORNIA

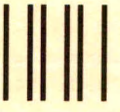
The California State Library has provided $2.5 million to establish a statewide literacy program including grants to local libraries. Working in partnership with other literacy providers, the California Literacy Campaign provides training programs, technical assistance to community organizations, and resource centers in 100 communities served by 27 public libraries throughout the state.

IN KENTUCKY

The Kentucky Coalition for Literacy has involved public libraries in more than 50 counties. The regional library system helps to develop volunteer groups in individual counties. Local literacy councils throughout Kentucky include libraries, businesses, and industries. Local libraries offer services ranging from organization to administration.

WHAT WILL HAPPEN IN YOUR LIBRARY?

That's up to you! What you do will make a difference in the quality of life for every adult you help.



No postage necessary if mailed in the United States

takes just a few searches of the full text of several years' worth of newspapers to illustrate both the strengths and the significant weaknesses inherent in such systems.

Techniques for improving subject access are important even with technology that displays the image of the work without making the individual words searchable. The cost of developing, maintaining and using these systems is great; they require search facilities that maximize the likelihood of users finding the most appropriate works for their queries. Searches that result in too many or too few hits are costly and make inefficient a system designed to present work to a user at a terminal.

We know what we need to improve subject access in our online catalogs, because we have not yet built into our online systems much of the structure for subject access that is already present in subject cataloging. That structure is internal and known by the person analyzing the work; it needs to be external and known by the person seeking the work. Placing a copy of LCSH next to the terminal does not meet those requirements.

Online catalogs have forced us to rethink what the user understands about our systems, and have confronted us with an obligation to make those systems easier to use. Many of the difficulties users encounter are mechanical in nature, and arise because computers are not yet forgiving enough in what they can accept as input. Such problems will disappear as both users and computers become more sophisticated. We already have systems that are easier to use than others, and we are discovering the design principles that will insure that the search language or the terminal are not the problem.

The online catalog provides an intriguing challenge because it offers librarianship the opportunity to make highly developed tools available to users in new and creative ways. Those tools must be designed into a system so that they work automatically for the user and are as explicit and self-explanatory as possible. Why should a user ever enter a search term that does not provide a link to the syndetic apparatus and a suggestion about how to proceed? And as we make those suggestions, we cannot forget that terminology clear to us may not be clear even to the highly educated user. (It is a common occurrence for a student in my introductory class to ask whether the "broader term" will retrieve all the items that have been cataloged under the "narrower terms.")

In short, we need to *make our systems easier to use* in a mechanical sense, design catalogs that are clear and understandable to the user, and *make the syndetic structure work automatically* on the user's behalf. Once we attain these goals—one hopes that will occur well before the year 2000—we will be ready for an even more creative and challenging effort. We will have solved the problems that hinder the user. The system will no longer be the chief limitation.

The *major barrier* will then be our limited understanding of how people seek information, relate ideas, and ask questions. That will open a new phase of research into the relationship between the process of human inquiry and the analysis of information. In a sense, we now have an intellectual problem similar to one that first confronted Freud. We need to understand and solve the "problems" people encounter with our online catalogs. After we solve those problems, we can move on to more positive questions about the ways people seek information. We must avoid the trap, however, of assuming that the problems we see now represent the extent of the catalog's ability to aid our knowledge gathering process.

JEFFREY C. GRIFFITH
Congressional Research Services
Library of Congress

(The author's views are his own and do not represent those of the Library of Congress or the Congressional Research Services.)

Computer technology has been used by libraries in two rather separate applications: 1) to automate record-keeping/inventory control; and 2) to allow online access to electronic information sources not physically present in the library. The first application is of lesser importance. It changes the way that libraries manipulate records representing physical artifacts (mostly books), but not the way the artifacts themselves are handled.

Within the next few years, the distinction between these applications will become blurred as more and more of the information sources themselves will be in electronic form—either owned by the library (e.g., on optical disk) or assembled through a network.

As electronic *access* increasingly replaces *ownership*, the catalogs of libraries must change so that they point to *assembled* information sources and not just *owned* sources. All catalogs (and all collections) then become the same because all sources will be assembled (in one form or another, at one level or another) and accessible to all libraries and users.

Traditional library approaches to subject access will be replaced. The use of controlled subject headings will give way to some sort of natural-language approach. Conceivably, library users will be able to interrogate vast electronic information resources through questions posed in sentence form—at first by keyboarding and later, perhaps, through voice input.

F. WILFRID LANCASTER, professor
University of Illinois library school
Urbana, Ill.

Image Automation presents a new need in subject access for languages to describe pictures. The microcomputer-controlled laser videodisc provides the *first* practical means of storing, organizing, and selectively retrieving massive collections of color pictures. A standard 12-inch videodisc can hold up to 54,000 separate pictures per side, each with a unique and computer-accessible frame number. Any randomly selected frame has an average access time as low as 1.5 to 2.5 seconds, depending upon the videodisc player used. The technology offers a potential for providing subject access to pictorial materials in a way that far outdistances traditional library practices.

New methods are needed for pictures. A picture is not a book, yet traditional subject access practices for pictures have evolved from those for the monograph, a development

User-friendly furniture . . .

New Computer Compatibles by Library Bureau

Library Bureau introduces furniture made specifically for your computers, the functional yet stylish Computer Compatible Collection.

Available in a variety of distinctive designs, finishes and sizes, the Computer Compatibles include tables, circulation desks and workstation carrels. The furniture is durable and adaptable, with a complete line of accessories offered to meet your individual needs. CRT tilt platform and adjustable keyboard platform options provide maximum comfort for the user.

For more data on the Computer Compatibles, return the coupon below or call Library Bureau at (315) 866-1330.

See us at the American Library Association Convention (Booth #710-712)!

LIBRARY BUREAU

Makers of Fine Library Furniture for Over 100 Years

sequence I believe to be conceptually incorrect. Because the individual pages of a book derive their importance from being a part of that book, it has been assumed that the individual pictures in a collection derive their importance from being part of that collection, and pictures have been so treated from the standpoint of subject access, which is to say hardly at all.

A proposed MARC format for prints and photographs was based upon the MARC format for motion picture films, which in turn was based upon the MARC format for monographs. But a vast gulf separates the succession of images that constitute a motion picture film from the succession of images that constitute a picture collection. As should be obvious, the former has a linear continuity, like a book in many respects, whereas the latter is a nonlinear set of discrete and discontinuous items, each deserving individual subject access.

By "subject access," I mean being able to find a particular picture or set of pictures contained in a large collection on the basis of the subject content of the images in them, rather than upon such factors as physical description, creator of the image, or membership in a larger collection. This (possibly controversial) approach to subject access could be called the "content-based" or "intelligence analyst" approach to pictures, as opposed to the traditional "bibliographic" approach of libraries.

With technology now providing us rapid transmissions of satellite pictures in massive numbers and massive storage of image materials on optical disks, we must develop formalized means of describing the content of pictures (Picture Description Languages is the current term). We must also develop advanced query languages, new database structures (most probably relational in nature), and new computer architectures designed initially for picture retrieval, and eventually for picture processing.

In the relatively long term we may expect some help from the computer in picture indexing and classification (the term of art is "Scene Analysis"), but now we must at least recognize that the floodgates of computer handling of pictorial data have opened, and that image automation is the third and newest wave of information processing.

WILLIAM R. NUGENT, assistant director
Automated Systems Office
Library of Congress

If technological developments in the information industry in the next 15 years continue past trends, they will be characterized by three things: more user friendly access; larger stores of machine-readable information; and quicker access to specific pieces of information. This will be true of library catalogs as well as all other indexes, databases, or similar compilations.

Larger stores of information

There will larger stores of machine readable information both as byproducts of the computer typesetting process and as a form of primary publication. As the speed of the computer increases and optical disc storage capabilities are used to pack data ever more closely, access to individual pieces of information will be quicker but more difficult intellectually. The major problem, then as now, will be how to tag the individual piece of data with a subject label that will allow users to identify it unambiguously and retrieve only what they want and can use.

User friendly access systems

Library catalogs will join other bibliographic databases in being available online in people's bedrooms, dens, and offices. Since no information professional will be standing by to help when users/clients cannot find what they want, online information systems will need more in the way of cross references, notes, and menus. Syndetic devices such as internal dictionaries of synonyms, automatic switching among networks of headings, automatic displays of hierarchical and related terms in the system should be transparent to the user. They should lead inexperienced searchers to the information they want without the searcher being aware of the effort involved. Perhaps an "inference engine" like the one we are told is a major component of Fifth Generation computers can be used for this.

Studies of users' online information seeking behavior should be used to identify "normal" information seeking paths and points at which the computer or other machine needs user input to choose among paths. Again, the "inference engine"capabilities of Fifth Generation computers can help, but the user should always be able to override the "standard" path.

Quicker access

A combination of natural language *full text* searching and searching on assigned index terms will be used for subject access to online databases. However, the size and structure of the database is an important determinant of the cost-effectiveness, efficiency, and accuracy of retrieval. In a database as large as that of a large public library, the total database will have to be divided into subfiles of manageable size (classified?) before a full text approach is used (if it is). These subfiles might be based on non-subject characteristics such as intellectual level of the material or length of the text. Thus, an interdisciplinary search would be possible, but a 10-year-old would not get a graduate-level text and someone wanting a short, popular overview would not get a lengthy primary source.

Back-of-the-book and serial indexes done by human indexers will be produced in both printed and electronic form with a single keying of the index headings. These may be merged into databases holding full text of the books or bibliographic records. Users will be able to use the online indexes to identify parts of texts that they need and then print out only those parts for later perusal.

Will the proliferation of machine-readable indexes to individual publications result in a mega-index in which all these indexes merge? I doubt it because of the problem of standardization of terminology. However, the ability to compare the efficiency of indexes online will lead to higher standards for indexes.

ala report

Wedgeworth declares intention to leave HQ post in July 1985

ALA President Brooke Sheldon opened the spring meeting of the Executive Board at 8:30 a.m. May 2 with all members present.* Within the first hour, Executive Director Robert Wedgeworth formally announced that he will terminate his tenure at ALA in July 1985 (see box).

Wedgeworth, who was appointed to the post August 1, 1972, will be 48 on July 31, 1985. He had told the board orally last spring that he was considering leaving on that date, and this year he had scheduled an executive session May 2 at 4 p.m. so that the board could discuss a search for his successor privately.

Jane Anne Hannigan immediately proposed the meeting be open because membership is concerned with the process and there should be no mystery. Lynch read the ALA policy on open meetings. Josey, Farley, and Curley felt that since Wedgeworth requested a closed session he should have it, but the Executive Director himself said he had no secret information to impart. The board voted to open the 4 o'clock meeting.

At that two-hour session, Margaret Chisholm suggested the board needed a specific time frame. Past President Carol Nemeyer said the board would have to decide if the executive director should be a professional librarian and if a "head-hunting" firm should be employed. Vice-president E. J. Josey said the executive director should certainly be "from our profession." Hannigan proposed asking Council, units, and staff for their views on the position.

After discussing some of the Association's needs, the board assigned specific tasks to be completed for its next meeting in Dallas. The board's Administrative Committee, headed by Sheldon, is to develop appropriate documentation on the position, including a job description, and prepare a timeline for action. Personnel Committee Chair Judith Farley is to prepare data on search firms. Summers, Chisholm, Hannigan, Lynch, Curley, Minudri, and Snider are each to prepare at least one model on the search process.

Management and finances

Wedgeworth presented his management report to the board at its first meeting. As of March 31, ALA membership totaled 31,898, slightly less than the 32,075 of the previous March, he said. In the first year of the new organization dues schedule, organization members total 2,385, about 11 percent behind last March. Overall, Wedgeworth reported, ALA is projecting a positive balance of $108,000 at the end of fiscal 1984 (Aug. 31), compared to the budgeted $18,225.

Total revenues of $5.9 million are $354,000 lower than the pro rata budget but $112,000 ahead of last March. Total expenditures of $5.4 million are $220,000 lower than the pro rata budget.

As of March, 31 of the 35 new life members are fully paid at $1,500, yielding $47,000 added to the endowment. Another $2,000 for the endowment came from the dues check-off box on the renewal form.

The executive director also reported that the ALA Washington Office renovation is almost completed and that the new order billing system is now operating at Headquarters.

Jan Keene, chair of the Committee on Program Evaluation and Support (COPES) told the board COPES had reviewed the initial budget presentation for fiscal 1984–85 with Silas Wilson, the new ALA controller. COPES tentatively approved the budget ceiling of $9,461,081, less the amount included based on a $5 increase in registration fees at the 1985 Midwinter Meeting. COPES did not recommend raising the fees in a year members are being asked to increase their dues.

Staff salary adjustment

COPES expressed concern about the problems of controlling staff salary increases under the Hewitt plan adopted last October. According to recent staff evaluation, "90 percent of the staff walks on water," Keene remarked. It would be better if the increases clustered around the middle, she said, "though we understand ALA has a number of excellent people here." COPES favored the average salary increase of 5.6 percent for the current year as recommended by Hewitt.

Judith Farley, chair of the Personnel Committee, recommended the average increase be 6.6 percent to benefit staff morale, and said evaluations are expected to become

* Vice-president E. J. Josey, Treasurer Herbert Biblo, Executive Director Robert Wedgeworth, Immediate Past President Carol Nemeyer, Margaret Chisholm, Jane Ann Hannigan, Judith Farley, Regina Minudri, David Snider, F. William Summers, Arthur Curley, and Beverly Lynch.

Just one more year, Wedgeworth tells Executive Board

The following is a transcript of Executive Director Robert Wedgeworth's oral statement to the ALA Executive Board May 2, 1984.

"Last spring I indicated to you that in reviewing my tenure with the Association it had been my preference for a three-year contract, but that the board had prevailed upon me to accept a five-year contract ending in July 1985. I reviewed my career with the Association at that time and said I felt extraordinarily lucky to have been executive director during that period. Beyond luck and fortuitous circumstances, I think that I have contributed substantially to the success of the Association during that period.

"I would recall specifically to the Board's attention that personal membership reached an all-time high in 1983; we reversed many of the political problems that were affecting the Association when I came in 1972; the Association has a more varied and democratic decision-making structure; and the financial strength of the Association is apparent to auditors and bankers if not so apparent to the members. We have financial problems, but they are problems that can be resolved with effective management of the Association.

"Our public image looms larger than ever in the opinion of library leaders, government officials, and the general public. We are very proud that ALA Headquarters is a model among the association headquarters here in Chicago.

"During that meeting last spring I indicated it was not my intention to seek an extension or a renewal of my contract. I have been counseling with the Board in regard to that and I expect [to continue] to counsel with the Board . . .

"I expect to announce my intention to the Membership at the Annual Conference in Dallas. I believe it's important to note that I will provide whatever initial guidance is desired when the Board begins to discuss a search for a new executive director. I will stay on at work every day, exercising all the rights and privileges of the executive director and . . . help search for and train my successor. I will take appropriate measures to distance myself from the search process as you may ultimately define it."

ALANET welcomes personal members

ALANET, the Association's electronic mail and information service, is now open to all personal members of ALA as well as any library, supplier, or other organization.

At Annual Conference, System Manager Joel Lee will provide demonstrations and training in the use of ALANET at Booth 855 in the ALA Professional Exhibit Center in the Dallas Convention Center. Special conference promotionals will be available to all.

IF YOU'RE A MEMBER OF THE DATA PHASE USERS' GROUP, THIS IS FOR YOU.

Here's a toast to a very important group of librarians.

Data Phase has many reasons to give you a special thanks. Your input and feedback are two of our most valuable resources. And your active interest in library automation has helped make ALIS the most comprehensive integrated system in the field today.

More than anyone, you are aware of the dramatic effort we are undertaking today. You are a substantial part of that effort. And your support will undoubtedly benefit the future of library automation.

For your guidance, your support and most importantly, our partnership, this is a toast to you.

THANK YOU.

Data Phase

IF YOU'RE A DATA PHASE USER, WE'VE GOT A BOTTLE OF CHAMPAGNE FOR YOU.

Just return this coupon to your consultant, or send it to Toast, Data Phase, P.O. Box 797, Shawnee Mission, Kansas, 66202.

more stringent under the new plan and training.

The board voted to refer the salary adjustment item back to the Personnel Committee, the Finance and Audit Committee, and COPES for a single recommendation at Dallas.

On other personnel items, the board extended life, health, and disability insurance to permanent part-time employees on a prorated basis, and adopted Jan. 15, the birthday of Martin Luther King, Jr., as an additional staff holiday beginning in 1986.

Development Office proposal

At the board's request, consultant Theodore Waller presented a 9-page feasibility study on the creation of a Development Office at ALA.

Most of some 50 people interviewed, Waller reported, felt that such an office, "appropriately structured and staffed, would generate project and other funds that would significantly enhance the Association's resources."

The board accepted the report, approved a four-phase outline for creating a development office, and asked management to provide a plan for implementation at the fall board meeting.

AASL future structure

Regina Minudri, chair of the subcommittee appointed to respond to the problems outlined by the American Association of School Librarians Future Structure Committee (*AL*, May, p. 282), reported some progress. Minudri said the group is working toward a primary meeting with an AASL subcommittee at the Dallas conference. A matrix of key points is being prepared and a facilitator may be selected.

Long-range planning

Carol Nemeyer, chair of the board's Directions and Program Review Committee (DPRC) reported May 3 that the extended committee met with Nancy Bolt and Bonnie Juergens, representing the divisions; Gerald Shields and Bill DeJohn of the Planning Committee; and Sheldon, Josey, and Wedgeworth May 2 to define the process for the long-range planning requested by the units at their Midwinter preconference.

The board approved the group's recommendations:

- Sheldon will appoint a Process Planning Group including the following representation: divisions (2), round tables (1), COPES (1), COO (1), and the Exec Board (DPRC). The Process Planning Group is authorized to employ a facilitator to guide ALA through the process.
- The Budget and Planning Assembly will act as the steering committee.
- The executive director will appoint a

(Continued on p. 448.)

Nettie B. Taylor, Warren J. Haas, and Carolyn S. Peterson among top ALA award winners

Among the awards to be presented at the 1984 ALA Annual Conference in Dallas are:

Lippincott: Nettie Barcroft Taylor

This year's citation for the $1,000 Joseph W. Lippincott Award reads: "Nettie B. Taylor has mastered the art of gentle persuasion and has used it effectively to advance library service in her state, her profession, and her nation. ... Her insistent advocacy for school libraries and school librarians will long be felt in the pursuit of excellence in education." Taylor has been assistant state librarian in Maryland since 1960.

Dewey: Warren J. Haas

"In his long and distinguished career, Warren J. Haas has made major contributions in those areas of greatest concern to Melvil Dewey—library management, library training, and bibliographic control," says the citation for the 1984 Melvil Dewey Medal. A former library director at the University of Pennsylvania and Columbia University, Haas has been president of the Council on Library Resources since 1978.

Grolier: Carolyn Sue Peterson

"Carolyn Sue Peterson has made it her life's work to encourage adults to provide children with unlimited story experiences," the $1,000 Grolier Foundation Award citation reads. "Her innovative methods of recruiting thousands of adults to encourage children to enjoy reading are gaining wide use in public libraries and parent education projects around the country." Head of the Children's Department of the Orlando (Fla.) Public Library, Peterson has produced two films and launched a publishing imprint.

Beta Phi Mu: Jane Anne Hannigan

"For her persistent commitment to the ideals of excellence in teaching, her distinguished work as author and researcher, and her continuing dedication and devotion to the library profession and the future well-being of her students, the Association presents its Beta Phi Mu Award to Jane Anne Hannigan," the citation states. Hannigan is a professor of library science at the Columbia University School of Library Service.

H. W. Wilson: *Colorado Libraries*

The "attractive, appealing design" makes *Colorado Libraries* "a publication of which the Colorado Library Association can justly be proud," says the citation for the $500 H. W. Wilson Library Periodical Award.

Jones-World Book-ALA: Minnesota L.A.

The Minnesota Library Association won a $5,000 J. Morris Jones-World Book Encyclopedia-ALA Goal Award for the project "Building Ad Hoc Coalitions for the Public Good."

Howard-World Book-ALA: New York L.A.

The New York Library Association won a $5,000 Bailey K. Howard-World Book Encyclopedia-ALA Goal Award for its Membership Software Database.

H. W. Wilson Staff Development: Prince George's County, Md.

Prince George's County Memorial Library System, in the Washington, D.C., metropolitan area, won the $2,500 H. W. Wilson Co. Library Staff Development Grant.

Putnam: Virginia Boucher

The Herbert W. Putnam Honor Fund awarded $500 for travel, writing, or any other use to Virginia Boucher, head of Interlibrary Cooperation at the University of Colorado/Boulder Libraries, in recognition of her distinguished career in the development and promotion of interlibrary loan services.

ALA Equality Award: Margaret Myers

The Scarecrow Press, Inc., $500 ALA Equality Award was awarded to Margaret Myers, director of ALA's Office for Library Personnel Resources. "With vision, skill, and absolute integrity, Myers has consistently focused on current needs and interests of the profession in the area of employment issues and equality of opportunity for both men and women librarians," the citation reads.

Gale: Harvin Clarendon County, S.C.

For demonstrating excellent planning and innovation in sponsoring a $290,000 drive to build a new public library in a poor area, the Gale Research Company Financial Development award of $2,500 goes to the Harvin Clarendon County Public Library. "Leaving no stones unturned, the library carefully assigned creative, ambitious tactics to various segments of the population and involved the total community," the citation says.

David H. Clift Scholarship:

$3,000 to Maggie Fernandez, Cambridge, Mass.

Louise Giles Minority Scholarship:

$3,000 to F. Nell Thomas, Evanston, Ill.

Frederick Winthrop Faxon Scholarship:

$3,000 and a 10-week internship at the F. W. Faxon Co., Westwood, Mass., to Charis Bacheller, Newberg, Ore.

ACADEMIC AMERICAN ENCYCLOPEDIA

The *Newest* and *Most Current* Encyclopedia in the World Unequalled in Currency...Highly Recommended

The 1984 edition of the **Academic American Encyclopedia** maintains this acclaimed set at the peak of currency and quality.

The **Academic American Encyclopedia** is the first "completely new," multi-volume encyclopedia to be published since 1967. Right from the beginning, the major objective was to create and produce an "all-new," large-scale, English-language general encyclopedia containing the latest information available. The encyclopedia's text is completely machine-readable, thereby enabling computer technology to greatly enhance updating and revision — it is truly the most contemporary encyclopedia of the 1980's. (Now available online with BRS (Bibliographic Retrieval Service), Vu/Text, Lockheed Dialog System (July, 1984), Dow Jones News/Retrieval Service, CompuServe, and BRS/After Dark.)

Visit booth #739-749 at the American Library Association Conference in Dallas for a FREE gift and substantial exhibit discounts.

The 1984 edition includes:

- more than 1,750 revised or reset pages
- more than 1,300 revised articles
- more than 90 *new* articles
- more than 45 new or revised photographs/maps

(Advertisement)

This June, McFarland hardly knows whether to advertise its books or ring the firebell for information aflame. We refer to that hot commodity ever more being "marketed" by librarians. Underpaid professionals understandably accept salary doublings to go to work for for-profit outfits; steadfast librarians understandably imitate corporate successes and ogle fees as ways to make libraries thrive. It's a terrible problem. Libraries must *give* information.

McFarland's hottest current books, with good reason, are *Dying to Please: Anorexia Nervosa and Its Cure*, by Avis Rumney ($13.95; "A gem...succinctly synthesizes...cogently explains"—*Booklist*; "elegant and effective style"—*Transactional Analysis Journal*) and *Junior Broadway: How to Produce Musicals with Children 9 to 13*, by Beverly B. Ross and Jean P. Durgin ($13.95; "Highly recommended"—*Library Journal*; "spunky detail"—*Booklist*).

Also tops from McFarland are the late psychical researcher Louisa E. Rhine's last book, *Something Hidden* ($22; a surprisingly intimate and "touching autobiographical/biographical account...for the first time fully from the Rhinean viewpoint"—*Library Journal*; "clearly and simply written"—*Choice*) and *Television Comedy Series: An Episode Guide to 153 Sitcoms in Syndication*, by Joel Eisner and David Krinsky (880pp., $49.95; a blockbuster, fully indexed).

Another terrific idea-book from McFarland, Gayle Vinyard's *Super Treasury of 300+ Activities, Games, Arts and Crafts* ($15.95), gives handy details on quickly-put-together, rainy-day games for children and young people, using cheap or free common materials. A small price for 238 pages of good humored creativity, dandily illustrated on every page.

Jana Varlejs' *The Right to Information* (McFarland, $9.95) covers borrower privacy, librarians under subpoena, electronic publishing, the implications of paid-for facts, federal policies, and so on. From the book: "In the medical sciences, it has been proposed that a coin-operated pacemaker would be the best cost-recovery system." Librarians, be wary!

McFarland & Company, Inc., Publishers, Box 611, Jefferson, North Carolina 28640 (919-246-4460). Drop by our booth (867) in Dallas.

staff team on the long-range plan.

Publishing Committee

Chair Robert Stueart presented the Publishing Committee Report, including the newly written goals and objectives of ALA Publishing Services. The goal is: "To publish a broad range of timely and affordable materials of high quality in a variety of formats for library and information professionals and for library use."

In fulfilling the goal, Publishing Services "balances services to ALA members and to other library and information communities so that Publishing Services is efficiently managed *as a publisher*," the statement says.

The Publishing Committee discussed the need for a revised edition of the 1980 *ALA World Encyclopedia of Library and Information Services*, edited by Robert Wedgeworth. The committee supported Associate Director for Publishing Services Gary Facente's plan to publish a second edition in 1986 edited off premises by Wedgeworth at a royalty of five percent of sales.

In an executive session, the board agreed it could not approve the proposal with respect to the Wedgeworth royalties because of the Association's conflict of interest policy. (Publishing Services is now working on alternative arrangements.)

Intellectual freedom

Intellectual Freedom Office Director Judith Krug introduced Robert Peck, of the American Bar Association (ABA). Peck invited ALA to become a participant in planning and executing a nationwide commemoration of the bicentennial of the U.S. Constitution in 1987. ABA's goal is to create an understanding of the guiding principles of our country.

"There'll be no tall ships," Peck said, but he promised a PBS television series, complementary radio and press features, community forums, seminars, and symposia. Peck assured the board that the bar association needs no financial contributions, but solicits ALA help in planning and implementing the community forums, preparing reading lists, and translating the project to young people.

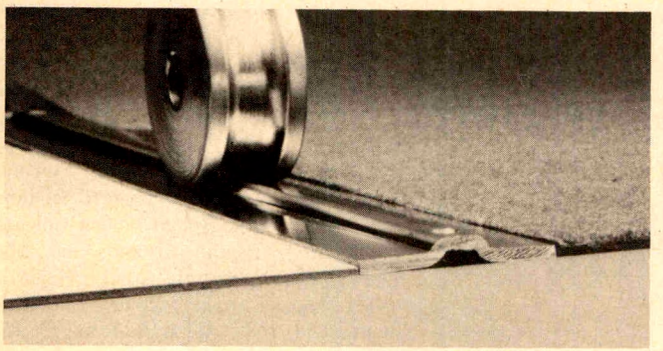
The board unanimously voted to participate in the bicentennial.

Krug also told the board that the Center for National Security Studies would like to list ALA as a sponsor of a conference on the Free Movement of People, Information, and Ideas Across the American Border, to be funded by ACLU. The board approved ALA participation.

International Relations

The International Relations Committee (IRC), chaired by Past President Thomas Galvin, asked the board to initiate negotiations leading to resumption of the Soviet-U.S. Librarians' Seminars. The committee said it prefers the structured seminar format used in 1979 to less formal group tours, and added, "full reciprocity must be an essential

RHC-Spacemaster movable shelving . . . featuring the "no problem" floor



Low-profile track, virtually flush with carpet or tile, rises only 3/16" in center of outer guide tracks (intermediate tracks are perfectly flat). No hazard to personnel, no impediment to carts, no debris-catching openings.

When you acquire movable shelving to solve a space problem, you may acquire a floor problem in the process. Most movable shelving systems have high tracks that require a built-up floor. Such floors are expensive, add non-structural weight, and require ramps. By consuming vertical space, they may also reduce the number of shelf openings you can have.

Another problem is that tracks recessed in built-up floors leave gaps. The gaps accumulate debris, impede the use of carts, and pose a hazard to personnel. Similar problems are caused by ramps.

RHC-Spacemaster tracks do not require a built-up floor. As illustrated, they are virtually flush in normal installations. They save on initial costs, and they offer the long-run benefits of easy maintenance and safety.

In short: no problems.

Call or write for "A Library Space Study" and brochures describing RHC-Spacemaster's complete line.

RHC-Spacemaster

DIVISION OF REFLECTOR HARDWARE CORPORATION

1400 North 25th Avenue • Melrose Park, IL 60160 • (312) 345-2500

element in any future U.S.-Soviet exchange program."

Biblo moved that the ALA president and the IRC chair approach the Soviet delegation at the next conference of the International Federation of Library Associations and Institutions to make the Soviets aware of ALA's new posture. The board unanimously endorsed the motion.

Ann Weeks, executive director of the Association for Library Service to Children, summarized the history of the International Board on Books for Young People (IBBY), the U.S. Section of IBBY, and the Friends of IBBY.

For the last three years, the Friends, the Children's Book Council, and ALSC have been working to combine the Friends with the U.S. Section. Weeks asked the board to approve the bylaws for the reconstitution of the U.S. Section, which will begin at ALA Annual Conference. The board unanimously gave its approval.

Pay Equity Commission

Vice-president Josey presented his proposal to set up an ALA Commission on Pay Equity to increase visibility of the issue as it affects librarians. He intends to appoint 11–14 members to hold an initial meeting in Dallas June 26, 6–8 p.m.

The commission, which has won the approval of all women's groups in ALA, will assess ALA activities and policies on pay equity, review the literature, develop specific activities for ALA conferences, and recommend ALA action.

Other board actions:

- The Executive Board extended to Julie Virgo the collective thanks of the ALA officers and membership for the high quality of professionalism and dedication she has given to ALA in her staff leadership role.
- The Executive Board fall meeting was scheduled for Oct. 24–25, 1984. □

CLENE, newest ALA round table, seeks members in 1984

If you are a staff development officer, training officer, library educator, workshop provider, consultant, or continuing education coordinator, CLENE can help you. The Continuing Library Education Network and Exchange (CLENE) Round Table, established by Council as ALA's newest unit at Midwinter in January, conducts workshops at all levels of continuing-education needs.

The new round table has organized a preconference workshop, "Orchestrating and Conducting Conference Programs," to take place Friday, June 22, 8:30 a.m.–3:30 p.m. at the Sheraton Hotel Trinity Room. Instructors are Margaret Irby Nichols and Syd Popinsky.

That evening the CLENE Round Table executive committee, chaired by John E. Hinkle, will meet in the Sheraton Hotel Executive Board Room from 8 to 10 p.m. At the same hour, the round table and the National Council on Quality Continuing Education will meet in the Hyatt Regency Executive Room.

For ALA personal members, CLENE dues for the remainder of 1984 are $15. Institutional dues are $50 for budgets under $100,000 and $100 for budgets over $100,000. The dues for sustaining members are $200. Address the CLENE Round Table, ALA, 50 E. Huron St., Chicago, IL 60611.

Added entries at Annual Conference

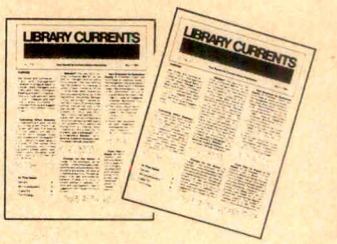
- The Junior Members Round Table invites library school students to a reception Sunday, June 24, 5:30–7 p.m., at the Community Showcase in the Dallas Public Library.
- Lester Asheim of the University of North Carolina/Chapel Hill will be honored at an open reception Sunday, June 24, 5:30–7:30 p.m. in Grand Ballroom A of the Adolphus Hotel. The library schools of the University of North Carolina and the University of Chicago are sponsoring the reception on the occasion of Asheim's retirement and

Introducing
LIBRARY CURRENTS

Your Source for Current Library Information

Reduce your professional reading to a manageable task.

Each month's issue of **LIBRARY CURRENTS** offers useful and timely summaries of library and management literature. Get the highlights of what's new on a full range of library topics: personnel, reference, children's work, microcomputers, serials, telecommunications, and much more.



". . . a great idea."
Alan Yount, Columbia Library, University of Missouri

". . . well organized, readable and attractively done."
Bob Alvarez, Library Administrator's Digest

LIBRARY CURRENTS is a great tool for libraries with limited serials budgets, for non-librarian administrators and board members who want to stay abreast of current trends, and for busy professionals who don't have time for in-depth reading outside their specialty.

Keep up to date without getting snowed under. Order today. Sample issue available on request.

Subscription rate: Introductory first year rate is $30; regular rate is $36 per year in the US and Canada. Foreign postage: Add $12 per year. All subscriptions must be prepaid.

Stop by Booth #978 at the ALA Conference in Dallas for a free copy of LIBRARY CURRENTS.

Practical Perspectives, P.O. Box 1796, Grass Valley, CA 95945

his election to ALA Honorary Membership.

● The Library Administration and Management Association Circulation Services Section is reorganizing as the Systems and Services Section. A new Circulation Services Committee has been formed within SASS and plans to hold two discussions. The first will be held Saturday, June 23, 2–4 p.m. at the Grenelefe Hotel State Room; the second on Monday June 25, 9:30–11 a.m. at the Fairmont Hotel Royal Room. Robert Allen Daugherty chairs the committee.

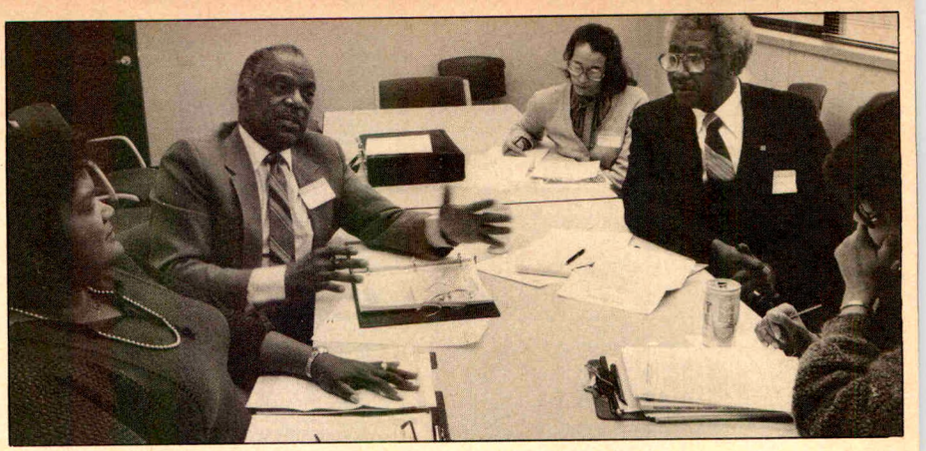
JoAn Segal appointed new director of ACRL

Executive Director JoAn S. Segal of the Bibliographic Center for Research (BCR) in Boulder, Colo., will become executive director of the Association of College and Research Libraries at ALA Headquarters Sept. 1.

Segal, 53, began working for BCR in 1978 as resource-sharing program manager, then interim director and, since 1980, as executive director.

After earning a BA in library service at Rutgers University, Segal earned her MLS at Columbia and a doctorate in communications from the University of Colorado. She has worked in college, university, federal, and special libraries, written numerous periodical articles, and taught courses in networking, microcomputers, and telecommunications.

Segal succeeds Julie Carroll Virgo, who resigned June 30 to join a management consulting firm.



Literacy groups join forces at ALA

Meeting at ALA Headquarters recently were representatives from the Assault on Illiteracy Program (AOIP) and the ALA-coordinated Coalition for Literacy (CL), discussing areas of possible cooperation. Pictured from left are Violet Malone, chair of the CL Executive Committee; Benjamin H. Wright, AOIP Executive Director; Emille Smith, AOIP administrative coordinator; Calvin Rolark, president of the United Black Fund and an AOIP member; and Jean E. Coleman, ALA's CL coordinator. AOIP is a black-oriented grassroots movement concentrating on the problem of illiteracy in the black community. Black community newspapers provide special reading materials and tutorial assistance in collaboration with other community groups. Carrie Haynes of AOIP will represent the organization at the CL booth (663) in Dallas during the ALA Annual Conference.

Hot off the presses

The following new publications may be obtained from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611. For details, write Robert Hershman.

Computer-Readable Databases: A Directory and Data Sourcebook, ed. by Martha E. Williams. 2 vols., $157.50 set (0-8389-0415-7). *Science, Technology, Medicine,* 1 vol., $87.50 (0-8389-0416-5). *Business, Law, Humanities, Social Sciences,* 1 vol., $87.50 (0-8389-0417-3).

Her Way: A Guide to Biographies of Women for Young People, 2nd ed., by Mary-Ellen Siegel. 418 pages, $35 (0-8389-0396-7).

Magazines for Young Adults: Selections for School and Public Libraries, by Selma K. Richardson. 464 pages, $22.50 (0-8389-0407-6).

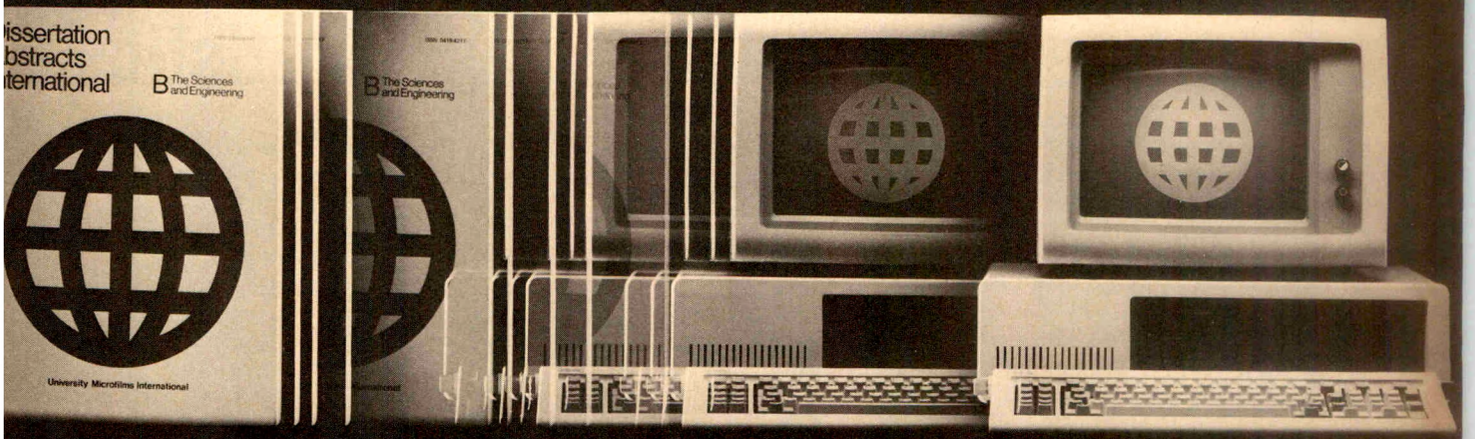
Reference Sources for Small and Medium-Sized Libraries, 4th ed., by Jovian Lang and Deborah Masters. 432 pages, $20 (0-8389-3293-2).

Research on Adolescence for Youth Service: An Annotated Bibliography . . . 1978–1980, ed. by Gerald Hodges and Frances Bryant Bradburn. 148 pages, $15 (0-8389-3297-5).

Unit offerings from 50 E. Huron

The Carnegie Corporation and the Development of American College Libraries, 1928–1941, by Neil A. Radford. (ACRL Publications in Librarianship, no. 44) 248 pages, $29.95 (0-8389-3295-9) from the Association of College and Research Libraries. □

How to find that one-in-a-million dissertation.



FAST.

Dissertation Abstracts Online, the new computerized version of Dissertation Abstracts International (DAI), can help you find the dissertation that most precisely meets your research needs—quickly and easily.

Dissertation Abstracts Online is comprehensive, like its printed companion, DAI—and, it's faster. You can complete full-text searches using keywords in both titles and abstracts in a fraction of the time it takes to search them manually.

What's more, **Dissertation Abstracts Online** is current. You can search the abstracts of all dissertations published in DAI since July, 1980. And nearly 2500 new abstracts are added to our files each month.

Use **Dissertation Abstracts Online** to locate dissertations written on or related to your research topic. To find ideas for the format or approach best suited to your research. And to determine the originality of your research topic.

For more information about how you can access this current, quick and comprehensive new service, contact your DIALOG or BRS representative directly. If you have questions about the file content, call us toll-free at 800-521-0600, and ask to speak to the Dissertation database specialist.

software showcase

F.I.L.L.S.:

Fast Inter-Library Loans and Statistics

by Rya Ben-Shir

Ed. note: "Software Showcase" features announcements of microcomputer programs of special interest to library professionals. Software designers are invited to submit brief factual descriptions of their programs for consideration.

Inclusion of a product in this department in no way constitutes endorsement by ALA or any of its units.

INTERLIBRARY LOANS ARE ONE of the major, labor-intensive functions common to almost every library. F.I.L.L.S., a microcomputer program developed by a librarian and a systems analyst, provides a faster, more efficient method for filling out interlibrary loan forms and keeping related statistics.

F.I.L.L.S. was developed after the author attended a Medical Library Association conference and realized that little inexpensive software was available to automate the interlibrary loan function. Jim Hees, a systems analyst who was helping the MacNeal Hospital library automate, offered to design the software and include a number of features that had impressed him in costly database-management software packages.

Several features distinguish F.I.L.L.S. from other ILL programs. Unlike other ILL software, F.I.L.L.S. does not require a database management software package to activate it. This means 1) a savings of $400–$700 for the database management software, and 2) greatly simplified loading-up by simply placing a disk in each disk drive rather than switching disks repeatedly (as one would with database management software used in conjunction with ILL software).

Another distinguishing feature is that F.I.L.L.S. is designed to be used by either clerical staff or professionals. When libraries automate a function it often becomes more complex, requiring a librarian to perform a task formerly done by a nonprofessional. Its menu-driven format makes F.I.L.L.S. simple to use. The program and its 70-page, illustrated user's manual have been thoroughly tested by secretaries, professionals, and volunteers using the manual as the only source of instruction. After reading the user's manual, the startup period to begin using F.I.L.L.S. as an active library tool is a single day, often less.

Rya Ben-Shir is manager of the Health Sciences Resource Center at MacNeal Hospital in Berwyn, Ill.

Time savings

Saving staff time was a primary objective in the design of F.I.L.L.S. In time-and-motion studies comparing F.I.L.L.S. to the usual method of typing out individual interlibrary loan requests, the program saved 40 percent of the time devoted to this complex, time-consuming clerical function. This savings is accomplished in several ways. For example, each periodical or library address requested through F.I.L.L.S. is assigned a unique number. The next time that periodical or library address is needed, it can be called up by simply typing that number. The ALA interlibrary loan form appears on the screen with the saved information (periodical title, library address, your library address, etc.) already inserted into the proper locations. This information is then automatically printed in full on pin-feed interlibrary loan forms.

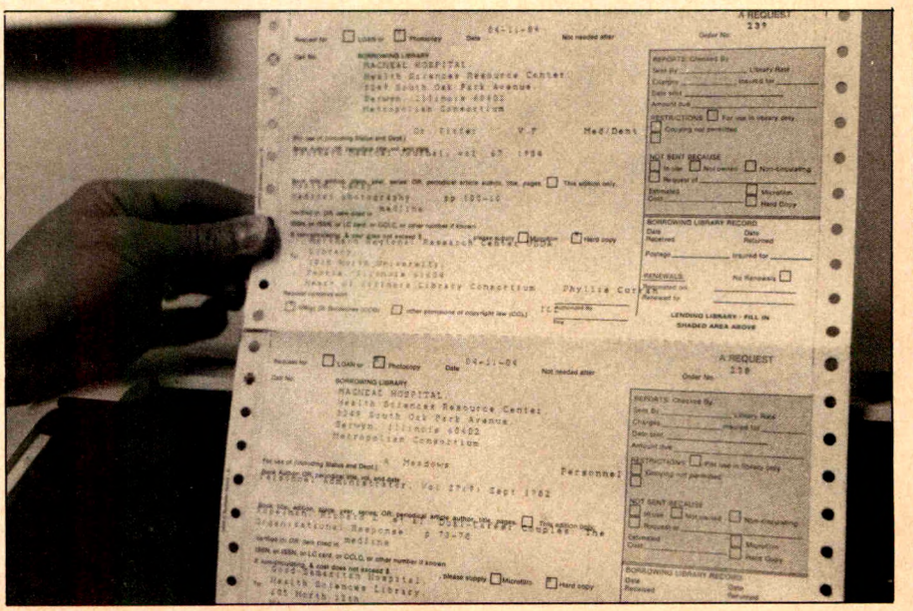
Several important statistical reports can be easily generated using F.I.L.L.S. At the strike of a key, nine preprogrammed reports are available:

- Alphabetical periodical title lists
- Alphabetical library addresses lists
- Number of requests per periodical title
- Total cost charged per periodical title
- Number of requests per library
- Average return time per library
- Percentage fill rate per library
- Total average cost charged per library
- Outstanding loan report

The reports enable librarians to keep track of the number of times each periodical title is requested, which libraries are being asked for loans too often, which libraries provide the fastest and slowest service, which loans are pending and taking too long to arrive, and more. This information allows librarians to manage their resources more effectively.

Cost and system requirements

F.I.L.L.S. is designed to rapidly print on the ALA-approved four-part continuous pin-feed interlibrary loan forms. IBM PC and XT versions of the program are available. The IBM PC version requires at least 64K with two disk drives (single- or double-sided). The IBM PC version has been tested and is compatible with the M-300 OCLC workstation. F.I.L.L.S. will support those printers that take pin-feed paper and are capable of printing 10 characters per inch. The program costs $295 plus $10 shipping. For more information about F.I.L.L.S. contact Rya Ben-Shir at MacNeal Hospital, Health Sciences Resource Center, 3249 South Oak Park Ave., Berwyn, IL 60402. The telephone number is 312-795-3089. □



An interlibrary loan form generated by F.I.L.L.S.

America. One-Way.

An extraordinary history of immigration into America from 1789 to 1929.

Inspired by the enormous interest of Americans in their immigrant ancestry, Research Publications presents a new, 35mm microfilm collection, **The Immigrant in America.**

Drawn from the archives of the New York Public Library, the Balch Institute for Ethnic Studies Library, the Immigration History Research Center, and the University of Minnesota Libraries, this rare collection covers two major waves of migration in 1820 and the 1880's when 37 million people came to America. This elusive and fragmented history is now preserved for the study of American immigrants' contributions, as well as their persecution, adjustments and bitter disappointments.

The 6,000 title collection will encompass 10 units of 28 to 45 reels. Standing order price per unit is $1700 (15% below the individual unit price). Prices slightly higher outside U.S. and Canada.

Not just a passing Phase

Not only has Data Phase arrived as a library automation "biggie," but now it dares ask customers, large and small, to think big

In January 1981, when *American Libraries* profiled CL Systems, Inc. (CLSI), Data Phase was mentioned as a sort of also-ran in the race for automated systems leadership. At that time, CLSI was grossing about $12 million a year and Data Phase was a five-year-old without even a portfolio of successful installations to move its sales along.

CLSI has continued to grow, as have several other library system vendors; but few have come of age quite as visibly as the Kansas-based Data Phase Corporation, now doing an annual volume of up to $9 million.

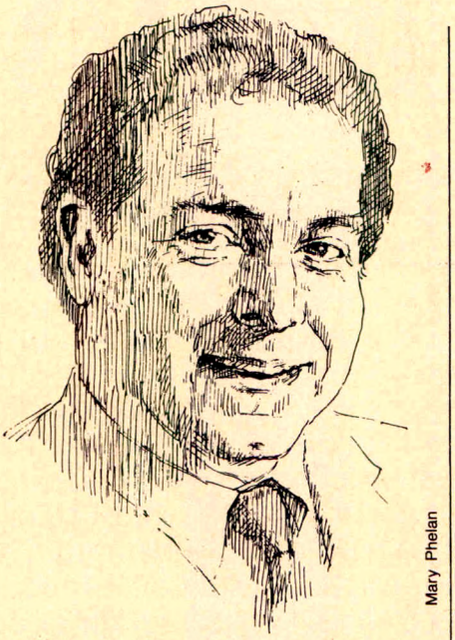
Part of that visibility can be attributed to its new president and CEO, Ronald J. Zazzara—about as hard a man to overlook as a pair of Kansas City tackles on the blitz. He is physically big, has big ideas, markets them in a big way, and of late is asking librarians to think big via "An Open Letter to the Library Community" appearing in the major library journals.

Although Data Phase has systems geared to serve all sizes of libraries, Zazzara is positioning the firm as a specialist in big circulation requirements, such as those of Orange County (Calif.), with up to 36,000 system transactions an hour, and the Chicago Public Library, with 88 branches serving the city's three million. Jobs this big also get big publicity when they run into trouble, as did the Chicago Public Library's $2 million circulation system last March. (It is still off schedule.) That goes with the territory.

Data Phase is visible in recent library news as well, notably for the 112-terminal ALIS III circulation system installed in the spectacular new Broward County (Fla.) Public Library (*AL*, May 1984), and for the public-access-catalog system it plans to introduce this month at the ALA Annual Conference in Dallas.

Let's automate, Pardner

One of Zazzara's boldest ideas, shared by Senior Vice President for Marketing Steve Weiss, is to come forth as a catalyst for library change rather than simply respond to the changes that come about without the firm's input. He calls this approach a "partnership" and says the entire Data Phase staff of 88 has had the word ingrained in their thinking.



Mary Phelan

Ronald J. Zazzara: seeking partnership

In the "Open Letter," the company said, "We intend to play whatever role we can to guarantee that the library community comes to the forefront and is on the leading edge of the information age."

American Libraries interviewed Zazzara and Weiss on April 10 in Chicago, curious to see how Data Phase planned to overcome the usual skepticism toward vendor "partnerships" shaping the library future.

"You studied psychology," we noted from Zazzara's vita. "Don't you think librarians might resist someone from 'outside' the profession telling them they're on the threshold of irrelevance?"

"Consider us as a developer of library technology," said Zazzara. "Technology can expand the reach of the library—make it more accessible. I think, from that point of view, we have a right to be a partner. If the technology is not allowed to develop, then the partnership fails."

Weiss added: "Simply as citizens we have a right to comment on something that affects society in the future. We really *feel* we're partners, based on a moral belief we have. Of course, we also want to make a living in this role, and we don't want to carry any big moral banners. But the fact is we'd rather see some 70 percent of the population as regular library users than today's 20 percent or so; and for that to happen, the library mission and its technology have to grow together."

"Still," we persisted, "don't you think it's a bit strong to play the Paul Revere of the revolution?"

Defending the company's "Open Letter," Weiss replied, "Anytime you can open a debate, start to develop a consensus, then it's immaterial whether you're leading or trailing the rhetoric. We knew the risk of running this letter and still thought it was worth it. If we get just a few good responses to publish, we'll be satisfied."

We talked further with the two officers about the partnership concept; but when Zazzara revealed he had made in-depth visits, with staff, to 63 libraries in the last 200 days, we immediately granted him honorary partnership as well as the coveted *AL* endurance medal and moved on to other questions.

We asked what the "Open Letter" had meant by its statement, "Data Phase is committed to help invest in, implement, and create demand for a new realization and relevancy of the libraries' capabilities and role in society." Is the privately held corporation, which "has never had an investment problem" for its own growth, now ready to start a foundation?

Not quite. Although Data Phase has awarded some modest commissions for studies of the library future, its investment is primarily in the corporation's research and development activities—some $4 million worth this year—toward better library technology.

"The technology must be user-friendly," said Zazzara. "How can we remove the paranoia about technology and get it used to broaden the information circle and

(Cont. on p. 458.)

the library's role? How can we foster the interaction between technology and user? A lot of our investment as a corporation will be put right there in the next two years. Non-threatening use of library technology, with minimal effort, is the goal."

Zazzara said that in his corporate background, libraries were often the last resort for information; he would like to see them become the first resort not only for the business community, but for every segment of society, down to the last non-reader.

In general, he said, "we're involved 10 times as much as when I first came in. When we talk with librarians, we really talk about the next five to 10 years and how we can help partner the solutions.

"If the vendors don't come in and help do it," said Zazzara, "it will set the libraries back."

That's big talk, we suggested, even from a "partner" with some 68 big systems installed in about 800 library units and an independently incorporated users' group of about 70 library members.

But if thinking big means a new look at how big the library can be, Zazzara says he has no qualms. "Who else but the library," he asked, "can reach *everyone*?" —*Art Plotnik*

LINX approaches 100 members

In mid-April, the Faxon Co. announced 12 new library members of its LINX online serials management network, bringing the total number of users to 94. Faxon offers four LINX subsystems: database access, interactive check-in and claiming, routing, and (for groups of libraries) union list. Faxon (15 Southwest Park, Westwood, MA 02090) will exhibit at booths 301–305 at the ALA Annual Conference in Dallas.

Billions of bytes on a desktop

The enormous storage capacity of laser videodiscs is being put to use in a new bibliographic data system called BiblioFile. Desk-sized and self-contained, the system enables libraries to access the Library of Congress MARC database and an "Any Book" acquisitions database of more than a million English-language books and 20,000 publisher names and addresses. Library Systems & Services, Inc. (LSSI), which markets the system, states that its "cost-effectiveness is realized by comparison to online database services. BiblioFile can be searched and used an unlimited number of hours; further, there is no charge for public domain data removed or used for any application."

LSSI's MINI MARC cataloging system, which has used floppy diskettes, will now be available with the laser-disc configuration. The BiblioFile system and the Library Corporation's "Any-Book" system will be shown at Booths 349 and 1128-30 at the ALA Conference in Dallas. LSSI is at 1395 Piccard Dr., Rockville, MD 20850.

At ACRL: The 7-minute seminar

An innovative format for new-product introductions found favor at the April national conference of the Association of College and Research Libraries in Seattle. In an hour-long program, exhibitors were given seven-minute segments in which to describe latest offerings.

The H.W. Wilson Company announced that Wilsonline, its online system for Wilson indexes, will be available on Oct. 1. Other new products included the first of a series of business reference works from the editors of *The Economist; The Journal of Feminist Studies in Religion* from Scholars Press; database machines and remote processors for local library distributed networks from Carlyle Systems, Inc.; and the Library of Congress main catalog on microfiche from K.G. Sauer. A wireless packet radio system that connects terminals to computers in a local network without cable was being shown by the University of California Division of Library Automation.

Although some exhibitors felt the amount of "traffic" in the exhibition hall did not warrant their largest displays, most appeared satisfied with the ample time conference planners allotted for exhibits. —*S.E.B.*

Vendor briefs

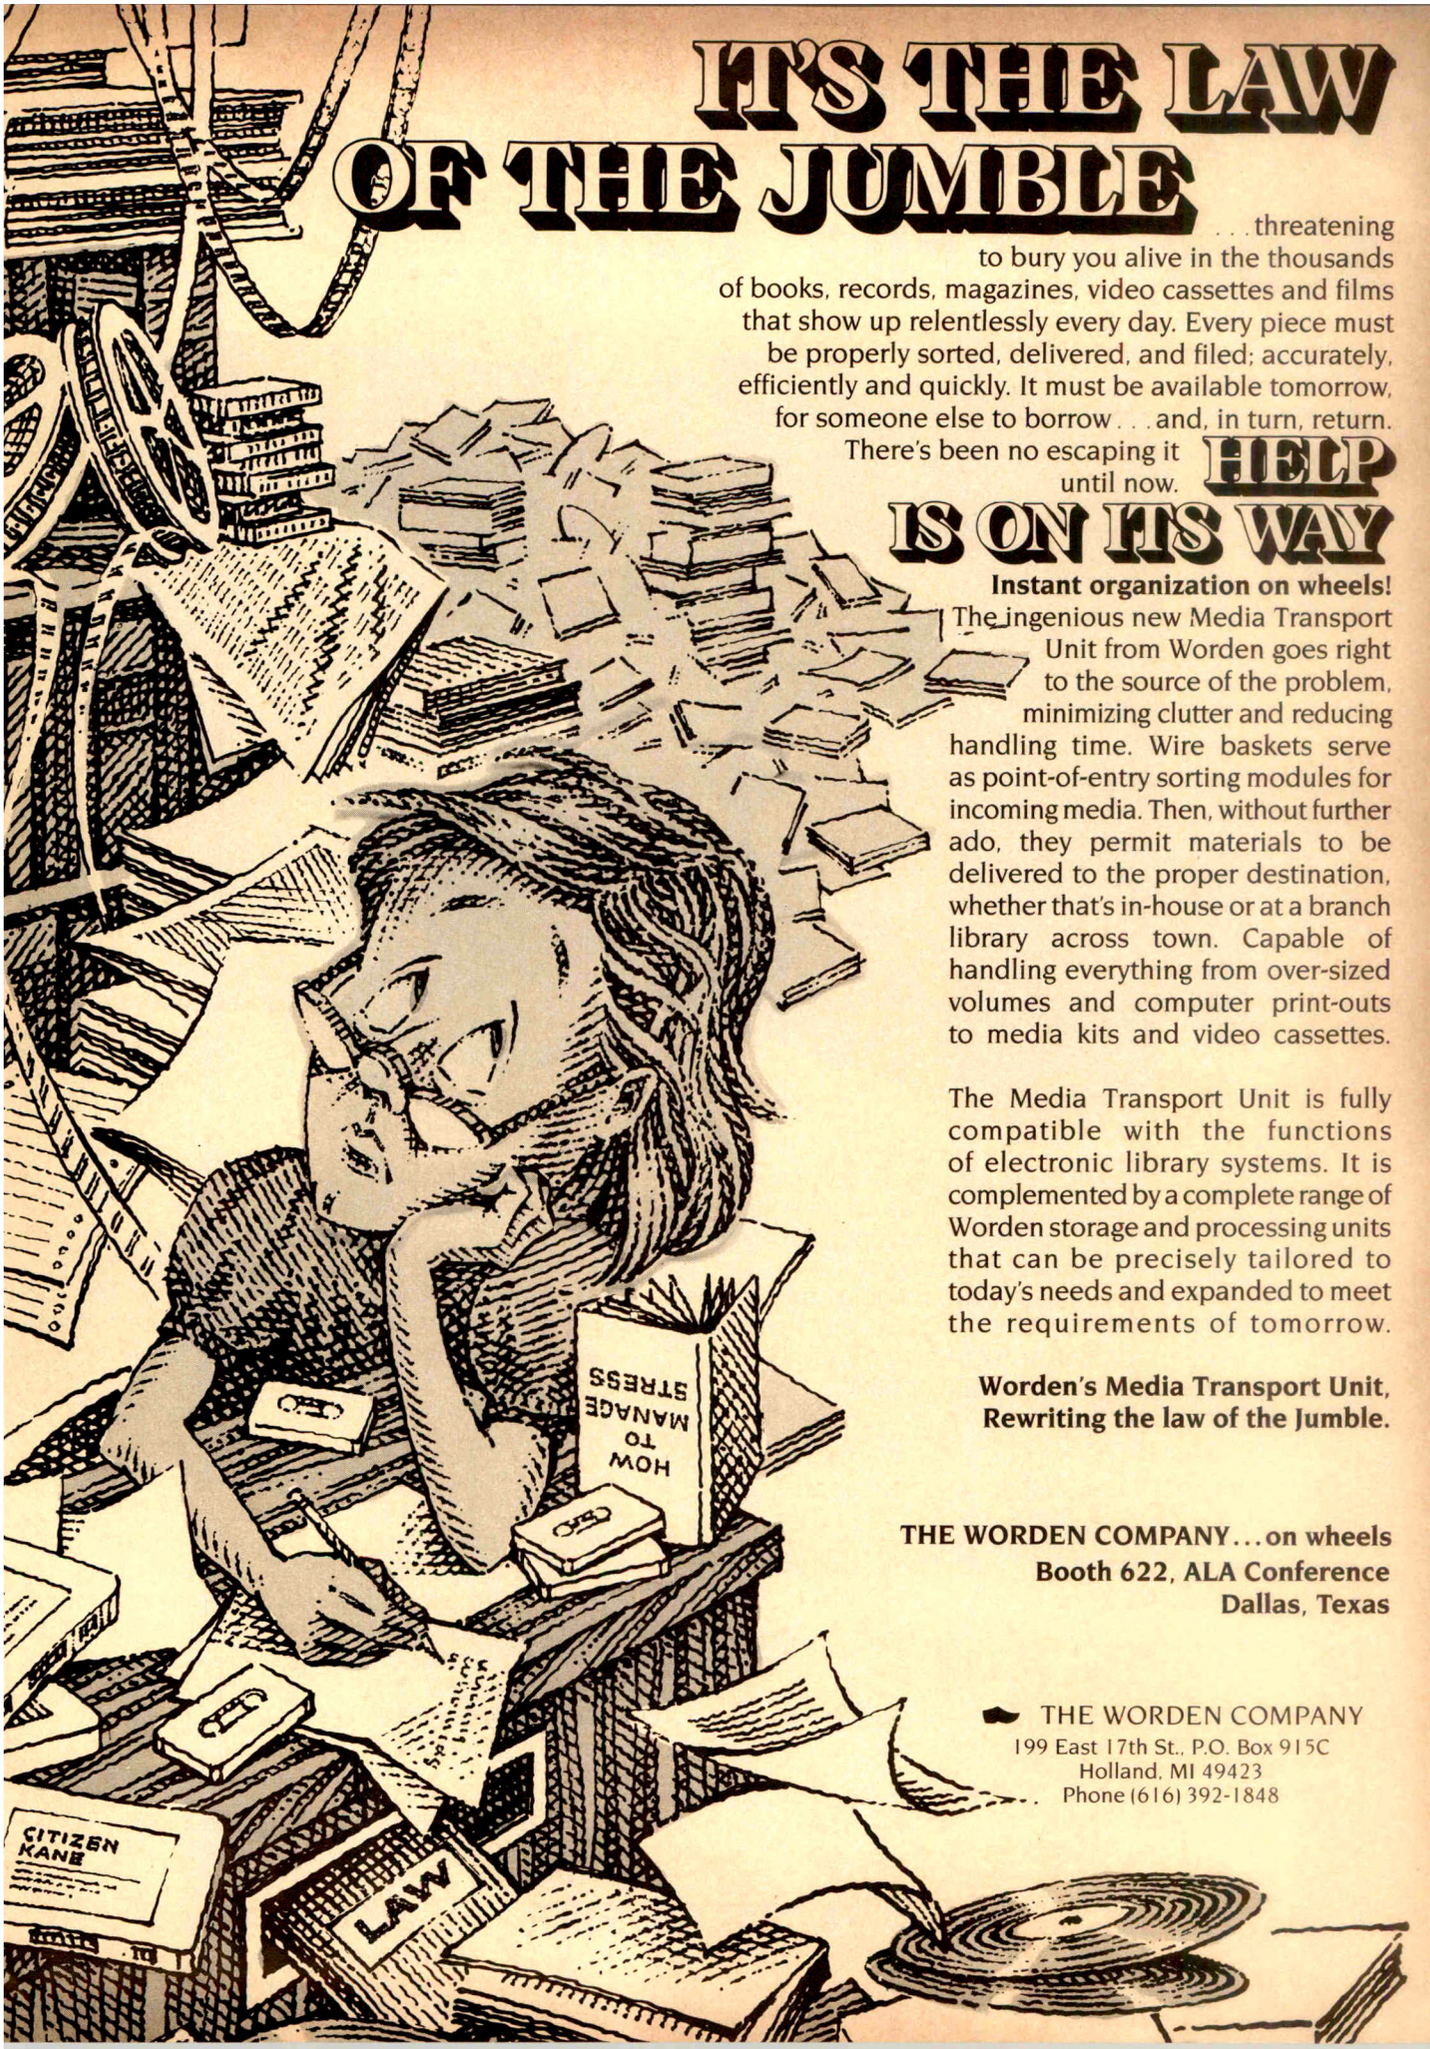
- Science Press will demonstrate a prototype of its automated library system at booth 619 of the ALA Annual Conference exhibits in Dallas. The firm is developing integrated library application programs to use with IBM hardware and Cullinet software.

- The Washington Library Network (WLN) is initiating a Microcomputer Consulting Service to advise on hardware and software needs and such projects as local area networking, file conversion, and training. Primarily for WLN members, the new service will offer the materials it develops to other libraries on a fee basis.

- "Spotlight OCLC," OCLC's annual report to the library community, is scheduled for Monday morning, June 25, at the ALA Annual Conference in Dallas. The open program will begin at 11:30 in the Sheraton Dallas Grand Ballroom and run until 1:30 p.m. A light lunch will be provided.

A long way from curtains and bedspreads

C.L. Systems, Inc., has fashioned a new 45,000-sq.-ft. headquarters facility out of a 1905 structure designed as a mill to manufacture curtains and bedspreads. Moving from Newtonville to West Newton, Mass., the firm has increased its space by 30 percent. President Richard Goldberg, citing a quadrupling of sales over the last six years for the in-house library automation system supplier, said the new space will permit even further growth. The April *Library Systems* newsletter, published by ALA, noted that CLSI "led the turnkeys with the largest number of installed and accepted systems (209)" at the end of 1983. Pictured above is the new computer room at headquarters.



IT'S THE LAW OF THE JUMBLE

. . . threatening to bury you alive in the thousands of books, records, magazines, video cassettes and films that show up relentlessly every day. Every piece must be properly sorted, delivered, and filed; accurately, efficiently and quickly. It must be available tomorrow, for someone else to borrow . . . and, in turn, return. There's been no escaping it until now.

HELP IS ON ITS WAY

Instant organization on wheels!

The ingenious new Media Transport Unit from Worden goes right to the source of the problem, minimizing clutter and reducing handling time. Wire baskets serve as point-of-entry sorting modules for incoming media. Then, without further ado, they permit materials to be delivered to the proper destination, whether that's in-house or at a branch library across town. Capable of handling everything from over-sized volumes and computer print-outs to media kits and video cassettes.

The Media Transport Unit is fully compatible with the functions of electronic library systems. It is complemented by a complete range of Worden storage and processing units that can be precisely tailored to today's needs and expanded to meet the requirements of tomorrow.

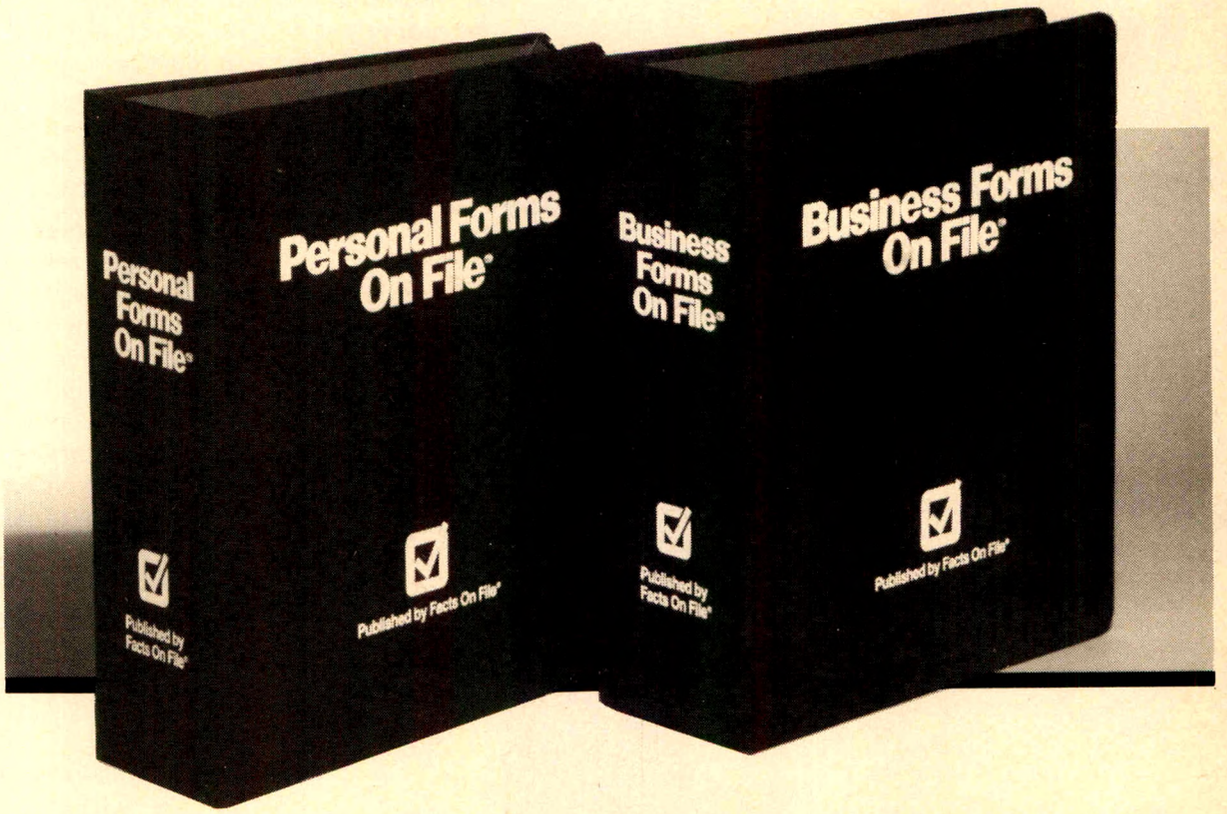
Introducing the newest members of our "On File"™ family...



FORMS ON FILE™ is a looseleaf collection of approximately 300 forms, plus comprehensive indexes, explicitly designed for photocopying by anyone who needs to copy one form or a hundred. Divided into two durable buckram-bound binders, these forms are printed on ultra-heavy paper stock to produce clear, clean copies that are legally acceptable.

INCLUDED ARE:

- Legal forms such as wills, leases and promissory notes
- Home inventory, health forms, inoculation records
- Tax forms, household budget, investment records and net worth forms
- P & L statement forms, personnel record forms, security analysis forms

The forms selected for inclusion in this unique new reference tool were polled as the most requested forms from government agencies, personal finance advisors, lawyers, business owners, and form writers, among others. This means the forms your patrons need most will be readily available for photocopying. We've done the waiting and the leg work—FORMS ON FILE provides any forms your patrons need—*immediately*!

Both PERSONAL FORMS ON FILE and BUSINESS FORMS ON FILE are divided into sections by "tab cards," making them simple to use even for an unsophisticated researcher. Each form is carefully coded with a simple decimal system that shows where it belongs in the binder. In addition, both PERSONAL FORMS ON FILE and BUSINESS FORMS ON FILE will be updated annually to make sure that every form is current and useable.

300 pages. 9 x 12. Set price, $125.00

PERSONAL FORMS ON FILE: *150 pages. $75.00 ISBN 0-87196-880-0. Annual update, $35.00*

BUSINESS FORMS ON FILE: *150 pages. $75.00 ISBN 0-87196-881-9. Annual update, $35.00*

FACTS ON FILE, INC.

SELECTED RESOURCES FOR CURRENT AWARENESS

The Source highlights useful items in major areas of library/information activity. Send materials to department editor Gordon Flagg, American Libraries, 50 E. Huron St., Chicago, IL 60611.

video

Videodisc/Videotex magazine reports on research and developments in videodisc, optical disc, videotex, and related video technologies. The bimonthly journal features articles on videodisc and videotex applications in information storage and retrieval, communications, training, and entertainment, plus book and equipment reviews and a Videodisc Projects Directory that tracks ongoing projects in the public and private sectors.

Subscribers to the magazine also receive *Videodisc Update*, a monthly newsletter containing timely news, announcements, and interviews. Introductory rates are $145 for one year from Meckler Publishing, 520 Riverside Ave., Westport, CT 06880.

Vintage films and television programs available on videocassette are described in a free 119-page, illustrated catalog from Filmic Archives. Over 700 silent classics, comedies, musicals, dramas, foreign films, documentaries, and shows from the Golden Age of Television are offered in VHS, Beta, and U-Matic formats. Catalogs of Super 8mm and 16mm films and recordings of radio broadcasts and rare movie soundtracks are also available upon request. Filmic Archives, POB C, Sandy Hook, CT 06482.

Local history videocassette. "Pathways to the Past," a videocassette developed by the Bryant Library in Roslyn, N.Y., is designed to introduce audiences to the techniques and importance of local history and genealogy.

The story focuses on the new owner of a vintage house who sets out to learn about the former occupants and the history of the community. He uses the local library, the village hall, and other resources to discover old photographs, letters, newspaper clippings, and other documents revealing the background of his new home.

Narrated by folksinger Oscar Brand, the 15-minute videocassette comes with a 20-page, illustrated teacher's manual and activities booklet. $75 in VHS format or $85 in ¾-inch from the Bryant Library, Paper Mill Rd., Roslyn, NY 11576.

"Frontline," public television's weekly documentary series, is now being offered for sale or rental on videocassette to libraries and other educational institutions. The critically praised documentaries include "We Are Driven," a look at the darker side of Japanese labor relations; "Give Me That Big Time Religion," an examination of TV preacher Jimmy Lee Swaggart; "Bread, Butter, and Politics," focusing on hunger in America; and "The Mind of a Murderer," a two-part program showing how one of the men involved in the Hillside Strangler murders in Los Angeles nearly escaped punishment by convincing experts he had multiple personalities.

Each of the one-hour programs sells for $300 in VHS, Beta, or U-Matic; one-week rentals (in VHS and U-Matic only) are $90. PBS Video, 475 L'Enfant Plaza, S.W., Washington, DC 20024.

Chisanbop lessons. A 22-lesson course in Chisanbop, the simple calculation method based on the use of the fingers, is now available on a single videocassette. Each lesson is about six minutes long and presents a new facet of the system, to be followed by practice supervised by a teacher. The color VHS or Beta cassette, featuring nationally known Chisanbop teacher Margaret Perry, is $169.95 plus $4 shipping from Duncan Institute, 18 Duncan Dr., New Port Richey, FL 33552.

women

Women's groups in education organizations. *Report of 1981 Survey of Women's Issue Groups in Professional Educational Organizations* describes the results of a study to determine which organizations supported women's caucuses and committees during the 1970s and what was accomplished by them. For a free copy of the 12-page paper write Bernice J. Wolfson, Dept. of Curriculum and Instruction, University of Alabama in Birmingham, University Station, Birmingham, AL 35294.

Library services to women. *Women As an Underserved Population* is a slide/tape program to help librarians recognize and overcome stereotypes and barriers to providing effective library services to women. The 17-minute presentation identifies information and service needs of women from various walks of life and demonstrates simple, inexpensive ways of meeting those needs.

The 110 slides, audiocassette, and a transcript can be purchased for $50 from the Committee on the Status of Women in Librarianship, ALA, 50 E. Huron St., Chicago, IL 60611. The package is also available for two weeks' rental for $15 plus postage; send rental requests on an interlibrary loan form to the ALA Headquarters Library at the above address, allowing at least one month's notice to reserve a copy for a specific date.

A scene from the* Women As an Underserved Population *slide/tape program.

Women on campus. An Association of American Colleges Project on the Status and Education of Women serves as a clearinghouse for information on women as students, faculty, and administrators. The group's quarterly newsletter, *On Campus with Women*, features news on federal policy and legislation, court cases, sexual harassment, athletics, minority women, women in nontraditional careers, and other issues.

Subscribers to the newsletter also receive topic papers dealing with current issues involving women in the academic community. Past papers include what are claimed to be the first nationally distributed paper on sexual harassment in academe and the first comprehensive analysis of Title IX and discrimination against women in intercollegiate sports; the most recent paper addresses the issue of academic mentoring for women students and faculty.

One-year subscriptions at $15 for individuals and $25 for institutions, as well as a list of the project's other publications, are available from the Project on the Status and Education of Women, Association of American Colleges, 1818 R St., N.W., Washington, DC 20009 (0734-0141).

British women's biographies. Detailed biographies of over 1,000 notable women from Britain's past are collected in the *Europa Biographical Dictionary of British Women*. The book's scope encompasses queens, mistresses, and society hostesses, as well as women involved in literature, the arts, and other profes-

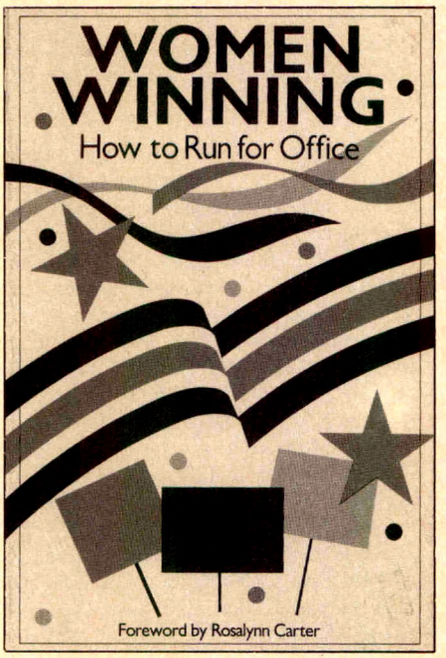
sions. The subjects range from prominent figures dating back to the Middle Ages through women who made their marks in the 20th century. Published by London's Europa Publications, the 436-page volume is distributed in the U.S. at $55 by Gale Research Co., Book Tower, Detroit, MI 48226 (0-8103-1789-3).



Campaign literature. *Women Winning* is a practical handbook for women on planning a political campaign. Written by Barbara M. Trafton, a Democratic National Committeewomen and six-year Maine legislator, the 164-page paperback offers tips on researching the election, developing a strategy, grass-roots organization, fund-raising, and other nuts-and-bolts aspects of running for office. $14.95 cloth, $9.95 paper from Harvard Common Press, 535 Albany St., Boston, MA 02118 (0-916782-45-X cloth, 0-916782-44-1 paper).

special libraries

Special libraries explained. *Special Libraries at Work* gives an overview of the field, particularly in the for-profit sector. Authors Elizabeth Ferguson and Emily R. Mobley direct their guide to new special librarians, administrators, library school students, and other library professionals who are not experienced in special libraries. The 206-page paperback is organized into an introductory portion giving a definition, history, and other background of special libraries; and sections dealing with the informational aspects, managerial aspects, new directions (including automation and networking), and professional aspects of the field. $21.50 cloth, $14.50 paper from Shoe String Press, POB 4327, Hamden, CT 06514 (83-25533, 0-208-01939-1 cloth, 0-208-01938-3 paper).

World Guide to Special Libraries is an international directory of approximately 32,000 special libraries of 3,000 volumes or more, following the format of the *World Guide to Libraries*. Libraries are listed by country within five subject categories: generalities (including library science), humanities and theology, social sciences, medicine and life sciences, and science and technology.

Each entry gives the library's address, telegram address, telephone and telex numbers, important special holdings and collections, statistics on the holdings, information on participation in loan programs and electronic information systems, and other details. A 271-heading index provides access by specialized subject to the main entries. 990 p., $120 from Gale Research Co., Book Tower, Detroit, MI 48226 (3-598-20528-7).

Hospital Library Management, edited by Jana Bradley, is a comprehensive guide to providing library services in hospitals. Opening chapters provide an introduction to hospitals and standards for hospital libraries. The remainder of the 412-page volume features essays on the selection, acquisition, and organization of library materials; information services; interlibrary loan, audiovisual materials; budgeting, personnel, promotion, and other management concerns; library services to patients and the community; and other topics. $67.50 from the Medical Library Association, 919 N. Michigan Ave., Chicago, IL 60611 (0-912176-15-6).

systems

Idaho libraries choose Easy Data. Five libraries in northern Idaho have contracted for the Easy Data Library System created by Sydney Development Corp., Vancouver, B.C. The Coeur d'Alene, Hayden Lake, Kootenai County, Post Falls, and Rathdrum libraries in Kootenai County will be linked in the Cooperative Information Network using a common database. The Cataloguing, Inquiry, and MARC Record modules will be installed first, followed by Circulation. Easy Data's integrated system uses Datapoint minicomputers.

Public library OPAC study. An 11-month study of online public access catalogs (OPAC) by staff of the Hennepin County (Minn.) Library has resulted in a 60-page report that lists 89 characteristics Hennepin County wants for an OPAC. Public and technical services staff took part in the study, which included demonstrations, conference attendance, site visits, and background reading. The report also includes a glossary, sample reading list, and list of desirable subject index terms. $7.50 prepaid from Hennepin County Library, Technical Services Division, 12601 Ridgedale Dr., Minnetonka, MN 55343.

NYPL Research Libraries go with Blackwell. The New York Public Library has installed Blackwell Library Systems' new PERLINE/BOOKLINE online acquisitions and collection management system in the Research

EVERYTHING YOU'VE HEARD ABOUT WHAT P.R. CAN DO FOR YOUR LIBRARY IS ABSOLUTELY TRUE.

There's no better way to nourish relationships with your patrons, and strengthen your library's position in the community than a good PR program.

And it's not difficult to begin thinking in "PR terms" every day of the week.

Data Phase has commissioned one of this country's top public relations firms to write this guide especially for the library community. It's easy to follow. And it is written not only to provide you with sound PR strategies, but to illustrate how those strategies translate into terms that are appropriate for your library.

"A Guide to Public Relations for Your Library" is available free to any library by sending us the coupon below or calling 913-262-5100.

Libraries. NYPL is the first East Coast and first public library to install the system, which offers locally controlled acquisitions without requiring a library to use a particular vendor. Users of PERLINE/BOOKLINE do not have to order through Blackwell. The system was purchased to handle The Research Libraries' 30,000 periodical subscriptions and 80,000 serials.

East Carolina picks LS/2000. East Carolina University, Greenville, N.C., has purchased software for OCLC's LS/2000 local library system for use in its J.Y. Joyner Library, Branch Music Library, and Health Sciences Library. SOLINET will create a local database of 250,000 records for the system from East Carolina's OCLC subscription tapes. The local system will operate on a minicomputer used by the three libraries and will support 21 terminals with a link to the OCLC union catalog database.

Subject searching in online catalogs. After analyzing data from the Online Catalog Project sponsored by the Council on Library Resources, Gary S. Lawrence and Joseph R. Matthews have concluded that online catalogs need a separate system interface for subject searching, in addition to those required for the usual modes of known-item, experienced user, and inexperienced user. They also suggest in a report of their analysis that subject searches should display the headings retrieved before displaying bibliographic records containing the headings. Copies of the report are available at no charge from the Council on Library Resources, 1785 Massachusetts Ave., N.W., Washington, DC 20036.

school media

Micros in media centers. *The Media Specialist, the Microcomputer, and the Curriculum* is a handbook on the planning, implementation, and administration of microcomputer learning programs in schools and media centers. The 197-page volume describes the media specialist's role in designing computer literacy programs for teachers and students in grades K-12. Among the topics covered are developing a philosophy for using microcomputers in schools, evaluating and selecting hardware and software, and writing bid specifications. Author Joanne Troutner also provides sample handouts and forms, case studies, a glossary, a selected bibliography, and lists of software distributors and grant sources. $19.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-22280, 0-87287-367-6).

Inabeth Miller's *Microcomputers in School Library Media Centers* is aimed at librarians, school administrators, parents, and community leaders, describing microcomputer applications in educational settings. The 182-page paperback contains information on software, hardware, installation, and programs, and discusses needs assessment, decision-making, training, networking, evaluation, and other topics. Appendixes offer sample survey and evaluation forms. $19.95 from Neal-Schuman Publishers, 23 Cornelia St., New York, NY 10014 (82-22361, 0-918212-51-0).

Outstanding Books *for the College Bound* gives bibliographic information, brief descriptions, and prices of approximately 600 titles to prepare high school students for college study. Compiled by Mary Ann Paulin and Susan T. Berlin from over 20 lists previously issued as pamphlets by ALA's Young Adult Services Division, the bibliography encompasses fiction, nonfiction, biography, theatre, and performing arts titles. Approx. 75 p., paper, $5.95 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-25714, 0-8389-3302-5).

Nonsexist supplemental titles. To counter what it considers sex-biased or sex-role stereotyped texts, the Center for Sex Equity at the Northwest Regional Educational Laboratory has compiled the *Bibliography of Nonsexist Supplementary Books (K-12)*. Organized by reading level, the 550 entries contain brief descriptions of each book's content and the gender, ethnicity, or nationality of the major character. Author, title, and subject indexes are included. 108 p., paper, $22.50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (83-42838, 0-89774-101-3).

Children's Choices: *Teaching Reading with Books Children Like* describes ways to effectively use favorite children's books in the classroom. The nine articles, edited by Nancy Roser and Margaret Frith, suggest which books and poems to use, how to structure the classroom, how to encourage writing, how to encourage children's responses, and more. The 120-page paperback also features a compilation of seven years' of Children's Choices reading lists appearing annually in *The Reading Teacher*. $5 to International Reading Association members, $7.50 to others from the International Reading Association, Dept. BB, POB 8139, 800 Barksdale Rd., Newark, DE 19714.

instruction

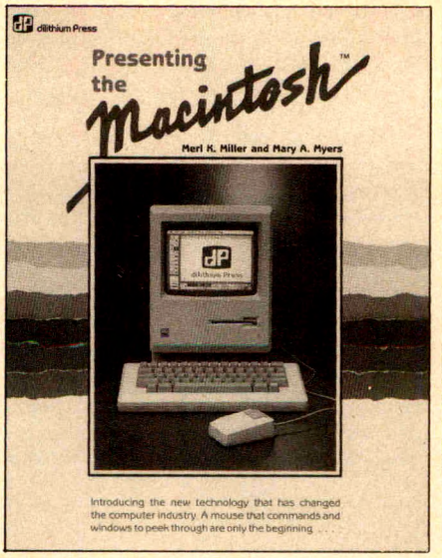
Guide to scientific research. *Literature Searching in Science, Technology, and Agriculture*, by Eileen Pritchard and Paula R. Scott, offers an overview of research tools for college students and librarians unfamiliar with scientific materials. Opening chapters introduce the types of literature, search preparation, and library use. Descriptions of major publications follow, arranged in subject sequence. Other chapters cover computer searches, guides to scientific literature, and bibliographic style. Appendixes list abstracts and indexes, selected journals, databases, and sources for reviews. 174 p., $29.95 from Greenwood Press, 88 Post Rd. West, Westport, CT 06881 (83-18471, 0-313-24068).

Library instruction workbook. *Research in Practice: A Workbook for the College Student* provides "hands-on" exercises in the use of the card catalog, subject headings, periodicals, microforms, government documents, reference sources, and other library materials. The manual also includes a section on the research process, dealing with the choice of a topic, the oranization of ideas, bibliographic format, and other aspects of writing a research paper.

The workbook was developed by Patricia Walsh and Hans van der Giessen, based on the one-credit research skills program required of all entering freshmen at the University of Bridgeport. 200 p., paper, $17.50 plus $1 shipping from Professional Services Publishing, POB 327, Redding Ridge, CT 06876 (0-933806-40-X).

Tools in the Learning Trade is a guide to general reference materials for college and advanced high school students. Author Barbara Currier Bell discusss dictionaries, synonym books, writing guides, one-volume encyclopedias, research guides, style manuals, calculators and computers, and handbooks for creative thinking. Each section gives criteria for selection and describes and evaluates specific publications. Also included are suggestions on how to purchase the tools cheaply and how to advance beyond the basic tools suggested by the guide. 192 p., $15 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-15105, 0-8108-1655-5).

microcomputing



Presenting the Macintosh is among the first of what will no doubt be an onslaught of books devoted to Apple's new microcomputer. The 119-page paperback, written by Merl K. Miller and Mary A. Myers, offers a basic introduction to the Macintosh and its special features, describes its word processing and graphics programs, and discusses software and peripherals that are promised for the machine in the near future. $5.95 from Dilithium Press, 8285 S.W. Nimbus, Suite 151, Beaverton, OR 97005 (84-5035).

Software's number is up. The U.S. ISBN Agency, which began assigning International Standard Book Numbers to microcomputer software last year, reports that software producers are enthusiastically adopting the system.

"More than 39 percent of our monthly requests for new ISBNs have been coming from the microcomputer software industry, and it seems to be escalating," said Emery Koltay, director of the agency. Considering the growth of ISBN assignments for software, Koltay speculates that the designation may soon have to be renamed the "International Software/Book Number."

Public-domain entries. Two new resources can help users track down hundreds of noncopyrighted public-domain programs that can be freely copied and exchanged.

The Directory of Public Domain (and User-Supported) Software for the IBM Personal Computer lists programs obtained from computer clubs, individuals, and bulletin boards around the country. The 109-page paperback also describes a number of user-supported programs available from their authors with the request that satisfied users send them a suggested donation. The directory is $4.95 from the PC Software Interest Group, 1556 Halford Ave., Suite 130, Santa Clara, CA 95051 (0-915835-01-0). The group also distributes the public domain programs in its library at $6 per disk plus $4 shipping per order.

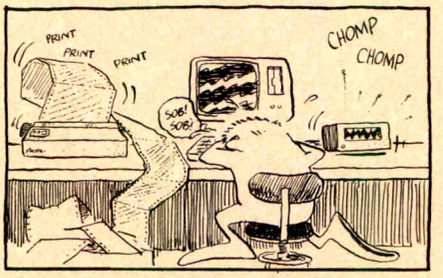
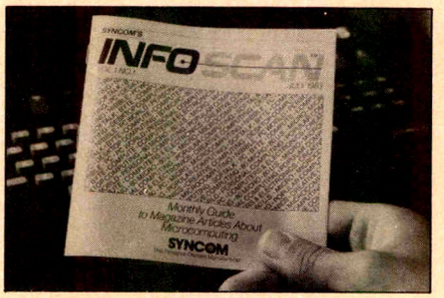
vides information on over 250 disks containing files and programs for computers with CP/M operating systems. The catalog also includes ordering information for the disks listed. $5 from Elliam Associates, 24000 Bessemer St., Woodland Hills, CA 91367.

Mending micros. *The Plain English Repair and Maintenance Guide for Home Computers* gives straightforward instructions on fixing common microcomputer problems. The illustrated guide also offers tips on cleaning and maintenance, instructions for building simple peripherals, a troubleshooting checklist, and a directory of suppliers. The 265-page paperback also includes a coupon good for a free repair or maintenance consultation-by-mail from author Henry Beechhold. $14.95 from Simon & Schuster, 1230 Avenue of the Americas, New York, NY 10020 (83-27170, 0-671-49293-4).



***When everything goes wrong at once, refer to* The Plain English Repair and Maintenance Guide for Home Computers.**

The IBM PC as a terminal is the focus of a special section in the March issue of *Information Technology and Libraries*. Articles discuss the selection of the IBM PC as a new model terminal by OCLC and WLN, efforts by Faxon to incorporate the PC into its LINX network, and the PC's use as a public terminal to access the online catalog at the University of Illinois at Urbana-Champaign. Single copies of the quarterly journal are $7.50 from *Information Technology and Libraries*, ALA, 50 E. Huron St., Chicago, IL 60611.



Mini-sized microcomputer index. *Infoscan* indexes over 800 articles each month from more than 40 leading computer magazines. Published by Syncon, a diskette manufacturer, the monthly guide measures 5¼-by-5¼ inches to resemble a diskette. Subscriptions are available to libraries at a special educational rate of $10 per year from Syncom, 1000 Syncom Dr., Mitchell, SD 57301. For a free sample copy, phone 800-843-9862.

librarian's library

Dewey doings. *Melvil Dewey: The Man and the Classification* publishes the proceedings of a 1981 seminar on Dewey held at the New York State Library. Among the papers presented are a personal reminiscence of Dewey by Keyes Metcalf, observations on Dewey and the corporate ideal, an overview of Dewey's involvement with ALA, an examination of the first two editions of the Dewey Decimal Classification, background on the system's early use in other countries, and a look at the early classified catalog developed at the New York State Library under Dewey's direction. 210 p., $10 plus $2.50 shipping from Forest Press, 85 Watervliet Ave., Albany, NY 12206 (83-1607, 0-910608-34-2).

Library leaders. Robert B. Downs, Keyes Metcalf, Louis Round Wilson, Ralph Shaw, Lawrence Clark Powell, and 10 other leading academic librarians from the past half-century are profiled in *Leaders in Academic Librarianship, 1925–1975*. Five of the 15 essays, which were written by library historians under a grant from the Council on Library Resources, originally appeared in condensed form in the *Journal of Academic Librarianship*.

The 419-page volume is No. 16 in the Beta Phi Mu Chapbook Series, and the first in the series to be distributed by ALA. $50 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-21448, 0-910230-16-X).

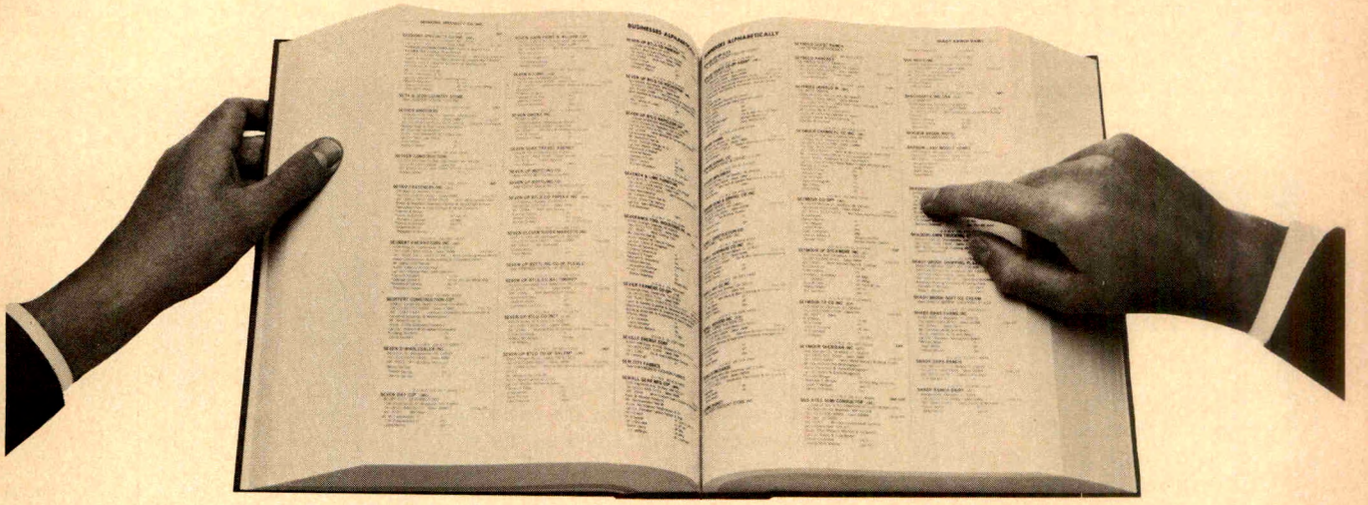
Pathways for Communication is a study of the nature and role of books and libraries in contemporary society. Author D. J. Foskett examines the development of modern librarianship and the social, economic, and cultural role of libraries. The book's main thesis, as stated in a publisher's blurb, is that "the advent of Information Technology does not herald the end of books and libraries, for the cultures of nations depend on permanent values and not on the ephemeral nature of current electronic methods of communication."

Published by Great Britain's Library Association under its Clive Bingley Ltd. imprint, the 140-page volume is available in the U.S. for $19.50 from the Shoe String Press, Inc., 995 Sherman Ave., Hamden, CT 06514 (0-85157-356-8).

No artificial additives. *The Organic Public Library*—organic in the sense that the library is a dynamic institution responding to changing needs—was written by Darlene E. Weingand as a text for a graduate course on the public library. The 194-page volume is divided into two parts: "Foundations," dealing with theory and covering such areas as the mission of the public library, the public library of the future, measurement and evaluation, marketing, and the danger of obsolescence; and "Putting into Practice," which considers programming ideas, I&R, interlibrary cooperation, computerization, and other specific applications. $23.50

The Making of a Dun's Directory.

First, we screen the companies of America (and beyond) by industry, geography, and size...



...then we publish complete, accurate data for each company and industry—cross-referenced—so you can put your finger on what you need to know when you need to know it.

Dun's Marketing Services provides you with direct access to information on business throughout the world so you can do your job better...with less effort.

Whether your prime responsibility is planning, marketing, sales, finance or human resources, you should have access to Dun's Business Reference Library. You'll have the world of business at your fingertips.

Let us put our library at your disposal. Call us toll-free via our direct line: (800) 526-0651.

Britain's Public Lending Right is coming under greater scrutiny on this side of the Atlantic as American librarians face the prospect of similar laws providing payments to authors based on library use of their works (*AL*, Dec. 1983, p. 694). *A Guide to Public Lending Right* describes in detail how the system is administered in the U.K. and compares it to similar schemes in other countries. Author Brigid Brophy, a leading campaigner for the law, also relates the history of the Public Lending Right and the political battle to enact it. 178 p., $21.50 from Gower Publishing Co., Old Post Rd., Brookfield, VT 05036 (0-566-03485-9).

Crimestoppers' textbooks. Two new titles examine book theft, vandalism, assault on staff and patrons, and other security problems facing libraries.

Crime in the Library: A Study of Patterns, Impact, and Security is based on a three-year study of crime patterns in public libraries. Author Alan Jay Lincoln uses material from the fields of criminology, security, and the recent discipline of "victimology" to investigate the problem of crime in libraries and suggest ways to prevent and minimize its effects. The 179-page volume also includes statistics and tables on types of library crime and security measures. $26.95 from R. R. Bowker Co., POB 1807, Ann Arbor, MI 48106 (83-22288, 0-8352-1863-5).

Practical advice on dealing with library crime is offered in *Security for Libraries: People, Buildings, Collections*, edited by Marvine Brand. Articles discuss the design and implementation of security plans; advice and procedures for institutional, personal, collection, and building security concerns; whether to use in-house or external security measures; and legal aspects of library security. A list of selected readings on security rounds out the volume. Approx. 144 p., paper, $12 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (84-455, 0-8389-0409-2).

TAKING IT ALL IN
by Pauline Kael

"Kael's latest collection of movie reviews ranges chronologically from June of 1980 to June 1983. The veteran critic's perception of and care for what makes movies good — or lousy, as is often the case in her estimation — are undiminished here. She can still approach a movie from every critical angle possible — including technical matters. . . ." —*Booklist* 1/15/84, Upfront: Advance Reviews

info briefs

Artificial intelligence. The progress toward the development of intelligent computer systems is examined in *Intelligent Information Retrieval*, the proceedings of a conference held by the Aslib Informatics Group and the British Computer Society's Information Retrieval Group in March 1983. The 10 papers, edited by Kevin P. Jones, discuss such topics as expert spelling analysis and correction, expert systems, fifth generation computing, automatic analysis of texts, and intelligence in database management systems. The 149-page paperback also includes summaries of the discussions that followed each paper. £14 to Aslib members, £17 to others from Aslib Publications Division, 3 Belgrave Sq., London SW1 8PL, United Kingdom (0-85142-187-3).

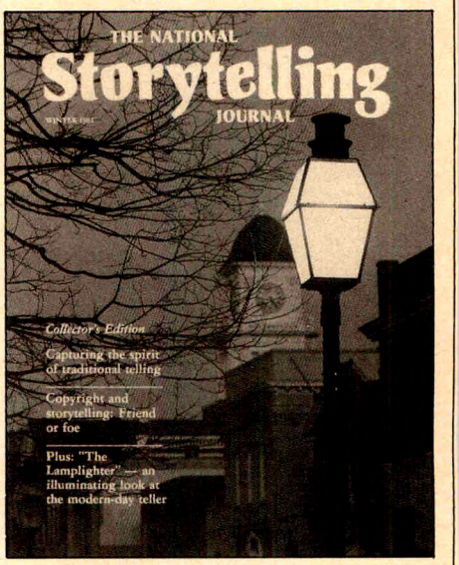
Furor over fees. *The Information Dilemma*, by Harry M. Kibirige, surveys the ongoing revolution in data collection, processing, storage, retrieval, and distribution. Subtitled "A Critical Analysis of Information Pricing and the Fees Controversy," the study examines the U.S. information industry and market, the issue of user access to information, the pricing of information services and products, the fee versus free controversy, information marketing research, and other issues. The 195-page volume also includes a user questionnaire about information use, a glossary of terms, and a selected bibliography. $29.95 from Greenwood Press, 88 Post Rd. West, Westport, CT 06881 (83-5570, 0-313-23381-0).

Technological changes examined. *Information Technology and Civilization*, by Hiroshi Inose and John R. Pierce, addresses the changes, opportunities, and problems resulting from the new information technology. Commissioned by the Club of Rome, an international group formed to study the future of civilization, the study begins by describing the traditional methods of communicating information; the authors then examine the modern technologies now available, their benefits and dangers, and their applications in languages and learning, the arts, and government. 263 p., $19.95 cloth, $9.95 paper from W.H. Freeman and Co., 41 Madison Ave., New York, NY 10010 (83-20721, 0-7167-1514-7 cloth, 0-7167-1515-5 paper).

Computerized Literature Searching: *Research Strategies and Databases* is an end-user guide aimed primarily at scientists and advanced students who need to develop database searches in their fields. The emphasis is on the subject matter, describing databases and search aids in broad fields, rather than the mechanics of the search itself. Author Charles L. Gilreath also covers the principles of online bibliographic systems and the researcher–search analyst partnership. 177 p., $22 from Westview Press, 5500 Central Ave., Boulder, CO 80301 (83-23319, 0-86531-526-4).

young people

The National Storytelling Journal is a new publication devoted to the history and practice of storytelling. The premier issue features articles on traditional storytelling, the storyteller in the modern world, and copyright considerations; departments on American Indian storytelling, developing the memory, and storytelling in the classroom; lists and reviews of recently published recordings and books; and a calendar of upcoming festivals, workshops, and conferences.



Subscriptions to the quarterly journal are included in a $20 annual membership in the National Association for the Preservation and Perpetuation of Storytelling. The nonprofit organization maintains an information center and an archive of storytelling video and audio tapes, and sponsors the National Storytelling Festival and the National Conference on Storytelling each year. Sample copies of the journal are $4 from NAPPS, POB 112, Jonesborough, TN 37659.

Children's librarianship is the theme of the February 1984 issue of *Canadian Library Journal*, with an emphasis on how the field is affected by technological change. Articles deal

resources

Bed and breakfast establishments that offer moderately priced lodgings, usually in private homes, have long been a tradition for travelers in Europe. These alternatives to hotels have been growing in popularity in this country as well. A number of resources are available to put vacationers in touch with "B&B" operations.

• The Bed & Breakfast League, Ltd., is a membership organization for hosts and guests. A $25 annual fee entitles members to call the league's toll-free reservation number to make bookings in any of over 400 private homes throughout the U.S.—plus a scattering in Great Britain—at room rates less than half the price of hotels. Members also receive a directory with detailed descriptions of hosts and a bimonthly newsletter featuring new listings. For more information write the league at 2855 29th St., N.W., Washington, DC 20008.

• *The Bed & Breakfast Hostlist* is a booklet published twice-yearly by the American Bed & Breakfast Association describing B&B reservation services for more than 1,000 cities and towns in North America. The group also publishes *Bed & Breakfast Guest*, a newsletter focusing on accommodations in specific areas; recent issues have covered lodgings for the World's Fair in New Orleans and the 1984 Olympics in Los Angeles. Single copies of the *Hostlist* are $5; a one-year subscription offering 10 issues of the newsletter and two editions of the *Hostlist* is $25. The association's address is POB 23294, Washington, DC 20026.

• Two recent books from East Woods Press describe B&Bs in Great Britain and California. *The Best Bed & Breakfast in the World* describes over 800 establishments in England, Ireland, Scotland, and Wales, ranging from Tudor houses to country pubs. The listings include the approximate cost per person and tell whether children or pets are accepted. Introductory sections for each county offer background information and lists of historic buildings, churches, museums, and monuments. 318 p., paper, $10.95 (83-049034, 0-88742-002-8).

More than 300 inns, cottages, and private homes are listed in *The California Bed & Breakfast Book*, with descriptions of the lodgings, price ranges, and policies on children, pets, smoking, and credit cards. The guide also contains chapters introducing newcomers to the B&B concept, a directory of B&B referral agencies in the state, and a list of select non-breakfast establishments. 180 p., paper, $7.95 (83-49038, 0-88742-001-X). Both titles are available from East Woods Press, 429 East Blvd., Charlotte, NC 28203.

Softcover Shakespeare. The Oxford Shakespeare series, a project launched in 1982 to present authorative yet accessible editions of Shakespeare for today's readers, is now available in inexpensive paperback editions.

The Oxford editions, based on the original texts, feature lengthy introductions giving the stage history and background of each work, modernized spelling and punctuation, and copious notes explaining unfamiliar terms and allusions and paraphrasing difficult passages.

The first five softcover releases, reprinting earlier cloth editions, are *The Taming of the Shrew, Henry V, Troilus and Cressida, Julius Caesar* ($6.95 each), and *Titus Andronicus* ($7.95). Subsequent titles will be released simultaneously in cloth and paper. Oxford University Press, 200 Madison Ave., New York, NY 10016.

Criminal Law News is a new publication summarizing all recent criminal cases from all federal and state courts. Each weekly pamphlet contains about 65 pages and is indexed by court and topic.

An introductory subscription rate of $150 for one year is available through June 30; from July 1 through October 31 the price is $157.50; afterwards it rises to $165. West Publishing Co., POB 3526, St. Paul, MN 55165.

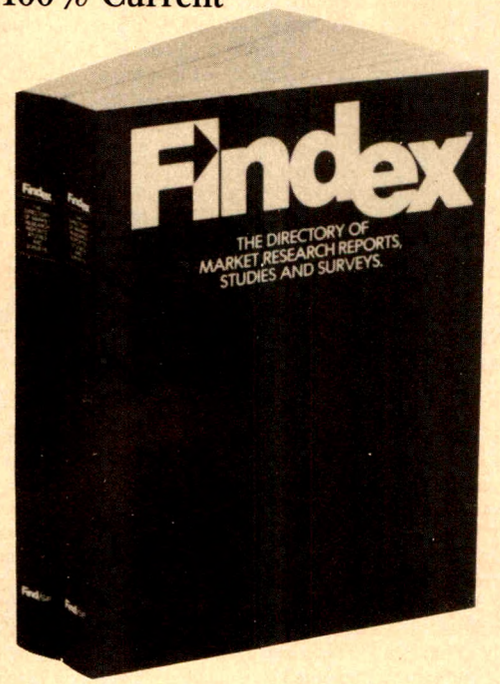
Elusive Elvis enumerated. The latest release in Pierian Press's Rock & Roll Reference Series is a descriptive and evaluative discography of over 300 rare "bootleg" recordings by Elvis Presley. The records, which include concert performances, studio outtakes, and interviews, are unauthorized by Presley's record company and are of dubious legality; thus the volume is titled *Jailhouse Rock*, after one of Presley's early hits.

Compilers Lee Cotten and Howard A. De Witt list the individual songs comprising each record, describe the packaging, and offer critical assessments based on musical merit, scarcity of the material, and recording quality. The 411-page volume also includes indexes by song title, personal name, and record label; lists of bootlegged Super 8mm films and videocassettes; over 200 photographs of record jackets; and a history of bootleg records, with an emphasis on Presley material. $22.95 to institutions, $17.95 to individuals from Pierian Press, POB 1808, Ann Arbor, MI 48106 (83-61755, 0-87650-158-7).

A companion volume in the series is *You Can't Do That*, by Charles Reinhart, which covers nearly 900 Beatles bootlegs as well as 400 records based on the group (such as "We Love You Beatles" and "Beatle Hits Flamenco Style"). The 450-page volume is similar in format to the Presley guide, with indexes, over 180 photos, and historical background on bootlegs, but without the critical assessments of each record. $19.95 to institutions, $16.95 to individuals from Pierian at the above address (80-83515, 0-87650-128-5). □

The most comprehensive guide to market research reports, studies and surveys.

New 1984 Edition
100% Current



A vital reference tool for planners, researchers, marketing managers, librarians, top management

"Has anyone published a study on...?"

You've asked this question a thousand times when researching industries, markets, products and companies of vital interest to your business.

The answer is in FINDEX, a unique guide that lists and describes 11,000 off-the-shelf reports from U.S. and foreign research firms like Frost & Sullivan, Gallup, Arthur D. Little, Predicasts and 400 others.

FINDEX lists and describes available consumer studies, industry and market studies, multi-client reports, surveys, polls, audits, and industry and company reports from leading investment brokerage firms.

FINDEX is essential for:

- the executive who wants to save money on costly custom research by buying a study that's already been done
- the librarian who wants convenient access to the most comprehensive guide to published research
- anyone who wants to stay current on new research

FINDEX is actually a *continuous directory service* that keeps you updated all year long. Subscribe now and you'll receive the handsomely bound 1984 annual edition, plus the mid-year supplement with cumulative index. And you get access to the special Call-In service for quick phone updates as needed. All for only $180.00.

Includes 11,000 reports

Reports listed in FINDEX include document title, concise description, publisher (name, address, phone number, contact person), date, pages and price. All reports are conveniently arranged by the industries shown below. These industries are further refined into *hundreds* of subject categories. Detailed subject and publisher indexes make it easy to find what you're after.

- ☐ Basic Industries
- ☐ Energy
- ☐ Construction/Materials/Machinery
- ☐ Computers/Electronics
- ☐ Consumer Durables
- ☐ Consumer Non-durables
- ☐ Retailing/Consumer Services
- ☐ Healthcare
- ☐ Transportation
- ☐ Defense/Security
- ☐ Media
- ☐ Business/Finance
- ☐ Company Reports

FINDEX users and reviewers say:

"We have found FINDEX to be a very useful tool. When investigating market opportunities, it is one of the first sources we utilize in our search for market information."

—E.G. Andrews, Director of Corporate Strategy and Business Analysis, Kennecott

"This annual guide is a most comprehensive source for locating published market and industry studies... FINDEX will be important to business libraries as well as large public and academic libraries."

—Reference Books Bulletin, American Library Association

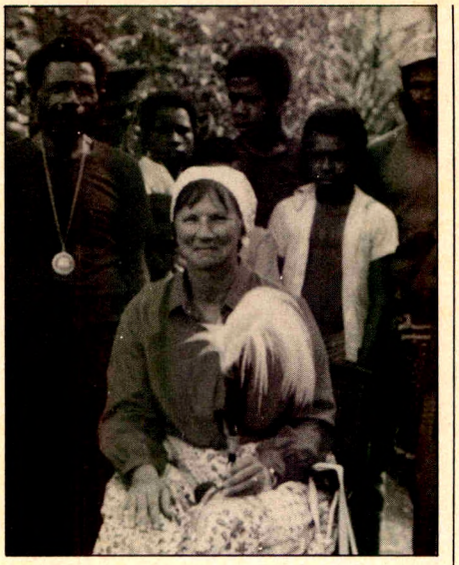
Villagers in the Western Highlands province of Papua New Guinea recently honored ALA member **Pauline Cochrane**, author of *AL*'s "Subject Access" continuing education course, with a precious gift usually reserved to adorn a ceremonial headdress, a stuffed bird-of-paradise. Cochrane, on leave from Syracuse (N.Y.) University's library school faculty, is in Papua New Guinea with her husband, Glynn, who is on a two-year assignment as World Bank advisor on public administration to the PNG government. . . . Aug. 1 ALA member **John K. Amrhein** will become director of the library at California State College/Stanislaus. He currently serves as university librarian at Kutztown University of Pennsylvania. . . . **Elizabeth Booth-Poor**, coordinator of public services at Bartholomew County Public Library, Columbus, Ind., is 1984/85 president-elect of the Indiana Library Association. . . . ALA member **David Zeidberg** became UCLA's head of special collections on April 16. . . . At the Library of Congress ALA member **Winston Tabb** is now chief of the Information and Reference Division in the Copyright Office; **Tom W. Shick** is Afro-American specialist in the Manuscript Division; and **Paul Boswell** has retired as serial reference specialist in the Serial and Government Publications Division. . . . ALA member **Ellen Hoffmann** is now director of libraries at York University, Downsview, Ont. . . . **Patricia Gannon** has been named administrative director of the Roots and Wings Reading Program for Adults, a one-year LSCA grant administered by the California State Library. . . . In April ALA member **Rochelle Sager**, former public services librarian at the University of Alaska/Juneau Library, became associate dean for public services at the Swirbul Library of Adelphi University, Garden City, N.Y. Sager was succeeded in her UAJ post by another ALA member, **Sherry Taber**. . . . At Newport Beach (Calif.) Public Library **Ryna H. Rothburg**, former children's services coordinator, is now adult services coordinator. **Margaret E. Poarch** has succeeded Rothburg in the children's services post. Both are ALA members. . . . **Marianne Scott**, former director of libraries at McGill University, Montreal, Que., is now the national librarian of Canada. . . . ALA member **Jim Pletz** is now director of the Illinois Regional Library for the Blind and Physically Handicapped in Chicago.



Pauline Cochrane is honored at a local village meeting in the Western Highlands of Papua New Guinea.

. . . **Agnes Reagan**, former ALA staffer and Councilor-At-Large, recently retired as professor in the Graduate School of Library and Information Science at the University of Texas at Austin. . . . June 30 ALA member **Gil McNamee** will retire as director of the Business Library at San Francisco (Calif.) Public Library. A former ALA Councilor-At-Large, McNamee was 1976 president of the California Library Association. . . . **Ronald E. Wyllys** is now dean of the Graduate School of Library and Information Science at the University of Texas at Austin. . . . ALA member **Joyce P. Mitchell** is now project manager for the Joint Computer Program for Libraries consortium, headquartered at Skokie (Ill.) Public Library. . . . At SUNY/Albany **Deborah G. Duchala** is now library personnel officer and **Donald Haggerty** is university archivist. . . . The Indiana Library and Indiana Library Trustees associations recently cited two ALA members for their achievements. **C. Catherine Gibson**, adult services coordinator at the Indianapolis-Marion County Public Library in Indianapolis, was named Outstanding Librarian for 1984 in recognition of her innovative public affairs programming. **Walter D. Morrill**, director of libraries at Hanover (Ind.) College, received the associations' Special Services award for his service on the board of the Midwest Federation of Library Associations. Morrill is currently MFLA president. . . . ALA member **Marilyn Boria** is now director of Elmhurst (Ill.) Public Library. . . . ALA member **Phil Clark** is now consultant for continuing education at the Alabama Public Library Service, Montgomery. . . . April 30 **Stanton F. Biddle** became chief librarian at CUNY's Baruch College. An ALA member, Biddle last served as associate director for planning and development at SUNY/Buffalo Libraries. . . . ALA member **William P. Davis**, former public library consultant for the North Texas Library System, Fort Worth, recently became LSCA coordinator at the State Library of Iowa, Des Moines. . . . **William E. Tydeman** recently became head of the special collections department at the University of New Mexico General Library, Albuquerque. . . . At Downey (Calif.) City Library ALA member **Ruth C. Miller** recently retired as director. She was succeeded by another ALA member, **Victoria Jenkins**. . . . **Paul W. Marsh** is now director of instructional resources technology at Metropolitan Technical Community College in Omaha, Nebr. . . . ALA member **Michael Gray**, music librarian of the Voice of America, is the new president of the Association for Recorded Sound Collections. . . . May 1 **O. F. "Van" Van Jepmond** became executive director of the Washington Library Network in Olympia. . . . **Mary Biblo**, head librarian at the University of Chicago Laboratory Schools, is a 1984/85 Joseph Klingenstein Fellow. The one-year fellowship, awarded by Columbia University's Teachers College, provides recipients the opportunity to heighten their academic and administrative leadership skills. At UC's library school, visiting faculty are **Michael Gorman** and **Dennis Reynolds**. Gorman is professor of library administration and director, Division of General Services, at the University of Illinois at Urbana-Champaign; Reynolds is head of OCLC Services at the Bibliographic Center for Research, Denver. . . . The Missouri Association of School Librarians recently presented its Special Service award to ALA member **Louvan Gearin**. □

THE FIRST COMPLETE REFERENCE TO JAPAN

TEN YEARS IN PREPARATION ■ 10,000 ENTRIES ■ 1,000 ILLUSTRATIONS
1,400 CONTRIBUTORS ■ 9 VOLUMES, INCLUDING 50,000-ENTRY INDEX!

KODANSHA ENCYCLOPEDIA OF JAPAN

"LIBRARY JOURNAL'S ONE OF THE BEST REFERENCE BOOKS OF 1983"

"The Kodansha Encyclopedia of Japan, a fine example of bookmaking, is an authoritative, up-to-date source on Japan, well-balanced, well-indexed, and recommended for public, academic, research, and specialized libraries."
—REFERENCE BOOKS BULLETIN

"This is an indispensable reference work on Japan. There is no other work like it, nor is anyone likely to try to match its coverage and quality for some time . . . public and academic libraries with any interest in Japan and the Japanese would be well advised to purchase the Kodansha Encyclopedia."
—LIBRARY JOURNAL

NEVER BEFORE HAS THE TOTALITY OF A MAJOR CIVILIZATION BEEN SO THOROUGHLY PRESENTED. The *Encyclopedia* will serve as:

- A complete reference to 2,000 years of Japanese history, culture and society.
- A sourcebook of practical, timely information on Japan's economy, major industries, government, politics and law.
- A biographical "who's who" of Japanese politicians, artists, philosophers, scientists, writers, business executives, and military and religious leaders.
- An illustrated survey of art, architecture, music, theater, film and literature in Japan.
- An armchair guide to everyday Japanese life, including food, clothing, housing, sports, leisure, customs and manners.

World Book is the most frequently used encyclopedia in print, according to librarians. In fact, according to two independent surveys* reported in the *Encyclopedia Buying Guide*, librarians throughout the U.S. and Canada chose *World Book* over 34 other references as the one that's most frequently used, easiest to use, and easiest to understand.

World Book's popularity isn't the result of just ease of use. The *Guide* awarded *World Book* excellent ratings in nine categories: scope, authority, reliability, recency, objectivity, clarity, accessibility, graphics, and physical format. The closest competitors scored excellent ratings in only six, four and one categories, respectively.

What the ratings don't explain is how *World Book* appeals to children, high school and college students, and adults as well. It's no accident. Articles in *World Book* are written *at the language level of the people most likely to read them.* No matter how difficult the subject matter, *World Book* makes it **understandable.** Selected articles provid readers with quick overviews called "Facts in Brief." An *World Book* brings information to life with more than 29,000 photographs and illustrations.

"*World Book* is, page for page, the best encyclopedia on the market today," reports the *Guide.* "*World Book* is far and away the first choice of professionals who deal with knowledge and information day in and day out."

What's the busiest reference in your library? Doesn't it make sense to have a *current* set on your shelves right now?

World Book, Inc.

a Scott Fetzer company

CONFERENCE REPORT: A FUN RUN AND OTHER FIRST-RUN PROGRAMS

PLAIN AND SIMPLE

Our physical size and financial strength—necessary to make and honor commitments—indicate the successful working relationships we have with thousands of libraries worldwide.

But the plain truth is, simply, that it is our sensitivity to your unique requirements, and our flexibility in providing an exhaustive and relentless effort for total customer service that is our real strength.

We want to work with you—to help you provide exceptional patron service, which is your strength.

We can help. Write today—

Cover: The ALA Fun Run & Walk. This early-morning activity in Dallas was the first of what promises to become an annual conference event for marathoners and masochists. Story on p. 491. *AL* staff photo by A.P.

Fear of strangers in Dallas

AT THE ALA ANNUAL CONFERENCE IN DALLAS, why did more librarians take part in a hot morning run than a cool session on literary criticism? At first I fell back on an old theory: That most librarians would rather break a sweat than crack a book. Later, I began to suspect that they were running *from* something, as I was.

I was running in dread of speakers from outside the profession.

I don't usually suffer xenophobia. I used to believe that we librarians talk to ourselves too much and need to hear from outsiders. I don't believe that anymore. The pendulum has swung. Right now, most outsiders I listen to on libraries really ought to talk about something else.

It was a good conference overall, a credit to Brooke Sheldon and other planners trying to cozy down a housing sprawl the size of Rhode Island. In program content, the beef was there; so much so that our 17-page report this issue is just a first filet.

Some of that good stuff came from outsiders, too—when they were talking about their own fields. But when they took a stab at library wisdom without doing their homework, here's the kind of revelation we received:

- "Let go your habits of defensiveness and take the offensive" [against censorship].
- "The goals of your [*Realities*] task force are reactive, not proactive. . . . Talk about what you can do, not what you need."
- [In school libraries] "this is a time for leadership rather than management, a time for being active rather than reactive."
- "For folks who don't read, libraries can be very scary places. . . . We have to go out into the community."
- Learning [in the library] is "not to learn skills, but to be stimulated and know ourselves."
- "The library must be seen as a sanctuary of the book. . . ."
- "You should view with alarm . . . incursions on these sacred [First Amendment] freedoms."

Now wait a minute—let me make sure I understand these insights. You mean we should *not* barricade ourselves in the bookstacks, jabbing our brooches at everyone but the censors? Hey, thanks for the tip!

It's bad enough when library strangers reminisce about their childhood librarian, a shushing old maid who nevertheless turned them on to Voltaire. It's worse when they aspire to lead us into the 21st Century with naive or neolithic library clichés. The worst is when library strangers get into a position that can influence library welfare. Then we face such propositions as untrained beginning federal librarians; public lending rights; self-supporting public libraries; and educational reforms that count school libraries out.

It was a group of library strangers this summer that recommended closing the University of Denver library school —one of the best and most needed in the West—and the university is taking its advice. (See story in News.)

The Dangerfield Imperative

No wonder I'm getting xenophobic. Call me an ingrate, an isolationist, or Rodney Dangerfield; but what I'd rather have from library outsiders than philosophical loose change is a little respect for our own library leadership.

Will we ever get it? Yes, especially when we give a little. A perfect example is the coalitions ALA is helping to build for literacy, library public awareness, and other missions. With mutual respect, the members of diverse groups are learning from one other as they pursue common goals. Fear of strangers is evaporating.

We've earned some respect! Library leadership has come of age. No outsider had to tell the state librarians of New York and California to be proactive this summer as they led the final campaigns for tremendous funding increases. (See News.) They showed the library strangers in their legislative houses how much more a library is than a sanctuary of the book. They showed what libraries can *do,* as well as what they need.

I often hear outsiders say that libraries have become too important to be run by the librarians. I'm happy our library association didn't buy this sort of nonsense when, during the conference, it established the ALA-accredited MLS degree as a requirement for its executive directors. The fact is, trained librarians are distinguishing themselves throughout the nation as able, progressive, imaginative, and humane managers—and as leaders of their educational and civic communities.

Take a look at what's going on, outsiders, before your next library speech.

Actually, there were quite a few outsiders in that morning run in Dallas. Even a fire fighter took part. But the leader of the pack, the winner, was a librarian. It was a small step for the library profession, perhaps, but a giant victory for xenophobes.

—Art Plotnik

EVERYTHING YOU'VE HEARD ABOUT WHAT P.R. CAN DO FOR YOUR LIBRARY IS ABSOLUTELY TRUE.

There's no better way to nourish relationships with your patrons, and strengthen your library's position in the community than a good PR program.

And it's not difficult to begin thinking in "PR terms" every day of the week.

Data Phase has commissioned one of this country's top public relations firms to write this guide especially for the library community. It's easy to follow. And it is written not only to provide you with sound PR strategies, but to illustrate how those strategies translate into terms that are appropriate for your library.

"A Guide to Public Relations for Your Library" is available free to any library by sending us the coupon below or calling 913-262-5100.

Data Phase
9000 West 67th Street
Shawnee Mission, Kansas 66202

Denver library school axed; program seeks new home

University of Denver library school Dean Bernard Franckowiak was at ALA Annual Conference in Dallas, Monday morning, June 23, when he was informed that the UD board of trustees had just voted to eliminate the library school Aug. 16, 1985. Franckowiak, who had been sent to Dallas to recruit two new faculty members, immediately flew home to Denver.

To save the financially ailing university, Franckowiak learned, the board had voted for a package eliminating the Graduate School of Librarianship and Information Management, the School of Nursing, the Theater Department, and the undergraduate programs in the School of Education and the Department of Speech Pathology and Audiology. No attention had been given to any individual items. The reorganization eliminates 50 faculty positions, 15 of them in the library school.

Dismay at university's methods

"Beyond the shock and horror at the drastic decision, we were dismayed at the way the university acted," Franckowiak told *AL*. In April and May he had prepared program reviews, but had received no feedback or opportunity to consult and prepare alternatives.

"The whole process was tightly vacuum-sealed and unprofessional," he said. "The university hung out the closing sign before consulting with us." Institutional Strategy, Inc., a Cambridge, Mass., consulting firm, had prepared the reorganization package.

No consideration was given to the high quality of or need for the 52-year-old school, which directs the only ALA-accredited program in 11 mountain states, the dean said. UD has 4,800 graduate librarians scattered through the United States and 33 other countries. Ironically, one of them is the chancellor's wife, Alice, a medical librarian in Denver.

Tragedy for students

The 1985 closing date is a personal tragedy for library students, many of whom work full time. "Now we're telling them to finish by next Aug. 15 or not return this fall," Franckowiak said.

More than 100 library students picketed the chancellor's office, and faculty members, alumni, and employers protested. University administrators agreed to look at ideas for the school but insisted the closing would have to stick.

Franckowiak is putting together a case for a proposal to move the library school to a public institution in Colorado. Private library schools have no future, he believes. UD charges $7,300 tuition, compared with $1,200 at state universities.

The idea of transferring the school to a state university is provoking excitement and support among key professionals. ALA accreditation standards don't prescribe a particular table of organization but identify a number of factors to be considered.

Transferring the school would be complex, involving academic administrations, state legislators, and citizens. "It could probably be accomplished in two years, but we have only one," Franckowiak said.

The dean predicted: "This disaster may become a platform from which to launch a new, revitalized, high-quality professional program," if it gets sufficient backing. Franckowiak hopes to develop a groundswell of professional support opposing the elimination of the school and favoring its transfer. Comments may be addressed to Chancellor Dwight Smith, University of Denver, Denver, CO 80208, with copies to Dean Bernard M. Franckowiak, Graduate School of Librarianship and Information Management, University of Denver, Denver, CO 80208.

USC school to close in '86

On July 2, a week after the University of Denver announced its library school closing, University of Southern California Provost Cornelius J. Pings wrote library school Dean Roger Greer that the USC school will be discontinued in June 1986.

Greer had mounted a California-wide campaign to save the school. Alumni had raised $17,000 and promised more, and employers argued they would need more librarians with the funding of the state Public Library Foundation Program. On June 26, USC learned its master's program had been granted continuing accreditation by the ALA Committee on Accreditation.

Despite the positive feelings produced, after "considerable and careful consultation," Provost Pings explained, he had accepted the recommendation of the USC Graduate and Professional School Committee to close the library school. All students were urged to complete their studies within two years or arrange to transfer. University of California/Los Angeles library school Dean Robert Hayes offered his cooperation.

Greer signed a contract to stay two more years and declared: "We are determined to maintain the quality of this program to the end." By mid-July, some 35 new students, including three doctoral candidates, had already signed up to enter in the fall, with full knowledge the school is closing.

California budget approves $2.6 million for literacy

Californians won a $10 million increase in state aid to libraries, State Librarian Gary Strong reported after Gov. George Deukmejian signed the 1984–85 budget June 27. The final figures, totaling more than $37 million, were "exciting all 'round," Strong said, "but the most miraculous was the $2.6 million for literacy."

Only last December Strong had launched the California Literacy Campaign by presenting $2.5 million in federal Library Services and Construction Act awards to 28 public libraries. The campaign aims to mobilize community coalitions to introduce and expand adult literacy services, but reports aren't in yet. When the campaign was launched, Deukmejian proclaimed his support; now he has added the program to his budget.

The new budget also contains $12 million for the Public Library Foundation program, SB 358, a 100-percent increase over last year's funding figure. Deukmejian explained that the legislature wanted to triple the total to $27.9 million, but he preferred to double it. Strong commented, "The increase is demonstrable evidence that the plight of our public libraries is beginning to receive the attention it deserves."

Strong was pleased that the $3.9 million for transaction-based reimbursements for interlibrary loan services was approved —"We'd been working on TBR for four years," he said.

Included in the Department of General Services budget is $525,000 for design plans for a new California State Library building. The new structure would allow the library to consolidate all its Sacramento operations into one location.

Archives near independence

On June 21, the same night the Senate passed the LSCA extension, it also approved, by voice vote, S. 905, providing independent agency status for the National Archives and Records Service. The vote came just two days after NARS observed the 50th anniversary of its founding.

S. 905 separates NARS from its current parent agency, the General Services Administration, which operates most federal buildings. Senate Report 98-373 cites the conflicting functions and missions between NARS and GSA, which result in divided authority, unclear responsibilties, politicization, and diminishing resources for a growing workload. Sen. Mark Hatfield (R-Ore.) obtained general support for the bill from the Reagan Administration.

The similar but not identical House bill, HR 3987, was expected to come to the floor shortly. The ALA Washington Office urged supporters to contact their legislators.

NY gives $3.9 million boost to school library systems

In a special ceremony July 10, New York Gov. Mario Cuomo signed the $57.2 million omnibus library bill of 1984, marking the greatest increase in library aid in state history. The act, strongly supported by the New York Library Association, followed 1981 legislation that boosted library aid from $34.4 million to $43.4 million.

State Librarian Joseph T. Shubert reported that $13 million in new funds are available this year, with a full $15 million annual increase beginning with the state fiscal year April 1.

The landmark act authorizes $3.9 million for school library system development and $3 million for library construction, a first-time effort for New York State. Other innovations include $1.3 million in annual grants for automation, $1.1 million for preservation and conservation of research materials, and $280,000 for public library services designed for state correctional facilities.

Largest single component in the omnibus package is public library system aid, which will be increased from $38.5 million to $45.2 million. This includes $6.6 million in local sponsor incentive aid for New York's 22 systems serving 720 libraries. Local incentive aid was increased 58 percent over the previous figure of $4.2 million.

Resource-sharing projects

School library system provisions are based on the 12 pilot school library systems designed to link all school libraries in service areas and launched in 1979. The omnibus act converts the resource-sharing projects into permanent parts of the library network and provides planning grants of $20,000 each to the other cooperative educational services or school district boards to develop similar systems.

"At the cost of $1 per pupil per year, the program will multiply by several times the number of books available to students," said Assemblyman Ed Sullivan (D-Albany), a sponsor of the bill.

ALA Councilor and Solvay PL Trustee Daniel Casey was most enthusiastic about the state's commitment to fund 50 percent of the costs of building, renovating, or rehabilitating libraries throughout the state. Casey has been advocating a construction component in library bills since 1975.

The 22 construction grants authorized for the current year are based in part on system population, and range from $71,000 for the Clinton-Essex-Franklin Library System to $357,000 for the New York Public Library. From the $3 million available in 1984, each system receives $54,445 and 10 cents per capita.

Legislators also provided six cents per capita for public library outreach, amounting to $1.9 million in 1985, a major increase over the previous $880,000. New groups specifically targeted in the act are persons who are educationally disadvantaged, members of ethnic or minority groups, and those in need of job placement.

In addition, the legislation gives public library systems $9.25 per inmate of state correctional facilities to provide library services within the facilities. The act also expands the rural hospital library program to include urban hospitals. The new funding for greater use of library technology is specifically aimed at regional automation programs.

Lucky librarian still on job after $3.2 million Lotto win

A librarian who won $3.2 million in the Pennsylvania State Lotto June 1 has stayed in her job as coordinator of advisory services for the Pennsylvania State Library and has no plans yet for leaving.

"Whatever I do, I will definitely keep a hand in libraries," said Lois K. Albrecht, 53, in an interview with *AL*. "Before I leave something I've enjoyed for 33 years, I want to be sure I have something else to do—something I like."

Albrecht, an active member of ALA, attended a full range of sessions at the Dallas annual conference in late June. She said that colleagues there, like those at home, treated her as usual except to express delight at her good luck.

Albrecht and her husband, Charles, picked the six winning numbers in the week's Lotto. On June 12, they received the first of 21 annual installments of $122,386.

Charles, whose disability payments for a respiratory ailment ran out recently, told the Harrisburg *Patriot News* the couple would first pay off debts, remodel the house, and visit family in Germany.

Albrecht and her staff of three provide advisory services to the state's library districts, "on everything from applying output measures to handholding a library board that doesn't understand library goals." She has been with the state library since 1972; earlier experience includes a 10-year stint as school librarian, 1952–62. A member of Beta Phi Mu, she earned her MLS in 1963 at the University of Pittsburgh.

Asked to comment on recent debate over the value of the MLS, she remarked, "My first view of librarianship was from the perspective of a teacher; I felt I needed something more. The MLS gave me a library philosophy."

Winning the Lotto has prompted other philosophical considerations and very few annoyances. "It's a nice feeling, believe me," she told *AL*. "Except for one crank

Harrisburg Patriot News

Lotto winner Lois K. Albrecht

letter, we have not been pestered. They say unless you win $5 million or more these days, you're not big news."

AL asked: "When stressful situations arise at work, don't you find yourself thinking, 'Who needs this anymore?' "

"I have to admit it," she said. "That thought crossed my mind a couple of times."

—*A.P.*

Senate extends LSCA, considers increasing funds

On the eve of the ALA Annual Conference, the Senate passed the five-year extension of the Library Services and Construction Act, S. 2490. The voice vote was taken the night of June 21.

The House passed a similar bill, HR 2878, by an overwhelming margin last January. House-Senate conferees were expected to work out the difference after Congress returned from recess July 23.

Both bills revise and extend Title I, public library services; Title II, public library construction; and Title III, interlibrary cooperation. They also establish a new Title IV, Indian library services. The House bill would also add titles authorizing acquisition of foreign-language materials and library literacy programs, which could be eligible under Title I. Authorization spending levels for the fiscal years 1985 through 1988 also differed slightly.

Subcommittee offers "crucial" support

Five days later, on June 26, the Senate Appropriations Committee approved FY 1985 library program amounts recommended by its subcommittee. The funding would increase the 1984 appropriation for Title I from $65 million to $75 million, Title II from zero to $50 million, and Title III from $15 million to $18 million. Higher Education Act Title II-B, training and research, would increase from $880,000 to $1 million and

Title II-C, research libraries, would remain $6 million. (The House subcommittee has not yet revealed its figures.)

With its recommendations, the Senate Labor-HHS-Education Subcommittee submitted this report:

"For the third consecutive year, the administration has proposed complete elimination of the library programs administered by the Department of Education. For the third year in a row, the committee has flatly rejected this proposal.

"Libraries are an integral part of the nation's educational systems and national commitment to lifelong learning. The federal contribution to these programs, while modest, is crucial to the ability of libraries to serve the total population and in particular, such groups as the handicapped, the homebound, economically needy, language minorities, and others who require often more costly services. This federal investment must and will continue to assist communities to provide such services and to enhance the quality of library programs for the benefit of our citizens."

Next ALA Executive Director to earn $70,000 to $90,000

At a special all-day meeting in Chicago July 16, the ALA Executive Board mapped out a game plan to find a successor to Executive Director Robert Wedgeworth by Aug. 1, 1985.

The board had decided at Annual Conference that candidates for the position must hold an ALA-accredited master's degree and have demonstrated experience at the management level (see p. 495). On July 16 the board discussed a timeline for the search process, approved a two-page position description with criteria, and appointed a seven-member ALA Search Committee.

Board members quickly agreed that F. William Summers should represent them on the committee, but they struggled for several hours to select six other ALA members and alternates who would represent the best possible balance of geographical areas, types of library, race, sex, and age.

ALA staff was asked to develop advertising copy for the position description and submit ads for publication. The salary range was set at $70,000 to $90,000; the deadline for applications is Dec. 5.

The board asked the Search Committee to screen the applicants, interview the candidates, and forward its recommendations to the Executive Board so that a decision could be made at the board's spring meeting May 1-2. The board hopes that the appointee can be introduced at the 1985 Annual Conference in July and can report to work in August.

news in brief

FCC outlaws AT&T tariff. On June 27 the Federal Communications Commission ruled unlawful the AT&T private line service tariff scheduled to take effect July 1. AT&T had proposed major increases on the tariff under which libraries connect through their networks to bibliographic utility databanks. Current rates for private-line service remain in effect.

Videodisc at LC. The Library of Congress installed an analog videodisc, player, and monitor in its Prints and Photographs Reading Room June 15. Patrons can use the system to access and view nearly 40,000 photographs, posters, architectural drawings, and other items from the library's Prints and Photographs collection.

The disc, the first product from LC's Optical Disk Pilot Program, includes: 875 photographs, including 539 black-and-white and hand-colored lantern slides, taken around the world from 1894 to 1896 on the World Transportation Commission Trip; 1,610 color slides and transparencies of the U.S. and Puerto Rico taken from 1939 to 1943 by photographers from the U.S. Farm Security Administration and Office of War Information; 3,615 international political and propaganda posters dating from 1965 to 1980; and 440 plans, details, renderings, and other items from the architectural drawings for LC's Jefferson and Adams buildings.

Other videodiscs will be made available to the public as copyright permissions are secured. Among the LC materials to be included are: 10,000 images from the Prints and Photographs Division; nearly 100,000 movie stills; seven color films and film segments; and two television newscasts from July 3 and 4, 1976.

Another phase of the program will use digital optical discs for computerized mass storage, preservation, and retrieval of printed materials from various sources, particularly periodicals.

William J. Welsh, deputy Librarian of Congress, gives overall direction to the Pilot Program. Joseph W. Price, chief, Science and Technology Division, serves as director of projects.

Ordering gov docs for patrons. The Detroit and St. Louis public libraries recently launched an experimental program to test the feasibility of ordering National Technical Information Service (NTIS) documents for patrons. Normally, patrons must purchase the reports directly from NTIS, but during the one-year program library staff will take payment and place orders through an electronic ordering service.

NTIS developed the program as a means of getting the results of government-sponsored research and development projects to the private sector. "One of our major goals is to get this information out to business and industry and people who can make use of it," said Ruth S. Smith, director of the NTIS Office of Customer Services, adding that libraries can reach the public much more easily than the agency can. If the one-year experiment is successful, Smith added, it is likely that the ordering program will be expanded to include additional libraries.

New head for NLM. Donald A.B. Lindberg has been appointed director of the National Library of Medicine, replacing Martin M. Cummings, who retired last September.

Lindberg, director of the Information Science Group and professor of pathology at the University of Missouri/Columbia School of Medicine, is a widely published expert in the field of computers in medicine. He received his A.B. degree from Amherst College and his M.D. from Columbia University.

Lindberg was a member of NLM's Biomedical Library Review Committee from 1976 to 1980 and was appointed to the library's Board of Scientific Counselors last year.

New structure at NAL. In the May 1984 *Agricultural Libraries Information Notes*, National Agricultural Library Director Joseph H. Howard outlined the NAL reorganization plan approved by the U.S. Secretary of Agriculture.

The restructuring is designed to revitalize and modernize the library's operations and services, expand user access, and coordinate and strengthen a national network of agricultural libraries, Howard said. The changes were proposed or endorsed by the blue-ribbon panel assessment of NAL (*AL*, Nov., 1982, p. 612).

The single most important recommendation by the panel was the need for NAL to improve its services, the library director noted. To this end, the reorganized Public Services Department will consist of subject area units staffed by specialists with agriculture-related backgrounds as well as library degrees.

"With such a structure," Howard explained, "NAL can deal more effectively with its main patrons—federal and state researchers—while focusing more support on extension programs." The management and use of special databases will also be enhanced, he added.

Vendors abroad. As a result of contracts signed recently, libraries in France, Quebec, and the People's Republic of China will soon benefit from American and Canadian technology.

The Geac Computer Corporation of Toronto has contracted with Sema, a French systems house, to automate the catalog of the Bibliotheque Nationale, one of the world's largest libraries. The catalog, to be titled the National Bibliotheque Database Management System, will be specifically written by

Geac in conjunction with Sema and the library. When complete, the system will provide an online service throughout the Bibliotheque Nationale and allow any other French library to access the database by using a packet-switching network.

The two-and-a-half-year contract, valued at approximately $1.4 million, marks Geac's first library automation sale in France.

● UTLAS, Inc., of Toronto has contracted with the Quebec Ministére des Communications to create a province-wide library network. The Quebec government will invest $4.7 million over a three-year period to set up a Quebec library service center offering UTLAS services, replicate the files created by UTLAS customers in Quebec, convert the manual cataloging in other provincial libraries, and create a French-name authority file.

UTLAS has been supplying online databases and services in French and English to Canadian libraries since 1973. Currently more than 280 institutions, consortia members, and government agencies in Canada, the United States, and Japan maintain individual databases through UTLAS facilities.

● At ALA Annual Conference in Dallas, Baker & Taylor President Pedro Mata and Ma Shiyi, director of special purchasing at Beida University in Beijing, announced an agreement for supplying scholarly U.S. books to university libraries throughout the People's Republic of China.

The project is part of a five-year effort to rebuild Chinese university library collections, and was facilitated by a World Bank loan.

Baker & Taylor says it was selected because it is able to ship virtually any book published in the United States. Mata led a delegation to China to negotiate the trade agreement early this year.

Title selection will be aided through the use of the Baker & Taylor magazine *Directions* and the Approval Program database retroactively for five years. The database provides access to more than 200,000 titles.

In addition to supplying books, a variety of other Baker & Taylor services will be available to the more than 100 universities expected to participate in the project. □

QUICK-BIBS: New and recent books on a timely topic

Bill Ott, compiler

PSYCHIATRY

One year ago this month, Judith Rossner published a novel called *August* (Houghton Mifflin, 1983) in which she explored an intriguing modern phenomenon: psychiatrists, particularly those in New York, tend to take vacations in August, leaving scores of patients to fend for themselves. In the year since Rossner's novel appeared, the psychiatric establishment has taken its lumps from several nonfiction writers. Now August has arrived again—and great hordes of psychiatrists are restoring themselves with gin-and-tonics in some tropical clime. It seems appropriate for "Quick-Bibs" to feature books suggesting that shrinks are less than all-knowing. What better therapy for those shrinkless dog days of August than for library patrons to read about their "right to feel bad."

Andreasen, Nancy C. *The Broken Brain: the Biological Revolution in Psychiatry.* Harper, 1984, $16.95. (0-06-015281-8)

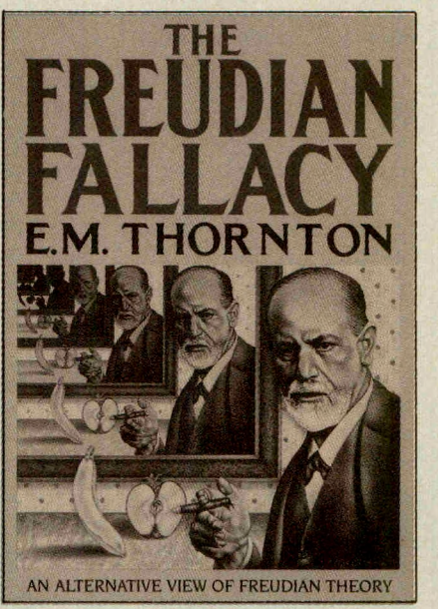
Andreasen's theory that many psychological problems have their origins in biology may not be exactly comforting; but at least some internists can be found in their offices in August.

Hazleton, Lesley. *The Right to Feel Bad: Coming to Terms with Normal Depression.* Dial, 1984, $13.95. (0-385-27684-2)

According to Hazleton, "normal" depression should be viewed as a curative process that allows us to overcome the losses we experience in life. Or, as Woody Allen puts it, "Anyone over 35 not terrified by death is crazy."

Heal, Edith. *August Break.* Sun & Moon Press, 1984, $12.95. (0-940650-45-2)

The premise of Heal's novel is identical to Rossner's: What happens to the patients while their shrinks are frolicking on the beach? In this version, though, the tables are turned: The psychiatrist suffers a breakdown while the patients heal themselves.



Thornton's research reveals that cocaine-induced erotic fantasies influenced Freud's personality and theories.

Malcolm, Janet. *In the Freud Archives.* Knopf, 1984, $11.95. (0-394-53869-2, 83-49416)

New Yorker staff writer Malcolm profiles Jeffrey Masson and the brouhaha surrounding his much-discussed *Assault on Truth* (see below). Her research provides a revealing glimpse of the bickering and in-fighting that takes place behind the psychiatrist's couch.

Masson, Jeffrey. *The Assault on Truth: Freud's Suppression of the Seduction Theory.* Farrar, 1984, $16.95. (0-374-10642-8, 83-20806)

Masson contends that Freud, fearing rejection from his colleagues, toned down his original "seduction theory" by pretending that sexual fantasies rather than actual sexual violence caused psychological trauma. One of the cornerstones of modern psychoanalytic theory, in other words, may have been based on deception.

Miller, Alice. *Thou Shalt Not Be Aware: Psychoanalysis and Society's Betrayal of the Child.* Farrar, 1984, $14.95. (0-374-27646-3, 84-6008)

Miller also has a bone to pick with Freud. She believes that his emphasis on sexual fantasies has made today's psychiatrists overly skeptical about their patients' claims of being abused as children.

Thornton, E.M. *The Freudian Fallacy: An Alternative View of Freudian Theory.* Doubleday/Dial, 1984, $17.95. (0-385-27862-4)

Thornton goes Masson and Miller one further. According to the author, evidence reveals that not only was Freud a coward, he was also a cocaine addict, and it was drug-induced erotic fantasies that prompted him to think all those nasty thoughts. No wonder we have a cocaine problem.

Twerski, Abraham. *Who Says You're Neurotic? How to Avoid Mistaken Psychiatric Diagnosis When the Problem May Be a Physical Condition.* Prentice-Hall, 1984, $12.95. (0-13-958448-X)

From our mothers to our psychoanalysts, someone is always telling us that our problems are "all in the head." Twerski doesn't buy it. "It's probably in your body," he coos reassuringly, while explaining the difference between schizophrenia and drinking too much coffee.

Weinberg, George. *The Heart of Psychotherapy: A Journey into the Mind and Office of the Therapist at Work.* St. Martin's, 1984, $15.95. (0-312-36594-3, 83-26946)

In this consumer's guide for neurotics, Weinberg describes everything from how therapists set fees and dress to what actually takes place (or should take place) during therapy. Buyer Beware: never choose a shrink who wears leisure suits. □

Battle lines drawn in censorship programs

NYPL panelists debate textbooks, public and school libraries

by K. M. Rosswurm

IF THE BATTLE OVER CENSORship is to be won, the victory will be achieved in the field, not at the negotiating table—or, in this case, at a panel discussion. In an attempt to establish the battle lines, the New York Public Library sponsored three June panel discussions on the topic "Censorship and Selection in Libraries and Schools: Who Decides?" The discussions, held in conjunction with NYPL's widely publicized exhibit, "Censorship: 500 Years of Conflict," indicated the depths of that continuing struggle. They revealed that reaction to censorship is more emotional than thoughtful, with little dialogue or compromise. As a result, the issue was reduced to a power struggle based on conflicting values and political principles.

Free-for-all on textbooks

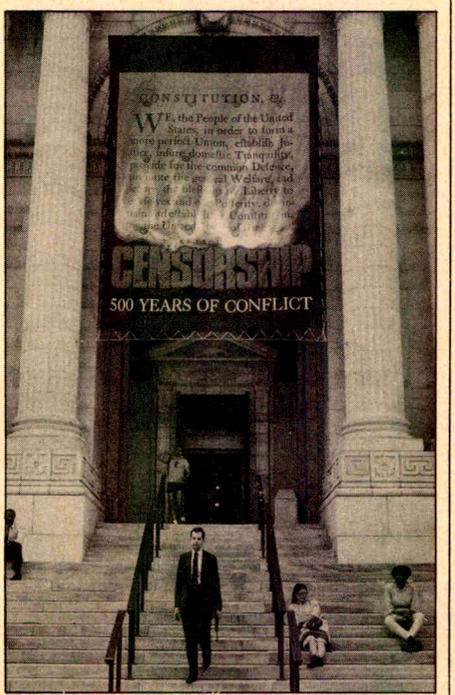
The first panel, certainly the least interesting, was "Textbooks: What Should Our Children Learn?" Because there were no prepared statements and very little structure, the program verged on a free-for-all. Though there were certainly points of contention on the panel, the principal disagreement was between some teachers in the audience and the panelists over parental participation in the selection of textbooks. A number of New York – area teachers questioned the ability of parents to evaluate texts competently.

Brooks Thomas, of Harper & Row and the Association of American Publishers, defended publishers' limited role in challenging restrictive textbook selection laws, pointing out that they must "first of all survive" as businesses and that they "could only do so much."

The most critical member of the panel, lawyer Michael Farris, made a heartfelt argument for creationism, for education as an inculcator of parental values, and against "one world government." Barbara Parker of People for the American Way took Farris to task for advocating the teaching of religion in public schools, pointedly rejecting his claim that creationism was scientific fact rather than religious faith.

Porn and public libraries

Far more stimulating than the first program was the second panel, "Public Libraries: Rights in Conflict." The proceedings were dominated by the impassioned antipornography appeal of feminist Andrea Dworkin and by the slick presentation of Moral Majoritarian Cal Thomas. Believing that the best defense is a good offense, Thomas said that he was trying to "defuse some of the negative knee-jerkism" of the right, while also "challenging and encouraging libraries" to include more materials on conservative views and values.



A banner above the entrance to NYPL's Central Research Library announces the library's censorship exhibition.

The two speakers verged on agreement in their opposition to pornography—Thomas as a religious conservative, Dworkin as a feminist. While championing the use of local ordinances declaring pornography a violation of women's civil rights, Dworkin encouraged librarians to collect pornography for study and research purposes. Under Dworkin's scheme, however, it would be illegal for libraries to display that "pornography," even in such censorship exhibits as NYPL's.

Barbara Rollock, coordinator of children's services for the NYPL branch libraries, and Judith Krug, director of the ALA Office for Intellectual Freedom, represented the library community with distinction. Krug countered Thomas's perennial claim that public library collections have a liberal bias and Rollock gave a simple but eloquent explanation of the difference between selection and censorship.

The school library battleground

The last of the three panels, "The Battle Over School Libraries," was undoubtedly the best. There were lively exchanges between the panelists and honest reactions from the audience, and the entire affair was expertly moderated by Edwin Newman.

With few exceptions, the members of the third panel saw the battle over school libraries as being fought between parents and boards of education, with librarians and students on the periphery. The three conservative members of the panel made their voices heard. Terry Todd of the Eagle Forum believed that if a book encouraged students "to break the law," it should not be in the library. Examples of books that encourage lawlessness include those that question authority or discuss homosexuality or extramarital sex.

Connaught Marshner, director of the Child and Family Protection Institute, wanted to enlist school librarians in policing student reading habits. She suggested that parents provide librarians with lists of books their children are prohibited from

---

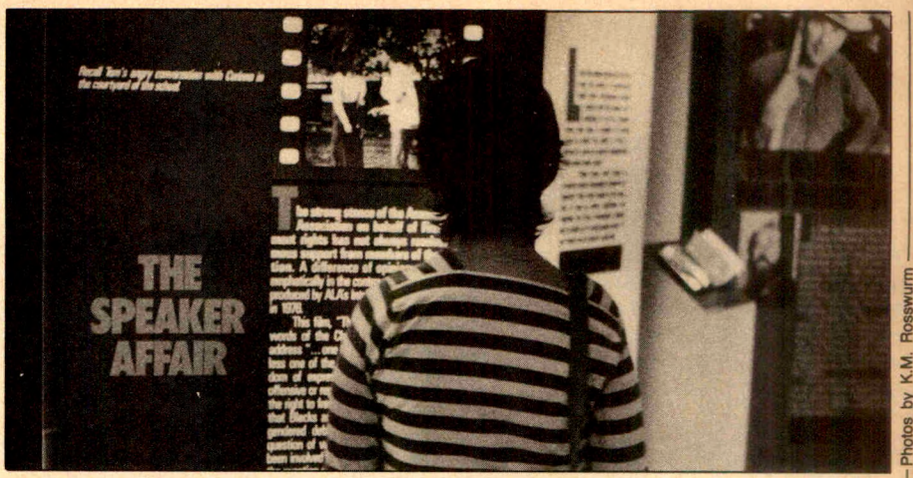
K. M. Rosswurm, head of adult services at the Mount Vernon (N.Y.) Public Library, covered these panel discussions for *American Libraries.*

checking out. She also stated that "ALA and *Publishers Weekly*" reviewers consider books "from an upper-class, Northeastern establishment perspective." This comment drew a howl of disbelief from the audience.

The third conservative on the panel, Lamaar Mooneyham of the Moral Majority, compared the parental restriction of a child's reading material to the limits parents place on where their children play or what they eat. He stated repeatedly that his group has never advocated censorship or "the removal of any books."

Freedom of choice defended

While the conservatives clearly thought that it was wise and good to control what children and young adults read, other panelists defended their right of choice. Author Norma Klein most vigorously advocated the freedom to read. "Even at 12," according to Klein, "even at five, we should be beginning the process of respecting our children and offering them diverse materials appropriate for their level." Frances C. Dean, director of the Montgomery County (Md.) Public Schools Department of Instructional Resources, did not go as far as Klein. She did contend, however, that a child reads from the perspective of past experience and the values learned at home. Dean suggested that the conservative fear of exposing children to new ideas was unfounded.



Photos by K.M. Rosswurm

One of the exhibits at NYPL deals with* The Speaker, *a film produced in 1977 by the ALA Intellectual Freedom Committee. The controversial film, which dramatized efforts to prevent a speaker from appearing at a high school, was accused by many ALA members of insensitivity to racial issues.

This notion of exposure to ideas was at the heart of the conflicts brought out in the three panel discussions. The liberal viewpoint supported free and open access to materials and confidence in the integrity and judgment of educational and library professionals. The conservative panelists, on the other hand, were suspicious of professionals and placed their trust in parental discretion. They articulated their position not as espousing censorship, but as advocating balanced collections and the right *not* to have to read objectionable materials.

The two viewpoints represented on the panels clashed because they were based on different assumptions and different values. They were visceral rather than intellectual reactions. The audience, in this same vein, resorted to long-winded statements and diatribes rather than asking perceptive, penetrating questions. If the panels were a marketplace of ideas, there were clearly more browsers than buyers. It seems unlikely that many minds were changed. □

There is only one Computer-Readable Databases: A Directory and Data Sourcebook. It always has been compiled and edited by **Martha E. Williams.** The new edition will be published by the **American Library Association.**

"The Williams directory of computer-readable databases is a must for every information center—corporate, academic, public or private."
John W. Hawkins, Associate Editor and Director, Research and Special Information Services Division, The Bureau of National Affairs, Inc.

"I have utilized the sourcebook since its first edition and have found it easy to use, comprehensive, and reliable."
Harry J. Hamilton, Database Project Leader, American Institute of Aeronautics and Astronautics.

Computer-Readable Databases is indispensable in all businesses, industries, and academic and other research centers with staff or clients working with, maintaining, or studying databases. Coverage of internationally available word-oriented databases will be accompanied in the new edition by equivalent treatment of numeric databases. The total number of databases described in detail is approximately 2,000.

Under the continuing editorship of Martha E. Williams since it was first published in 1976, this longest-standing of database reference sources was issued previously by the American Society for Information Science (ASIS) and Knowledge Industry Publications, Inc.

Available autumn 1984.

LETTERS AND BRIEF COMMENT FROM OUR READERS

Holley deserves gratitude

I WAS SURPRISED AND SHOCKED by the failure of ALA to take an active role in the Merwine Case. Every member of the library profession owes Ed Holley a debt of gratitude for the time, energy, and skill he contributed to the cause of upholding professional standards.

JOHN M. LINDSAY, Law Library, Temple University, Philadelphia

No short cuts or quick fixes

ED HOLLEY AND HIS ARTICLE ON the Merwine Case certainly need no defense from me, but I find Polly Coe's rebuttal (June, p. 376–77) disturbing. Since she is a member of the OLPR Advisory Committee, her letter may help explain some of the strange things which emerge from this body. It is understandable that an individual filing a law suit would use any potential justification that might help, but our own determination to be fair and lawful need not turn us to quivering jelly.

The Merwine Case has nothing to do with equal opportunity or affirmative action, and it is fortunate that at least the judge was able to see the absurdity of an argument that requiring a library degree discriminated against women when the vast majority of those holding the degree are women. Merwine was not qualified for the post simply because she is not a librarian at all, and nothing else need have mattered for ALA to support this case.

Beyond this specific example, however, I find it disturbing to learn from Coe that the law of the land requires us to seek shortcuts and quick fixes to implement equal opportunity, because my understanding of legal requirements suggests no such thing. We must determine that requirements are valid for all candidates, and we must insure that opportunities to meet those requirements exist. In most instances, minority candidates seeking professional posts would be better served to receive support in achieving the educational requirement if it is a valid one. That is more expensive and it takes longer, but it is a far better solution most specifically for the candidate.

Coe's statement that until ALA develops a certification technique, library managers would be illegal in refusing to consider a paraprofessional for a professional position is her own inflamed rhetoric; I hope that no reader will consider that opinion as a statement of law. Cases such as these will be considered, as they arise, on their perceived merits. ALA and other professional library bodies can help judges and juries make needed distinctions by providing expert testimony.

If certification techniques that differentiate between training and education, between skill and conceptual knowledge can be developed, then they will go a long way toward silencing some of the present automatic equivalency assumptions. However, if there are some who feel that without the support of hard test data we can make no worthwhile and informed judgments or recommendations, then our self-confidence is indeed at a low point.

HERBERT S. WHITE, ALA member, Indiana University library school, Bloomington

$4,000 for "irrelevant" piece of paper

I WAS EXTREMELY DISTRESSED TO read Polly Coe's response (June, p. 376–77) to Dean Holley's call for action in defense of the ALA-accredited MLS as a minimum qualification for employment as a professional librarian. It was especially troubling to realize her comments were expressed as a member of OLPR's Advisory Committee, following a direct assault on the status of librarians by the federal government's Office of Personnel Management, and coming at a time when pay equity and other remuneration issues are being fought daily.

If Coe really believes that her paraprofessionals are qualified to be librarians through experience alone, why does she then encourage them to spend over $4,000 just to receive a piece of paper she feels is irrelevant?

In many professional fields that do not have state examinations to certify the competence of the practitioners, it is standard practice to accept an accredited degree (frequently certified by a national association) as the basic entry-level requirement. To do any less with respect to librarianship will only serve to destroy the hard-fought advances made by our colleagues over the last hundred years.

ARTHUR L. FRIEDMAN, ALA member, Nassau Community College library, Garden City, N.Y.

Coe clarifies King-study reference

I WOULD LIKE TO CLARIFY A LETter that was printed in June (p. 376–77) regarding the MLS. I referred in that letter to the King Research study on competencies. The purpose of the King study is to study educational needs of the profession, not to validate the MLS as an entry-level requirement to the profession. My reference to the study did not imply criticism of the study, which I fully support, but was meant as clarification. Many professionals, even library educators, seem to think the King study will solve the "problem" of the MLS. The King study is a good first step, but it will have to be followed by considerably more research to validate the MLS.

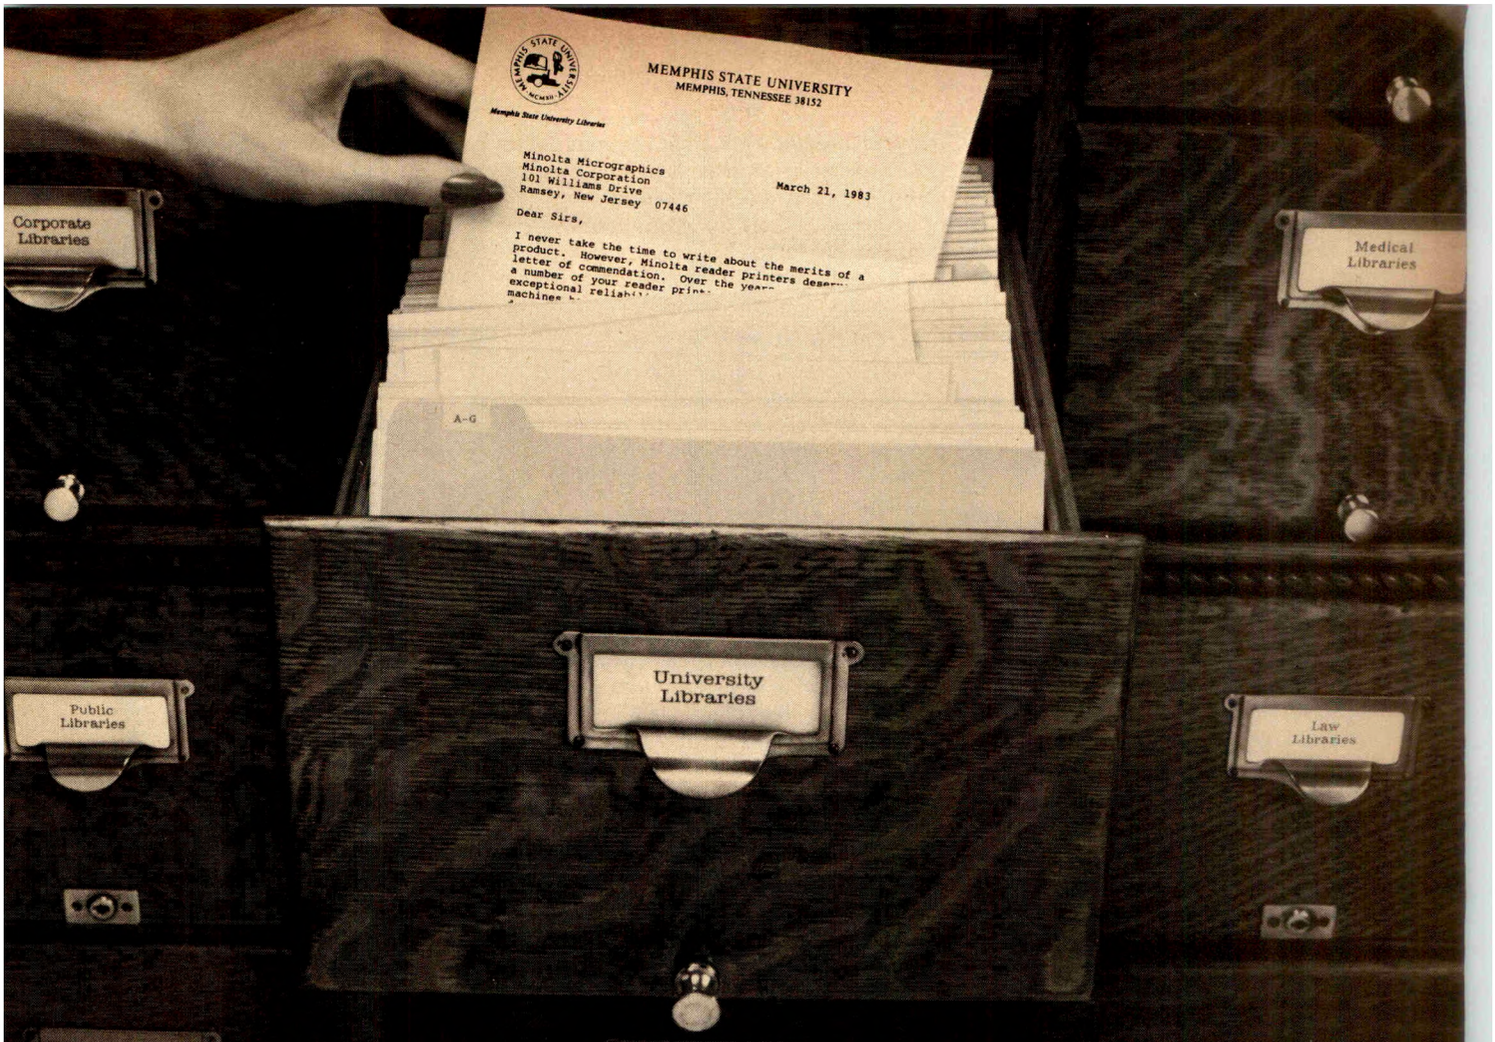
POLLY COE, ALA member, Santa Fe Regional Library, Gainesville, Fla.

LC personnel policies re MLS

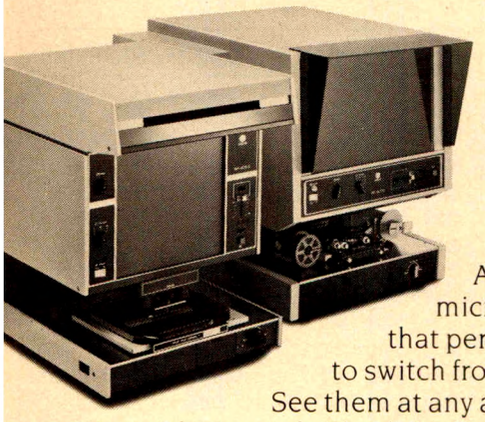
ALTHOUGH I CAN UNDERSTAND ED Holley's motive for writing "The Merwine Case and the MLS Degree; The Judge Rules for Logic and Common Sense" (May, p. 327–30), I fear that its emotional impact will cloud some of the main issues involved in the case and, indeed, in Title VII law. My purpose here is not to respond to all of the points raised by Holley. I assume others will address at least some of them in detail. Rather, I wish to clarify several of his references to the Library of Congress.

LC vacancy announcements for professional librarian positions carry the educational requirement of an MLS degree (though not an ALA-accredited MLS degree). Substitution of related relevant experience is allowed in lieu of the MLS degree. This policy of substitution is uniformly practiced in a variety of occupational job series, not only in the Library but throughout the federal government. In the case of professional librarian positions in the Library, some individuals with a high school education with the requisite related experience meet LC's basic minimum educational qualifications. The applicant supply pool is generally made up of applicants who fall anywhere in a matrix of education and related experience and those who have an MLS degree or higher. Experience has shown that individuals who possess certain combinations of education and work-related experience are able to perform the duties of many positions quite satisfactorily. Valid minimum educational requirements ought to be predictive of job performance. They are pass/fail standards or tests for eliminating unqualified people—those who *cannot* do the job.

In his article, Holley suggests, through some unnamed cynics, that LC adopted certain new personnel policies in the mid-seventies ". . . not on principle but to keep from being sued." The LC policy of substituting related experience for education dates back at least to the early 1960s. Two other events actually influenced the mid-seventies changes: 1) In 1972 the Library, like most federal agencies, came under the Civil Rights



THEIR REFERENCES WOULD FILL A LIBRARY.



Libraries from A to Z have written us referencing the quality and reliability of Minolta RP 405E and RP 407E reader-printers.

We're pleased, but not surprised. Because both models have a lot to offer libraries. They give you sharp, positive, permanent prints from either positive or negative film. Prints you can write on with just about any writing instrument.

They feature Minolta's exclusive fully automatic exposure control for quality prints the first time. Saving time and reducing paper costs. And they accept virtually every microformat made. With carriers that permit even untrained operators to switch from roll film to fiche in seconds.

See them at any authorized Minolta dealer in our nationwide network. Check the Yellow Pages for the one nearest you. Or call toll free 800-221-3333. In N.Y., (212) 775-1395.

Minolta reader-printers. Because libraries are where classics belong.

IF YOU DON'T INSIST ON A MINOLTA THIS TIME, YOU WILL NEXT TIME.

Act of 1964 and had to make certain changes to conform with the new legislation; and 2) through the collective bargaining process with the newly established labor organizations, most of our personnel procedures were subject to negotiation and were changed through that process.

Yes, I agree with Holley's observation that LC is somewhat atypical as an employer of librarians. Holley's own figures (five to ten percent of all academic librarians do not hold the ALA-accredited MLS degree) demonstrate that *many other libraries* are also atypical when it comes to hiring staff who do not have the ALA-accredited MLS degree requirement. The court record, through stipulations agreed to by both the plaintiff and the defendant, shows that the Mississippi State University library has hired staff who do not have the MLS degree.

GLEN A. ZIMMERMAN, ALA member and associate librarian for management, The Library of Congress

Will ALA defend its MLS?

DEAN EDWARD G. HOLLEY'S article (May, p. 327–30) is a quintessentially important one. It is so because it clearly presents a critical question, the answer to which has far-reaching consequences for all of us. That question is: Does the ALA *really* stand behind the requirement of an ALA-accredited MLS for most professional positions in most libraries? It was quite unwilling to do so in the Merwine Case because the case was held to be a "tangled" one in which the facts were "in dispute." (*AL*, Dec. 1983, p. 744). As Holley and the trial make clear, the basic facts are not at all in dispute. What was in dispute is whether the ALA-accredited MLS is a valid requirement for a professional position, and whether the librarian of Mississippi State University was justified in requiring possession of the degree of a prospective employee, and whether Glenda Merwine, an applicant, did or did not possess it. (The trial brought out, unmistakably, that she did not.)

ALA's unwillingness to enter the case —and some earlier ones—is, as Holley notes, in startling and contradictory contrast to its vigorous fight before U.S. Office of Personal Management in defense of the criterion of the MLS.

If we really believe this defense and other MLS-supportive statements by ALA, we shall have to be prepared to back it up in the courts and in legislatures. If we do not do so, repeated and undefended challenges will eventually lead to the erosion of the status and effect of the degree.

Holley tells us (p. 330) that the judge in the Merwine Case overturned the pre-plaintiff jury verdict, and ruled against her; that she has appealed his decision to the Fifth Circuit Court of Appeals; and that this appeal "would give ALA an excellent opportunity to enter the case as a friend of the court." Indeed it would. I join Holley in urging other ALA members to make their views on this very important question known.

After all, *we* are the ALA, and what our officials and representatives do affects us all. If they act contrary to our beliefs, we are ultimately responsible.

J. PERIAM DANTON, ALA member, University of California/Berkeley library school

For ALA action on the Merwine issue at Annual Conference, see page 490 and following—Ed.

We weed with care

I SAY "WHOOP HALLOO" TO J. Wesley Miller's article (June, p. 384–85) on irresponsible weeding. What he describes is of course deplorable, and it should go without saying (but needed to be said) that "those who deaccession without knowing what they are doing do not deserve to be called professionals."

I want Miller to know, however, that not all of us librarians are uneducated in the literature and bibliographic history of our nation and go about throwing away classics helter-skelter. I consider weeding as serious a part of my professional responsibility as collecting, and I approach them both in the same way: When making either type of decision, I consult a bibliography or another person I consider expert if the work in question is outside my subject area. I am, I feel confident, only one of many who do not skip lightly through the stacks weeding.

I am glad for Miller's concern. Many more "book people" outside the profession should be concerned about the libraries that serve them. As we librarians race to launch ourselves and our institutions into the computer age, as we necessarily must, there is the danger that in the midst of our new-found fascination with machinery we will forget that our original business was books, including the preservation thereof. We started out to be archival institutions for the printed word; we still are, and we will continue to be if the printed word continues.

NANCY M. SMITH, ALA member, Lonoke (Ark.) County Library

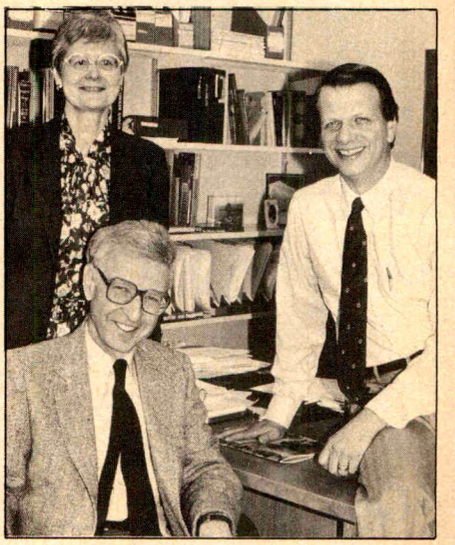
A luxury to retain seldom-used books

CONTRARY TO WHAT J. WESLEY Miller contends (June, p. 384–85), a book's intrinsic worth should not always be the primary factor in deciding whether or not to retain it. What's valuable to one library may well be superfluous to another.

Most libraries have only limited space. As librarians, it's our job to use this space effectively. Every book on our shelves has a storage cost; and unless our budget is unlimited or we are striving to maintain a definitive collection, we must make sure that the cost of retaining an item does not exceed its usefulness.

Of course, this in no way justifies weeding out of ignorance. But few librarians can afford the luxury of indefinitely retaining seldom or never-used books, regardless of how intrinsically important they may appear to be.

RONALD DALE KARR, ALA member, Transportation Library, Northwestern University, Evanston, Ill.



ALA Publishing's top-level team

A PHOTO WAS INADVERTENTLY reversed in last month's issue (p. 393). Corrected here, the photo shows ALA Publishing Services Director Gary Facente at right; Herbert Bloom, senior editor, seated; and Helen Cline, managing editor, standing behind Bloom.

Real reference problem is leadership

IT'S NOT SURPRISING THAT WILliam Miller is confused and depressed with reference service today. I certainly was after reading his article (May, p. 303+). However, I think the confusion is more in Miller's mind than in the field.

For example, Miller states at the start that "we have encouraged our bright and energetic people to jump on their horses and ride off in all directions," concluding that such unbridled enthusiasm only leads to others being overworked, the enthusiasts burning themselves out, and basic reference service being neglected. By the end of the article, he wants more planning and user surveys. So, which is it? Do we chain ourselves to the desk, or do we take time out to plan?

There is more of this: unread and unused reference sources, professionals doing clerical work, technology taking over our departments to no good end. Especially specious is the claim that library spending on staff

increases is the reason for higher taxes and tuition in colleges.

The real problem Miller has encountered is one of leadership. If books aren't being used, if people spend too much time in meetings, if staff are nipping bourbon on breaks, it is up to the department administrator, or that person's superior, to effect some changes and to keep matters from getting out of hand. What Miller describes is what happens when managers abdicate their responsibility to look after their department and its resources. Anyone who tolerates the chaos described shouldn't be a manager.

Libraries that promise more than they can deliver will soon lose that initial rush of business. Reference departments that don't keep up with the times will also find a decline in the number of people who rely on them. There is no crisis in reference. It is only the perpetual crisis of every organization that fails to provide responsible leadership, or neglects to amend its error when incompetence becomes manifest.

W. KEITH MCCOY, ALA member, Plainfield Public Library, N.J.

Relief that "I am not alone"

WILLIAM MILLER'S ARTICLE (MAY, p. 303+) expressed with candor many of the greatest current concerns of reference librarians. Yes, we do try to stretch ourselves too thin to provide database searching and new approaches to bibliographic instruction, and then worry about the depth of public reference service at the desk. If we guiltily curtail our attendance at conferences and workshops to mind the desk, we then have difficulty in keeping up with new theories and methods of doing the prolific aspects of our job; a situation which could be noticed by colleagues and astute patrons.

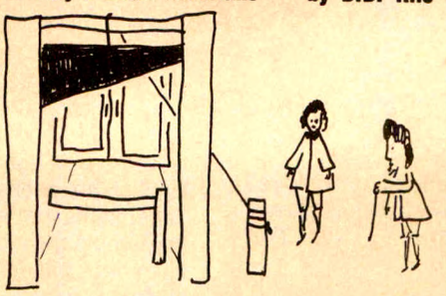
Miller's article on this dilemma is extremely well-thought and well-written, even suggesting the solution of altering staffing patterns. I put it down with a sigh of relief that the increased pressure for reference service in all its aspects is not a figment of my imagination — and that I am not alone.

ANNE MAIO, University of Hartford Library, West Hartford, Conn.

Don't sweep problem staff our way

I WORK IN A TECHNICAL SERVICES capacity, not a reference one. That is why I must take exception to one of Miller's suggestions (May, p. 303+) of what to do with people who cannot or will not change with the world around them. He writes: "Instead of renewing these people's perspectives and skills, however, or transferring them to non-public duties, administrators have found it easier (in the short run) to pass them by at raise time, giving them clerical chores or an increasing share of reference desk time. . . ." I can assure you, those of us

If they'd been librarians **by B.B. Rile**



M. Guillotine fails to develop a library security system.

performing non-public duties do not want them either. Our worlds change just as fast, and we suffer from work overload, too.

This leaves Miller's suggestion that these people's perspectives and skills should somehow be renewed. This is a difficult path to take, as changing people is a slow, painstaking task if it can be accomplished at all. From an administrator's point of view, it may well be more investment than it is worth, but it is possibly the only way available to us at this time. Whatever we do, let us not try to sweep these people into a non-public area so that we can act as if the problem does not exist. They can do as much damage in a non-public area as a public one.

ALINE SOULES, ALA member, Leddy Library, University of Windsor, Ontario

Response to subject access responses

PAULINE A. COCHRANE STATES that "the computer allows access in ways never dreamed of in a card catalog or printed index" (April, p.250), but the responsive comments published in April and May provide very little insight or realistic possibilities for large libraries involved with or contemplating automation.

Wellisch suggests that because brains and money are in short supply, an improved subject access system has not materialized (p.254). I believe that our profession does not lack brains, but most librarians faced with advanced technology understandably do lack imagination, a basic ingredient for creative activity. As suggested by someone, we do *not* need to wait until fifth-generation computers can provide better techniques.

With present capabilities, we should be aware of possibilities for developing data input, storage, and access methods that make the fullest use of the multi-dimensional power of the computer. No new approaches were offered for library databases with multi-million recorded items beyond full-text searching on titles or in combination with an augmented, more specific, modernized controlled vocabulary; display of alphabetically proximate terms; and natural-language access by terms in abstracts, tables of contents, and indexes. Realistically, the application of a new subject access system will necessarily retrieve only currently processed titles. Such an approach will obviously be untenable for scholarly research.

Wiberley, however, wisely points out that systems that provide increased access must take into account the potential for information overload and that they should be designed to help searchers reduce search results easily (p.255). It must be emphasized that systems should be developed to help searchers rather than to require them to apply complicated search techniques such as the use of Boolean operators. Any good systems analyst knows that Boolean operation is more confusing than helpful for the general user. Truncation techniques, too, unless well thought out, can cause strange results.

Additional subject terms per record recommended by subject specialists would be desirable, but much can be done with data already in records. Using such data as the edition information, publisher and/or publication dates, classification numbers, and various fixed field data delineated by MARC formats, a system can help limit a search by combining these data as commanded by searchers who can be guided by system prompts. Users should not be required to know the exact forms of access terms with complicated subdivisions or structure.

The LIAS system at Penn State University permits keyword access of matching terms from any access terms in a record plus those terms in proximity and provides a browsing capability from the selected term. From a selected record, one can also request a shelflist arrangement from the call number, and thus, the user can browse a classified order of titles or select a related secondary subject heading observed in the process and shift into a browse of all titles under the latter heading. The user can also limit a search by type of item (e.g., serial, microform) or library location or collection as coded in the record. Eventually, the system will provide a gateway to commercial online indexing and abstracting services to expand subject access capabilities, which would be economically unfeasible to develop in-house.

Some restructuring of both LCSH and the MARC formats would, of course, be desirable; but first, one must carefully consider some fundamental principles. Toni Petersen made a very significant point by stating that indexing terms and their authority apparatus should be clearly separated from indexing applications, and that one should identify wanted terminology and work it into an indexing system rather than treat subject terms and accompanying subdivisions as one unit on an authority record (April, p.255). Basically, systems development at Penn State has taken this approach: i.e., its Universal Entry Control allows a highly flexible bibliographic record access system.

KIMI HISATSUNE, ALA member and former Research and Standards Dept. chief, Pennsylvania State University □

action exchange

Checking out toys, drying out books, and keeping students quiet

Q. How do libraries catalog and check out toys? *Cindy Genovese, Director, Turtle Walk Toy Lending Library, Broward County Library System, 100 S. Andrews Ave., Fort Lauderdale, FL 33301* (*AL*, May, p. 288).

A. The Bethlehem Public Library takes a picture of every toy and keeps it in a notebook with an accession number and the number of toy pieces. Children and parents look through the clear plastic-covered pages of the notebook for a suitable toy, then ask for it by number. The toys are shelved in the Children's Department office.

Each toy is kept in a cloth bag with a drawstring. A plastic tag with the accession number and number of pieces in the bag is attached to the drawstring. When the toy leaves the library, a circulation slip with the due date is also attached to the tag.

The circulation department records the transaction. A piece of colored tape is placed on the picture in the notebook to show patrons the toy is circulating.

When the toy is returned, the children's room staff inspects it for missing pieces or damage before clearing the circulation record. If pieces are missing the patron is charged overdues until all pieces are returned or paid for. *Olga Conneen, Children's Librarian, Bethlehem Public Library, 11 W. Church St., Bethlehem, PA 18018-5888.*

A. Our toy collection has the following components: A statement of purpose; a shelflist card with a number, name, value, pieces, date of purchase, supplier, and suitable age; a borrower's slip with toy name and number, value, and number of pieces; sturdy drawstring bags with numbers; and a looseleaf notebook with a picture, number of pieces, and age level.

After each toy is numbered, its shelflist card is filed in a box in numerical order. The borrower's slip, signed by the patron, is clipped to the shelflist card when the toy is checked out and both are filed in another box behind the due date. Our loan period is three weeks and we charge 50 cents for missing pieces. *Alice E. Forsstrom, Children's Librarian, Warwick Public Library, 600 Sandy Lane, Warwick, RI 02886.*

A. After the toys have been purchased and the staff has played with them, each toy should be marked with library identification and a code number in an inconspicuous place. A marking pen with nontoxic indelible ink, a wood-burning pencil, or an adhesive sticker can be used, but remember that toys will be washed regularly.

One system for assigning numbers to a toy uses the first two digits for the recommended age span, the second two digits for a number assigned to the manufacturer, the third two digits to the manufacturer's list order, and the number following a decimal point to the number of moveable pieces. *Molly K. Governs, 21 Grand Blvd., Battle Creek, MI 49015.*

Q. How can school libraries dry out the soaking wet books students frequently return to us? *Norma J. Erickson, Librarian, Springfield Public Schools, 21 Roseland Ter., Longmeadow, MA 01106* (*AL*, May, p. 288).

A. The fountain in the middle of the Keene Memorial Library in Fremont, Nebr., attracted children and, too often, books. We dried the books out as best we could with towels and immediately put them in the self-defrosting freezer compartment of the staff-room refrigerator. In a few weeks, or two months at the longest, the books were dried out. We even saved a few glossy paper items that way, and the bindings were not as warped as they would have been if we'd tried to interleave the pages with absorbent paper. The freezing also prevented the growth of mildew.

When you remove the books from the freezer, they should be fanned open for one day to take care of the dew. For very thick books, you may have to turn pages while the book is in the freezer to expose all the wet areas to the moving air: the frozen books dry out by sublimation rather than evaporation. Altogether, it's a cheap approximation of the process and results of quick freezing and vacuum drying used when libraries get flooded. *Stan Schulz, Director, York Public Library, 306 E. 7th St., York, NE 68467.*

A. Seek detailed information from individuals in the preservation field before trying to dry wet books. Many factors must be considered such as paper stock, original condition of the book and binding, severity of the water damage, and timing. Brief "how to" instructions may prove dangerous. *Sally Roggia, Librarian & Conservation Specialist, Morris Library, Southern Illinois University at Carbondale, Carbondale, IL 62901.*

Q. What academic libraries have tested students for library competency? What tests were used and what were students' reactions and suggestions to improve the tests? *Jo Ann Carr, Chair, Wisconsin Library Association Education and Library Use Committee, 225 N. Mills, Madison, WI 53706* (*AL*, Feb., p. 74).

A. For the past year, we have been using the Library Skills Test developed by the Illinois Association of College and Research Libraries and published by the Scholastic Testing Service, Inc., Bensenville, IL 60106.

We have found it to be a very good test to use with our introductory use-of-the-library course. The students like the test and we find it identifies those who know how to use the library and those who don't. *Faye Belcher, Associate Director of Libraries and Associate Professor of Curriculum and Instruction, Camden-Carroll Library, Morehead State University, Morehead, KY 40351.*

A. We have designed a freshman skills test based on several standard tests and have revised it for clarity based on an analysis of results rather than student reaction. Our purpose is threefold: to alert students that library skills are important to them and the college, to assist faculty in recommending an English composition course, and to reinforce with the administration the role the library must play in students' lives.

We also designed subject tests in several disciplines under an NEH/CLR College Library Program grant. After examining test results and interviewing students who took our test in the first course for education majors, we revised it considerably. *Joann H. Lee, Head, Reader Services, Lake Forest College, Sheridan and College Rds., Lake Forest, IL 60045.*

A. The Association of College and Research Libraries publication *Evaluating Bibliographic Instruction: A Handbook* lists five published tests of library competency. *Sandy Whiteley, Program Officer, ACRL, ALA.*

WHO'S WHO IN TECHNOLOGY TODAY

Who's Who in Technology Today — now in its fourth edition — tells you *who* is doing *what* in over 1,400 specific areas of science and technology.

This hardbound five-volume set is designed for *easy access to the listed data*. Each of the four biographical volumes is divided into aligned disciplines and each has a name index. The fifth volume is a keyword index allowing multiple cross-referencing, so you can *find the expertise or technical information you need quickly.*

Who's Who in Technology Today provides detailed biographical information on over 35,000 men and women in North America responsible for much of the rapid advancement in electrical, mechanical, and chemical technologies, as well as earth sciences, physics, optics, biosciences, and energy. It is the perfect directory when you need specific information, specialized research, or the aid of a qualified consultant in a particular field.

Who's Who in Technology Today is a publication of Research Publications, Inc., which is not affiliated with Marquis Who's Who Incorporated.

Order **Who's Who in Technology Today** (fourth edition) from Research Publications for only $425. Price applies to U.S. and Canada only.

rp research publications

A. Laboratory work in and testing of library competency belongs in precollege schools and in teacher-training institutions. . . . Library resources should be an integral part of . . . teacher-training programs. *Ruth A. Bristol, Broadmead J-1, 13801 York Rd., Cockeysville, MD 21030.*

Q. Where can we get portable ultrafiche readers to go with our Library of American Civilization and Library of English Literature ultrafiche collections? *Douglas G. Campbell, Acting Ass't. Director for Technical Services, Libraries and Learning Resources, University of Wisconsin/ Oshkosh, Oshkosh, WI 54901* (AL, May, p. 288).

A. We use the Microbook 710 Portareader with the two collections. The reader, manufactured by Library Resources, Inc., has a three-prong plug, so we supply an adapter. *Francine K. Middleton, Microforms Librarian, Ellender Memorial Library, Nicholls State University, Thibodaux, LA 70310.*

A. Our library has been purchasing the "Commuter" portable microfiche readers with 48x lens, which work fine for the circulation of our American civ collection. *J. Carlyle Parker, Acting Library Director, California State College, Stanislaus, 801 W. Monte Vista Ave., Turlock, CA 95380.*

Q. What methods do undergraduate libraries use to maintain a quiet atmosphere conducive to study? *Plummer Alston Jones, Jr., Head Librarian, Elon College Library, POB 187, Elon College, NC 27244* (AL, May, p. 288).

A. A Procedure for Implementation of the Policy on Libraries Disruption documenting our authority to maintain an appropriate atmosphere for research and instructional support is posted in our undergraduate library. We also hired two retired university employees as library monitors for the five peak daytime hours Monday through Friday during the academic year. They stand at the entrance during class breaks to remind students to lower their voices as they enter. At other times, the monitors walk around the upper floors. Their presence has lowered the noise level significantly and is also credited with reducing thefts and keeping food and drinks outside the building. *Randall Hensley, User Education Librarian, Odegaard Undergraduate Library, DF-10, University of Washington Libraries, Seattle, WA 98195.*

A. Once in a while we have to become enforcers and ask noisy students to be quiet and stop disturbing others trying to study. If the students are working on a group project or need to discuss a problem, we offer them a conference room. If we are forced to warn them a second time, we ask them to split up or leave the library.

You may want to consider rearranging the furniture to promote quiet. We found it helpful to put our group study tables near the Circulation Desk so that a staff member can monitor. We also make random walking tours of the library to keep noise down and help students.

Paul D. Lubyen and others published "Reducing Noise in a College Library" in the September 1981 issue of *College & Research Libraries*, and Aaron and Elaine Cohen's *Designing and Space Planning for Libraries: A Behavioral Guide* also includes some useful information. *Mary Reimer, Head of Public Services, Greenville Technical College Library, POB 5616, Sta. B, Greenville, SC 29606-5616.*

The odds are stacked in your favor that we have the back issues you need.

We maintain a comprehensive inventory in our warehouse that spans many years of back issues as well as up-to-date issues.

Our customer service staff is anxious to answer your telephone or written requests. And now you can even access us through the FAXON-LINX network under "Jaeger." For a copy of our current catalog and brochure please call, write or fill-out and mail the coupon.

ALA Dallas:

First runs, reruns, and a fun run

News gathered at the 103rd ALA Annual Conference

SOME 11,084 CONFERENCE-GOers broke a sweat along the "Paths to Power" laid down by President Brooke Sheldon as the theme of ALA's Annual Conference in Dallas, June 23–27. If perspiration was universal in the 100-degree heat, inspiration was less so; but it was there, especially in the stimulating programs instigated by Sheldon and in lively Council/Membership debate.

Among Sheldon's "first runs" were a Membership free-for-all on professionalism, the presentation of a major new report on libraries and educational reform, and a three-hour fundraising workshop premiering ALA resources for nabbing private funds.

Incoming President E. J. Josey also introduced some firsts, including a Commission on Pay Equity and a Committee on Library Services to Minorities, the latter to ride herd on recent national task force recommendations.

The ALA Executive Board set precedent by requiring an ALA-accredited MLS degree for the Association's new executive director.

Chief among the reruns was broad discussion of the MLS as a requirement for professional library employment in general, but this time with an intensity inspired by current events: the pending appeal of the Merwine Case, and the precarious state of many of the nation's finest graduate library programs.

Knowing you can run but can't hide from serious library issues, some 125 joggers and walkers sweated out the first of what will probably become an annual ALA Fun Run, this one an early-morning three-miler.

In the corridors of the Convention Center, thousands schlepped past more than 700 booths and 80 tables of exhibits, including the first-ever ALA Store and its stock of symbol-wearing Snoopies. (Highlights of new products and services will appear in the October *AL.*)

At the ALA Placement Center, once considered a no-fun run for scarce jobs, vacant positions outnumbered applicants by an impressive 857 to 699.

Racing through a conference site about the size of Rhode Island were the indispensable courtesy buses from Gale Publishing; Joan Goodsell, ace editor, and staff of the daily conference newsletter produced by the Junior Members Round Table; and four *AL* staffers, who offer the following selected news reports.*

First guest speaker Frances Fitzgerald, *rt., chats with ALA Councilor Martha Gould of Nevada after the opening President's Program on* Risk *and* Realities.

Sheldon and Shubert counter *Nation at Risk* with *Realities*

ALA President's Program I.

When President Brooke Sheldon appointed a Task Force on Excellence in Education last fall, she charged it to examine *A Nation at Risk*—which had overlooked libraries—and to develop creative strategies to involve libraries in improving education.

At Dallas, the task force came back with a published, 16-page pamphlet called *Realities: Educational Reform in a Learning Society,* and Sheldon presented a two-hour program to unveil the report to ALA members and notable "outside" commentators.

Designed for the public at large, *Realities* is a forthright, readable document that bangs away at four basic points: learning begins before schooling; good schools require good school libraries; people in a learning society need libraries throughout their lives; and public support of libraries is an investment in people and communities.

Building on the premises of *A Nation at Risk,* the report shows how the aims of a learning society cannot be met without first-rate library services at all levels. The full range of library activities are enumerated, as are the public actions necessary to achieve a top-level system with equal access for all.

The report is unabashedly a librarians' view of the library's educational role, prepared by a group of library leaders who know from experience how great that role can be: Joseph Shubert (task force chair), Rebecca Bingham, Elizabeth Day, William DeJohn, Richard Dougherty, Virginia Mathews, Donald Sager, Peggy Sullivan, and Eileen Cooke.

As a concise case for the library role in educational reform, the report will be useful to advocates of all types of libraries in seeking favorable legislation. Some 15,000 copies were distributed at Annual Conference; more will be made available soon and announced in *AL.*

Giant-screen response

Among those asked to comment on the *Realities* issues was long-time friend of libraries Congressman William Ford (D-Mich.). A videotape of Ford in a phone conversation with Brooke Sheldon was projected on a giant screen, and Ford's blunt remarks delighted the audience. He said the biggest problem in educational reform is people who talk about the problem. "Citizens won't support good schools with money; they only know how to complain." Skeptical about studies and reports, he noted that "nothing in *Risk* was new to me." He advised short-range programs geared as much as possible to localities; "You can't treat it (education) as a system." He said he would try to come to ALA Midwinter so he could help "the *new* president write his library policy."

Author Frances Fitzgerald, of late a critic of textbooks, said the findings of *Risk* describe a cultural impoverishment in America. Textbooks, she noted, are censored by everyone rather than a central body, and as a result contain "pure white sound." She accused conservatives of "a higher illiteracy," and called on librarians to "let go your habits of defensiveness and take the offensive."

Communications law attorney Ann Branscomb saw the future library challenge as one of bringing coherence and cultural relevance to the growing diffusion of data. Moderator

*Lois Pearson, Susan Brandehoff, Gordon Flagg, and Art Plotnik. For further information on conference activity, see ALA unit publications, reports in the *Library of Congress Information Bulletin,* minutes of the ALA Council and Executive Board (available after October from Miriam Hornback at ALA Hq.), and a list of sessions on audio cassette from Eastern Audio Assoc., 8980-B Route 108, Columbia, MD 21045 (Tel: 301-596-3900).

First ALA Fun Run & Walk

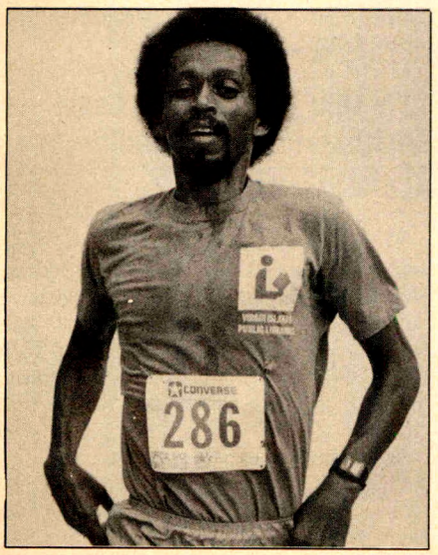
Librarian Wallace Williams, who runs for a Virgin Islands national team, breezed in ahead of some 125 huffing colleagues taking part in the first ALA Fun Run and Walk early on a hot Sunday morning in Dallas. Williams completed the three-mile runners' course in approximately 16:35.

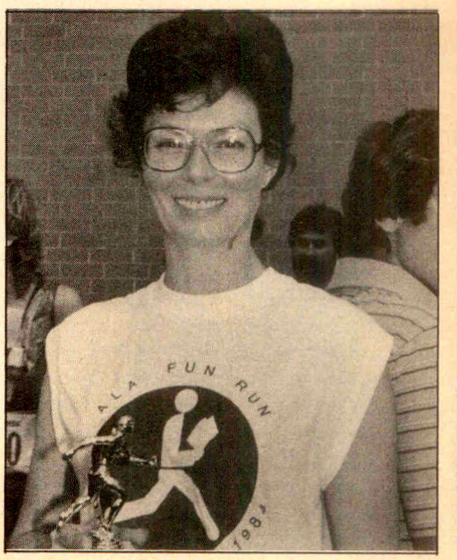
Tops in the women's category was Maxine Leeds Snow, a reference librarian at Loyola University in New Orleans. Her time, 21:16. Sylvia Ruth Blair, a youth librarian in the Dallas Public Library system, outpaced all men and women in the two-mile walkers' course, finishing at 25:54.

The event, which rewarded all participants with a running-librarian-logo T-shirt, was organized by Sherilyn Bird and Sharon Criswell of Southern Methodist University Libraries and Emily Matteucci of Dallas Public Library. Nine sponsors funded the run, which may become an annual activity.

Warm-up. A team from the University of Arizona sprints for the camera.

And they're off. A Texas pigeon, left, gets a bird's-eye-view of the runners' group, beginning its three-mile course near the Hyatt.





Winners. (From l.) Wallace Williams, Virgin Islands public library administrator; Maxine Leeds Snow of Loyola; Sylvia Ruth Blair, Dallas PL.

Maurice Mitchell, Annenberg Schools of Communication, concluded the panel segment with a view more optimistic than that of Rep. Ford: "If you show what's possible with sacrifice, people will make the sacrifice."

Workshop rallies librarians for assault on private funds

ALA President's Program II.

In a lively, mixed-media workshop played to a full ballroom, librarians got a three-hour lesson in how *not* to do it, how to do it *right*, and what to do it *with* when seeking private funds to bolster libraries.

"Raising Funds for Libraries: Paths to the Private Sector" fulfilled one of President Sheldon's 1983 promises, to train trainers and provide training packages at the 1984 Annual Conference. Participants not only heard from fundraising pros and workshop leaders, but viewed a new, 10-minute slide-tape program available for local library campaigns and received a five-piece publication kit filled with ideas and resources.

The kit, a training manual, and a 90-minute videotape of the Dallas workshop are being made available at $200 to all program planners through the ALA Public Information Office, 50 E. Huron St., Chicago, IL 60611.

Lillian's list

Lillian Bradshaw, newly retired director of the Dallas Public Library and a Dallas civic leader, launched the workshop with a formidable list of challenges facing library managers today—challenges to which one answer is private funds. Among her items: The public wants new services but opposes tax increases; the governing body calls for cuts; the pressure is on to charge fees, freeze hiring, use volunteers, or prepare a "hit list" of low-priority programs.

First principles of fundraising, said Bradshaw, are that it needn't endanger tax support, and that its benefits go beyond money received to include alliances with other community groups, political exposure, and new respect gained from a successful program. Bradshaw prefers to call fundraising "public-private partnerships."

Three situational-comedy skits starring familiar ALA faces demonstrated some of the pitfalls in fundraising—the worst of which seemed to be uncertainty over the library's programmatic goals.

Consultant Florence Green, a dynamic performer, reviewed the skits and offered humorous but pointed tips for success: e.g., "Practice saying big numbers in front of a mirror; then, before the prospective donor, say them, and shut your mouth! Don't talk the gift away."

Green took a shot at the report of ALA's Task Force on Excellence in Education (see preceding story), calling it reactive, not proactive. "Talk about what you can do, not what you need," she advised.

The premiere of *Always in Season* showcased a 140-image slide/sound production presenting the library in a favorable (and accurate) light. Priced at $150, it is available in formats that can accommodate local insertions. Write the ALA Public Information Office for details.

M'Bow denies UNESCO threatens press freedom

President's Program III, with the International Relations Committee.

Questions about the United States intention to withdraw from the United Nations Educational, Scientific, and Cultural Organization attracted scores of listeners to the program "Access: The International Dimension" June 22.

UNESCO Director-General Amadou-Mahtar M'Bow said UNESCO's efforts in the communications sphere aimed at "the affirmation of pluralism on a planetary scale just as much as on the level of each human community."

Attempts to achieve a freer international flow of information and eliminate imbalances between the member states led to discussions of a so-called new world information communication order, the director general said. M'Bow went on to discuss UNESCO's library activities.

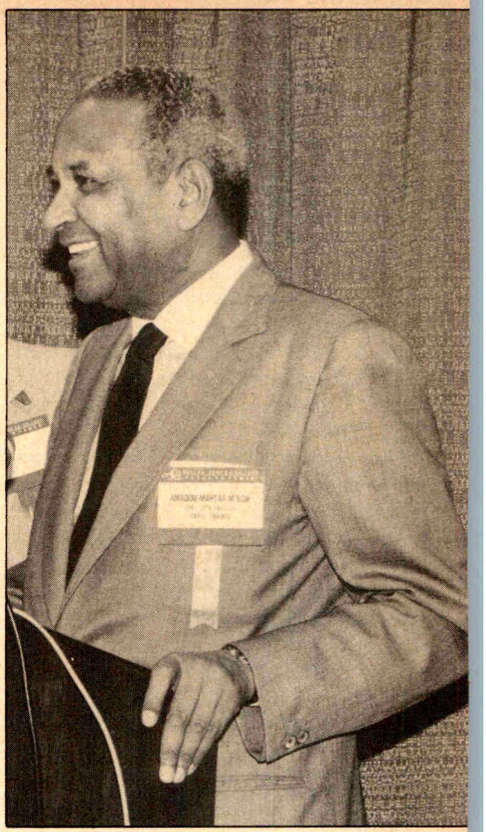
In presenting an American view, speaker Leonard R. Sussman of Freedom House in New York City declared he believed the free flow of information issue was the most important single factor in preparing for U.S. withdrawal.

Sussman said Western reporters viewed the undefined new world order as a plan to control the press, although no such objective was ever approved. He added, "valid criticisms of Western journalism and the Third World's natural yearning for better coverage and infrastructure were lost in eight years of Western reporting of these acrimonious debates."

The talk of licensing journalists, assigning them "responsibilities," and monitoring their output hurt UNESCO in the eyes of the influential liberal wing of the American press, Sussman stated. The defeat of the Third World proposals was forgotten as liberals joined conservatives in attacking UNESCO's excesses.

Sussman believes the decision to withdraw from the organization was taken by five or six individuals against the best advice of those Americans and their allies who know UNESCO best. Sussman called on librarians to "make the most of the next six months" and urge officials to reform UNESCO.

M'Bow had read his formal script in English with difficulty, but he replied to questions quickly and passionately in French, which was translated simultaneously. "In no UNESCO decision or program will you find any attempt to challenge the freedom of the press," he declared.



He pointed out that most news comes from five major agencies based in the industrialized nations, and the developing countries feel their image is distorted. "For true freedom to exist, the Third World must be able to present its own views," the director general said.

"Honest people now demand that what they are being told is truth," M'Bow concluded. "We need plurality."

In an earlier press conference, M'Bow told reporters he had come to the ALA conference because he was asked and because "UNESCO couldn't function without its member organizations. Plus I have learned much coming here . . . I have never ceased saying that information . . . is crucial to the development of nations, and indispensable to international cooperation."

ALA role in Merwine Case creates clashes at Dallas

ALA Membership and Council.

The Great Debate on the Merwine Case surfaced early in Dallas, fueled by Edward Holley's contention that ALA should have defended the MLS in the trial court (*AL*, May, p. 327–30). Council Document 10.1 (available from Miriam Hornback at Headquarters) provided background for the discussion.

The case of Glenda Merwine against Mississippi State University involved two ALA policies: the validity of the ALA-accredited MLS, and equal employment opportunities, Executive Director Robert Wedgeworth explained at the Council/Executive Board in-

***At a press conference** prior to his appearance as a speaker, UNESCO Director General Amadou-Mahtar M'Bow, left, enjoys a light moment with ALA Executive Director Robert Wedgeworth. But questions and responses concerned the serious matter of U.S. intent to withdraw its membership. M'Bow said UNESCO had already been studying its policies, but was now inspired "to go further with these studies."*

formation meeting June 23. The jury overlooked the MLS qualification and found sex discrimination. The magistrate overturned the jury verdict and rejected the argument questioning the validity of the ALA-accredited MLS. Wedgeworth said the validity of the degree is not likely to be decided in Merwine's appeal due to the magistrate's decision.

In an Open Discussion on Professionalism scheduled by President Brooke Sheldon at Membership Meeting I, members expressed varying opinions.

Martha Gould declared that if ALA were truly a professional organization, it would have defended the MLS in the Merwine Case.

Christie Vernon reported that the Merwine decision has already been used to preserve a Virginia law requiring the ALA-accredited degree in library certification. When a new bill threatened to abolish the requirement, Virginia Library Association members cited the Mississippi magistrate and legislators defeated the bill.

Mary K. Chelton demanded that Wedgeworth explain the legal strategy and philosophy behind ALA's position.

Both sides asked ALA to testify, Wedgeworth said. Lacking the resources to do independent discovery, he explained, the Association usually does not enter trial cases where facts are being established; it files as a friend of the court later. Since trial court proceedings have little precedential value, this strategy allows ALA to spend its legal dollars more effectively. ALA has requested a delay in the appeals court so that it can file a brief if the Executive Board so decides, Wedgeworth added.

Councilors fought over the issue in Council II June 26. Gilbert McNamee proposed, in Council Document 48, that ALA reaffirm its policy designating the MLS as "the appropriate terminal professional degree for academic librarians" and Councilors quickly approved.

But the second part of CD48 mandating that ALA enter the Merwine Case on behalf of Mississippi State University renewed the debate. Invited to address Council, Past-President Holley supported the mandate. Professional degrees in this country are under attack and we are going to have to make a stand to defend the standards ALA has worked so hard for, he said.

Wedgeworth responded: "We will have to make a stand at some time, but we don't feel this is the time."

Jim Ramer demurred: "We can't wait for the 'perfect' case. The symbolic gesture would be worth the money." (A deposition would cost between $1,000 and $4,000, it was reported.)

"This is a bad case," said Dorothy Broderick. Councilors argued over amendments to keep options open or refer the issue to the Executive Board.

Eric Moon proposed a straw vote, "to get through to the board without tying ourselves in knots." A majority voted against entering the Merwine Case, but the debate continued.

Alice Ihrig proposed referring the total debate transcript to the Executive Board. The board is able to move on advice of staff and legal counsel, she said, adding, "We're not prepared emotionally or factually."

Council agreed, and voted to refer.

At Membership Meeting II the next morning, John Berry of New York moved to set aside the Council action, aiming to put the Merwine Case back on the agenda of the ALA governing body.

George Bailey opposed the move, saying, "Although Council was confused, at the end it became clear . . . None of us is against giving total support to the MLS."

Gary Purcell argued that the straw vote on entering the case was "overwhelmingly NO."

OLPR Director Margaret Myers reported that the OLPR Advisory Committee is studying the policy and the case, giving everyone a chance to respond.

The Berry motion was defeated by more than three-fourths of the Membership.

Redefine shared enterprise, Wedgeworth tells ALA

ALA Membership Meeting I.

In his State of the Association report, Executive Director Robert Wedgeworth commented on his decision not to renew his contract next year. "The ALA Constitution specifies no tenure, so I selected an appropriate time for me—my birthday, July 31," he said.

On the eve of entering his 13th and final year at ALA Headquarters, Wedgeworth recalled his correspondence with the late Keyes Metcalf. In the early 20th century,

***Mover In repose.** The moving councilor (Gil McNamee, California LA), having moved a key motion in support of the MLS, now relaxes, Western style, between Council debates.*

Metcalf had written, ALA leaders discussed library issues, with no segregation by type of library or activity.

"The roots of ALA lie in shared enterprise," Wedgeworth said. "The most important task ahead is to redefine what I consider to be the shared enterprise of ALA. We must focus on two basic elements—maintaining and developing a strong central organization and providing support and flexibility to specialized units. Form must follow function."

Members must continue to recognize the success of the Association. If ALA were ineffective and lacked influence, people wouldn't bring exciting projects to meetings.

"We need to have confidence in our ability to influence the future," he said. "We took the lead in looking at what automated equipment could do for libraries —I'd like to see us look to that confidence more often than we have in the past."

Wedgeworth reported ALA membership at an all-time high last Aug. 31. The Association ended the fiscal year with a surplus and erased the deficit. Responding to membership requests, he added, Headquarters produced its first published annual report for the full membership. (*AL*, April, center spread).

Equality of Access Commission nears completion of report

Council.

It's a big mistake to think the electronic age will diminish the role of libraries, Dan Lacy of McGraw Hill told Council June 24. Instead, he said, the library burden will be heavier than ever, because much of the population will have no other resource for their crucial but infrequent use of databases.

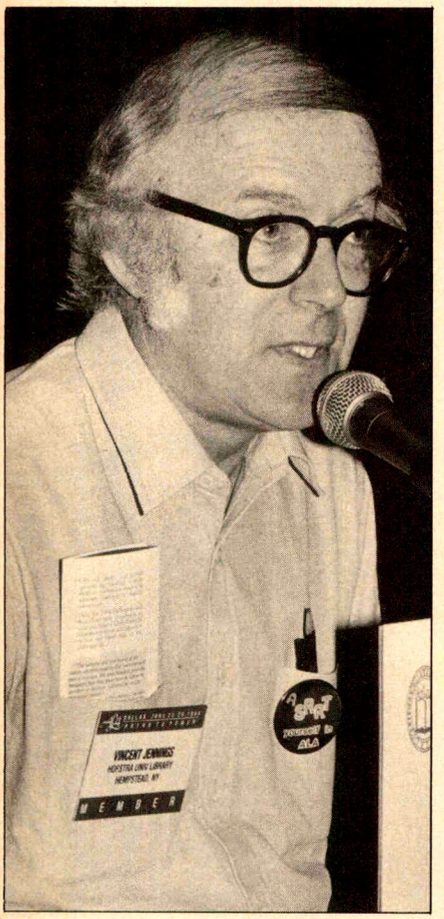
Lacy presented highlights of the forthcoming report of the ALA Commission on Freedom and Equality of Access to Information. The privately-funded commission was appointed in June 1983 by President Carol Nemeyer.

Freedom of equality to online databases was the most-discussed topic, Lacy said. The commission has not reached a clear consensus on the question of equal broadcasting time, but will take a position on time given to public issues. Lacy proposed that studying freedom of equality of access to information become a continuing ALA project because of flux in communications.

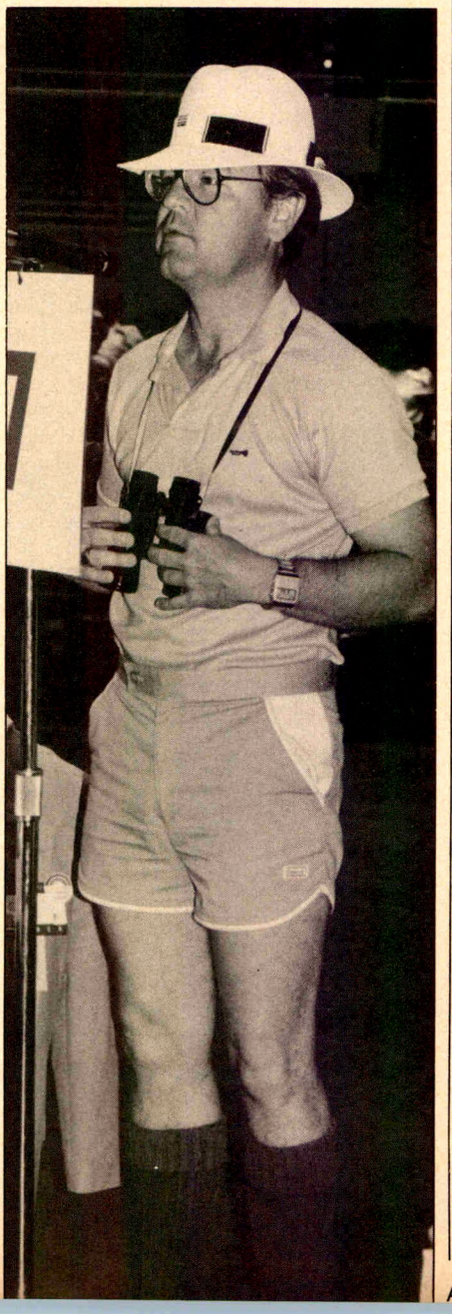
Several councilors expressed fears that ALA might be seen as taking a mixed stand on such issues as library-user fees. Lacy said it is a report *to*, not *of* the Association, and will express the views of the commission's 55 members. Later Lacy agreed that before publishing the report he will present it in written form to Council at its Information Meeting at Midwinter Meeting Jan. 7.

Intellectual freedom inroads

The annual report of the Freedom to Read Foundation, read to Council II by Ella Gaines Yates, celebrated intellectual freedom victories during the past year. The foundation was successful in the case of *Janklow* v. *Viking Press* in limiting the



Above: Members CAN influence ALA, *as Vincent Jennings of Hofstra University Library learned. His motion that ALA join the Citizens Against Nuclear War (CAN) passed Membership and Council.*



Right: Bird-watching *over the fate of the National Audubon Society Library is Councilor Duane F. Johnson of Kansas, who dressed up—or stripped down, actually—to move that ALA discourage the planned auctioning of this national resource.*

Membership actions

At its meetings June 25 and 27, ALA Membership adopted and referred to Council resolutions that:

1. The American Library Association urge the withdrawal of all American military personnel and the cessation of all military aid and covert intervention in Central America. (Rejected by Council).
2. The American Library Association join the Citizens against Nuclear War Coalition as a member organization. (Adopted by Council.)
3. Any personal member of the American Library Association may attend Membership and Council meetings, whenever and wherever held, by showing either a conference badge for the day of the meeting or a current membership badge. (Referred to COPES by Council.)

Members also paid standing tribute to the late William R. Hawken, Valmai Kirkham Fenster, Susan Collier, Edwin Castagna, and Keyes D. Metcalf. Membership also adopted resolutions commending attorney William D. North for his 15 years' service on the Freedom to Read Foundation Board of Trustees, and Philip J. McNiff, former Boston Public Library director and Association of College and Research Libraries president, for his 50 years of distinguished service in the library world.

effects of libel litigation on the distribution of materials, and in two Minnesota cases challenging the right of school districts to cancel invitations to speakers. A challenge to National Security Agency suppression of material in a private library has prompted declassification of most of the materials involved.

The foundation recently filed an *amicus curiae* brief supporting the American Booksellers Association's challenge of an Indianapolis antipornography ordinance to suppress graphic depictions of "the subordination of women."

Nearly $20,000 was appropriated by the foundation to support First Amendment issues, in addition to ongoing litigation.

The Intellectual Freedom Committee's report to Council described ALA's participation in a program with the American Bar Association and other groups to celebrate the bicentennial of the ratification of the U.S. Constitution.

ALA Exec Director hopefuls must hold ALA master's

ALA Executive Board.

Setting up a search process to find a new ALA executive director is "the most pressing issue before the Executive Board at this time," President Brooke Sheldon told the board* on the opening day of Annual Conference.

Responding to Robert Wedgeworth's announcement at the spring board meeting that he would terminate his tenure at ALA July 31, 1985, board members had prepared search process models, a position description, a timetable for action, and data on search firms.

The board's "moment of truth," as Past-President Carol Nemeyer described it, came three days later when the board considered whether it wanted a library professional or an administrative expert for the job.

Bill Summers moved "that the Executive Board adopt a personnel policy that the next Executive Director of ALA be a librarian of significant professional stature with an earned ALA-accredited MLS degree."

Margaret Chisholm proposed qualifying the ALA-MLS as "preferred," but President-elect E. J. Josey disagreed. "Membership feels ALA doesn't support the degree," he said. "This would give clear support."

Asked for a legal opinion, Mary Hutchings Reed counseled that to avoid lawsuits the policy should say "ALA-MLS or its equivalent" or "ALA-MLS is desirable." Personally, Reed said, she could understand the reasons for specifying the accredited degree, but suggested the board should articulate the reasons.

The board voted unanimously to adopt Summers' motion.

On June 28 the board authorized Josey to call a special meeting to consider the search process. The new president scheduled an all-day meeting at the O'Hare Hilton in Chicago July 16.

$9.5 million budget adopted

The Committee on Program Evaluation and Support reported that the projected ALA year-end operating balance is $108,924, compared to the previous estimate of $18,225. COPES urged continued careful control and budget restraint.

Pending final results Aug. 31, COPES recommended preliminary approval of the 1985–86 budget with a $9,548,581 general fund ceiling. The budget includes major equipment purchases of $247,380; $160,600 for additional positions; and $206,000 for staff salary and benefits increases, an average of 6 percent.

COPES also approved management's plan to complete the 1985–86 budget at Annual Conference next year so that the budget is in place at the beginning of the fiscal year Sept. 1.

The board approved the budget and the new budget cycle and asked that all units be notified immediately. The board asked COPES to develop an operating agreement with the round tables.

At the request of Judith Farley, chair of the board's Personnel Committee, the board also voted 6–4 with one abstention for a three-percent advance in the staff grade structure and implementation of the performance distribution target and percent of increase/decrease recommended by the committee.

The Exec Board also:

- elected Lillian Bradshaw as ALA Endowment Trustee for the 1984–87 term;
- recommended to the Public Printer the appointments of Diane H. Smith, Sandra McAnnich, Robert A. Walter, Philip Van de Voorde, and Frank Lee to the Depository Library Council;
- confirmed New Orleans as the site of the ALA Annual Conference July 9–14, 1988;
- approved an Association of College and Research Libraries request to hold its fourth national conference in April 1989 in Cincinnati;
- approved in principle a Young Adult Services Division intergenerational programming project;
- authorized Wedgeworth to negotiate a preliminary contract with consultant Glenn Tecker to develop an action plan for long-range planning (see story);
- Approved Josey's Committee on Library Services to Minorities (see story); and
- accepted the final report of the Federal Librarians Round Table Task Force on Fed-

* Present were President-elect E. J. Josey, Treasurer Herbert Biblo, Executive Director Robert Wedgeworth, Immediate Past President Carol Nemeyer, Margaret Chisholm, Jane Anne Hannigan, Judith Farley, Regina Minudri, David Snider, F. William Summers, Arthur Curley, and Beverly Lynch. Biblo and Nemeyer completed their terms June 26 and new Treasurer Patricia Schuman and member Elizabeth Futas joined the board June 28.

Former First Lady & Friends

Rosalynn Carter talks books and politics at the Friends of Libraries USA luncheon and accepts a Friendly T-shirt.

eral Library/Information Policy Issues and referred to the Council Committee on Organization the task force recommendations for an ALA role in responding to critical issues facing the federal-library community.

IFLA: Chicago expects 2,000

ALA Executive Board.

Plans for the Aug. 18–24, 1985 International Federation of Library Associations and Institutions General Conference in Chicago have shifted to the operational phase, reported International Relations Committee Chair Tom Galvin.

More than 2,000 people are expected to attend the conference at the Palmer House, IFLA '85 Coordinator Robert P. Doyle told the board. Librarians are enthusiastic about the plans, and the United Exposition Services Company has offered vendors free storage space between the ALA Annual Conference July 6–11 and IFLA '85 Aug. 18.

Shirley Echelman of the U.S. Organizing Committee was cited for her "splendid efforts" in fundraising, which has gone into its second phase. More than $100,000 has been raised in cash and services.

The preliminary program for IFLA '85 will be distributed at the Nairobi conference this month and is available from Robert Doyle at ALA Headquarters.

AASL survey: Split undesirable but may be most workable option

American Association of School Librarians.

The results of a survey of AASL members regarding the division's future with ALA were announced at AASL's membership meeting. The division is considering three options: 1) improving AASL's ability to work within the present ALA structure, 2) moving ALA toward a federated type of organization, or 3) separating from ALA and/or establishing a new, independent organization.

The survey of about 20 percent of AASL's members indicated:

- AASL's present structure as an ALA division is considered the most desirable option because of the strength in numbers of the entire ALA membership and the professional unity resulting from such affiliation; but this structure is also thought of as the least workable of the options. The separation of AASL from the Association is considered the least desirable option, but the one that would probably work best.
- The "constraints" of the present ALA/AASL structure outweigh the benefits, according to 64 percent of the respondents. Seventy percent say the requirement to join ALA in order to belong to AASL hampers the division's growth, and 71 percent feel membership in AASL will increase if the division secedes.
- Seventy-one percent believe the current allocation of dues between ALA and AASL is unfair and that the division should receive a greater share.
- If AASL raises its dues following the recent dues increase by ALA, 12 percent of the respondents say they will quit AASL, and 35 percent will quit both ALA and AASL. Younger and newer members have signifi-

Acts of Council June 24–27, 1984

At ALA Annual Conference in Dallas, Council passed the resolutions listed below by Council document number. To obtain any document, send your request with a self-addressed stamped envelope to Miriam Hornback, Council Secretariat, at ALA Headquarters.

The Council voted to:

CD39. Adopt the Guidelines for Practice and Principles in the Design, Operation, and Evaluation of Student Field Experience in Library and Information Science developed by the Information Organization Heads Task Force on Internships and Field Experiences and recommended by the Standing Committee on Library Education (SCOLE).

CD42. Incorporate in the ALA goals and priorities statement the "creation, maintenance, and enhancement of a learning society."

CD43 & 52.3. Authorize a Bylaws change permitting each division, round table, and committee to designate one representative to the Planning & Budget Assembly and providing a two-year staggered term to Councilors elected to the assembly.

CD44. Recognize and support an American Association of School Librarians action establishing April as School Library Media Month beginning in 1985.

CD45. Support the National Decade of Disabled Persons 1983–1992 and join in furthering long-term goals for all Americans with disabilities.

CD46. Encourage the National Audubon Society Board of Directors to reconsider its intention to auction its library collection.

CD48. Reaffirm its policy supporting the MLS as "the appropriate terminal professional degree for academic librarians" and refer to the Executive Board the question of entering a friend of the court action in the Merwine case if the ALA-MLS is determined to be a part of the case.

CD49. Reaffirm its endorsement of the comparable worth principle, urge state library associations to encourage the passage of comparable work laws, and request the ALA Office for Library Personnel Resources, COSWOL, and the Commission on Pay Equity to provide information on state actions to remedy inequities.

CD50. Call upon the Federal Communications Commission to equalize telecommunications costs for libraries in outlying areas.

CD52.1. Amend the Bylaws to eliminate the Reference and Subscription Books Review Committee.

CD53. Ask President Josey to appoint a task force to review all barriers to using bibliographic databases and report to Council at the 1985 Midwinter Meeting.

CD54. Approve an amended interpretation of the Library Bill of Rights on the Circulation of Motion Pictures and Video Productions advising librarians to apply the same circulation standards to all library materials.

CD55. Ask the Exec Board to plan a library and information science component at the Chicago World's Fair of 1992.

CD56. Reaffirm its policy on the Abridgement of the Rights of Freedom of Expression of Foreign Nationals.

CD58. Change the title of the Ralph R. Shaw Award for Library Literature to The Knowledge Industry Publications, Inc., Award for Library Literature, and approve the new Carroll Preston Baber Award to be offered initially at the 1986 ALA Annual Conference.

CD59. Express support for HR 5686 extending United States membership in UNESCO to Dec. 31, 1985, and requiring further consultation with Congress prior to any decision concerning termination.

CD59.2. Reaffirm support for legislative action to guarantee access to telecommunication services.

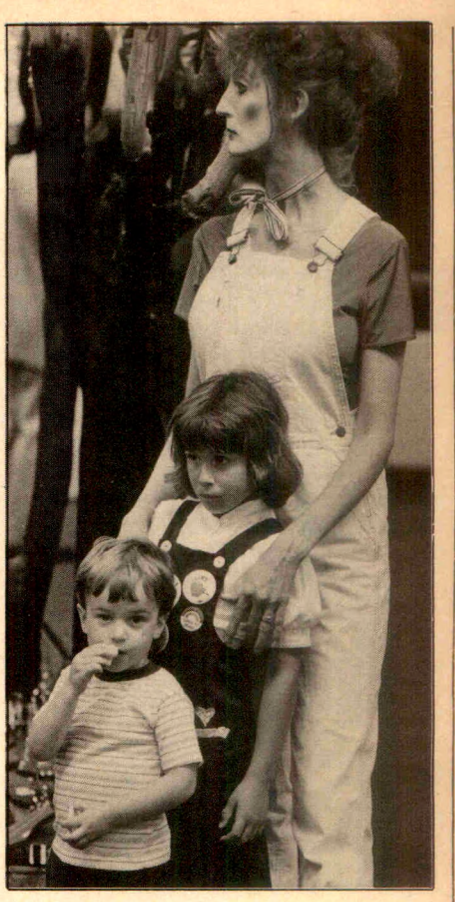
CD59.3. Commend Sen. Larry Pressler (R-S.D.) for his effort to protect libraries from telecommunications rate increases.

CD61. Adopt Membership resolution 2.

CD62. Refer Membership resolution 3 to COPES.

Council also:

- Elected Ann H. Eastman, Dianne McAfee Hopkins, Jeanne M. Isacco, and Stefan B. Moses to the Council Committee on Committees.
- Elected Pamela G. Bonnell, Daniel W. Casey, James R. Dwyer, Cynthia J. Johanson, Robert L. Wright, Margaret Crist, Susan Heath, Julie V. Hunter, Susan B. Madden, and Robert Raz to the Planning & Budget Assembly.
- Moved that in the future, Council election ballots and the ballot box be brought to Council II one-half hour before that session and remain until one-half hour after its adjournment to permit all Councilors to vote.



Dallas PL holds a party—and DPL director's kids hold still

Two guests laugh it up at the ALA Conference reception, while a mime inspires two children to act "their quietest ever," according to papa Patrick O'Brien, newly named director of the Dallas Public Library. DPL hosted the event, with support from Ingram Book Co. The couple above are Harry Robinson, a librarian who directs the Museum of African Art at Bishop College, and Gleniece Robinson of DPL.

cantly less dues tolerance than other segments of the survey.

- Nearly two-thirds (63 percent) of the respondents feel the type of organization that will best meet their needs is one made up of school library media specialists only, rather than one composed of all types of librarians.

Representatives of AASL and the ALA Executive Board will continue their dialogue on future options as AASL looks forward to its third national conference, Oct. 31 – Nov. 4 in Atlanta.

To defend or not to defend: some light on the MLS question

Office of Library Personnel Resources Advisory Committee.

"Clearing away some deadwood," is how Pauline Wilson put it. She and other speakers on "ALA, the MLS, and Professional Employment" sought order from the chaos of documents, assumptions, charges, and questions lately surrounding the MLS as the minimum requirement for entry into the profession.

Wilson, a faculty member at the University of Tennessee library school, first disposed of two "non-issues": whether librarianship is a profession and thus may defend its own educational standards (it is and it may); and whether ALA may fight to protect librarians' interests in the legal arena when advisable (it may, but it also may choose its fights).

Wilson added that ALA's goals statement is not the root of the problem, as some critics of ALA's decision not to enter the Merwine Case have charged. The statement appropriately reflects a professional association's concern with protecting its members' interests and agreeing to provide a quality service for society in return for autonomy, esteem, and financial rewards. Quality of service cannot be separated from promotion of members' interests.

ALA members who think the Association should have entered the Merwine Case and those who think it was right not to are "not on opposite sides of the fence," Wilson said. (For a review of ALA and the Merwine Case, see *AL*, Dec. 1983, p. 743; Feb., p.72; and May, p. 327+.)

Both groups are concerned with control of entry into the profession. But those who wanted ALA to enter the case have a long-term goal: to preserve control of educational standards for the profession through defense of the MLS as the minimum credential. The other group's focus is short-term: day-to-day practical guidance from ALA on minority hiring concerns. Both approaches are valid, Wilson said.

What remains is for membership to clarify issues and make decisions in three areas: short- and long-term goals of the Association and their priority vis-a-vis defense of the MLS; constituencies that may gain or lose from such actions; and the knowledge required to be a librarian. (Wilson's comments will appear in full in next month's *AL*.)

Two other speakers described hiring practices in their libraries. Both accept experience equivalent to the MLS degree as well as the MLS as sufficient for hiring. Discussion following the program showed interest in having contracts of people not holding the MLS state that retention or promotion is dependent upon acquisition of the MLS degree. A few libraries do so already, and such contract conditions are common practice on university faculties.

Tecker named to facilitate ALA long-range planning

Process Planning Group.

After division leaders urged the Executive Board to let them help develop a long-range plan for the Association last January, President Brooke Sheldon appointed the Process Planning Group (PPG), chaired by the board's Direction and Planning Review Committee (DPRC) chair and representing the divisions, round tables, COPES, the Planning Committee, and the Committee on Organization. At the Planning and Budget Assembly meeting June 22, PPG-DPRC Chair Carol Nemeyer challenged the assembly to help with the process.

The Exec Board, concerned that the PPG might displace the assembly, asked its DPRC to present a clear statement of PPG responsi-

bilities at the fall board meeting. New DPRC Chair Sheldon readily agreed: "I would not like to be taking over as chair of the Titanic Committee," she commented.

At the PPG meeting June 26, the group interviewed consultant Glenn Tecker on his project aiming to produce a long-range plan by 1986 as well as an annual budget and management review. The group recommended Tecker be employed to develop a preliminary action plan for presentation at Midwinter Meeting in January. The board authorized Executive Director Robert Wedgeworth to negotiate a $12,000 contract with Tecker. The funds will come from the operating reserve, Wedgeworth said.

Coretta Scott King hails 15th year of ALA/King award

Social Responsibilities Round Table, Coretta Scott King Award Task Force.

Appearing for the first time at ceremonies for an ALA award named in her honor, Coretta Scott King told a huge breakfast crowd that, like her late husband, she has shied from honors appearing to be self-memorials.

"But I can now understand," she said, "what it [the Coretta Scott King Book Award] means to black authors and illustrators . . . to get exposure and this kind of encouragement."

"I understand it's the only award of its kind," she said, and kidded: "If it's the only one, it must be the best."

King was one of many notables gathered on the dais to celebrate the 15th anniversary of the award for black children's-book authors and illustrators. Among others to speak was Pat Cummings, 1984 illustration winner (*My Mama Needs Me*, Lathrop, Lee & Shepard), who remarked, "It's because King marched that I have the opportunity to do what comes naturally to me."

ALA incoming President E. J. Josey presented a special citation to King, commenting that it is a "vitally important time to carry forth the work" of Martin Luther King, Jr.

Coretta King paid tribute to the award's founder, the late Glyndon Flynt Greer, whom she met at the New York Public Library 72nd St. branch at the beginning of a good friendship.

King said her husband's distaste for self-memorials caused him to resist saving his papers and other documents of the movement; but she encouraged him to do so, and today they may be studied at the Martin Luther King, Jr., Center for Nonviolent Social Change in Atlanta.

Concluding her remarks, King said, "As librarians you are part of the continuation of the Dream. Inspire young people to believe, to dream, but to work for the fulfillment of that dream by nonviolent means."

The program, chaired by Effie Lee Morris, closed with a rousing chorus of "We Shall Overcome."

New groups to address pay equity and service to minorities

In his Inaugural Address, President E. J. Josey announced the appointment of two complementary groups charged with recommending future ALA action in areas reflecting his special concerns.

"Most of you are aware," Josey said, "that all of my adult life I have been concerned about human rights and civil rights—the plight of women, minorities, and the poor. Continuing my concern for these areas, I have received the approval of the Executive Board to establish a Commission on Pay Equity to help us overcome the pay inequities suffered by women librarians.

"Moreover, I also have established a Presidential Committee to examine library services to minorities as well as to suggest ways in which the Association might implement recommendations made by the National Commission on Library and Information Science *Report on Library Services to Cultural Minorities.*"

The Commission on Pay Equity, co-chaired by library consultant Helen Josephine of Berkeley, Calif., and Cynthia Johanson of the Library of Congress, will give increased visibility to the comparable-worth issues within the library profession and elsewhere, access existing ALA activities and policies on pay equity, and consider related projects.

Other commission members are Keith Cottam, Susan Galloway, Joan Goddard, Mary Lou Goodyear, Norman Horrocks, Lora Landers, Michele Leber, Philip Leinbach, Deborah Miller, Kathleen Prendergast, Charles Robinson, Patricia Rom, and Karen Jackson Thorburn.

The Committee on Library Services to Minorities, also approved by the Executive Board, is co-chaired by Elizabeth Martinez-Smith, director of the Orange County (Calif.) Public Library, and Binnie Tate Wilkin, minority services coordinator of the Los Angeles County Library.

Other committee members are Henry Chang, Hardy Franklin, Louis Herrera, Albert Milo, Dennis Reed, Elena Tsherny, Mary Biblo, Brad Chambers, Wayne Crocker, Malikah Dada, Marva L. DeLoach, Adele Dendy, Bernard V. Finney, Barbara Williams Jenkins, Donnarae MacCann, and Lotsee Smith. Jeanne English, Cheryl Metoyer-Duran, and Tom Weissenger were appointed alternates.

Bearman defends NCLIS rebuff of 8 pleas in Minority Report

Office for Library Outreach Services; Ethnic Materials Information Exchange Round Table; REFORMA—National Association to Promote Library Services to the Spanish Speaking.

Toni C. Bearman, executive director of the National Commission on Libraries and Information Science, listened to two minority librarians reproach NCLIS for not endorsing eight of 42 recommendations in the 1983 report of the NCLIS Task Force on Library and Information Services to Cultural Minorities. Then, taking the podium, Bearman defended the action of the commissioners mainly as technical disagreements with Task Force phrasing—phrasing the commissioners felt they ought not rework.

Bearman expressed her own commitment to the task force and its goals. She said that NCLIS has clearly opposed racism, stereotyping, censorship, and—in principle—library fees. These were some of the issues in the eight unendorsed resolutions.

Panelists Albert Milo and Binnie Tate Wilkin pointed to recommendation 37 in particular: "Tax supported libraries should avoid charging fees that might create barriers to minorities and minority communities." Wilkin felt such fees would be a regression to minority-hostile libraries, which "minority taxpayers have supported all this time." She said that NCLIS performed a disservice by not coming back to the task force to work out language changes, political considerations notwithstanding.

Lotsee Smith, who served on the task force, took the podium to review the history of the recommendations and call for continuing dedication to their implementation.

Bearman also urged wide support for the 34 recommendations, expressing disappointment that only six people had responded in writing to calls for comment since the report was issued.

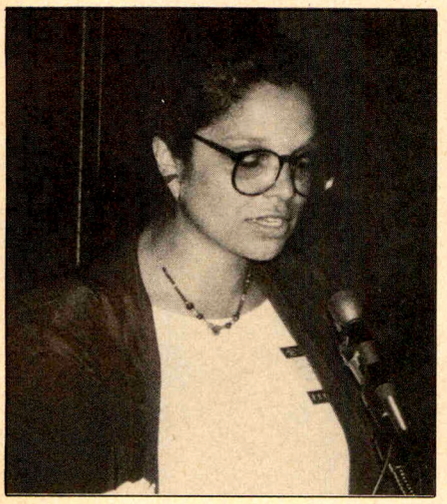
Newbery winner inspired by thousands of children's letters

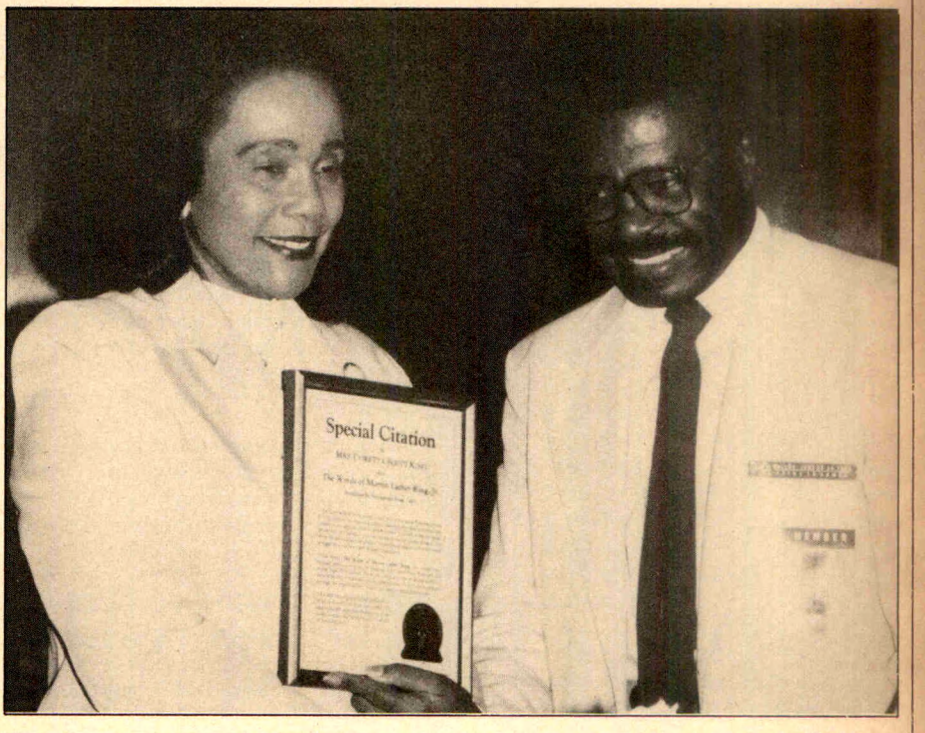
Association for Library Service to Children, Newbery/Caldecott Awards Presentation.

Beverly Cleary opened her Newbery Medal acceptance speech by thanking the selection committee for choosing a book that eight-to-ten-year-olds could read, since she believes these are the years during which the printed word can capture children's imaginations. "If books evade young readers during these years," she warned, "the joys of reading may be lost forever."

Cleary also asked the audience to pass along her thanks to all the children who have written her the letters that inspired her Newbery-winning *Dear Mr. Henshaw* (Morrow). She shared examples from the letters she has received during her 34-year career.

Dear Mr. Henshaw was prompted by a suggestion from several readers to "Please





VIPs at a 15th anniversary. *(Clockwise, from top left.) Celebrating the 15th birthday of the Coretta Scott King Award are Effie Lee Morris, chair of the SRRT task force administering the award, with Coretta Scott King, who appeared at the presentation for the first time in its history; King with ALA Past President and friend Clara Stanton Jones; King with incoming ALA President E. J. Josey, to receive a special citation from the Association; and Pat Cummings, winner of this year's award for illustration, delivering her acceptance speech. Many other notables attended the gala breakfast event.*

write a book about a boy whose parents are divorced.'' The title character is an author who receives letters from a boy living in a single-parent home. Cleary plucked the author's name from an obituary column and ascribed books to him that she wanted to write but could not: Henshaw's *Ways to Amuse a Dog* refers to a booksellers' legend about a woman who misunderstood the title *Forty Days of Musa Dagh* and asked for *Forty Ways to Amuse a Dog*. ''This struck me as a splendid idea for a book,'' said Cleary, ''because most of the dogs I knew were bored.''

In her Caldecott medal acceptance speech Alice Provensen said the question she and her husband Martin are asked most often is ''How do you work together?'' ''People have forgotten that the first book illustrators, the illuminators of the Middle Ages, worked in concert,'' she said. ''One to paint the flowers, one to paint the figures, another to do the background and the text.''

Describing the team's working methods, Provensen said, ''We start with the words. The story sets the style. No matter how fine the illustrations, unless they enhance the text, they fail.''

The Provensens' Caldecott-winning work, *The Glorious Flight* (Viking), tells the story of early aviator Louis Blériot and the first flight across the English Channel. Provensen said they ''wanted to write the story of a man with a passionate obsession to create something new, the successes and failures in his work toward that goal, and the moment of triumph that rewarded him.''

''For us,'' she concluded, ''making new children's books is equally obsessive, and being here tonight is certainly one of those satisfying moments.''

(Conference report cont. next page.)

Annual Conference report

Large networks face day of reckoning as local options grow

Association of Specialized and Cooperative Library Agencies, Multitype Library Cooperation Section.

Regional and state-level providers of library services and a vendor agreed that multitype library cooperation will increase in the '80s in a program titled "Networks: New challenges . . . new roles?" However, because of burgeoning private-sector services and local network growth, libraries will need new incentives for sharing resources beyond the local level.

Louella Wetherbee, executive director of AMIGOS, said regional networks will no longer be "one-stop shopping centers" for libraries. Vendors and state-level groups will offer comparable services, so that regional networks must select services they can offer best. Individual libraries will have so many options, Wetherbee said, that advantages for staying in centralized, regional, or national systems will decline.

Networks will find it increasingly difficult to continue their goals of resource sharing in such an environment, Wetherbee said. So they will have to provide good reasons for libraries to continue to share. "We don't want to go back to the '60s mood of each library on its own."

Libraries face difficult choices in such a setting: whether to get the "best deal" for themselves or have a continuing voice along with other libraries in service development on a broader level. Wetherbee forecasted "tremendous decentralization" and clustering of libraries in cooperative local area networks. AMIGOS will do problem solving for those types of groups rather than for individual libraries as now, she predicted.

Martha Richardson, director of library networking services for the Iowa State Library, sees state agencies as one level in a hierarchy of national, regional, and local networks providing different services to libraries. A vendor, Library Systems and Services, Inc., is already participating in statewide networking and in "networking" clusters of libraries. LSSI markets MINIMARC and processes library cataloging records on computer tape. Frank Pezzanite of LSSI noted that politics appears to be a hindrance to libraries taking advantage of technology.

With services available to libraries from so many levels, moderator Kevin Flaherty of the Michigan Library Consortium asked how the profession can create a forum to "lay the groundwork for cooperation so that we're not reinventing services and spinning our wheels."

Responses to his question indicated that central planning for networks is more dream than possibility. Wetherbee acknowledged "our need to get together," but she and other speakers pointed to a national aversion to centralized planning and a reliance on informal discussion "from the bottom up" to bring about change. It appears that different groups will continue to go their own ways.

Which is the real John Berry?

Answer: Both men, whose paths crossed at Dallas when an *AL* photographer was handy. John N. Berry, left, is editor of *Library Journal* and mover of a Membership motion to overturn a Council action in the Merwine Case (see story). John W. Berry, right, attending his 10th consecutive ALA Annual Conference, is acting assistant director for public services, Northern Ill. University Library.

Advice to academic libraries: market services aggressively

Association of College and Research Libraries, Bibliographic Instruction Section.

Rivalry between libraries and campus computing centers for the campus information market and dollar is causing concern in academic circles. At this program of ACRL's second-largest section, titled 'Bibliographic Instruction: A Catalyst for Change," Joseph Boisse said that only a strong service orientation will keep libraries in contention.

Boisse, library director at the University of California/Santa Barbara, said academic libraries must "export their knowledge" to top administrators, faculty, and students through bibliographic instruction and a myriad of instructional activities now commonly described by the term "information management education (IME)."

Urging library administrators to poll other unit heads on campus about their information needs, Boisse further suggested that libraries begin a special consultation service for university administrators to help build "political savings accounts" on campus. Libraries can also introduce faculty to new databases and systems, teach them how to organize personal collections, and suggest joint research efforts. As for students, Boisse said, we must not define too narrowly the information management skills they will need for lifelong learning.

Whether we call it BI or IME, a "contradictory set of purposes and scope" has made it successful for a few people in limited constituencies within a limited range of objectives, said Charles McClure of the University of Oklahoma library school. Only a change in administrative context and objectives will bring wider success, he said.

Current BI practice does not relate instruction to a broad range of users, address use of

ALA DEPUTY EXEC. DIR. $45,000-$68,000. Coords. plng. & oper. of ALA prog. activ. carried out by divisions, offices, round tables, & committees. Directs all ALA HQ's activ. in absence of exec. dir. Reqs. ALA-accred. MLS. Extensive knowl. of the North Amer. lib. community. Sr. mgmt. exp. Exp. & skill in dir'g. persnl. in a consultative mgmt. environ. Knowl. of the oper. of assns. or other volun. orgs. Appl. deadline Sept. 15. Send resume to: Persnl. Off., ALA, 50 E. Huron St., Chicago, IL 60611.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries*, 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies

Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line; **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Address

Place all notices with Beverly Goldberg, LEADS, *American Libraries*, 50 E. Huron St., Chicago, IL 60611; (312) 944-6780 x326.

Area librarian (equivalent to assistant librarian), McGill University Library System. Senior-level librarian responsible for humanities-social sciences. McGill University Library System is divided into 5 subject-oriented area library groups: humanities-social sciences, law, life sciences, physical sciences-engineering, and undergraduate. Qualifications required: credentials as a professional librarian. At least 7 yrs.' administrative experience in a large academic library with an increasing degree of responsibility. A graduate degree in humanities-social sciences is desirable. A working knowledge of French will be a distinct advantage. Nature of duties: a senior administrative position (equivalent to that of assistant librarian or assistant director of libraries at other academic libraries) responsible to the director of libraries. The area consists of the McLennan Library which primarily serves the faculty of arts. It also includes several related branch libraries: education, Islamic studies, library science, management, music, religious studies. The area has a collection of 1.5 million volumes, an acquisitions budget of $1 million, and a staff of 155, of which 40 are professional librarians. Salary: rank and salary will be commensurate with experience; $50,000–$60,000 Canadian. Position open immediately. **Deadline for applications is Sept. 15.** Please direct inquiries to: Hans Möller, Director of Libraries (Acting), **McGill University, 3459 McTavish St., Montreal, PQ Canada H3A 1Y1; 514-392-4949.**

Assistant college librarian (library search reopened): Austin College. ALA-accredited MLS plus teaching interest and skills. Duties: ILL, serials, OCLC subsystems, reference, bibliographic instruction, and cataloging as assigned. Salary: $17,000 for 12 mos. or slightly higher for substantial relevant experience. Open until position filled. Send vita, library school placement file, and official transcripts to: A. J. Carlson, Acting Dean of the Faculty, **Austin College, Sherman, TX 75090.** An equal-opportunity employer.

Assistant humanities reference librarian. Provides reference, online searching, library instruction, liaison to faculty, and collection development to assigned humanities areas (speech/communications, linguistics, modern languages, and comparative literature). Position reports to chair of reference department. Qualifications: BA degree with major humanities emphasis in one of the above areas and an ALA-accredited MLS required. 2 yrs.' recent academic, large public, or research library reference experience, and/or advanced degree in one of the above fields preferred. Proficiency in one or more foreign languages highly desirable. Experience in library instruction, collection development, and online database searching preferred. Applicant must be team-oriented; service-minded; innovative; flexible; willing to take initiative, work under pressure, and meet deadlines. Salary and benefits: 12-mo., tenure-track appointment with faculty status. 22 days' vacation; 8 paid holidays; 12 days' sick leave; and TIAA/CREF, state, or optional retirement plan. Blue Cross–Blue Shield group health, life, and disability insurance available. Course tuition waiver. No local/state personal income tax. Appointment at assistant university librarian, $15,715–$17,100 depending on qualifications and experience. **Apply by Sept. 7.** Send recent resume and names, addresses, and phone numbers of 3 references to: R. Max Willocks, **215 Library West, University of Florida Libraries, Gainesville, FL 32611.** The University of Florida is an affirmative-action, equal-opportunity employer.

Assistant interlibrary loan librarian and reference librarian. (This is a one-yr. position with possible extension.) This is a split position with half dedicated to interlibrary loan department and half to reference department. Assists in administrative and supervisory responsibilities in interlibrary loan with primary responsibility for management of lending operation. Provides reference service and bibliographic instruction in a large academic library serving the social sciences and humanities. Has responsibility for collection maintenance and inventory within the reference department. Some evening and weekend hrs. Qualifications: MLS from an accredited library school required; other advanced degrees desirable. Some academic-library interlibrary loan or reference experience preferred. Reading knowledge of at least one foreign language. Familiarity with RLIN or other automated systems useful. Available immediately. Starting salary $16,000. **Applications received by Aug. 15 will be considered.** Send letter of application and resume, including names of 3 references, and have library school credentials, including transcripts, forwarded to: Lance Query, Director of Library Research, Analysis, and Personnel, **Northwestern University Library, Evanston, IL 60201.** An equal-opportunity, affirmative-action employer.

Assistant librarian: technical services responsibility. MLS. Organization and communication skills, knowledge of online cataloging, preferably OCLC, supervisory experience, foreign language. Some reference work. $16,000 and benefits. Send application and letters to: Librarian, **Lexington Theological Seminary, 631 S. Limestone, Lexington, KY 40508.**

Assistant reference librarian. Serves as the primary provider of direct reference service under the supervision of the head reference services librarian. Some night, weekend, and holiday service is included. Participates in keeping the reference resources of the library up-to-date; in maintaining the physical organization of the reference collection in good order; and in producing reference room bibliographic records, guides, and publicity. Develops, maintains, weeds, and organizes information files. Assists in library instruction. Participates in business database search service. Provides interlibrary loans. Berkeley
Assistant Head of Public Service
The Bancroft Library

The Bancroft Library, a unit of the General Library, is one of the largest libraries of manuscripts, rare books, and special collections in the United States. The Public Services Division provides reference and instruction services to the users of these collections.

Duties of the assistant head will include reader assistance and instruction; correspondence; research counseling; training and supervising support staff; supervision of storage and retrieval of material; and collection development, covering the western United States and Mexico. In the head's absence, the assistant head is in charge of the Public Services Division.

Requires an MLS degree; 2 yrs.' experience in academic library reference; a reading knowledge of Spanish; and demonstrated successful training and supervisory experience. Preference given to candidates with a graduate degree and experience in North American or Mexican studies. Knowledge of other Western European languages and of bibliographic developments and automation in libraries is desirable.

Full job description mailed on request. Classification as assistant or associate librarian, $18,636–$32,796 per annum salary range, depending on qualifications. Position available Oct. 1, or as soon thereafter as possible.

To apply, please send your resume, including the names and addresses of at least 3 professional references, by Aug. 31 to:

William E. Wenz
Library Personnel Officer
447 Main Library
University of California
Berkeley, CA 94720

The University of California is an equal-opportunity, affirmative-action employer.

business or academic library reference service is needed. MLS or equivalent training and experience is required, and successful direct public service experience and positive public service attitude are desired. Database search service familiarity is needed. Very good written and oral communications skills are necessary. Salary: $23,400–$27,300. Contact: Search Committee "B," **J. Hugh Jackson Library, Graduate School of Business, Stanford University, Stanford, CA 94305.** EEO, AA employer.

Associate director of collection services. Faculty position in an urban university with 20,000 students, 13 schools on 2 campuses, and a 1,058-bed hospital complex. The associate director is responsible for the management and administration of the Collection Services Division and reports to the director of university library services. The Collection Services Division includes 2 departments: collection development and special collections and archives with a total of 5 faculty librarians, 2 archivists, and 6 clerical support personnel. Responsibilities include development and maintenance of academic, health science, and learning resource centers' collections on 2 campuses; the development and coordination of collection priorities, policies, and procedures; and the allocation of the $1.5 million+ ea. annual materials budget. Participates in general library administration as a member of the Director's Council and has primary responsibility for coordinating ULS outreach, development, and fundraising activities, and statistical compilation and reporting. Qualifications include MLS from ALA-accredited institution; 5 yrs.' experience with substantial managerial experience relevant to a large library, preferably a research library; demonstrated analytic skills, especially statistical analysis; ability to work and communicate effectively with other library divisions and university faculty, staff, and students; state-of-the-art knowledge of collection management including collection analysis; ability to work under pressure, meet deadlines, solve problems in group situations, write and speak effectively, show evidence of initiative and creativity, and have a high tolerance for ambiguity. Evidence of professional involvement, scholarship, and fiscal experience are preferred. Faculty rank and usual fringe benefits. Salary negotiable. Minimum $28,000. Available Sept. 1. **Send resume and the names of 3 references by Aug. 15** to: William J. Judd, University Library Services, **Virginia Commonwealth University, 901 Park Ave., Richmond, VA 23284-0001.** VCU is an equal-opportunity, affirmative-action employer.

Associate librarian, University of Toronto. Applicants must be graduates of an accredited library school. Extensive administrative experience at the senior level in a large research library. Demonstrated ability to work creatively and with flexibility in a large and complex system. Well-developed managerial skills. Understanding of research library collection development in a university setting. Broad bibliographic knowledge and awareness of the book trade. Proven communication skills, both written and oral. Initial responsibilities include collection development, acquisition, and preservation services. This is a senior administrative position reporting directly to the chief librarian. The library, the 6th-largest in North America, has a full-time staff of 467 and an annual budget in excess of $18 million. The collection of almost 4 million volumes and more than 1.5 million microforms covers all fields of study and research and contains material in over 100 languages, as well as many rare and unique items, and is supported by an annual book budget of more than $4 million. There is a strong commitment to collection development for research and to the implementation of a collection preservation program. Present salary scale $30,100-$50,100, but negotiable according to qualifications and experience. This is a 7-yr.-term appointment with renewal possibility. A stipend is attached. Librarians interested in applying should write with the names of 3 referees to: M. J. Sharrow, Chief Librarian, **University of Toronto Library, Toronto, Ont., Canada M5S 1A5.** In accordance with Canadian immigration requirements, this advertisement is directed to Canadian citizens and permanent residents.

Audiovisual and catalog librarian (search extended). Concordia College, a 2,500-student, liberal arts college affiliated with the American Lutheran Church, has an 11-mo. administrative position with responsibility for the operation of the AV department which includes a TV studio and a language lab, and for the management of cataloging of the acquisitions into the LC library collection using OCLC. Requirements: ALA-accredited graduate degree, managerial ability, experience with AV/TV equipment, OCLC and LC classification. Salary from $19,000 depending on qualifications and experience. Position available immediately. **Closing date is Oct. 1** or until the position is filled. Send letter of application, resume, and 3 letters of recommendation to: Verlyn D. Anderson, Library Director, **Carl B. Ylvisaker Library, Concordia College, Moorhead, MN 56560.** AA, EOE.

Automation librarian and coordinator of technical services. The University of Wisconsin–La Crosse is seeking applications from experienced librarians for the position of automation librarian and coordinator of technical services. Primary responsibilities include coordinating existing OCLC and serials control and planning for future automation activities (acquisitions, circulation, and online catalog); coordination of cataloging, serials, acquisitions, and microforms; and occasional information desk duty. Will serve on the library's Management Council. The professional librarians are organized as a department of the faculty and participate in collegial governance affairs. Minimum requirements: ALA-accredited library degree and a minimum of 5 yrs.' professional library experience. Second master's degree, 6-yr. certificate, or significant work toward a PhD required. Must have experience in the application of a library automation system such as an online catalog or an online circulation system. Salary commensurate with qualifications and experience, for academic yr., tenure-track faculty position. Minimum $18,000. Effective date Jan. 8, 1985. **Deadline for submission of applications: postmarked no later than Aug. 31.** Send correspondence and credentials to: Edwin Hill, Department Chair, **Murphy Library, University of Wisconsin–La Crosse, La Crosse, WI 54601.** An affirmative-action, equal-opportunity employer.

Bibliographer. Requirements include graduate library degree, 7 yrs.' relevant experience (including experience as a bibliographer in an academic or large general research library) or compensating achievement, skill in book selection, evidence of scholarly involvement in the book world, and effective communication skills. Duties include surveying and evaluating the library's collection, developing desiderata lists, and performing bibliographic and out-of-print searching; reviewing books received on approval and selections of reference librarians; selecting materials in specified subject areas; and keeping abreast of trends and values in the book market. Appointment as associate librarian $26,916–$32,448 (plus possible cost-of-living increase July 1); appointment within rank dependent on qualifications; 24 days' vacation, 12 days' sick leave per year. **Apply with resume by Sept. 15** to: Morris Polan, University Librarian, **California State University/Los Angeles, 5151 State University Dr., Los Angeles, CA 90032.** Equal-opportunity, affirmative-action, handicapped, Title IX employer.

Cataloger. Catalogs and classifies (DDC) book and nonbook materials; assists in the bibliographic organization of special collections; supervises book repair, pamphlet binding, and OCLC terminal operation; some collection development responsibilities. Qualifications: an ALA-accredited MLS required; evidence of continued professional development and OCLC or other network experience highly desirable; knowledge of and experience with DDC and AACR2 preferred. Salary range $16,000–$20,000 for a 12-mo., non-tenure-track position. **By Sept. 15,** send letter of application, resume, and names, addresses, and telephone numbers of 3 current professional references to: Henry R. Stewart, **William Allen White Library, Emporia State University, Emporia, KS 66801.**

Cataloger, Health Sciences Library, Northwestern University (search reopened). Catalogs monographs, serials, print and nonprint material, using automated cataloging system. Occasional evening/Saturday duty at the reference desk. Other duties as assigned. Library Director

Union College invites applications and nominations for the position of director of Schaffer Library. Union College is an independent, highly selective, residential college of 2,000 undergraduates, offering liberal arts and engineering curricula as well as a small graduate program. The director reports to the vice president for academic affairs and is responsible for administering a budget of approximately $1 million, a collection of 430,000 volumes, and a staff of 25 (12 professionals and 13 paraprofessionals).

Schaffer Library belongs to the 50-member Capital District Library Council and is a selective depository for federal government documents. The library participates in several OCLC subsystems and provides computerized reference service. Further library automation is planned for the near future.

Qualifications:
- —ALA-accredited MLS required;
- —Considerable professional experience at the staff level culminating in 2 yrs.' administrative experience in an academic library, with evidence of success in library fiscal planning, program development, and personnel management;
- —Demonstrated familiarity with current trends and applications of automated library systems;
- —Proven leadership abilities and superior communications skills;
- —Clear commitment to the principles of service and of open access to information; that is, advocacy of the educational mission of the college and of the library's active participation in that process;
- —Ability to work effectively with all segments of the college community;
- —Evidence of active participation in the profession beyond the local level and of professional growth through scholarly activity.

The position of library director is an administrative appointment with faculty status at the appropriate rank. Salary range is $35,000–$45,000. **Send application, including resume and names and addresses of 3 references, by Sept 1,** addressed to: **Search Committee for the Library Director, Office of Vice President for Academic Affairs, Union College, Schenectady, NY 12308.**

The college is an affirmative-action, equal-opportunity employer and encourages applications from women and from minority group members.

environment. Demonstrated leadership ability to analyze problems and develop practical solutions; plan, organize, and implement work procedures; train, manage, and motivate staff. Provides reference and consultation services, collection development, online searching, and bibliographic instruction in the engineering disciplines. Qualifications: ALA-accredited MLS required; master's degree in one of the sciences or engineering highly desirable; 2 yrs.' reference experience desirable. Faculty status, tenure-track appointment, and good benefits. Salary range: $19,000 – $24,000. The Robert Muldrow Cooper Library is an important research support facility with a collection of 1,260,000 volumes including 13,500 serial titles. The staff includes 22 librarians and 60 technical assistants. **Send letter of application with resume and names, addresses, and telephone numbers of 3 references by Aug. 15** to: Myra Armistead, Chair, Reference Librarian Search Committee, **R. M. Cooper Library, Clemson University, Clemson, SC 29631.** An EEO, AA employer.

Reference librarian for small liberal arts college library. Responsibilities include reference services to faculty and students, supervision of all public services including audiovisual services, bibliographic instruction, interlibrary loan, and circulation. Some night and weekend duty. Requirements: ALA-accredited MLS. Academic library experience. Preferences: familiarity with OCLC systems. Subject background in social sciences or humanities. Salary: $14,000 minimum. **Send resume and names of 3 references by Aug. 20** to: Helen E. Gilbert, Librarian, **Holman Library, McKendree College, Lebanon, IL 62254.** AA, EOE.

Reference librarian/life science bibliographer. Responsible for traditional and computer-aided reference service in the Science and Engineering Division; development of the life science collection; bibliographic instruction; online searching; liaison with teaching departments. Some evening and weekend hours. Required: MLS from an ALA-accredited library school; upper-division coursework in biology or related sciences. Demonstrated experience working with the public. Preferred: undergraduate degree and/or additional graduate work in a life science; library experience with life science materials; experience with online literature retrieval; reading knowledge of German. $16,000+ depending upon experience. **Send letter of application, resume, and names of 3 references or placement bureau address by Aug. 31** to: Dennis R. Defa, **328 Marriott Library, University of Utah, Salt Lake City, UT 84112.** EEO, AA employer.

Reference librarian/social sciences. (Previously advertised as half-time position.) Qualifications: BA or BS degree required, with emphasis on the social sciences preferred; MLS degree from ALA-accredited library school strongly preferred; one or more yrs.' reference work experience in an academic library preferred. A broad understanding of the social sciences is required. Supervisory and organizational capabilities necessary. Applicant must be interested in and have the ability to communicate effectively with the faculty, staff, and students. Duties: responsibilities include general reference functions, collection development activities, working with periodicals and serials, supervision of student assistants, subject area database searching, participation in bibliographic instruction/tours, committee activities, and other duties as assigned. Benefits: includes faculty rank, status, privileges, and responsibilities; enrollment in the state retirement system; comprehensive medical coverage; university holidays, and annual and health care leave. Salary: $14,500 range. **Application procedure: send letter of application & resume, including names & addresses of at least 3 references (preferably work) by Aug. 15** to Chair, Search Committee, Reference Librarian /Social Sciences, **Mississippi State University, P.O. Drawer 5408, Mississippi State, MS 39762.** Position available: immediately. Mississippi State University is an equal-opportunity, affirmative-action institution.

Reference librarian to assist students and faculty in use of library. Requires master's degree in library science. Library experience with college students desired. Full-time assignment beginning Sept. 4 with primary assignment Mon. – Thurs. 12 p.m. – 9 p.m. and Fri. 7:45 a.m. – 4:30 p.m. Minimum salary $23,173 depending on education and experience. Apply to: John Renley, Vice President, Student & Personnel Services, **El Camino Community College District, 16007 Crenshaw Blvd., Torrance, CA 90506.**

Reference librarian. The UCLA Biomedical Library has 2 reference librarian positions open. Duties include reference desk service, online search service, and library instruction. Minimum qualifications: MLS degree from an accredited program normally required; strong communication skills; ability to analyze information needs critically and logically. Desirable qualifications: strong academic background in biology, chemistry, or related field; experience with NLM, BRS, and/or DIALOG; familiarity with information resources in the health and life sciences; teaching or public speaking experience. Salary range: $18,636 – $32,796. Benefits: 2 days per month of vacation leave, one day per month of sick leave, excellent retirement system, and group health and life insurance plans. Personal interview may be required. **Applications received by Sept. 15 will receive first consideration.** Send resume and 3 references to: Rita A. Scherrei, Director of Administrative Systems and Personnel Services, **University Research Library, UCLA, Los Angeles, CA 90024.** UCLA is an equal-opportunity, affirmative-action employer. Librarians at UCLA are represented by an exclusive bargaining agent, the American Federation of Teachers (AFT).

Reference librarians. 2 positions at Central Michigan University, serving 16,000 students and 600 faculty, reporting to the coordinator of public services. Responsibilities: general reference service at the library's main reference desk. This involves online searching and the use of public service OCLC terminals. Emphasis on bibliographic instruction, including the teaching of at least one section of a course on the use of the library. May serve as subject bibliographer with responsibilities for collection building and faculty liaison in an area of specialty. Scheduling includes flexible work hours with some night and weekend assignments. Required: ALA-accredited MLS degree. Desirable: second master's degree and/or appropriate subject background in English, communication, or education. These are 10-mo., tenure-track, faculty positions. Reappointment and promotion dependent upon meeting university criteria based on professional, scholarly, and creative activity. 2-semester salary is negotiable according to qualifications and experience: at least $16,000 at instructor level and $18,000 at assistant professor level. Opportunity for additional summer employment exists. **Application must be postmarked no later than Aug. 17.** Submit application, resume, and the names and addresses of 3 references to: Chair, Selection Committee, **Central Michigan University, POB 2067, Mt. Pleasant, MI 48858.** CMU is an affirmative-action and equal-opportunity institution.

Science bibliographer. Evaluates and develops subject collections in biological, geological, and atmospheric sciences, monitoring allocated funds, continuing commitments, approval plans. Serves as liaison to faculty and students in the corresponding academic departments, provides in-depth bibliographic instruction and specialized reference. Reports to head, collection development department. Also provides general reference services during assigned hours, including some evenings and weekends. Does online searching of science databases on BRS and DIALOG. Library faculty at SUNYA are expected to fulfill faculty obligations in the areas of contributions to the advancement of the profession and university service as well as specific library assignments. Qualifications: MLS from an ALA-accredited library school, undergraduate and/or advanced study in biological or geological sciences preferred; background in other sciences considered. Preference will be given to candidates with relevant experience in an academic or special library subsequent to receipt of MLS. Experience in computerized bibliographic searching is desirable. Salary & rank: commensurate with education and experience; salary from $17,000 depending on qualifications. **Inquiries should be received by Aug. 31.** Send letter of application, current resume, names and addresses of 3 references to: Deborah Duchala, Library Personnel Officer, **University Libraries—Rm. 140, State University of New York at Albany, 1400 Washington Ave., Albany, NY 12222.** SUNY at Albany is an equal-employment-opportunity, affirmative-action employer. Applications from women, minorities, and handicapped are especially welcome.

Science librarian. To provide reference services, maintain science collection, perform online searching through commercial databases, and coordinate programs with faculty in science departments. Qualifications: master's in library science from an ALA-accredited school; undergraduate and graduate work in science desirable; PhD and experience preferred. Salary range: $16,000 – $18,000. Wanted Sept. 1. Apply to: Donald T. Hartman, Vice President and Dean of Academic Affairs, **Juniata College, Huntingdon, PA 16652.** Affirmative-action, equal-opportunity employer.

Search analyst—Mississippi State University Libraries. Qualifications: master's degree in library science required. MLS from ALA-accredited school strongly preferred. One yr. or more work experience in an academic library with several online database systems; in-depth searching experience in at least one online system preferred. Knowledge of searching principles and machine-readable databases. Effective interviewing and communication skills. Logical, thorough, analytical mind. Applicant must have the ability to be innovative and work effectively with students and faculty. Supervisory capabilities and organizational abilities necessary. Responsibilities include: database searching, supervising search records, billing and statistics compilation, training other staff members in online searching, coordinating the continuing education of other search analysts and library administrators with respect to database services, giving demonstrations of the database services to interested groups, performing evaluation studies of the database services, promoting and publicizing the services of Computer Assisted Information Retrieval Service (CAIRS), and other duties as assigned. Benefits include faculty rank, status, privileges, and responsibilities; enrollment in the state retirement system; comprehensive medical coverage; university holidays and annual and health care leave. Salary: $18,000 range. Position available: Sept. 1. This position will be filled only if a suitable applicant is found. **Application procedure: send letter of application & resume, including names & addresses of at least 3 references (preferably work) by Aug. 20** to: Bette M. Rice, Chair, Search Committee, Search Analyst, **Mississippi State University, P.O. Drawer 5408, Mississippi State, MS 39762.** Mississippi State University is an equal-opportunity, affirmative-action institution.

Senior assistant librarian, reference department (12 mos.). Works in active and dynamic academic reference department. Participates in reference desk work, library instruction, reference work, general collection development and faculty liaison activities, online searching, and assists with planning and implementing automated reference systems. Qualifications include an MLS from an ALA-accredited school and at least 4 yrs.' experience in academic reference work. (A master's degree in a subject field is required for tenure.) In addition, experience in systems development and coursework in computer and/or information science is highly desirable. Salary dependent upon qualifications ($20,800 – $28,872/yr.). **Deadline for application is Aug. 15.** Letter of application, current resume, and 3 letters of reference should be sent to: David B. Walch, Library Director, **Robert E. Kennedy Library, California Polytechnic State University, San Luis Obispo, CA 93407.** California Polytechnic State University is an affirmative-action, equal-opportunity employer.

Assist in the maintenance of fiscal and statistical data, workflow studies, and implementation of automated systems. Requires MLS from an ALA-accredited library school, minimum 5 yrs.' fiscal experience, and understanding of statistical methods. Automation experience desired. Salary: $20,880 – $28,872 annually. **Resumes by Aug. 30** to: University Librarian, **Clark Library, San Jose State University, One Washington Square, San Jose, CA 95192-0028.**

Serials and reserve librarian for library in community college setting in semitropical, lower Rio Grande Valley. Master's degree in library science from ALA-accredited institution. Successful experience in academic or public library, including supervisory-level work, and bilingual Spanish/English preferred. Responsible for collection development, supervision in serials and reserve area, and binding and serials control. Library serves college, university, and general public. 11.5-mo./yr. duties include one night/week and one weekend/mo. Salary range: $17,657 – $22,954. **Application deadline: Aug. 31,** or until position is filled. Procedure: submit letter of application and completed official application form, dossier that includes 3 letters of professional reference, and official transcripts of all college/university work to: Alfredo C. Zamora, Personnel Officer, **Texas Southmost College, 80 Fort Brown, Brownsville, TX 78520; 512-544-8205.** Board of Trustees reserves the right to reject any and all applications. An affirmative-action, equal-opportunity employer, M/F/H.

Dean of University Libraries
University of Nebraska-Lincoln

The University of Nebraska-Lincoln invites applications and nominations for the position of dean of university libraries. The university is the state's land-grant and only comprehensive, doctoral-degree-granting institution. Its libraries consist of the Don L. Love Memorial Library and 10 branch libraries with holdings of approximately 2 million volumes. The personnel consists of 50 faculty and 100 support staff. It utilizes traditional as well as new information technologies. The libraries serve approximately 20,500 undergraduate students, 4,300 graduate students, and a faculty of 1,200.

The dean is the chief administrative officer for the university libraries, reports to the vice chancellor for academic affairs, and is a member of the Council of Academic Deans. The dean works with the library faculty and staff to maintain and develop policies and procedures which support the university's academic objectives and programs. The dean provides creative leadership in enhancing a major research library.

Candidates for this position must have an accredited MLS; an earned doctorate or have demonstrated achievement and interest in academic research; and a minimum of 5 yrs.' experience in a university research library in upper-level line positions with budgetary responsibilities. They should show evidence of continuous professional growth and scholarly achievement. The position requires a broad understanding of both public and technical services of a library system; experience in both areas is desirable. Candidates must have an up-to-date knowledge of developments in information technology, including computer applications. An ability to organize and plan library operations is required.

The dean must have demonstrated superior communication, management, and interpersonal relations skills necessary to work with faculty, students, administrators and staff, potential donors, and a variety of external constituencies.

The salary will be commensurate with qualifications, experience, and the responsibility of the position; minimum $50,000. **Nominations must be postmarked by Sept. 21. Deadline for applications is Oct. 1,** or until a suitable candidate is selected. Applicants should send a letter of interest along with an up-to-date vita and the names of 5 references to:

Chair, Advisory Committee
Library Dean Search
Office of the Vice Chancellor for Academic Affairs
309 Administration Bldg.
University of Nebraska-Lincoln
Lincoln, NE 68588-0402

Affirmative-action, equal-opportunity employer

Serials librarian. Kennesaw College is a dynamic public senior college, the fastest-growing in the university system of Georgia. The college aspires to become a leader among its peer institutions in making meaningful and lasting progress in responding to the needs and concerns of minorities and women. Additional minority faculty are especially needed to make this sincere commitment a reality. Kennesaw College Library has a position available for a serials librarian. The successful applicant must have an MLS degree and serials experience. Experience with automated serials system and experience in reference work are desirable. Responsibilities include selection, processing, and problem solving, having to do with periodicals, microforms, binding, and serials other than periodicals. Some reference work and evening hrs. required. Starting salary $15,000 – $20,000. **Send resume with names of 3 references by Aug. 31** to: Arthur Dunning, Office of Academic Affairs, **Kennesaw College, POB 444, Marietta, GA 30061.**

Salary $16,473; determined on a 7-step basis. Apply at: **Kent County Personnel Office, 300 Monroe NW, Grand Rapids, MI 49503.** EOE.

Supervisor, adult services. Administer collection development, reference and information services, and programming for main library department. Opportunity to develop services and reorganize department as part of building expansion program. 4 professional staff, 4 support staff; 1984 adult materials budget $136,209. ALA-accredited school MLS; 3–6 yrs.' relevant professional library experience; demonstrated administrative ability. Hiring range $21,500–$22,700; excellent fringe benefits. Position open Sept. 10. Send resume and letter of application to: **Lorain Public Library, 351 Sixth St., Lorain, OH 44052.** An equal-opportunity, affirmative-action employer, M/F.

Technical services department head. Weber County Public Library in Ogden, Utah, is seeking an enthusiastic, forward-looking head of technical services. The technical services librarian is responsible to the assistant library director for planning the departmental budget, personnel management, classification and cataloging of library materials, and for database maintenance. Candidates should be able to catalog print and nonprint library materials using OCLC; interface OCLC with an online catalog and circulation system; undertake major recataloging and reclassification projects; participate in library system planning; supervise 6 FTE, one professional, 5 clerical; communicate effectively verbally and in writing; and utilize the principles of intellectual freedom in performance of duties. Position requires an ALA-accredited MLS plus 2 yrs.' supervisory experience, one of which must have been in the area of automated systems, preferably CLSI and/or OCLC, and one of which must have been in the area of classification and cataloging of library materials using DDC and LC subject headings. Salary range is $17,680–$24,897. Competitive benefits. **Application deadline is Sept. 30.** Send letter of application and resume to: **Weber County Personnel Office, Ben Lomond Bldg., 2500 Washington Blvd., Ogden, UT 84401.** Weber County Library is an affirmative-action employer.

Youth librarian, Comstock Township Library (population 11,162) near metropolitan Kalamazoo. MLS required. 37-hr. week. Salary $12,000–$15,000. Seeking creative, versatile person with good public personality and strong commitment to children's services to direct and supervise children's and young adult department, supervise clerical personnel, plan and execute programs, select and catalog materials, and provide readers' guidance and reference service. **Send resume and 3 references by Sept. 1** to: Shirley Kasson, Director, **Comstock Township Library, 6130 King Hwy., Comstock, MI 49041.**

RESEARCH LIBRARY

Supervisor, stack unit. Responsible for shelving, retrieval, and organization of materials for a major research collection of over 3 million volumes. Supervises staff of 15.1 FTE, including direct supervision of 2 unit managers and one full-time searcher. Requires MLS or equivalent, demonstrated supervisory and organizational skills, ability to communicate effectively. Minimum 2 yrs.' related experience. Minimum salary $15,750; benefits include 22 days' vacation per year, TIAA/CREF retirement plan, fully paid individual health/HMO, life and disability insurance plans. **Send letter of application, resume, and list of 3 references by Aug. 20** to: Alan F. Barney, Head, Administrative Services and Personnel, **Center for Research Libraries, 6050 S. Kenwood Ave., Chicago, IL 60637.** Equal-opportunity employer.

SCHOOL LIBRARY

Public school librarian/media specialist. Responsibilities: supervision of large new high school library with 2 assistant librarians. Professional South Carolina certification as librarian/media specialist and some experience required. Salary according to degree and experience (MA and 10 yrs. = $21,000 for 190-day school yr.). Call or write: Assistant Superintendent for Personnel, **Sumter School District 17, POB 1180, Sumter, SC 29150; 803-469-8536.** An equal-opportunity employer.

Director of Libraries

The Board of Education of the Grosse Pointe Public School System is seeking a director of public and school libraries. The director will be responsible for the operation of a central public library and 2 branch libraries (36 FTE staff). The public libraries have a collection of 121,000 volumes and a circulation of 511,000. The budget is $1.5 million annually. Responsibilities also include working with school principals in the organization, and supervision and operation of school libraries along with coordinating the work of the staff assigned to the school system instructional materials center. The position requires an MLS from an ALA-accredited library school. Experience as a professional librarian is required while experience as a school librarian is desirable. Moreover, public library administrative experience is strongly preferred. Salary $47,000+, depending on qualifications. **Letter of application, resume, and university credentials must be received by Aug. 31.** Send to:

Ronald R. Tonks
Director of Personnel
The Grosse Pointe
Public School System
389 St. Clair
Grosse Pointe, MI 48230
313-343-2016

STATE AGENCY

Head of library development. Responsible for developing and improving service in the state's 125 public libraries; creating systems for more efficient and effective service; providing some statewide services; supervising a consultant staff of 8 professionals with emphasis on AV, adult programming, children's construction, performance measures, and planning. State merit position, starting salary $30,000, life, health, dental insurance provided, liberal vacation and sick leave. Minimum requirements: MLS from an ALA-accredited school, 8 yrs.' professional experience with at least 4 in progressively higher public library positions, state library experience helpful. **Application deadline Aug. 15.** Send for more information and an application to: Director, **Oklahoma Department of Libraries, 200 NE 18th, Oklahoma City, OK 73105.** An AA, EEO employer.

Librarian II (children's and rural library service coordinator). Need energetic, enthusiastic person to develop quality of children's and rural library service. Qualifications: master's degree in library science from accredited library school and minimum of 3 yrs.' experience in public libraries. Salary: $17,784–$26,052. **Application closing date: Aug. 15.** Contact: Cindy Larson, Business Manager,

North Dakota State Library, Liberty Memorial Bldg., Capitol Grounds, Bismarck, ND 58505. North Dakota is an equal-opportunity employer.

Public library consultant. Position available Sept. Serves as resource person and consultant to public libraries throughout S.C., assisting in their development and improvement through field visits, correspondence, and workshops. Strong communication skills and ability to organize work and carry out assignments with minimum supervision essential. Minimum requirements: ALA-accredited MLS degree, 4 yrs.' progressively responsible professional experience in a public or state library, driver's license. Some experience with automation and with adult services, including programming, desirable. Beginning salary $20,249-$24,475 depending upon qualifications and amount and type of experience. Excellent fringe benefits. Send resume, transcripts, and references to: Betty E. Callaham, **South Carolina State Library, POB 11469, Columbia, SC 29211.** An EO, AA employer.

SERVICES AND SOURCES

STRIVE FOR EXCELLENCE. We offer the best in educational, motivational, and business cassettes. The following cassette-learning programs are priced at $45: *Megatrends*—John Naisbitt, *Love*—Leo Buscaglia, *The Psychology of Winning*—Denis Waitley, *How to be a No Limit Person*—Wayne Dyer, *Principles for Successful Living*—Art Linkletter, *Mind Over Illness*—Norman Cousins, *Fitness for Life*—Kenneth Cooper, *Possibility Thinking*—Robbert Schuller, *Success is a State of Mind*—Joyce Brothers. These 2 cassette programs with hardback book—$27: *One Minute Manager, One Minute Mother, One Minute Father.* Write for free color catalog listing 65 different titles. Make checks payable to Strive for Excellence. All inquiries and orders should be mailed to: Strive for Excellence, 3 Biscayne Pl., Sterling, VA 22170; 703-476-3855.

TEACHING OPPORTUNITIES OVERSEAS. Vacancies in all fields, on all levels. For details, please send a self-addressed, stamped, long envelope to: FRIENDS OF WORLD TEACHING, P.O. Box 1049, San Diego, CA 92112-1049.

PUT SEARS TO WORK. 1,200 "see" and "see also" cards plus Manual/List of Headings with DEWEY numbers. From Sears 12th ed., $49.95. Woods Library Publishing Co., 9159 Clifton Park, Evergreen Park, IL 60642.

MEXICAN monographs and serials. Government publications. Free referral service and book lists. Selective blanket order service for academic libraries. Selection and distribution of single or multiple copies of textbooks. MACH, Apartado Postal 13-319, Delegacion Benito Juarez, 03500, Mexico, D.F.

LABELS . . . BAR CODE & OCR LABELS: phototypeset, supporting formats for all automated library systems. Labels have a protective laminate coating. For a competitive price quote, write or call: MDSI, Dept. AL, 115 S. Oak St., Falls Church, VA 22046; 703-532-8128.

BAR CODE LABELS AND PATRON CARDS with preprinted bar codes or OCR imprints. Large and small quantities. Customized. Economical. Prompt delivery. Contact: John Morrison, DATA SYMBOLOGY, P.O. Box 18077, Rochester, NY 14618; 716-442-3152.

BAR CODE/OCR LABELS to support all automated circulation and inventory control systems. Highest quality phototypesetting and adhesive products, first-scan readability, competitive prices, and prompt delivery. Toll-free outside California 800-227-2121, collect in California 415-232-6200 or write: Optical Scanning Sales, Data Composition, Inc., 1099 Essex, Richmond, CA 94801-2185.

BAR CODE LABELS for all library automated circulation systems. Guaranteed to exceed library bar code specs for readability, wear, and adhesion. Check our low prices. For more information, write or call collect: ID RECALL, 306 Kennedy Rd., Los Gatos, CA 95030; 408-356-5462.

PATRON & I.D. CARDS . . . All types, plastic and vinyl. Call collect or write: ID RECALL, 306 Kennedy Rd., Los Gatos, CA 95030; 408-356-5462.

BIBLIOGRAPHIC DATA CONVERSION: catalog records converted to MARC II, OCLC/MARC, and other computer formats. Database extraction and reformatting of existing tape files. Call toll-free 800-325-4984 or write: ELECTRONIC KEYBOARDING, INC., 140 Weldon Pkwy., St. Louis, MO 63043.

MARCIVE AUTOMATED CATALOGING SERVICE. Customized cataloging, fast & inexpensive. Catalog Cards, COM catalogs (microfiche and microfilm), Original Cataloging and Retrospective Conversion. MARCIVE, INC., P.O. Box 12408, San Antonio, TX 78212. Call toll-free 800-531-7678; in Texas, call collect 512-828-9496.

***THE ONE-PERSON LIBRARY:* A NEWSLETTER FOR LIBRARIANS AND MANAGEMENT.** Professional isolation is one of the major problems of working alone. We want to change that. This new newsletter is informal, informative, and above all, quick and to the point. Charter subscriptions (one yr.—12 issues) for $35, a saving of over 20%. Prepaid orders to: OPL RESOURCES, LTD., POB 948, Murray Hill Station, New York, NY 10156.

BAR CODE SCANNING EQUIPMENT: light pens, decoders, terminals, printers, etc. IBM and other systems compatible. We are a company specializing in bar code products only. DATACODE, 223 B Saratoga Ave., Los Gatos, CA 95030; 408-354-7555.

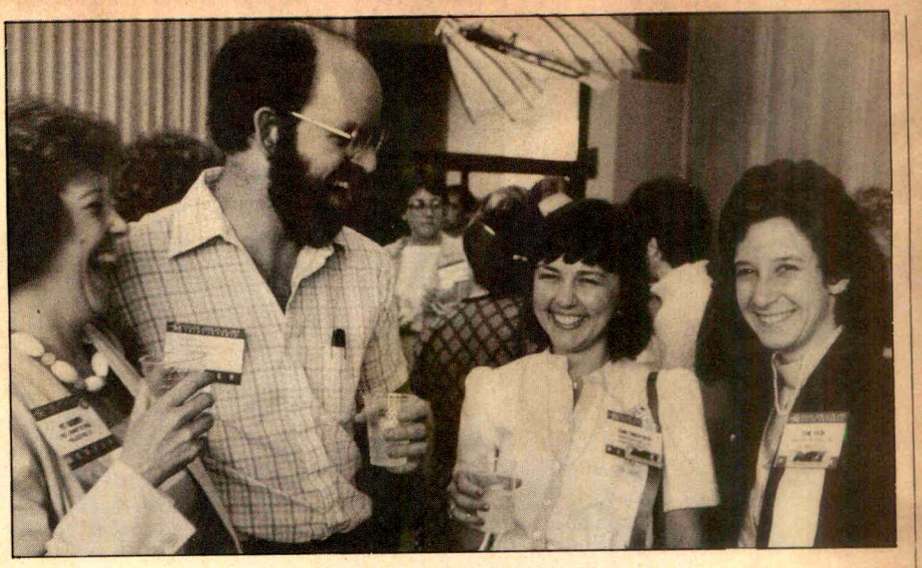
(Conference report, cont. from p. 500)

information in research, teach the critical evaluation of information, or show the variety of technologies available, McClure observed. We need to clarify the goals of user education and, more important, find ways to measure its performance and impact.

"Academic libraries have successfully ignored the trend in public libraries to develop output measures and integrate them into long-term planning," McClure said. He gave library administrators a large order: to give frontline librarians the attention and support they need to enter new learning situations, to change their traditional assumptions about library service, and to begin using strategic planning techniques in administration. However, he saved perhaps the most challenging task for middle-level library managers: "to make the case" for the service-oriented academic library to their administrators.

Millicent Abell, library director at the University of California/San Diego, with thanks for the ideas of her colleague at San Diego, Ree DeDonato, spoke of technology's effects on BI. Technology gives frontline librarians a new opportunity to collaborate with students and scholars and may affect the scholarly communication process itself, she said, noting that her library is involved in several projects in which librarians are creating information sources on selected topics for distribution to the scholarly community.

Abell mentioned the "liberating effect" of technology on BI: librarians can go to offices and classrooms to explore users' information needs and tailor access systems to those needs. Technology also gives librarians a new way to win back people who have had little use for libraries.



A well received reception

Councilors and JMRTers share a laugh at the "Students to JMRT" reception, where library school students and Junior Members Round Table members hobnobbed with ALA Executive Board and Council members. Enjoying the festivities in the Dallas Public Library's Community Showcase room are, from left, councilors Pat Naismith and Bob Smith, and JMRT members Terri Tomchyshyn and Diane Bisom.

Dewey online may be answer to subject searcher's dream

Resources and Technical Services Division, Cataloging and Classification Section, Subject Analysis Committee.

It takes a flawless typist who understands syndetic structure and control language to effectively use many of the automated library systems we have now, quipped one speaker at this program on "Subject Access in the Online Catalog." Users' wish lists for online catalog improvements put better subject access at the top, and catalog designers are busy refining and rethinking online catalog structures to make this wish come true.

Karen Markey of OCLC, Inc., one of many speakers at the standing-room-only program, reported on her research into augmenting the MARC record with Dewey Decimal Classification numbers, subject terms from DDC classification schedules and indexes, and other format-related subject groupings from Dewey. The goal of the project is to provide another set of searchable subject terms in the MARC record, thereby increasing the odds that users will find matches for subject terms they use in searching.

Users have complained that when they search with subject terms they know, they get few matches because their terms aren't the same as those in the records (usually Library of Congress subject headings). In one study, 36 percent of the searches performed used "whatever popped into the searcher's head." Of those searches, 65 percent resulted in zero matches.

DDC online promises users access to a wide array of new terms, and information on the relation of terms to each other and to Dewey classification numbers. Markey is now designing and building a demonstration system. The next step is to test the system at selected sites—the University of Illinois at Urbana-Champaign, the Public Library of Columbus and Franklin County (Ohio), and the New York State Library—and with Library of Congress DDC classifiers.

Telecommunications: go short-term

Library and Information Technology Association, Information Science and Automation Section.

Now is not the time to commit funds to long-range telecommunications agreements, advised the last expert panelist in the program, "Telecommunications: The Social, Political and Economic Impact on Libraries."

Don Muccino of OCLC predicted that after five or six years of turmoil and a shakedown among telecommunications vendors, prices will decline to "realistic" levels. In the meantime, Muccino advised, libraries should contract for their telecommunications needs on as short a term as possible.

Out of the complexities and confusions of the present, Muccino expects to see more metro area networks and local area networks (MANS and LANS) maintained by local companies. Libraries will plug into these networks, which in turn will plug into broader systems. Bell operating companies, said Muccino, could price themselves out of business for casual users unless they match the competition.

To managers with micros: don't punish technophobes

Library Administration and Management Association, Systems and Services Section.

Years of experience with microcomputers and libraries have caused automation consultant Robert Walton of the Texas State Library to alter some of his beliefs about micros. At a program titled "Microcomputers for Library Managers: Beyond the Basics," Walton said he's always advised people to first pick their audience, the functions they want, software, and then hardware, "but it doesn't always work that way." Most people pick the machine first and then worry about the rest.

Walton offered some guidelines to managers considering micros for the long term. He stressed that grandiose plans for micros often get scaled down quickly once the machine is in-house, and that four to six months of "dig and die" experience is usually needed before people begin to understand micro capabilities.

An important thing to remember, he said,

is that fast changes in technology have cut the return on investment life of most systems to three years. So managers should expect no more than 36 months of optimum system use before upgrading or switching.

Managers should be alert to personnel problems that often arise in the micro environment, Walton said. Library staffers usually stratify into those who are comfortable with the micro and those who aren't. Often managers begin to favor technology experts and subtly punish staff more concerned about other service areas.

Walton predicted fast growth of local area networks in the next two years. For now, the best and safest investment is a good, average-capability micro that includes some software guarantees and is IBM-compatible. The de facto IBM standard may be affected by AT&T's recent entry into the micro market, but IBM-compatible products still offer the most flexibility to managers.

Hispanic recruitment frustrating, say some library schools

The National Association to Promote Library Service to the Spanish-Speaking (REFORMA).

The REFORMA program, "Library School Recruitment & Education of Hispanics," offered several library school administrators a chance to explain their failures and successes in recruiting Hispanics. Statistics show that Hispanics are inadequately represented at all levels of the library profession. For example, they received only .9 percent of MLSs granted in 1981–82; nine library school faculty were Hispanics then; and in 1981, 1.8 percent of the library workforce was Hispanic.

Outgoing REFORMA President Albert Milo said Hispanics and library schools have been "blaming each other" for the situation. The program was an attempt to encourage more communication between them.

Camila Alire, assistant to the dean at the University of Denver library school and Hispanic, said she was "totally frustrated" at the results of Denver's recruitment efforts. She cited several strategies used by the school—brochures, minority careers receptions, letters to library directors asking them to identify minority candidates, and her own six-state, 40-day recruiting trip to schools with high minority enrollments—that resulted in one Hispanic student enrolling in the school recently.

"We [in library schools] don't need to be told how grave the situation is," she said. "We know." Alire also said the school had received no applications by the June 8 deadline for three Title II fellowships specifically funded for Hispanics. "The recruiting efforts have been there," she said, but she cited cultural factors such as the desire to remain close to family as one reason for low Hispanic enrollment.

Ellen Altman, director of the University of Arizona library school, said many library schools have already done much to recruit Hispanics. Arizona enrolls an average of five Hispanic students per year and has graduated 72—more than any other library school. "We want to do more," Altman said, "but we have to have help in identifying them and encouraging them to apply." She called on REFORMA to set an agenda of "concrete steps to cooperation with library schools and to getting more Hispanics into librarianship." She pledged $100 to REFORMA for resurrection of its scholarship, suspended after being awarded once.

Ana Cleveland, Texas Woman's University library school, matched the $100. She described TWU's problems with Hispanic recruitment, among them inadequate undergraduate preparation, financial problems, lack of role models, family ties that preclude geographical mobility, and a curriculum that is not designed for multicultural librarianship. Since 1979, TWU has given one-third of its total $208,000 in Title II-B fellowship funds to Spanish-speaking students, but often cannot find enough Hispanics for grants.

The University of Illinois library school has had success in recruiting Hispanics at the Ph.D. level, according to Dean Charles H. Davis. He suggested that faculty at research-oriented university library schools encourage Hispanic professional librarians to "get advanced degrees and join us on faculties."

The joy of winning

Award presentations are a major part of annual conferences, and one of the most elegant presentation ceremonies is traditionally that of the H. W. Wilson Co. for the John Cotton Dana Library Public Relations Awards. Here receiving a Dana for the Dauphin County (Pa.) Library System is director Sarah Ann Long.

Henry Faulk on First Amendment

Junior Members Round Table Orientation.

Texas humorist and folklorist John Henry Faulk told of a friend who would travel to any community in Texas opening a library because, as the friend said, "A library in a community is a mark of its degree of civilization."

Faulk then spoke of the widespread hysteria in America during the McCarthy era and of the blacklist in the entertainment industry. After being accused of having Communist ties, Faulk filed a lawsuit that eventually cleared his name and broke the blacklist.

The fight made Faulk aware of the importance of the First Amendment and the Bill of Rights. "Yours is a profession that deals very directly with these freedoms," he told his audience. "You should view with alarm . . . incursions on these sacred freedoms," he said, citing what he considered the Reagan administration's abridgments of freedom of the press.

"The genius of the First Amendment," Faulk concluded, "lies in the fact that it protects those ideals and opinions that we loath and despise with equal vigor as those we cherish and protect."

Shift to online ready-reference means big changes for libraries

Reference and Adult Services Division, Machine-Assisted Reference Section.

In a two-part program, "The Ready-Reference Use of Online Services: Ready or Not?", speakers and exhibits offered information and advice for librarians thinking of incorporating database searching into their ready-reference agenda.

Elizabeth Titus and Eileen Hitchingham provided an overview of the topic. Titus discussed how ready-reference database searching differed from fee-for-service searching: there is no charge for the service, the product is limited, accessing is impromptu and unstructured, and the search strategies use simple phrases. She suggested that the entire reference staff, including student assistants, be involved in searching, and that skills be kept up to date with database training sessions, periodic update sessions, and joint practice sessions. Urging librarians to think of online searching as an integral part of a reference program and to provide the service to their patrons, Titus warned, "If we don't, someone else will."

During the next 10 years, Hitchingham said, the biggest change in online services will result from microcomputer proliferation, placing more micros in homes and libraries. Other changes will include the availability of more databases, including many with no direct print counterpart; more user-friendly software with fewer protocols; and more online document delivery, offering full text or ordering online.

Forge coalitions to win public support, says Josey

ALA Inaugural Banquet.

The people-oriented issues that involved E. J. Josey in the Social Responsibilities Round Table will continue to preoccupy him as ALA President, Josey asserted in his theme address, "Forging Coalitions for the Public Good."

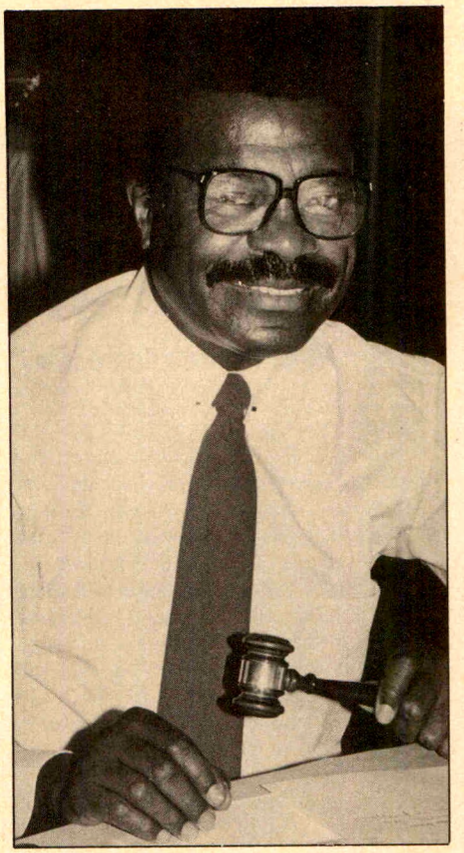
"In the current period of stress and uncertainty for great numbers of the American people," Josey said, "it is desirable to reemphasize the unity of our goals with those of other leading organizations that are also concerned with the public interest."

The new president declared: "We need to assert that libraries and indeed other cultural and educational institutions . . . constitute 'a public good' [because of] the growing frequency of talk about 'alternative sources of funding' . . . which suggests that such funds may or will *replace* public support, rather than complement or support it."

The rapid growth of private-sector information services is another reason for asserting the concept of a public good. "Again," Josey said, "nobody would deny the utility of many of these services provided by the private sector, but they are not available to all of the American people . . . they are designed only for those who can pay for them. . . ."

Democratic freedoms at stake

Josey indicated the relationship between the general welfare and progress for libraries. "In a time of attack on the basic freedoms and elementary well-being of the most vulnerable sections of the population, professional groups must recognize their stake in the outcome of that attack and their responsibilities to support the freedoms and welfare of the majority of the population.



1984–'85 ALA President E. J. Josey

"ALA therefore needs to integrate its goals with the goals of the greatest importance to the American people, i.e., the preservation of basic democratic liberties, the enlargement of equal opportunity for women and minorities, and the continuance of earlier national planning to raise the level of the educational and economic well-being of greater numbers of the population."

In pursuit of these goals, Josey proposed to extend the current ALA efforts in working with national organizations, using the political process, and strengthening the public awareness, outreach, literacy, and other programs and services. He announced two innovations: the Commission on Pay Equity and the Presidential Committee on Library Services to Minorities (see story).

The President's Program at the ALA Midwinter Meeting Jan. 7 will be an all-day conference-within-a-conference focusing on the theme of forging coalitions, Josey said. He invited ALA members to participate with representatives of other national organizations and learn about the Minnesota Library Association project in coalition-building, which may become a model for other chapters.

The President's Program, Josey said, will bring into reality a Commission on Public Support of Libraries. "The commission is critically needed because there is a growing belief that public services can be more economically and more efficiently provided by agencies from the private sector and not be a burden to the taxpayer.

"Only through publicly supported institutions can we guarantee that restrictions will not be placed on the availability of information or on the potential users who may wish to access it. . . . An adequately supported library system, we assert, is vital both for an informed society and for the preservation of our democratic freedoms." □

These changes will affect collections, as the question of whether to own reference tools or access them online creates political problems for librarians, who have always told their boards "more is better"; on users, who will begin to do more of their own online searching, not necessarily on-site at the library; and on librarians, who will be entering an age of less specialization and more responsibility for teaching the use of online tools. Nevertheless, Hitchingham stressed, librarians must change or the market for these services will be taken out of their control.

Management perspectives were addressed by Steve Atkinson, who provided a checklist of considerations for libraries planning online services. Joyce Duncan Falk covered costs, budgeting, sources of financing, and cost-control measures.

Charles Gilreath and Jane Dodd discussed integrating online reference services into library operations. Gilreach sees BRS Colleague and other low-cost online services as harbingers of the day when computers "are as ubiquitous in libraries as microfilm readers." He alerted reference librarians to the effect increased online searching has on other units, such as cataloging, acquisitions, and interlibrary loan, by increasing the demand for materials not owned by the library.

Dodd had a number of caveats for librarians thinking of replacing printed reference tools with databases: online access is limited to the working hours of the host computer and the hours that searchers are available; the future availability of current online files is questionable—if the demand for them lessens they may be discontinued; and patron complaints when print materials are converted to microform suggests even greater dissatisfaction if the more drastic step of substituting databases is taken.

The afternoon session, "A Fair Exchange," offered a bazaar of exhibits staffed by MARS members and online users. The displays encompassed equipment and publicity, budgeting and financing, staffing and training, statistics and record-keeping, databases, and bibliographic utilities.

Speakers condemn and defend Reagan's secrecy clampdown

Intellectual Freedom Committee, Association of American Publishers Freedom to Read Committee, and Intellectual Freedom Round Table.

The Reagan administration's policy on access to information was attacked and defended in a program on government secrecy sponsored by the Intellectual Freedom Committee and the Association of American Publishers Freedom to Read Committee.

Richard Schmidt, AAP Washington Coun-

sel and counsel to the American Society of Newspaper Editors, started with the premise that "no government, including ours, loves a free press; at best they tolerate a free press." Schmidt then enumerated recent actions by the executive branch to restrict access to information, including efforts to weaken the Freedom of Information Act, an increase in the amount of classified material and corresponding steps to block the declassification of material, lifetime prepublication review of writings by those with access to classified material, and the denial of visas to selected foreign nationals.

Schmidt also mentioned the refusal to allow press coverage of the initial phases of the Grenada invasion; ironically, he pointed out, the U.S. cited restrictions on the press as a reason for withdrawing from UNESCO.

Conservatives were the earliest supporters of the Freedom of Information Act, Schmidt said, viewing it as a tool against big government and a device to expose corruption in the Democratic administration then in power. Now, however, they fear the act as a threat to the current administration and are attempting to limit its scope.

Cecile Shure, a consultant specializing in international technology transfer, described Soviet efforts to exploit our free exchange of information to advance their own technology. "What we have today—a technology that we use for peace—the Soviets want for defense," she said.

Shure called it "a dichotomy" that the U.S. wants to share its information and grow, but must also live with the reality that the Soviets want our technology. She stated that students from Communist and Third World nations study in the U.S. to bring back knowledge to aid their countries; and although Soviet students can study freely in the U.S. and travel without restraints, American students in Russia have limited access to scientific data and cannot travel outside their host city.

Censors as people

At an IFC program demonstrating that "Censors Are People, Too," videotapes were shown depicting vignettes of library censorship attempts. At appropriate points the videotapes were stopped and Robert LeLieuvre and Fran McDonald, authors of *Peoplework: Communications Dynamics for Librarians,* commented on how the situations could be handled to avoid emotionally charged confrontations.

After the videotapes the audience broke into discussion groups led by facilitators trained at the 1984 Midwinter Meeting. The groups were designed to teach librarians techniques to use to improve communication between librarian and patron in censorship incidents. A videotape featuring the vignettes and portions of the discussions will be made available at a later date.

The John Phillip Immroth Memorial Award, honoring contributions to intellectual freedom and courage in defense of freedom of expression, was presented to Gene D. Lanier of the East Carolina University library school at the Intellectual Freedom Round Table program.

The IFRT also presented its first State Program Award for the year's most successful and creative intellectual freedom project to the South Carolina Library Association's Intellectual Freedom Committee. The group cosponsored "The First Branch of the Palmetto Tree: Intellectual Freedom and South Carolina Libraries," a teleconference allowing nearly 200 people in the state to view and participate in a debate and forum on the issue.

Kozol: "A two-thirds democracy"

American Library Trustee Association.

One-third of the American electorate—those who cannot read—are excluded from the nation's democratic system, Jonathan Kozol said at a luncheon program on "Literacy and Libraries." The widely known commentator on American education told a large audience there are many more "illiterates" in the U.S. than the 23 million or so usually cited. These are the people, he said, who have no connection with the past such as is gained by reading; "they have nothing against which to measure campaign promises."

Kozol spoke long and emotionally, piling up numerous examples of the helplessness of those who cannot read. Angrily, he charged that failure of the schools is "silent violence, which is repaid with interest" to society.

On the *Nation at Risk* report, he remarked: "Why is it that if the risk has been defined as national, the solution is not offered as national? We don't leave our national security to village councils and overburdened school boards."

Even while addressing an educators' conference, Kozol expressed little faith in the impact of such gatherings once the conferees have returned home. Conferences change nothing, he said. "The only way we can overcome people's reluctance to help is to set stunning examples."

The library, he believes, offers "signs of hope in the midst of anguish": first, the literacy-leadership role libraries have taken; second, the symbolic importance of the library as an institution of the book; and third, the fact [i.e., Kozol's notion] that "libraries are the only thing around that nobody *hates*. Nobody hates libraries; they just walk past them. You're in a good position [to foster literacy]; this momentum must not be allowed to die. Don't let the archival minds in the profession dissuade you."

Futurist puts school libraries at center of educational changes

American Association of School Librarians.

The next 20 years are a crucial period for American education as it attempts to respond to technological and social upheaval; and school libraries are at the center of these changes, according to Christopher Dede, associate professor in futures research at the University of Houston/Clearwater and author of *The Far Side of the Future*. "Unless it happens in libraries," Dede maintained, "it will not happen in the classroom."

Rather than actually attempting to predict the future, Dede explained, futurists expose

Jonathan Kozol reaches out *to listeners after ALTA talk on reducing illiteracy.*

alternatives and allow people to choose among them. He warned that outside factors, such as Sputnik, the civil rights movement, and the economy, have a greater impact on educational programs than any internal innovations.

Dede described advances in information technology already affecting libraries, such as rapidly falling information-processing costs and new formats for information storage. These technical advances are balanced by a counter-trend of serious economic decline, a situation in the making for several decades and one that will require many years to correct.

But rather than give his standard "doomsayer's" speech, Dede chose to present possible optimistic scenarios. The important thing to forecast, he said, is not the costs or number of computers in schools, but how the relationship between librarians, teachers, and students is going to change.

Dede said that many fear advanced technology will relegate humans to custodial, "babysitting" jobs for robots and other machines. Fewer people, however, talk about the alternative of person/tool partnerships. In this scenario, machines will still require humans and their flexibility, creativity, ability to evaluate information, and holistic thinking. "The tools are becoming terrific at problem solving," said Dede. "The human part of the equation is problem-recognition."

Libraries will contain all types of knowledge not involving person-to-person communication, according to Dede. In the future, machines will do *training*—in areas where there is only one correct answer, such as mathematics—but librarians will be involved in *education*—where there may be many correct answers, or no correct answer.

The forthcoming trends move libraries back to the position of the central repository of society's knowledge, Dede said, adding that this will require librarians to give up old roles and reorder their priorities. "The longer we cling to the old model . . . the harder it's going to be to make that shift," he told his audience, concluding that this is "a time for leadership rather than management, a time for being active rather than reactive."

A long way from home

One of numerous foreign visitors to ALA Dallas was Adebimpe Olurinsola Ike of the Federal University of Technology, Bauchi, Nigeria. An active ALA member, Ike attended a wide range of programs.

Public library standards "kit" scheduled for '86 completion

Public Library Association. New Standards Task Force.

Moving forward on developments at Midwinter (*AL*, Feb., p. 104), a PLA unit planning a four-part "standards" package brought a discussion paper to Annual Conference for open hearings. The floor comments ranged from calls to return to quantitative standards to reminders of such special-interest concerns as young adults and rural services.

The standards task force, chaired by Karen J. Krueger of South Central Library System, Madison, Wis., is proposing a "boxed set" of tools for 1) planning, 2) role setting, 3) measurement, and 4) national data collection. These components would be interrelated for combined use, but each would also serve as an independent planning resource.

The first component builds on the PLA's *Planning Process for Public Libraries*, which would be revised for easier application. All components would aim for flexibility, so that a library could be measured for its role as, say, a "scholar's workshop," as well as for that of a "popular materials provider."

The need for flexibility will clearly keep the standards away from fixed numbers, although two speakers at the hearings argued that quantitative standards—even if "self-serving"—are best understood by library funders.

The task force hopes to have the standards package ready in about 18 months.

Games they play in ALA

Junior Members Round Table President's Program.

An audience of new librarians and others learned about "Cruise the Lobby," "Grab a Microphone," "Drop a Name," and other conference games at a JMRT President's Program offering tips on getting involved in ALA.

Dorothy Anderson of the UCLA library school also presented tongue-in-cheek descriptions of various categories of ALA members, including prophets, prima donnas,

(Conference report cont. on p. 537.)

Election results

Lynch will speak and write on librarians' achievements

Beverly Lynch, whose informal platform emphasized library salaries and public awareness of the value of librarians' work, has won the ALA presidency with 60 percent of the vote.

In a post-election interview with *AL*, she discussed several issues now before the Association.

"ALA should defend the ALA-accredited MLS whenever it is challenged," she said. "It depends upon the case, of course; but we should use every means we can to support and defend the degree. There was no ambivalence at all about that issue at the Dallas conference."

On public awareness, she remarked, "I expect to be speaking and writing to society at large about librarians' achievements over the next two years. To groups of mayors and governors, I can always talk about issues and values. That's not difficult to communicate. But when it comes to the 'for instances,' I will depend upon my colleagues and ALA staff to provide help."

She said she was not sure what the slim 440-vote passage of the revised dues schedule was saying to ALA leaders. "It may be that members were looking at the bottom line five years from now, when dues will become $75. There's always that fear that income won't keep pace with future inflation."

Lynch was confident that ALA ultimately would keep its membership, but noted that historically a loss occurs after a dues increase.

She is now university librarian at the University of Illinois/Chicago, where she has been since 1977. Lynch was executive secretary of the ALA's Association of College and Research Libraries in 1972–76. The 48-year-old president has also worked in the Serials Division of Yale University Sterling Memorial Library, a division she headed from 1965 to 1968. After receiving her MLS from the University of Illinois/Urbana-Champaign in 1959, she took her first professional library job at Marquette University Memorial Library. She has been a life member of ALA for 20 years.

Her 25 years in librarianship have been marked by her work in developing policies related to library employment, management, and professional ethics; and in helping to write standards for college, community college, and university libraries.

Among many positions of leadership in ALA, Lynch has served on Council since 1979 and the Executive Board since 1983. She was also a member of the Council Committee on Program Evaluation and Support from 1979 to 1983 and chaired that body in 1982–83.

Beverly Lynch, new president

Patricia Schuman, new treasurer

During her presidential year, Lynch says, she hopes to lead ALA to consensus on critical issues and to strengthen its role as a leader and representative of the profession.

She said, "I've always believed the ALA presidency is a continuum: that is, one furthers the objectives of those who have gone before. I will continue to enhance what the Association has been doing and is doing now. Above all, I hope to support some of the most important programs and those ideas in the embryonic stages. I'm not inclined to impose something on the Association that hasn't already emerged as a major issue."

The new president-elect sees the AASL Future Structures Committee report on whether or not the American Association of School Librarians can thrive within ALA as "a good opportunity to consider the issues relating to ALA and its divisions. AASL's concerns are shared by other divisions. The committee has done us all a service by analyzing the issues before us and offering us a valuable outline for discussion."

In 1981 Lynch was named Academic/Research Librarian of the Year by ACRL. North Dakota State University, where she obtained her undergraduate degree, awarded her an honorary doctorate in 1980. She received a Ph.D. from the University of Wisconsin in 1972.

Among her professional memberships are LC's Center for the Book, where she has served on the executive committee of the national advisory board for six years, and the International Federation of Library Associations and Institutions. She chairs IFLA's Committee on University Library Standards.

"Right now," said Lynch, "I'm looking forward to a 19-day safari in Kenya to do some birdwatching before attending IFLA in August."

She lives in Milwaukee with her husband, attorney John Allan Lynch.

—Edith McCormick

Lynch and Schuman win; 25 councilors elected

Beverly P. Lynch, librarian of the University of Illinois at Chicago, has been elected ALA vice-president and president-elect by a 1,901-vote margin. She captured 60 percent of the vote, receiving 5,509 of the 9,650 votes cast by mail ballot. Virginia H. Mathews, vice-president of Library Professional Publications in Hamden, Conn., received 3,608 votes.

Patricia Schuman, president of Neal-Schuman Publishers, received 47 percent of the vote in the three-way battle for treasurer, 1984–88. She received 4,213 votes. Totals for her opponents Herbert Biblo and Robert Rohlf were 2,016 and 2,662, respectively.

Twelve write-ins were tallied, and 122 ballots were declared invalid at a meeting of the Elections Committee June 13.

Councilors at large

Twenty-five councilors at large were elected for 1984–88. Their vote totals are listed beside the elected councilors' names, which are in alphabetical order.

William G. Asp, Minnesota Dept. of Education, St. Paul, 2,247; Patricia Berger, Information Resources & Services Div., National Bureau of Standards, Washington, D.C., 2,270; Dorothy W. Blake, Atlanta (Ga.) Public Schools, 2,349; J. Dennis Day, Salt Lake City (Utah) Public Library, 2,343; Linda A. Dougherty, Chicago Public Library Brighton Park Branch, 2,256; Elizabeth M. Greggs, King County Library System, Seattle, 2,171; Dean W. Halliwell, University of Victoria (B.C.) library, 2,365; Charlotta C. Hensley, University of Colorado at Boulder Libraries, 2,137; Joan Higbee, Library of Congress, 2,706; Monteria Hightower, Seattle Public Library, 2,153; Philip E. Leinbach, Tulane University library, New Orleans, 2,315; Barbara Evans Markuson, Indiana Cooperative Library Services Authority, Indianapolis, 2,930; Nancy H. Marshall, University of Wisconsin/Madison Libraries, 2,785; Josephine McSweeney, Pratt Institute Library, Brooklyn, 2,346; Effie Lee Morris, lecturer/consultant, San Francisco, 2,712; Roscoe Rouse, Jr., Oklahoma State University library, Stillwater, 2,340; Gail Ann Schlachter, ABC-Clio Information Services, Santa Barbara, 2,611; Elaine Sloan, Indiana University Libraries, Bloomington, 2,172; David D. Smith, Technical Libraries & Internal Technical Documentation, AT&T Bell Labs, Allentown, Pa., 2,254; Lotsee P. Smith, Texas Woman's University SLS, Denton, 2,207; Robert D. Stueart, Simmons College GSLIS, Boston, 2,764; Betty J. Turock, Rutgers University School of Communication, Information & Library Studies, New Brunswick, N.J., 2,351; John C. Tyson, Northern Illinois University Libraries, DeKalb, 2,168; J. Linda Williams, White Marsh School Library, Mechanicsville, Md., 2,177; and Diana D. Young, North Carolina State Library, Raleigh, 2,170.

Other vote totals

Council candidates who were not elected are: Carol Lee Anderson, 1,367; Margaret E. Auer, 1,394; Marta Stiefel Ayala, 1,519; Reynaldo Ayala, 1,136; Anne K. Beaubien, 1,821; Imogene I. Book, 1,834; Cozetta W. Buckley, 1,383; Jane Burke, 1,908; Luis F. Chaparro, 1,909; Ellen J. Cooke, 1,888; Barbara D. Cooper, 1,942; Charles Curran, 1,816; Larayne J. Dallas, 1,175; Marva L. DeLoach, 1,763; Henry Dequin, 1,635; Elaine Didier, 1,439; James V. DiGiambattista, 1,761; Ernest DiMattia, Jr., 1,891; Carmine M. Diodati, 1,322; Sandy Ellison, 1,541; Don Fadden, 1,959; Adele M. Fasick, 1,539; Edward D. Garten, 1,389; Rhonna Goodman, 1,717; Mary F. Hicks, 1,374; Patricia M. Hogan, 1,543; Barbara Hull, 2,027; Barbara J. Hutchinson, 1,558; Clara O. Jackson, 2,105; Jeffrey Johnson, 1,751; Diane Gordon Kadanoff, 1,667; Ann L. Kalkhoff, 1,854; Sharad Karkhanis, 1,116; Doris Kirschbaum, 1,661; Elizabeth Knauff, 1,605; Charles Kratz, 1,602; David Leamon, 1,477; Susan C. Leuvano, 1,551; Josette Anne (Boisse) Lyders, 1,442; Doreitha Madden, 1,326; Bernard Margolis, 2,040; Rosemary S. Martin, 1,559; Mary Bride Mayer-Hennelly, 1,649; Albert Javier Milo, 1,553; Jane Ross Moore, 1,940; Frederic C. Pachman, 1,202; Beverly D. Papai, 1,160; Anita R. Peterson, 1,205; Linda Pierce, 1,458; Ann K. Randall, 1,910; Mary Louise Rheay, 1,558; David L. Searcy, 1,940; Dallas Y. Shaffer, 1,472; Samuel L. Simon, 1,702; Helen Lloyd Snoke, 1,938; Abigail Studdiford, 1,191; Albert Tovar, 1,367; Elena Tscherny, 1,140; Nancy L. Wareham, 1,825; Barbara Webb, 1,950; William L. Williamson, 1,840; Evie Wilson, 2,029; Patricia Olsen Wilson, 1,655; and Carolyn P. Winn, 2,007.

All proposed amendments to the Constitution and Bylaws were approved. These would increase personal member dues; provide for Council to determine dues and perquisites for organization, chapter, and special members; establish a definition, purpose, and procedure for ALA chapter status; and authorize board and committee members to vote by electronic systems and conference calls in addition to mail.

Divisions and round table

The new chief officers elected for ALA units are: *AASL*, Shirley L. Aaron; *ALTA*, Herbert Davis; *ACRL*, Sharon Anne Hogan; *ASCLA*, Gail McGovern; *ALSC*, Linda R. Silver; *LAMA*, Ronald G. Leach; *LITA*, Lois M. Kershner; *PLA*, Patrick M. O'Brien; *RASD*, Rebecca Kellogg; *RTSD*, Marcia Tuttle; and *YASD*, Joan L. Atkinson.

Members of LITA and PLA approved dues increases for their units. LAMA members approved a proposed bylaw, and RTSD members voted to change their unit's name.

New round table heads are: Susan Freiband, *Ethnic Materials Information Exchange;* Elwynda K. Chapman, *Federal Librarians;* Diane Smith, *Government Documents;* John C. Swan, *Intellectual Freedom;* Anders C. Dahlgren, *Junior Members;* Arthur P. Young, *Library History;* Marilyn Berry Segal, *Library Instruction;* Maurice Marchant, *Library Research;* Linda Carlson Sharp, *Map and Geography;* Kay Cassell, Doris Kirschbaum, Betty-Carol Sellen, and Susan Vaughn, *Social Responsibilities Action Council;* and Kathleen Prendergast, Barbara A. Waserman, and Janet Woody, *Staff Organizations Steering Committee*. □

Sabosik appointed *Choice* editor

Publishing consultant Patricia E. Sabosik has been appointed editor of *Choice*, the Association of College and Research Libraries monthly published in Middletown, Conn. Her appointment was effective July 30.

Sabosik, a former member of the American Association of School Librarians Secondary School Materials Committee, has been a freelance consultant for the publishing industry in the areas of market-share analysis and international book distribution for the past six months. She recently served as director of marketing services at the H.W. Wilson Co. in New York City.

From 1977 to 1982 she managed the Publications Department at the Baker & Taylor Company and edited the academic and public library periodicals *Directions* and *Forecast*.

In July Sabosik received an MBA in marketing from Seton Hall University. She earned her undergraduate degree in English at Kean College.

Lynch seeks candidates

President-elect Beverly P. Lynch, chair of the Committee on Appointments, is looking for applications and nominations of members to serve on ALA committees. The Committee on Appointments, which is advisory to the president-elect of ALA, is made up of the 11 division presidents-elect.

The committees are: Accreditation, *American Libraries* Editorial Advisory, Awards, Chapter Relations, Conference Courtesy Resolutions, Constitution and Bylaws, Instruction in the Use of Libraries, Office for Library Outreach Services Advisory, Office for Library Personnel Resources Advisory, Membership, National Library Week, Research, Standards, ALA/Association of American Publishers, ALA/Children's Book Council, and ALA/Society of American Archivists Joint Committee on Library-Archives Relationships.

Each application or nomination should include a brief summary of qualifications and the name of the committee. Send nominations by Oct. 15 to Beverly P. Lynch, University Librarian, University of Illinois at Chicago, Box 8198, Chicago, IL 60680.

Committee nominations due

ALA Council's Committee on Committees seeks applications and nominations for the following Council Committees: Intellectual Freedom, International Relations, Legislation, Library Education, Minority Concerns, Organization, Orientation, Planning, Policy Monitoring, Professional Ethics, Program Evaluation and Support, Publishing, Resolutions, and Status of Women in Librarianship.

Each application or nomination should include a brief summary of qualifications and committee name.

Send nominations by Oct. 15 to Beverly P. Lynch, Chair, Committee on Committees, University Librarian, University of Illinois at Chicago, Box 8198, Chicago, IL 60680.

Other members of the COC are Ann H. Eastman, director of Public Affairs Programs, College of Arts and Science, Virginia Polytechnic Institution and State University, 2095 Derring Hall, Blacksburg, VA 24061; Dianne McAfee Hopkins, director, Bureau of Instructional Media Programs, Department of Public Instruction, P.O. Box 7841 Madison, WI 53707; Jeanne M. Isacco, OCLC, 6565 Frantz Rd., Dublin, OH 43017; and Stefan B. Moses, executive director, California Library Association, 717 K St., Suite 300, Sacramento, CA 95814-3477. □

library life

Trivial Pursuit inventors ferret out questions in Metro Library. Toronto-area Sherlockians, including several librarians, are creating an underground version of the game.

Trivial Pursuit inventors search Sherlockiana

Money Magazine recently sent Joe McNally (right) to the Metropolitan Toronto Library to photograph the inventors of the popular Trivial Pursuit game, Chris Haney (left) and Scott Abbot (center).

Metro Library's staff photographer Sarah Peters took this picture of the photography session in MTL's Arthur Conan Doyle Room.

While there, Haney and Abbot ferreted out six new questions and answers on Sherlock Holmes for their planned second generation of the Genus edition of Trivial Pursuit. Cameron Hollyer, curator of the Arthur Conan Doyle Collection and a librarian in the Literature Department, helped them come up with the new puzzlers.

According to Janice McNabb of the Literature Department, Metro holds the largest Doyle collection of any public institution in the world.

Project gives disabled persons adapted toys

The Onondaga County (N.Y.) Public Library has established Project Adapt, which will make toys and electro-mechanical devices to operate them available to individuals with severe physical impairments.

Robert P. Kinchen, OCPL director, recently announced the appointment of Deborah Carey as project coordinator. Carey has a master's in social work from Syracuse University.

According to Carey, "Switches have been developed so they can be activated by an eye blink, head motion, or even tongue pressure. If a child or accident victim cannot operate a button or clicker switch, Project staff can rewire equipment so the person is able to use it. For example, the impaired individual could push a panel rather than press a button."

Project Adapt's resource center will serve disabled people in Onondaga, Madison, Cortland, and Cayuga Counties. It is part of the main library's Services for the Handicapped Department.

The project provides training and resources for library staff, parents, and professionals in community agencies.

Parents and community agencies can borrow items from the library's collection of adapted toys, switches, and leisure equipment to see what works for their children. Then they can invest their money knowledgeably into what they want to acquire permanently at home or work.

"Children who have learned helplessness are learning to become capable people by learning to play," Carey said. "For kids, play is hard work: That's how they learn about themselves and what they're good at."

A $19,000 grant provided seed money to establish the project. OCPL received the funds through the New York State Office of Mental Retardation and Developmental Disabilities Planning Council.

Project coordinator Deborah Carey operates two toys—one by hand and one by foot—through adaptive switches.

Patrons talk back to advertisers

A "Bad Ad" bulletin board was the focal point of a contest brought to a close during National Library Week at the Billerica (Mass.) Public Library.

Boston ad executive Terrence Clarke (above) appeared at an innovative library program, giving patrons a chance to talk back to advertisers. Clarke gave a feisty defense of the advertising profession's position during a no-holds-barred exchange.

Library director Barbara Flaherty launched the contest last fall after a showing of the film, *Killing Us Softly—Advertising's Image of Women*. For a special bulletin board, people of all ages were asked to contribute ads they considered particularly offensive or stereotypical.

Good ads, portraying real people in realistic situations, were also sought. Patron votes on the best and worst were tallied.

After six months, reference librarian Carolyn Beane composed letters of protest and praise to advertisers of the 10 most and 10 least popular ads. The letters were displayed on the bulletin board.

"Nearly one hundred patrons signed the letters they agreed with. When they were sent out, the letters looked much like a petition," Flaherty reported.

Boston ad exec Terrence Clarke and Billerica Public Library Director Barbara Flaherty pose in front of the "Bad Ad" bulletin board that was the focal point of a six-month library contest.

Priorities for local services seen on Cheltenham signpost

The position of "Library" on this signpost could be taken as a cynical aside on the status of the public library in Britain. So suggests Nigel Kelly, Charleton Kings librarian in Cheltenham.

"The sign was designed and erected without any consultation of the local library service, Gloucester County Library," Kelly told *AL*. "It just appeared one day, courtesy of the local highways department."

Kelly reports that the sign is symptomatic of a wider problem in England: most public library systems have no coherent publicity policy. Many public libraries are not even listed in the phone book. Information about opening hours, facilities, and the librarian is rarely available.

Kelly presents slide shows to British librarians to explain the importance of presentation and image—something, he says, "American librarians seem far more aware of."

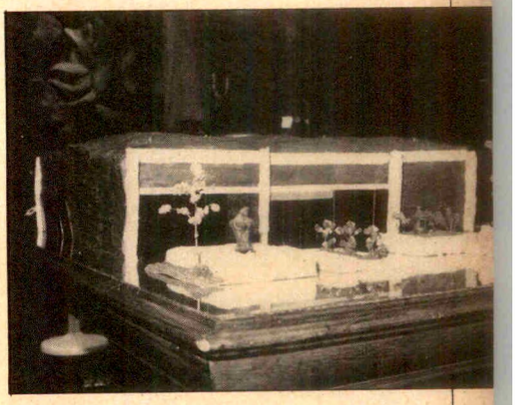
"British libraries are invisible," Kelly said. "They are not presented as a coherent service which contributes very considerably towards the economy and well-being of the nation."

He notes, however, that hope is on the horizon. Among the signs are a new national public library logo and a Publicity and Public Relations Group of about 500 members set up by the Library Association. Finally, he says, schools and seminars on improving publicity and the library image are on an increase.

No ordinary cake

Akron-Summit County Public Library Friends and staff donated 109 cans of frosting and 109 sheet cakes to construct this replica of the Main Library. The cake welcomed visitors to the 15th anniversary celebration of the "new" library at the end of April.

Staff members under the direction of Judy Supple and Laurel Alley worked a day and a half to fashion the cakes into the replica, complete with windows, garden sculpture, and reflecting pool.



University of Illinois annual survey:

Public library circulation holds; spending jumps 7%

THE 1983 INDEX OF AMERICAN Public Library Circulation was 107, the same as in 1982. The Index of Expenditures stood at 130 in 1983, compared with 121 in 1982; and in 1980 dollars the Index was 108 vs. 104 the previous year. So expenditures continued to climb—there was a 7% increase over the 1982 index value of 121—but circulation stayed the same.

The procedure for calculating the two indexes was explained in last year's report in the September 1983 issue (p. 534). Suffice it to say that we use a sample of 53 public libraries, which as a group had the same changes in their expenditures and circulation from 1975 to 1980 as did all U.S. public libraries serving over 25,000 people in 1980. As shown in the table, the adult/juvenile split of circulation was 68-32 in 1983, almost the same as in 1980, based on data from 37 of the 53 reporting libraries. The average percent of expenditures for salaries was 66% in 1983, for materials 14%, and for all other operating costs 20%—a measurable shift from the 63-16-21% distribution in 1980.

Using the figures from the last national survey of public libraries published by the National Center for Education Statistics (NCES), we estimate that the total circulation of all public libraries last year was 1.07 billion—the same as in 1982; we can be 95% confident that the true total was within 4.6% of the estimate—no less than 1.02 and no more than 1.11 billion. Similarly, we calculate that total U.S. public library operating expenditures in 1983 were $2.27 billion, and that the true total was within 19.2% or between $2.01 and $2.53 billion.

We have gone one step further this year, by recording the population served per year by each of the 53 libraries from 1980 to 1983. We used population data from no earlier than the 1980 Census but checked each library in each year's edition of the *American Library Directory* and/or in state library statistical compilations. We then calculated four new measures, shown in the table. Each of these has some value in regard to efficiency and performance, and each has some limitations. Their value is enhanced by being the average of this representative sample of public libraries.

Herbert Goldhor
Library Research Center

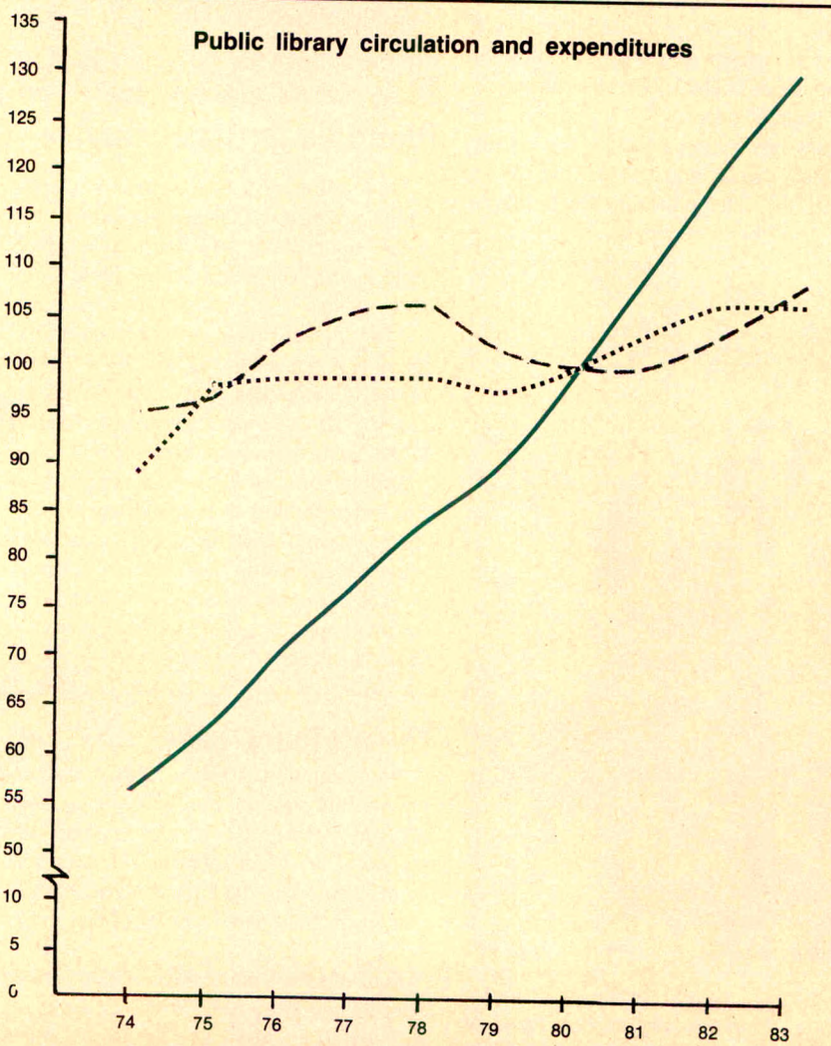
Public library circulation and expenditures



In this graph, the top, broken line represents expenditures in 1980 dollars; the middle, dotted line represents circulation; and the solid color line represents expenditures in current dollars.

MODERN SUBJECT ACCESS

In the Online Age

By Pauline A. Cochrane
with Brian Aveney and Charles Hildreth

***Subject access* is the process of finding information in a *collection of items* by *matching search words* with the *vocabulary* found in the *index or catalog records* for the collection, with *words found in the items* themselves, or with other *related words or clues* provided in the *file* being searched.**

What subject access is all about: the user

I recently read the following rhetorical question in a review of the 12th ASIS mid-year meeting:[1]

"... what difference does it make that a given search could have been better[?]"

This comment responded in part to a question from the audience about the wisdom of promoting end-user searching. The words jumped off the page at me. I almost shouted out loud: "It had better make a difference if we care about user satisfaction at all!"

The audience at this meeting was primarily information specialists trained to serve as intermediaries on DIALOG, BRS, MEDLINE, and similar online retrieval services. Many of them seriously question the development of end-user-oriented systems such as online public access catalogs, DIALOG's Knowledge Index, and BRS/After Dark, because users of these information services will need more and different training.

Most libraries will have no alternative but to train "end users" because they won't have enough library staff to "mediate" for every online catalog user. Those already involved in training online catalog users or designing online user tutorials are now talking about frequent and infrequent users, or competent and incompetent users, rather than "information specialists" or "end users." These new user-group terms will be more helpful in understanding such systems. This last lesson in our course will concentrate on the user of our subject access systems.

In Lesson Two (*AL*, March, p. 145–148+), we illustrated how catalog and index records are being transformed by computer searching systems. For example, searches by single words can be displayed online and browsed before the searcher selects bibliographic references; and related terms (more specific, more general) can automatically be shown after a search yields no results. We have easily traced these changes, but until now we could not do the same for users' search strategies. The tracking of their search paths in catalogs and indexes has been possible only in projects that used participant-observation techniques, in information-seeking case studies, or in controlled tests at the catalog or printed index.[2]

Now information from online catalog transaction logs (printouts showing each step in all searches done in a system) helps us to see how users search and to identify the obstacles they encounter during online searches. We don't identify individual users on these logs, but we can make some interesting observations nonetheless.

Nearly all online catalogs today can track how the system is being used. An example is this transaction I was able to review from a log at the Library of Congress:

Steps	User:	Computer response
1	Find publi re	0 items
2	Find s public relations	904
3	Find public relations quarterly	2
4	Find public relations, business	17

Obviously this person caught the misspelling of *public* but still sent it as a search to the online computer system. The computer responded that there was nothing in the file: 0 items. Then the user made a correct subject (s) search and retrieved 904 items! (The search was done against a file of more than one million LC MARC records.) The user immediately tried to narrow the search, first by using a known

journal title and then by adding the word *business* to *public relations*.

From the transaction log, I cannot tell whether this search could have been better from the user's point of view. The 17 items finally retrieved may have included the information being sought. However, I know the search could have been improved from a system point of view. The system response in step 1 could have been:

> "Do you mean *public relations*? If yes, there are 904 items with this subject heading. If too many items were retrieved, enter another word to combine with your first term; this will reduce the results."

Such a system response would have saved the time of the user and the system, thereby obeying Ranganathan's fourth law of library science: Save the time of the reader and the staff. The revised transaction log would look like this:

Steps	User:	Computer response
1	Find public re	[stem match; 904 items reduce results by AND (new term)]
2	business	17 items

Whether you call this a "fifth generation" system, because the computer made some inferences about what the user was trying to do, or a "user-friendly" system, I think you will agree that such improvements could be a step in the right direction for online catalogs and other information services.

Online catalog transaction logs are rich mines of raw data that must be analyzed in detail before we can understand how to improve search effectiveness and design online user training. Pioneer efforts in user training have concentrated on teaching system commands, computer terminal basics, and certain search protocols. These lessons are essential because they allow the user initial access to the online services. But as the box below (content borrowed from Charles Hildreth[3]) shows, there are several more obstacles along the path to the user's retrieval goal. Recent online catalog user studies[4] document this path. Viewing the situation from the user's point-of-view, maybe we should be asking:

The path to online catalog access

START: DOCUMENT OR INFORMATION NEED • Input/display terminal devices • search and retrieval functions • command entry techniques • database access points • entry vocabulary • index construction • system-to-user dialogue • results display manipulation and interpretation • FINISH: RETRIEVAL GOAL.

How do we contribute to or help overcome the obstacles a searcher encounters at the online information service?

Are the access points for our records and files—the entry vocabulary and references provided in our thesauri—more critical than the records themselves?

Should we adopt user satisfaction as a system goal?

How can we achieve a balanced use of scarce resources to satisfy users *and* transform the library's technical processes into an "integrated library system"?

We know from library automation literature that we can achieve many efficiencies by using one machine-readable record in a central file for different functions, such as circulation and acquisition, rather than maintaining separate files and systems for each function. We now face another challenge: to improve these systems for both staff and public use. It appears that most public users need more information about the content of a file, better access to the system vocabularies used for subject access, and an explanation of search results.

I do not see one path to improved subject access. I wish that our profession could repeat the process that occurred in the late 1960s when we reached a consensus that MARC should be the standard format for the interchange of bibliographic data. I don't see a similar consensus on what we should do to improve subject access. However, opinions from two more "experts" on the role of the Library of Congress *Subject Headings* in improving subject access present challenges as provocative as Marcia Bates's in 1977.

Unified access an obsolete concept

Why do librarians persist in the task of creating unified access to all subject areas? The idea of a common thesaurus for all fields is bankrupt. In fact, librarians ceased trying to control all literatures (e.g., journal articles) many decades ago.

Monographic literature is of primary interest to past-looking fields such as literature and history. For these fields continuity is important and LCSH should not be dramatically changed. Additional headings per title and improved syndetics do make sense since these do not impact continuity.

The model of separate orientalia catalogs and specialized tools like *Chemical Abstracts* will prevail increasingly. Libraries must look to provide access to a panoply of specialized services targeted at specific user groups. Both thesauri and searching techniques will vary from field to field.

Diversity is the model for the future. We should not waste resources dramatically overhauling a tool aimed at a diminishing portion of our constituency.

BRIAN AVENEY
Director of Research and Development
Blackwell North America
Oswego, Ore.

LCSH needs hierarchical restructuring

Experts have long pointed out the inadequacies of subject vocabularies and subject catalogs used to access library collections. But an imperative for improving subject access was not felt or heeded, perhaps because of constraints imposed by manual forms of the catalog or the belief that most searching was for "known items." Now the users of online catalogs are agreeing with the experts. Subject access is *the* problem of information access today.

The key findings on online catalog use and user preferences are easy to summarize: subject searching is the predominant searching mode; subject searching is more problematic and less likely to be successful than other searching modes; online catalog users place the highest priority for improved systems on a cluster of subject searching enhancements; and users prefer the one-stop, self-service approach when they search for information.

Subject access in the online environment is a multidimensional, multi-institutional problem (not just an LC problem). The fundamental ingredients in this problem mix are *vocabulary* and *technology*. New computer-based technologies offer a gold mine of solutions. But, as Marcia Bates feared, many designers of online catalogs have simply transferred "the austerity-based LC subject heading approach to expensive computer systems."

The online catalog design process is becoming more rational, open, and user-oriented. Designers are agreeing on desirable retrieval functions and how to present them in a more uniform, easy-to-use interface. Online catalog use is being monitored and user feedback is leading to seemingly overnight improvements. With all its shortcomings, the LC list of subject headings is the nearest thing we have to a common subject vocabulary authority system in this country. It would be unrealistic to abandon LCSH in the online catalog environment.

This is not the place to refute the claim that free-text, Boolean searching capabilities, properly used, will solve the subject access problem. This approach has and will continue to provide only partial solutions. What is needed is an enrichment and expansion of the subject content in our MARC records. Adding to MARC records subject terms based on in-depth, part-by-part indexing of new works should be a decentralized activity throughout the library community. Subject terms should derive from a restructured, consistently rule-governed LC subject authority list.

A comprehensive, standard subject authority record format must be redefined by consensus of those who must accommodate it in their online systems. The authority format in the LCSH tapes is woefully inadequate, lacking much of the information and guidance found in the printed edition of LCSH. However, before a new authority format can be defined, the call for restructuring LCSH into a hierarchical thesaurus—with broader and narrower terms—must be answered.

Many opportunities for improving our subject vocabulary system would arise during the hierarchical restructuring of LCSH. Conceptual gaps would be identified and new subject terms added. New lead-in terms (*see* references) could be added. Consistency could be achieved in the forms of subject terms and subheading patterns. The resulting syndetic structure would provide the related terms and subject vocabulary guidance users of today's online library catalogs are demanding.

CHARLES HILDRETH
Research Scientist
OCLC, Inc.
Dublin, Ohio

Summing up: questions for the profession

How would you and your colleagues respond to these comments? Can we implement a model of diversity? Can we redesign the MARC format for subject authorities?

Will we improve our focus on the obstacles to subject access if we do as Aveney suggests and no longer work to change LCSH? Should we use several controlled vocabularies together in our online catalogs? Should we change our systems from exact-match routines to freer matches with interactive searching and relevance feedback mechanisms that explain to users what is happening in a search? (This was implied in the revised transaction log mentioned earlier in this lesson.) Should we work toward linking our systems to personalized information services on microcomputers?

The questions come in a torrent when you take a broad view of subject access. If these were exam questions I could not expect you to give complete answers after such a short course; but I hope this series and especially the responses from the experts will stimulate you to ask the library and information profession to try to come up with the answers! □

1983–84 ALA Council voting record

for Annual Conference and Midwinter Meeting

1983 ANNUAL CONFERENCE - LOS ANGELES VOTE TALLY

The following is a description of the actions taken by the ALA Council at the 1983 ALA Annual Conference excluding closing debate and such housekeeping motions. Numbers correspond to those listed in the Tally.

CD#:	ACTION	Yes	No	Abst
20	AMENDED the motion to adopt SCOLE's proposed Library Education Policy by substituting the alternative policy submitted by the Executive Board.	143	10	3
EBD #51	ADOPTED Executive Board's alternate to CD#20 as ALA Policy on Library Education.	153	1	2
29.	CONCURRED in the Executive Board's recommendation that no change be made in the Constitution & Bylaws with regard to division chapters and/or affiliates.	152	3	1
36.1	APPROVED the recommended dues schedule for Organization Members (Library and Library School Members), effective 1984: Budget: Under $50,000, Dues: $70; 50,000-199,999: 110; 200,000-499,999: 330; 500,000-999,999: 550; 1,000,000-1,999,999: 770; Over 2,000,000: 900.	125	23	7
36.2	APPROVED membership perquisites for organizations joining ALA under Bylaw I.2.C.1: American Libraries, ALA Handbook of Organization and Membership Directory, eligibility for division and round table membership, eligibility for insurance, eligibility for ALANET, and discounts on library materials.	134	13	7
36.3	REQUESTED the Constitution & Bylaws Committee to make the appropriate Bylaw changes reflecting COPES and the Executive Board's recommendations on dues and perquisites provisions under Bylaw Articles I-2-C-1, and bring into conformity with I-2-C-1, I-2-C-2, I-2-B and I-2-D.	149	3	1
32	ACCEPTED the Report of the Policy Monitoring Committee on insertions to be made in the Policy Manual reflecting the Council's Midwinter policy actions.	155	-	-
34. 1-a	DEFEATED motion to refer back to the Executive Board its recommendation #1 that a change be made in the timetable governing receipt of petitions from the current four months to five months before the Annual Conference and that the Constitution & Bylaws Committee be asked to prepare the appropriate bylaw language to implement the recommendation;	7	144	1
34. 1-b	DEFEATED motion to amend by the addition of "... five months...or the last day of Midwinter;	7	138	6
34. 1-c	DEFEATED motion to adopt CD#34.1.	5	139	7
34.2	DEFEATED motion to adopt Recommendation #2 to amend the Bylaws to prohibit nominating bodies (Committee on Committees and Nominating Committees) from placing in nomination members of those committees .	46	94	10
37	APPROVED ALA Affiliation Guidelines formalizing and clarifying the process for the Executive Board's and Council's consideration of applications for affiliated status in ALA, directed that reference be placed in the ALA Policy Manual.	138	-	5
38	ADOPTED Guidelines for Authors, Editors and Publishers of Literature in the Library and Information Field prepared by the Library & Information Literature Membership Initiative Group.	136	2	3
47.1 .1a	APPROVED AND REFERRED to Constitution & Bylaws Committee proposed amendment to Constitution Article X, Section 3 by substituting the present language in order to define and make specific reference to chapters and their relationship to ALA;	145	-	5
47.1 1b	APPROVED the proposed amendment to Constitution Article X, Section 3 on first reading by the Constitution & Bylaws Committee.	146	1	2
47. 1.2	APPROVED AND REFERRED to Constitution & Bylaws Committee proposed amendment to Bylaw Article I, Section 1-B in order to define and make specific their relationship to ALA.	150	-	-
47. 1.3	APPROVED AND REFERRED to Constitution & Bylaws Committee proposed amendments to (1) Bylaw Article V, Section 1(a), Bylaw Article V, Section 1(a), Bylaw Article V, Section, Bylaw Article V, Section 1(c) in order to define and make specific their relationship to ALA and to delete outdated procedures.	147	1	-
49	APPROVED on second reading the amendment to Constitution Article IX, Section 1 which deletes the first word, and REFERRED the amendment to the Membership for ratification at the Los Angeles Conference ALA Membership Meeting.	145	-	-
35-a	AMENDED to strike "approval";	117	31	2
35-b	AMENDED motion to adopt by the substitution of Membership Resolution on Round Table Assessments seeking official consultation with round tables;	139	10	1
35-c	REFERRED CD#35 back to COPES and the Executive Board for further consideration with input from the Round Tables for a report to Council at the 1984 Midwinter Meeting.	138	10	3
43	REFERRED Bylaw Article IV, Section 2(b) to the Constitution and Bylaws Committee for amendment to permit all chapter members to vote in the election of chapter councilors regardless of membership in ALA.	126	25	2

At the 1982 Annual Conference of ALA in Philadelphia, the Council adopted a motion calling for its votes to be recorded in American Libraries *"in the most economical fashion."*

CD#:	ACTION	Yes	No	Abst
44-a	AMENDED substitute by referring to a committee composed of representatives of the 11 divisions and directing that the committee meet at Midwinter;	123	25	4
44-b	APPROVED substitution for main motion referral to a committee composed of representatives of divisions concerned with library discount practices;	103	43	4
44-c	AMENDED by substitution motion to refer CD#44 to the RTSD-AAP Joint Committee for advice and recommendation at the 1984 Midwinter Meeting;	115	18	2
44-d	REQUESTED a progress report at Midwinter 1984.	114	28	9
48	APPROVED for referral to Membership for ratification with the 1984 Ballot an amendment to Bylaw Article VIII, Section 9 on mail votes in the Executive Board and committees to include electronic system or conference calls, and to require an affirmative vote of two-thirds of the full body.	143	7	2
50	ESTABLISHED the ALA Equality Award to include a certificate and $500 supported by Scarecrow Press.	147	-	1
54-a	AMENDED PLA resolution requesting clarification of the rights of divisions in negotiating with the private sector by striking the first resolved paragraph;	137	2	11
54-b	AMENDED further to strike the whereas clauses;	126	9	14
54-c	REQESTED that the ALA Executive Board work with the divisions to clarify the rights of the divisions in negotiating with the private sector on benefits and promotions involving their respective members.	112	29	9
56	ADOPTED RESOLUTION commending Robert Wedgeworth and the National Commission on Libraries and Information Science for their support to the United States National Committee for UNESCO/PGI, affirming the continuing interest of ALA in the future work of this Committee, and congratulating Mary Corning of the National Library of Medicine on her election as Chair of the Committee .	144	-	3
59-a	AMENDED second resolved clause to include special librarians;	132	2	5
59-b	DEFEATED a motion to amend by the addition of a further resolved clause to provide for the appointment by the President of ALA of a task force to analyze the Report of the National Commission on Excellence in Education, A NATION AT RISK, to strengthen the role of libraries in the area of education and public information;	57	76	12
59-c	PLEDGED ALA's support and the support of school, public, academic and special librarians in undertaking the reform of American education and the betterment of the educational experience of American youth.	142	3	-
59.1	REAFFIRMED ALA's support for the establishment of the National Archives and Records Service as an independent agency for communication of its position to the Administrator of the General Services Administration, to the Archivist of the United States and to the appropriate committees of Congress.	141	-	3
57	BY ACCLAMATION passed Memorial Tribute to the late Eli M. Oboler.	143	-	-
60-a	VOTED to act on each COO recommendation separately;	105	2	5
60-b	AMENDED the National Library Week Committee membership to require that one of the ten members be a representative of the Public Relations Section of LAD;	77	56	11
60-c	ADDED to the number of the Membership Committee one member to represent the American Library Trustee Association and one member to represent library school students;	74	64	7
60-d	DIRECTED JMRT's Executive Committee to either eliminate its newly structured category of continuing members or prepare a revised statement of purpose to be reviewed by the Committee on Organization and recommended to Council.	102	30	13
58	BY ACCLAMATION passed a Resolotion recognizing and honoring C.J. Hoy on the occasion of his retirement expressing the Association's sincere appreciation for his long service to ALA as Conference Manager.	122	-	-
61	WENT ON RECORD against prejudiced research and ADOPTED A resolution on Department of Education Request for Proposal (closing date May 25, 1983) protesting this proposed research and urging that it not be funded, requesting that a new Request for Proposal be prepared designed to assess fairly all alternatives for funding library and information services including tax support and other traditional methods.	142	-	1
MD#4	URGED libraries to give high priority to making information available about the ongoing arms race debate and about various courses of action concerned individuals may take.	138	2	3
MD#2	RECORDED ALA's official objection to the Presidential Directive on Safeguarding National Security Information of March 11, 1983, requesting that it be rescinded, directing that ALA initiate and/or join with other groups to support efforts to have that directive countermanded and publicizing ALA's actions, and urging members and interested citizens to send letters to their legislators informing them of the present danger to the right to know requesting legislation that will nullify presidential orders which threaten that right, and urging renewed efforts by librarians to inform their communities of the dangers that threaten the right to know.	140	-	2
NaR	DIRECTED the ALA President to appoint a special committee to examine the report, A NATION AT RISK, in relationship to the ALA Goals and Priorities and report back to Council at Dallas ways in which ALA as an Association can work toward creating a learning society which recognizes and supports libraries as integral elements of that society.	136	-	-

Midwinter Meeting

1984 MIDWINTER MEETING - VOTE TALLY

The following is a description of the actions taken by the ALA Council at the 1984 ALA Midwinter Meeting excluding closing debate and such housekeeping motions. Those approved by acclamation do not appear in the Tally; Numbers correspond to those listed in the Tally.

CD#:	ACTION:	Yes	No	Abstain
NC	Directed Executive Board to clarify allegations raised by ALA Nominating Committee related to "critical evaluation by a few staff members of segments of the Committee's slate."	149	2	1
6	Adopted Policy Monitoring Committee Report on insertions made in Policy Manual as a result of Councils actions at the 1983 Annual Conference.	150	-	-
11	Approved new five year Personal Membership Dues schedule as proposed by COPES.	129	22	1
20	Established the Continuing Library Education Network & Exchange as an ALA round table.	144	-	3
MTS	Adopted by acclamation Memorial Tributes to deceased members Edmon Low, Annette Phinazee, Theodore C. Hines, Jean Elaine Wichers, Peggy Pfieffer, Elnora M. Portteus, Mae Graham, Ernest R. DeProspo.	BY ACCLAMATION		
HM	Elected to Honorary Membership Lester E. Asheim and Michigan U.S. Congressman William Ford.	BY ACCLAMATION		
32	Supported the concept of equal discounts on equal volume orders for all buyers requesting the Joint ALA-AAP Committee to transmit a request to American trade book publishers to examine their discounts to libraries to ascertain how such policy could be implemented for a report from the Joint Committee at 1985 Midwnter.	84	56	5
14.1C	Approved 2nd reading and referred to Membership for ratification in the 1984 Ballot amendment to Constitution Art. X, Sec. 3 which provides for ALA Chapters.	145	-	-
14.1B	Approved and referred to Membership for ratification in the 1984 Ballot amendment to Bylaws provisions relating to ALA Chapters.	145	-	-
14.2	Approved and referred to Membership for ratification in the 1984 Ballot amendment to Bylaws provisions relating to Organization Membership Dues & Perquisites.	45	-	-

CD:	ACTION:	Yes	No	Abstain
14.	Approved and referred to Membership for ratification in the 1984 Ballot amendment to Bylaws provisions relating to five year Personal Membership Dues schedule (implementation of CD#11 above).	139	4	2
BL 8	Directed Constitution & Bylaws Committee to update Sec. 3(b) reflecting recent Council actions affecting status of RSBRC.	145	-	-
BL 3	Directed C&B to examine Sec. 2(b) and 3(b) (petitions) and report its findings to Council at Dallas.	145	-	-
31.1	Adopted Resolution on The Role of Telecommunications in Library Service requesting Congress and FCC to reject access charges for library telecommunications pricing to create a library public-service tariff and implement any new tariff increases gradually.	143	2	-
31.2	Adopted Resolution on Reauthorization of the Library Services & Construction Act expressing appreciation to the Chairman of the House Rules Committee and offering ALA's assistance to the House in its consideration of HR2878 to revise and extend the Library Services & Construction Act.	145	-	-
31.3	Adopted Resolution on Higher Education Act Reauthorization opposing dispersal of library provisions throughout the Act but supporting it with redrafts of Title II to meet needs of academic library programs, library education and research and asking appropriate units to assist in these redraftings.	144	-	-
31.4	Adopted Resolution urging Congress to support legislation for a second White House Conference on libraries & information issues in 1989.	132	1	12
31.5	Adopted Resolution on Reauthorization of Older Americans Act in supporting legislation to add public libraries to the organizations eligible for grants under the Act.	145	-	-
31.6	Adopted Resolution on The Right to Know requesting the President and federal agencies to insure that promulgated information management policies protect and provide for equal and ready access to federally produced information.	145	-	-
31.7	Adopted Resolution on OMB's Proposed Circular on Federal Information Management reaffirming that there should be equal and ready access to data collected, compiled, produced and published by the Government and urging OMB to include this principle in the final policy circular, offering ALA assistance in its preparation.	145	-	-
31.8	Adopted Resolution regarding Senate Bill S774 opposing the full cost recovery for access to government information required by the Bill.	143	1	1
31.9a	Amendment to 31.9 substituting "study" for "establish" and striking "as a high priority matter.	137	1	2
31.9	Adopted amended Resolution on Public Lending Right Policy Formulation stating that it is in the public interest that ALA study the public lending right issue, and that full reporting on this issue be done through ALA publications, etc., reports to Council, and directing that ALA's interest be communicated to Congress and other agencies.	142	2	2
Forum	Directed that beginning with Midwinter 1985 time be scheduled following Council I for nominees to the Executive Board to present their views related to service on the Board including a question and answer period.	141	-	3
B&PA	Defeated motion asking COO to consider ways to make the Planning & Budget Assembly a more effective unit.	14	123	4
12	Defeated motion to require publication of the full text of all Council policy resolutions in American Libraries.	11	119	10
13	Adopted the California Library Association Computer Literacy Resolution which directed the Washington Office to take necessary steps to insure inclusion of public libraries in computer Bills under consideration by Congress and sought the assistance of ALA Chapters in this effort.	132	2	4
17s	Defeated substitute for 17 which would have created a council documents category to include conscience raising resolutions regarding libraries' obligations under the Library Bill of Rights.	7	123	29
17a	Amended 17 by deleting the direction that American Libraries publish the full text of two previously adopted Council resolutions on the Arms Race and the establishment of a special ad hoc committee to consider ways of making the policy operational in ALA activities.	102	29	3
17aa	Further amended 17 by adding a request that divisions having selection committees consider appropriate implementation action.	108	15	8
17	Reaffirmed with special urgency its call at the 1983 Annual Conference for libraries to give high priority to making information available about the arms race issue and actions individuals can take.	97	31	9
30	Referred to COPES Part Time Dues Category Resolution that would require COPES to create a new reduced rate personal dues category for part time professional library workers.	131	1	-
18	Commended National Endowment for the Humanities, the Andrew W. Mellon Foundation, the Rockefeller Foundation, and the H. W. Wilson Foundation for making possible the 18th Century Short Title Catalogue project, urging their continued support to match the European contribution to bring the project to a successful completion in North America.	133	-	1

CD:	ACTION:	Yes	No	Abstain
19	Requested the President of the United States to declare a National Deaf Heritage Week to be held December 2-9, 1984 to be celebrated by libraries in cooperation with the deaf community throughout the nation.	131	-	-
21a	Amended #21 by the addition of a clause expressing ALA's strong and continuing concern for the issues of press freedom which are addressed in the UNESCO Forum.	124	-	3
21	Adopted Resolution on Continued U.S. Membership in UNESCO as amended expressing ALA's regret over the President's decision, on recommendation of the Secretary of State, to issue notice of the intention of the United States to withdraw from membership in UNESCO effective December 31, 1984; and further calling upon the Secretary of State and the Director-General of UNESCO to initiate prompt, serious and productive negotiations leading to timely and satis- factory resolution of differences in order to preserve the many positive benefits of continuing U.S. participation in UNESCO.	118	7	3
24s	Substituted paragraph below for the request that COPES conduct a study and report at Midwinter 1985 on the impact on membership dues costs of a payment schedule based on salary level of ALA members.	116	6	3

24 Directed that COPES report at the 1985 Midwinter Meeting on its recently completed investigation of an ALA membership dues scale based on salaries of ALA members. — 114 — 7 — 2

26 Approved Resolution that ALA join with the American 122 - 2 Historical Association in supporting the December 27, 1983 American Historical Association resolution on security classification of historically valuable research papers used by the Federal Administration and the criteria developed in the AHA resolution.

27s Substituted new wording for CD#27 on National Security Directive 84 as stated below. — 116 — 3 — 2

27 Approved Resolution that ALA join the American Historical Association in opposing National Security Directive 84, and communicate this action to the ALA membership urging them to express to the proper government officials their strong opposition to this directive. — 117 — 2 — 5

28 Referred to the International Relations Committee a resolution that addressed to President Reagan concern over the status and locations of Grenada's archiveson. — 112 — 5 — 4

33 Approved reinstatement of the Ralph R. Shaw Award for Library Literature effective with the 1985 Annual Conference under a new sponsor, Knowledge Industry Publications, Inc. — 110 — 2 — 1

RF Extended thanks and well wishes for a happy future to retiring (January 31) Deputy Executive Director Ruth Frame. — BY ACCLAMATION

1984 ALA MIDWINTER MEETING
COUNCIL: ATTENDANCE & VOTE RECORD

x - present

Conference report cont. from p. 521.

scholars, evangelists ("not fun to be with"), drones, rising stars, and flashes in the pan. On a more serious level, she told of the personal rewards of participation in the association, the greatest of which is "the self-esteem based on the personal respect of our colleagues."

The second part of the program consisted of a panel discussion in which ALA leaders discussed their involvement in the Association and answered audience questions. Richard Dougherty, director of the University of Michigan Libraries, said he was bothered by seeing the same names running for Council every year. "There are a lot of people who are charged up and full of energy, and it's their turn." ALA Past President Thomas Galvin warned that it was very difficult to get elected as a Councilor at Large without having name recognition throughout the Association. He suggested running for one of Council's 52 chapter seats, which are selected by each state or territorial library association.

But ALA President-Elect Beverly Lynch told members seeking their initial ALA involvement, "Don't look at the Council; that isn't any fun." Lynch advised participation in the division representing the member's type of library.

June Breland, past president of JMRT, recommended JMRT as a place new members can gain leadership skills and name recognition, which can then be used to get seats on ALA committees.

A Texas Indian Cultural Heritage Society member dances at a conference powwow celebrating LSCA Title IV. The new title will award library funds to reservations. The Office for Library Outreach Services Subcommittee on Library Service for American Indian People and the American Indian LA sponsored the event.

***First-year sales** at the ALA Store in the exhibits area totaled almost $32,000.*

Poetry: Best of all microchips

ALA *Booklist* magazine.

"I think of poetry . . . as a microchip: A little bit holds a lot of meaning," *Booklist* children's books coeditor Betsy Hearne told some 100 listeners at the magazine's 1984 forum.

Hearne offered a graceful plea for using poetry with children, plus insights into choosing the most effective materials. Her colleague, coeditor Barbara Elleman, shared a small survey she had taken of poetry publishers and their library customers.

Hearne quickly established her topic as equal in importance to any at the Annual Conference: "One line [of poetry] can be worth a lifetime," she said. "To deprive children of poetry is to withhold a kind of friendship."

Referring to a June 15 *Booklist* bibliography of outstanding children's poetry collections, Hearne praised lighthearted works of Spike Milligan, John Ciardi, and Arnold Adoff, among others, reading favorite lines to the delight of the audience. On the topic of age level for comprehending poems, she remarked, "Language is always a matter of growth. If the music and meaning are there, the children will wear the poem until it fits."

Elleman, who surveyed 40 publishers and 75 librarians, received 24 and 34 replies, respectively, suggesting that: ● poetry is alive and well among several trade publishers, who issue one or two works a season; ● anthologies generally sell better than individual poets; ● about 80 percent of the librarians who use poetry with children find the response to be favorable; ● reasons for not using poetry are usually, "too busy," "not comfortable with it," and "can't find the right stuff."

To help out on the last dilemma, coeditors Hearne and Elleman will send a copy of the June 15 bibliography to anyone providing a stamped (20 cents) self-addressed envelope. Write *Booklist*, 50 E. Huron St., Chicago, IL 60611.

Tips for serving toddlers

Association for Library Service to Children Preschool Services and Parental Education Committee, with the Public Library Association Alternative Education Programs Section Parent Education Committee.

There were few wigglers among librarians listening to three hours' worth of tips on library activities for toddlers. Highlighting the program of talks and displays was Jim Trelease, author of *The Read Aloud Handbook* (Penguin) and a vigorous foe of television as a substitute for early childhood reading. Trelease described a woeful state of reading and education in the U.S., but cited as positive trends today's better story-hour materials and involvement of fathers.

Trelease, who would like to see such authority figures as pediatricians more involved in reading advocacy, urged librarians to lobby for better toddler books and create a prestigious award for same.

Among speakers offering practical tips was Rosalie Hoover of Dallas Public Library, who recommended distinct approaches for two and three-year-olds. If good materials are scarce, she said, use the most effective ones often. Along with other speakers, Hoover advised that activities be kept short, process- rather than product-focused, and physically apart from other library activities.

—From a report by Maria Rangel, ALA Student Staff member from the Calif. State Univ./LA library program

SELECTED RESOURCES FOR CURRENT AWARENESS

The Source highlights useful items in major areas of library/information activity. Send materials to department editor Gordon Flagg, American Libraries, 50 E. Huron St., Chicago, IL 60611.

microcomputing

Micros in education. *Improving Instruction with Microcomputers: Readings and Resources for Elementary and Secondary Schools* collects 41 articles on using micros in an educational setting. Editor John Tashner has grouped the readings into sections on the computer revolution, communications technology, and education; hardware and peripherals; computer languages; educational software; integrating micros into the curriculum; management applications; and preparing teachers to use micros. The 256-page paperback also includes lists of journals and organizations dealing with micros in education, a glossary, and a resource guide. $24.50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (83-42502, 0-89774-095-5).

Microcomputers in Elementary and Secondary Education: A Guide to the Resources, by Janice Resnick Levine, is an annotated listing of associations, clearinghouses, directories, periodicals, indexes, databases, reference books, and other sources of information on the topic. The 64-page booklet, a publication of the ERIC Clearinghouse on Information Resources, is $3.75 from Information Resources Publications, 130 Huntington Hall, Syracuse University, Syracuse, NY 13210.

Microcomputer Applications *in Libraries* is a guide to help library administrators select and manage hardware and software. Authors Richard M. Kesner and Clifton H. Jones provide an overview of microcomputer technology and its implications for librarians, describe the various stages of the planning and implementation process, and examine such microcomputer applications as cataloging, acquisitions, circulation, serials management, and reference services. Additional chapters cover the use of micros in special collections and archives, the interface of microcomputers with micrographics and videodiscs, and computer-assisted instruction. A glossary and bibliography round out the volume. Approx. 288 p., $29.95 from Greenwood Press, 88 Post Rd., West, Westport, CT 06881 (83-22566, 0-313-22939-2).

Computers in the Schools, a new quarterly journal from Haworth Press, is subtitled "the interdisciplinary journal of practice, theory, and applied research." Editor D. LaMont Johnson says the publication is envisioned as "a professional journal that would speak to the issues of educational computing in a friendly literary style," bridging the gap between general magazines and technical journals.

The first issue features articles on humanistic considerations in computer use, psychology and the computer revolution, equality of access to computers in education, computer-assisted instruction, and other topics.

Subscriptions are $36 for institutions and, to our dismay, $40 for libraries, with individuals receiving a special introductory rate of $17 on prepaid orders (regularly $24). U.S. orders add $2 for postage and handling, and Canadian and Mexican orders add $7. Haworth Press, 28 E. 22nd St., New York, NY 10010.

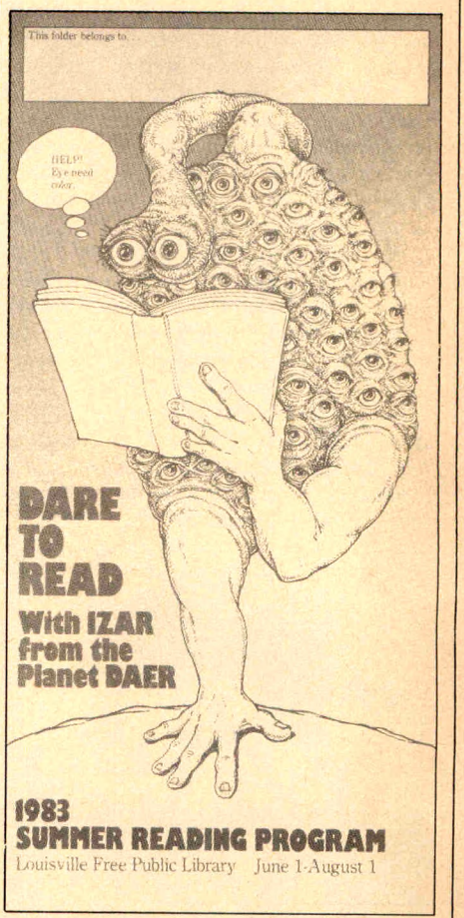
Public Access Microcomputers: *A Handbook for Librarians* is a guide to starting and maintaining a public access microcomputer program. Author Patrick R. Dewey offers advice on obtaining funding, evaluating hardware and software, allocating staff resources, promoting the service, and creating specialized local public access databases. The 150-page manual also recommends software programs for children and adults, provides case studies of libraries with public access microcomputer centers, and includes samples of grant proposals, policy statements, worksheets, and user group application forms. $34.50 cloth (0-86729-086-2), $27.50 paper (0-86729-085-4) from Knowledge Industry Publications, 701 Westchester Ave., White Plains, NY 10604.

Computer Books and Serials in Print lists over 12,000 U.S. and foreign books and pamphlets and over 1,500 magazines, periodicals, and newsletters. For books, full information (including title, author, publishers, publication date and price, and ISBN) is found in subject, author and title indexes. Serials are listed by subject and title, with complete entries appearing in the subject index only. A publishers and distributors directory provides addresses and telephone numbers for all firms included in the listings. 551 p., $49.50 from R.R. Bowker Co., POB 1807, Ann Arbor, MI 48106 (0-8352-1814-7).

publicity

Eyes of Izar win "Louie" award. The Louisville (Ky.) Free Public Library's 1983 Summer Reading Program won a public relations award sponsored by the Advertising Club of Louisville and other local groups. The library was the only nonprofit organization to receive a "Louie"—a sculptured bust of Louis XVI—for materials created without the use of a commercial advertising agency.

The program, "Dare to Read with Izar from the Planet Daer," featured Izar, a multi-eyed creature from outer space, who appeared on a poster, a cutout mask, decals, TV and radio public service announcements, and other materials. Over 18,000 children registered for the program, with over 7,000 reaching the goal of reading at least 10 books.



Izar may be promoting a public library, but he's got more pupils than most school librarians.

LPRC awards announced. The Library Public Relations Council has announced the winners of its 1983 awards for outstanding achievement in library promotion.

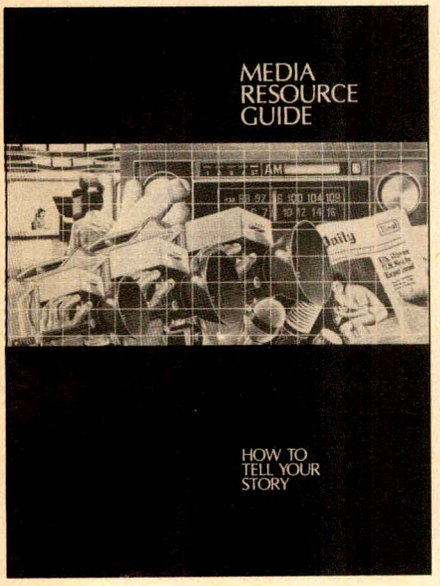
The winners for libraries serving fewer than 50,000 people were: White Plains (N.Y.) Public Library, best annual report; Oakland Park (Fla.) Library, best booklist; Ames (Ia.) Public Library, best calendar of events; Waterford Township Public Library, Atco, N.J., best newsletter; and Manhasset (N.Y.) Public Library, best program announcement.

Among libraries serving over 50,000, the winners were: Metropolitan Library System, Oklahoma City, Okla., best annual report; Brown County Library, Green Bay, Wisc., best booklist; Corn Belt Library System, Normal,

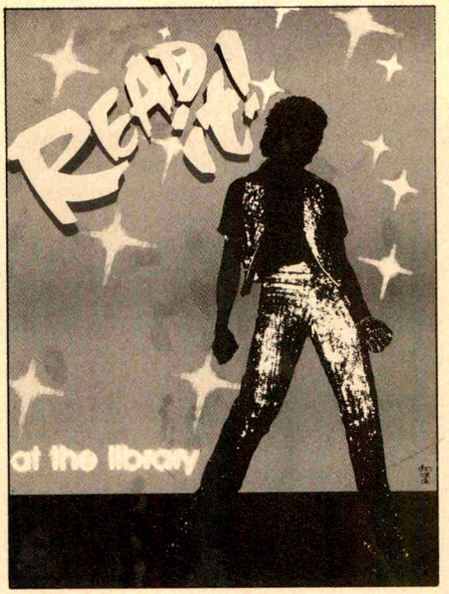
Ill., best calendar of events; and Lincoln Library, Springfield, Ill., best program announcement. The awards were presented on June 24 during ALA Conference.

Marketing for Libraries *and Information Agencies: A Reader* applies the marketing concepts traditionally used by business to the nonprofit field of libraries, emphasizing client needs rather than the selling of an existing product. Eleven essays, edited by Darlene E. Weingand, deal with marketing theory, the development of replicable marketing models, and the application of marketing principles to practical situations. Specific areas addressed include library advertising, marketing in public and academic libraries, and the use of microcomputers for marketing. 130 p., $24.50 from Ablex Publishing Corporation, 255 Chestnut St., Norwood, NJ 07648 (83-25793, 0-89391-155-0).

Using the media. *The Media Resource Guide: How to Tell Your Story* tells organizations how they can use the news media to their advantage. The 32-page paperback offers suggestions on writing news releases, preparing public service announcements, holding press conferences, establishing one's self as a source of information, being an effective interview subject, placing "op-ed" articles in newspapers, and making broadcast editorials. $5 plus $2 shipping from the American Council for the Arts, 570 7th Ave., New York, NY 10018.



The Unabashed Self-Promoter's Guide is aimed at individuals and organizations who want to sell a product, service, or message to the public. Author Jeffrey Lant provides breezily written advice on such areas as producing a media kit, making media contacts, giving print and broadcast interviews, generating articles, and using publicists. And, to set the volume apart from other publicity handbooks, it contains tips on such matters as crafting a "quintessential American success image" (e.g. "The Underdog" or "The All-American Mother"). 366 p., paper, $30 plus $1.50 shipping from JLA Publications, 50 Follen St., Suite 507, Cambridge, MA 02138 (0-940374-06-4).



If you can't Beat It . . . A limited number of copies of this color, 17½-by-23-inch poster are available for $5 each from the West Virginia Library Commission, Cultural Center, Charleston, WV 25305.

Free library P.R. manual. Data Phase Corporation is offering library directors free copies of its new public relations manual. *A Guide to Public Relations for Your Library* describes ways libraries can apply public relations tools and techniques to their activities. Among the devices covered are press kits, news releases, feature stories, press conferences, direct mail, and public service announcements. To obtain the 28-page manual write Data Phase Corporation, 9000 W. 67th St., Shawnee Mission, KS 66202 or phone 913-262-5100.

management

Issues in Library Management: *A Reader for the Professional Librarian* is aimed at library managers, educators, and library school students. Among the nine essays, taken from previously published volumes in Knowledge Industry's Professional Librarian series, are "Planning Decision Tasks and Information Needs," "A Database Approach to Decision Support," "The Ideal Acquisitions System," "Developing Preservation Programs in Libraries," and "Basic Publicity Techniques for Public Libraries." 184 p., $34.50 cloth (0-86729-095-1), $27.50 paper (0-86729-094-3) from Knowledge Industry Publications, 701 Westchester Ave., White Plains, NY 10604.

The ups and downs of management. *Managing Up, Managing Down* tells middle managers how to handle both their bosses and their staffs. Authors Mary Ann Allison and Eric Allison provide practical advice on such matters as winning management backing for your ideas, saying "no" to your boss, motivating staff to peak performance, choosing a leadership style, hiring and firing, and delegating authority. The 222-page paperback is $7.95 from Simon & Schuster, 1230 Avenue of the Americas, New York, NY 10020 (83-27214, 0-346-12639-8).

A handbook helping hand. *The Handbook Handbook* is a detailed, illustrated guide to every aspect of producing employee manuals, training materials, and other policy and procedure manuals. The 305-page volume describes types of handbooks, the selection of handbook staff, formatting techniques, the use of graphics and case examples, the design of forms, tables of contents and indexes, reproduction, distribution, revision and maintenance, and other points. Author A.B. Travis even provides a complete 40-page sample handbook for quick reference. $37.95 from R.R. Bowker, POB 1807, Ann Arbor, MI 48106 (83-21473, 0-8352-1869-4).

Do We Really Need Libraries? publishes the proceedings of last year's first Library Association/Cranfield Institute of Technology Conference on Performance Assessment. The theme running through the eight papers and five shorter presentations is that unless library managers are able to clearly demonstrate user benefits, funding decisions will be subject to attack. The 148-page paperback is £9.95 from Cranfield Press (Management Library), Cranfield Institute of Technology, Cranfield, Bedford MK43 0AL, England. Make checks payable to CIT (0-902937-91-X).

Automation guide. *The Library Manager's Guide to Automation* is a handbook for the planning, selection, and implementation of automated library systems for acquisitions, cataloging, circulation, serials, and other applications. Author Richard W. Boss has updated his 1979 first edition to reflect recent developments in hardware, software, and data communications, and to encompass emerging technologies such as the microcomputer, videodisc, and videotext. Appendixes list sources for products and services and define terms that are frequently used in vendors' literature. 169 p., $36.50 cloth (0-86729-052-8), $27.50 paper (0-86729-051-X) from Knowledge Industry Publications, 701 Westchester Ave., White Plains, NY 10604 (83-19886).

Occasional papers reissued. The Association of Research Libraries Office of Management Studies has reissued three early publications from its Occasional Papers series.

"Planning Aids" (Occasional Paper no. 1, originally published in 1971) gives library directors a planning approach for dealing with managerial problems. "Goals and Objectives" (no. 3, 1974) offers principles and guidelines for libraries to use in developing general mission statements as well as more specific goals. "Online Bibliographic Search Services"

(no. 4, 1976) covers staffing, training, organization, costs, impact on public services, and other areas.

Each paper is $8 prepaid from the Office of Management Studies, Association of Research Libraries, 1527 New Hampshire Ave., N.W., Washington, DC 20036.

The Management of Sci-Tech Libraries, edited by Ellis Mount, contains 12 essays describing the administration of scientific and technical libraries in academic, public, federal, and corporate library settings. Originally published as vol. 4, nos. 3 and 4 of *Science and Technology Libraries,* the collection covers such areas as staffing, budgeting, and personnel problems. Approx. 185 p., $24.95 cloth (0-86656-280-X), $9.95 paper (0-86656-284-2) from Haworth Press, 28 E. 22nd St., New York, NY 10010 (84-6615).

librarian's library

Librarians' lives. A contemporary librarian and a major 19th-century bibliographer are the subjects of two new titles from Scarecrow Press.

Confessions of a Lapsed Librarian contains memoirs by R.C. Benge dealing with his life as a librarian and library educator in Britain, the West Indies, and Africa. Professional issues are the focus of only two chapters, on information science and libraries in Africa; the remainder of the work covers such diverse topics as the author's service in the infantry in World War II; his teaching career in Britain, Trinidad, Ghana, and Africa; and his observations on race, sex, class, and ideology in the Third World. 223 p., $29.50 (83-20312, 0-8108-1672-5).

Often called the founder of modern bibliography, Henry Bradshaw is examined by author Roy Stokes in volume six of Scarecrow's Great Bibliographers Series. *Henry Bradshaw, 1831–1886* details the life and works of Bradshaw and offers a checklist of his writings. The major portion of the 272-page volume is devoted to examples from Bradshaw's works, demonstrating his methodology and his approach to manuscripts and early printed books. $22.50 (83-20445, 0-8108-1679-2). Scarecrow Press, POB 656, Metuchen, NJ 08840.

Writers-in-residence. *Writers in the Public Library* recounts Sheila Nickerson's experiences as writer-in-residence for the Alaska State Library. The former Alaska Poet Laureate and Library of Congress Poet-in-Residence describes a year spent traveling the state by ferry and plane, working in libraries in settings ranging from large cities to small fishing villages. The second part of the book examines residency programs sponsored by other public libraries and by writing and arts organizations, and gives guidelines and resources for setting up residency programs and promoting writing. 276 p.,$24.50 from Shoe String Press, POB 4327, Hamden, CT 06514 (83-14859, 0-208-01872-7).

New Options for Librarians, edited by Betty-Carol Sellen and Dimity S. Berkner, offers tips on turning library skills into jobs in related fields. The 300-page paperback opens with a survey of people working outside traditional library settings, followed by background information for those considering a career change or job search and chapters describing such fields as contract library services, information brokering, networks, publishing, information management, book and serial vending, abstracting and indexing, and professional associations. $19.95 from Neal-Schuman Publishers, 23 Cornelia St., New York, NY 10014 (83-22143, 0-918212-73-1).

Collection development collection. Collection development statements from 10 academic and 14 public libraries are reprinted in the new second edition of *Library Acquisition Policies and Procedures*. Compiler Elizabeth Futas also provides selections from over 60 other policies, arranged by such categories as community analysis, clientele, networking, gifts, confidentiality, and evaluation.

In surveying collection development policies, Futas found a greater emphasis on formula budgeting, collection maintenance, and other quantitative areas in the six years since the book's first edition. Less emphasis is now being placed on theoretical areas such as abstract goals and objectives, selection principles, and intellectual freedom. 579 p., $38.50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (82-42925, 0-89774-024-6).

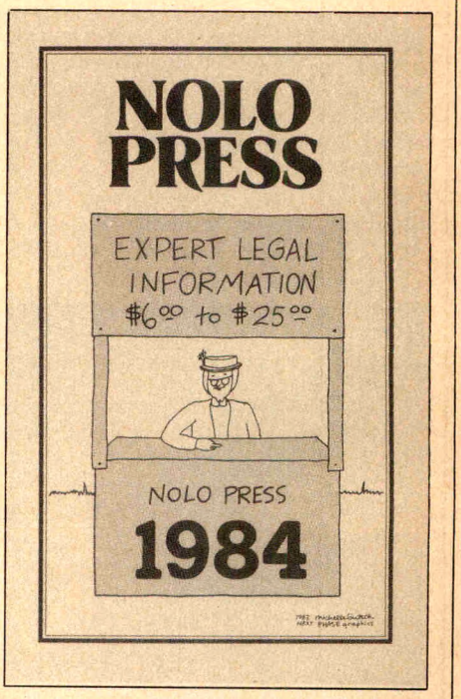
resources

Law for the layperson. The publishers of *The Legal Research Manual,* by Christopher G. Wren and Jill Robinson Wren, originally thought the legal procedures guidebook would appeal only to law students and confined their publicity to the legal community; however, word-of-mouth has prompted orders from lobbying and public interest groups, social workers, paralegals, and other lay readers.

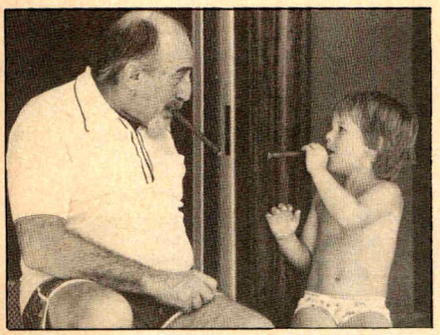
The manual uses simple, direct language, flowcharts, and checklists to cover the steps in legal research and analysis, including gathering and evaluating facts, identifying and organizing the legal issues, and finding and analyzing applicable laws. 197 p., paper, $8.95 plus $1.90 shipping from A-R Editions, 315 W. Gorham St., Madison, WI 53703 (0-89579-185-4).



Nolo Press publishes a line of self-help law books aimed at the layperson. Titles from its recent catalog include *The Living Together Kit, Sourcebook for Older Americans: Income Rights and Benefits, Bankruptcy: Do It Yourself,* and *Legal Care for Your Software*. For a free copy of the illustrated, 25-page catalog write Nolo Press, POB 544, Occidental, CA 95465.

Provocative posters. Social Graphics publishes color posters that vividly depict controversial issues. The firm offers an arms race poster graphically conveying the destructive power of nuclear weapons, the cost of maintaining arsenals, and other arguments of the disarmament movement; and a social stratification poster disputing the view that most Ameri-

cans are "middle class" by showing the great variations of income and occupations. The arms race poster is $5 and the stratification poster $6; accompanying booklets for each poster are $2.50; both posters and booklets are $14.50. Add $1.50 shipping to all orders and a $1 billing charge if not prepaid. Social Graphics, 1120 Riverside Ave., Baltimore, MD 21230.



Fatherhood U.S.A. is a nationwide guide to a wide variety of resources for and about fathers. The 322-page paperback lists programs for expectant and new fathers, courses on fathering and male roles, support and discussion groups, fathers' rights organizations, resources on alternative work schedules and parental leave, books and other publications, and many more items. $14.95 from Garland Publishing Co., 136 Madison Ave., New York, NY 10016 (84-7986, 0-8240-9012-8).

For those who dote on quotes, a pair of new titles collect notable quotations from two Great American Institutions—sports and business.

Sports Quotations, edited by Andrew J. Maikovich, contains 1,782 quotations arranged by type of sport, from auto racing to yachting. In addition to quotes from famous athletes and sports figures ("It ain't over till it's over" —Yogi Berra; "I'm gonna have to be killed before I lose and I ain't going to die easy" —Muhammad Ali; "Close don't count in baseball. Close only counts in horseshoes and grenades"—Frank Robinson), the 168-page volume includes selections from such nonfans as H.L. Mencken ("I hate all sports as rabidly as a person who likes sports hates common sense."). Author and subject indexes. $15.95 from McFarland and Co., POB 611, Jefferson, NC 28640 (83-20005, 0-89950-100-1).

Guaranteed to confirm your worst suspicions about capitalism, *The Official MBA Handbook of Great Business Quotations,* by Jim Fisk and Robert Barron, is a slim, humorous volume offering words of wisdom from such business leaders as J.P. Morgan, Jr. ("If you have to ask how much it costs, you can't afford it."), Joseph P. Kennedy ("Don't get mad, get even."), and J.P. Getty ("The meek may inherit the earth, but not its mineral rights."). Opposing viewpoints are provided by figures ranging from Abbie Hoffman ("Work is the only dirty four-letter word in the language.") to Ernest Hemingway ("The rich are dull and they drink too much."). 128 p., paper, $5.95 from Simon & Schuster, 1230 Avenue of the Americas, New York, NY 10020 (0-671-50318-9).

systems

Online catalog for small libraries. UTLAS (University of Toronto Library Automation Systems) has introduced a microcomputer-based online public access catalog designed especially for small libraries. InfoQUEST operates on an IBM PC or PC-compatible machine and handles up to 25,000 records using hard disk storage. Users of InfoQUEST can download records directly from the UTLAS Catalogue Support System (CATSS) without additional data input or updating. System users also have access to the online authority structure of CATSS, which features extensive cross references to aid name and subject searching.

UTLAS recently opened a U.S. office: UTLAS Corp., 701 Westchester Ave., Suite 308W, White Plains, NY 10604.

Cuyahoga completes conversion. The four regional libraries and 23 branches of the Cuyahoga County (Ohio) Public Library are online with the ULISYS circulation system offered by Universal Library Systems. Between October 1982 and June 1984 the Cuyahoga system entered records for more than 1.6 million items (350,000 titles) into the database and also barcoded the items. Cuyahoga County PL has an average daily circulation of 16,500. Eighty-eight ULISYS terminals are connected to a Digital VAX 11/780 computer that supports full MARC records and an OCLC interface for adding new records to the database.

Standard for system commands. A standard specifying vocabulary, syntax, and semantics of a command language for interactive information retrieval systems is being considered by Subcommittee G of the national Information Standards Organization (Z39). Such a command language would allow searchers to use different online systems without learning a separate command language for each. The proposed standard will apply to all types of systems and databases that use commands, including numeric, chemical, and bibliographic databases, and online catalogs. However, the standard will not prescribe the commands a system must use; system designers will choose the types and number of commands appropriate to their systems. Charles Hildreth of OCLC is chairing Subcommittee G.

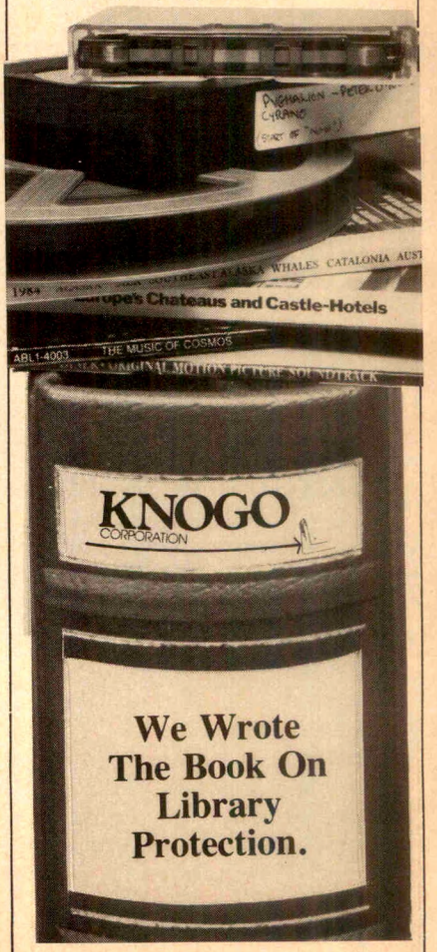
MELVYL reaches million mark. The Division of Library Automation (DLA) for the nine-campus University of California system recently celebrated the addition of the one-millionth record to MELVYL, the online catalog that contains monographic holdings of libraries on the nine campuses. The millionth record was *Studies in Elizabethan Drama,* by Percy Simpson, a book held by the UC/Irvine library. All available machine-readable records

The more your library has to protect, the more you need KNOGO protection.

A KNOGO electronic article surveillance system can discreetly and effectively protect your library from losing as much as 10% of your books, tapes, records and cassettes to pilferage every year.

KNOGO systems have been proving themselves in worldwide applications for almost two decades. And that's no surprise, since we were the ones who designed and introduced electronic article surveillance in the first place.

For full information and a free proposal on a complete KNOGO Library Protection System, call toll-free 1-800-645-4224, or in New York (516) 822-4200.



100 Tec St., Hicksville, N.Y. 11801

OFFICIAL NATIONAL ARCHIVES
RECORDS ARE NOW AVAILABLE ON A RENTAL BASIS.

THE NATIONAL ARCHIVES HAS RE-INTRODUCED ITS CENSUS MICROFILM LENDING PROGRAM. CENSUS SCHEDULES AND SOUNDEX FROM 1790 THROUGH 1910 AND AMERICAN REVOLUTIONARY WAR RECORDS ON 16MM AND 35MM MICROFILM ARE AVAILABLE FOR A LOW RENTAL FEE OF $2.25 PER ROLL.

THE NEW ROGRAM OFFERS:
- FAST ORDER TURNAROUND
- EFFECTIVE ORDER SCHEDULING
- ORDER CONFIRMATION
- A TWO WEEK USAGE PERIOD
- OFFICIAL NARS MICROFILM

THIS PROGRAM IS OPERATED EXCLUSIVELY THROUGH LIBRARIES AND GENEALOGICAL ORGANIZATIONS. YOUR PARTICIPATION IS ENCOURAGED.

DETAILS ARE AVAILABLE FROM THE CENSUS MICROFILM RENTAL PROGRAM, P.O. BOX 2940, HYATTSVILLE, MD 20784.

MCGREGOR MAGAZINE AGENCY
Mount Morris, Illinois 61054

from the UC campuses will be entered into MELVYL by fall, bringing the total number of records in the database to more than 2 million. The MELVYL database is stored and maintained at the DLA computer center on the Berkeley campus. The other eight campuses access the system through a telecommunications network and send tapes of records to DLA for updating, processing, and entry to MELVYL. DLA plans to expand the telecommunications network into a system capable of supporting 1,600 terminals through use of communications satellites.

OCLC "Enhances" quality control. Twenty OCLC member libraries are editing and replacing substandard OCLC records in three formats through OCLC's new "Enhance" capability. Enhance was designed to improve the usefulness of records and the overall quality of cataloging in the OCLC database, as well as to reduce the number of change requests submitted by OCLC members and staff.

Enhance participants can modify and replace any record in the database with the exception of LC MARC II records. OCLC expects the Enhance libraries to modify over 50,000 records per year.

Among the 20 libraries selected for the Enhance program from 66 applicants are Indiana University, which can enhance records in the books, scores, and sound recordings formats; Oberlin College, scores and sound recordings; and the Universities of Illinois/Chicago, Pittsburgh, and Florida, University Microfilms International, and Vanderbilt University, books format only. Other participants include federal libraries, private and state universities, and special libraries.

Two firms create Data Share network. A network to carry library information to homes, businesses, and educational institutions will be developed in a joint venture by Data Phase Corp. and Uninet, Inc., it was announced at the ALA Annual Conference in Dallas. The developers plan to set up the system architecture by February, enabling the Uninet international public data network to carry information between all types of participating libraries and community users.

special services

A Guide for the Disabled Traveler is aimed at individuals with mobility problems, including people who are blind or deaf. Author and wheelchair traveler Frances Barish provides specifics about entrances, ramps, elevators, and door widths in hotels, restaurants, attractions, airports, and train and bus stations in 15 major cities in the U.S., Canada, and Europe. The 362-page paperback, part of the Frommer Travel Series, also includes tips on trip preparation, information on obtaining cars with hand controls or vans with wheelchair lifts upon arrival, and phone numbers of organizations that can help in an emergency. $10.95 from Simon & Schuster, 1230 Avenue of the Americas, New York, NY 10020 (0-671-47359-X).

The next best thing to being there. The DeKalb Library System in Decatur, Ga., offers residents of the five-county metropolitan Atlanta area a 24-hour "Dial Book" service. The service allows the elderly, disabled, and others unable to attend book talks held at libraries to hear capsule book reviews by dialing 296-BOOK. Among those contributing reviews during one month last year were DeKalb County's U.S. Representative, the director of the Public Libraries Division of the Georgia Department of Education, and the director of the library system.

The Viewscan Text System opens up learning and employment opportunities for the visually impaired by enabling them to read printed text, type and print out correspondence or notes, store text on microcassette tapes, and access databases. The portable, battery-operated system, consisting of a keyboard unit, display screen, and miniature scanning camera, fits into a standard briefcase. Sensory Aids Corporation, Suite 110, White Plains Office Centre, 205 W. Grand Ave., Bensenville, IL 60106.

Programs for the elderly. Ways to design library programs that encourage the active participation of older people are suggested in *Developing Arts and Humanities Programming with the Elderly*. Author Ronald J. Manheimer presents basic facts and figures on the elderly, describes six model programs, covers essential elements such as budgeting and program delivery, and lists print and organizational resources. The 13-page brochure, the second in the Adult Services in Action series sponsored by ALA's Reference and Adult Services Division, is $2.95 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-25864, 0-8389-5656-4).

Bilingual subject headings. *Bilindex*, a Spanish-English subject headings thesaurus, provides standardized Spanish equivalents to over 13,000 current Library of Congress subject headings. The result of a seven-year project of the California Spanish Language Data Base and other groups, *Bilindex* expands and updates the Organization of American States' *Lista de Encabezamientos de Materia* and Gloria Escamilla's *Universidad Nacional Autónoma de México List*. The volume includes an explanatory preface, cross references, scope notes, standard subdivisions, an English-to-Spanish index, regional variants, and technical terms.

$65 plus $2 shipping from the California Spanish Language Date Base, POB 4273, Berkeley, CA 94704 (83-25285, 0-915745-00-3).

Children's Braille Book Club. The National Braille Press, Inc., has received a donation from the Houghton Mifflin Company to start the Children's Braille Book Club, giving parents the opportunity to purchase braille titles at the same prices as the standard print versions. The braille editions contain the original printed text and illustrations with plastic braille overlays, allowing parent and child to read together.

Members will receive monthly notices in print and braille describing the featured selections, aimed at children from preschool through third grade and costing between $6.95 and $7.95. For more information write the Children's Braille Book Club, c/o the National Braille Press, Inc., 33 St. Stephen St., Boston, MA 02115.

Financial aid for minorities. Over 850 programs aimed at members of minority groups are identified in *The Directory of Financial Aids for Minorities, 1984–1985*, by Gail Ann Schlachter. The handbook describes scholarships, fellowships, loans, grants, awards, and internships for Asian-Americans, blacks, Hispanics, and Native Americans. Most of the programs offer financial assistance for education, but awards for research, travel, career development, and other activities are also included. The 305-page guide also lists state sources for information on educational benefits, an annotated bibliography of other print resources, and indexes by program title, sponsoring organization, geographic location, subject, and application deadline. $35 from ABC-Clio Information Services, POB 4397, Santa Barbara, CA 93103 (83-21226, 0-87436-371-3).

bibliography

The Protection of the Library *and Archive: An International Bibliography* lists articles, books, reports, conference proceedings, and other items on guarding materials from loss or damage. The 1,082 entries are grouped chronologically within such categories as earthquakes, fire, flood and water damage, security systems, mutilation, theft and loss, and warfare. The 183-page volume, edited by Martin H. Sable, was also published as vol. 5, nos. 2 and 3 of *Library and Archival Security*. $19.95 from Haworth Press, 28 E. 22nd St., New York, NY 10010 (83-17169, 0-86656-246-X).

Black women's psychology. *The Psychology and Mental Health of Afro-American Women: A Selected Bibliography*, by Glenell S. Young and Janet Sims-Wood, includes citations on achievement, behavior, depression, stress, sex roles, and other aspects of black women's psychological development. The entries are grouped by format—books, articles in books, journal articles, and theses and dissertations—with an extensive subject index. 112 p., paper, $6.95 from Afro Resources, Inc., POB 192, Temple Hills, MD 20748 (83-51604, 0-915549-00-X).

U.S. Government Directories, *1970–1981: A Selected, Annotated Bibliography* describes 575 depository titles available from the Government Printing Office, organized by broad subject category and arranged by SuDocs number within each section. Viewing directories in a broad sense to encompass lists of places (such as national parks and historic landmarks) and laws and regulations, compiler Constance Staten Gray also includes guides to associations and organizations, government agencies, businesses and industries, and individuals. The 272-page volume also contains subject and title indexes and appendixes with information on regional federal depository libraries, the *Publications Reference File*, U.S. government bookstores, and issuing agencies. $35 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-26801, 0-87287-414-1).

Sources on the Revolution. *Revolutionary America, 1763–1789: A Bibliography* is the latest in a series of publications from the Library of Congress celebrating the nation's Bicentennial. Compiled over a 10-year period, the massive work contains 14,810 entries—many of them annotated—listing 20,000 titles in the library's collections. Organized in 12 topical and chronological chapters, the guide covers research aids, general studies of the period, and works on specific periods and subjects. The final chapter lists works by and about 2,138 participants in the Revolution.

The guide also includes an index to persons and places containing nearly 100,000 entries and a lengthy essay by compiler Ronald M. Gephart on the preservation and publication of documentary sources on the Revolution. 2 vol., 1,672 p., $38 from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (stock no. 030-000-00125-7).

Nukes from both sides. *The Nuclear Power Debate* is a bibliography of non-technical, general-interest books published on nuclear power during the past 10 years. Compiler Jerry W. Mansfield has arranged the 129 entries into three sections encompassing pro-nuclear, anti-nuclear, and neutral treatments of the subject. Each title is given full bibliographic data and a lengthy annotation. Subject, title, and author indexes are included. 93 p., $18 from Garland Publishing, Inc., 136 Madison Ave., New York, NY 10016 (83-48255, 0-8240-9102-7).

A novel bibliography. Full listings of the novels written by major and many minor English-language authors are supplied in *The Twentieth-Century Novel in English: A Checklist*. Compiler E.C. Bufkin has revised his 1967 first edition to include additional titles by writers who have published most or all of their work since 1900. 182 p., $20 from University of Georgia Press, Athens, GA 30602 (83-6598, 0-8203-0685-1).

Gisela M. Webb

Blane Dessy

Arlene Schwartz

Andrew J. Golub

Sept. 1 ALA member **Gisela M. Webb** will become assistant director of libraries for personnel services at Texas Tech University Library, Lubbock. . . . July 16 ALA member **Blane Dessy** became deputy state librarian for library services at the State Library of Ohio, Columbus. . . . May 21 **Arlene Schwartz** became special assistant to the county librarian of the Los Angeles County (Calif.) Public Library. She last served as Manager of ILLINET's (Illinois Library and Information Network) Bibliographic Data Base Services, headquartered in the Illinois State Library, Springfield. . . . **Andrew J. Golub** is now university librarian at the University of New England, Biddleford, Maine. . . . The new director of the Dallas (Tex.) Public Library is **Patrick M. O'Brien**, former executive director of the Cuyahoga County Public Library, Cleveland, Ohio. O'Brien is also the new president-elect of ALA's Public Library Association. . . . In July ALA Councilor-at-Large **Alan E. Schorr** became university librarian at California State University/Fullerton. . . . **Ruth J. Person** has been appointed associate dean of the School of Library and Information Science at the Catholic University of America, Washington, D.C. Person and **George C. Newman**, library director at the State University College of New York at Buffalo, recently received a grant from the Council on Library Resources to study the selection process of university librarians. Both are ALA members. . . . June 1 ALA member **Deborah Brown** became collection management coordinator at California State Polytechnic University, Pomona. . . . In July **Richard T. Sweeney** became dean of library and information services at the Polytechnic Institute of New York in Brooklyn. An ALA member, Sweeney was formerly executive director of the Public Library of Columbus and Franklin County (Ohio). . . . Among librarians recently receiving special recognition for their achievements are: **Effie Lee Morris**, **Germaine Krettek**, **Victor Neuburg**, **William Miles**, **William J. Welsh**, and **Clara Jones**. Morris, whose distinguished career includes pioneering children's library services to the blind and physically handicapped and cofounding the Black Caucus of ALA, is 1984 recipient of the Women's National Book Association Award. Krettek, former associate executive director of ALA's Washington (D.C.) office, was honored by her hometown of Council Bluffs, Ia., with the Heritage award. Neuburg and ALA member Miles won fellowships from the American Antiquarian Society to pursue special projects in American history and culture: Neuburg, senior lecturer at the Polytechnic of North London (England) library school, for work on "Ballads and Chapbooks in Early America"; and Miles, professor/bibliographer at Central Michigan University's Clarke Historical Library, Mount Pleasant, for "History and Bibliography of American Presidential Election Campaign Newspapers." Both Welsh and Jones received honorary doctorates from their alma maters: Welsh, who is Deputy Librarian of Congress, was awarded a doctor of laws from the University of Notre Dame, Ind.; and Jones, former head of the Detroit (Mich.) Public Library and 1976/77 ALA president, received a doctor of humane letters from Spelman College, Atlanta, Ga., in a ceremony that also honored Coretta Scott King and Cicely Tyson. . . . ALA member **James Rice** has been appointed associate professor in the School of Library and Information Science at the University of Iowa, Iowa City. . . . Among the new library association presidents-elect are: ALA member **Lelia Saunders** (District of Columbia), **Betsy Wilkens** (Conn.), **Mary Jennings** (Alaska), **Toni Peterson** (Art Libraries Society of North America), and **Adele Lerner** (Council of National Library and Information Associations). . . . ALA member **Helen Howard** is now director of the McGill University library school in Montreal, P.Q. . . . Westchester (N.Y.) Library System director **Maurice J. Freedman** recently completed a tour of Turkey, Italy, and Czechoslovakia, where he consulted with library professionals as part of the United States Information Agency's American Participants program. The USIA chose him for his expertise in library automation and background in public library service. An ALA Councilor-at-Large, Freedman received the LITA/Gaylord Award for Achievement in Library and Information Technology from ALA's Library and Information Technology Association in 1981. . . . Ohio State University, Columbus, recently appointed two ALA members to its library staff: **Jay Ladd** as assistant director of libraries for Department and Undergraduate Libraries, and **William J. Crowe** as assistant director of libraries for technical services. . . . **Margaret D. Bauer** is now executive director of the Pennsylvania Library Association, succeeding **Diane Ward**, who resigned in January. Both are ALA members. . . . June 22 ALA member **Edward J. Jennerich** resigned as dean of the School of Library Science and Instructional Technology at Southern Connecticut State University, New Haven. . . . ALA member **Patrick R. Dewey** is now administrative librarian of the Maywood (Ill.) Public Library. He last served as librarian of the North-Pulaski branch of the Chicago Public Library, where he founded a microcomputer center complete with an electronic bulletin board accessible during the library's off-hours. . . . **Richard Dick**, former executive vice president and cofounder of Avatar Systems, Inc., is now director of local systems and microcomputer applications at OCLC. From 1978 to 1981, Dick served at the Lister Hill National Center for Biomedical Communications at the National Library of Medicine, Bethesda, Md., where he was project leader for design and development of the Integrated Library System (ILS). . . . ALA member **Shirley Hallblade** is now associate director of the Vanderbilt University Library, Nashville, Tenn. . . . In June ALA member **William DeJohn** became director of MINITEX (Minnesota Interlibrary Telecommunications Exchange), located in Wilson Library at the University of Minnesota, Minneapolis. . . . At the Library of Congress **Robert Fitzgerald** recently became LC Consultant in Poetry and **Harriet L. Oler** was appointed chief of the Copyright Examining Division. . . . ALA member **Deane W. Hill** retired on June 1 as director of the Instructional Materials Center of the School of Education, University of Wisconsin/Madison. . . . **Earl J. Kunz** recently became assistant deputy director in charge of technical services at Buffalo & Erie County (N.Y.) Public Library. He succeeded **Wallace D. Mohn**, who became a deputy director. . . . **Edward G. Holley**, 1974/75 ALA president, has announced his plans to retire as dean of the School of Library Science at the University of North Carolina at Chapel Hill, effective June 30, 1985. He will remain at the library school as professor of library science. . . . ALA member **David Price**, former director of library, television, and convention services for the city of Aurora, Colo., is now deputy city manager for administrative and information services for Aurora. Price's new duties include overseeing library services along with the functions of several other city departments. . . . **Barbara Doyle** has been appointed resource development consultant at the Colorado State Library, Denver. . . . ALA member **Michael Steinfeld** is now town librarian and director of the Brookline (Mass.) Public Library. . . . July 1 **Jean M. Tague** became dean of the University of Western Ontario's library school in London.

Deaths

Theresa A. Carroll, former town librarian of the Brookline (Mass.) Public Library, died May 7. . . . **Valmai Kirkham Fenster**, assistant professor of library science at the University of Wisconsin/Madison Library School and author of the 1983 work, *Guide to American Literature*, died May 13. UW-Madison has established a scholarship fund in her memory. . . . **Estellene P. Walker**, 71, who spearheaded the expansion of public library services to all of South Carolina, died May 15. Among her achievements as executive secretary of the South Carolina State Library Board and later as state librarian were the establishment of countywide public library service throughout the state, the extension of library service to the blind and physically handicapped and to state institutions, and the development of a statewide interlibrary loan network. She also served as president of both the Association of State Libraries and the South Carolina Library Association. . . . **Joseph W. Rogers**, former chief of the Copyright Cataloging Division at the Library of Congress, died May 15. He was a past ALA Councilor-at-Large and president of the District of Columbia Library Association. □

The great divide.

Faxon's new divisions reward you with better service.

With the formation of our four new divisions, you now get the individual attention of someone familiar with your needs along with access to the vast resources commanded by Faxon.

More than 100 years of dedicated service to libraries have put Faxon at the forefront of the information frontier. We were the first agency to completely automate subscription management. First to develop an international online network. First to establish online links with major publishers.

We'll give you an edge on tomorrow. A frontier we conquer by not resting on our laurels.

How to cut out the most frequently asked question about the world's best-selling encyclopedia.

This way to World Book.

"Which way to *World Book*?" is a popular question around libraries for good reason. According to librarians, it's because *World Book* is the most frequently used encyclopedia in print.

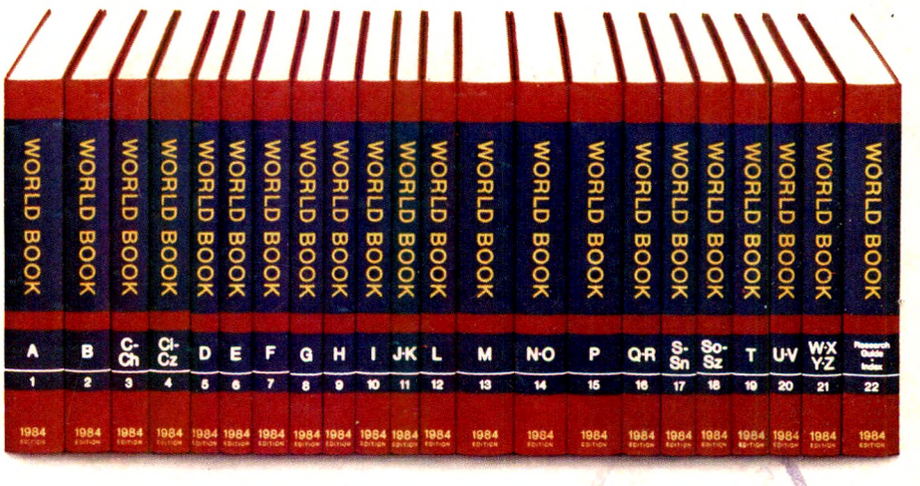
What makes *World Book* so appealing? According to a recent review by the editorial board of *Reference Books Bulletin*, published by the American Library Association,* *World Book*'s accessible, up-to-date, well-illustrated coverage of topics draws people of all ages.

In fact, this best-selling encyclopedia is designed especially to serve the reference and study needs of both students and adults. The review notes, "In these twin purposes it succeeds admirably," and adds, "*World Book* deserves high marks for its overall currentness of information."

People trust *World Book*, too. "*World Book*'s reputation for a high degree of accuracy—typographically, factually, and in matters of interpretation—continues apace," says the review.

From philosopher Aristotle to astronaut Sally Ride, "*World Book* continues to provide impressive, international biographical coverage of persons past and present," states the review.

With its clarity of style, helpful study guides, detailed index, and functional use of illustrations, it's easy to see why all signs point to *World Book*. Isn't it time to put a current set on your shelves?



*The review appears in the 2/1/84 issue.

THE FIRST COMPLETE REFERENCE TO JAPAN

TEN YEARS IN PREPARATION ■ 10,000 ENTRIES ■ 1,000 ILLUSTRATIONS
1,400 CONTRIBUTORS ■ 9 VOLUMES, INCLUDING 50,000-ENTRY INDEX!

KODANSHA ENCYCLOPEDIA OF JAPAN

"LIBRARY JOURNAL'S ONE OF THE BEST REFERENCE BOOKS OF 1983"

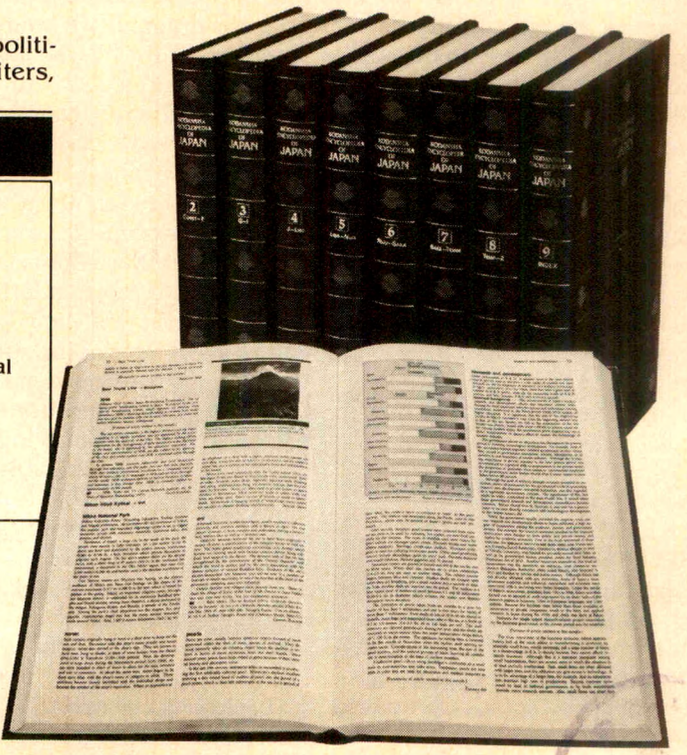
"The Kodansha Encyclopedia of Japan, a fine example of bookmaking, is an authoritative, up-to-date source on Japan, well-balanced, well-indexed, and recommended for public, academic, research, and specialized libraries."
—REFERENCE BOOKS BULLETIN

"This is an indispensable reference work on Japan. There is no other work like it, nor is anyone likely to try to match its coverage and quality for some time . . . public and academic libraries with any interest in Japan and the Japanese would be well advised to purchase the Kodansha Encyclopedia."
—LIBRARY JOURNAL

"This publication is unique and the very uniqueness tells us something significant about Japanese culture. . . . The Kodansha encyclopedia will immediately take rank as the most basic and authorative non-Japanese language reference work in Japan"
—CHOICE

NEVER BEFORE HAS THE TOTALITY OF A MAJOR CIVILIZATION BEEN SO THOROUGHLY PRESENTED. The *Encyclopedia* will serve as:

- A complete reference to 2,000 years of Japanese history, culture and society.
- A sourcebook of practical, timely information on Japan's economy, major industries, government, politics and law.
- A biographical "who's who" of Japanese politicians, artists, philosophers, scientists, writers, business executives, and military and religious leaders.
- An illustrated survey of art, architecture, music, theater, film and literature in Japan.
- An armchair guide to everyday Japanese life, including food, clothing, housing, sports, leisure, customs and manners.



SPECIAL OFFER

PREPUBLICATION PRICE GOOD THROUGH SEPTEMBER 30, 1984!

Why a library with no space problem chose microforms.

Unlike many libraries today, the University of Tulsa's McFarlin Library has plenty of room. A major 1979 expansion created a bookstack wing with space that will meet needs well into the 1990's. So why do they offer more than a thousand of their periodicals in microform? For many good reasons.

Robert H. Patterson, Director of Libraries at the University of Tulsa, explains: "We get more information for the dollar from microforms. Binding costs have been cut in half. We've reduced theft and mutilation significantly, so there's little need for replacement. And with microforms, we can offer more complete runs of serial titles."

Donald R. Smith, McFarlin's Associate Director for Collection Development, instituted a serials policy that emphasizes use of microforms. He knew from the beginning that the key to the program's success was support from the library staff and the university administration, as well as patron acceptance of microforms: "It doesn't matter how much space or money you can save with microforms if nobody supports them. We've done all the right things to make microforms a success on campus— and they are. Use of our microform facilities is up 234%."

Part of the reason for that success is McFarlin's comfortable, well-equipped periodicals/microforms reading area. Periodical stacks are adjacent for easy access. Computer printouts listing all titles on hand in alphabetical order are conveniently available for reference. Natural light fills the spacious area, and outside, a pleasantly shaded courtyard with a fountain adds a special, relaxed ambience for library patrons.

Robert H. Patterson and Donald R. Smith, University of Tulsa

McFarlin Library's partner in this commitment to microforms is University Microfilms International (UMI). UMI representatives assisted in every way possible— developing support from the university administration, recommending titles, and supplying equipment. McFarlin Library currently subscribes to over 1,200 serials from UMI. Forty percent of their total periodical collection is in microform, and they plan to increase that to 60% as they implement a plan for backfile conversion.

There's a lot to learn about using microforms from the University of Tulsa's McFarlin Library. And with UMI, the McFarlin Library has an experienced partner who can provide additional expertise whenever it is needed. We're here to provide you with the same responsive service. For more information about serials in microform, call or write:

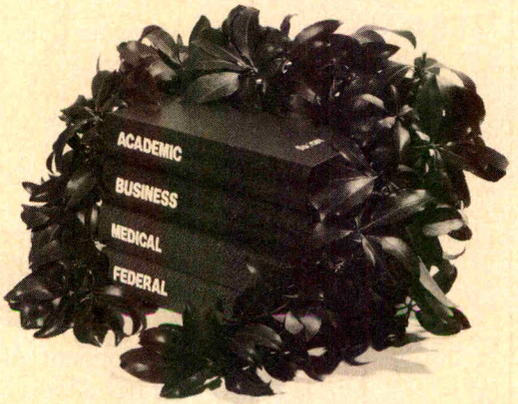
Cover. The Kankakee Public Library, constructed in 1899, serves a population of 30,000 and attracts patrons throughout northern Illinois to its Genealogy Center. Now planning a major refurbishing of the interior, Director Linda Gapsewicz says, "The trick will be to retain the wonderful Victorian style using modern materials." *AL* staff photo by A.P.

The great divide.



Faxon's new divisions reward you with better service.

With the formation of our four new divisions, you now get the individual attention of someone familiar with your needs along with access to the vast resources commanded by Faxon.

More than 100 years of dedicated service to libraries have put Faxon at the forefront of the information frontier. We were the first agency to completely automate subscription management. First to develop an international online network. First to establish online links with major publishers.

We'll give you an edge on tomorrow. A frontier we conquer by not resting on our laurels.

Back to: Information Stress

". . . a present and future where information stress is assured . . ."—from *Alliance for Excellence: Librarians Respond to a Nation at Risk,* U.S. Dept. of Ed., July 1984.

Oh no! We go away a few weeks on vacation, and when we get back to serious business we find INFORMATION STRESS where before there was only too much work.

I'm not sure what the new term means, but I get chest pains every time I think of it. As far as I can surmise, Information Stress includes all the things that worry us in library services but which can't be resolved by slamming the *OED* on somebody's head. That encompasses many things in many forms.

For example, we are worried by the many white papers coming out telling us we must do everything for everyone or someone else will do it. Certainly we don't want someone else to do it if we can do it better and cheaper, and yet we thought we were doing everything humanly possible in a day.

We are worried about little things: noisy valves in the bookmobile. We are worried about big things: our graduate programs disappearing overnight; the MLS degree in crisis. Even Daniel Boorstin is worried: about LC's five million crumbling volumes, "one of the most unrecognized and serious perils that afflict civilization."

We are worried about keeping up with the technology. The National Library of Wales just installed a "powerful M9000 32-bit supermini with 19 online VDU terminals and the new URICA software." What did you do this summer?

Information stress comes from serving the needs of our many and diverse patrons, some of whom need to deposit burning objects into book drops. This summer at a Phoenix Public Library branch, one such drop-off resulted in massive fire and water damage. When conservator Michael McColgin entered the hosed-down interior, the climate was "perfect for raising alligators or growing moss."

No moss grows on book prices, and we are worried about it. Librarians in Abington, Pa., are protesting what they call "price-gouging" by many of the major reference-book publishers. They cite numerous increases of 50 percent and more just from 1981 to 1983. They offer some comments on the situation: "I support a boycott!" "I'm priced out of the market!" You can feel their stress.

Dealing with I.S.

We could run to our own self-help shelves for books on how to cope with stress. But most of these, if not deteriorated, have been borrowed, stolen, burned, or priced out of the market. No, this might only give us a taste of patron stress, possibly more than we could handle.

Aha—we could go to Australia! According to Alyce Archuleta's notes in the San Diego Public Library staff newsletter, "Australia is a working person's paradise. While I was there, I worked 35 hours a week. . . . The Council paid for tea, . . . and the typists prepared tea and cleaned up (that service is in their job description!). . . . After 10 years of service, an employee is entitled to a 3-month, paid leave. . . . Payday is once a week—with cash! . . . And the clincher—there are enough people to do the work!"

Those who cannot set off immediately for Australia have, perhaps, one alternative, suggested by a recent news release from the University of Minnesota: They can cry.

Crying, says U. Minn. researcher William Frey, has evolved to significantly relieve human emotional stress. In a study of 200 healthy subjects, 85 percent of the women and 73 percent of the men said they felt better after crying.

But don't count on it. Frey said that 35 percent of the women and eight percent of the men got negative reactions to their crying. Doubtless the reactions to crying would vary by type of library and library activity. But that's another study for another time. For now—back to work! —*Art Plotnik*

U. Cal. System recognizes librarians as academics in new union agreement

After seven months of negotiations, representatives of the University of California System and the University Federation of Librarians (UFL) initialed a tentative agreement on a first contract in Berkeley just before midnight July 13. The contract and an accompanying compact codify the administration's recognition of its librarians as academic employees. Ratification was expected by September.

"The university has explicitly recognized that we are academic employees—I doubt that we will ever again be thought of as staff," Joyce Toscan, a Public Affairs Service librarian at the University of California/Los Angeles University Research Library, told *AL* in mid-August. Toscan served as chief negotiator for the union, which had won collective bargaining elections on the system's nine campuses in June, 1983. UFL, an American Federation of Teachers affiliate, is the only higher-education bargaining unit in the country that is made up entirely of librarians.

Negotiations on the first contract and compact began on Pearl Harbor Day and ended on the eve of Bastille Day, Toscan noted. On Independence Day, the library bargaining team and administrators worked through the night without reaching final agreement. "The bargaining was much tougher than I ever expected," Toscan said.

The two-year contract dating from July 1 preserves for unit members the 9-percent increase in academic employees' salaries recently voted by the state legislature and the additional 3.8-percent hike scheduled for January. The contract allows UFL to reopen salary and other discussions in January.

The contract also provides that the university earmark professional-development funds for unit members to attend conferences and workshops, and allows them to take a two-month leave-without-pay retaining their benefits.

In addition, the contract allows greater flexibility in daily work schedules. "The system now recognizes that as academic employees we have responsibilities to the university to serve on committees, publish, and do research. We can't be tied to our desks from 8 to 5. This has been implicit on some campuses, but has been unevenly applied," Toscan said.

The union also won a grievance procedure culminating in a final and binding arbitration.

Peer review by LAUC

The compact that was negotiated along with the contract maintains the strong tradition of self-government developed by the Librarians Association of the University of California (LAUC), to which all 560 librarians automatically belong by virtue of appointment. Since the early '70s, LAUC has grown to resemble the faculty senate, and the compact enhances this role. LAUC will continue peer review on each campus and also develop a professional code of conduct for librarians.

The compact also permits librarians to rise in rank whether or not they assume administrative duties. "We've had a strong belief at the University of California that there should be no difference in salaries between administrators and working librarians," Toscan explained.

Both sides are eager to make the new agreement work, Toscan said. "Many of us are not at sword's points with the administrators," she added.

Rep. Carl Perkins, fighter for libraries, dies at 71

Citing Rep. Carl D. Perkins (D-Ky.) as "a champion of library legislation and an advocate of excellence in education," the American Library Association awarded him honorary life membership in 1975. ALA Washington Office Director Eileen Cooke presented the award in Perkins' office (photo).

After Perkins died Aug. 6 en route to his home in Hindman, Ky., Cooke said: "Librarians and library users have lost a great friend. Perkins was a long-time supporter of library programs. He kept his constituents in mind as examples of people who would benefit nationwide from library funding."

Perkins had backed the landmark Library Services Act of 1956 and was intimately involved with each subsequent step in federal support for libraries. As chair of the House Education and Labor Committee since 1967, he also pushed through other social legislation ranging from job training to school lunches, and he fought President Reagan's budget cuts.

A tough and successful participant in House-Senate conference battles, he had been expected to head the House group which will resolve differences on the LSCA extension (*AL*, July/Aug., p. 477). Instead, Rep. Augustus Hawkins (D-Calif.), the second-ranking member on the education committee, will head the House team at the House-Senate conference after Labor Day.

In this 1975 photo, Rep. Carl Perkins receives an ALA life membership from Washington Office Director Eileen Cooke.

The *Washington Post* said of Perkins: "Both his allies and his adversaries many years ago came to recognize him as a master of the legislative process. He was among the best of those country lawyers who come to Washington and, blessed with conviction and skill, make a difference in the lives of millions of people."

Taiwan and Ohio libraries barter books for service

Chiang Hsiu-ying and Wang Hsi-chang of the National Central Library of Taiwan, Republic of China, began a three-month internship-training program at the Ohio University Libraries July 1 in exchange for 600 Chinese books and 212 nonprint items.

The books and nonprint materials, including art, history, reference, cuisine, and adult and children's literature, were on diplay at the ALA Annual Conference in Dallas as part of the barter agreement between Ohio University and the National Central Library.

In return for the Chinese materials, Ohio U. is providing training in library management and automation to the two middle-level librarians. The training includes hands-on experience in the library, where Chiang, a cataloger, and Wang, an acquisitions librarian, were put to work adding the gift materials to the general collection.

The arrival of the two interns at the Athens campus coincided with the fifth anniversary of the internship program founded by Ohio University Libraries Director Hwa-Wei Lee. Beginning with a request from Chulalong-

korn University in Bangkok, Thailand, the program has provided training to more than a dozen librarians and library science faculty members from Indonesia, Papua New Guinea, Malaysia, the People's Republic of China, the Republic of China, the Philippines, Saudi Arabia, and Thailand. Sponsors have included the Asia Foundation, UNESCO, the U.S. Department of Education, and the interns' home governments and institutions.

Chiang and Wang were the first to come in exchange for books, and probably not the last.

Survey shows wide range of public library user fees

One hundred and nine of the 139 public libraries responding to a California State Library survey last year reported they charge fees for a variety of services, the July *California State Library Newsletter* reports. The survey, which excluded overdue and copy machine fees, had an 82-percent response rate.

The most common user fees are charged for reserve on materials and interlibrary loan, the survey found. Fees range from the basic 13 cents postage to $1, with the most common charges 25 and 50 cents. Eleven libraries charge for interlibrary loan beyond system boundaries at rates ranging from $1 to $5.

Rental and insurance fees for audiovisual materials is the next most common fee category. Thirty libraries charge from 25 cents to $2.50 per reel for film rental. Twenty-four libraries charge from 50 cents to $3 for videocassette rental. Three libraries

Filling the gap in *Risk:*

Dept. of Education report defines key library role in three-way alliance to create learning society

In 100 settings, rural and urban, majestic and modest, a librarian not only holds the keys to knowledge that is the prelude to tomorrow but also is equipped to show every *citizen how to access the future and live with confidence in the Learning Society.*—T. H. Bell, U.S. Secretary of Education, in *Alliance for Excellence: Librarians Respond to A Nation at Risk.*

At a Washington, D.C., ceremony attended by ALA President E. J. Josey July 26, Secretary of Education Terrel H. Bell announced the publication of *Alliance for Excellence: Librarians Respond to A Nation at Risk.*

The report proposes an alliance of home, school, and library to upgrade education and makes 13 recommendations giving libraries a key role in creating the true learning society envisioned in *A Nation at Risk.*

The 64-page work resulted in part from librarians' complaints that *Risk* ignored libraries. Responding to that reaction, Acting Director Malcolm Davis of the Center for Libraries and Education Improvement (CLEI) conceived the idea of the Libraries and Learning Society Project using LSCA Title II-B funds.

Last September CLEI invited 15 top professionals, including 11 representatives of ALA and other national library associations, to form an advisory board for the project. The experts helped develop a series of seminars to examine how public and academic libraries, school library media centers, and library and information science institutions could best contribute to the attainment of excellence in American education. A fifth seminar considered ways libraries could link their resources.

Douglas Zweizig, Richard Dougherty, James Liesener, Jane Anne Hannigan, and Peggy Sullivan prepared issue papers. In all, more than 125 librarians, parents, teachers, and patrons participated in the five small seminars held early this year in Boston, Chicago, Dallas, Berkeley, and Washington, D.C. Ray Fry, director of the Department of Education Division of Library Programs, chaired the advisory board and attended every seminar, as did freelance writer Robert Carlisle, who summarized the deliberations in *Alliance for Excellence.*

Tie-in with ALA's Realities

"We worked very closely with Joe Shubert's ALA Task Force on Excellence in Education as the two projects evolved," Fry told *AL* recently. "We had hoped to present *Alliance for Excellence* at ALA Annual Conference, when the task force produced *Realities: Educational Reform in a Learning Society* [*AL,* July/Aug., p. 490–92], but our publication was delayed."

To Fry, the concept of local libraries as user-oriented learning centers linked to homes, schools, and other libraries is most exciting. He said the first section of the report, addressed to the general public, explains how the information age challenges libraries. The report recommends that to the fullest extent possible, school library media centers as well as public and academic libraries be open to all students and area residents. The second section, addressed to school administrators and librarians, recommends methods to improve school library media centers.

The third section appeals to library leaders to refine library education to reflect increasing demands, tighten accreditation standards, and work within their own communities to build stronger library systems. The report urges librarians to form linkages at the local level similar to those in the states and regions and offer advisory services to everyone.

ALA Washington Office Director Eileen Cooke served on both the CLEI project advisory board and the ALA task force. Cooke told *AL* that *Alliance for Excellence* can be used in tandem with *Realities* to promote libraries. The Department of Education report fulfills ALA's public awareness priority and also fits into President Josey's effort to forge coalitions for the public good

Alice Fite, executive director of the American Association of School Librarians, receives a copy of* Alliance for Excellence: Librarians Respond to A Nation at Risk *from U.S. Secretary of Education Terrel Bell. Fite served on the Libraries and Learning Society Advisory Board and participated in the project seminars on school library media and linkages and relationships among libraries.

and Past President Elizabeth Stone's National Library Week partnership program.

Cooke pointed out that many educational organizations have presented formal responses to *Risk,* but *Alliance,* the only official Department of Education response, will have political clout.

Alliance for Excellence: Librarians Respond to A Nation at Risk may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Single copies are $2.50; orders of 100 or more get a 25 percent discount if mailed to a single address. The report is also available in the ERIC System. The issue papers written for the seminars are also in ERIC or may be ordered from ALA Publishing Services under the title *Libraries and the Learning Society: Papers in Response to A Nation at Risk,* 146 pages, $9 (0-8389-3313-0, 84-11163).

Single copies of the 14-page *Realities: Educational Reform in a Learning Society* are available free with a stamped (37 cents), self-addressed, 7½-by-10½-inch envelope. Two to 10 copies are 50 cents each, 11–99, 30 cents each, and 100 or more are 15 cents each, from *Realities,* ALA, 50 E. Huron St., Chicago, IL 60611. □

There's no time like the Eighteenth Century.

A microfilm collection based upon the Eighteenth Century Short Title Catalogue.

Research Publications captures the essence of a century, the ultimate resource to support research of the 18th century — from the social sciences to the arts. This collection of 200,000 titles includes the first and most significant editions published in any language in Great Britain and its territories, or in English around the world.

Research Publications' unusual endeavor will augment your library's preservation program. Additionally, the microfilm edition will be accompanied by hard-copy bibliographic access. For further information, return the coupon below. Or call today: (203) 397-2600.

charge for audio records and tape, and 30 libraries charge for AV equipment loans.

The third most common category of library fees is for meeting rooms and their equipment. Thirty-six libraries report charges varying as to profit or nonprofit user and by room size, equipment, and time of day.

Twelve of the 139 libraries make personal microcomputers available for a fee, usually based on a time unit such as $1 for half an hour. Ten libraries offer rental typewriters for similar charges. Some libraries rent tools, darkroom space, laminating machines, or offer various vending machine services at a small fee.

Fourteen of the libraries collect nonresident fees ranging from $5 to $43, primarily from out-of-state users. Nine libraries report rental book collections with varying fee schedules. Seven libraries charge for ILL borrowing of census microfilms for genealogy searches, and six charge for reference searches on computer databases.

news in brief

Proposition L for libraries. In Detroit's Aug. 6 election, Proposition L, raising the property tax by one mill to 1.64 mills solely for library service, won by an overwhelming vote of 3 to 1.

Detroit Public Library Director Jane Hale Morgan said the tax would raise an additional $5 million for the hard-pressed library for each of the next five years, starting with the 1985–86 budget. If the City of Detroit and the State of Michigan continue to contribute to the library budget, DPL will be able to restore hours at branches and the Main Library, reopen the Rare Book Room, reinstate the Film Department, and restore funds for book purchases.

Paul T. Scupholm, executive director of the Friends of DPL, and Jessie Kennedy, a retired educator, chaired the Citizens Committee for Library Millage. They won backing from the media, influential citizens, and political, labor, and community organizations. The six-week millage campaign built on the sympathy aroused by the "Keep the Doors Open" fundraising effort (*AL*, Sept. 1983, p. 506–08) which garnered more than half a million dollars.

With a total budget of $15,222,339 in 1984–85, DPL will continue the current schedule of cutback hours, but restorations and improvements should begin late next spring when the additional millage becomes available.

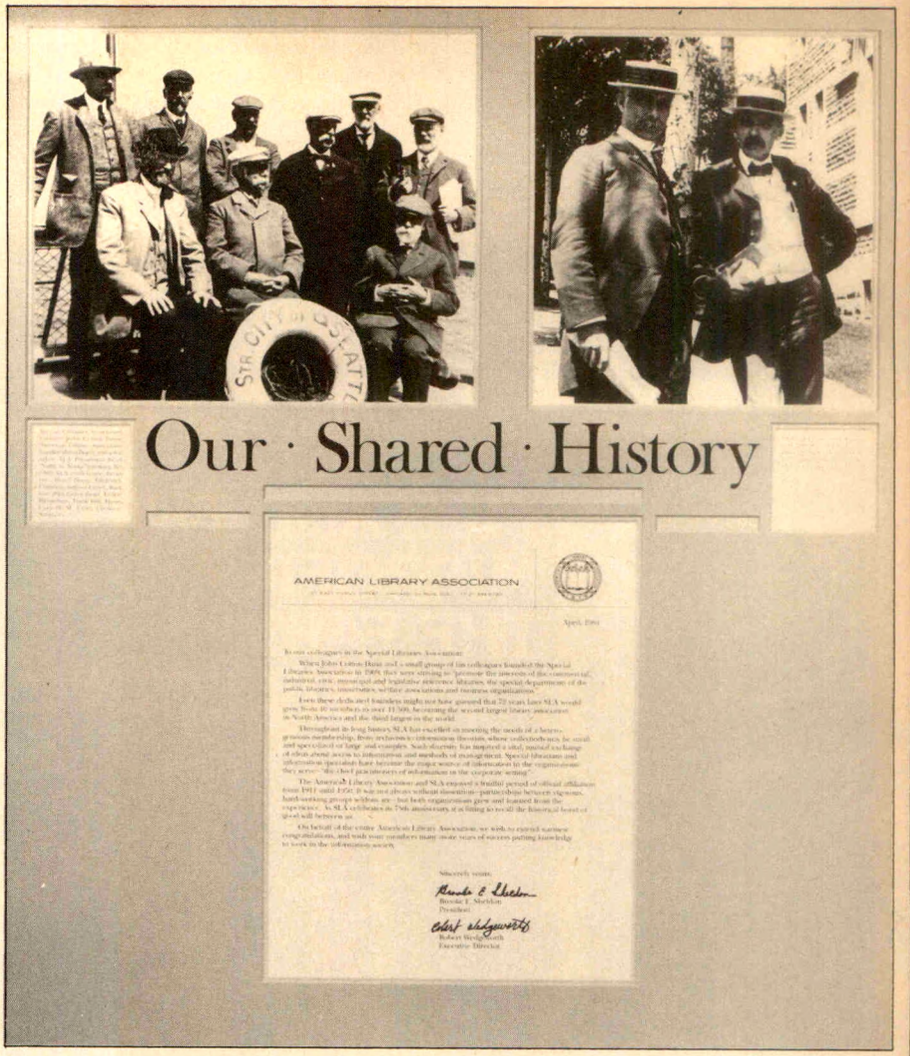
CATNYP passes tests. Carlyle Systems' online public catalog has been installed at the New York Public Library Research Libraries and has successfully passed its acceptance tests, NYPL Associate Director Paul Fasana reported in mid-August.

The system, dubbed CATNYP, includes four terminals connected to a remote processor in New York City, and then via Telenet to the host processor in Berkeley, Calif. Later this year approximately 40 terminals will be installed and over 1.2 million records will eventually be loaded into the system. The total cost will be about $300,000.

Carlyle has been the prime contractor for the Research Libraries' printed book and microfiche catalogs since July 1983. The initial database for the online catalog is the same as for the most recent edition of the book and microfiche catalogs, but the online catalog provides sophisticated searching capabilities. The Research Libraries have specified 13 different indexes for searching by keyword, and 10 limiting indexes. Searches may also be limited by logical, or Boolean, connectors, such as *and, or,* and *not.* Silent printers are attached to each terminal and allow users to print citations in any of four display formats.

60 Minutes in Falmouth, Mass. Late in September the CBS show *60 Minutes* will feature a library user who credits the Falmouth Public Library for his success in pleading cases in federal and state courts.

Falmouth resident Nathaniel Denman is a



Happy 75th, Special Libraries Association

This large commemorative framing was presented by ALA Executive Director Robert Wedgeworth to the Special Libraries Association at SLA's 75th Annual Conference in June in New York. Its letter of tribute, co-signed by 1983–84 ALA President Brooke Sheldon, celebrates SLA's founding in 1909 by John Cotton Dana; the "fruitful period of official affiliation from 1911 until 1950" between ALA and SLA; and SLA's growth from 40 members to more than 11,500, making it the third largest library association in the world.

Two historic photographs show Dana (far left, far right) with ALA officers.

SLA's 75th conference drew a record 6,073 registrants. Incoming President Vivian Arterbery of the Rand Corp., Santa Monica, said that special librarians have progressed from "appendages" to "active partners in the information flow."

H. Robert Malinowsky was elected 1985–86 president.

self-employed engineer, not a lawyer, who uses the law section of the library to prepare his personal and environmental suits, frequently consulting Director Ann Haddad and other librarians.

In June a CBS camera crew filmed the story in the Cape Cod resort village, spending almost a full day in the library.

"Supernetwork" coming up. The Research Libraries Group, Inc., of Stanford, Calif., is planning to develop a computer-to-computer link between its Research Libraries Information Network (RLIN) and three other library automation systems.

Late in June RLG signed a memoranda of understanding with Northwestern University Libraries of Evanston, Ill., creators of NOTIS; Biblio-Techniques of Olympia, Wash., vendors of BLIS, which is based on Washington Library Network software; and the Geac Computer Corp., Ltd., of Markham, Ont., vendors of integrated local library systems.

RLG has agreed to perform pre-project planning to implement a standard network interconnection using computer-to-computer communications protocols developed by staff at RLG, the Washington Library Network, and the Library of Congress as part of their cooperative linked systems project (*AL*, June, p. 400–404). The protocols, based on the International Standards Organization's Open System Interconnection reference model, will allow library and information retrieval applications on one system and computer to communicate with those on others.

$3 million available in NEH grants

March 8 is the next deadline for Humanities Projects in Libraries proposals at the National Endowment for the Humanities, Program Officer Tom Phelps reports. Congress has again approved an expenditure of $3 million for the cooperative program in FY 1985.

All types of libraries are urged to submit proposals fulfilling the NEH mandate "to foster public understanding and appreciation of the humanities."

Next month's *American Libraries* will detail some current projects and offer tips on preparing proposals. NEH will issue new guidelines later this fall. Meanwhile, phone or write Thomas Phelps, Division of General Programs, National Endowment for the Humanities, 1100 Pennsylvania Ave., N.W., Washington, DC 20506 (202-786-0271).

School librarians stick with CLA. As reported in the August *Quill & Quire,* the Canadian Library Association annual meeting in Toronto June 7–12 sounded not unlike an ALA conference. The weather was hot, the air conditioning chill, the schedule hectic, and the discussions lively.

The 1,376 CLA delegates talked about copyright, federal support, intellectual freedom, library school accreditation, and the possible secession of the Canadian School Library Association.

CSLA has been considering a split from CLA to form an independent body for more than two years. University of Ontario library science professor Sam Neill was commissioned to study the feasibility of secession, but his report took no stand on the matter. Finally the CSLA executive recommended against secession, but members continued to debate the issue right up to the day before the division's general annual meeting. At the meeting, the secession motion was not even introduced.

$3 million addition for Finkelstein. "There are books all over the floors and it gets very crowded on Saturdays and Sunday. . . . It's hard for anyone to concentrate," Finkelstein Memorial Library Director Samuel Simon of Spring Valley, N.Y., told a local reporter recently.

Newspaper stories, a Friends of the Libraries campaign, and a school-district-wide

UTLAS *...effective solutions for libraries everywhere.*

LOOKING FOR A "LOOK-ALIKE" LIBRARY SYSTEM? THEN UTLAS IS NOT FOR YOU!

UTLAS is unique. We don't look like any other bibliographic utility. Over the past decade, we have developed systems that offer distinctively original solutions to library automation.

When you join the UTLAS network, ownership and control of data stay where they belong — with you. This concept, so fundamental to the UTLAS approach, provides many benefits:

Permanent storage of records in your database, just the way you edit them.

Multiple uses of your data, both for local functions and those better carried out on a centralized system.

Direct, dynamic linkage to a powerful, full-scale authority system.

A wide variety of products, including catalogues (COM, book, card); acquisitions and other specialized printed lists; locally-generated products (labels, purchase orders, management reports); and magnetic tapes of your data for loading into local systems.

Why not find out for yourself what UTLAS looks like? To make it easier, we've opened a new office in the U.S. Contact:

Joanna Rood
Manager, Sales — U.S.A.
UTLAS
701 Westchester Avenue
Suite 308W
White Plains, NY 10604

Tel.: 914/997-1495

mailing of an attractive brochure resulted in a June 23 majority referendum vote for a $3 million library addition. The Finkelstein serves nearly 80,000 East Ramapo School District residents in suburban Rockland County, northwest of New York City. The library was last expanded in 1969 to hold 60,000 volumes; its present collection of 200,000 books, 7,500 records, and 300 journals overflows the shelves and is stored on floors, in hallways, and in a nearby trailer.

In planning the expansion, which will more than double the space, Simon worked closely with Willis Mills of SMS Architects, New Canaan, Conn. They displayed a model in the library annex, the only voting place in the school district. The addition will cost a homeowner whose house is assessed at $60,000 about $6.75 this year. The school board, which owns the building, will handle the bonding for the project.

Michigan multitypes to automate. The W.K. Kellogg Foundation of Battle Creek, Mich., recently awarded $826,200 to the Upper Peninsula Region of Library Cooperation, Inc., of Marquette, to create an automated multitype-library system linking all 163 libraries from Sault Ste. Marie to Ironwood. The four-year Kellogg grant will be combined with local library funding for the resource-sharing project.

Lee J. Lebbin, chair of the cooperative and library director at Michigan Technological University, says the project aims to record all the library resources in the large, sparsely-populated region in a centralized database accessible through any local library.

In the initial phase, the cooperative has tentatively selected ten members representing higher education, public, school, and special libraries in the region for planning costs and telecommunications.

Correction. ALA President E. J. Josey has announced that the President's Program at Annual Conference in Chicago will focus on the theme of forging coalitions for the public good. The correct date is Monday, July 8. For the ALA Midwinter Meeting Josey is organizing a training and orientation session Jan. 6 to prepare volunteers to spark discussions at the President's Program. □

QUICK-BIBS: New and recent books on a timely topic

Bill Ott, compiler

ROCK MUSIC

Popular culture threatens to engulf us all, as would-be critics document and attempt to analyze such icons of contemporary life as break dancing and Michael Jackson's glove. Nothing seems to send the Matthew Arnolds of kitsch scurrying to their typewriters faster than rock music. Who'd have thought it would prove as easy to sound pompous writing about guitar riffs as about iambic pentameters? For anyone genuinely interested in the literature of rock, sorting out level-headed critics from punk pedants becomes a problem. The following titles, all published within the last two years, should get rock fans off to a good start.

Booth, Stanley. *Dance with the Devil: The Rolling Stones and Their Times.* Random, 1984, $16.95. (0-394-53488-3, 84-42517)

Stanley Booth accompanied the Stones on their 1969 U.S. tour, which culminated in chaos at the now-infamous Altamont concert. This vivid account of those few weeks captures the Stones in their prime: galvanizing music, an intoxicating exuberance for life (including drugs and groupies), and a nasty undertow of egotism and violence.

Clifford, Mike and others. *The Harmony Illustrated Encyclopedia of Rock.* 4th ed. Harmony, 1984. $19.95. (0-517-55261-2, 83-19354)

Perhaps the best of the available rock encyclopedias, this revised editon features sharply written profiles of musicians and musical groups from Bill Haley to Culture Club. Numerous color photographs of the performers in full cry add to the appeal.

Martin, George R.R. *The Armageddon Rag.* Poseidon, 1983, $15.95. (0-671-47526-6, 83-13597)

Rock fiction is like rock criticism—one must search diligently for diamonds in the rough. Martin's saga of a disenchanted novelist who becomes involved in the comeback of a resurrected 1960s rock group is one of the more successful of recent efforts.

Wiener views Lennon's political struggles with the Nixon administration.

Palmer, Robert. *The Rolling Stones.* Doubleday, 1983, $29.95 (0-385-27925-6, 83-7395)

This oversize, lavishly illustrated profile of the Stones is an excellent complement to Booth's *Dance with the Devil.* Music critic Palmer offers a lucid interpretation of the Stones' image as devil-worshipping doomsayers.

Pollock, Bruce. *When the Music Mattered: Rock in the 1960s.* Holt. 1984, $15.95. (0-03-060421-4, 83-10853)

Using the comments of various 1960s musicians, Pollock examines the social, political, and cultural ideals of a generation of rock performers. His study provides an intriguing look at what happens when music and ideals share the same stage.

Robinson, Lisa, *Walk on Glass.* Newmarket, 1982, $14.95. (0-937858-05-6, 82-2254)

The plot of this behind-the-scenes novel—girl singer's career derailed by scheming managers, grueling travel, and ubiquitous drugs—is hardly fresh, but syndicated critic Robinson deserves credit for understanding the way the sound of a guitar and a rough-edged voice can jolt a teenager out of childhood with all the force of a hormone injection.

Tobler, John. *The Buddy Holly Story.* Beaufort, 1983, $8.95. (0-8253-0166-1, 83-17260)

With "Peggy Sue" ringing in their ears, aging Baby Boomers will appreciate this well-illustrated biography of a rock legend. Tobler tells the whole story, from Holly's beginnings in Texas to his tragic death in a 1959 plane crash.

Ward, Ed. *Michael Bloomfield: the Rise and Fall of an American Guitar Hero.* Cherry Lane, 1983, $8.95. (0-89524-157-9)

Another casualty of the postwar generation's weakness for drugs, the late Bloomfield was one of rock's most respected guitarists. This account of his brief life and career covers his work with various rock stars (Paul Butterfield, Bob Dylan) as well as his personal trials.

Wiener, Jon. *Come Together: John Lennon in His Time.* Random, 1984, $19.95. (0-394-53570-7, 83-43194)

Eventually there may be as many Beatle books as Beatle fans. Fortunately, Wiener's study of John Lennon's social activism is somewhat more substantial than the garden-variety Fab Four tribute. Like Pollock (above), Wiener has some thought-provoking things to say about rock stars' predilection for politics. □

LETTERS AND BRIEF COMMENT FROM OUR READERS

American Libraries encourages signed comment on recent content in our pages or on matters of general interest to the library profession. Letters beyond 250 words will not be accepted or will be edited to fit space; longer contributions may be submitted to the "On My Mind" department.

Black's criticism picayune & petulant

"THE MAKING OF THE TRANSFER Agreement: A Library Odyssey" (June, p. 386–89) was fascinating and enlightening. But I think Edwin Black's criticism of two university libraries for their seeming intransigence was picayune and petulant. Had he followed the prescribed procedures of these two libraries, he would have fared better.

These procedures, though seemingly bureaucratic, are a means to prevent what would be harmful to Black's research: viz., overcrowding and theft.

To criticize fees for nonstudent or faculty use is unfair. Research is expensive for libraries, and the cost should be shared and considered part of the published work's overhead.

RICHARD A. BARRY, ALA member, Engineering Library, Manhattan College, Riverdale, N.Y.

Author demands private librarians

EDWIN BLACK'S DIFFICULTIES during his research for *The Transfer Agreement* (June, p. 386–89) leave little room for pity. Black is the kind of academic elitist who makes many of us in the library public service sector miserable. Must the world —and all activity within the marble walls of my library—screech to a halt because the scholarly Black has to make "continuous use" of 500 titles held coast to coast?

His problem is intellectual myopia; he fails to understand that I deal with hundreds of Edwin Blacks in a given year, each of whom feels his research should receive priority. He offends anyone connected with ILL activity by complaining of such "unworkable" features as renewals and processing time. And if my library knew he was maintaining a network of students . . . in every city where important books could be found" so they might forward material to him in Chicago, that would be the end of their privileges, period.

We're all for knowledge-exchange and the pursuit of excellence. But let's remember that rules are rules and sometimes even the most academic of us must climb down from the ivory tower into the real world where libraries deal with real problems. Perhaps if author Black had a private corps of librarians and library staff his book could have been completed in half the time.

Personally, I'd rather use my skills to serve many, observing the rules without which no library can stay in business.

JOSEPH LAUCK, University of Notre Dame (Ind.) Libraries

Chameleons of the professional world

During the open discussion on professionalism at the ALA Annual Conference, the question "What does it mean to be a professional?" was considered. Here is my response.

I am a librarian because I want to be able to make a difference in people's lives. Perhaps our clients, patrons, students do not view us as professionals in the same way that they view doctors and lawyers because we wear so many cloaks.

To children we are storytellers, recipients of secrets, confidants who can answer questions. To parents we are providers of guidance, babysitters, child psychologists, lawyers, doctors, friends. To students we are counselors, wizards of information, companions in the quest for knowledge. To the lonely, to the elderly, we are a smiling face, a warm greeting, a host of that comfortable inn—the library.

We are not given the same title by all people, but that does not make us less worthy in their eyes. We are not identifiable by outward baggage. We carry no stethoscope, no legal tome. We are the chameleons of the professional world. Perhaps it is our humane compassion that qualifies us as professionals.

JOAN L. DOBSON, ALA member, Grand Prairie (Tex.) Memorial Library

Put conferences on the tube

I WAS DISAPPOINTED THIS SPRING not to see any announcement that the ALA Conference would be offered as a teleconference. Unfortunately, most ALA members are unable to attend the annual convention in person, either because of financial shortfalls or other commitments.

Another example of the potential for teleconferencing is the Nonbook Materials Institute, the first of which was held at the Sheraton this February in San Diego. The $77 per night lodging and $265–280 registration fee are clearly above most entry-level librarians' means, especially with other priorities demanding funds. Apparently some universities agree: one library administrator characterized the NBI as a vacation for a group of Chicagoans wishing to be in a more comfortable location during February. Just to complicate things, the institute was scheduled concurrently with the Music Library Association Conference.

As I searched for possible roommates to this NBI, I found none in Arizona or New Mexico, and two in California—no thanks, I'm not John Ritter—separate bedrooms unless the females are in my family.

If, for example, RTSD/ALA would sponsor an NBI-TV Institute, charging $25–50 registration, one could predict attendance of 15–20 librarians and staff for a remote receiving station, such as Flagstaff. If the registration were $25, ALA could reap as much as $500, none of which would go to hotels, and this from only one site. As it turned out, the San Diego session reportedly drew poor attendance, and the fall workshop in Seattle was cancelled.

Who were the losers? ALA, librarians, library staff, and lest we forget, our patrons.

RALPH HARTSOCK, ALA member, Northern Arizona University Library, Flagstaff

An appeal for Laura X

FRIENDS AND ADMIRERS OF LAURA X and her Women's History Research Center (among whom I count myself) are grateful to *AL* for its story concerning Laura X's prosecution for alleged abuse of the work/study program (May, p. 278).

She needs our help, including cash contributions to her defense fund; letters of support for the judge to read so that she will not have to go to jail if convicted; donations (tax deductible) to the Center to keep the important projects she is doing underway; and purchases of her microfilm collections: *Herstory* (serials); *Women and Law;* and *Women and Health/Mental Health.*

Another support would be to help the Center find an institution which would house and/or continue the case and legislative

research for the Center's National Clearinghouse on Marital Rape.

As you show in the article, for 16 years Laura X has performed an invaluable, unique, and difficult service for the library community. In my judgment, it is now our turn to help her keep up her much needed work. The Center's address is 2325 Oak Street, Berkeley, CA, 94708.

LAWRENCE W. TOWNER, ALA member, The Newberry Library, Chicago

"Techniques inappropriate"

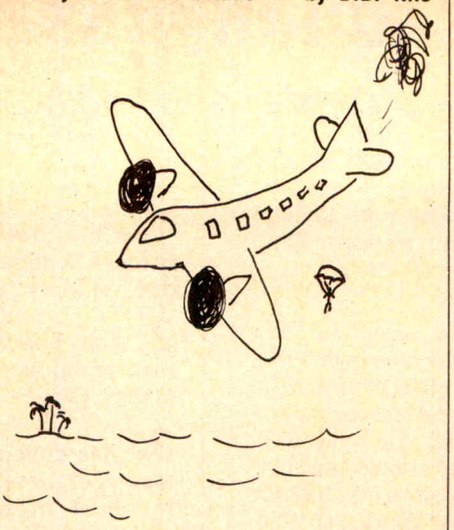
I TURNED TO THE JUNE "QUICKbibs" column (p. 368) with anticipation, only to be disappointed by Bill Ott's treatment of the conflict in Central America. Although his intention of focusing attention on this embattled region was good, his techniques were inappropriate and, ultimately, a disservice to those people I assume he was indirectly trying to assist.

Certainly too much seriousness can drown an issue, but misplaced levity can diminish its importance to the point of nonexistence. Ott fumblingly applied humor to a situation desperately in need of study and understanding, and the result was a sanctioning of disinterest. By humorously suggesting "Leave It to Beaver" as an alternative to learning about the crises in Central America, Ott condoned an attitude unfortunately prevalent in the United States: That which cannot be comprehended should be ignored. This is an odd tack for someone in the library field—supposedly committed to the linkage of people with information—to take.

Words like *quagmire, mess, morass,* and *disorder* threaten to make Central America even more of an untouchable issue in the minds of the public. Librarians can provide the resources to assist in breaking through this roadblock of confusion. Persistent dissemination of what information exists can eventually lead to greater clarity on the issue, to increased public awareness, and hopefully to subsequent policy change and a reprieve or a solution.

DEBORAH OZGA, graduate student, University of Maryland library school, College Park

If they'd been librarians **by B.B. Rile**



Amelia Earhart disappears while trying to complete a book drop . . .

Crediting Rep. Nick Rahall

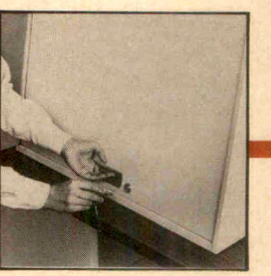
IN REPORTING ON THE SALUTE TO libraries made by Rep. Major Owens and other legislators on April 11 (June, p. 365–66), you recognized the pro-library statements of Rep. Nick Joe Rahall. The recognition was well deserved and much appreciated; however, the identification of him as being from Wisconsin was erroneous.

We, in West Virginia, are proud of the support for our libraries that we receive from our congressional delegation. Therefore, we are pleased to set the record straight and claim Nick Rahall as one of our own—a West Virginian.

MARTIE SMITH, ALA member and chair, Legislative Committee, W. Va. Library Assn. □

Computer Furniture from Highsmith

Accessibility and Security for Microcomputers



- **Security Cabinets Protect Valuable Equipment**

Integrating periodical display and finding compatible software

Q. Is anyone using an integrated periodical display system to save space? We need ideas, please. ***Yolande Courtright, Collection Development, Algonquin College Resource Centre, 1385 Woodroffe Ave., Nepean, Ont., Canada, K2G 1V8.*** **(*AL*, May, p. 288).**

A. Many Gaylord customers are now using our new showcase display shelving, which accommodates both books and periodicals. The regular shelves have a backstop allowing books to be displayed face out. The periodical shelves may be used so that only a third or half the cover is displayed for increased capacity. The periodical shelf may also be used next to a divider shelf where extra copies of periodicals may be kept. The periodical shelves have a deep enough lip to accommodate thick journals or several issues. They are available with hinges that come with an extra storage shelf. *Fernando Lagua, Senior Product Manager, Gaylord Bros., Inc., POB 4901, Syracuse, NY 13221-4901.*

Q. Our county is purchasing the IBM System/38 computer. We are searching for compatible public library software for online use. Our library is an OCLC member; we have a central library, eight branches, and one bookmobile. ***Gerald A. Somers, Director, Brown County Library, 515 Pine Street, Green Bay, WI 54301*** **(*AL*, June, p. 370).**

Over to you

1. Who knows of a new method for inserting security tapes in paperbacks? Placing them between pages doesn't work. (Ala.)

2. What academic libraries share a building with their computer center? Any problems, suggestions, ideas? (N.H.)

3. Has anyone obtained a bookmobile through a lease-purchase agreement? What companies are involved in lease-purchasing? ***Susan Stow Sandness, Director, Minnehaha County Rural Public Library, Box 218, Hartford, SD 57033.***

4. Where can we purchase a Reverse Dymo Wheel to make replacement cards for a Gaylord Model C charging machine? ***Robert E. Coumbe, Director, Gloucester County Library System Headquarters, 200 Holly Dell Dr., Sewell, NJ 08080.***

Please send replies to Action Exchange

A. J.P. Systems, an IBM System/38 service bureau, has developed a number of library systems currently in use at one or more Michigan libraries. They include a newspaper/periodicals indexing system, Library for the Blind and Physically Handicapped materials circulation, a community organizations and services file system with subject index, a bibliographic catalog system with subject index, the online union catalog system built from OCLC tapes, and OCLC tape conversions for use on CLSI systems. *Karen L. Lundy, J.P. Systems, 839 W. Walnut, Kalamazoo, MI 49007.*

Q. We're preparing current periodicals lists and topical bibliographies on our DECmate II digital word processor. What other academic library applications exist? ***Mary F. Riley, Chief Reference Librarian, Fordham University Library, Bronx, NY 10458*** **(*AL*, June, p. 370).**

A. In the three months we've had our DECmate II, we have used it for compiling acquisitions lists monthly, writing reports of conferences and the library annual report, maintaining library statistics, maintaining a library job descriptions file, compiling and maintaining library policies, maintaining a directory of New Mexico LRCs to be updated annually, compiling a list of furniture needs for a new addition, and as a terminal for DIALOG database searching.

When time allows, we plan to put our periodical order and holding information on the DECmate, as well as our AV software catalog. When we get hooked up to the college mainframe, a DEC PDP 1144, we plan to compile a union list of the periodical holdings of all two-year colleges in the state. *Harris M. Richard, Library Director, San Juan College, 4601 College Blvd., Farmington, NM 87401.*

ALA and the Merwine Case: A word as to the WHYS

by Robert Wedgeworth, ALA Executive Director

AT THE 1984 ALA ANNUAL CONFERence, considerable discussion focused on the case of *Merwine* v. *Board of Trustees for State Institutions of Higher Learning* (Mississippi State). Council and Membership addressed the question of why ALA did not participate in the Merwine case. Council debate included remarks by Edward G. Holley, whose article "The Merwine Case and the MLS: Where was ALA?" appeared in the May 1984 issue of *American Libraries*.[1] This statement is based substantially on information I provided during the course of the Council and Membership discussions.

Whenever a legal case involving the interests of libraries and librarianship is brought to ALA's attention, we take steps to analyze the case in terms of what is likely to be considered. Usually key members of relevant committees—e.g., Intellectual Freedom, Copyright, Office for Library Personnel Resources Advisory Committee—assist ALA staff and legal counsel in this assessment. In most instances ALA does not become involved at the trial-court level, where the facts are being established. If, after the trial court proceedings, issues of law arise that are of significance to ALA, we frequently join or initiate an appeal.

The complexities of the Merwine Case illustrate that litigation alone cannot answer concerns of the Membership about professional issues. ALA has always, and with an enviable record of success, undertaken legal defense of the interests of its members on a wide range of issues from censorship to copyright. Where appropriate we will continue to do so. The Merwine Case, in my opinion, did not present a significant opportunity to advance or defend the Association's interests in the ALA-accredited MLS degree. Since this is a matter of judgment with which the officers and members of the Association may take issue, I present some information that may be helpful for understanding the case from this perspective.

Two legal concepts have emerged in recent years around which allegations of discriminatory hiring practices have been argued. "Disparate treatment" raises the question as to whether all applicants were treated the same with respect to the employment process, including the application deadline, job requirements, and interview questions. "Disparate impact" raises the broader question of whether certain job requirements or the process as a whole tends to discriminate against those who are afforded protection under several major federal laws against job discrimination.

The concepts might be explained in the context of a classroom exam. If some students are allowed more time to finish the exam than others it is disparate treatment. If, however, the exam itself tends to prevent women from passing in numbers out of proportion to that of men, then the exam exerts a disparate impact on women.

Claims

Glenda Merwine claimed that she was not hired for the position of Branch Librarian for the College of Veterinary Medicine at Mississippi State University as a result of *intentional sex discrimination* (disparate treatment). Her attorneys presented information intended to prove that all candidates were not treated similarly in the process of filling the position.

Merwine also claimed she was not hired because Mississippi State University used as a hiring criterion possession of an ALA-accredited degree, which had a disproportionate impact on female applicants (disparate impact) and was not a valid predictor of successful performance in the specific position being filled. Her attorneys presented statistical information on applicants for previous positions at Mississippi State and assessments of the performance of successful applicants.

Attorneys for Mississippi State denied both allegations. Dean Holley of the University of North Carolina School of Library Science testified in support of Mississippi State using the criterion of an ALA-accredited MLS. Glen Zimmerman, director of personnel, Library of Congress, testified on behalf of Merwine.

ALA was asked by both Merwine and Mississippi State to give expert testimony in their behalf. ALA declined both requests. The principal reason was that the facts did not establish to our satisfaction whether one or both issues were at the heart of the case. The case presented a potential conflict between two policies about which the Association feels strongly: fair employment practices and the ALA-accredited degree.

"The [Merwine] case presented a potential conflict between two policies about which the Association feels strongly: fair employment practices and the ALA-accredited degree."

Trial court proceedings

The *intentional sex discrimination* (disparate treatment) charge was tried before a jury. The jury found that although Merwine was qualified for the job, preferential or favored treatment was given to the successful male applicant. Later, the magistrate overturned this decision, concluding that no reasonable jury could have found for Merwine on the basis of the evidence produced. Merwine's claims that the ALA-MLS was an improper criterion (disparate impact) were tried before the magistrate, who, in concluding that 80 percent of the ALA-MLS degrees awarded over the last 10–12 years have gone to women, said: "It flies in the face of

[1]Other *American Libraries* items concerning the Merwine Case include a news report (July-Aug. 1983, p. 442); ALA Executive Board discussion (Dec. 1983, p. 744); a background statement from ALA Office for Library Personnel Resources (Dec. 1983, p. 743); a news update (Feb. 1984, p. 72); and 1984 Annual Conference coverage (July-Aug. 1984, p. 492). The article following this one, by Pauline Wilson, discusses the Merwine issue among others in a broader context.

logic and common sense to say that an ALA – MLS requirement 'selects applicants for hire' in a manner discriminatory to women.''

Since Merwine failed to carry the burden of proof that the ALA-MLS degree requirement has a disproportionate impact on women, the court did not make any finding on whether the use by Mississippi State of the ALA-MLS degree in filling this specific vacancy was ''valid.''

Some questions and our answers

Q: Why did ALA not offer general information to the court?

A: It would have been necessary to enter the case on one side or the other. In order to present general information on the ALA-MLS, it could have meant sending a signal to our members that ALA considers fair employment practices less important than whether applicants have an ALA-MLS. The fact that two prominent members of the Association testified on different sides of the case illustrates the conflict between fair employment practices and the ALA-MLS issues.

Individuals not speaking for ALA would, of course, be free to express their opinions in giving expert testimony, and the Association encourages them to do so.

Q: Is the status of the ALA-MLS in jeopardy in this case?

A: No. The courts cannot and will not determine the general validity of the ALA-MLS. In the Merwine Case the only comment the court could make would be in reference to the specific position. Since the magistrate did not accept Merwine's arguments on the validity of the ALA-MLS, an appeals court is not likely to rule on the issue directly. However, an appeals court could remand the case back to the magistrate with instructions to consider the ALA-MLS issue.

"The Merwine Case, in my opinion, did not present a significant opportunity to advance or defend the Association's interests in the ALA-accredited MLS degree."

Even if the court had found disparate impact of the ALA-MLS on women applicants, the university could have offered in its defense a *business necessity* for the degree. In this case Merwine would have had to show that other, less discriminatory criteria could have been employed.

No court is likely to find the ALA-MLS degree an improper criterion except in relation to a specific position. Even then the validity of the degree in general would not be in jeopardy. It would simply mean that for the position in question, the ALA-MLS could be *a* criterion for hiring, but not the *sole* criterion.

Merwine has appealed the decisions of the trial court. ALA will continue to monitor this case in order to determine whether issues of law emerge that may indicate ALA participation in further court proceedings.

At its fall meeting, the ALA Executive Board, acting on the referral from Council of the Merwine discussion, will consider several courses of action in addition to litigation that will be taken in order to reaffirm and strengthen support for librarianship as a profession. □

BTSB
Likes Happy Endings.

One of the nice things about children's books is that they usually have happy endings. It's too bad the same can't be said of bookbindings; because unless the books in your children's collection are tough enough to withstand repeated handling, they will weaken and wear out quickly. And that's not a happy ending for any book...or library budget.

BTSB specializes in happy endings. Our bindings are so strong they can stand up to the roughest handling. And because our books are bound to LBI specifications, they will circulate a minimum of 100 times, five times longer than the average publisher's edition, and still remain in good, readable condition.

At Bound To Stay Bound, libraries are our only customer; so we offer many special services to save you time and money, including pre-sorted catalog cards for new or expanding libraries. Write today for our free service brochure and 1983-'84 general catalog, listing almost 17,000 in-stock titles.

WHO CONTROLS THE PAST, CONTROLS THE FUTURE. SUPPORT BANNED BOOKS WEEK. SEPTEMBER 8-15

1984

Here are the choices: *you* make the choice, says a specialist in "professionalism."

ALA, the MLS, and professional employment: An observer's field guide to the issues

by Pauline Wilson

BECAUSE OF THE CONTROversy that has recently been associated with ALA's support of the MLS degree as a minimum requirement for professional employment, the ALA Office for Library Personnel Resources Advisory Committee asked me to take a fresh look at the problem. The committee hoped to bring the situation into clearer focus for ALA members by sorting out some of the basic factors involved in it.*

I was asked to look at the problem because I have spent a considerable amount of time studying professions and librarians as a professional group. It is probably safe to assume that I have gained some objective knowledge from that study. Another factor strengthens my objectivity in this instance. It is that I have not been involved in any way in the present dispute. I was occupied in thinking about other things while the dispute was occurring: the Office of Personnel Management (OPM) and Merwine cases were nothing more than passing news notes to me. Consequently, I did not know enough about either case to have formed an opinion, one way or the other. Thus my position is that of a third party looking at the problem from afar, as it were.

In examining the situation, I read all the available documents on the OPM and Merwine cases. I also read letters to the editor and articles that various persons had written on the problem, and I talked to many people. What I was looking for was viewpoints: How did people feel about the problem? Why did they have a particular viewpoint? What did they see as the underlying problem? Did they think anyone or anything was at fault? If so, who or what? What did they think could be or should be done to solve the problem and why?

As a result of that inquiry, I believe I have identified some of the factors involved and some of the issues that need further consideration. For some of them I can provide an answer based on established knowledge about professions. Others, however, are more problematic. They are issues that need clarification and decisions by you, the Membership of ALA. Some of the decisions are going to be difficult because trade-offs will be involved. You will not be able to have it both ways—to have your cake and eat it, too. I should modify that a bit—I, at least, have not been able to figure out how you can have it both ways. In any case, it is not my role to tell you what to do; it is not for me to decide what must be done. You must do that because you must implement whatever decisions you make.

*This article is based on Professor Wilson's paper, "ALA, the MLS, and Professional Employment," which she presented at Annual Conference in Dallas at a meeting sponsored by the ALA Office for Library Personnel Resources Advisory Committee.

Non-issues a waste of time

We can begin by clearing away some deadwood. These are not issues, and time spent discussing them as though they were relevant to the problem is time that could be better spent elsewhere.

The first non-issue is the perennial question of whether librarianship is a profession. It is the viewpoint of some that it is not: therefore, its educational standards cannot and should not be defended. The fact of the matter is that way back in the 19th century librarians made a decision to organize their work as a profession. They did not choose to organize their work as a trade or a craft or in a union.

Profession, in essence, is a way of organizing work, a method for organizing an occupation in order to accomplish occupational goals. Librarians chose the professional organizational method as a means of exerting some control over how their work would be done and how it would develop. By this method they intended to mark out their occupational territory and to protect their occupational interests. By this method they intended also to serve society well, and to assure that good library service would be provided and new knowledge and new methods would be used to improve the service.

When an occupation begins to professionalize, it says to society, in effect: "Give us charge of this service . . . In exchange for our providing a quality service . . . we will be given autonomy . . . esteem . . . and financial reward."

This continuing improvement was to be for the benefit of society, but it was also to be for the benefit of librarians, for they wished to be valued and to be seen as competent and needed. Providing good service was a way to achieve that goal.

Through the years librarians have held to their original choice and built on it. Librarianship today remains organized as a profession. That fact is what counts —not whether it meets every characteristic associated with professions to the highest degree. No profession achieves that level of fidelity to the professional model. What counts is that librarianship *is* organized as a profession and *uses the*

[Some people who] believe ALA should have entered the Merwine Case . . . attribute its failure to do so to the fact that its energies and resources are inappropriately divided. . . . These people believe that ALA's goal should be to focus on librarians and their interests, not on libraries and library service.

methods of a profession to achieve its occupational goals. Thus, the question of whether librarianship is a profession is a non-issue in the present problem.

Another non-issue is whether it is appropriate for ALA to fight to protect the interests of librarians in situations such as the Merwine Case, where there was some dispute over whether facts or principles were involved. Some people believe that principles are worthy of defense but a defense should be made only when there is a relatively sure prospect of winning and facts are not in dispute. We all acknowledge as legitimate that the purpose of a union is to protect the economic interests of its members—to "rig the market," as it were, in their favor. Not so widely acknowledged is the fact that this is also one of the purposes of the professional association.

The union's method of accomplishing the purpose is coercive economic pressure —the threat of work stoppage. The professional association uses other methods. Among them are supervising the education of its members and setting standards for its service. Another is keeping members' knowledge up-to-date by publishing research and practical help in journals and books. Still another is lobbying governments to secure passage of legislation favorable to its members' interests. Finally, the association sets standards for entry into the profession and seeks to enforce those standards. The association's goal in all of these activities is to improve the market for its members by making them and their service better and thus more highly valued. So much for the two non-issues on which more time spent would be time wasted.

Merwine: should ALA have stepped in?

A viewpoint related to one of the non-issues can also be laid aside. Persons holding this viewpoint believe ALA should have entered the Merwine Case. They attribute its failure to do so to the fact that its energies and resources are inappropriately divided. That division is set forth in ALA's goals statement, which reads as follows: "The American Library Association is an organization for librarians and libraries with the overarching objective of promoting and improving library service and librarianship." These people believe that ALA's goals should be to focus on librarians and their interests, not on libraries and library service.

The fact of the matter is that ALA must focus on both. We have already covered why ALA must be concerned with the interests of librarians—it must attempt to create favorable market conditions for members of the profession. But why must ALA also be concerned with the quality of library service?

It is because librarians chose to organize their occupation as a profession. When an occupation chooses the path of professionalism, it is in effect claiming to have a special relationship with society. Furthermore, it is claiming that it can be trusted to have that special relationship. When an occupation begins to professionalize, it says to society, in effect: "Give us charge of this service that needs to be provided. We will provide a quality service and take responsibility for assuring that the service is good and meets society's needs. In exchange for our providing a quality service upon which society can depend, we will be given the autonomy necessary to provide the service in the way we determine will best meet society's needs, we will be regarded with some esteem, and we will be rewarded financially."

So the "special" relationship is an exchange relationship in which the profession receives benefits—autonomy, recognition, and financial reward—and society receives the benefit of a quality service. Thus the need for the profession to be concerned with the quality of its service is inherent in the concept of profession. It is inherent because a profession assumes responsibility for the service. Therefore, ALA's goals statement is not the cause of the problem. ALA's goals statement is appropriate for a profession.

Two sides not so far apart

To put the problem of ALA, the MLS, and professional employment into proper perspective, we must realize that the two ALA membership groups who represent differing points of view in this situation are not on opposite sides of the fence, although they may think so on occasion. Both are deeply concerned about the same problem. They are simply focusing on different parts of it. The fundamental problem they are concerned with is control of entry into the profession: Who is to define what a librarian is? Is it the profession itself that sets the standards or is it some external group?

One membership group, exemplified in the Office for Library Personnel Resources Advisory Committee, is focusing on short-term goals. It is trying to provide librarians with immediate help on employment practices insofar as those practices are concerned with minority hiring. It has tried to inform librarians about the situation and to suggest ways to handle it. In short, it is trying to help librarians with the day-to-day practical problems involved.

One view [among ALA members] believes legal defense of the MLS is the wrong course to follow. It would be lacking in common sense and would be a fruitless venture because the MLS has not been validated.

The other membership group is focusing on a long-term goal: preserving control of educational standards for entry into the profession. Gaining such control has been a long process and has been only moderately successful. This group seeks to guard against erosion of what has been achieved. It believes that such an erosion would be likely to have an adverse economic effect on librarians and cause library service to deteriorate as well. To illustrate a possible erosive effect, consid-

er the entry requirements for librarians under Ohio Civil Service: a seventh-grade education and two library science courses. What sort of message does that send about the knowledge and skills needed to be a librarian? What is a job worth that requires only a seventh-grade education?

Legal defense may prove fruitless

This second group, then, seeks to maintain educational standards through defense of the MLS, including legal defense. Another viewpoint opposes such action. This view believes legal defense of the MLS is the wrong course to follow. It would be lacking in common sense and would be a fruitless venture because the MLS has not been validated. Defense of the MLS is likened to the hallucinatory behavior of Don Quixote jousting at windmills.

A variant of this viewpoint is that legal defense of the MLS is wrong—by implication morally wrong—and would be imprudent as well. This view is illustrated in the statement of a government official to the effect that "the library profession needs to reconcile high professional standards with those of equality." Coupled with that statement was another suggesting that a definitive court case might do away with the profession's standards entirely. Therefore, it would not only be morally wrong to defend the MLS but imprudent as well.

The thing to note about the government official's statement and similar ones is that they are political statements, reflecting a political position and a political act. They are not edicts from a Supreme Being. We are citizens of a democracy and have the right to challenge any political statement, position, or act if we deem it in our best interest to do so. We need not be intimidated into acquiescence by such statements.

There is risk involved, of course. If we challenge a political position or act, we may not win. But even though our challenge may not be successful, the appropriateness of challenge and our right to challenge are indisputable. So much then for the difference between the two ALA membership groups. Both are concerned with the same problem. Both approaches to dealing with the problem are valid. The groups are simply focusing on different parts of the problem—short-term versus long-term goals.

Membership: clarify ALA goals

So we come to the first area that needs clarification and some decisions from

Is formal, definitive validation of the MLS a reasonable goal? . . . By definitive validation I mean the type that could withstand a determined attack by an agency of the federal government.

ALA membership: goals. What should the short-term goals of the Association be? What should the long-term goals be? Having clarified the goals, members must decide which goal is to have the highest priority, since resources—time, effort, and money—are limited. To illustrate, validation of the MLS might be considered as a goal. Is formal, definitive validation of the MLS a reasonable goal? Is it something the profession can hope to achieve, or is it a will-o'-the-wisp that can never be grasped? By definitive validation I mean the type that could withstand a determined attack by an agency of the federal government.

There is evidence that validation may be a will-o'-the-wisp—a goal so difficult and costly that for all practical purposes it probably cannot be achieved. Many large corporations, for example, have abandoned attempts to validate their hiring requirements. Moreover, some scholars believe that validation is, in effect, a device to pressure large corporations to hire by the quota system. Validation appears to be an effective pressure device precisely because it is too difficult and too costly to achieve.

In sum, although libraries differ from corporations, you may wish to review the evidence that exists. If you conclude that it is valid, you may decide not to put more resources into attempting definitive validation of the MLS.

Who benefits from MLS defense?

The second area that requires clarification and a decision concerns constituency and handling of conflict. Judging from past conflict situations, ALA's preferred operating style can be characterized as conciliatory. ALA as a body of members, officials, and staff, tries very hard to produce a satisfactory compromise in which there are few losers or, if that is not possible, at least no severely damaging losses. Resolution of the present problem with the MLS may not lend itself to such a felicitious outcome because the question that needs to be decided is that of constituency.

Who is the constituency for ALA actions? Whom does ALA have an obligation to defend? Suppose the course of action chosen is strong defense of the MLS. Who is to benefit from such action? Is it members of ALA or is it holders of the MLS? Is it a minority group? Is it school librarians who have a 27-hour certification or a degree in educational technology? If you try to assure that there are no losers or that losses suffered are not damaging, you may undermine your position and make satisfactory resolution impossible. In sum, the constituency for defense of the MLS is an area that needs clarification, and no matter what course of action Membership chooses, some persons will benefit but others will be harmed.

Are librarians special?

The final area requiring clarification is the nature of librarianship and its knowledge base. A sufficient level of consensus about these is needed if defense of the MLS is to be effective. Is librarianship a specialized occupation? Is it a speciality within a wider field of information-related occupations, or is the work of librarians interchangeable with that of other information workers? To put it another way, is the knowledge used by librarians in providing library service specialized or not? Is there anything special that needs to be learned about libraries and library service, or are general knowledge and practices about information processing and handling sufficient? Perhaps general knowledge, good sense, and on-the-job training are sufficient.

Reading library literature could cause one to doubt that there is a sufficient level of consensus about answers to such questions. Careless criticism of library education is a regular feature of library literature and has been throughout most of this century. Here are a few examples of this type of criticism:

> I am anti-library schools. They teach details that can be learned by a bright teenager in a few months.

> Ten percent of what is taught is valuable. The other ninety percent could be better taught in-house,..

What is being criticized here is the knowledge base of librarians—the knowledge they use to provide library service. If

Careless criticism of library education is a regular feature of library literature . . . It is safe to assume that such criticism has some influence on the perception [people outside the field] have of librarians and the body of knowledge they need to do their work.

this knowledge is so inconsequential and trivial, as depicted in the criticism, a credible defense of the MLS becomes difficult. Librarians seem to think that no one else reads their literature. In fact, many other persons read it. Among them are social scientists who may have been commissioned by the profession to study some aspect of librarianship. Other social scientists read it when they study the profession as part of their disciplinary studies. Government officials such as those in the federal Office of Personnel Management read the literature. Members of library boards who hire librarians read it, as do community leaders such as those who participated in the White House Conference on Library and Information Services. It is safe to assume that such criticism has some influence on the perception these persons have of librarians and the body of knowledge they need to do their work.

Related to the issue of the nature of librarianship and its knowledge base is another issue that may arise in the future. This issue is the use of the generic term *information* to characterize library service and the work of librarians. Are we laying the groundwork for future problems by such usage?

The editor of *American Libraries* in his March 1984 editorial (p. 124) questioned the appropriateness of the term information to encompass libraries and what they do. As he noted, language shapes attitudes. When people stop saying library will they, he asks, stop thinking about the library except in terms of one of its narrower functions? The state librarian of Missouri, Charles O'Halloran, expressed similar misgivings in his March 1984 editorial in *Show-Me Libraries* (p. 3–4). O'Halloran believes libraries are not simply places one goes to find information, but places one goes to find answers to "why" questions—not simply to find out that something happened but to find out why it happened. What is its meaning? What is its value? O'Halloran fears that use of the term information to characterize libraries diminishes what they are and may similarly diminish librarians, turning them into technicians.

Along similar lines, if information is used as an all-inclusive term and no distinction is made between librarians and other information workers, will library education come to be thought unnecessary? Will it be abandoned in favor of an undergraduate program in information science or information studies?

I end with those thoughts just in case your capacity for productive worrying exceeds that demanded by the present problem. □

Pauline Wilson is a professor at the Graduate School of Library and Information Science, University of Tennessee/Knoxville.

ATTENTION : LIBRARIANS

IF YOU ARE CONSIDERING A HARD DISK COMPUTERIZED LIBRARY MANAGEMENT SYSTEM DON'T BUY THE COMPETITION'S . . . WAIT UNTIL YOU SEE FOLLETT'S BOOK TRAK VERSION

CONSIDER THESE FACTS

- **Follett's BOOK TRAK, the Library Management System used by more libraries than any other throughout the country, is soon going to become available in a HARD DISK version.**
- **Follett's support for the floppy disk is unequalled! An in-house support team has been trained to answer user inquires, problems, and most of all, find solutions.**
- **No other Library Management System has the resources of a JOBBER like FOLLETT LIBRARY BOOK COMPANY to support its customers. Follett is the only company that can provide a complete "TURN-KEY" operation: everything from one source of selection and ordering, to the actual purchasing of books with barcodes in place and data disks created with the customer's titles and call numbers entered.**

"Follett's BOOK TRAK comes with an unparrelled support team of friendly people always easy to reach on an 800 number. To purchase Book Trak is to buy into continued and caring support in a network of happy librarians. And all without charge."

Gloria McClanahan, Library Automation Consultant

"Excellent manual and quick friendly responses to questions from Follett's staff. A true lifesaver for the understaffed library."

Phyllis Cooper, Librarian

- **For the over 1,000 customers who are currently using the BOOK TRAK system, Follett wil provide the necessary data conversion when the company releases the HARD DISK version.**
- **BOOK TRAK'S unique features and the enhancements planned by Follett for the HARD DISK version – combined with its support – make BOOK TRAK the wisest decision for Library Management applications.**

No signature, no library

A primary teacher asks why young children must print legibly to use the library

by Rose Marie Anthony

Many communities require young children to print their names legibly to qualify for a library card. I say this requirement is irrelevant to a child's readiness to use the library.

Since I have been a primary teacher for more than two decades and a children's services director in a public library for eight-and-a-half years, I know that motor coordination has nothing to do with the pleasure they derive from holding their own library cards or picking out their own library books.

A scribbling kindergartner

I will never forget the frantic mother of Robert, a kindergartner. Sent to me for counsel, she explained that Robert's kindergarten teacher wanted to keep him another year because his work was rarely finished, and what was done was totally illegible—scribbling, you might say. Because he could read—and no one had taught him—the mother felt her child was not slow or retarded. She did agree that his work was sloppy.

After the mother set up an appointment for the child to come for diagnostic testing, Robert and I met. I asked his mom to send along several of his kindergarten worksheets. Illegible? True. But he understood everything that was on them. He could read and comprehend all the fine-print directions addressed to the teacher. I asked him to read from primers to higher-level books. Then I administered a diagnostic reading test. His comprehension registered a sixth-grade level.

My point: This very Robert who was reading and comprehending on a sixth-grade level would have been denied a library card where writing one's name legibly on a small application form is a requirement. To compound the injustice, he likewise could have

Librarians comment on requirement

AL checked with several children's-services coordinators in public libraries to find out whether young children had to print their names legibly to obtain a library card.

Dorothy English, children's services director at the Seattle Public Library system, reported that children must meet the requirement, but first their parents could print the names so the children could copy them. "It is acceptable so long as the children can print the letters, and we keep providing them with cards until they can.

"They're treated no differently than adult card applicants. We don't discriminate by age," English said. "Children have a line almost five inches long on which to print their names, which should give them enough room."

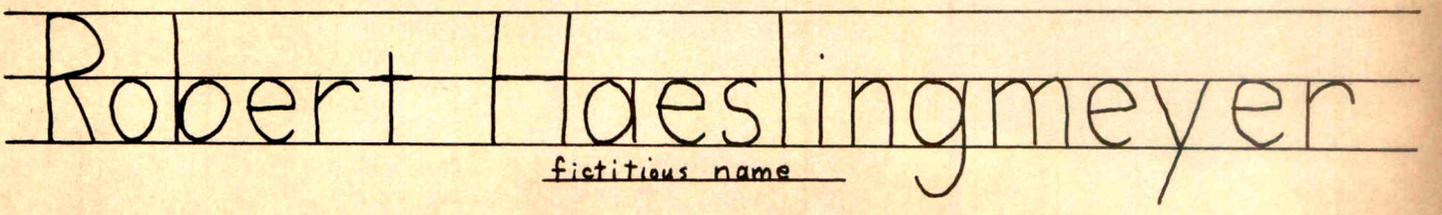
Sara Miller of the White Plains (N.Y.) Public Library and Amy Kellman of Pittsburgh's Carnegie Public Library both commented that the legible-signature requirement has been under serious discussion in the field for years. Miller said, "I am not comfortable with the requirement, and I know a lot of others aren't."

Her library accepts almost any scrawl, she said, and first name only is enough. "Patrons should be old enough to realize they have their *own* card. As soon as it is established that they know what it is to print their own name, we have never turned *down* a signature. We don't worry about the child fitting the name within the lines on the application."

Kellman agreed that young patrons should have a library card when they're "old enough to have a sense of community and know what having a card means." In her opinion, children should not be given fat pencils with thick lead, but should have a regular pencil that supports their self-image of being old enough to have a card. At Carnegie, the rule is enforced with good spirit, not rigidly, she said.

Jill Locke, children's librarian at the Farmington Community Library in Farmington Hills, Mich., felt the requirement was justified. "For the child, it is signing a contract. Taking that step into a new stage of life is a form of responsibility. To obtain a card makes children feel fulfilled," she said. Her library does not disqualify applicants whose printing exceeds the lines, which are about ¾" high. "We don't discriminate. I would be sad if inability to print their names stopped children. The public library is for everyone."

Margaret Litherbury at San Antonio (Tex.) Public Library admitted that no three-year-old could come in and make chicken scratches and come away with a card. "We have the requirement, but we're lax about it. Little children *do* struggle to print their names, so we don't insist on perfect signatures." —*E. McC.*



Kindergartners are used to writing on lined paper even larger than this, with capitals about an inch high. Yet applications for library cards often provide less than a half-inch for children's signatures.

spent another boring year in kindergarten doing reading readiness work.

Young children print LARGE

Do librarians realize that children in kindergarten and primary grades write on lined paper that is usually wider than this publication is long? They must use two spaces for capital letters, which makes the capitals one inch high or higher. (The space between lines becomes narrower by third grade.)

Many library systems ask young children to print their signatures on a space about five inches long and only one-quarter inch high.

Skinny pencils another stopper

To further complicate things, very young children write with fat pencils that have thick lead. Being handed a skinny pencil or ballpoint pen for a printed signature is unfair to the child.

For three years, I worked with kindergarten teachers who wanted each of their students to have a public library card by May, so the children would use the library during summer recess. In January, to allow time for processing, I supplied the teachers with a pack of application cards from the library. These were to be sent home with specific instructions on obtaining the child's printed signature. No nicknames were permitted. Children had to print first and last names legibly in the cramped space provided; otherwise, the card would be rejected by the person checking the signature at the local library or the downtown central library, where all the cards in the system were processed.

Frustrated on all sides

Parents and teachers often were totally frustrated trying to force the children to do something that most of them were totally incapable of doing on the first try: namely, write their names in a tiny space. A concession of using a pencil was made. Every year, the library system rejected approximately one-fifth of the cards because the name was not legible or a nickname had been used. Then the cards had to be sent back to school or home to be erased and agonized over, delaying the processing time even more.

Parents ultimately responsible

Of what use is a young child's printed signature? Isn't it the parents who are finally responsible for the books of very young children? They must sign to that effect. Having all their children enrolled in a public library is a real plus. Encouraging parents to use the library for the whole family increases circulation and patron counts and general library support. Parents feel good when the return on their tax dollar benefits even their youngest.

I urge you who follow the printed-name system to *change your system*. If you feel the need of some regulation, go with age: e.g., All children 4 years old and up may have their own library cards. Or, if you really want parents to encourage library use from the youngest age on, abandon minimum age requirements. Finally, you could ask parents to fill out the complete application card for the young.

If my hopes are realized, someday all children may joyfully receive a *free* library card and not have to pay the price of squashing their names into a restricted space on an application form only to have it rejected for illegibility.

I challenge any librarian to reasonably explain to small children why their applications were rejected when they'd tried so hard. □

Rose Marie Anthony leads reading, storytelling, and other workshops for teachers and librarians. She taught young children for 23 years and directed children's services at the Oak Creek (Wis.) Public Library in 1973–82.

DUKANE'S UNIVERSAL

Performance and Economy In a Roll Film Reader

Dukane's Model 27A66 (Universal) is engineered for your convenience

Please be seated and enjoy these Model 27A66 benefits: quality optics and controlled illumination to give desired eye comfort . . . highly visible instructions to make operation easy, even for the first time user . . .

film handling, loading and all controls conveniently reached from the viewing position . . . eye-level screen for comfortable viewing.

The 27A66 projects 35mm and 16mm roll film with either manual or motorized film drives. It also offers the option of projecting microfiche or aperture cards.

Next to its tasteful styling and troublefree performance, the economical price and minimal operating costs are appealing, too! Covered by Dukane's one-year warranty on parts and labor. UL approved.

For added information, contact us or your local authorized Dukane micrographics dealer.

For October issue, call 312-944-6780 x326 BEGINNING AUG. 10. Listings taken BY PHONE AS SPACE PERMITS. 10 lines maximum (approximately 100 spaces per line). ALA institutional members receive 10% discount.

REF. LN. at Duke Univ. Entry-level position. Available fall 1984. Participates in wide range of activ. in svc.-orien. dept., primarily directed toward social sci. & humanities. Reqs. ALA-MLS, substan. knowl. of ref. sources & their use in dvpg. srch. strategies, effec. communication & interpersonal skills, commitment to lib. user ed., & wkg. knowl. of one or more European lang. Salary range $17,000-$18,400. Send ltr. of appl., resume, & names of 3 ref. by Oct. 1 to: Ann F. Stone, Persnl. Ln., Duke Univ., Durham, NC 27706. Affirmative-action, equal-opportunity employer.

HEAD, ACQ. DEPT. Coords. activ. for monog. acq. dept.: preordr. verif., jobber selec., fund acctg., O-P, publication cats., gifts, etc. Supervises a staff of 1 nonprof. & students. Oversees monog. budget slightly over $100,000/yr. IIT uses OCLC for preordr. verif. & plans to implement OCLC/acq. subsyst. Req.: ALA-MLS; 2 yrs.' tech. svc. exp., pref. in acq. or cat'lg.; knowl. of 1 foreign lang. Flexibility, good communication skills essen. Sal. from upper teens. Res. & 3 ltrs. of ref. by Oct. 1 to: Maristell Dixon, Ill. Inst. of Technology, 3300 S. Federal, Chicago, IL 60616.

HEAD, SERIALS DEPT. Coordinates activ. of 4 nonprof. in a serials dept. resp. for all serials work: acq., check-in, claims, invoices, cat'lg. union list, bindery, dup. exch. IIT uses OCLC for cat'lg. & serials cntrl., & LCS. Req.: ALA-MLS; 3 yrs.' tech. svc. exp., pref. in serials or cat'lg.; knowl. of one foreign lang. Flexibility, good communication skills necessary. Supvsy. exp. desirable. Salary from upper teens. Resume & 3 ltrs. of ref. by Oct. 1 to: Maristell Dixon, Ill. Inst. of Technology, 3300 S. Federal, Chicago, IL 60616.

ASST. TO THE DIR. (Ln. III). Resp. to incl. budgeting & acctg., plng. for autom., monitoring phys. plant & equip't., & others as assigned. A unique oppty. for adv. prof. growth. Master's degree in lib. or info. sci. from an accred. prog. & at least 4 yrs.' progres. resp. lib. exp. req. Ideal person will have had meaningful exp. & ed. in budgeting/acctg. & computer/lib. autom., & will have abil. to communicate effec. & to estab. a positive rapport w/lib. staff. Sal. range is $20,580-$30,144, negotiable dep. on exp. Apply by Sept. 21. Send ltr. of appl. together w/names of at least 3 recent ref. to: Fred MacGregor, Dir., Off. of Persnl. Svcs., Twamley Hall, U. of N.D., Grand Forks, ND 58202.

LIB. COORD. (2 POSITIONS). Work under gen. direction of deputy dir. for info. resources. 1) CAT'LG. SVCS.--direct org., bibl. cntrl. & proc'g. for state lib. & proc'g. ctr. srvg. pub. lib. systs. & institutional libs. OCLC for regular & retrospective conversion & orig. cat'lg. Req. ALA-accred. MLS w/3 yrs.' exp. in cat'lg., knowl. of AACR2, LCSH, DDC, MARC formats, LC class. & descrip. practices, & OCLC cat'lg. subsyst.; demon. org'l. & supvsy. competencies w/min. one yr.'s supvsy. exp.; effec. communication & interpersonal skills. 2) DOC'T. SVCS.--direct acq. & org. of state & fed. doc'ts. for offcl. depos. collec. of state lib.; state doc'ts. depos. prog.; & fed. doc'ts. reg'l. depos. prog. in Ark. Reqs. ALA-accred. MLS, 3 yrs.' exp. incl. fed. or state doc'ts.; knowl. of the depos. policies & regulations; demon. org'l. & supvsy. competencies w/min. one yr.'s supvsy. exp.; effec. communication & interpersonal skills. Salary: $18,434-$21,632. Closing date Sept. 30. Submit appl., resume, creden., & ltrs. of ref. to: Kathryn M. Smith, Deputy Dir. for Admin., Arkansas State Lib., One Capitol Mall, Little Rock, AR 72201.

LIB. CONSULTANT II (2 POSITIONS). Work under gen. direction of coord. of ext. svcs. 1) GEN. CONSULTANT to pub. lib. systs. for plng., fiscal support, promotion of svcs., policy & mgmt. procedures, trng. & staff dvpt., monitoring LSCA subgrant projs. 2) SPECIALIST in pub. lib. construc./uses of microcomputers. Reqs. ALA-accred. MLS w/at least one yr.'s prof. exp. Salary $17,160-$19,136. Closing date Sept. 30. Send appl., resume, creden., & ltrs. of ref. to: Kathryn Smith, Deputy Dir. for Admin., Arkansas State Lib., One Capitol Mall, Little Rock, AR 72201.

LN. I--ASST. REF. LN. Div. of ref. & loan prov'g. full range of svcs. to indivs., libs. statewide, & state agencies. Located in Concord, N.H. MLS (ALA-accred.) + 1 yr.'s ref. exp. req. Trng. in online bibl. srchg. pref. Sal. $15,444-$18,681. Closing date Sept. 14. Obtain appl. from & return to: N.H. Dept. of Persnl., Statehouse Annex, Concord, NH 03301. For further info., contact: Stella J. Scheckter, N.H. State Lib., 20 Park St., Concord, NH 03301; 603-271-2143. Equal-opportunity employer.

ASST. HEAD OF ADULT SVCS., Asheville-Buncombe Pub. Lib., Asheville, N.C. Resp. for assisting in coord'g. & supvsg. adult svcs. oper. in ctrl. lib., incl. collec. dvpt., staff orien. & trng., directing ref. svcs., & prog. plng. ALA-accred. MLS w/1-2 yrs.' related exp. pref. Beginning salary $13,052. Send ltr. of appl., resume, & names & addresses of 3 ref. by Oct. 1 to: Nancy Hammond, 67 Haywood St., Asheville, NC 28801.

REF. & ILL LN. for a reg'l. pub. lib. syst. in east ctrl. Alabama. ALA-accred. MLS req. Abil. to work well w/people essential. Salary $12,600, 4 wks.' vacation, other ben. Interested applicants should write to: Susie Anderson, Dir., Horseshoe Bend Reg'l. Lib., 203 West St., Dadeville, AL 36853.

CAT'LG. LN. To join the staff of med.-sized acad. lib. using LC class. & OCLC. Under dir. of hd. catlgr., resp. incl. orig. & copy cat'lg. of monog., serial, music, & nonprint mat'ls., plng. for lib. autom., as well as ref. svc. on rotating basis. ALA-accred. master's in lnshp. req., exp. in OCLC/MARC formats, & music cat'lg. des. Lns. at Drake U. have fac. rank & status. Sal. range: $14,000-$15,500. Fringe ben. incl. 22 days' vac., insurance, & TIAA/CREF. Closing date Sept. 30. Send appl. incl. res. & ref. to: William A. Stoppel, Dir. of Libs., Drake U., Des Moines IA 50311.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries*, 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

POSITIONS OPEN

ACADEMIC LIBRARY

Assistant government publications librarian. The Otto G. Richter Library at the University of Miami is a federal and a state document depository. We seek a librarian to assist in the work of the government publications department. The assistant government publications librarian will report to the head of department and will select, acquire, process, and service government publications. Qualifications required are the ALA-accredited MLS or its ALA-accredited equivalent. Experience with documents collection, online searching, and academic library reference work will be useful. Applications will be welcomed from beginning librarians who have an interest in and aptitude for academic library public service. Beginning salary ranges from $14,000 to $19,000 depending on experience and qualifications. 12-mo., faculty, tenure-track appointment, available immediately. Benefits include tuition remission, paid pension plan, partially paid insurance plans, moving allowance, one mo.'s vacation. **For full consideration please send, before Sept. 30,** a letter of application, a resume, and the names of 3 references to: Ronald P. Naylor, Assistant Director for Administrative Services, **University of Miami Libraries, POB 248214, Coral Gables, FL 33124.** An EO, AA employer.

Assistant head of catalog department (search reopened). Supervises and coordinates monographic acquisitions and cataloging under the direction of the department head. Participates in planning and development of departmental policies and procedures, and in collection development. Department staff of 13 includes 3 librarians. Western Carolina University is one of the constituent institutions of the University of North Carolina System, and is located 45 miles west of Asheville in a valley between the Blue Ridge and Great Smokey mountains. Required: MLS from an ALA-accredited school, minimum of 2 yrs.' experience in an academic or other large library, including a strong background in original cataloging, LC classification and subject headings, AACR2, OCLC formats, and MARC tagging.

Deputy Executive Director
American Library Association

ALA seeks applications of outstanding individuals for the position of deputy executive director. This position is responsible for coordinating the planning and administration of the program activities carried out by the divisions, offices, round tables, and committees of the association. The deputy executive director also serves as staff liaison to several major ALA committees including Standards, Personnel, and Planning; plans and supervises preparation of the ALA handbook and other reports; supervises approximately 50 persons with budgets exceeding $3 million; functions as acting executive director in the absence of the executive director.

The position requires an ALA-accredited MLS and extensive knowledge of library operations and the profession. Demonstrated competence at the senior management level, knowledge of the operations of associations in general and ALA specifically, as well as communication skills, are expected.

Salary: $45,000–$68,000 annually.

Benefits: TIAA/CREF, health, life, and disability insurances, 22 days' vacation annually.

Send resume by Sept. 15 to: **ALA Personnel Office, 50 E. Huron St., Chicago, IL 60611.**

An affirmative-action, equal-opportunity employer

Record of successful supervision and training of full-time staff is essential. Preferred: willingness to accept responsibility, the ability to work harmoniously with the library staff, and excellent written and oral communication skills are strongly preferred. Position is 12-mo. faculty appointment, tenure-track, TIAA/CREF. Salary range: $16,500–$18,300. **Send letter of application, resume, and names, addresses, and telephone numbers of 3 current references by Oct. 15** to: Deborah Babel, Chair, Search Committee, **Hunter Library, Western Carolina University, Cullowhee, NC 28723.** Western Carolina University is an AA, EEO employer.

Assistant professor (tenure-leading). Serials division, starting Jan. 1, 1985. Catalog, classify, recatalog, reclassify print and nonprint serial titles using the OCLC system; train and supervise classified employees in routines of serials cataloging section; make series decisions and do name authority work for serials. Requires graduate degree from a program accredited by the American Library Association, good working knowledge of at least one foreign language (Eastern European or Russian preferred), and knowledge of AACR2. Familiarity with OCLC preferred. Salary dependent upon the qualifications of the successful applicant. Depending on the availability of funds, the minimum salary could be $17,000 for a 12-mo. contract. **Apply with full resume plus names and current addresses/telephone numbers of 3 references by Oct. 19** to: Larry L. Kahle, Associate Dean of Libraries, **106 Love Library, University of Nebraska–Lincoln, Lincoln, NE 68588-0410.** Affirmative-action, equal-opportunity employer.

Assistant university librarian for personnel, University of California, Davis. Reports directly to the university librarian, with primary responsibility for personnel matters in the General Library: ensures compliance with university/campus personnel policies and procedures; serves as the library's affirmative-action officer and as a campus sexual harassment advisor; responsible for all recruiting activities; serves as staff development officer for the library; administers collective bargaining agreements covering academic and staff personnel in the library; oversees preparation of the personnel budget; initiates and monitors merit salary programs for academic and career staff personnel; serves as library representative to major campus personnel committees; with other members of the library administration, participates fully in developing policies for the advancement and management of the UC/Davis library system. Applicants should have a graduate degree in librarianship, or its equivalent, from an ALA-accredited institution. Demonstrated successful professional experience in an academic research library, including some supervisory experience, is essential. Extensive experience in administering personnel policies, preferably in a complex organization setting, is required. Experience with collective bargaining helpful, but not essential. Appointment will be made at the assistant university librarian rank, which has a salary range of $35,500–$56,400 per yr. Hiring salary will be commensurate with qualifications and experience. **Applications must be received no later than Oct. 5.** Applicants should send letters, resumes, and the names of 4 referees to: Wm. F. McCoy, Acting University Librarian, **108 Shields Library, University of California, Davis, CA 95616.**

Assistant university librarian for public services, San Diego State University Library. The SDSU Library serves 35,000 students and faculty, with a total collection of 900,000 vols. and a $6 million budget. General duties: responsible for the overall management of reference services and collection development. Works in close consultation with the heads of the reference units and the head of collection development to ensure the coordination and integration of these areas. Reference units include general reference, government publications, media and curriculum center, science, computer search service, and instructional services. Public service staffing consists of 22 reference librarians and 18 support staff. The assistant university librarian reports directly to the university librarian, and as part of the management team, participates in resource allocation, immediate and long-range planning, and overall policy development. Qualifications: MLS or equivalent from ALA-accredited school. Other advanced degree desirable. Experience in reference work and collection development. Administrative talent as demonstrated by successful academic library management experience, including evidence of progressive growth in responsibilities. Proven skills in leadership, human relations, and oral and written communications. Familiarity with collective bargaining environment desirable. This is a management position, and as such is excluded from the faculty collective bargaining unit. Salary range: $30,000–$45,000. Available: Nov. 1, although later appointment is possible. Appointment is subject to budget constraints. **To ensure consideration, applications should be received by Oct. 8.** Please submit letter of application with resume and names of at least 3 references to: Marti Gray, Ref. AUL, **San Diego State University Library, San Diego, CA 92182-0511.** Affirmative-action, equal-opportunity, Title IX employer.

Audiovisual and catalog librarian (search extended). Concordia College, a 2,500-student, liberal arts college affiliated with the American Lutheran Church, has an 11-mo. administrative position with responsibility for the operation of the AV department which includes a TV studio and a language lab, and for the management of cataloging of the acquisitions into the LC library collection using OCLC. Requirements: ALA-accredited graduate degree, managerial ability, experience with AV/TV equipment, OCLC and LC classification. Salary from $19,000 depending on qualifications and experience. Position available immediately. **Closing date is Oct. 1** or until the position is filled. Send letter of application, resume, and 3 letters of recommendation to: Verlyn D. Anderson, Library Director, **Carl B. Ylvisaker Library, Concordia College, Moorhead, MN 56560.** AA, EOE.

Nominations and applications should be submitted prior to 15 October 1984. Applications should include a Curriculum Vitae. Correspondence should be sent to: Frank L. Borchardt, Chairman, Librarian's Search Committee, Department of German, Duke University, Durham, NC 27706.

Duke University is an Equal Opportunity/Affirmative Action Employer.

DIRECTOR OF LIBRARIES

The University of Texas at Arlington invites applications and nominations for the position of Director of Libraries. The University of Texas at Arlington is the fifth largest university in Texas and the second largest in the UT System. Located in the geographic center of the Dallas/Fort Worth metroplex, the University enrolls over 20,000 undergraduates and 3,000 graduates in 39 bachelors, 47 masters, and 16 doctoral programs. The faculty numbers over 900 part- and full-time members in 9 colleges and schools.

The Director of Libraries reports to the Vice President for Academic Affairs and manages a central library facility and one branch with a collection of 910,000 volumes and 4,000 periodicals. The Library includes a division of special collections and archives and is a federal and state government depository. It has an operating budget of $3 million and a staff of 95, including 35 professionals.

Qualifications:

- Demonstrated commitment to academic excellence, scholarship, research and the support of graduate and undergraduate instruction;
- Master's degree from ALA-accredited library school; other advanced degrees preferred, doctorate desirable;
- Extensive and varied professional library experience including at least five years administrative experience with fiscal planning, program development, and personnel management of an academic or research library;
- Knowledge of current trends and applications of information technology;
- Proven leadership ability and superior communication skills;
- Evidence of ability to interact effectively with all segments of the university community;
- Record of active participation in the profession at the regional and national levels;
- Strong commitment to professional and staff development;
- Clear understanding of the importance of alternative funding in library development including cooperation with development and research offices in soliciting gifts and grants from foundations and private donors.

Salary: Open and competitive with a minimum of $45,000; 12-month contract, comprehensive benefit program.

Deadline for Applications: November 1, 1984; position should be filled by September 1, 1985.

Applications should include a complete resume and the names, addresses and telephone numbers of five references.

Send applications and nominations to Dean Bob F. Perkins, Chairman, Director of Libraries Search Committee, The Graduate School, The University of Texas at Arlington, P.O. Box 19167, Arlington, Texas 76019

The University of Texas at Arlington is an AA/EO Employer.

mation with mainframe/minicomputer applications; interest in microcomputer applications desirable; written and oral communication skills; ability to teach and promote the use of information technology in libraries to library staff and the campus community; ability to develop cost analyses and budgets for automation activities. Bibliographer for social sciences, University of Minnesota Libraries—Twin Cities campus. The University of Minnesota Libraries—Twin Cities campus seeks applicants for the position of social sciences bibliographer. The bibliographer's responsibilities include the following: 1) selects materials to support instruction and research in social sciences, presently including economics, geography, and anthropology; 2) analyzes, develops, and manages collections according to university needs; 3) prepares budget requests and manages an acquisitions budget; 4) serves as library liaison with the departments of Economics, Geography, and Anthropology, and with other social science departments and programs as assigned; 5) performs bibliographic instruction in relevant subjects; 6) offers reference service, including online database searching, and research assistance in areas of collection development responsibility; 7) participates actively in the profession through relevant research, publication, and/or professional association activities. Required qualifications are a master's degree in library science, experience in collection management and development at a professional level in social science disciplines in a research library, and knowledge of the literature and research methods of at least one of the social sciences, as demonstrated by education or experience. Other desired qualifications include an advanced degree in a social science discipline, working knowledge of one or more modern European languages, experience in online database searching and in bibliographic instruction, and good communication skills. The minimum salary is $20,000. The appointment may begin Jan. 1, 1985, at the rank of assistant or associate librarian. Appointment as associate librarian requires meeting the minimum qualifications above, and also 5 or more yrs.' work in collection development in the social sciences in a research library. Desired qualifications at this rank are either scholarly or professional publications or evidence of good teaching. **Applications must be postmarked no later than Oct. 30.** To apply, please send a letter of application and a resume, including references to publications, a statement of research interests, and names and addresses of 3 references to: Robert Wright, Personnel Officer, **University Libraries, University of Minnesota, 499 Wilson Library, 309-19th Ave. S., Minneapolis, MN 55455.** The University of Minnesota is an equal-opportunity educator and employer and specifically invites and encourages applications from women and minorities.

Bibliographer—history. This position is primarily responsible for the selection of materials in the field of history, covering all areas of the world (primarily the United States and Western Europe), published in English and Western European languages. Shares major responsibility with the humanities bibliographer for the development, management, and preservation of the Butler Library collections, presently numbering over 1.5 million vols. The incumbent will report to the chief, Resource Development Division, and work closely with other subject and area bibliographers in providing coverage of needed research materials. The incumbent will also be expected to maintain close relationship with faculty, research associates, and students. An MLS from an accredited library school and/or an advanced degree in history highly desirable. Other requirements are a working knowledge of at least 2 major Western European languages (preferably German and French). Preference will be given to applicants with prior relevant experience in a large research library. Salary ranges: Librarian I, $19,999—$24,700; Librarian II, $21,000—$27,300. **Deadline for applications is Oct. 5.** Submit resume, listing 3 references and salary requirements, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.** An equal-opportunity, affirmative-action employer.

Business bibliographer/reference librarian at Loyola University of Chicago, Water Tower campus. Responsibilities include development of the business collection; liaison with the faculty of the School of Business and the Institute of Industrial Relations; business and general reference service; bibliographic instruction; and online searching. Accredited MLS and subject-related undergraduate degree required; searching and business-related library experience preferred. Salary $15,500—$17,000 depending on experience. **Application deadline is Oct. 12.** Send letter of application, resume, and names of 3 references to: Genevieve Delana, Julia Deal Lewis Library, **Loyola University of Chicago, 820 N. Michigan Ave., Chicago, IL 60611.** Loyola University of Chicago is an equal-opportunity, affirmative-action employer.

Cataloger, cataloging with copy department, Columbia University Libraries. The cataloging with copy department has responsibility for cataloging monographs for which acceptable copy exists (cataloging for most Columbia libraries and Barnard College Library). This position, which reports to the head of the department, will have primary responsibility for handling catalog editing and problems, with emphasis on Slavic languages. Duties include assisting in the analysis and distribution of Slavic filing conflicts and performing difficult database editing and inputting; training and revising supporting staff in cataloging books with copy and other cataloging-related activities; evaluating and revising documentation for cataloging and authority work procedures; and preparing new documentation as workflow and system requirements change. Incumbent will also perform original cataloging in appropriate subject areas, carry out special projects relating to the card catalog and the RLIN database, and have some supervisory responsibilities in the absence of the head. In addition to an accredited MLS, requirements are a working knowledge of a Slavic language using the Cyrillic script and at least one other modern European language, preferably German; ability to work well with others and communicate clearly; an aptitude for analytical and detail work as demonstrated through previous relevant experience and/or superior performance in a formal course in cataloging; and a broad subject background. Preference will be given to applicants with previous experience with machine-readable bibliographic databases. Salary ranges: Librarian I, $19,000—$24,700; Librarian II, $21,000—$27,300. **Deadline for applications is Oct. 12.** Submit resume, listing salary requirements and 3 references, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.** An equal-opportunity, affirmative-action employer.

may be reassigned as required. Required: ALA-MLS with 2 yrs.' experience. Knowledge of LC classification, AACR2, and ISBD (M) rules. One modern European language, preferably German. Desirable: OCLC experience, a 2nd European language, preferably French. Instructor rank with full faculty status. Salary range for 12 mos. $14,500–$19,500, 20 days' annual leave plus 10 paid holidays. Excellent fringes including retirement program paid in full. A 2-yr. temporary-term appointment which may be renewed. Open immediately. **Applications received Oct. 1 will receive first consideration.** Send letter of application, resume, and academic credentials to: Carl H. Sachtleben, Director of Libraries, **Western Michigan University, Kalamazoo, MI 49008.** AA, EO employer.

Cataloger: Eastern College, a 4-yr. liberal arts college with graduate MBA, which maintains a Christian faculty and is associated with the American Baptists, offers an immediate opening for a cataloger. Responsible for cataloging, supervision of tech services, and ILL. Knowledge: AACR2, OCLC, and LC classification. MLS, experience preferred. Salary $16,000 negotiable. Send resume, references to: James L. Sauer, Director, **Warner Memorial Library, Eastern College, St. Davids, PA 19087.**

Catalog librarian. Head of copy cataloging section, responsible for supervision of all activities relating to copy cataloging, including overall coordination of processing of monographs and serials in all formats through the OCLC system. A graduate degree from an ALA-accredited program; working knowledge of at least one foreign language; at least 2 yrs.' cataloging experience in an academic library; plus some supervisory experience. Salary: $20,000 min. **Apply by Oct. 1.** Desired starting date—Jan. 2, 1985. Send resume to: Peggy Weissert, Library Personnel Officer, **221 Memorial Library, University of Notre Dame, Notre Dame, IN 46556.**

Catalog librarian. The University of Arizona Library is seeking a catalog librarian to catalog monographs in the science and engineering subject areas. Related activities such as providing service at a catalog assistant desk will also be assigned. This position reports to the head catalog librarian. The University of Arizona Library is a large academic research library with more than 2 million volumes in the main library system. The Science Engineering Library, a separate branch, houses 350,000 volumes and has over 1 million microforms in all fields of science, engineering, and technology. The library system uses the LC classification system, LCSH, AACR2. OCLC services are provided through membership in AMIGOS. The catalog department employs 11 professional catalogers and 44 career staff. Requirements include: ALA-accredited degree; either an academic background in the sciences or experience in an academic or special science library; previous online cataloging experience using AACR2. Working knowledge of one foreign language is desirable. The beginning professional salary is $16,500; a higher salary can be negotiated depending upon qualifications and experience. Professional librarians are academic professionals with 12-mo. appointment and earn 22 days of vacation per yr. Position is available Nov. 1. **Deadline for applications is Oct. 15.** Send letter of application, resume, and names of 3 referees to: W. David Laird, University Librarian, **University of Arizona Library, Tucson, AZ 85721.** The University of Arizona is an EEO, AA employer.

Central reference librarian, University of Arizona Library. Duties include reference (with evening and weekend rotation), online bibliographic searching, library orientation/instruction, collection development, and faculty liaison work. ALA-accredited library school degree and an academic background in business or economics, or academic reference experience with business materials required.

University of Alaska, Juneau
Director, Library & Media Services

The University of Alaska/Juneau is accepting applications for the position of director, library and media services (faculty rank available). The director provides leadership in policy formulation and administration; assumes responsibility, within a collegial structure, for planning, directing, coordinating, and evaluating all facets of library operations, including development of personnel, collections, services, and facilities; encourages and facilitates faculty involvement in these operations; represents the library within the campus, the community, the University of Alaska system, and professional organizations.

An ALA-accredited MLS and an additional advanced degree desirable. Successful library managerial experience required, with both public and technical services desirable. Must have experience with and knowledge of automated library systems. Academic library experience desired. Candidates must possess the ability to communicate and work effectively with the administration, faculty, staff, students, and community; and the ability to promote and present the library position to the campus community and within the University of Alaska system. Active participation in the library profession and scholarly achievement desirable.

The UAJ Library is a rapidly growing and dynamic library with a staff of 16 (plus student assistants) containing 65,000 vols., the complete ERIC collection, plus additional microforms. The library is a member of the Washington Library Network and anticipates that a fully automated library will be operational in time for the opening of a new library building in 1988.

Located in Alaska's capital city, UAJ offers master's and undergraduate degrees in business, education, fisheries, liberal arts, science, public administration, and technology. Nearby mountains, lakes, oceans, and moderate climate afford outstanding opportunities for year-round recreation. 2 hrs. from Seattle by plane, the area is recognized as one of the most beautiful regions in the United States. The director reports to the vice chancellor for academic affairs. This is a 12-mo. position with a salary range from $45,000 to $55,000 depending upon qualifications and experience.

Closing date: materials must be postmarked by Oct. 1. Starting date: Nov. 1 or as soon as possible. Send a letter of application, vita, and names of 3–5 references to: **Personnel, University of Alaska, Juneau, 11120 Glacier Highway, Juneau, AK 99801.**

UAJ is an AA, EO employer and educational institution.

NEW POSITION
Director, Division of Technical Services
University of Louisville
(Associate Professor)

The University of Louisville Libraries invites applications and nominations. The university is a state-supported, urban institution of over 19,000 students. The city supports a wide range of cultural activities with particular emphasis on the performing arts. A major effort is underway to revitalize the downtown area. The libraries have been designated as a primary beneficiary of a $40 million fundraising campaign. The library system contains approximately 1 million vols. and consists of 6 libraries.

Director, Division of Technical Services: This position has administrative responsibility for acquisitions, cataloging, and serials, reports to the university librarian, and is a member of the Administrative Advisory Council. The division employs 10 professional librarians and 24 support staff and serves all libraries except Health Sciences. The library has an acquisitions budget in excess of $1 million, adds 30,000 vols. annually, belongs to SOLINET, and uses DataPhase ALIS 2.

Responsibilities: The library system is presently experiencing significant change and progress in a number of areas. The director of the Division of Technical Services will provide strong leadership within this environment and will be expected to integrate organizational change with technological development. This position will be expected to take a substantial role in meeting the division's goals which include the development of a centralized database and an online public catalog and will direct the division's ongoing functions related to automation development. This person will plan and organize the programs and activities of the division and coordinate those activities with the collection development program, the Public Service Division, and other library units. The director will be a member of the university libraries faculty and will be expected to meet criteria for promotion, tenure, and award of merit.

Requirements: MLS from an ALA-accredited library school; a minimum of 6 yrs.' professional library experience in an academic or research library, at least 3 yrs. of such experience in an administrative position in technical services including the supervision of professional librarians; demonstrated knowledge and understanding of acquisitions, cataloging, and serials processes, OCLC (or other network cataloging system), and the application of computer systems to library processes; proven record of creative leadership, strong interpersonal and communication skills, and ability to plan, organize, and coordinate the work of a technical services unit; appreciation and understanding of the goals of scholarship and research in an academic setting and of the interaction between technical services and other library functions.

Benefits: Competitive.

Salary: $28,000–$33,000.

Apply with letter, vita, and names of 3 references by Oct. 15 to:

David Horvath, Chair
Search Committee for Director, Division of Technical Services
Ekstrom Library
University of Louisville
Louisville, KY 40292

An equal-opportunity, affirmative-action employer

Albert R. Mann Library
Cornell University

Cornell, the land-grant institution of New York State, is known worldwide for the teaching and research programs of the College of Agriculture and Life Sciences and the College of Human Ecology. Mann Library, which supports these programs, is the largest academic agricultural and life sciences library in the United States, and its collection is second only to the National Agricultural Library.

Mann Library is committed to providing forward-looking information services in an academic environment and is looking for 2 librarians to participate.

1) Public Services Librarian (Position I).

Responsible for design, development, and promotion of an education program to faculty & students including end-user searching as well as instruction in the use of print and computerized information sources. Emphasis on innovative techniques for assessing the effectiveness of instruction with both short-term and longitudinal studies. Will also participate in reference service, online searching, collection development, and faculty liaison. Qualifications: ALA-accredited MLS. 3+ yrs.' experience in instruction and demonstrated success in promoting instruction or other library services are required. Knowledge of evaluation and assessment techniques essential. Subject background or demonstrated interest in agricultural or life sciences.

2) Public Services Librarian (Position II).

Responsible for the development of an enterprise for the delivery of information in a mode based on contemporary information access. This service is being designed to meet the needs of research faculty as determined in a recent ARL-funded study. The emphasis of this position is on original thinking and systematic testing of new approaches to rapid delivery of information in support of research; for example, telefacsimile, online ordering, electronic mail, and bibliographic networks. This requires sophisticated bibliographic knowledge, awareness of technological advances in document delivery, and management ability. The library has received a CLR grant to study alternative methods of document delivery. Responsibilities also include administering interlibrary borrowing and lending including the regional document delivery program at Cornell (a national network of the land-grant universities and the National Agricultural Library). Supervises 2 full-time staff and student assistants. Participates in other public service activities, collection development, and faculty liaison. Qualifications: ALA-accredited MLS. 3+ yrs.' experience in information delivery. Demonstrated ability in public relations and marketing. Demonstrated organizational skills. Experience with online systems required. Supervisory experience desirable. This position requires originality, enthusiasm, effective communication skills, and an outreach ability.

Salary $19,521; additional salary negotiable, depending on experience and qualifications. **Apply by Oct. 8.** Both positions available January 1985. Send resume listing 3 references to: **Carolyn Pyhtila, 201 Olin Library, Cornell University, Ithaca, NY 14853.**

An equal-opportunity, affirmative-action employer

Good communication skills essential. Reference experience and online search skills preferred. Knowledge of French or German or the ability to speak Spanish desirable. Position available March 1, 1985. Salary range: $16,500–$20,500. Academic professional status, 12-mo. appt., 22 days' vacation, fringe benefits. **Application deadline Oct. 15.** Send resume, including list of 3 references, to: W. David Laird, University Librarian, **University of Arizona Library, Tucson, AZ 85721.** An equal-opportunity, affirmative-action, Title IX, Section 504 employer.

Dean of university libraries. The University of Alabama, located in Tuscaloosa, invites applications and nominations for the position of dean of university libraries. The university comprises 15 schools and colleges with doctorates offered in 48 fields. The faculty numbers 830 and student enrollment is in excess of 15,000, of which approximately 2,500 are graduate students. With a commitment to excellence in teaching and in research, the university supports and encourages interdisciplinary educational programs and innovative research activities. The university libraries have 38 professional library positions, 50 support personnel positions, and a total budget of over $4 million. Holdings include over 1.4 million vols., 12,976 serial titles, and 1.1 million microform units. The main library is a regional depository for federal government documents and houses extensive map, rare book, and manuscript collections. An integrated automated system is being implemented. In addition to the main library, there are 4 divisional facilities for engineering, education, commerce, and natural sciences. Close cooperation also exists with the law school library and the College of Community Health Sciences Library. The university is a member of ARL and SOLINET. The dean is the administrative and fiscal officer of the university libraries and reports directly to the academic vice president. Responsibilities include budget preparation and administration, planning, direction of current library services, and supervision and development of library personnel. The dean holds academic rank, is a member of the Council of Deans and the Graduate Council, and works closely with the deans of the various undergraduate and graduate programs. Minimum salary of $50,000 with upper range negotiable. Candidates should have a strong commitment to academic excellence, scholarship, and research, and to providing support for instruction at the graduate and undergraduate level. An ALA-accredited MLS and extensive experience in research libraries are required. Evidence of professional growth through scholarly activity beyond the MLS is desirable. The candidate should have considerable administrative experience in an academic library, with evidence of success in fiscal planning, program development, and personnel management. The candidate should have demonstrated experience with applications of automated library systems and familiarity with current and emerging technology for information transfer. The candidate should have proven ability to work effectively with all segments of the college community and should have participated actively in the profession beyond the local level. **Applicants should send a letter of interest with a resume and list of references before Dec. 1** to: Marie Bingham, Chair, Libraries Search Committee, **The University of Alabama, POB S, University, AL 35486.** The University of Alabama is committed to equal opportunity in employment and education and does not discriminate on the basis of sex, race, color, religion, or national origin or against qualified handicapped persons.

Director of learning resources. Private aviation-oriented university with an enrollment of 5,000 students and planned new library facility seeks library director. Responsibilities include: $400,000 budget; staff of 17, organized in 3 functional areas (reference, technical services, media/circulation); planning new services; coordinating requirements for support with deans and department chairs; coordinating external resource-sharing efforts. Must have 3–5 yrs.' supervisory experience; good communications skills and demonstrated leadership abilities. Salary low to mid-$20s. MLS or MED and 5–7 yrs.' library experience required. **Application deadline: Oct. 1.** Send resume, salary requirements, and 3 current references with telephone numbers to: **Embry-Riddle Aeronautical University, Personnel Office, Regional Airport, Daytona Beach, FL 32014.**

Director of the university library, Washburn University. Candidate must have a master's in library science from an ALA-accredited school, a second master's or doctoral degree, and at least 5 yrs.' experience in increasingly responsible positions in academic libraries (including supervision of personnel and budget preparation). Experience with automated library processes desired. The director of the university library is responsible for personnel management, budgeting, administration of facilities, leadership in the development and evaluation of programs and services for the university's main library, the curriculum resources center, and the instructional media circulation department. The director reports to the provost and serves on the University Council and other policy-making committees of the university. Appointment begins as soon as possible following the deadline. Salary $40,000–$50,000, commensurate with experience. **Application deadline is Oct. 1** or until a suitable candidate is identified. Send letter of application and 3 letters of recommendation to: John Christensen, Chair of Search Committee, **School of Law Library, Washburn University, Topeka, KS 66621.** Washburn University is an equal-opportunity, affirmative-action employer.

Education librarian. Position to be filled by Oct. 18. Assists users directly at a central reference desk, takes part in library use instruction and collection development programs, provides computer searches, and serves as liaison with the faculty of the College of Education. The successful candidate will be service-oriented, able to work effectively with both students and faculty, and committed to promoting library services and collections to the academic community. ALA-accredited MLS required. An additional graduate degree in education is desired and is expected for tenure. Starting salary $17,000–$22,000 for 12-mo. appointment, depending on experience and qualifications. Successful candidate will be eligible for tenure review. TIAA/CREF, Blue Cross–Blue Shield or HMO. **Send letter of application and resume by Sept. 15** to: Stephen K. Stoan, Head of Reference, **Wichita State University, Box 68, Wichita, KS 67208.** Finalists will be invited for an expense-paid interview. Wichita State University is an affirmative-action, equal-opportunity employer.

Engineering reference librarian, University of Cincinnati. Responsible to head of Engineering Library for reference and instructional functions serving the College of Engineering. The college consists of 6 departments, 100 faculty, and 3,000 students. The university is a member of the Association of Research Libraries and the Center for Research Libraries. Responsibilities include reference services, online searching, library instruction, and assisting in collection development. Serves as acting head in absence of head of the library. The Engineering Library staff consists of 2 professional librarians and 3 support staff. MLS degree from ALA-accredited school required. Bachelor's degree in physical science or engineering preferred. Relevant library experience required. Successful supervisory experience desirable. Minimum salary: $18,000. Available Feb. 1, 1985. **Send resume with cover letter and names and addresses of 3 professional references before Oct. 1** to: Sharon Tuffendsam, Libraries Personnel Officer, **640 Central Library, University of Cincinnati, Cincinnati, OH 45221-0033.** The University of Cincinnati is an affirmative-action, equal-opportunity employer.

General reference/coordinator of computer reference services librarian. Northern Illinois University is seeking a qualified individual to fill a 12-mo., tenure-track position at the level of assistant professor or above, depending on qualifications, as a general reference/coordinator of computer reference services librarian. MLS from an ALA-accredited library and a 2nd master's or 30 hrs. beyond the MLS required. At least 2 yrs.' relevant current experience with online searching as a librarian in an academic or research library required. In-depth knowledge of current databases such as DIALOG and BRS required. Demonstrated ability to communicate effectively; experience with bibliographic instruction or teaching desirable. Responsibilities include: providing reference services to the university community during assigned hrs. at the reference desk; coordinating a comprehensive program for existing online computer reference services. Other responsibilities include bibliographic instruction and collection development in an assigned area. Salary and benefits: $18,000 minimum for a 12-mo. contract; Illinois retirement system; faculty status and rank. **Send letter of application, resume, placement file, and names of 3 references by Sept. 15** to: John C. Tyson, Acting Assistant Director for Planning, Administration, and Development, **University Libraries, Northern Illinois University, DeKalb, IL 60115.**

Head, adaptive cataloging unit. Directs monographic copy cataloging unit; resolves complex bibliographic problems; does some original cataloging; integrates AACR2 headings into dictionary catalog; works with GEAC bibliographic database manager. Supervises and trains 6 paraprofessional catalogers. Reports to head, cataloging department. ALA-accredited MLS, or equivalent, required. At least one yr.'s experience in cataloging with AACR2 via a bibliographic utility, preferably OCLC. Good oral and written communication skills required. Prefer academic cataloging experience. Prefer foreign language reading ability, Russian desirable. Tenure-track position. 12-mo. appointment, 24 days' annual leave, tuition remission, usual benefits. Salary ranges, dependent upon qualifications: instructor, $16,000 – $18,000; assistant professor, $18,000 – $20,000. **Send letter of application, current resume, and the names, addresses, and telephone numbers of 3 recent references by Oct. 15** to: Jill Keally, Personnel Librarian, **The University of Tennessee Library, Knoxville, TN 37996-1000.** UTK is an EEO, affirmative-action, Title IX, Section 504 employer.

Head, Architecture and Environmental Design Library at Arizona State University (search extended). The library is located within the college of the same name and is staffed by one professional (the head), one paraprofessional, and student assistants. The librarian reports to the associate university librarian for public services and is responsible for management of the branch, collection development, reference and research assistance, bibliographic instruction, and liaison with the college and the main library. ASU, the nation's 6th-largest public university, is celebrating its centennial year with the theme, "Excellence for a New Century." Required qualifications: ALA-accredited MLS; at least 2 yrs.' public service experience in an academic or research library; demonstrated managerial, communication, and interpersonal skills; subject expertise in one or more of the fields of architecture, art history, interior design, landscape architecture, urban design, and city planning. Preferred: administrative experience in a branch, unit, or department, preferably in an academic library. Salary: dependent on qualifications and experience ($21,000 minimum). **Send letter of application which addresses each of the qualifications listed above, a current resume, and the names, addresses, and telephone numbers of 4 recent references by Oct. 29 (postmark accepted)** to: Constance Corey, Assistant University Librarian, **Hayden Library, Arizona State University, Tempe, AZ 85287.** Copies of the complete announcement of vacancy may be requested from the same person. ASU is a committed equal-opportunity, affirmative-action employer. Minorities are encouraged to apply.

Associate University Librarian for Public Services
Arizona State University

The Arizona State University Libraries are seeking candidates for the newly created position of associate university librarian for public services. The successful candidate will report to university librarian Donald E. Riggs, be responsible for the leadership and management of all public service units, and participate in overall library planning and policy formulation.

Required qualifications include an ALA-accredited MLS degree; successful administrative experience at the department-head level or above in public services in a university library; a minimum of 7 yrs.' progressively responsible experience in an academic/research library; demonstrated leadership qualities; strong analytic, communication, and interpersonal skills; experience in creating and implementing new public service programs; knowledge of the latest issues and trends in academic leadership; knowledge of bibliographic instruction and online systems; evidence of university service, research, and/or participation in professional associations. Preferred experience: fiscal, personnel, and other administrative responsibility in 2 or more public service areas; supervision of a large staff; involvement in both undergraduate and graduate programs in an ARL library.

ARIZONA STATE UNIVERSITY AND ITS LIBRARIES: ASU's mission is to continue development as a major research university and to become competitive with the best public universities in the nation. Toward that end, the libraries have experienced dynamic growth during the past 5 yrs., adding 55 new positions and increasing the materials budget from $1.7 million to the current $3.1 million. A new science and engineering library was occupied in 1983, and the other libraries are being remodeled. The libraries are creating a total online integrated system using Tandem hardware and DataPhase software. Collections total 1.8 million vols. and 1.6 million microform units. Of the 243 FTE staff, 127 are employed in public services. Membership is held in ARL, CRL, AMIGOS, and OCLC. The total budget is $7 million. ASU, with 40,000 students, is the nation's 6th-largest university and is located near Phoenix, the nation's 9th-largest city.

Salary: $40,000 minimum, depending on qualifications. TIAA/CREF or state retirement plan; annual paid leave of 22 days' vacation, 12 days' sick leave, and 10 holidays; tuition remission for employee and family at all 3 Arizona universities. Librarians serve on university governance committees and are eligible for continuing employment status and sabbatical leave.

Applicants must include documentation or evidence of specific qualifications and short statements (no more than 2 pages each) concerning 1) their philosophy of public service and 2) what new public service programs they have implemented and are interested in implementing. Recruitment will remain open until the position is filled. **To ensure consideration, applications should be received by Oct. 29,** when review will begin. Send letter of application, resume, supporting documents, and a list of 4 recent references to: **Constance Corey, Assistant University Librarian, Hayden Library, Arizona State University, Tempe, AZ 85287.**

ASU is a committed equal-opportunity, affirmative-action employer.
Minorities are encouraged to apply.

Head, cataloging unit, San Diego State University Library. General duties: coordinates all cataloging and processing activities for a library of 900,000 vols., serving 35,000 students and faculty, with annual monographic acquisitions of approximately 36,000 items and 11,000 subscriptions, and a total library budget of $6 million. Supervises 20 FTE faculty and staff. Participates in development and implementation of online systems related to cataloging and database maintenance and enhancement. Performs some original cataloging. Supervises retrospective conversion project. Reports to assistant university librarian for access services and automation; participates in planning and development of overall policies, personnel planning, resource allocation, and long-range planning. Qualifications: MLS or equivalent from ALA-accredited school; other advanced degree desirable. Knowledge of AACR2, LCSH, MARC formats; substantial original cataloging experience in a large academic or research library; supervisory experience with an online bibliographic utility, preferably OCLC. Demonstrated organizational, leadership, communications, and human relations skills. Familiarity with national trends in technical services and automation issues. Full-time, tenure-track faculty position; rank and salary commensurate with qualifications and experience. Starting salary range: $27,000 – $36,000 (1983/84 salary schedule). Reappointment, tenure, and promotion require evidence of continuing professional development. Appointment is subject to budget constraints. Available: Nov. 1, although later appointment is possible. **To ensure consideration, applications should be received by Oct. 8.** Please submit resume, letter of application, and names of at least 3 references to: Marti Gray, Ref. CA, **San Diego State University Library, San Diego, CA 92182-0511.** Affirmative-action, equal-opportunity, Title IX employer.

Head, Fine Arts Libraries, University of California/Los Angeles. Under the general direction of the associate librarian for research and instructional services, the head of the Fine Arts Libraries has administrative responsibility for coordinating the operations, long-range planning, and direction of 4 libraries—Music, Art, Theater Arts, and Architecture and Urban Planning—including: policies; programs; user and technical services, including online support system applications and bibliographic instruction; collection management and control; personnel management, including recruitment, selection, training, staff development, supervision, and evaluation; funding; expenditure control; space utilization; statistical, evaluative, planning, and other reports; and the promotion of good relations with faculty, students, and the public. The head establishes priorities and objectives for the Fine Arts Libraries based on consultation with library and section heads regarding needs and available resources. The head consults with staff, library administrative officers, library committees, and faculty of the schools and departments served, as appropriate. The head of the Fine Arts Libraries participates in the general planning and problem-solving activities of the UCLA Libraries, and the universitywide library system, as appropriate. Evidence must show that candidates have demonstrated competence in administration in a complex organizational environment, particularly: competence in planning, setting objectives and priorities, communicating, mobilizing individuals to group action, and organizing for effective action; capability of working with various academic, library, and public groups and individuals; understanding of the mission of higher education and faculty/student information needs in

ADVERTISEMENTS

Issues in Access to Scholarly Information
Presented by the University of Oklahoma Libraries
Oct. 11–12, 1984

Sheraton Airport Inn
Oklahoma City, Okla.

Featured topics:

- Trends and issues in access to scholarly information
- Physical organization of library buildings and collections
- Role of collection development, reference services, and preservation
- Impact of technical services developments
- Resource sharing, consortia, and networks
- Copyright, interlibrary loan, and related issues
- Nonconventional resources, subject collections, and special collections
- Recent technological developments

Featured speakers:

Herbert White	Dean, School of Library & Information Science, Indiana University
David Kaser	Professor, School of Library & Information Science, Indiana University
Kenneth Peterson	Dean, University Library, Southern Illinois University
Helen Spalding	Assistant Director for Technical Services, University of Missouri–Kansas City
Donald Riggs	Librarian, Arizona State University
Carolyn Bucknall	Assistant Director for Collection Development, University of Texas–Austin
Robin Downes	Director of Libraries, University of Houston

Positions Open continued from p. 575.

the fine arts, architecture, and urban planning; familiarity with research trends in the fine arts, architecture, and urban planning; complete understanding of academic library services to the fine arts, architecture, and urban planning and the ability to formulate, advocate, and relate goals and programs to the fields served. A degree in library science is desirable. Salary range is $22,776–$38,532. **This position will remain open until filled; candidates applying by Oct. 1 will be given first consideration.** The application letter should include a complete statement of qualifications, a full resume of education and relevant experience, and the names of at least 3 persons who are knowledgeable about the applicant's qualifications for the position. Anyone wishing to be considered for this position should write to: Rita A. Scherrei, Director, Administrative Systems and Personnel Services, **University Research Library, UCLA, 405 Hilgard Ave., Los Angeles, CA 90024.** UCLA is an equal-opportunity, affirmative-action employer. We encourage all qualified persons to apply. Librarians at UCLA are represented by an exclusive bargaining agent, the American Federation of Teachers (AFT). This position is exempt from the bargaining unit.

Head, Physical Sciences and Technology Libraries, University of California/Los Angeles. Under the general direction of the associate university librarian for research and instructional services, the head of PSTL has administrative responsibility for coordinating the operations, long-range planning, and direction of 4 libraries—Engineering and Math Sciences, Chemistry, Physics, and Geology—a technical processing unit, and an interlibrary loan operation, including: policies, programs; user and technical service, including online support system applications and bibliographic instruction; collection management and control; personnel management, including recruitment, selection, training, staff development, supervision, and evaluation; funding; expenditure control; space utilization; statistical, evaluative, planning, and other reports; and the promotion of good relations with faculty, students, and the public. The head establishes priorities and objectives for PSTL based on consultation with the library and section heads regarding needs and available resources. The head consults with staff, library administrative officers, library committees, and faculty of the schools and departments served, as appropriate. The head of PSTL participates in the general planning and problem-solving activities of the UCLA Libraries, and the universitywide library system, as appropriate. Evidence must show that candidates have demonstrated competence in administration in a complex organizational environment, particularly: competence in planning, setting objectives and priorities, communicating, mobilizing individuals to group action, and organizing for effective action; capability of working with various academic, library, and public groups and individuals; understanding of the mission of higher education and faculty/student information needs in the sciences; familiarity with research trends in the physical sciences and technology; complete understanding of academic library services to the sciences and the ability to formulate, advocate, and relate goals and programs to the fields served. A degree in library science is desirable. Salary range is $22,776–$38,532. **This position will remain open until filled; candidates applying by Oct. 1 will be given first consideration.** The application letter should include a complete statement of qualifications, a full resume of education and relevant experience, and the names of at least 3 persons who are knowledgeable about the applicant's qualifications for the position. Anyone wishing to be considered for this position should write to: Rita A. Scherrei, Director, Administrative Systems and Personnel Services, **University Research Library, UCLA, 405 Hilgard Ave., Los Angeles, CA 90024.** UCLA is an equal-opportunity, affirmative-action employer. We encourage all qualified persons to apply. Librarians at UCLA are represented by an exclusive bargaining agent, the American Federation of Teachers (AFT). This position is exempt from the bargaining unit.

Head, Physics and Astronomy Libraries—75-percent position. Administration of libraries serving upper-division undergraduates, graduate students, and faculty in the departments of Physics and Astronomy. Physics Library holds 45,000 vols.; Astronomy Library holds 10,000 vols. Responsibilities include supervision of 2.5 support staff and .8 FTE student assistants, reference service, bibliographic instruction, collection development, and answering research inquiries. The head reports to the assistant director for department and undergraduate libraries. Librarians hold faculty rank and are expected to meet university requirements for promotion and tenure, including research, publication, and service. Salary: $15,300–$20,250. Required: MLS

from ALA-accredited program; 5 or more yrs.' relevant experience, including supervision; ability to communicate effectively, orally and in writing. Highly desirable: advanced degree in physics; demonstrated knowledge of the literature of the field; reference experience in an academic or research library. **Apply by Oct. 1** to: Sharon A. Sullivan, Personnel Librarian, **Ohio State University Libraries, 1858 Neil Ave., Columbus, OH 43210.** Include names and addresses of 3 references. Qualified women, minorities, and handicapped persons are encouraged to apply.

Head, reference department, University of California/Santa Barbara. Responsible for overall planning of departmental activities and administration of all resources in dept. of 14 librarians & 19 support staff. Manages reference collection of 30,000 vols. serving humanities & social sciences. Works closely with 9 other department heads of library. Requires MLS degree, understanding of educational role of library, & commitment to public service function of academic research library; understanding of online data services & bibliographic instruction & knowledge of reference sources appropriate to humanities & social sciences; collection management & foreign language desirable. Salary range for associate librarian/librarian is $24,828 – $42,000. **Send resume by Oct. 15** to: Margaret Deacon, Associate University Librarian, **UCSB Library, University of California, Santa Barbara, CA 93106.** UCSB is an AA, EOE.

Head of reference services department. Faculty, tenure-track position available in university library. Reports to director of libraries. Administers and participates in department of 3 reference librarians and 2+ FTE staff. Reference services include main reference desk, online searching, ILL, and reference collection development. Head of reference services works closely with head of bibliographic instruction and head of collection development to coordinate work of reference librarians. Candidates should demonstrate ability to supervise work of other library faculty and staff and leadership initiative required to respond to a growing university with rapidly diversifying curriculum. Required: ALA-accredited MLS, 5 yrs.' relevant library experience. Preferred: 2nd MA or PhD, research and publication record. Appointment at assistant librarian rank or above (equivalent to assistant professor). Salary: $20,000+ depending on education and experience. USA Libraries hold membership in SOLINET/OCLC and operate NOTIS, an integrated library system with an online catalog. USA Libraries are pursuing membership in the Association of Southeastern Research Libraries. The university includes colleges of Arts and Sciences, Business and Management Studies, Education, Engineering, Allied Health Professions, Nursing, Medicine, and Division of Computer Information Sciences, with 3 branch campuses serving nearly 10,000 students. University budget in excess of $100 million. Benefits include: 20 days' vacation, subsidized insurance, state retirement, subsidized TIAA/CREF option. **Submit resume and names of 3 references by Sept. 30** to: **Anita Bayles, Chair, University Libraries Search Committee, Library Administration, The University of South Alabama, Mobile, AL 36688.** An equal-opportunity, affirmative-action employer.

Instructional librarian. Reports to head, reference department. Assesses graduate/undergraduate instructional needs. Plans, implements, coordinates an integrated, comprehensive instructional program, utilizing existing library staff. Works with and advises faculty in instructional matters. Assists in the reference dept. Serves as subject bibliographer in engineering or science. Requirements: ALA-accredited MLS or acceptable equivalent; 3 yrs.' professional experience, including 2 in library instruction; effective communication skills; planning ability. Additional science/engineering academic preparation preferred. Salary: $18,300 minimum. **Application deadline Sept. 30.** Send letter of application, resume, and 3 letters of reference to: William F. Rogers, Associate Director, **Ohio University Libraries, Athens, OH 45701.** Ohio University is an equal-opportunity, affirmative-action employer.

Labor and industrial relations librarian, Michigan State University. Primary responsibilities: public service and collection development. Holdings in labor law, arbitration, collective bargaining, and human resources development. Staffed by 3 FTE. Reports directly to the director of School of Labor and Industrial Relations and to the head of resources and special services department of library. Qualifications: master's degree from accredited library school; minimum of 5 yrs.' professional experience with LIR collection; knowledge of database searching and bibliographic instruction; professional association membership. Minimum salary, $25,000 – $27,000. TIAA/CREF retirement. 12-mo. appointment. Starting date: Oct. 1, 1985. Apply to: Jack Stieber, Director, **School of Labor and Industrial Relations, Michigan State University, East Lansing, MI 48824-1032.**

Librarian of the Tozzer Library. To administer library of 152,000 volumes in fields of archaeology, biological and cultural anthropology. Located next to Peabody Museum, library is one of 11 units of Harvard College Library, serving Faculty of Arts and Sciences. Direction of 5 professionals, 10 support staff, and student help. Qualifications: MLS degree with minimum 4 yrs.' significant professional library experience in academic setting, including administrative and supervisory experience; academic background in anthropolgy; interpersonal and communication skills. McFarlan, University Personnel Librarian, **Harvard College Library, Cambridge, MA 02138.** An equal-opportunity, affirmative-action employer.

Librarian—serials cataloger. Southern Illinois University at Carbondale, Morris Library. Required: master's degree from ALA-accredited library school. Preferred qualifications: one or more yrs.' serials cataloging experience in a college or university library; bibliographic skills in French, German, Spanish, and/or other languages; experience with an automated system such as OCLC. Faculty rank, fulltime, 12-mo. renewable term appointment. University retirement system of Illinois, state paid life, medical and surgical insurance, liberal leave benefits including 25 vacation days and 11 holidays per contract yr. Salary $16,000 and up based upon education and experience. Position available immediately. **Application deadline Sept. 20.** Apply to: Don E. Wood, Chair, Search Committee, Serials Department, **Morris Library, Southern Illinois University at Carbondale, Carbondale, IL 62901.** The university is an equal-opportunity, affirmative-action employer.

Librarian II – IV/reference librarian. Under the general supervision of the head of reference, provides general reference assistance in the social sciences and humanities, participates in the library instruction and orientation program, and performs computer literature searches. May provide specialized reference assistance, library instruction, and select materials in psychology. Works a schedule which includes some evening, weekend, and holiday hrs. Must have an MLS from an American Library Association – accredited library school; educational background in one of the social sciences, preferably psychology; at least 2, preferably 5, yrs.' experience in this or a comparable library, including at least 2 in reference service; strong service orientation; excellent reference skills. Computer literature searching experience in more than one system (especially BRS and DIALOG) and in a wide variety of databases highly desirable. This position will be available in January 1985.

Reference/Bibliography Librarian

Instructor rank—MLS required. 2 yrs.' community college experience preferred. General college reference work, collection development and evaluation, preparation of subject program and holdings bibliographies, and bibliographic instruction. Science background highly desirable. 1984/85 academic-yr. salary range $13,000 – $15,000. **Mail letter and resume to be received by Sept. 28** to: **Somerset County College, Personnel Office, POB 3300-A, Somerville, NJ 08876.** An equal-opportunity, affirmative-action employer.

Salary range will be $20,000 – $30,000, commensurate with education and experience. **By Sept. 15,** please send resume to: R. F. MacDonald, **University of Massachusetts Library, Amherst, MA 01003.** An affirmative-action, equal-opportunity employer.

Life sciences reference librarian, science and technology dept., the Pennsylvania State University Libraries. Faculty position with responsibilities for reference service, general and subject-specialty collection development, online database searching, library instruction, and supervision of interlibrary loan procedures. Library is one of the leading agricultural and biological sciences libraries; has holdings over 250,000 vols.; serves agricultural, biological, and allied health programs of a major land-grant university, with a primary clientele of 8,000 students, faculty, and staff in 3 colleges. LIAS, Penn State Libraries' computer information system, provides direct and remote access. Requirements: ALA-accredited MLS or equivalent; educational background in a life science (agricultural, biological, or biomedical). Subject master's preferred. Foreign language, preferably European, and minimum 2 yrs.' experience in an academic or special library desirable. Potential for promotion and tenure considered. Salary and rank dependent upon qualifications, $18,000 minimum. Liberal benefits with choice of TIAA or state retirement and educational privilege. **Apply by Oct. 15.** Send letter, resume, list of 3 references to: Anne Minshall, **E505 Pattee Library, Box LS2, The Pennsylvania State University, University Park, PA 16802.** An equal-opportunity, affirmative-action employer.

Monograph Recon Project supervisor, Columbia University Libraries. This position will report to the head of the cataloging with copy department and have responsibility for assisting in the planning and implementation of the Monograph Recon Project, which involves the retrospective conversion of monographic catalog records, initially in the LC classes PE, PR, and PS. Duties will include participating in the development of project guidelines and design of workflow procedures; supervising the project, including the hiring, training, and revising of student assistants in basic cataloging, MARC tagging, and RLIN database searching and inputting procedures; ensuring that the project proceeds as scheduled; and maintaining quality control over the database. In addition to an accredited MLS, requirements are aptitude for analytical and detail work as demonstrated through previous relevant experience and/or superior performance in a formal course in cataloging; previous experience with machine-readable bibliographic databases, preferably RLIN; some experience with retrospective conversion projects desirable; a broad subject background, with a degree in the humanities preferred; the ability to work well with and supervise others; and a working knowledge of German and one or more Romance languages. Preferential consideration will be given to candidates with previous cataloging experience. Schedule: Monday – Friday, five 7-hr. days, including 5 – 9 pm each day. Salary

ranges: Librarian I, $19,000–$24,700; Librarian II, $21,000–$27,300. This is a temporary, 2-yr. position, with possibility of extension. **Deadline for applications is Oct. 12.** Submit resume, listing salary requirements and 3 references, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.** An equal-opportunity, affirmative-action employer.

Monographic cataloger (search reopened): Northwestern University Library. **Entry-level** position. Performs original and complex copy cataloging of monographs, including descriptive and subject cataloging, classification, and authority work, using AACR2, LCSH, DDC 19, and the MARC bibliographic and authorities formats. Works cataloged are from or about Africa, or by African authors. They may be on any subject, and in any of a variety of languages. Cataloging and authority work are performed on Northwestern's NOTIS (Northwestern Total Online Integrated System) library automation system, for inclusion in the union online catalog, and forwarding to the RLIN database. Some authority work may be performed for the Library of Congress's Name Authority Cooperative (NACO) program. Qualifications: MLS from an ALA-accredited library school, working knowledge of one or more foreign languages, preferably including French. Experience in library technical services, using an automated system, preferred. Some Africana background desirable, but not required. Salary: $16,000. **Applications received by Oct. 31 will be considered.** Send letter of application and resume, including names of 3 references, to: Lance Query, Director of Library Research, Analysis, and Personnel, **Northwestern University Library, Evanston, IL 60201.** An EEO, AA employer.

Reader services librarian (search reopened). Supervises and directs work of reader services department, including circulation, ILL, reserves, copying service, and periodicals. Participates in BI program, online database searching services, staffing reference desk (including evening and weekend hours), liaison program with academic departments, and general and reference collection development. Assist in preparing printed reference guide and teaching credit course in library research and bibliography. Member of administrative staff council. Supervises 2–3 FTE support staff and 21 student assistants. ALA-accredited MLS degree and at least one yr.'s professional reference and/or circulation experience required. Background in business or sciences desired. 2nd subject master's degree preferred. Salary from $19,000 to $21,000 for 12-mo. contract with faculty rank. Excellent fringe benefits. **Send letter of application, resume, and names of 3–5 references by Oct. 1** to: Wendell Barbour, Chair, Reader Services Search Committee, **Smith Library, Christopher Newport College, 50 Shoe Lane, Newport News, VA 23606.** An EOE, AA employer.

Reference librarian. Assistant librarian; one-half FTE; duties include reference desk, pamphlet file, library instruction, BRS searching. Requirements: MLS degree, 1–2 yrs.' academic reference experience; demonstrated ability to communicate with faculty and students, experience with BRS. Preferred: graduate degree in religion or theology, religion or theological reference experience, experience in library instruction, knowledge of one or more languages in addition to English. Salary range: $7,866–$10,039. **Deadline Sept. 15.** Send cover letter and resume and 3 letters of reference to: Head of Public Services, **Graduate Theological Union Library, 2400 Ridge Rd., Berkeley, CA 94709.** EOE.

Reference librarian with specialization in social sciences and government documents. Provides general reference service with 11 full-time reference specialists. Specialist activities include extensive online database searching, bibliographic instruction, department liaison, collection development, and the promotion of existing federal and state depository document collections. ALA-accredited MLS or equivalent required. Undergraduate major in one of the social sciences is preferred. Work experience with a documents collection and an advanced degree in a social science discipline are desirable. Tenure-track position. 12-mo. appointment, 24 days' annual leave, tuition remission, usual benefits. Salary ranges, dependent upon qualifications: instructor, $16,000–$18,000; assistant professor, $18,000–$20,000. **Send letter of application, current resume, and the names, addresses, and telephone numbers of 3 recent references by Oct. 15** to: Jill Keally, Personnel Librarian, **The University of Tennessee Library, Knoxville, TN 37996-1000.** UTK is an EEO, affirmative-action, Title IX, Section 504 employer.

Science librarian. Permanent, 12-mo., full-time; top range $24,000–$28,000 negotiable depending on qualifications and experience. Baccalaureate degree in chemistry and/or physics, MLS from program accredited by ALA. Additional subject master's preferred. Minimum 5 yrs.' relevant experience in science librarianship; online search experience, strong public service commitment and ability to communicate. Must comply with policies of faculty handbook including research, publication, and service to profession and community. **Submit resume (including names and addresses of 3 references) and all academic transcripts by Nov. 1** to: Sandra Carter, **General Library, University of New Mexico, Albuquerque, NM 87131.** AA, EOE.

Science librarian. Position to be filled between Oct. 15 and Jan. 15, 1985. Assists users directly at a central reference desk, takes part in the library instruction and collection development programs, provides computer searches, and serves as liaison with the faculties of engineering, computer science, mathematics, physics, chemistry, and geology. Qualifications: the successful candidate will be service-oriented, able to work effectively with both students and faculty, and committed to promoting library services and collections to the academic community. An ALA-accredited MLS is required. Undergraduate degree in the sciences required, but will consider candidates with library experience in the sciences. A 2nd graduate degree in a relevant field is desired and is expected for tenure. Salary and benefits: starting salary $17,000–$25,000 for 12-mo. appointment, depending on experience and qualifications. Successful candidate will be eligible for tenure review. TIAA/CREF, choice of medical programs. **Send letter of application and resume by Oct. 15** to: Marilyn Myers, Coordinator of Collection Development, **Box 68, Wichita State University, Wichita, KS 67208.** Finalists will be invited for an expense-paid interview. Wichita State University is an affirmative-action, equal-opportunity employer.

Serials cataloger (search reopened). Performs new cataloging, recataloging, and classification of serials at all levels of difficulty for Northwestern's automated system (NOTIS) using the Dewey Decimal Classification, Library of Congress Subject Headings, and the Anglo-American Cataloguing Rules. Functions as liaison to catalog management section of the catalog department and assists the senior serials cataloger with problem solving and other difficult work of the serials catalog section. Qualifications: MLS from an accredited library school; working knowledge of 2 or more languages, preferably including French and German; ability to catalog in unfamiliar languages using a dictionary. Serials cataloging experience in an automated system using the MARC serials and authorities formats preferred. Salary: $16,000–$18,000. **Applications received by Oct. 31 will be considered.** Send letter of application and resume, including names of 3 references, to: Lance Query, Director of Library Research, Analysis, and Personnel, **Northwestern University Library, Evanston, IL 60201.** An EEO, AA employer.

Serials librarian (search reopened). To catalog a periodicals collection, supervise participation in statewide union list of serials using OCLC, and maintain a local periodicals database. As time allows, other cataloging may be assigned. Qualifications: ALA-accredited MLS; working knowledge of AACR2, LC classification and subject headings as applied to serials; experience with an automated cataloging system, preferably OCLC; previous serials cataloging and supervisory experience preferred. Salary $17,500 minimum, commensurate with education and experience. Temporary 2-yr.-term contract with faculty status. **Deadline: Oct. 15.** Send letter of application, resume, and 3 letters of reference to: **Director's Office, Olson Library, Northern Michigan University, Marquette, MI 49855.** Please describe relevant experience and coursework. An AA, EO employer.

LIBRARY EDUCATION

Library science: assistant professor or associate professor depending on qualifications. Position available August 1985, or January 1985 if candidate selected is available. Responsibilities include teaching graduate courses in at least 2 of the following areas: reference and information sources and services (including automated information services); research methods in librarianship; and information science in librarianship. Other teaching areas dependent on candidate's interests and needs of program. Other responsibilities include advising students and research and publication. Doctorate in library science or related field required. Master's degree from ALA-accredited program required, as well as 3 yrs.' experience in libraries or university teaching with some library science teaching desirable. Salary $22,000 negotiable for assistant professor for 9 mos.; $25,000 negotiable for associate professor for 9 mos. Tenure-earning position. **Application deadline Oct. 1.** Send resume and references to: John McCrossan, Department Chair, **Department of Library, Media, and Information Studies, HMS 301, University of South Florida, Tampa, FL 33620.** Note: according to Florida law, applications and meetings regarding this position are open to the public. USF is an equal-opportunity, affirmative-action employer.

1–3 assistant professors, library information studies, University of Wisconsin–Madison. Teach, conduct research, and advise MA and PhD students in areas of public services, children's and youth materials and services, and bibliographic organization. Knowledge of technological applications and competency to teach in foundation areas required. Professional experience in specialty preferred. Qualifications: doctorate in library/information studies or cognate disciplines, or candidacy; promise of significant research contributions. Salary minimum $21,000. **Closing date: Jan. 11, 1985.** For fuller description, contact: Mary Woodworth, Assistant Director, **School of Library and Information Studies, University of Wisconsin–Madison, 600 N. Park St., Madison, WI 53706.**

Visiting appointment. The UCLA Graduate School of Library and Information Science is seeking to make a one-yr. visiting appointment in the area of cataloging and subject analysis. This appointment could lead to a permanent position. Applications are desired from candidates with a doctorate, or from persons about to receive one, with demonstrated experience or strong potential in teaching, with interest and competence in theoretical and empirical research, and with knowledge of professional practice. Rank and salary will depend upon record of experience and competence with the following established ranges: assistant profes-

sor $25,500–$29,000; associate professor $30,600–$34,300; professor $37,100–$49,600, all on a 9-mo., academic-year basis. The appointment will be as of fall quarter, 1985, or earlier. **Applications close Nov. 30.** Inquire and send resume with a list of references to: Robert M. Hayes, Dean, **Graduate School of Library and Information Science, University of California, Los Angeles, CA 90024.** The University of California is an equal-opportunity, affirmative-action employer.

MEDICAL LIBRARY

Agriculture–veterinary medicine librarian. Provides special library reference services to faculty and students of College of Agriculture and Veterinary Medicine. Responsibilities include reference and online information retrieval, bibliographic instruction, and collection development in veterinary medicine. ALA-accredited MLS, or equivalent, required. Undergraduate and/or graduate degree in agricultural, medical, or biological sciences preferred. 3 yrs.' experience in health sciences or science library or medical librarian certification is desirable. MEDLINE training and/or experience is desirable. Tenure-track position. 12-mo. appointment, 24 days' annual leave, tuition remission, usual benefits. Salary ranges, dependent upon qualifications: instructor, $16,000–$18,000; assistant professor, $18,000–$20,000. **Send letter of application, current resume, and the names, addresses, and telephone numbers of 3 recent references by Oct. 15** to: Jill Keally, Personnel Librarian, **The University of Tennessee Library, Knoxville, TN 37996-1000.** UTK is an EEO, affirmative-action, Title IX, Section 504 employer.

Veterinary medicine branch librarian (search reopened). Mississippi State University Libraries. Qualifications: ALA-accredited MLS degree strongly preferred. Relevant subject degree or substantial relevant library experience in biomedical and/or natural sciences; computerized literature search skills; minimum of 2 yrs.' work experience in an academic or research library, including administrative and /or supervisory experience; effective oral and written communication skills, and the ability to work effectively with faculty and students required. Duties: overall operation and administration of the branch library to include: supervision of library assistants and student assistants; reference service to faculty and students; branch library collection development activities; bibliographic instruction; preparation of reports and publications; and other duties as assigned. Benefits: include faculty rank, status, privileges, and responsibilities; enrollment in the state retirement system; comprehensive medical coverage; university holidays and annual and health care leave. Salary: approximately $18,000–$20,000, commensurate with qualifications and experience. Available immediately. This position will be filled only if a suitable applicant is found. **Application procedure: send letter of application, resume, and official university transcript, including names and addresses of at least 3 references (preferably work) by Oct. 1** to: Chair, Search Committee, Veterinary Medicine Branch Librarian, **Mississippi State University, POB 5408, Mississippi State, MS 39762.**

Health Sciences Librarian

Argonne National Laboratory, located 20 miles southwest of the Chicago Loop, operates a system of 8 libraries in a campus-park setting, and has an opening for a health sciences librarian to be in charge of its Biological and Medical Sciences Branch Library. The library serves groups working in biology and medicine, cancer research, oncology, physiological effects of radiation, and biotechnology. This branch library has a substantial collection of journals and monographs to support a quality research program, and receives over 225 current journal subscriptions. The librarian will perform literature searches in online databases and in manual indexes and abstracting sources, select the materials for the collection, maintain the collection in good order, and supervise clerical employees. Also, the librarian must make users aware of library services available, interpret the resources to them, and assist and train them in using the library's resources and services.

Credentials desired include a master's degree in library or information science, undergraduate degree or major in biological sciences, and 5 yrs.' experience in a biological or health sciences library performing reference work, searching, and public services. Experience in online searching is essential. The laboratory is operated by the University of Chicago for the U.S. Department of Energy. We offer a stimulating and challenging work environment and an outstanding compensation and benefits package which includes TIAA/CREF as one of its options. Starting salary range is $1,778–$2,227 per mo. For confidential consideration, send resume to:

Rosalie L. Bottino
Box J-TIS-24515-(1J)
Argonne National Laboratory
9700 Cass Ave.
Argonne, IL 60439

Affirmative-action, equal-opportunity employer

MUSIC LIBRARY

Music cataloger: University of Georgia, **entry-level** position. (Salary minimum $15,300.) Duties: responsible to the head, nonbook cataloging section for performing original cataloging and for supervising 2.5 support staff in copy cataloging of music scores and sound recordings in all languages; serving as resource person for music cataloging; and participating in the cataloging department's policy-making process. The department, comprised of 30 staff members, catalogs over 40,000 books, serials, microforms, and nonprint materials yearly. Qualifications: MLS from ALA-accredited library school; bachelor's degree in music; knowledge of AACR, AACR2, and LC classification and subject headings; ability to work with broad range of languages; good oral and written communication skills; ability to establish and maintain effective working relationships; experience with OCLC cataloging desired; supervisory experience desired; knowledge of other automated systems applicable to libraries desired; strong interest in academic librarianship desired. **Application procedure: send letter of application by Oct. 12,** including resume and names of 3 references, to: Bonnie Jackson Clemens, Assistant Director for Administrative Services, **University of Georgia Libraries, Athens, GA 30602.** This position will be filled only if suitable candidates are found. An equal-opportunity, affirmative-action institution.

NETWORK

Network librarian. Immediate opening for a highly motivated, energetic individual for the position of network librarian for statewide OCLC network services. Minimum requirements: MLS or equivalent, 3 yrs.' cataloging experience, knowledge of MARC formats, AACR2, OCLC cataloging subsystem, effective oral and written communication skills, and ability to work in team environment. Familiarity with other OCLC subsystems, microcomputers, and training experience highly desirable. Duties include assisting libraries in the implementation of OCLC, training, travel (20%–30%). The Public Library *of the* City of Boston

The trustees of the Public Library of the City of Boston invite nominations and applications for the position of director and librarian.

The Boston Public Library has a long tradition and significant involvement in the educational and cultural affairs of the city of Boston and of the commonwealth of Massachusetts. It was the first public library in the country to establish a branch system and its rich research collections have been the subject of study by scholars from around the world. Today, the trustees seek a director who will bring leadership, inspiration, and direction to the staff of 500; vitality and responsiveness to its community of users; and vision and expertise to the requirements and complexities of collection management and of information technology.

The library's resources include some 15 million items in a circulating collection including 26 branch facilities located in neighborhoods of Boston and in a research library including special collections that are world-renowned. The budget from a variety of sources is approximately $17 million. The library serves as headquarters for the Eastern Massachusetts Regional Library System and as the Library of Last Recourse for the commonwealth of Massachusetts. It is a member of such cooperative organizations as NELINET, the Boston Library Consortium, the Center for Research Libraries, and the Association of Research Libraries.

Minimum qualifications: MLS or graduate degree from an ALA-accredited library school and 10 yrs.' progressively responsible library experience including 5 yrs.' administration and management. Residency in the city of Boston required. *Salary:* $60,000. Full job description available on request. Interested and qualified applications or nominations are welcomed by: **President, Board of Trustees, c/o Jane Manthorne, Clerk of the Corporation, Boston Public Library, Boston, MA 02117.**

Applications should be received by Nov. 1.

Copies of applications or nominations and inquiries should be directed to: **Margo Crist, Advisor to the Board of Trustees, Central Massachusetts Regional Library System, Salem Square, Worcester, MA 01608; 617-799-1654.**

The Boston Public Library is an equal-opportunity, affirmative-action employer.

In pursuit of "Nature Boy"

A dozen puzzlers for library trivialists

by George M. Eberhart

Being a librarian these days isn't easy. It requires nerve, cunning, omniscience, a certain amount of schizophrenia, and a pronounced talent for juggling figures on a tightrope perched high above a menacing cutback.

Perhaps the most awesome task comes at nonwork-related social gatherings and trivia-game parties, where librarians are expected to be walking encyclopedias.

Though you may feel comfortable with science, literature, entertainment, or even sports questions, how skillful are you in the trivia of your own profession?

Here is your chance to find out. Shrewdly answer the following questions, then see the answers on page 586.

1. The first woman to be employed in an American library was probably Mrs. A.B. Harnden, who was hired in 1856 at:

a. Yale University
b. Mercantile Library of San Francisco
c. Boston Athenaeum
d. Vassar College
e. Astor Library
f. Providence P.L.

2. Which pope took initial steps to transform the unorganized papal collections into the Vatican Library?

a. Boniface VIII
b. Gregory the Great
c. Innocent VIII
d. Nicholas V

3. Which U.S. academic library displays, on an outside wall adjacent to the main entrance, a limestone sculpture of a student "Nature Boy" reading a book?

a. Washington State Univ.
b. Chaffey Col.
c. Lewis & Clark Community Col.
d. Univ. of Delaware

4. In which Beach Boys song does the heroine go cruising in her father's car under the pretext of visiting the library?

a. Surfer Girl
b. Car Crazy Cutie
c. Lana
d. Shut Down
e. Fun, Fun, Fun
f. Little Honda

5. Which country was the first to feature a library on its postage stamps?

a. Algeria
b. Great Britain
c. Spain
d. United States
e. Iceland
f. Belgium

6. Which database vendor would you use to search for ecological literature on the Pacific islands under U.S. jurisdiction?

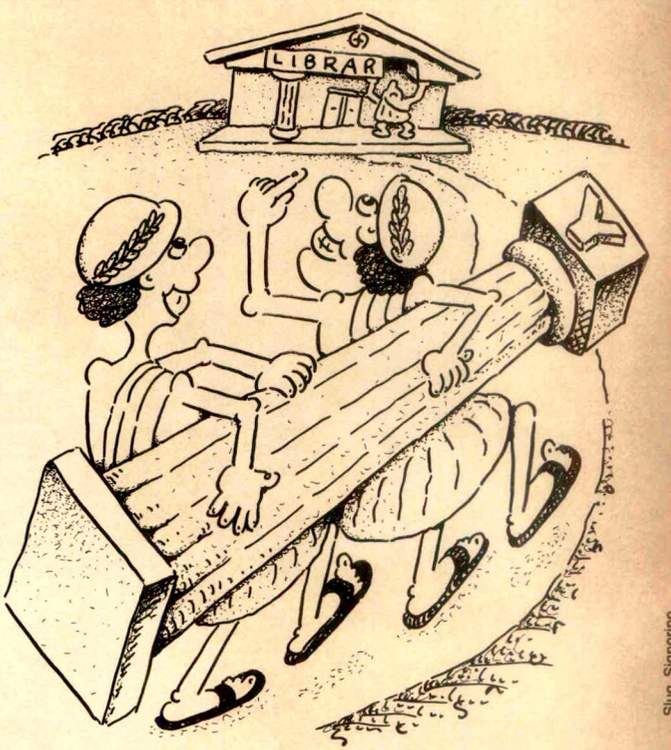
a. DIALOG
b. ISI
c. SDC
d. BRS

7. Where was the 1960 ALA Annual Conference held?

a. Chicago
b. Niagara Falls
c. Kansas City
d. Montreal
e. Dallas
f. Washington, D.C.

8. Which Roman consul constructed the first public library in Rome?

a. Sulpicius Gallus
b. Asinius Pollio
c. Marc Antony
d. Mucius Scaevola



Slug Signorino

9. Where would you go to see the largest U.S. collection of materials on historical witchcraft?

a. Salem State Col.
b. Cornell University
c. Miskatonic Univ.
d. Columbia Univ.

(Continued on p. 586.)

George Eberhart is on the staff of the ALA Association of College and Research Libraries, for which he edits *College & Research Libraries News*. His knowledge of trivial data and insignificant events is legend.

10. Which author wrote a mystery novel centering on the macabre death of the mythical "Werner-Bok" Library manuscripts librarian?

a. Charles A. Goodrum
b. Amanda Cross
c. Michael Innes
d. Jane Langton
e. Edmund Crispin
f. Robertson Davies

11. Which European capital has installed a library in its subway system to encourage, not readership, but ridership?

a. Berlin
b. London
c. Paris
d. Geneva

12. Which public library in 1980 prohibited children from checking out the Bible without parental permission?

a. Springfield, Mo.
b. Columbus Co., N.C.
c. Warsaw, Ind.
d. Wheeling, W. Va.

The answers

1. c, Boston Athenaeum. She was hired by William F. Poole to be his assistant, despite the warning of Poole's predecessor that "the presence of women in a library containing examples of 'the corrupter portions of the polite literature' would cause 'frequent embarrassment to modest men.' "

2. d, Nicholas V in 1450. A papal library or at least a collection of books had been in existence at least since Gregory the Great in the seventh century. Nicholas tripled the holdings by bringing manuscripts from Germany, England, and Denmark.

3. a, Washington State University, Pullman. The sculpture was completed in 1950 by Dudley Pratt and commemorates an early instance of "back-to-nature" living in southern California.

4. e, Fun, Fun, Fun. She went directly to the hamburger stand, so it "seems she forgot all about the library that she told her old man." And, of course, she had "fun, fun, fun" until her daddy took the T-Bird away. Released in February 1964.

5. f, A 1915 Belgian stamp shows the old Louvain University library building, destroyed a year earlier in the war. Next oldest is a 1916 official stamp of Spain that featured the National Library in Barcelona.

6. c, SDC offers the Pacific Islands Ecosystems database, prepared by the U.S. Fish and Wildlife Service and NTIS.

7. d, Montreal. This was the first and only joint ALA-CLA conference. Its theme, "Breaking Barriers," was not acknowledged by Montreal cab drivers, who were accused of stubbornly refusing to understand either French or English.

8. b, Asinius Pollio built the library in about 35 B.C. on the site of a temple to the goddess of liberty, Libertas, on the Aventine Hill.

9. b, Cornell has nearly 3,000 printed works and manuscripts in its Witchcraft Collection, begun in the 1870s by Cornell's first president, Andrew Dickson White. A catalog of the collection was published in 1977 by Kraus-Thomson. If you answered c, Miskatonic University, you must be practicing witchcraft already—for this is H.P. Lovecraft's apocryphal institution of Arkham, Mass., in whose library might be found the "monstrous and abhorred *Necronomicon* of the mad Arab Abdul Alhazred."

10. a, Charles A. Goodrum's *Dewey Decimated* (1977) is also about thefts in the Werner-Bok Library. Goodrum, retired director of the Office of Planning and Development at the Library of Congress, also co-authored with Helen Dalrymple *The Library of Congress* (1982).

11. c, Paris. This year the transit system is conducting a survey to determine if further underground bibliothèques should be added.

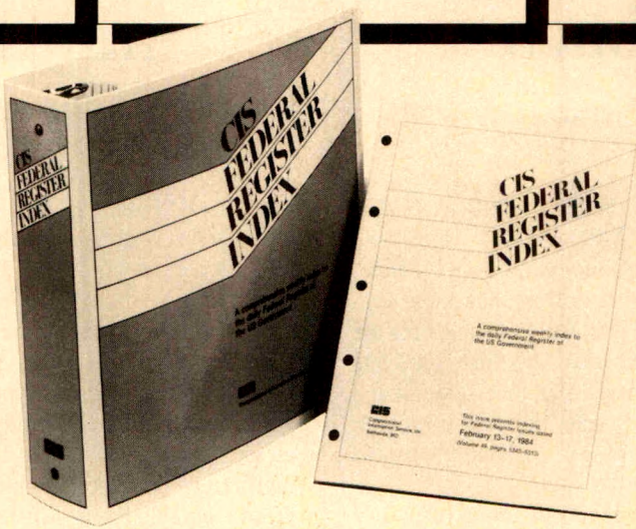
12. b, The Columbus County Public Library classed the Bible as an adult book because it was considered too complex for children to understand easily. □

Why search the Federal Register page-by-page?

Check for regulations with one look-up

Find proposed rules and notices in seconds

Monitor the latest federal announcements



Now there's a faster, more reliable way to keep posted on federal announcements, rule changes, and deadlines . . . the CIS Federal Register Index (FRI).

Introducing the new weekly CIS FEDERAL REGISTER INDEX

Save time
With FRI you can hone in on *exactly* the information you need—in seconds. Just look under a common-sense subject heading that describes your interests. There you'll find a descriptive notation on each relevant new item in the Register.

Find deadlines at a glance
FRI's "calendar" section gives you an easy-to-scan rundown of all the upcoming comment deadlines, reply deadlines, hearing dates, and effective dates. It's a convenient checklist to assure you don't overlook important opportunities—or dangers.

Get currency plus convenience
FRI is published weekly, so you'll have time to act before deadlines expire. Plus you get regular cumulations, so you have fewer look-ups when searching for items that appeared in past issues of the Register.

Call for a free issue
Find out what this innovative—yet economical—new service can do for you. Call our toll-free number for a free sample issue. Or fill in and mail the coupon below. There is no cost or obligation whatsoever.

Defending the need to weed

Two librarians respond to criticism of weeding practices

The Boors strike back

by Bruce Farrar

IT WAS WITH GREAT INTEREST AND A SOUR stomach that I read J. Wesley Miller's essay "Throwing Out Belles Lettres with the Bathwater" (*AL*, June, p. 384–85). The library profession is once more embroiled in the battle of the Bores vs. the Boors. The Bores are the hoarders, who wish to lay up treasures on this earth. The Boors, like myself, would like to toss out all that old junk and get something new in a gaudy dust jacket that will circulate. Professor Miller has thrown the glove; I'd like to reply.

Miller appears to have gotten a good stiff dose of reality shock when he ventured out of his Ivory Tower and collided with the 20th century at his local public library. Three cheers for the public libraries of the state of Vermont. I can't think of a bigger waste of the taxpayers' money than establishing Miller's collection of unwanted books. Public libraries are run for the educational benefit and reading enjoyment of their users. Librarians buy and retain books that people want to read based on public demand, not on the size of the library. The medieval mystique of the library as a warehouse for aging codices went out with the turn of the century. Let me quote that arch-Boor, John Cotton Dana, on the subject:

> In general, remember always 1) that the public owns its public library, and 2) that no useless lumber is more useless than unused books. People will use a library, not because, in others' opinions, they ought to, but because they like to.[1]

Public librarians have a moral obligation and a public duty to provide what their users want to read. We don't have a duty to clutter up the shelves with outdated esoterica. Shelf space is not free. It costs the taxpayers of Ohio County, West Virginia, for example, about $11.50 per square foot per year. Professor Miller probably hasn't priced library shelving

Bruce Farrar is director of the Ohio County Public Library in Wheeling, W. Va.

Everybody's *not* doing it

by Bill Bailey

IN HIS RECENT ARTICLE "THROWING OUT Belles Lettres with the Bathwater," J. Wesley Miller expresses contempt for weeding practices followed in today's libraries. "An infestation of boors has taken control of our libraries. They don't know what they're doing, and they're proud of the job they're making of it." The librarian-boors discard or put up for sale books that are still very much "alive." Through ignorance of contents many a classic is excised, and the librarians responsible for preserving literary heritage commit a grave injustice each time they weed a notable book. Most libraries serve the public and that public deserves better than to have books taken off the shelves in a capricious fashion. His voice alarmed, Miller has addressed a topic as controversial as any in librarianship. He deserves some answers.

Miller laments, "Unfortunately, there are no journals providing counsel to deaccessioning librarians." In fact there is an insightful one, *Collection Management,* which actively seeks articles on "weeding and thinning." A number of other pertinent articles on the subject appear throughout library literature to attest to an abiding interest in avoiding Miller's complaint. Decrying weeding, Miller insists that "never before has it been done on the scale, or for the motives, with which it is being done today." Not so, since overflowing book shelves have always been a problem for libraries. Not every library can afford to build a new structure to accommodate expanding collections. Therefore weeding has been and will ever remain a necessary evil.

Miller's claim of excessive weeding is refuted by the library-world axiom that extensive holdings denote collection strength. A general reluctance to weed is more nearly the norm. As for those hinted-at reprehensible motives for weeding, there are none: few, if any, librarians delight in tossing out books.

The disposal of the works of Arminius and the Rev. Sydney Smith at a small liberal arts college shocks Miller. He

Bill Bailey is a reference librarian at Sam Houston State University, Huntsville, Tex.

The Boors strike back

recently; I have, and I'd rather spend the money on books that will be read than on storage racks for books that won't.

Better read than dead

If a book's not read, it's worthless. Learning is a process that actively involves the mind of the learner; it's not an object that's passively stored on the shelf. Any library that loses sight of that distinction is a failure. The purpose of the library is to promote reading, not to store books. Miller's statement that "Thackeray is a green binding with gold stamping and beveled boards" is the most bizarre epistemological aberration I have ever encountered. Thackeray is nothing unless someone opens the covers and reads what he has to say. And librarians know from our circulation records that the reading public is many times more likely to do that if the covers are encased in a modern dust jacket with a plastic cover.

The greatest service a librarian can do in the cause of literature is to buy a paperback edition of a classic with a four-color cover.

The greatest service a librarian can do the cause of literature is to buy a paperback edition of a classic with a four-color cover and put it out on the new book shelf. Doing so tripled our library's circulation of *Anna Karenina* and *Resurrection* last year. It's the reading and thinking that count, not the binding. To pretend that learning is being advanced by warehousing worthless bundles of paper is economic folly and intellectual fraud.

Cool on Cooper

Old books go to the book sale because they're no longer read, not because of their age. Miller pays lip service to the winnowing and sifting that allows classics to emerge, but he's unhappy when librarians, acting on the information provided by their clientele, actually do it. Taste may be cyclical, but I hope the literary taste of the reading public never again sinks so low that James Fenimore Cooper comes back in vogue. Does Miller really think Cooper is playing ball in the same league with Henry James? If he does, he shouldn't make cracks about other people's education. When I was growing up in Vermont we had an earthy word for statements like "The whole novels of Cooper are a natural and social ecology of the early years of the Republic. . . ." Trying to learn anything about the early Republic from Cooper is like pretending to study early 20th-century Africa by reading *Tarzan of the Apes*.

Cooper's prose isn't a cultural treasure, it's a national embarrassment. It doesn't bother me that his outdated, poorly written, third-rate drivel is headed for the book sale. It's just too bad that those pedantic reading assignments are keeping *The Deerslayer* from going out with the rest of the junk. I'd

Everybody's *not* doing it

considers both of these writers essential to the study of English literature. They may well be; but if they are not read at the unnamed library in question they become expendable for that library alone, but not for all libraries. Large research collections are always close enough at hand to house the esoterica. The small liberal arts college committed no sin by letting them go; space was needed and another library profits from the unwanted items.

Weeding alarmists fail to distinguish between the two types of basic collections: the research collection and the lean, tailor-made one. The research collection is intended to be inclusive, and the lean concept is just that—exclusive of fat, or in this case, of dust. Not every library can hold every book. Why not fault the library for not having all books germane to Milton? If Harvard or Yale deaccessioned Arminius then alarm should be sounded. But for a small liberal arts college to dispose of little-used books to gain space is not dereliction.

Failure of library schools to teach students about the great books of the past is another of Miller's regrets. Here he is dead right; it takes a lifetime of reading in any one discipline to know some of the important titles. For the generalist librarian multiply that lifetime of reading by the number of disciplines in the world of learning. That is an astonishing galaxy of titles to remember. No one person can expect to achieve full competency in this endeavor. There is assistance, though, in the form of annotated bibliographies, guides to the literature, etc. that a librarian can call on first to check weeding decisions. Later on, experience and subject specialization combine to make the young librarian knowledgeable regarding the great books of the past. Even if a fledgling librarian were to bypass four years of college to complete a four-year great books program, that librarian would probably only scratch the surface of comprehensive bibliography.

Cash or trash

Miller detests the sale of books to raise money. Yet libraries in no way recoup their initial investment unless they have a Gutenberg Bible for sale. Libraries sell their unwanted books because it is next to impossible for a librarian to trash-can a book. So it is hoped the book will find a home and a devoted reader by giving it away for a song. Those books that turn a pretty penny are not mistakes in weeding; the offering library is fully cognizant of what the book is worth for sale or trade. Often a rare book that is a stray in one library fits in nicely in another collection and should by all means go there. To even faintly imply that libraries sell their books to make money at the expense of keeping the collection intact is absurd.

Miller believes that interlibrary loan is ineffective. This does not correspond with day-to-day reality in libraries. Most requests for loans are honored and are either inexpensive or free. All researchers have at one time or another gone to the stacks and wished more were there. Interlibrary loan ameliorates this situation, and patrons are often surprised at the service in light of recent declines in ready assistance; and telecommunications will make interlibrary loan even more viable in the future.

"Classics should persist," asserts Miller. "Taste is always

The Boors strike back

like to second the opinion of that notable American Boor, Mark Twain:

> Cooper's art has some defects. In one place in *Deerslayer,* and in the restricted space of two-thirds of a page, Cooper has scored 114 offences against literary art out of a possible 115. It breaks the record.[2]
>
> Now I feel sure, deep down in my heart, that Cooper wrote about the poorest English that exists in our language, and the language of *Deerslayer* is the very worst that even Cooper ever wrote.[3]

Unread herring

The red herring dragged across the trail by the Bores is that if libraries discard unread books, the classics will end up in the trash and literature will be in peril. But Bores are unable to distinguish literature from its trivial, middlebrow byproduct, *belles lettres*. They wouldn't know a classic if it bit them. Books become classics because they continue to be read, not

Boors are undertakers, not murderers. We don't kill books, just dispose of the dead ones.

because they're listed in the *Short Title Catalogue*. Henry James isn't going to suffer from a book selection policy based on demand. "Literature is news that STAYS news."[4] The reason *The Iliad* and *The Odyssey* are still around is their great popularity in antiquity. There were a lot of copies around to survive the ravages of time. They still circulate in Ohio County, and I'll bet they still circulate in boorish Baltimore County, Maryland. That fact saves them from the ravages of the Boors. Those books earn their keep because they're read. If the copies in your local public library aren't circulating, they probably need a new plastic dust jacket.

Miller's most serious charge is the one he plucks out of Milton: censorship. Are Boors guilty of intellectual murder? I think not. Boors are undertakers, not murderers. We don't kill books, just dispose of the dead ones. Everything this side of paradise dies. That's not a comfortable fact to live with, but it is a universal truth. The sad fact of the matter is that if a book hasn't circulated in the past seven or so years, the chances are overwhelming that it will never be read again.[5] And what do you do with a dead book? ". . . sell it, and buy a live one."[6] □

Notes

1. John Cotton Dana, *A Library Primer,* 5th ed. (Chicago: Library Bureau, 1910) p. 15.

2. Mark Twain, "Fenimore Cooper's Literary Offences," *North American Review,* 161 (July 1895), p. 1.

3. *Ibid,* p. 12.

4. Ezra Pound, *ABC of Reading* (New York: New Directions, 1960, c1934), p. 29. This one gem makes the whole crackpot book worthwhile.

5. Daniel Gore, "The View From the Tower of Babel," *Library Journal,* 100 (Sept. 15, 1975), p. 1599–1604.

6. Dana, *op cit,* p. 49.

Everybody's *not* doing it

cyclical" and libraries must heed this law of life. Of the authors he names, "Prescott, Froude, Parkman," it cannot be envisioned that most libraries would dispose of their works. The aforementioned Arminius and Rev. Sydney Smith are debatable, but not "Irving and Longfellow." Miller loves the old art of bookmaking with the leather bindings and all the trimmings; so do the rest of us. Fine, old books must be cared for and those libraries not involved in preservation should offer their treasures to other libraries where proper attention is assured. A new edition of a classic "in modern dust jacket encased in plastic cover" is not the same as the original, Miller grieves. Certainly it is not as wonderful to look at or to hold, but the new edition can contain critical remarks to illuminate the text. Of joy to the scholar is a fine binding; of equal satisfaction is a note that defines an archaic word or identifies a person of the day.

In conclusion Miller delineates his ideal weeder as the "most learned, experienced, and conservative of multidisciplinary information specialists." Meeting this description is not difficult for an academic library with a faculty of specialists to draw from. Public and special libraries face more of a challenge. In 1902 Charles William Eliot, president of Harvard University, voiced concern, "I admit at once that the means of just discrimination between books in use and books not in use are not easy to discern or to apply; but I maintain, nevertheless, that the search for these means should be diligently prosecuted, and that every reasonable suggestion of means of discrimination deserves careful attention."

Weeder's advisory

Published guides to weeding are available, one of the most thorough being *Weeding Library Collections—II,* by Stanley J. Slote. It is assumed that most libraries follow a weeding policy that attempts to avoid the mistakes exampled by Miller. A few recommendations for judicious weeding are:

1) Every item to be weeded should receive review by at least three responsible parties.

2) When a difference of opinion occurs on whether to retain or discard, those differences should be put in writing for later jurying.

3) Books and material thought to be of lasting value, though still to be discarded, should be advertised to other libraries.

4) Books slated for removal should be checked on OCLC or other comprehensive lists for availability in the area or state. If few or no regional libraries hold the book then it should be retained.

J. Wesley Miller harms his argument by lambasting all librarians for the oversights of a few. Everybody's *not* doing it—that is, destroying collections by weeding out classics. Miller undermines his complaint when he asserts that librarians "don't know the collection" and that they believe a person "strange" who asks for a dusty volume and that librarians enjoy "to play these games" of weeding without thinking. The fact of the matter is that librarians, conservative by nature, do take precautions as they weed and usually weed infrequently because of the seriousness of the task. No doubt Miller will continue to collect his stories of abuse, but they are blue-moon stories at best. □

"We're a small library, with a small library's budget."

"But thanks to the ISI® Grant Program, we can afford the big library coverage and the currency of the Arts & Humanities Citation Index™ and the Social Sciences Citation Index®."

For over ten years, the ISI Grant Program has been helping "small" libraries just like yours purchase ISI's major indexes at significant discounts. Today, libraries at California State College, Eastern Kentucky University, the Illinois State Library, and the Minneapolis Public Library are just a few of the institutions that own ISI indexes as a direct result of these discounts. Thanks to the ISI Grant Program, the patrons of these libraries now have access to the thorough, precise literature search capabilities of the *Arts & Humanities Citation Index* and the *Social Sciences Citation Index*.

Isn't it time *your* library discovered the ISI Grant Program? To find out how your library can qualify, just mail the coupon. We'll send you a free, no-obligation evaluation form that will help us determine your library's eligibility. Or, if you'd like more information about the ISI Grant Program, call our Customer Services Department at 800-523-1850, extension 1371. In Pennsylvania, call collect 215-386-0100, extension 1371.

Send me a preliminary application form for the ISI Grant Program. I am interested in purchasing:

- ☐ *Social Sciences Citation Index®*
- ☐ *Arts & Humanities Citation Index™*

Academic-year openers: Three ideas from the field

1. Job information wins the hearts of alumni

by Barbara Woolsey

Alumni of universities and colleges often appear among the members of Friends groups and are substantial contributors to library funding drives throughout the country. But rarely can one find mention of academic libraries offering special assistance to alumni.

Help for job-hunting alumni was offered by reference librarians at Meriam Library, California State University/Chico, recently through an article in the alumni journal, *The University Today*. Meriam Library, a part of the School of Information Services, headed by Dean James May, is situated in the northeast section of California, hard-hit with unemployment. So an outstretched hand to alumni seemed appropriate.

The article pointed out that job-hunting alumni, as well as graduating seniors, would find many resources to help them in the library, and that reference librarians would be particularly glad to greet returning alumni.

The article listed the sort of materials normally used by graduating seniors to research prospective employers and mentioned our telephone book collection, which is complete for California and includes major cities throughout the country. We cited help-wanted ads in the national and regional newspaper collection as a source of jobs, as well as employment notices in specialized periodicals such as *Chronicle of Higher Education*. Reference staff have compiled a list of employment-related examinations and keep it at the reference desk.

Alumni considering re-training were offered such resources as our large college-catalog collection, the *Dictionary of Occupational Titles*, and *Occupation Outlook Handbook*.

The article concluded with information on copying facilities, location, parking, and library hours. We pointed out that all patrons are treated with respect and may use any materials in the building; but only members of the Alumni Association are eligible for borrowing privileges on their courtesy cards.

According to Peter Watson, head of Access Services, alumni are the largest group of courtesy card patrons, constituting 388 of 1,578 card holders in 1983–84. Because of our new online catalog and circulation system, statistics are now readily available on alumni use of library materials. The statistics do not include current periodicals or government documents, but do show individual transactions by alumni each month. These numbers have increased dramatically. In April 1983, there were 97 transactions; in April 1984 they totaled 636.

Furthermore, the Alumni Relations office is now keeping statistics on alumni who join the association because of solicitation versus those who walk in asking to join in order to use the library. Of the total dues-paying members of 698 in 1983–84, 357 were among those who joined to use the library.

Chico's Meriam Library does not have a Friends group; however, the Association for Northern California Records and Research has many members who are Chico alumni and has contributed heavily in time and money to the Special Collections Department. □

Barbara Woolsey is reference librarian at California State University/Chico.

Short of cloning one's self, one of the best ideas for getting the job done this year is to get help from friends—alumni, library students, or, as Pat Mosley knows (above), home-made teaching machines.

2. Where to find a bibliographic-instruction corps

by Steve Ellis

After teaching nearly a dozen Bibliolabs, Claudia Rudolph could guess why students were spending a sunny, mid-quarter afternoon in the University of Washington's Odegaard Undergraduate Library.

"Term papers will be due soon, and they realize they'd better figure out how to do the research," said Rudolph, a second-year student in the university's Graduate School of Library and Information Science.

The afternoon's Bibliolab helped students wishing to know more about the UW library system. These undergraduates had signed up for bibliographic instruction (BI) on a voluntary basis.

With more than 30,000 students, the university in general has no mandatory BI; but several departments, including communications and sociology, require Bibliolab as part of introductory courses.

BI, of course, is offered at many colleges and universities across the country. What makes the University of Washington program unique is the use of graduate library students as bibliographic instruction interns.

"It's a model program," said Margaret Chisholm, director of the Graduate School of Library and Information Science.

In a 50-minute Bibliolab session, Rudolph covered an overview of the UW library system; search strategy using student examples; types of publications and media available; access using the card catalog and central serials record; importance of LC subject headings; availability of abstracts and indexes; style for citations; and sample bibliography (for specialized labs such as sociology).

Throughout her presentation, Rudolph encouraged questions from the students. Nearing the end of the three-quarter, six-credit program, Rudolph obviously felt quite comfortable with the format.

"I wanted to improve my public speaking," she said, recalling how another library student had encouraged her to sign up to become a Bibliolab intern. "It also has helped me to learn more about the different tools available in the library. And I figured the experience would be useful in any type of library work."

Randy Hensley, user-education librarian at Odegaard, said he spends about 45 percent of his time directing Bibliolab and related activities. In December 1982 he

came to Washington from Cal State/Chico, where he'd worked nearly 10 years, mostly in BI.

Before Hensley arrived at Washington, Paula Walker, his predecessor, had been forced by budget cuts and a hiring freeze to remove staff librarians from BI. Concerned a program she had managed since 1979 might evaporate, she proposed, with Chisholm, that library students might serve as suitable instructors.

Today, Hensley notes the turnover of graduate students has proved to be something of an advantage. "They bring a fresh aspect because they're not experts," he said. "Sure, there are some limitations. But the program continues to change and improve. It's very flexible."

Hensley emphasized Bibliolab's availability to any part of the university community. In fact, he said, teaching assistants have expressed interest in Bibliolab, and eventually it may become part of their orientation. Walker (now head of reference in the undergraduate library) and Hensley some day would like to provide an advanced course for upper-level undergraduate and graduate students.

In the meantime, they work with what they have. Library students in the first quarter learn program design, teaching skills, and the literature of bibliographic instruction. Practice teaching includes three sessions with videotape reviews.

In the second and third quarters, the students become instructors. They are constantly evaluated by their peers, undergraduates, and Hensley. In the final quarter, the interns are also responsible for preparing handouts in a particular discipline.

"The interns are very motivated," Walker said. "We are able to give the students the confidence they need to match the motivation."

The UW program has succeeded, Hensley and Walker said, because of the cooperation between the library and library school, support of the university faculty incorporating Bibliolab into their courses, and the understanding of the reference librarians.

"We try to keep the reference librarians informed of changes in the Bibliolab exercises because we know students working on them are going to affect the desk," Hensley said.

Although it is difficult to measure the program's impact on users and the library system, reference statistics have gone up since the program began. "You can't say it's only because of Bibliolab, but the reference queries seem to have more substance," said Walker. The basic question, she said, is, "Can the interns teach as well as librarians? Yes, they can. We're keeping the quality of instruction high. But they have to work hard because they don't have the years of experience on the reference desk."

For a program using library students to be successful, Hensley said, it is essential the library and library school clarify their goals and reach an understanding; that the management responsibilities are clearly understood; and that the program responds to the needs of its users. □

Steve Ellis is a freelance writer.

3. A console that loves to teach library basics

by Patricia Mosley and Randall Jackson

Have you ever found yourself dreaming that you are showing (for the millionth time) a patron how to use a Wilson index?

Thanks to the marvels of the machine age, the Murray-Green Library of Roosevelt University in Chicago will be able to release librarians from some of the repetitive instructional tasks so familiar to us all.

We will soon have a computer-managed video instruction module for library users. The video recorded thus far covers use of the card catalog, indexes, and abstracts.

The video presentations are in no way designed to replace a reference librarian. The instructional programs are basic, or they review basic use of our library. Our student population includes many foreign students, some of whom are unaccustomed to United States libraries. Ideally, we will now have time for more personal interaction with these and other patrons, and, if needed, for individualized instruction.

The tapes are a walk-through instructional session. During the filming, close-ups are taken of an index to show how various citations are found. The camera follows a librarian through the library as he or she imparts key information. Each section was written and acted by a member of the reference department.

The overall program has four linear presentations. Each can stand alone for group instruction. But they form the core material for interactive learning modules. The following is an example:

From the first interactive menu, the patron can select the topic periodicals and indexes; after a 12-minute instructional presentation, new options are offered: to evaluate one's understanding of the material; to briefly review key information; to review the linear material; or to return to the main menu or end the session.

Users who choose, say, a full review of the linear material are given multiple-choice questions. They try to choose the correct answer from a close but incorrect answer and a dead-wrong answer. Incorrect answers result in a brief explanation. If the answer is correct, a reinforcement message is given, after which the next question is presented.

A tone of approachability characterizes the program. We made every effort to do away with library stereotypes. These are not lectures, but conversations.

Two permanent interactive workstations will house the programs. The Apple II+, the Sony SLO 323, and the CAVRI Interface make up the computer/video system on which the program can run. These systems were deemed tough enough to withstand the daily wear and tear of patron use. They were also programmed to offer a limited number of options so that changing the controlling program would be extremely difficult; efforts to break into the controlling program result in the computer automatically resetting itself to the beginning. □

Patricia A. Mosley, formerly assistant reference librarian at Roosevelt University, Chicago, is now a librarian at the College of DuPage, Glen Ellyn, Ill.
Randall E. Jackson is director of the Audio-Visual Television and Instructional Materials Center at Roosevelt University.

1985 ALA Midwinter Meeting

Washington, D.C. — January 5–10

Hotel reservation form and general information about the mid-year meeting

Hotel reservations: All requests for housing are to be sent to the ALA Housing Bureau, 1575 Eye Street, N.W., Suite 250, Washington, DC 20005. Use the room reservation form shown on page 595. The cut-off date for room reservations is Dec. 5; after that date, housing assignments will be made on the basis of availability and not necessarily at the published rates.

Registration. There will not be advance registration for the Midwinter Meeting. Registration will begin at the Sheraton Washington on Friday morning, Jan. 4. Registration fees for the week are: $40 for personal members, $90 for nonmembers, and $10 for full-time library school students. Daily registration fees are: $20 for personal members, $45 for nonmembers, and $5 for full-time library school students. (An institutional membership does not qualify for the personal registration fees of $40 and $20.)

Exhibits. Exhibits will be located in Exhibition Halls A and B of the Sheraton Washington. Full information and application forms are being mailed from the ALA Conference Arrangements Office during the first week of September to exhibitors on the current mailing list. Exhibitors interested in taking part who have not received the material by mid-September should write to: Midwinter Exhibits, ALA Conference Office, 50 E. Huron Street, Chicago, IL 60611.

The exhibits will open on Saturday, Jan. 5, at 4 p.m. and close on Tuesday, Jan. 8, at 2 p.m. Daily hours will be 4–7 p.m. on Saturday, 11 a.m.–5 p.m. on Sunday and Monday, and 11 a.m.–2 p.m. on Tuesday.

All librarians in the area, whether attending the Midwinter Meeting or not, are invited to visit the exhibits. Write for free badges, specifying the number of free admissions desired. Send a stamped, self-addressed envelope *not later than Dec. 7* to: Exhibits Registration Badge, ALA Conference Arrangements Office, 50 E. Huron Street, Chicago, IL 60611. Please note that these badges are valid only for admission to the exhibits, not to meetings.

Placement. A placement clearing service will be located in the Shoreham Hotel. Full details of the service will be announced in a later issue of *American Libraries*. In the meantime, requests for information and registration forms may be sent to the ALA Office for Library Personnel Resources, 50 E. Huron Street, Chicago, IL 60611. Indicate if you are an applicant or employer.

Major Sites

Joint Headquarters: Sheraton Washington and Shoreham Hotels
Exhibits, ALA Offices, and Registration: Sheraton Washington Hotel
Placement Center: Shoreham Hotel
Council Meetings: Sheraton Washington Hotel
President's Program: Sheraton Washington Hotel

Meetings. Meeting space in all five hotels (see list on page 595) will be fully used to accommodate the hundreds of meetings normally held during Midwinter week. Note should be made of the following meetings.

Council—Meetings of the ALA Council will be held on Monday, Jan. 7, 9–11 a.m.; Tuesday, Jan. 8, 9–11 a.m.; and Wednesday, Jan. 9, 9:30 a.m.–12:30 p.m. In addition, a Council Orientation session, followed immediately by the information meeting of the Council and Executive Board, will be held on Sunday, Jan. 6, 9:30 a.m.–12:30 p.m.

President's Program—The President's Program will be held on Monday, Jan. 7, 2–4 p.m. Details will be given in a later issue of *American Libraries*.

Program Evaluation and Support Committee/Planning and Budget Assembly—A joint meeting will be held on Saturday, Jan. 5, 2–4 p.m.

Executive Board—Meetings of the Executive Board are scheduled on Saturday, Jan. 5, 9–11 a.m.; Sunday, Jan. 6, 2–4 p.m.; Tuesday, Jan. 8, 2–4 p.m.; and Thursday, Jan. 10, 9–11 a.m.

Annual Conference Program Committees—The final meeting of the Chicago Conference Program Committee will be held on Monday, Jan. 7, 8–10 p.m. The 1986 New York Conference Program Committee will hold its first meeting on Saturday, Jan. 5, 8–10 p.m.

Council resolutions / rules information. Guidelines for preparing resolutions to come before Council will be printed in the *Midwinter Meeting Program*. Individuals desiring to receive a copy of the guidelines in advance of the meeting may write to the Council Secretariat, ALA Executive Office, 50 E. Huron Street, Chicago, IL 60611. Advance copies of rules to govern the conduct of ALA Council meetings are also available from that office on request.

Midwinter meeting policy. By adoption of the Jan. 1966 report of the Special Committee to Study the Midwinter Meeting, the ALA Council has determined that the Midwinter Meeting continues to be essentially a working meeting of the Council and of committees and boards of official ALA units; *that there be no programs, general business, or membership meetings of the divisions, sections, or round tables except as a limited number of program meetings, institutes, conferences, or workshops may be specifically authorized by the ALA Executive Board.*

By Council action at its 1971 Midwinter Meeting, and as amended by Council at the 1971 Dallas Conference, it was: "Voted, that it be the established policy of the American Library Association that all meetings of the Association be declared open to all members and to recognized members of the press, with closed meetings being only for discussion of matters affecting privacy of individuals or institutions."

Airline reservations. TV Travel, Inc., the official travel agency for the ALA Midwinter Meeting in Washington, D.C., is now offering 35 to 48 percent off regular coach airfares on American Airlines. This offer applies to all Midwinter Meeting attendees and their families who purchase their tickets from TV Travel and fly American Airlines to the meeting. *Attendees must book and purchase their tickets by November 15, 1984, to qualify for the discount.* The added bonus for using TV Travel, Inc., is $150,000 in free flight insurance. There are no restrictions on a minimum or maximum stay when booked with TV Travel.

For further information and reservations, call TV Travel Monday through Friday,

CDT, toll free: 1-800-543-9089, 7 a.m. – 10 p.m.; in Illinois, call 1-312-899-1100, 8:30 a.m. – 5:30 p.m.; in Ohio, call 1-800-543-0172, 9 a.m. – 5 p.m. Mention this ALA group name: ALADCA. – *Conference Arrangements Office* ☐

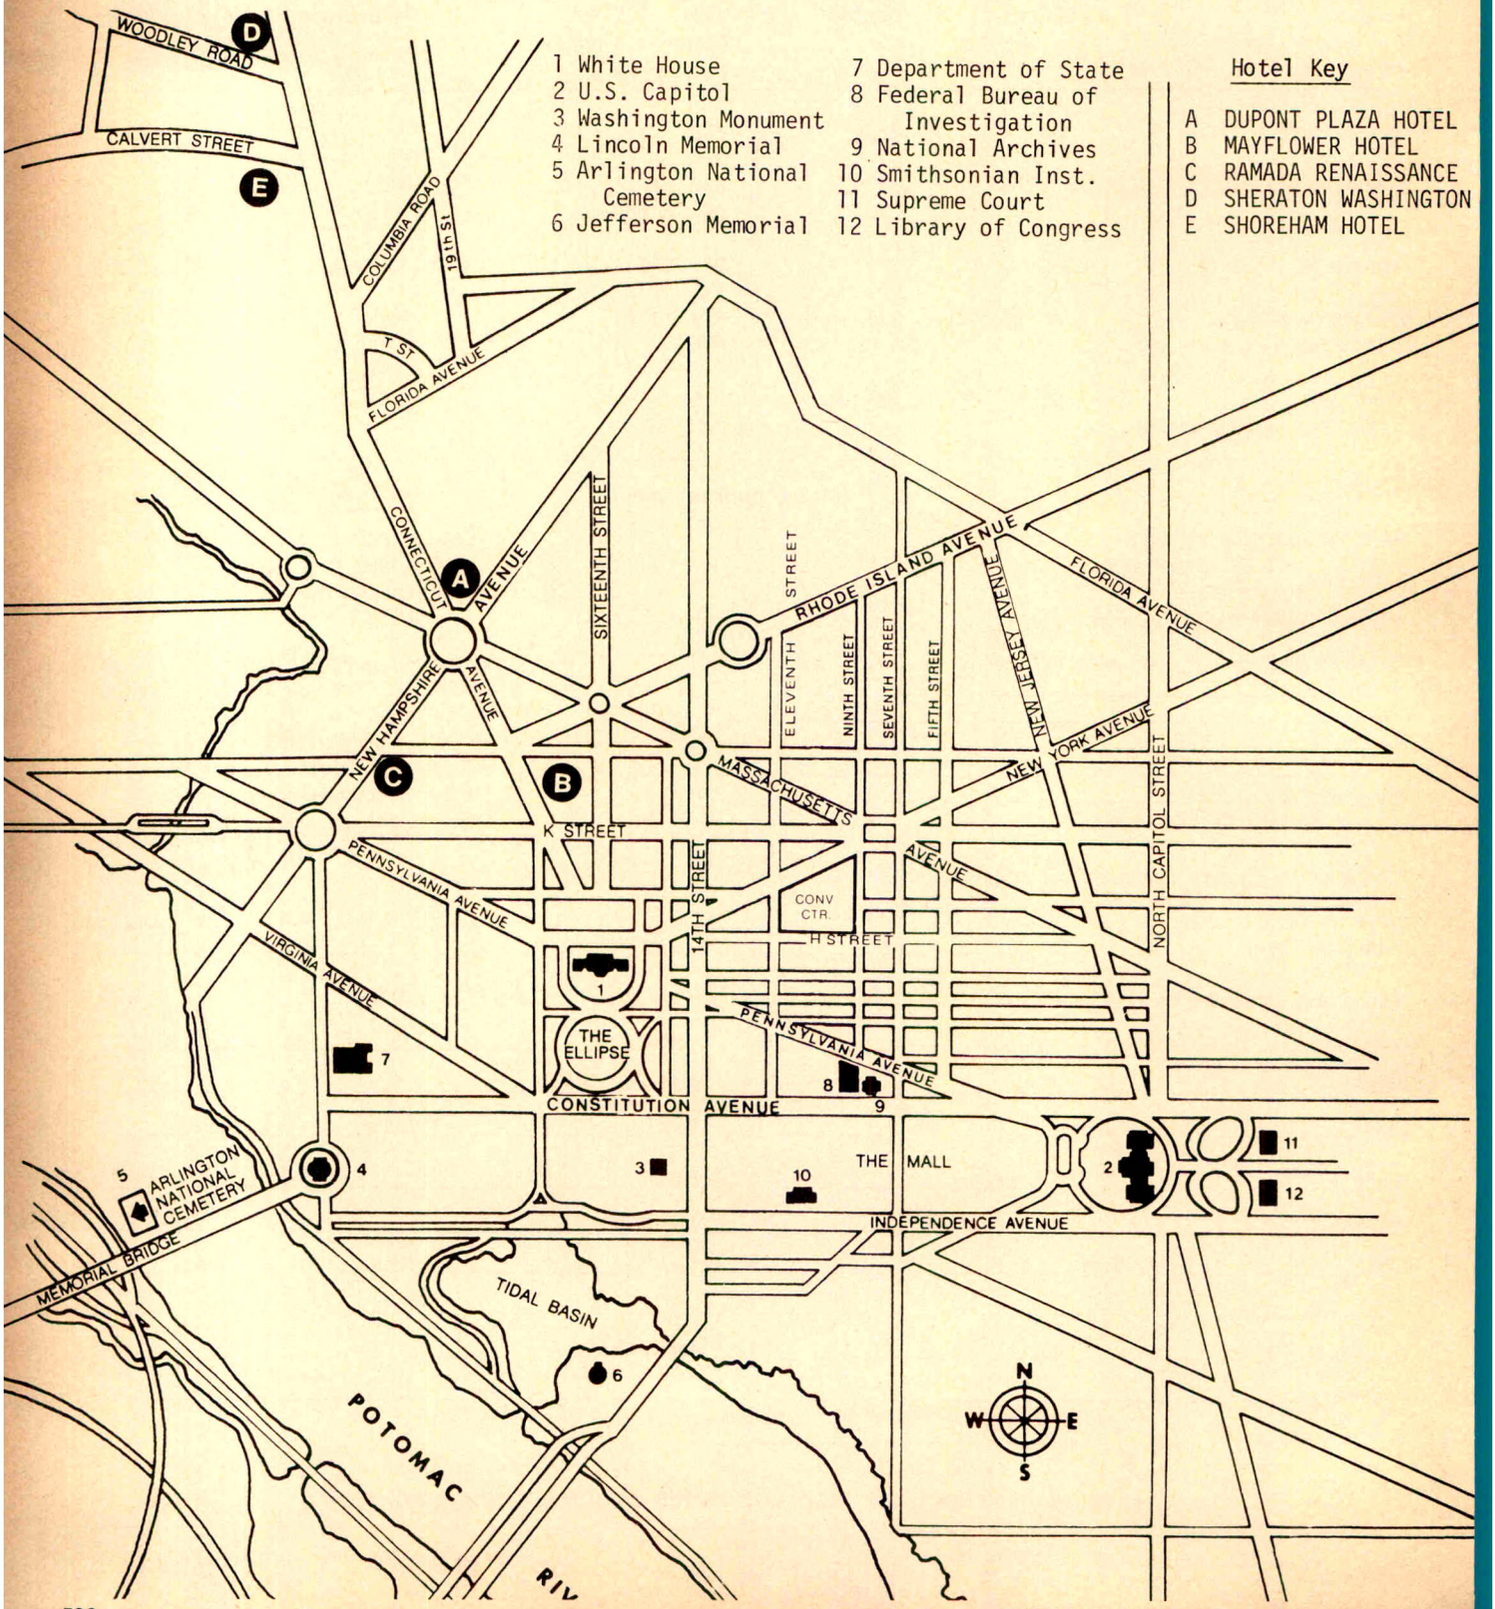
(Cut out or photoduplicate above form and mail in stamped envelope to ALA Housing Bureau in Washington, D.C.)

Notes about accommodations

Rates do not include 10% sales tax and $1/rm./night occupancy tax.
3-person arrangement doesn't always include separate bed/cot for 3rd person.
Parking available for registered guests; inquire directly for current fees.
Acceptable credit cards: AmEx, Mastercard, Visa, CBlanche, Diners.
An advance deposit of one night's room rate, or acceptable credit card no., will be required on all reservations upon receipt of room confirmation; don't send checks to ALA Housing Bureau; hotel will notify re deposit via room confirmation. Sheraton Washington accepts only AmEx for reservations guaranteed by credit card.
Indicate if arriving after 6 p.m.
For deposit refund, cancellation notice must be rec'd 48 hrs. before scheduled arrival.
Send cancellations or changes in reservations to: ALA Housing Bureau in Washington.
No charge for children under 14 in same room with parents.
Besides ALA shuttle bus, hotels A,B,D,E, are within easy walking distance of a Metrorail station.



SPECIAL REPORT

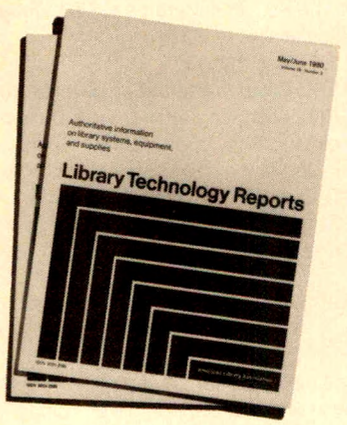
Serials Control in Libraries: Automated Options

by JUDY MCQUEEN and RICHARD W. BOSS

Discusses the many problems inherent in serials control and describes the various automated systems currently available. Contains a valuable "Checklist of Data Elements and Functions" for the purpose of identifying the specific serial control needs of a particular library, thus enabling the most appropriate option to be chosen.

The longest issue of LTR published to date, this report will be of immediate interest to libraries of all types and sizes.

In:
Library Technology Reports
March/April 1984 issue
Volume 20 Number 2 $40.00



Library Technology Reports is a unique bimonthly publication of the American Library Association that provides critical evaluations of products and services used in libraries.

Library Technology Reports

50 East Huron St., Chicago IL 60611

Bradshaw chairs search for ALA Executive Director

Lillian Bradshaw, past president of ALA and special assistant to the Dallas city manager, has been named chair of the Executive Director Search Committee. The committee was appointed at the special meeting of the ALA Executive Board July 16 (*AL*, July/August, p.478.)

Other members of the committee are: J. Dennis Day, Salt Lake City Public Library director; Marva L. DeLoach, head of cataloging at the Illinois State University library; Kathleen M. Heim, Louisiana State University library school dean; Janis C. Keene, Tulsa City-County Library assistant director; F. William Summers, University of South Carolina library school dean; and Lucille C. Thomas, New York City Board of Education School Library Services director. ALA Associate Director for Administrative Services Ernest Martin is HQ staff liaison.

The board instructed the committee "to conduct a confidential, high-level search for an executive director within the framework established by the board and to present to the board, in nonranked order, a list of no fewer than three nor more than five" by April 1.

RASD Serials Section announces Bowker/Ulrich award

The R.R. Bowker Co. will provide $1,500 cash for an annual award for distinguished contributions to serials librarianship beginning at the 1985 ALA Annual Conference, the Resources and Technical Services Division announced in July.

The first RTSD Serials Section Bowker/Ulrich's Serials Librarianship Award may be divided among two or more individuals who have shown leadership in serials-related activities; participated in professional association or library education programs, serials literature, or research; developed tools or methods enhancing access to or management of serials; or contributed to a better understanding of the field.

Nominations and supporting documentation should be sent no later than Nov. 15 to Jean Acker Wright, Chair, Serials Section Bowker/Ulrich's Serials Librarianship Award, General Technical Services, Vanderbilt University Library, 419 21st Ave., S., Nashville, TN 37240-0007.

LAMA to cosponsor institute on online catalog management

The Library Administration and Management Association Public Relations Section, together with the Ohio Library Association and the Columbus Area Library and Information Council of Ohio, will cosponsor a two-day institute on "Management of the Online Catalog" at the Ohio Center in Columbus Oct. 16–17.

LAMA seeks cosponsors for this and other institutes. For information, call LAMA Executive Director Roger Parent at ALA HQ.

(ALA Report cont. on p. 598-99, 600.)

A HIGHLY COST-EFFECTIVE "EASY-GROW" SYSTEM FOR

10,000 TO 150,000 TITLES!

IMAGINE YOUR LIBRARY WITH THIS POWERFUL, EXPANDABLE EASY DATA SYSTEM!

Public libraries, school libraries, plus "Fortune 500" companies, all have chosen the Easy Data integrated library system from Sydney. It's expandable...it grows as your library grows, from a small but powerful mini-computer to a multi-processor distributed network.

Modules available:
• Acquisitions • Cataloging • Inquiry
• Circulation control

Features include:
• On-line authority control • Fully browsable • Powerful on-line inquiry with boolean logic • Fund accounting and management statistics • Microfiche and printed catalogs • Records management applications • Run on Datapoint hardware • State-of-the-art networking capabilities.

Please get in touch. We really have unique advantages for small and medium-size libraries of all types.

Available in public or special library versions. Serials system coming soon.

1984 winners

More than 100 outstanding library performers received ALA awards, citations, and scholarships at Annual Conference in Dallas. Many of the winners were heralded in earlier editions of *AL* (Feb., p. 72 and 100, and June, p. 446). Other award winners are:

AASL/Encyclopaedia Britannica National School Library Media Program of the Year Award of $2,500 each: Richmond (Va.) Public Schools, and Riverside-Brookfield Township High School, Riverside, Ill.

ALTA Trustee Citations: Elmer M. Jackson, Jr., of Annapolis, Md., and Helen Muir of Miami, Fla.

ALTA Major Benefactors Award: Bertha Bacot of Pascagoula, Miss.; Mr. and Mrs. J. Harwood Cochrane of Rockville, Va.; John C. Henley, III, of Birmingham, Ala., and the late John Mosby of St. Louis, Mo.

ALTA Literacy Award: Lydia A. Duggins of Bridgeport, Conn.

ACRL Academic Librarian of the Year Award of $2,000 from Baker & Taylor: Richard D. Johnson of the State University College, Oneonta, NY.

ACRL Doctoral Dissertation Fellowship of $1,000 from the Institute for Scientific Information: Donald P. Gould of the University of Southern California.

ACRL Miriam Dudley Award for Bibliographic Instruction of $900 from Mountainside Publishing Co.: Thomas G. Kirk of Hutchins Library, Berea College, Ky.

ALSC Frederick G. Melcher Scholarships of $4,000 each: Constance N. Kehs of Doylstown, Pa., and Barbara Gail Freedman of Fayetteville, N.C.

ALSC Putnam Publishing Group Award of $400 each to attend ALA-Dallas: Ione Cowen of the Akron-Summit County (Ohio) PL; Jan Irving of the Stewart PL in Grinnell, Ia.; Jane Belsches of the Carrboro (N.C.) Elementary School; and Dean Lyons of the Carrabec School District in North Anson, Me.

ASCLA Exceptional Service Award: Eunice G. Lovejoy of Westerville, Ohio.

ASCLA Francis Joseph Campbell Citation: Maxine Dorf of Silver Spring, Md.

ERT Kohlstedt Exhibit Awards: Best Multiple Linear Booth — Oryx Press; Best Futura Booth — H.W. Wilson Co.; Best Single Booth — W.H. Freeman Co.

Friends of Libraries USA Awards of $300 each from Baker & Taylor: Friends of the

receive awards at Dallas conference

Thomas Branigan Memorial Library, Las Cruces, N.M.; Friends of the Salt Lake City (Utah) PL; SUNY/Albany Friends of Libraries; and Friends of North Carolina Public Libraries.

CIS/GODORT/ALA Documents to the People Award of $1,000 from the Congressional Information Service, Inc.: Jaia Barrett of the Perkins Library at Duke University.

IFRT John Phillip Immroth Memorial Award for Intellectual Freedom of $500: Gene D. Lanier of East Carolina University.

IFRT State Program Award of $1,000 from the Social Issues Resources Services: South Carolina Library Association Intellectual Freedom Committee.

JMRT Shirley Olofson Memorial Award of $100 each to attend their second annual conference: Diane Bronson of the State Library of Florida, Kathleen Moeller-Peiffer of the Orange County PL in Hillsborough, N.C., and Heather Smith, student at UCLA library school.

H.W. Wilson Co./LAMA John Cotton Dana Public Relations Awards: Dauphin PL, Harrisburg, Pa.; Houston (Tex.) PL; Lutheran Church Library Association, Minneapolis; Nellis (Nev.) Air Force Base; Plaza Jr. High School Library, Virginia Beach, Va.; and University of Texas Health Science Center at San Antonio Library.

Special awards: Elmer Holmes Bobst Library at New York University; Campbell County Library, Gillette, N.Y.; Clark County Library District, Las Vegas, Nev.; Council for Florida Libraries, Tallahassee; D.C. Everest High School Library, Schofield, Wis.; Eufaula Memorial Library, Eufaula, Okla.; Hurst (Tex.) PL; Kentucky Dept. for Libraries and Archives, Frankfort; Albert R. Mann Library, Cornell University; McBride Library, Keesler Air Force Base, Miss.; John McIntire PL, Zanesville, Ohio; Oklahoma Dept. of Libraries, Oklahoma City; Sheridan County (Wyo.) Fulmer Library; St. Louis County (Mo.) Library; Tucson (Ariz.) PL; and Ventura County (Calif.) Library.

LHRT Justin Winsor Prize Essay Award of $500 and publication in the *Journal of Library History:* Larry Yeatman of Baltimore for "Literary Culture and The Role of Libraries in Democratic America: Baltimore, 1815–1840."

LITA/Gaylord Award for Achievement in Library Information Technology of $1,000: Roger K. Summit of DIALOG Information Services, Inc.

LRRT Research Development Award of $500 to George D'Elia and Sandra Walsh for "Patron Use & Evaluation of Library Services: A Comparison across Five Public Libraries."

MAGERT Honors Award: Jeremiah B. Post of the Free Library of Philadelphia.

PLA Armed Forces Library Section Achievement Citation Award: Marjorie Rambo, Langley Air Force Base, Va.

Publishing Committee Carnegie-Whitney Fund Grants for bibliographies: $760 to Fay Belcher of Morehead (Ky.) State University Libraries; $1,650 to Mike Jankowski of the Alternative Information Network, Austin, Tex.; and $600 to Salvador Guereña of the University of California/Santa Barbara.

Publishing Committee Carnegie Reading List Fund Grants: $1,325 to ALSC Notable Children's Materials; $995 to ALSC *U.S.A. Children's Books of International Interest;* $900 to *Booklist* Young Adult Section; $1,350 to *Booklist* Children's Section; $4,200 to *Booklist* Adult Books Section; $2,250 to *Booklist* Nonprint Section for Microcomputer and Software reviews; $5,981 to COSWL for bibliographies; $7,500 (maximum) to RASD *Notable Books* List; and $1,662 to YASD for *High Interest/Low Reading Level Booklist, Best Books for Young Adults,* and *Selected Films for Young Adults.*

RASD Dartmouth Medal: *The Times Atlas of the Oceans* (Van Nostrand Reinhold).

RASD Facts on File Award of $1,000 from Facts on File, Inc.: Catherine Monnin of Cuyahoga County PL in Maple Heights, Ohio.

RASD I.G. Mudge Citation: Sara D. Knapp of SUNY/Albany.

RASD John Sessions Memorial Award donated by the AFL/CIO: Jackson-George Regional Library System, Pascagoula, Miss.

RTSD Margaret Mann Citation: Dorothy Anderson of England.

RTSD Esther J. Piercy Award: Lizbeth J. Bishoff of the ELA Area PL District in Lake Zurich, Ill.

RTSD Resources Section/Blackwell North American Scholarship Award of a $1,000 scholarship to the winner's chosen library school: Nancy E. Gwinn and Paul H. Mosher.

YASD Baker & Taylor Conference Grant of $500 to attend conference: Michelle Pugh of Cleveland, Ohio.

Second *Caldecott Calendar* bigger and better, says ALSC

Featured on the cover of the *1985 Caldecott Calendar* is an illustration from *The Glorious Flight: Across the Channel with Louis Blériot, July 25, 1909,* the Viking book that earned illustrators Alice and Martin Provensen the 1984 Caldecott Medal for the most distinguished American children's picture book.

The second annual calendar produced by the Association for Library Service to Children is bigger and better than the 1984 edition, according to ALSC Executive Director Ann Carlson Weeks. Like the original, which went out of print Jan. 31, the 1985 calendar displays full-page illustrations in color from 13 Caldecott Medal and Honor books, and lists the winners from 1938 to the present.

The 9-by-12-inch calendar went on sale at Annual Conference in Dallas and is available for $6.95 from ALA Publishing Services at Headquarters (0-8389-5651-3).

New COSWL award promotes sexual equality

The ALA Equality Award, presented for the first time at ALA Annual Conference in Dallas, recognizes "an individual or group for an outstanding contribution toward promoting equality between men and women in the profession." It represents the Association's willingness to reward its members for work in this area and the generosity of Scarecrow Press, which donates $500 for the award recipient.

The ALA Committee on the Status of Women in Librarianship (COSWL) formulated the concept of a "women's services" award in 1981. The "disadvantaged majority" had been confronting the status quo in the library profession for more than a decade. Library research and literature pointed to the unmistakable stratification within the ranks of librarianship, and library activists had joined together inside and outside ALA to address the various issues created.

Much of this work had gone unrecognized. Librarians and the Association have gained much through the efforts of men and women who have given their time and energy to effect social and political changes which have strengthened the democratic principles inherent in the library and information science ethic.

The first winner (1984), Margaret Myers, director of the ALA Office for Library Personnel Resources, has fought for equality in librarianship through her efforts on behalf of affirmative action, minority recruitment, and, more recently, comparable worth. The ALA Equality Award and its recipient represent inspiration and encouragement to men and women who continue to strive for equality in libraries and librarianship.

—Katharine Phenix, Chair,
Committee on the Status
of Women in Librarianship

State Publications on School Library Media Facilities, a bibliography produced by the LAMA Buildings and Equipment Section School Library/Media Facilities Committee. $3.50 from LAMA. □

Honoring Excellence

Each year the American Library Association honors those persons, libraries, organizations and publications that have made outstanding contributions to librarianship. The ALA awards program exemplifies the commitment of the American Library Association to honor and support excellence in all areas of our profession.

The ten awards and three scholarships that will be presented next year recognize outstanding accomplishments in these areas: library education, equality between the sexes in the profession, service to the profession, library service to children, and an outstanding contribution to library literature. Awards to libraries and other organizations recognize and help support financial and staff development, publishing, and programs which implement the goal and priorities of the American Library Association.

Every member of the Association is encouraged to make award nominations. The awards program works when individual members take the time to nominate persons or programs in their city, state or region which are examples of excellence in the profession. Only with the help of all members can the awards truly be given on behalf of the entire Association.

Announcement of scholarship recipients will be made at the first membership meeting of the 1985 Chicago conference. Awards are presented at **the first membership meeting and the inaugural banquet.**

Following is a brief description of each award and scholarship. Take the time to read about the awards and send a nomination to ALA.

Deadlines for the receipt of completed nomination forms are December 1, 1984 for awards and December 15, 1984 for scholarships. All juries meet and for the most part complete their deliberations at Midwinter.

Further information and nomination forms can be obtained by writing to Elaine K. Wingate, ALA Headquarters, 50 E. Huron, Chicago, IL 60611.

ALA awards program

Beta Phi Mu Award: A cash award of $500 and a citation presented to a library school faculty member or anyone making a distinguished contribution to education for librarianship. Supported evidence or testimonials are welcomed. Administered by a jury of the ALA Awards Committee.

84/85 Jury Chair:
George M. Bailey

Donor: Beta Phi Mu Library Science Honorary Association

Melvil Dewey Medal: An engraved medal and a citation presented to an individual or a group for recent creative professional achievement of a high order, particularly in those fields in which Melvil Dewey was so actively interested, notably: library management, library training, cataloging and classification, and the tools and techniques of librarianship. Administered by a jury of the ALA Awards Committee.

84/85 Jury Chair:
Cecil P. Beach

Donor:
The Forest Press, Inc.

ALA Equality Award: A certificate and a cash award of $500 given to an individual or group for an outstanding contribution towards promoting equality between women and men in the library profession. The contribution may be either a sustained one or a single outstanding accomplishment. The award may be given for an activist or scholarly contribution in such areas as pay equity, affirmative action, legislative work, and nonsexist education.

84/85 Jury Chair:
Katharine Phenix

Donor:
Scarecrow Press, Inc.

Gale Research Company Financial Development Award: An award of $2,500 and a certificate presented to a library organization that has exhibited meritorious achievement in carrying out a library financial development project to secure new funding resources for a public or academic library. The criteria for selection of an award winner are: evidence of the need and appropriateness of the financial goal; the use of innovative, creative and well-organized development methods; the success of the effort in meeting or exceeding the goal within a reasonable expenditure of fund-raising monies; and

the involvement of library supporters, who might include boards of trustees and library friends groups or their equivalent.
84/85 Jury Chair:
David S. Ferriero
Donor: The Gale Research Company

Grolier Foundation Award: A cash award of $1,000 and a citation presented to a librarian in a community or in a school who has made an unusual contribution to the stimulation and guidance of reading by children and young people. The award is given for outstanding work with children and young people through high school age, for continued service, or in recognition of one particular contribution of lasting value. Administered by a jury of the ALA Awards Committee.
84/85 Jury Chair:
Barbara Rollock
Donor:
The Grolier Foundation

World Book-ALA Goal Awards: Are two awards of $5,000 each made to units of the American Library Association to encourage and advance the development of public, academic and/or school library service and librarianship through recognition and support of programs which implement the goal and priorities of ALA.
84/85 Jury Chair:
Maureen Pastine
Donor: World Book, Inc.
Nomination deadline:
March 1, 1985

Joseph W. Lippincott Award: A cash award of $1,000 and a citation presented to a librarian for distinguished service to the profession of librarianship, such service to include outstanding participation in the activities of professional library associations, notable published professional writing, or other significant activity on behalf of the profession and its aims. Administered by a jury of the ALA Awards Committee.
84/85 Jury Chair:
Dr. Ann E. Prentice
Donor:
Joseph W. Lippincott, Jr.

The Knowledge Industry Publications, Inc. Award for Library Literature: A cash award of $500 and a citation to an individual for an outstanding contribution to library literature issued during the three years preceding the award. Administered by the ALA Awards Committee.
84/85 Jury Chair:
Helen H. Lyman
Donor: Knowledge Industry Publications, Inc.

H. W. Wilson Library Periodical Award: A cash award of $500 and a certificate presented to a periodical published by a local, state or regional library, library group, or library association in the United States or Canada which has made an outstanding contribution to librarianship. Publications of ALA, Canadian Library Association, and their divisions are excluded. All issues for the calendar year prior to the presentation of the award will be judged on the basis of sustained excellence in both format and content, with consideration being given to the purpose and budget. Administered by a jury of the ALA Awards Committee.
84/85 Jury Chair:
Leon L. Bram
Donor: The H. W. Wilson Company

H. W. Wilson Library Staff Development Grant: A cash grant of $2,500 awarded to a library organization to assist it in a current or proposed program designed to further its stated staff development goals and objectives. The grant is based on merit of application and considers several criteria including: clearly defined documentation of the organizational goals and objectives, a well defined program to meet the needs, and a demonstrated ability to implement the program. Administered by the ALA Awards Committee.
84/85 Jury Chair:
Maureen S. Sullivan
Donor: The H. W. Wilson Company

David H. Clift Scholarship: A $3,000 scholarship awarded to a worthy student to begin a program of library education at the graduate level. The recipient must be a U.S. or Canadian citizen and must enter a formal program of graduate study leading to a master's degree at a graduate library education program accredited by ALA. Administered by the ALA Awards Committee and the Standing Committee on Library Education.
84/85 Jury Chair:
Charlene Mason
Donor: Funded by the annual contribution from the Xerox Information Resources Group and individual contributions.

The Frederick Winthrop Faxon Scholarship: A cash award of $3,000 and an expense paid optional internship at F. W. Faxon Company in Westwood, Massachusetts. The award is made to a worthy student to begin a master's level ALA accredited program in library or information sciences. Ideally, the recipient should have a specific interest in the field of serials management and control. Funded by an annual contribution by the F. W. Faxon Co., Inc., one scholarship per year is offered. The award may be withheld in any year when there are no qualified applicants. Administered by the ALA Awards Committee and the Office for Library Personnel Resources.
84/85 Jury Chair:
Jean M. Whalen
Donor: F. W. Faxon, Inc.

Louise Giles Minority Scholarship: A $3,000 scholarship awarded to a worthy student who is a U.S. or Canadian citizen and is also a member of a principal minority group (American Indian or Alaskan native, Asian or Pacific Islander, black, Hispanic), to enter a formal program of graduate study leading to a master's degree at a graduate library education program accredited by ALA. Administered by the ALA Awards Committee and the Office for Library Personnel Resources Advisory Committee.
84/85 Jury Chair:
Doreitha R. Madden
Donor: Funded by an annual contribution from the Xerox Information Resources Group and individual contributions.

Deadline for receipt of completed award nominations is December 1, 1984; scholarship nominations is December 15, 1984. Further information and nomination forms can be obtained by request to Elaine K. Wingate, ALA Headquarters, 50 E. Huron, Chicago, IL 60611.

the source

SELECTED RESOURCES FOR CURRENT AWARENESS

The Source highlights useful items in major areas of library/information activity. Send materials to department editor Gordon Flagg, American Libraries, 50 E. Huron St., Chicago, IL 60611.

young people

The lack of new black children's books is prompting concern throughout the book community. Earlier this year, a panel of authors, publishers, and librarians discussed the issue at the New York Public Library's Countee Cullen Regional Branch.

Elizabeth Gordon of the Harper Junior Book Group cited economic factors. " Books that we once counted on as staples have not in recent years sold in sufficient quantities to support reprinting the books—and we are not looking for sales much greater than 500 copies a year," she said. "We assume that this is caused by libraries not having the funds for book purchases that they once had."

Prolific children's book author James Haskins emphasized "that the black experience is really an American experience and knowledge of it should be made available for all."

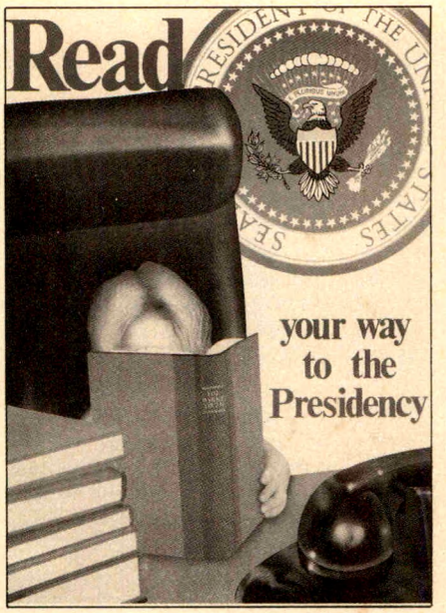
The panel discussed ways to stimulate the market, including encouraging early reading, making books available at reasonable prices in minority areas, and lobbying legislators to increase funding to libraries and schools.

The discussion marked publication of the 1984 edition of NYPL's *The Black Experience in Children's Books* booklist, which is only about half the size of the 1979 edition. The current list includes about 400 titles, with only about 100 new titles added—an average of only 25 new books a year since 1979.

The 61-page paperback booklist is available for $3 plus $1 postage from the Office of Branch Libraries, New York Public Library, 455 5th Ave., New York, NY 10016.

Pen pal program. Librarians whose young patrons want overseas pen pals can refer them to Youth of All Nations. The nonprofit, nonsectarian organization is devoted to promoting world peace through correspondence between young people. Rather than simply receiving a list of names, new members fill out an application and are matched with correspondents according to age, interests, and languages. The group also publishes *Mirror for Youth,* a magazine filled with contributions from members.

Persons 14 to 24 years old can receive more information and an application by sending 25¢ and a stamped, self-addressed long envelope to Youth of All Nations, 16 St. Luke's Place, New York, NY 10014.



"Read Your Way to The Presidency" was the theme of this year's Summer Reading Program developed by the West Virginia Library Commission. In addition to this full-color poster, materials included a board game in which players advance through various elected offices by reading books. Bookmarks for kids to sign state "This book is on loan to President (could be)_____." State Library Commissioner Frederic Glazer reports that the first participants in the program were the four children of Gov. Jay Rockefeller—the beginning, perhaps, of a political dynasty.

Magazines for Young Adults: *Selections for School and Public Libraries*, by Selma K. Richardson, features descriptive and evaluative annotations of nearly 600 periodicals, including all titles indexed in the *Readers' Guide to Periodical Literature*. The entries, arranged alphabetically by magazine title, give bibliographic and subscription information and list indexes covering each magazine. An appendix contains entries for periodical indexes, and a subject index groups the titles under 60 broad headings. Approx. 340 p., paper, $22.50 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (83-26652, 0-8389-0407-6).

A historical look at magazines for children is provided in *Children's Periodicals of the United States*. The study offers historical background and a description of the contents of 100 titles ranging from *The Children's Magazine* (which ran for four issues in 1789) through today's *Cricket* and *Cobblestone*. Entries also include information on libraries holding complete or near-complete files and a publication history detailing changes in titles, editors, and places of publication throughout each magazine's life.

Editor R. Gordon Kelly's introduction gives an overview of American periodical publishing for children and a survey of scholarship on the subject. Appendixes list over 300 children's magazines alphabetically, chronologically, and geographically. 591 p., $49.95 from Greenwood Press, 88 Post Rd. West, Westport, CT 06881 (83-8574, 0-313-22117-0).

International children's librarianship. *Library Service to Children: An International Survey* describes the worldwide state of children's librarianship in articles written by experts from 21 countries. Fourteen out of the 15 articles that appeared in the work's 1978 edition have been completely or substantially rewritten, and articles on six new nations have been added. The authors discuss such areas as funding structures, buildings and planning, types of holdings, services offered, staffing, children's books, current problems, and future plans. The 168-page volume, edited for the IFLA Section of Children's Libraries by Colin Ray, is published by K.G. Saur and distributed in the U.S. by Shoe String Press, 995 Sherman Ave., Hamden, CT 06514 at $21 (3-598-20392-6).

reference

Smaller reference collections. Two annotated guides recommend reference materials appropriate for the financial and space limitations faced by small and medium-sized libraries.

The fourth edition of *Reference Sources for Small and Medium-Sized Libraries* contains 1,788 entries, an increase of approximately 80 percent over its 1979 predecessor. Titles included were selected by an ad hoc committee of ALA's Reference and Adult Services Division. Among the subjects treated for the first time or receiving greatly expanded coverage are women's studies, computer science, and energy and environment. New features include coverage of materials suitable for children and young people; significant out-of-print titles; and inclusion of sources in nonprint formats such as databases and microforms. 252 p., paper, $20 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (84-6513, 0-8389-3293-2).

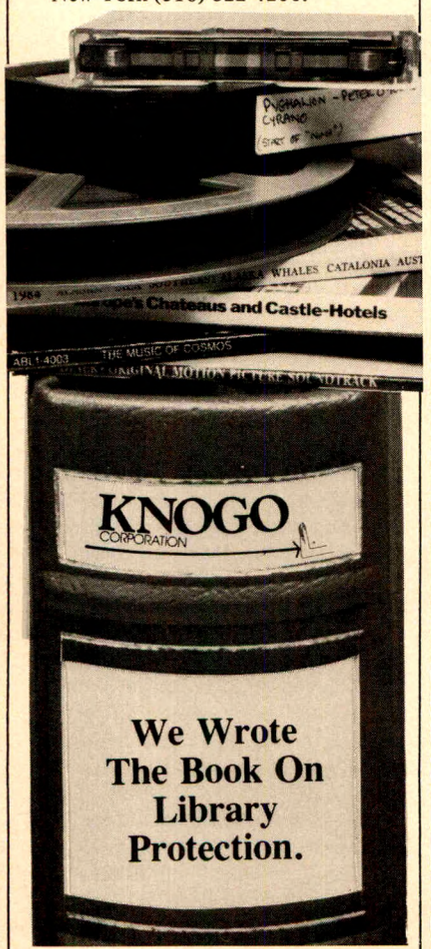
A Guide to Reference Books for Small and Medium-Sized Libraries, 1970–1982, by G. Kim Dority, supplies critical annotations for 1,179 titles. Following the format of the publisher's *American Reference Books Annual,* the initial chapter of the 430-page volume covers general reference works, followed by 42

The more your library has to protect, the more you need KNOGO protection.

A KNOGO electronic article surveillance system can discreetly and effectively protect your library from losing as much as 10% of your books, tapes, records and cassettes to pilferage every year.

KNOGO systems have been proving themselves in worldwide applications for almost two decades. And that's no surprise, since we were the ones who designed and introduced electronic article surveillance in the first place.

For full information and a free proposal on a complete KNOGO Library Protection System, call toll-free 1-800-645-4224, or in New York (516) 822-4200.



100 Tec St., Hicksville, N.Y. 11801

subject-oriented chapters divided by topic or form. Similar works or alternate choices are given in many cases, and the entries include citations to reviews in professional journals and in *ARBA*. $28.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (84-7849, 0-87287-403-6).

***Reference Readiness* revised.** The new third edition of Agnes Ann Hede's *Reference Readiness* revises most of the entries from the 1977 edition and adds many new titles. The 187-page manual for librarians and students provides detailed descriptions of selected dictionaries, encyclopedias, indexes, bibliographies, biographical sources, atlases, and other types of reference works. Each chapter also includes a bibliography of additional titles of that type. $21.50 cloth (0-208-02001-2), $15 paper (0-208-02002-0) from Shoe String Press, 995 Sherman Ave., Hamden, CT 06514.

Where to Find What: *A Handbook to Reference Service* is intended as "a ready-reference source for the harried librarian." James M. Hillard's revised update of his 1975 first edition offers brief descriptions of mostly in-print resources under 595 frequently called-for subject headings. 357 p., $22.50 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-14272, 0-8108-1645-8).

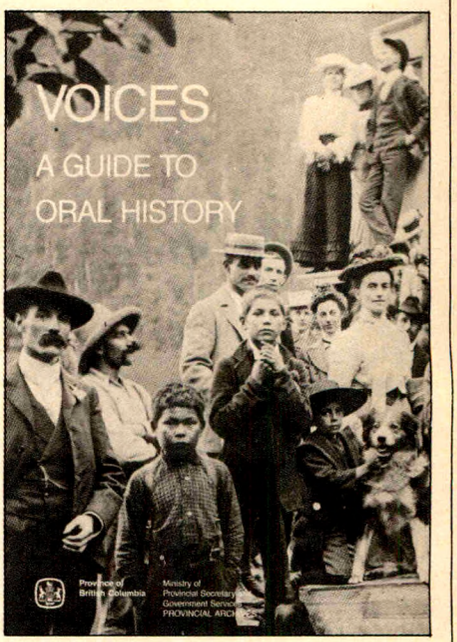
nonprint

"Films and Video in Libraries" is the theme of the fall 1983 issue of the New York State Library's *Bookmark*. Still pertinent, the 12 articles deal with community programming, the making of the New York State *Union Catalog of Film and Video*, library programming for local cable television, the impact of videocassettes in the public library, video and youth services, and other topics. Single copies are $1 prepaid, $2 foreign (payable to the New York State Library), from Gift and Exchange Section, New York State Library, Albany, NY 12230.

Database firm to acquire NICEM. Access Innovations, producer of seven databases currently available on DIALOG, has signed an agreement to purchase the National Information Center for Educational Media (NICEM) from the University of Southern California.

Access Innovations intends to continue producing NICEM's 29 print titles and its online file. Later this year the company plans to introduce new services and products to complement NICEM's traditional services, including special subject indexes and custom cataloging for audiovisual libraries.

Arms race AV. The *1984 National Directory of Audiovisual Resources on Nuclear War and the Arms Race*, edited by Karen Sayer and John Dowling, lists 400 films, videotapes, slide/tapes, and filmstrips distributed by over 300 companies and organizations. Titles include documentaries, feature films, television news programs, university productions, and animated shorts. Entries give filmographic data, describe the content, and list sale, rental, and loan sources with prices. The 60-page paperback also includes a subject index and distributors' listing. $4 (payable to the University of Michigan) from NW/AR Directory, Michigan Media, University of Michigan, 400 4th St., Ann Arbor, MI 48103.



Oral history guide. *Voices* is a how-to guide for the creation, preservation, and use of oral history. The 74-page paperback, edited by Derek Reimer, discusses the place of oral history in the larger historical record, recording equipment, interviewing techniques, archival procedures, and uses for the oral history interviews. $4.50 from Sound Heritage, Provincial Archives, Victoria, British Columbia, Canada V8V 1X4.

Radio on tape. Over 600 National Public Radio programs available for purchase on audiocassette are described in a free catalog. The programs include documentaries, interviews with figures ranging from Henry Miller to Bob "Captain Kangaroo" Keeshan, public-affairs broadcasts, and programs on the arts and sciences. For a copy of the catalog write National Public Radio, Cassette Publishing, 2025 M St., N.W., Washington, DC 20036.

The Poets' Audio Center is a clearinghouse for both commercial and noncommercial poetry recordings, stocking over 700 audiocassette titles from some 40 producers. The center's catalog, normally $3, is available free to acquisitions librarians requesting it on their letterhead. Poets' Audio Center, POB 50145, Washington, DC 20004.

Words on Tape: *An International Guide to the Spoken Word* is described by the publisher as the "Books in Print" of recorded books. The first edition of the annual publication contains approximately 7,000 titles from 100 publishers and organizations, listed in author,

title, and subject indexes. Entries include the number of cassettes, length in minutes, publisher's order number, rental or purchase price, and name of publisher. A directory lists the addresses and phone numbers of all publishers. 450 p., $47.50 ($40 if prepaid, $27.50 for organizations with annual book and periodical budgets under $15,000) from Meckler Publishing, 520 Riverside Ave., Westport, CT 06880 (0-930466-55-1).

microcomputing

To see if the IIc is the microcomputer for you, take a look at two new books on the newest and smallest member of the Apple family.

Author Philip Lieberman intends *Introducing the Apple IIc* as a guide for those considering the purchase of the IIc, an introductory manual for new owners, and a continuing reference for users. Chapters cover the 10-hour tutorial program supplied with the IIc; the Logo, Applesoft BASIC, and Apple Pascal computer languages; educational and productivity software; telecommunications and databases; the IIc operating system; and the Apple mouse. 400 p., paper, $17.95 from Howard W. Sams & Co., 4300 W. 62nd St., Indianapolis, IN 46268 (84-50864, 0-672-22393-7).

Going Places with the New Apple IIc, by Danny Goodman, opens with a brief introduction to microcomputing. The 251-page mass-market paperback, less technical than Lieberman's guide, then describes the IIc and its peripherals and discusses the IIc's word processing, spreadsheet, database management, telecommunications, graphics, educational, and entertainment applications. $3.95 from Simon & Schuster Electronic Publishing Division, 1230 Avenue of the Americas, New York, NY 10020 (0-671-53188-3).

Microcomputers in ARL Libraries publishes the results of a January 1984 survey of microcomputer use in institutions belonging to the Association of Research Libraries. Among the findings: 81 percent of the 85 respondents are using micros, compared to fewer than half in a 1982 survey. Thirty-five of the libraries own between one and five micros; 20 have between six and 10; and the remaining 13 report 11 or more.

The most frequent applications are management functions, including word processing, accounting, personnel records, and mailing lists. Bibliographic searching and maintenance of files and lists are the most common public service functions, and technical service departments use micros most often for acquisitions, serials control, and online cataloging.

Twenty-four of the libraries offer microcomputer facilities for users, including seven where they are used to access online catalogs. None of the libraries circulates micros for home use.

The 98-page paperback (SPEC Kit #104 from the ARL Office of Management Studies) also contains six microcomputer planning and specifications documents, four examples of policies and procedures, and three examples of training and personnel materials. $15 ($7.50 for ARL library members) from SPEC Center, ARL/OMS, 1527 New Hampshire Ave., N.W., Washington, DC 20036.

Let your fingers do the talking by dialing the more than 400 bulletin board systems (BBSs), national networks, and local-area services listed in *The Computer Phone Book*. The 466-page paperback gives an overview of consumer online systems such as BRS After Dark and CompuServe and provides a detailed guide to their use. The directory portion lists

Software Showcase:

CALM eases catalog card and label production

Card and Label Manager (CALM) is a program for the production of catalog cards and labels, written specifically for the Apple IIe microcomputer. A slightly less powerful version is available for the Apple II+ with two disk drives, and a version for the IBM PC is scheduled for release later this year.

The program was written by Bill Yarborough, head of the department of physics and computer science at Presbyterian College in Clinton, S.C., with advice from his wife Diane, a cataloger in the school's library.

CALM is designed to allow for variations in different libraries' catalog card formats regarding what information to include, punctuation, and placement of information. For example, the ISBN can be placed at the lower left or the lower right of each card, inserted manually anywhere else, or omitted altogether.

Another distinctive feature of CALM is that it places no limit on the number of tracings or the length or form of the call numbers. It also automatically produces a second card if necessary, divides lines around the card's hole to avoid having to make a second card, and produces hanging indentions when there is no author. For added versatility, the fields that default to accession number and ISBN can be redefined by the user to any other required item (such as LC number) or completely eliminated if not needed.

CALM is entirely menu-driven for ease of use. The program allows each item to be reviewed or edited before being saved to disk and provides for a "test print" of the information saved to permit hard-copy editing. A full-function text-editing capability is incorporated for making changes to file entries at any time, either sequentially through an entire file or to specific items. Individual items can be accessed through any of the entered fields.

Cards or labels can be printed in an entire file in a "batch" mode, or a single item or group of items can be selected and printed. The program can be automatically configured to provide proper print commands for Okidata, Epson, Apple, and NEC printers; this will determine control codes for producing enlarged, reduced, underlined, or enhanced print. Users with other printers can choose the default 10- or 12-characters-per-inch, although this will only permit standard-size print. However, the designer will customize the program for any printer if supplied with information sheets from the printer manual.

CALM is priced at $199, including an instruction manual, a sample data disk, and a backup copy of the program disk. A demonstration copy with instructions is $15, which can be applied to the purchase of the complete program.

An optional utility, BOOKLIST, will read up to 900 items from data entered by CALM and produce lists sorted by call number, title, or author. BOOKLIST alone costs $125, or it may be purchased with CALM for $299.

For more information on the programs write Speak Softly, Inc., 303 Calvert Ave., Clinton, SC 29325.

The only comprehensive reference on American and international schools abroad

The ISS Directory Of Overseas Schools
1984/85 Edition

Designed for internationally mobile educators, families, and businesses, the *Directory* lists over 600 English-speaking schools in Asia, Europe, the Middle East, the Caribbean, and Central and South America.

With the *Directory*, teachers and administrators can gain a global view of opportunities abroad. Transferring employees with dependents can investigate the major international schools available before choosing a new post. And corporations considering overseas locations can determine the need for new schools.

Paperbound: $15 domestic mail, $25 air mail. ISBN: 0-913663-01-8

The Directory
International Schools Services
PO Box 5910, Princeton, NJ 08540

the systems and services, including such information as operating hours, fees, contents, and author Mike Cane's personal comments based on his use of the systems. Appendixes describe the help files of various BBS software formats and list BBSs offering downloadable software or aimed at special interests. $9.95 from New American Library, 1633 Broadway, New York, NY 10019 (83-17305, 0-452-25446-9).

A monthly update to the directory is available for $20 for a one-year subscription from The Computer Phone Book, 175 5th Ave., Suite 3371, New York, NY 10010.

Instructional Use of Computers *in Public Schools, Spring 1982* is a 27-page report offering statistical information on the availability of computer-based instruction, the extent of computer usage, teachers' computer literacy, improvement needed in computer-based education, and other areas. $1 from Dept. 36-GL, Superintendent of Documents, Washington, DC 20402 (stock no. 065-000-00197-7).

Small Computers in Libraries, published for the past three years by the Graduate Library School of the University of Arizona, has been acquired by Meckler Publishing, publishers of *Library Software Review* and *M300 and PC Report*.

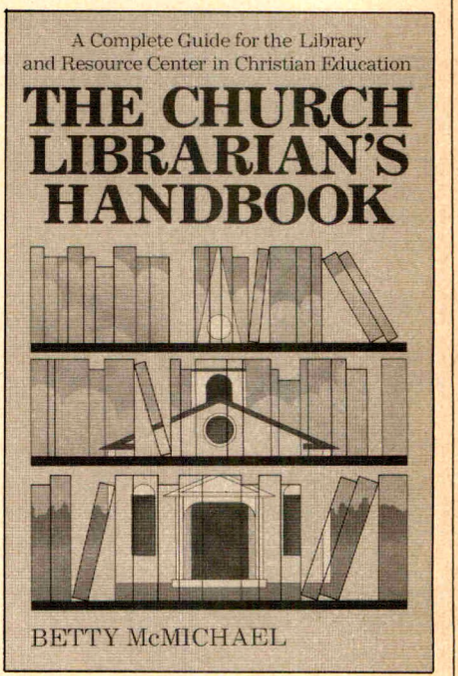
Meckler states that founding editor Allan Pratt will continue to edit the journal, which is said to have the largest circulation of any library-oriented computer publication. The new publisher promises that the journal will be basically unchanged, with the exception of a new design and the acceptance of advertising. Twelve monthly issues are $24 from Meckler Publishing, 520 Riverside Ave., Westport, CT 06880.

librarian's library

Forms follow functions. *The Library Forms Illustrated Handbook* is a truly formidable 875-page, looseleaf collection of nearly 1,000 forms for library functions ranging from acquisitions, cataloging, and circulation to online searching, interlibrary loans, and bibliographic instruction. Also included are forms designed for administrative operations such as personnel and budgeting, audiovisual services, and special collections. Compiler Elizabeth Futas, who contacted some 3,000 libraries to obtain the forms selected for reprinting, also offers advice on the design and management of forms. $75 from Neal-Schuman Publishers, 23 Cornelia St., New York, NY 10014 (82-22362, 0-918212-69-3).

Acquisitions Management *and Collection Development in Libraries*, by Rose Mary Magrill and Doralyn J. Hickey, contains chapters on collection development policies and administration, acquisitions procedures, bibliographic searching, purchasing, vendor-controlled order plans, nonbook materials, acquisition of serials, and gifts and exchanges.

The updated version of Stephen Ford's 1973 *The Acquisition of Library Materials* is aimed at the same audience of library school students and practicing librarians and includes much of that volume's content on estimating costs of materials and purchasing out-of-print and foreign items and government documents. Approx. 224 p., $20 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (84-9288, 0-8389-0408-4).



The Church Librarian's Handbook is an updated, paperback edition of Betty McMichaels' 1977 *The Library and Resource Center in Christian Education*. Written for the nonprofessional who is setting up a church library, the illustrated guide covers staffing, selection, cataloging, promotion, and financing. The second edition includes new material on audiovisual materials and computers in church libraries and an updated directory of suppliers. 277 p., $9.95 from Baker Book House, Grand Rapids, MI 49506 (0-8010-6166-0).

The state of the unions. *The Local Union in Public Libraries* is a study of the unionization of public librarians and library workers based on author Doreen Lilore's observation of four selected AFSCME locals over a two-year period and survey data from library unions around the country.

The 134-page volume opens with background on the labor movement and library unionization, followed by discussions of labor-management relations in library unions, internal operations, and a content analysis of 18 labor agreements. $19.50 cloth (0-208-02028-4), $13.50 paper (0-208-02029-2) from Shoe String Press, 995 Sherman Ave., Hamden, CT 06514 (83-24886).

Alternative anthology. Sixty-seven articles representing viewpoints out of the mainstream of library thought are reprinted in *Alternative Library Literature, 1982/1983*. The first volume in a proposed biennial series, the "deliberately *un*balanced" collection features items

taken from "orthodox" library journals and non-library periodicals, as well as from such "alternative" publications as *Sipapu, Librarians for Social Change, Feminist Collections,* and *Interracial Books for Children Bulletin.*

Editors Sanford Berman and James P. Danky selected material "addressing topics usually overlooked or minimized in standard library media," including selection of alternative- and small-press materials, censorship, women in libraries, gay and lesbian materials, service to disabled and Spanish-speaking people, and nuclear education. 338 p., paper, $29.95 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (0-89774-132-3).

***Jackie Urbanovic's cartoon illustrates the "Women" section of* Alternative Library Literature.**

resources

Ads infinitum. Some 15,000 slogans promoting 6,000 products or companies are listed in *Advertising Slogans of America,* compiled by Harold S. Sharp. Both the slogans and the organizations are listed in a single alphabetical sequence, ranging from A&P Coffee ("Right from the start") to Zip Hair Remover ("A dab makes you as dainty as a deb"). $35 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-20431, 0-8108-1681-4).

Films and Filmmakers is a four-volume reference work with an international scope, encompassing motion pictures from the early silent era through *Return of the Jedi.*

The first volume, *Films,* contains complete production and cast credits and other information for approximately 500 major English-language and foreign films, plus a critical essay and a bibliography listing monographs, contemporary reviews, and significant articles on each one. Volume two, *Directors/Filmmakers,* gives biographical essays, complete filmographies, and bibliographies for over 500 individuals.

The first two volumes are now available; volumes three and four, devoted to *Actors and Actresses* and *Writers and Production Artists,* are scheduled for publication later this year. Each volume is available separately for $50, with the entire set priced at $150. Vol. 1, 536 p. (0-912289-04-X); vol. 2, 611 p. (0-912289-05-8). St. James Press, 213 W. Institute Place, Suite 305, Chicago, IL 60610 (83-24616).

Of consuming interest. Written to help readers make sound, informed purchases of goods and services, *Consumer Adviser: An Action Guide to Your Rights* offers guidance in all sorts of transactions and tells how to use laws protecting consumers. The 416-page volume covers areas ranging from shopping in supermarkets and buying household appliances to applying for loans and using credit. The guide suggests actions to take to resolve problems with various types of businesses or professionals and provides addresses of consumer agencies to help in the fight. The Readers Digest book, distributed by Random House (201 E. 50th St., New York, NY 10022), is $21.50 (84-2044, 0-89577-180).

Legal Information Management Index is a new publication indexing articles and reviews on legal information management and law librarianship from over 125 journals and newsletters, many not indexed elsewhere. Among the topics covered are legal reference services, legal and nonlegal database searching, microform collections, government documents, space planning and relocation, and special library management. Six bimonthly issues and an annual cumulation are $98 U.S. (Massachusetts subscribers add 5 percent sales tax) and $108 Canada, prepaid, from Fox Information Consultants, POB 67, Newton Highlands, MA 02161.

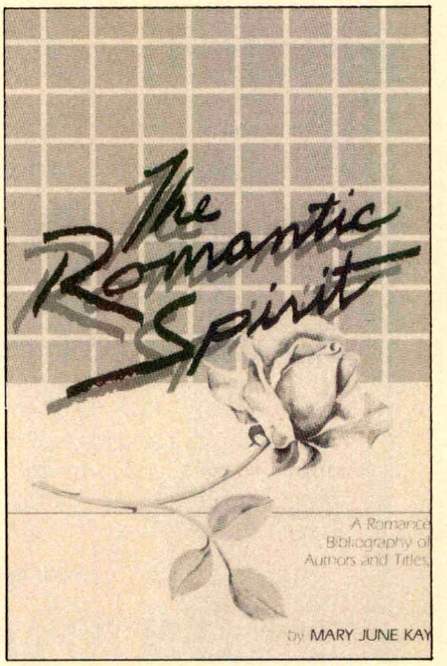
bibliography

Views on TV news. *U.S. Television Network News: A Guide to Sources in English,* by Myron J. Smith, Jr., lists books, articles, dissertations and theses, and other materials covering the period from the late 1940s through 1982. The 3,214 entries deal with television news in general, specific networks and news programs, documentary and public affairs programming, and television news coverage of domestic affairs, U.S. presidents, presidential elections, foreign affairs, national defense, and other areas. Also included are biographical works about specific reporters and anchorpeople. Includes subject and author indexes. 240 p., $29.95 from McFarland & Co., POB 611, Jefferson, NC 28640 (83-42885, 0-89950-080-3).

Romance roundup. Some 19,000 titles by 3,700 romance authors are listed in *The Romantic Spirit,* by Mary June Kay (a pseudonym taken from the first names of three romance aficionados who spent three years on the project). The alphabetical author entries reveal the writers' pseudonyms, list in- and out-of-print books, and indicate subgenres (such as "gothic," "mystery," and "supernatural"). Appendixes provide title listings for 23 romance series.



The 566-page paperback is $8.95 plus $2.50 shipping. A 287-page 1983–84 update featuring new authors, additional titles, and newly-discovered pseudonyms is $5.95 plus $1.50 shipping (if ordering both volumes, add only $2.50 shipping). MJK Enterprises, POB 5571, San Antonio, TX 78201.

Prewar Germany. *The Third Reich, 1933–1939: A Historical Bibliography* contains abstracts of 932 articles covering the years preceding World War II, during which Hitler consolidated his power and prepared Germany for war. The articles, published from 1973 through 1982, are arranged topically into sections on Nazi Germany in historical context, domestic policies and politics, foreign policy, the oppression of German Jewry, and other areas. The 239-page volume includes detailed subject and author indexes. $28.50 from ABC-Clio Information Services, POB 4397, Santa Barbara, CA 93103 (83-21527, 0-87436-379-9).

Vietnam eyewitnesses. *Those Who Were There* is an annotated bibliography of eyewitness accounts of the war in Southeast Asia from 1956 to 1975, and its aftermath. The 297-page work encompasses nonfiction and fiction books, poetry, anthologies, articles based on firsthand experience, as well as periodical titles devoted to the topic. The authors include military veterans, civilians, and journalists who witnessed combat or traveled with military units. $12.95 from Dustbooks, POB 100, Paradise, CA 95969 (83-25434, 0-913218-97-9).

tech services

LC applications of AACR2. *LC and AACR2: An Album of Cataloging Examples Arranged by Rule Number,* by Alan M. Greenberg and Carole R. McIver, includes several hundred examples of Library of Congress AACR2 cataloging. Samples are based on a file compiled by the cataloging staff at Winthrop College Library, Rock Hill, S.C.

Most of the examples, which are reproductions of actual LC catalog cards or proof slips, refer to Chapter One of the rules, but Chapters 2–6, 12–13, 21–22, and 24–25 are also covered. The authors caution that some examples represent LC's earliest AACR2 cataloging and thus reflect practices that may have changed. However, the latest card revisions were used wherever possible. An author/title index to the examples shows how LC interpretation of AACR2 affects filing; a subject index is also included. 179 p., $19.50 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-27144, 0-8108-1683-0).

Directory of serials experts. The International Federation of Library Associations and Institutions (IFLA) Section on Serials Publications is compiling an international directory of serials experts. The directory will list people who have contributed to serials librarianship on the regional, national, or international level, and their area of expertise, publications and research, and relevant committee assignments.

The work is expected to promote exchange of serials expertise between countries and provide contact people who are experts on serials bibliographic control, management, and conservation in their geographic areas.

To receive the personal data form compilers are using, write to Jean Whiffen, IFLA Serials Directory, University of Victoria Library, POB 1800, Victoria, B.C., Canada V8W 3H5, or Erica Ljungdahl, IFLA Serials Directory,

Stockholm University Library, with the Library of the Royal Academy of Sciences, S-106 91, Stockholm, Sweden.

Guide compares LC with Dewey. The Cataloging Department of the Bowling Green (Ohio) State University library is offering a comparative guide to Library of Congress and Dewey Decimal classification systems. The 30-page work is arranged by subject and covers a wide range of numbers in both systems.

The guide is $5 from Gail J. Junion, Coordinator—Cataloging Dept., Jerome Library, Bowling Green State University, Bowling Green, OH 43403. Make checks payable to BGSU Library.

Managing academic library TS. *Library Technical Services: Operations and Management,* edited by Irene P. Godden, describes current techniques used in technical services areas, primarily in academic and research libraries. Leslie A. Manning has contributed chapters on administration of technical services and circulation; Karen L. Horny on automation; Marion T. Reid, acquisitions; Betty G. Bengtson, bibliographic control; and A. Dean Larsen, preservation and processing.

The work contains typical organizational patterns and examples of workflow, and covers both serials and monographs. References and a bibliography follow each chapter. 272 p., $32 from Academic Press Inc., Orlando, FL 32887 (83-15645, 0-12-287040-9).

Cataloging micro software with AACR2. Hot off the ALA presses is *Guidelines for Using AACR2 Chapter 9 for Cataloging Microcomputer Software.* The guidelines were developed "to meet the urgent need for direction in the cataloging of microcomputer software" by the Committee on Cataloging: Description and Access, Cataloging and Classification Section, Resources and Technical Services Division of ALA. Arnold Wajenberg, principal cataloger at the University of Illinois at Urbana-Champaign, prepared the text.

The guidelines are not a substitute for AACR2 Chapter 9, but cover a few areas of the chapter that pose special problems. Arrangement is by rule number; a glossary of automation terms related to bibliographic records is included. 32 p., paper, $4.50 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (84-11168, 0-8389-3311-4).

New OCLC MARC format due. A MARC format for machine-readable data files (MRDF) will be available this fall on OCLC. The new format—the eighth for OCLC—contains fields familiar to MARC format users. But new notes fields (5xx) describe system requirements and disk characteristics for large files and list other systems a file can run on. New fixed-field elements include type of machine and type of file. The format also provides a fixed-field entry for serial machine-readable data files. Catalogers already accustomed to the OCLC audiovisual format will adjust easily to MRDF, according to OCLC.

instruction

Media skills series. Three illustrated, paperback guides edited by Paula Kay Montgomery suggest methods and materials for teaching media skills to students through the eighth grade.

Library Media Skills: Strategies for Instructing Primary Students, by Alice R. Seaver, describes the instructional process and presents sample learning activities for students from kindergarten through third grade. 147 p., $18.50 (84-965, 0-87287-409-5).

Ready for Reference: Media Skills for Intermediate Students, by Barbara Bradley Zlotnick, details practical activities for integrating media skills instruction with subject skills instruction for grades three through six. 274 p., $19.50 (84-11222, 0-87287-411-7).

Media Skills for Middle Schools: Strategies for Library Media Specialists and Teachers, by Lucille W. Van Vliet, provides an overview of middle school educational philosophy and the characteristics of the middle school student, followed by 70 media skills lessons appropriate for students in grades six through eight. 263 p., $19.50 (84-3926, 0-87287-410-9).

All three titles in the Teaching Library Media Research and Information Skills series are available from Libraries Unlimited, POB 263, Littleton, CO 80160-0263.

Computer game teaches *Readers' Guide*. Citation is a computer game to introduce users to the *Readers' Guide to Periodical Literature.* Players search the game's version of the *Readers' Guide* on randomly assigned topics. The program keeps track of the elapsed time of each player's search, and when the required number of relevant citations has been found and identified, a score is calculated. The 10 best scores for each topic are saved on the disk and displayed to later players.

The program requires an Apple II+ or IIe with an 80-column card and one disk drive. The disk is not copy-protected and may be duplicated for in-house use or back-ups. $8 prepaid from Arie C. Koelewyn, 1314 Glenn St., Newberry, SC 29108.

Library Instruction and Reference Services is a collection of 24 articles edited by Bill Katz and Ruth A. Fraley. Among the topics covered are the use of library instruction methods to train reference librarians; the role of technical services librarians in library instruction; instruction programs in public and academic libraries; and library instruction for faculty members, adult students, and foreign students. Also published as issue number 10 of *The Reference Librarian,* the 254-page volume is $24.95 from the Haworth Press, 28 E. 22nd St., New York, NY 10010 (84-505, 0-86656-288-5). □

George M. Needham

Carol Ann Desch

Sylvia Sprinkle-Hamlin

ALA member **George M. Needham** recently became the director of the Fairfield County District Library, Lancaster, Ohio. . . . At the New York State Library, Albany, ALA member **Carol Ann Desch** and **Sara B. McCain** were recently appointed assistants in library services. . . . At the Forsyth County Public Library in Winston-Salem, N.C., ALA member **Sylvia Sprinkle-Hamlin** is now associate director and **Julie White Sanders** is Thruway branch head librarian. . . . ALA member **John M. Meador, Jr.,** is now dean of library services at Southwest Missouri State University in Springfield. . . . June 1 **Fred Visel** became assistant dean for learning resources at Carl Sandburg College, Galesburg, Ill. . . . ALA Councilor-At-Large **Judith Sessions** is now director of the library at California State University/Chico. . . . Newly elected library association presidents-elect include: **Claren Kidd** (Geoscience Information Society); ALA member **H. Robert Malinowsky** (Special Libraries Association); **Jeanne C. Reynolds** (Border Regional Library Association); and ALA member **Mary Jean Sloan** (Georgia Library/Media Department). . . . 2 ALA members recently joined the library staff of Cleveland (Ohio) State University: **Bruce E. Langdon** as director of libraries and **Robert J. Nissenbaum** as director of the Cleveland-Marshall College of Law Library. Langdon was formerly director of Wilson Library at the University of Minnesota, Minneapolis; Nissenbaum was head of reference services for the Tarlton Law Library, University of Texas at Austin. . . . **Renee Gold** is now director, Information Services, at the Special Libraries Association. An ALA member, Gold last served as associate editor, *Wilson Library Bulletin*. . . . Recent appointments at Columbia University Libraries, New York, N.Y., include: **Frieda Davison** as head of cataloging in the Health Sciences Library, ALA member **James J. Kopp** as editor of the *Avery Index of Architectural Periodicals,* and **Barbara LaBarba,** as head of resources in the Law Library. Staff retirements include ALA members **Laura Cummings** and **Mary Lou Lucy,** Cummings as chief of the Bibliographic Control Division and Lucy as chief of the Humanities and History Division. . . . ALA member **Martín Gomez,** former Serra Latino Services Project director at Serra Cooperative Library System, San Diego, Calif., is now minority ethnic services consultant at California State Library, Sacramento. . . . At the University of South Carolina, Columbia, **Joseph M. Pukl, Jr.,** is now head of the order department at Thomas Cooper Library and ALA member **Joseph C. Donohue** is a professor in the College of Library and Information Science. . . . ALA member **Michael LaCroix** is now director of library services at Wingate (N.C.) College. . . . **Sharon Ann Hogan** is now director of Louisiana State University Libraries, Baton Rouge. An ALA member, Hogan was formerly deputy director of Temple University Libraries in Philadelphia, Pa., and was serving as acting director there prior to her LSU appointment. . . . Recent appointments at the Tampa-Hillsborough County Public Library System, Tampa, Fla., include: ALA member **Mary Ellen Pellington** as assistant director; **Ann Bush** as head of the Business, Science, and Technology Department; **Marcee Challener,** Seminole branch head; and ALA member **Anne Ross,** head of the Fine Arts/Audiovisual Department. . . . **Oakley Herman Coburn** is now head librarian of the Sandor Teszler Library at Wofford College in Spartanburg, S.C. He succeeds **Frank J. Anderson,** who retired earlier this year. . . . **Susan Severtson** is now vice president, marketing and sales, for Carrollton Press, Inc. An ALA member, she has been executive editor of Research Publications, Inc., director of the Franconia College Library in New Hampshire, and assistant librarian for technical services at Middlebury (Vt.) College. . . . June 30 **Russell E. Bidlack** retired as dean of the library school at the University of Michigan, Ann Arbor. A former ALA Councilor-At-Large, Bidlack received the Melvil Dewey Medal from ALA in 1979 and the Beta Phi Mu Award for Distinguished Service to Education for Librarianship in 1977. . . . Among the distinguished alumni who recently received special citations from their alma maters are: **Joyce Ball,** university librarian at California State University, Sacramento (Indiana University); **Arthur Curley,** deputy director of the Research Libraries at New York Public Library and ALA Councilor-At-Large (Simmons College); **Edward D. Garten,** director of libraries at Tennessee Tech University, Cookeville (Kent State University); **Joseph H. Morehead,** associate professor at the SUNY/Albany library school (University of Kentucky); and **Gary E. Strong,** California state librarian (University of Michigan). All are ALA members. . . . At the Library of Congress **Sara Castro-Klarén** is now chief of the Hispanic Division and **James W. McClung** is regulations officer. McClung's duties include the review, analysis, revision, and codification of LC regulations (LCRs). . . . ALA Councilor-At-Large **Barbara Ford** is now assistant director for public services and associate professor at Trinity University's Maddux Library, San Antonio, Tex. . . . In September **Howard Dodson** becomes the new chief of NYPL's Schomburg Center for Research in Black Culture. . . . At SUNY/Buffalo, **William Borodacz** recently retired as associate librarian of Lockwood Memorial Library, **Manuel D. Lopez** is now Lockwood's head of reference, and 2 ALA members have new posts in the libraries' Central Technical Services Cataloging Department: **Judith Hopkins** as technical services research and analysis officer and **Deborah Husted** as assistant librarian. . . . **Robert B. Palmer** has been awarded the first Fulbright grant as a librarian to the People's Republic of China for 1984/85. An ALA member, Palmer was also a Fulbright librarian in Katmandu, Nepal, and Kabul, Afghanistan. He served as director of Barnard College Library, New York, N.Y., from 1967 to 1981, and as assistant to the director, Columbia University Libraries. . . . The University of Texas at Austin has announced 3 new appointments: ALA member **Linda Beaupre** as associate director of the General Libraries and **Mark E. Rorvig** and ALA member **Francis L. Miksa** as faculty members in the library school. . . . ALA Councilor-At-Large **Sharon Hammer** is now director of the Marin County Free Library in San Rafael, Calif. She succeeds another ALA member, **Mary Lou Rowe,** who retired last October. . . . **Patricia Kantor,** former school librarian at Elmcrest Elementary School, Liverpool, N.Y., is now children's librarian at Baldwinsville (N.Y.) Public Library. . . . Pennsylvania State University, University Park, has announced the appointments of head librarians at 2 campuses: **Barbara L. Emmer** at the DuBois campus and ALA member **Nancy L. Herron** at the McKeesport campus. . . . June 1 ALA member **Jo Ann Ellingson** became Florida's assistant state librarian. . . . **Kurt R. Murphy** recently became library systems analyst and assistant professor at the University of Oregon Library, Eugene. . . . **Ralph C. Simon** is now head of the Data Services Division of the Indiana State Library, Indianapolis. He succeeds **Debra Shaw,** who has joined the library school faculty at the University of Illinois at Urbana-Champaign. Simon, who last served as director of the Learning Resources Media Center at Owens Technical College in Toledo, Ohio, was director of libraries—the Technion, Israel Institute of Technology in Haifa, Israel, from 1974 to 1978.

Deaths

Roger Walter, editor of the (British) *Library Association Record* since 1975 and 1983/84 London correspondent for the *ALA Yearbook,* died June 2. . . . **Mary Dickey Masterton,** who retired in 1981 as head of the Browsing Library at Detroit (Mich.) Public Library, died Jan. 23. . . . **Charles W. David,** director of libraries and professor of history at the University of Pennsylvania, Philadelphia, from 1940 to 1955, died April 2. His distinguished career included helping to develop the Union Catalog of Pennsylvania in the 1930s. After his retirement, he founded two special libraries, the Eleutherian Mills Historical Library in Greenville, Del., and the Maritime Library in Connecticut. . . . **Mildred Peterson McKay,** 78, former New Hampshire state librarian, died April 8. □

If we say we have it, you'll get it.

That's one of the important things about UMI Article Clearinghouse. You *get* what you order, the first time. We guarantee the availability of articles from over 8,000 periodicals covered by major indexes. You are assured of coverage for most titles from 1978 to the present, and our catalog is constantly being updated with new additions.

Another thing—UMI Article Clearinghouse means electronic ordering, so as soon as you place your order, we receive it. And we guarantee to ship your copies within 48 hours, by first-class mail. Or your money back!

You can order over the OCLC ILL Subsystem, DIALOG's Dialorder, CLASS OnTyme, and ITT Dialcom which offers a gateway to ALANET. Other online vendors will be available in the near future.

Prices, including copyright clearance, start as low as $4. The number of pages in the article *never* increases the cost.

In this fast-paced Age of Information, you need a service that guarantees you'll find the articles you need when you need them, whether popular or esoteric. That's where we can help.

For further information and a copy of our current catalog, call us toll-free at 1-800-732-0616. In Michigan, Alaska, and Hawaii, call collect at 313-761-4700.

How to cut out the most frequently asked question about the world's best-selling encyclopedia.

This way to World Book.

"Which way to *World Book*?" is a popular question around libraries for good reason. According to librarians, it's because *World Book* is the most frequently used encyclopedia in print.

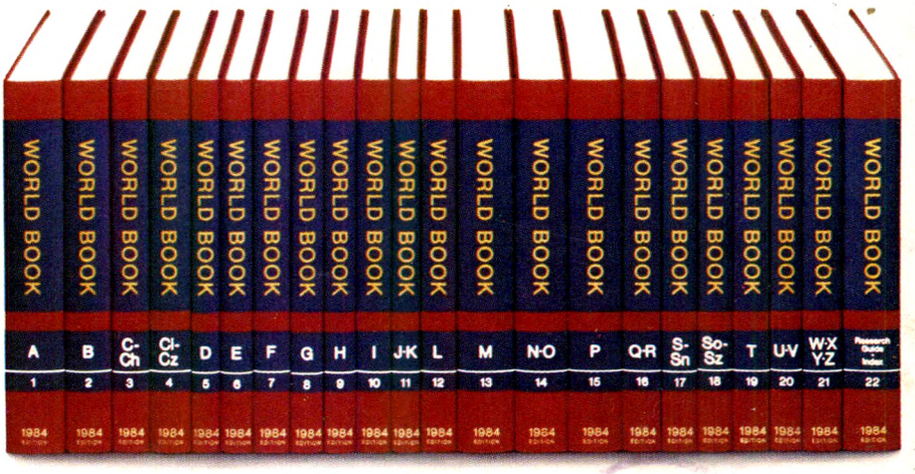
What makes *World Book* so appealing? According to a recent review by the editorial board of *Reference Books Bulletin*, published by the American Library Association,* *World Book*'s accessible, up-to-date, well-illustrated coverage of topics draws people of all ages.

In fact, this best-selling encyclopedia is designed especially to serve the reference and study needs of both students and adults. The review notes, "In these twin purposes it succeeds admirably," and adds, "*World Book* deserves high marks for its overall currentness of information."

People trust *World Book*, too. "*World Book*'s reputation for a high degree of accuracy—typographically, factually, and in matters of interpretation—continues apace," says the review.

From philosopher Aristotle to astronaut Sally Ride, "*World Book* continues to provide impressive, international biographical coverage of persons past and present," states the review.

With its clarity of style, helpful study guides, detailed index, and functional use of illustrations, it's easy to see why all signs point to *World Book*. Isn't it time to put a current set on your shelves?



*The review appears in the 2/1/84 issue.

A Nation of Readers

USA 20c

A new stamp and ALA theme

Public Library Catalog

Eighth Edition. 1442pp. Ready.
$140 U.S. and Canada, $160 other countries.

Providing public, college and university librarians with a practical tool for collection development, cataloging, classification, and general reference, the all new Eighth Edition of *Public Library Catalog* lists some 8,000 of the best current, adult, non-fiction, English-language books. A subscription includes the initial hardcover volume and four paperbound supplements for a full five years of service.

Current Career and Occupational Literature 1984

By Leonard H. Goodman. 208pp. Ready.
$30 U.S. and Canada, $35 other countries.

This important resource for guidance counselors, librarians, teachers, parents, students, and job seekers indexes a wide selection of inexpensive pamphlets, books, and periodicals with information on more than 700 occupations. It provides access to information suitable for all age levels from elementary school through adult.

Short Story Index 1979-1983

Fall 1984. $80 U.S. and Canada, $90 other countries.

This up-to-date, five-year cumulative volume of *Short Story Index* lists references to almost 14,000 stories published in 900 new collections and over 2,500 stories that appeared in 56 periodicals from 1979 to 1983. To make research easy, stories are listed by author, title, and subject in a single alphabet. **Note:** Subscribers who have maintained an annual subscription to *Short Story Index* for the past five years receive the five-year cumulative volume at no extra charge as part of their regular subscription.

Current Biography Yearbook 1984

500pp. approx. December 1984. $35 U.S. and Canada, $45 other countries.

Current Biography profiles the men and women who make today's news and tomorrow's history. The 1984 *Yearbook* cumulates the 11 monthly issues of *Current Biography*, provides a complete listing of the year's obituaries, and an index to all the biographical articles that have appeared since 1980.

World Artists 1950-1980

By Claude Marks. 928pp.
Fall 1984. $70 U.S. and Canada, $85 other countries

An authoritative survey of the careers of 312 artists who were influential in the post-World War II era, *World Artists 1950-1980* presents the story of each artist's life and work, outlining work methods, influences, and aesthetic beliefs at each stage of the artist's development. The artists profiled represent a wide variety of styles and movements in painting, sculpture, and graphic media.

New Fall 1984

The H.W. Wilson Company

To order, for more information, or to request a catalog describing the full range of Wilson publications, write to:

The H.W. Wilson Company
950 University Avenue
Bronx, New York 10452

Publishers of quality reference works since 1898.

American Reformers

Edited by Alden Whitman. 940pp. approx.
Fall 1984. $75 tent. U.S. and Canada, $90 tent. other countries.

Offering concise biographies of 496 men and women who were the principal architects of reform in America from the seventeenth century to modern times, this book covers reformers from all political and ideological persuasions, from religious tolerance, labor rights and prison reform to Native American rights, racial and sexual equality, and freedom of speech.

Songs of the Theater

By Richard Lewine and Alfred Simon.
940pp. approx. Fall 1984. $70 tent. U.S. and Canada, $85 tent. other countries.

Two of the most frequently asked questions about musical theater—"Who wrote that song? What show is it from?"—are now easy to answer with the help of this comprehensive index to some 15,000 songs from over 1,200 shows that have appeared on Broadway and Off-Broadway from the earliest days of the American musical theater through 1983.

Sears: Lista de encabezamientos de materia

Translated by Carmen Rovira. 700pp. approx.
Fall 1984. $45 U.S. and Canada, $60 other countries.

The 12th Edition of *Sears List of Subject Headings* has now been translated into Spanish making this invaluable service available to libraries with significant Hispanic populations as well as libraries in Spanish-speaking countries. The new Spanish edition features an English-to-Spanish index of main headings and elaboration of regional and historical entries for Spanish-speaking regions.

The Reference Shelf 1985

Annual subscription @ $40 U.S. and Canada, $45 other countries. (Includes 6 titles). Individual titles are also available @ $8.00 U.S. and Canada, $9.50 other countries.

Focusing on significant current concerns, *The Reference Shelf Series* provides college and high school students, librarians, and researchers, with facts, background, and informed opinion. New and forthcoming titles include: *Immigration, Sports in America, Drugs and Alcohol, Capital Punishment, and Representative American Speeches: 1984-1985.*

Data Phase Today

SUPERIOR SOFTWARE REQUIRES EXTRAORDINARY EFFORTS.

FOR WHAT IT MEANS FOR YOUR LIBRARY, IT'S WORTH IT.

SOFTWARE IS INTRICATELY SPECIFIED, DESIGNED, PROGRAMMED AND TESTED CODE THAT TELLS THE COMPUTER TO PROCESS INFORMATION THE WAY YOU WANT IT TO.

Guaranteeing its quality requires a substantial investment in research and development. One that most companies aren't readily willing to commit to.

Data Phase spends an extraordinary 40% of its annual budget on research and development. Every dollar represents a return in the form of vastly superior automation products.

DATA PHASE'S RIGID DEVELOPMENT PROCEDURES ASSURE THE PROPER INTEGRATION OF THE "RICHEST SOFTWARE IN THE INDUSTRY."

Data Phase software provides you with substantially more integration, flexibility and functional capability. Designing such a system requires great discipline.

Our specification, software design and programming, and testing phases must adhere to rigid benchmark requirements.

In a field where standards are slow to evolve, our approach assures quality control throughout the entire software development process.

DATA PHASE HAS AN INDEPENDENT QUALITY ASSURANCE GROUP — AND THE TECHNOLOGY TO SUPPORT IT — TO ASSURE SOFTWARE RELIABILITY IN YOUR LIBRARY.

Our quality assurance group tests the software to its limit, before you do.

Simulating the transaction load found in a real library environment, they uncover problems that otherwise would be discovered on a library site.

It takes weeks to test any single function. Time to fix the problems we find.

But to assure the reliability of the software, it's necessary.

DATA PHASE'S 24-HOUR, 7-DAY-A-WEEK ONLINE SOFTWARE SUPPORT MEANS LESS DOLLARS YOU SPEND ON MAINTENANCE.

Data Phase is the only turnkey vendor providing its users with online dialup software maintenance 24 hours a day, 7 days a week.

Most problems are quickly resolved over the phone. Those that aren't can be more thoroughly diagnosed before an engineer is dispatched to repair the problem.

DATA PHASE'S DEDICATION TO TECHNICAL PROCEDURES AND TECHNOLOGICAL INNOVATION WILL PROVIDE MORE FUTURE OPTIONS FOR YOUR LIBRARY.

A turnkey vendor must be flexible in terms of both hardware and software in order to take advantage of new technology for its users.

Our use of unmodified Data General and Tandem hardware provides many more options to our customers. Unlike most other vendors, we are not bound to the equipment we manufacture, or just one product line.

And since our software is written in standard languages, it will easily interface with future technological innovations.

It takes great effort to coordinate the wide range of variables that our approach takes.

But there's no other way to assure that your investment today will help you meet the challenges of tomorrow.

AND, DATA PHASE PROVIDES YOU WITH THE EXPERTISE OF THE MOST EXPERIENCED PROFESSIONALS WORKING IN SOFTWARE DEVELOPMENT TODAY.

We have over 50 full-time professionals in one of the finest research and development groups to be found supporting any automation endeavor.

They spend thousands of man-hours a week designing, testing and supporting Data Phase software.

And they are dedicated to being a part of the finest turnkey system offered to the library community.

The effort that we have put forward in developing our product for your library is extraordinary.

But it's what provides Data Phase users with extraordinary software.

There's no doubt that it's well worth it.

Librarian in space

"THE NEXT VOICE YOU HEAR," said the telephone operator, "will be the President of the United States."

That kind of message, in the middle of a work week, could send almost any American reeling in space, even someone who was shocked by remarks attributed to the President just two weeks earlier.

Librarian Virginia B. Moore, head of audiovisual services at the Anacostia Senior High School in Washington, D.C., was just such a person. Like many of her colleagues around the nation (see "In the News" story), Moore took issue with an Aug. 27 Presidential comment to students, as reported in the *Washington Post* the next day. Speaking to a packed auditorium at Washington's Jefferson Junior High School, President Reagan praised the high achievements of the school; then, in response to staff concern about the condition of the building, he said, "I attended six elementary schools myself, and one high school. And in none of them was there a library. I think the facilities aren't nearly as important as the humanity in the facilities."

Librarian Moore was hurt by those words. She has devoted the past 20 years of her life to improving library/media facilities for students, working in elementary, junior high, and senior high schools. She labors long and hard, and at the end of a school day goes to work at a second job. She has seen the benefits of library media skills in the lives of students. She has gone beyond her school to serve in community library activities and in the ALA's Council, Intellectual Freedom Committee, and American Association of School librarians.

And so, on Labor Day Weekend, the last holiday before a crush of work, she sat down to write a letter to the *Post*. She had published previously only in a school newsletter, but the feelings were strong and the words came out.

"Librarians are necessary, Mr. President," the letter was titled when it appeared in the *Post* September 12. In some 450 words, Moore recapitulated the President's remarks, asked if that quote could possibly be correct, and went on to describe a sixth-grade student of hers some time ago at Davis Elementary School. The abilities the student showed as a library aide and avid library user helped get him into Jefferson, from where he advanced to Putney School, and then to Yale.

"And while Mr. Reagan prospered in schools without libraries," Moore wrote, "I believe that the 'information explosion' of more recent years has made school libraries necessary.

"Presently, no other facility offers ready access to a wide variety of reading and instructional materials in many formats, which lend themselves to individual learning styles.

"In my opinion, when our society is demanding preparation in service professions and vocations, computer and engineering technology, and personal economic independence, great value must be placed on all school facilities.

"Consequently, the school library media center is valued as one of the facilities in which the 'humanity' of school librarians and library media specialists are combined cooperatively with others in the advancement of 'excellence' in education. Would President Reagan agree?"

The President calls

It isn't easy even for a President to reach a busy school librarian. After two tries, the White House got Moore to the phone in the Anacostia High School office, and the President, citing her letter to the *Post,* said, "I'm calling to assure you that school libraries are necessary."

The call came on Thursday, Sept. 13, and lasted about 4 minutes, according to Moore's reconstruction of the dialogue for *American Libraries*. "It was hard to concentrate, with everything going on in the office," she said, "but after his opening comments, he said that the modern-day library has had phenomenal success with students. That, while he didn't have a school library himself, he realizes this is a new day."

Some of the dialogue was a monologue: On the President's passion for reading and on teaching his children that joy. He told Moore his greatest nightmare is to be stranded without books. He wondered if there were others, like himself, who had books they'd like to give to libraries.

Moore managed to get some points in. She praised the Partnership in Education program benefiting her school; but also, "I told him this is a time we really need support for libraries, and asked if we could count on his. I asked if I could be in touch with him. He said yes."

In a follow-up letter to Reagan, Moore is directing him away from the gift-book concept toward working with library associations to build true quality collections. She will gratefully accept *his* gift books, however, for her school library.

Reentry

Moore didn't call the *Post* to urge another story. She was happy with the pride her school took in the event, inviting her to address classes and praising her as a fine representative of their aspirations. But her life has hardly changed, and already one rebuttal of her letter has appeared in the *Post*.

Did the call change her feelings about the President?

"I had just gone through an ALA training program called 'Censors are people, too,' " she said. "I tried to listen to him as a person. In the past, when he came on television, I used to turn him off. But felt I was talking to a warm individual. Let's hope he's not simply all charm."

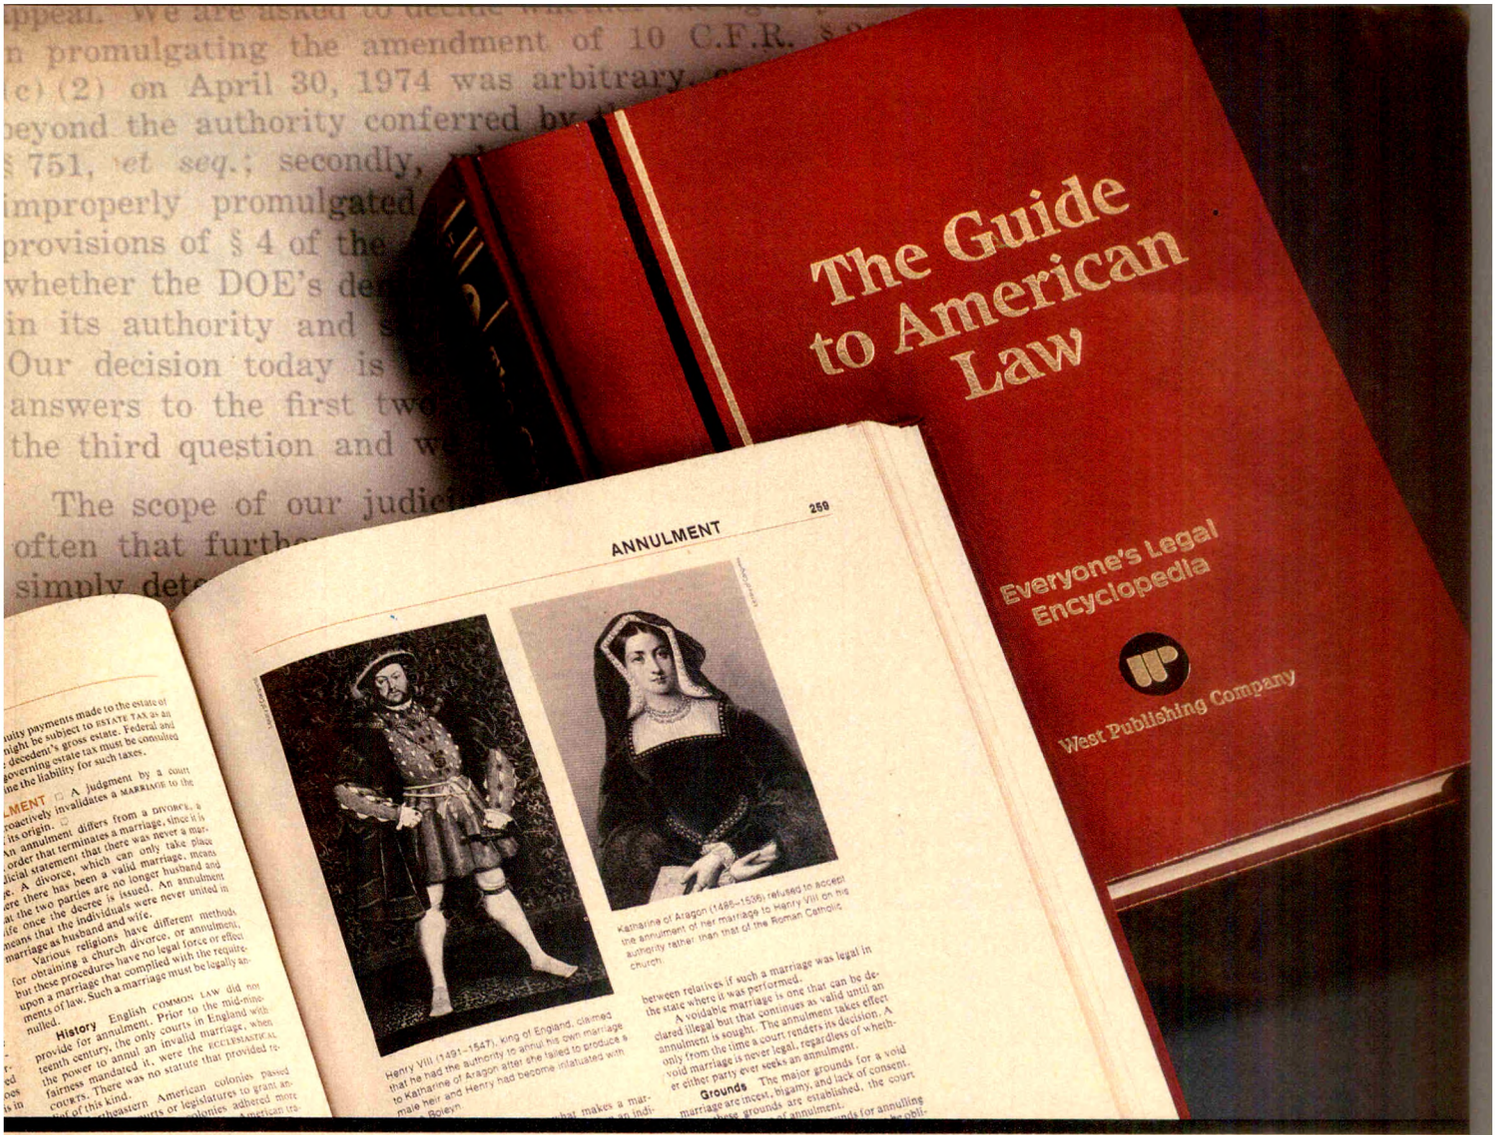
The same day Reagan addressed Jefferson Junior High, he announced that a schoolteacher would be selected to ride the NASA shuttle into space.

Why not a librarian? Everyone knows the answer to that one: Librarians are already weightless in the orbits of influence.

Right?

Only if you think so. Virginia Moore didn't, and look what happened. Thanks for phoning, Mr. President, and do call again.

—Art Plotnik



The Guide to American Law translates legalese into legal-ease.

West Publishing announces the first—and only—legal encyclopedia that doesn't require a law degree to understand.

Called The Guide to American Law, that is exactly what it is: a comprehensive, authoritative look at the laws, court decisions, principles, notable people and historic documents of America. And it is written in clear, understandable language.

The entire 12-volume set is available for a short time only at a special low pre-publication price. Send in the coupon below for more details and sample pages of The Guide to American Law.

FOR FAST ORDERING AND FURTHER INFORMATION, CALL TOLL-FREE: (800) 328-9352. Ext. 66

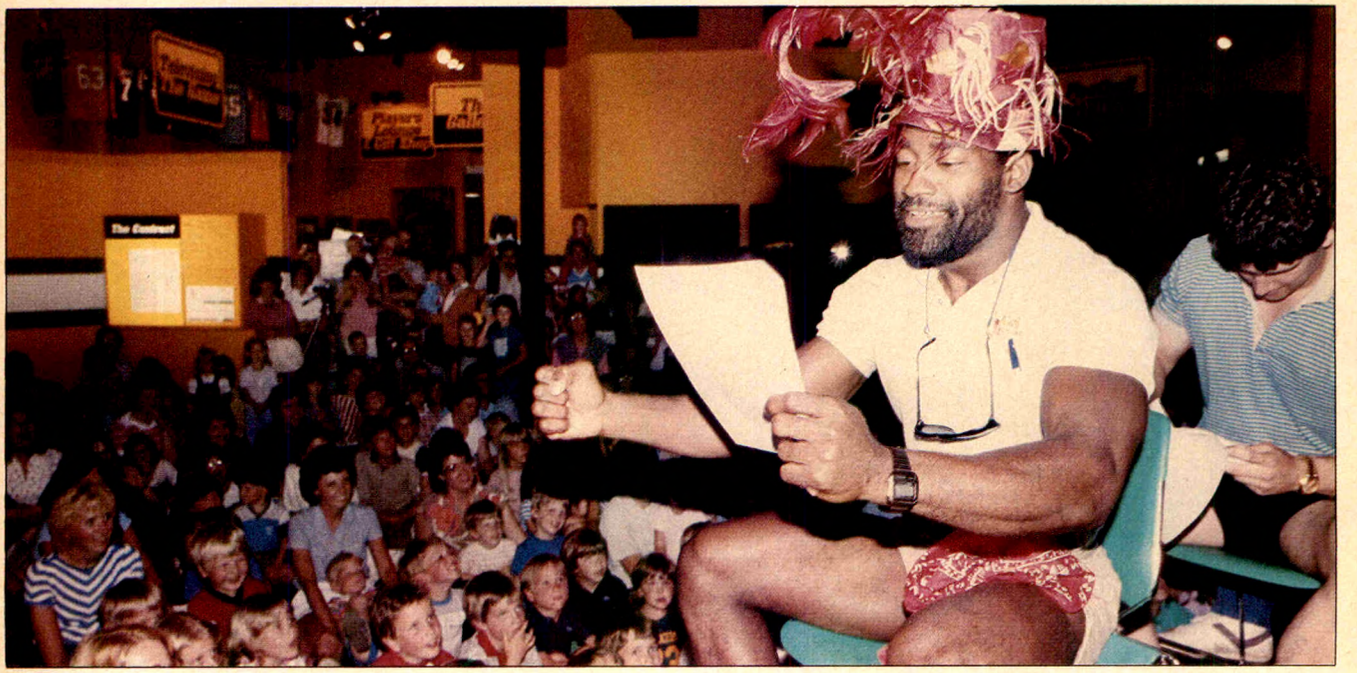
library life

A WINDOW ON OUR INTERESTS WORLDWIDE



John A. Robb, *Green Bay Press-Gazette*

Packers become storytellers for a day

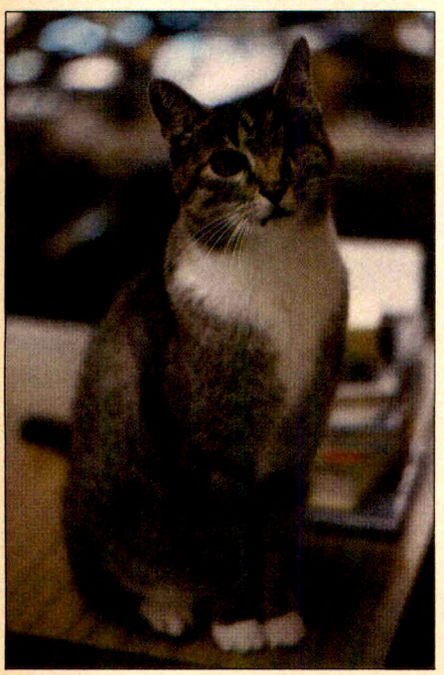
Wearing strange and funny hats, five Green Bay Packer players recently read and dramatized bedtime stories at the Packer Hall of Fame before an enthralled audience of more than 400 children and parents.

"It was definitely a family outing," said Suzie Effland, children's programmer for the Brown County (Wis.) Library, which cosponsored the event with the Visitor and Convention Bureau.

Defensive back Johnnie Gray played the role of a bus driver in "The Elephant on the Bus." In this story, the feathers on a lady's hat cause an elephant passenger to sneeze, which sets off a massive hat-switching among the other riders. Above, bus driver Gray ends up with the feathered hat.

Children's librarian Karen Prevetti, who trains the library's Treetop Storytellers—a reader's theater group of youngsters who perform upon request for community gatherings—put together the scripts and costumes for the five stories presented.

Among the stories performed was "Goldilocks and the Three Bears." Packers Gray, Tim Huffman, Larry McCarren, Ron Hallstrom, and Larry Rubens showed excellent sportsmanship as they donned such costumes as elephant ears, bonnets, and green pants to play their various roles.



One-eyed cat finds happiness

Jiggers, the one-eyed cat, has made her mark as an affectionate and playful inhabitant of the Porter Public Library in Westlake, Ohio.

"Jiggers belonged to a neighbor, but she has lost her wandering foot since she moved into the library about three years ago," librarian Kathleen Carnall said.

She calls the library mascot "an alert 14-year-old," but others guess her to be 10. Middle age and lack of claws don't discourage the adventurous feline from her favorite sport: chasing chipmunks and proudly bringing them back to the library to show off her conquests. "We hold on to her and let the chipmunk go," said Carnall.

"Jiggers is always easy to find," said Dede Winkel, Carnall's secretary. "She's following the flow of the public, for she loves people."

Call for color and reports

Though the editors continue to look for outstanding black and white photos to enhance this column, *AL* will now and then present a more colorful view of the library world.

For this purpose, 35mm and oversize color transparencies are sought. Though transparencies are preferred, color prints are acceptable. Ideally, pictures should be brightly lit and contain vivid colors. See film-package instructions for shooting under indoor lighting conditions.

AL seeks straight-to-the-point, human-interest picture stories for use in this column. Each should show at a glance how life in your library departs from the usual programs and events. Reports from schools and academic libraries are especially needed.

Please send an SASE for return of photos. Send picture stories and picture-story ideas to Edith McCormick.

Coloring parties brighten Houston campaign

At three evening coloring parties in late summer, an advertising club and library staff colored posters for the Houston Public Library's latest ad campaign: "Check Us Out. We've Got More Than You Think."

This was typical of the volunteer effort which netted the library more than $8,000 worth of donated services to develop and produce campaign materials. The entire library campaign was contributed by Ad 2 Houston, an organization of young advertising professionals.

At right, Katy Bomar (standing), public service director of Ad 2, offers some coloring suggestions to Florencio Briones, a delivery person for branch services, and media coordinator Mary Francis. Janie Arriaga, librarian of the Bibliographic and Information Center, works at left.

Anne Mashinic, public information officer, told *AL* that by the end of August 700 posters had been completed at the coloring parties. Some posters are in English; others, in Spanish.

Ad 2 focuses on promoting education and public service organizations such as the library and the American Cancer Society.

Cartoon-like graphics appear along with the slogan on advertisements, fliers, branch fact sheets, and the posters. In addition to the print materials, five ten-second public service announcements will be appearing on local TV stations. Production time for the spots was contributed by the local CBS station.

Staff contribute to the Houston Public Library's latest ad campaign by coloring cartoon-like graphics on some 700 posters.

Twins mark total of 78 years at Norlin Library

By the end of this month, twins Martha and Marie Campbell will together have logged 78 years on the staff of Norlin Library, University of Colorado at Boulder.

The university honored Martha during a reception for long-term employees in February, and Marie will be similarly feted this fall. Both began as student assistants in 1945.

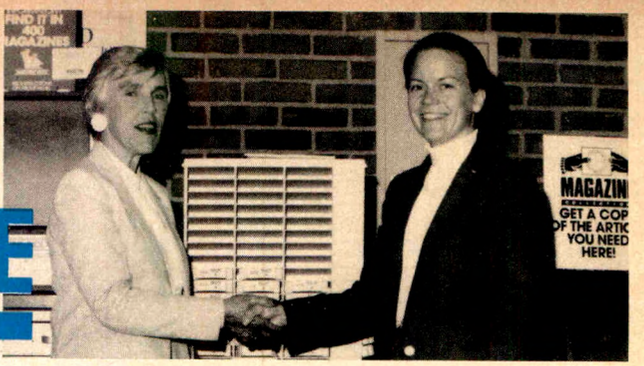
Library Director Clyde Walton, pictured at left with Martha in pink and Marie in blue, commented, "Without people like them, we couldn't operate successfully."

Martha has worked as a technical assistant in the Government Publications Department since 1945. She said that Ellen Jackson, who headed the department from the '40s until her death in 1965, most inspired her work. "She was very dedicated and knew the document field thoroughly."

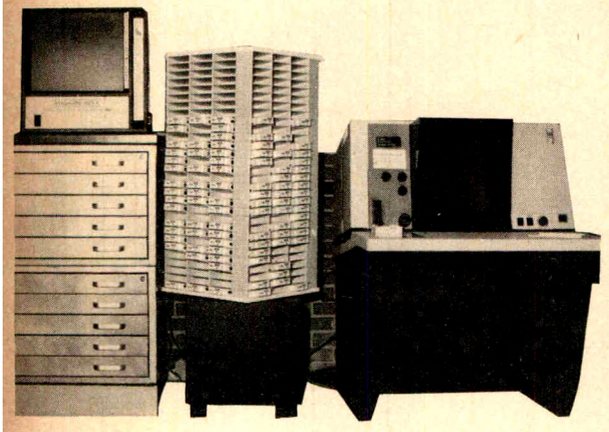
Marie, who currently assists the Periodicals Department, worked 29 years in the Education Library until it was discontinued in 1979. She credits Mary Louise Lyda, now retired, with instilling a sense of service in all her employees. "She *cared* about the students and faculty," Marie said.

Martha and Marie agreed the greatest changes they've witnessed are campus growth and automated circulation. Marie told *AL*: "In the 40s I knew all the professors by name, but now our department doesn't check out materials to them. When professors wish to take periodicals, we refer them to the reference desk. I guess that's part of growth, though."

BLOOMFIELD LIBRARY WINS REFERENCE NETWORK GRAND PRIZE



Suzanne Sutton, Director, Bloomfield Hills Public Library, Bloomfield, Michigan, receives her state-of-the-art reference system from IAC VP-Marketing, Blodwen Tarter.



As the Grand Prize Winner in the IAC $77,000 Reference System Giveaway at ALA Dallas, Ms. Sutton was presented with a complete, state-of-the-art IAC Reference System. Bloomfield Library patrons now have new resources plus easier access to existing reference services.

Bloomfield's IAC Reference Network includes components which can be added to any library's current reference system one at a time. The prize includes a one-year subscription to BUSINESS INDEX™ which includes citations from more than 800 journals, plus related newspaper items.

Ms. Sutton's grand prize also includes a one-year subscription to MAGAZINE COLLECTION™ which complements the MAGAZINE INDEX™ Bloomfield has been using for some time. This index covers 400 periodicals, many of which are indexed only by IAC. The MAGAZINE COLLECTION™ makes it possible for patrons to find, read and print out the entire text of the article if they wish, saving staff time and offering more satisfaction because a comprehensive collection is always available without waiting for articles to be located.

To complete the grand prize system, IAC's SEARCH HELPER™ hardware and software puts Bloomfield in touch with IAC's online databases. In addition two hours of free online time augments Bloomfield's searching of all 8 IAC databases.

Find out how you can create more patron satisfaction, increase library usage, and save more staff time from your personal IAC representative. With no obligation,

CALL (800) 227-8431, TOLL-FREE

Over 1,500 reference librarians across the country participated in IAC's giveaway thereby helping the Coalition for Literacy Fund, through an IAC donation for each entry.

Postage stamp and NLW contest call for "A Nation of Readers"

"A Nation of Readers," a theme popularized by the Library of Congress Center for the Book, has also been chosen for a U.S. postage stamp and for National Library Week April 14–20.

ALA Past President Elizabeth Stone, chair of the NLW committee, recently announced a national photography contest focused on "A Nation of Readers."

The theme was first introduced in 1982 by Librarian of Congress Daniel J. Boorstin. "To have the benefits of a nation of readers, we must raise a citizenry who are qualified to choose their experience for themselves . . . and so secure the independence that only the reader can enjoy," he said. LC's Center for the Book has spread the message in its efforts to stimulate public interest in books and reading.

Independently, the Citizens' Stamp Advisory Committee recommended the stamp to Postmaster General William F. Bolger. Designed by advisory committee member Bradbury Thompson of Riverside, Conn., the vertical stamp is based on a Mathew Brady daguerreotype showing President Abraham Lincoln reading to his son Tad.

Both Bolger and Boorstin will speak at Library of Congress ceremonies Oct. 16, when the stamp will be issued. A commemorative stamp—as were the "America's Libraries" and "Library of Congress" stamps of 1982—"A Nation of Readers" will be available only for a few months.

Bolger, who has announced his retirement at the end of the year, told the weekly *Stamp Collector* of Aug. 20 that he also promoted a fourth stamp on reading and libraries honoring literacy leader Frank Laubach. The Laubach stamp, one of the Great Americans series, was issued in Benton, Pa., Laubach's birthplace, on Sept. 2 and will be available indefinitely.

"Frankly, we like to think of ourselves and we are, a very sophisticated country," Bolger told a *Stamp Collector* reporter. "But there's a large illiteracy problem in this country and nation. All these stamps have to do not only with commemorating these people and this type of activity but to make the people conscious—all the people of this country conscious—of the need to be reading."

Photo contest guidelines

The "Nation of Readers" National Library Week photo contest, Past President Stone believes, will bring all libraries across the country together in a grand celebration of reading and libraries. In announcing the contest, she recalled that local libraries have recently held NLW contests successfully. This year ALA encourages libraries to hold local contests and forward the first-place-winning photos to ALA for judging. The national winners will be announced at ALA Annual Conference in Chicago.

Amateurs of all ages may join the contest. Young people through twelfth grade will be judged in a youth class. Winners will be selected in the photographic categories of black-and-white and color, and the winning photos will tour the country. Prizes include cash awards. For complete rules and guidelines and a free promotion kit, write "A Nation of Readers" Photo Contest, Public Information Office, ALA, 50 E. Huron St., Chicago, IL 60611.

White House conference vets gear up for a second round

In preparation for the fifth annual meeting of WHCLIST, the White House Conference on Library and Information Services Taskforce, Chair Laura Chodos of New York requested a comprehensive update of progress made toward implementing the 64 resolutions adopted at the 1979 conference.

WHCLIST was originally elected by White House delegates to track the resolutions; it is composed of one layperson and one librarian from each state and territory. Under Chair Chodos for the last three years, the taskforce has developed into an action-oriented, high-spirited force.

Meeting Sept. 6–8 at the Orrington Hotel, just across the street from Librarian Don Wright's Evanston (Ill.) Public Library, some 60 library advocates were given copies of a 40-page, line-by-line progress report. The mid-decade review, described by Chodos as "the bible of our work," had been compiled by Bill Asp of Minnesota, Mary Alice Reszetar of the National Commission on Library and Information Science (NCLIS), Bruce Daniels of Rhode Island, and Eileen Cooke and Carol Henderson of the ALA Washington Office.

Alongside each lengthy resolution, the update lists actions taken to implement any part of it. A final draft of the review, which will provide factual background in planning for the proposed second White House conference on libraries in 1989, will be presented to NCLIS early next year.

WHCLIST delegates also received the fifth *Annual Report from the States*, compiled and published by the New York State Library and GladysAnn Wells, special assistant to the state librarian. Survey returns from 44 states, five trust territories, the District of Columbia, and the Indian nations indicated that literacy and adult education programs were statewide priorities in 25 states, public awareness continued to be a major area of interest in 43 states and territories, and friend's or citizen's library councils were active in 30 states and territories, Chodos reported.

Benton cites results

Charles Benton of Evanston, who chaired the 1979 conference and headed NCLIS in 1978–82, told WHCLIST delegates he had accepted a second term as NCLIS chair under President Reagan in order to help implement the White House conference resolutions. Benton said the progress report shows that the resolutions have succeeded in making both the national commission and the Library Services and Construction Act more responsive to public needs. Benton pointed out that NCLIS has either endorsed or established program areas relating to 33 of the 64 resolutions, and the pending law extending and expanding LSCA affects 22 resolutions.

WHCLIST V, programmed by Jim Marvin of Kansas and Don Wright, was titled

Lay-librarian combo succeeds

Inspired by the public awareness workshop at last year's WHCLIST meeting in Cheyenne, Wyo., members living in Region I, the Northeast, asked the Chief Officers of State Libraries in the Northeast (COSLINE) to replicate the model and raise regional consciousness. COSLINE agreed, and Region I reps Joan Reeves of Rhode Island, Dency Sargent of Connecticut, and Lucille Thomas of New York joined state librarians on the conference planning committee.

COSLINE and WHCLIST invited 120 librarians, friends, media people, educators, and other community leaders from 11 states to talk about "Effective Connections: New Roles for Library Supporters" at the Howard Johnson's Conference Center at Windsor Locks, Conn., Aug. 6–7. Speakers included ALA President E. J. Josey, Rep. Major Owens (D-N.Y.), and incoming WHCLIST Chair Barbara Cooper.

At WHCLIST V in Evanston, COSLINE conference Chair Barbara Weaver of New Jersey described the conference as successful and exciting. The participants "sharpened their skills in library advocacy, shared common problems and experiences, discussed national and local library issues, and went back to their states with new ideas, solid plans, and enthusiasm for action for libraries," Reeves said. She proposed that the COSLINE-WHCLIST conference serve as a model for other regions, spreading the WHCLIST mission nationwide.

"Toward a Nation of Readers: Literacy and Libraries." At a morning session, Jean Coleman, director of the ALA Office for Library Outreach, described the library role in combating illiteracy. Cheryl Y. Judice, executive director of the GRASP Adult Learning Center in Evanston, moderated a panel of local literacy leaders and introduced two happy new readers who testified that GRASP is accomplishing wonders. The center contracts with business firms to improve employee skills. In the final session, delegates resolved to coordinate their local schools, labor unions, extension offices, public libraries, and other special interests to achieve a coalition

Brazil's rubber-boom library dreams of restoring services

Special report by Richard F. Phillips

Entering the Biblioteca Pública de Manaus, a visitor is swept back some 90 years to the fabulous days of Brazil's rubber boom in the Amazon jungle.

The library, founded in 1866, moved into this palatial home in 1894, the same year the famous Manaus opera house was built. An ornate double staircase wrought of Glasgow's finest iron embraces the huge mahogany reception desk and winds upward to spacious second-floor drawing rooms.

Today the broken windows, inadequate wiring, weak floors, blistered paint, and a dilapidated exterior mirror the library's starvation-level budget.

Library Director Lucila Claudia B. Goncalves describes the library as *a toa,* aimlessly adrift. In its heyday, she says, some 90 percent of its users were students, but the state education department currently provides no support. The aging collection is in disarray and the few staff members can give little service to the 700,000 residents of Manaus.

No library board exists and the business community ignores the situation. Only the local Cultural Superintendent and the Institute of Child Well-Being display any interest.

All Brazilians have been suffering from a 200-percent inflation rate for several years, and the nation is staggering to meet interest payments on its huge foreign debt. A one-point increase in the U.S. prime interest rate costs Brazil $500 million without anything to show for it.

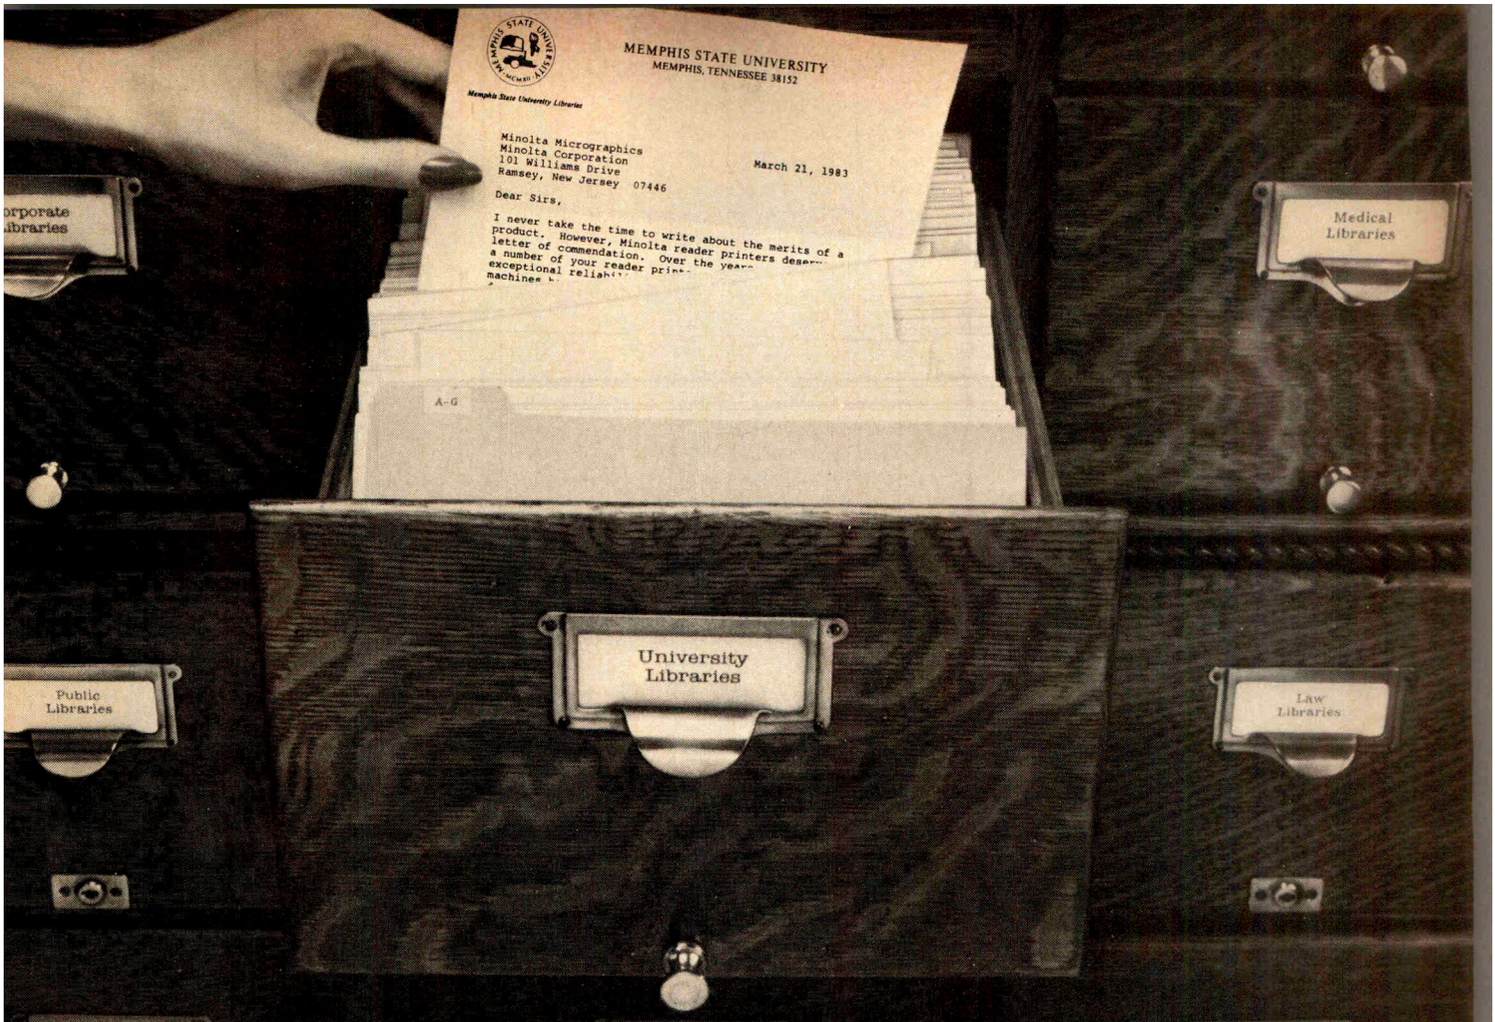
But on the streets of Manaus, residents excitedly talk of a fantastic gold rush which, they say, could create another boom. Latest figures show employment up in the country's industry, and Manaus, an economic free zone, is attracting worldwide investment in electronics and manufacturing. Tourism may come next.

Goncalves hopes economic recovery will bring a *reforma* to the library. The great building could be restored, she says, and a book and materials budget created. Library branches could be set up in the child well-being centers that exist throughout the city. Goncalves even envisions book boats to extend services throughout the sprawling Amazon region.

Inside the once-grand Manaus library, a receptionist waits for patrons.

Outside, new buildings rise, traffic clangs, and residents talk of economic recovery —while the library building deteriorates.

Richard F. Phillips, a cataloger at the University of Florida Libraries, served as a Peace Corps volunteer in Brazil in the early '70s. He recently visited Manaus on a Tinker Foundation grant.



THEIR REFERENCES WOULD FILL A LIBRARY.

Libraries from A to Z have written us referencing the quality and reliability of Minolta RP 405E and RP 407E reader-printers.

We're pleased, but not surprised. Because both models have a lot to offer libraries. They give you sharp, positive, permanent prints from either positive or negative film. Prints you can write on with just about any writing instrument.

They feature Minolta's exclusive fully automatic exposure control for quality prints the first time. Saving time and reducing paper costs.

And they accept virtually every microformat made. With carriers that permit even untrained operators to switch from roll film to fiche in seconds.

See them at any authorized Minolta dealer in our nationwide network. Check the Yellow Pages for the one nearest you. Or call toll free 800-221-3333. In N.Y., (212) 775-1395.

Minolta reader-printers. Because libraries are where classics belong.

IF YOU DON'T INSIST ON A MINOLTA THIS TIME, YOU WILL NEXT TIME.

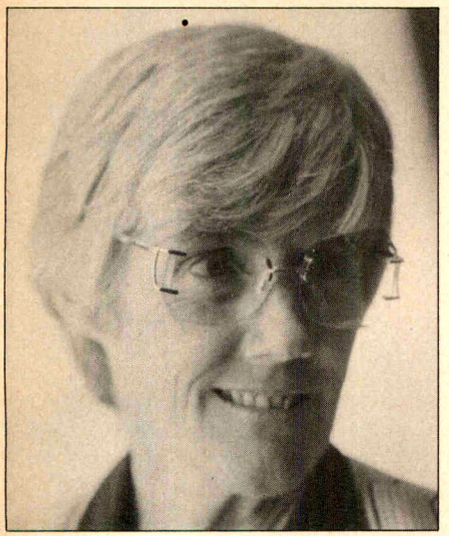
working for literacy.

Most WHCLIST actions, however, concentrated on the second White House conference on libraries. The delegates commended Sen. Claiborne Pell (D-R.I.) for announcing in Congress Aug. 3 that he intends to introduce legislation calling for the 1989 conference. The delegates formally asked NCLIS to take the responsibility for the conference and include WHCLIST reps on the preliminary design and advisory committees. They resolved that state conferences should again precede the national conference and that Congress should authorize funding.



Laura Chodos of New York completes three years as chair of WHCLIST.

WHCLIST members, who belong to more than 200 organizations and have listed them in a directory, hope to involve other groups in planning the 1989 conference. In Evanston the delegates voted unanimously to invite representatives of such other groups as the League of Women Voters, the Advertising Council and Federation, and ALA to join in a "Committee of the Whole" at the sixth WHCLIST meeting next September.

Incoming Chair Barbara Cooper of Florida told *AL*: "We want to open up and build new connections to get grass roots support for the 1989 conference. We want to reach out to all agencies that might be expected to have an interest." —*L.R.P.*

School library advocates challenge Reagan remark

"I attended six elementary schools myself and one high school, and in none of them was there a library. I think the facilities aren't nearly as important as the humanity in the facilities. But I find this quite sufficient in view of what I learned myself," President Ronald Reagan told incoming seventh-grade students, parents, and faculty at Jefferson Junior High School in southwest Washington, D.C., Aug. 27.

Reagan's informal remarks, intended to reassure students concerned about the age of their school, aroused library advocates across the nation. "Where has Reagan been these last 60 or so years?" asked Bettie Day, President of the American Association of School Librarians. (See box next page.)

At the Sept. 6–8 White House Conference on Libraries and Information Services Taskforce meeting in Evanston, delegates expressed anger at the statement, but tabled a resolution opposing it.

The *Pocono Record* of Stroudsburg, Pa., published the opinions of local educators: "I don't know where the president went to school," said Pleasant Valley School District Superintendent John Nye, "but this is 1984 and we're living in a high-tech society." He feels adequate facilities, including good libraries, are essential to a good education.

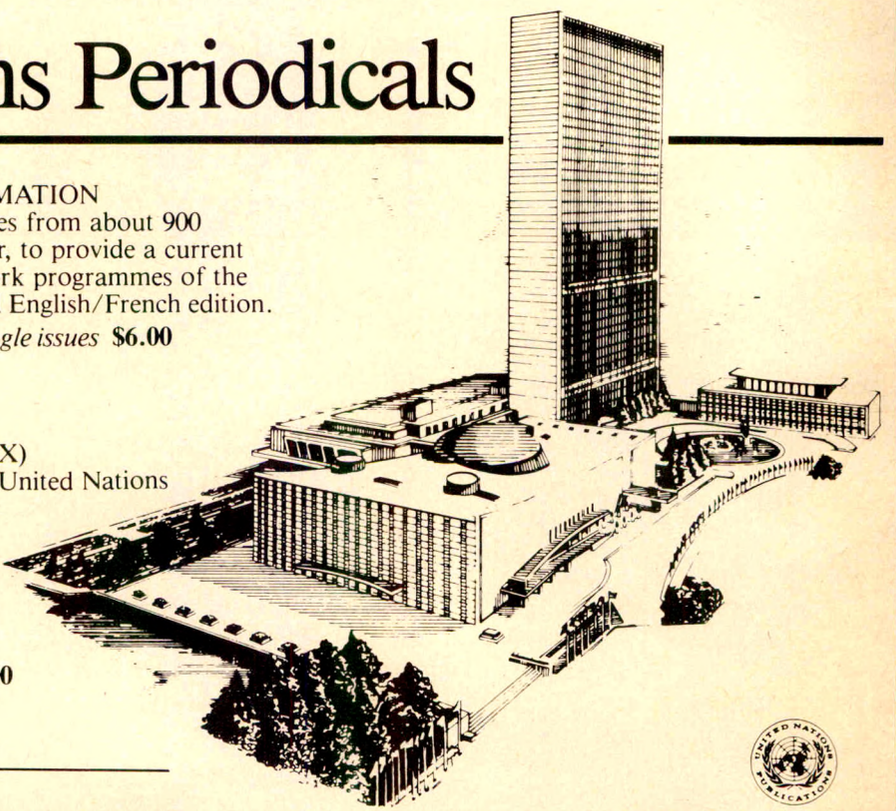
Curriculum Administrator of the Stroudsburg School District Russell Treible wondered what happened to all Reagan's school classmates. "He, obviously, was successful, but I wonder if others who attended those schools had the initiative to take advantage of the library materials when they became available." Treible considers the school library the most important element of the educational facility.

United Nations Periodicals

CURRENT BIBLIOGRAPHICAL INFORMATION
Selectively analyzes books and selected articles from about 900 world-wide periodicals, UN system and other, to provide a current awareness list of materials relevant to the work programmes of the United Nations. Issued monthly in a bilingual English/French edition.
Annual rate **$65.00** *Single issues* **$6.00**

UNDOC: CURRENT INDEX
(UNITED NATIONS DOCUMENTS INDEX)
UNDOC gives a comprehensive coverage of United Nations documentation including full bibliographic description, subject, author and title indexes, and a check-list of United Nations documents received at Headquarters.

Issued 10 times yearly in English only.
Annual rate **$120.00** *Single issues* **$14.00**



For further information on all Periodicals of the UN send for our free Periodicals Brochure and our Catalogue of International Publications

Palais des Nations, 1211 Geneva 10, Switzerland

A school librarian takes issue

"Ronald Reagan's comments about school libraries are certainly indicative of a very narrow and traditionalist point of view of education.

"Where has Reagan been these last 60 or so years? Does he still perceive a school library as a room with four walls and a few books? Where has Reagan been during ESEA Title II, ESEA Title IVB, and the Block Grants Program of the last two decades?. . . .

"Reagan should visit a few of the 88,000 library media centers in the public and private schools of America; view them in action; see how school library media specialists, resources, and a skillfully developed library program mesh together to meet the individual needs of all—the gifted and the learning disabled, the disadvantaged and the affluent, and the so-called 'average student.'

"It is the school library media center where students explore and expand their knowledge beyond that of traditional textbook learning. They use a variety of print and nonprint materials, including computers. School libraries help prepare students for this information technology world. . . .

"Ronald Reagan should read ALA's *Realities* and the Department of Education's *Alliance for Excellence* and become enlightened about school library media centers. Expand your horizon, Mr. President!"—*Bettie Day, President, American Association of School Librarians, and Coordinator, Library and Resource Center Services, County Superintendent of Schools Office, Santa Barbara, Calif.*

Minudri and Sager to run for '86-'87 ALA presidency

Regina U. Minudri, director of library services, Berkeley (Calif.) Public Library, and Donald J. Sager, city librarian, Milwaukee (Wis.) Public Library, have been selected by the American Library Association Nominating Committee as candidates for the presidency in the 1985 elections.

Nominating Committee Chair Thomas Alford, city librarian of Los Angeles, and committee members Sul H. Lee, Suzanne J. LeBarron, Patricia Mautino, and Ilse Moon, call attention to Bylaws/Article II, Section 3 (b), permitting Council members to propose additional nominations by presenting petitions signed by not fewer than 25 Councilors.

The committee's full report will be published in the November issue of *AL*.

Membership hits new high

Membership in the American Library Association reached a record high of 39,477 at the end of the 1983-84 fiscal year Aug. 31. The grand total topped the 39,124 recorded on Aug. 31, 1983, by 353.

Personal members in August 1984 numbered 36,554, an increase of 453 since last year. Organization memberships, at 2,393, decreased by just 93. Associate Executive Director Ernest Martin reported that 86.7 percent of the previous year's members renewed their memberships.

news in brief

Stabbing victim will return to job. Three weeks after being stabbed by a disturbed patron, reference librarian Linda Feldman was still weak but determined to return to her desk at the Chicago Public Library Business, Science, and Technology Department by October. At CPL, her colleagues were attending their first workshops on the problem patron.

Feldman, 29, had been knifed in the abdomen Aug. 23 by a man seeking a book

Practical Designs with Contemporary Styling

Traditional Library Furniture with a Fresh New Look from Highsmith

- **Warm, Natural Wood Finish**
- **Heavy-duty Hardwood Construction for Years of Service**
- **Plus the 45-day Highsmith Guarantee**

This handsome Book Trolley has an unusual, upright design to get around crowded bookstack corners and is sloped for convenient viewing of titles. Oak Step Ladder provides secure support when stepped on, and moves easily when not in use.

See these, plus our wide selection of book trucks, step stools, and additional ladders with handrails or ladders on permanent tracks starting on page 226 of the 1984/85 Highsmith Catalog. To order, or to receive your free copy, write or call:

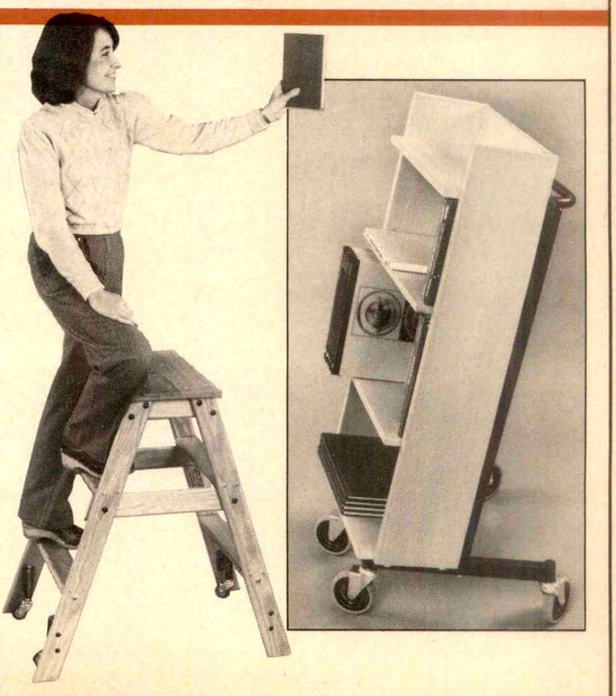
A Generation of Service



on alchemy. The assailant, a familiar figure in the library, created a disturbance as Feldman searched the microfiche catalog. He attacked her with a 5½-inch-knife when she told him she would have to call a guard. Another patron held the man at bay until help arrived.

Library employees immediately demanded more protection. Commissioner Amanda Rudd said City Hall paperwork had stymied the hiring of additional security guards.

At a library board meeting Sept. 11, Labor Librarian Kathleen Prendergast, president of Local 1215, American Federation of State, County, and Municipal Employees, requested that 45 new guards be hired at once and that all present guards receive adequate training.

The board announced it would examine the total security setup at the library and alter the guards' uniforms to make them look more authoritative. The board president agreed to try to get city officials to exempt the library from a municipal budget freeze on hiring scheduled for Sept. 15. The board also said the library would begin staff workshops on the problem patron in a few days.

Prendergast termed the board response "completely unacceptable." She told *AL* that two years ago the union's offer to conduct security classes for all staff members after hours had been rejected.

$600,000 gift tops Tulsa goal. A donation of $600,000 to the Tulsa (Okla.) Library Trust endowment fund has enabled the library to surpass its fundraising goal of $2 million. The gift – the largest single contribution ever given to the Tulsa City-County Library – was donated by Donna and Roger Hardesty, owners of The Hardesty Company, a Tulsa real estate firm. In gratitude for the gift, Tulsa's library commission has named the system's largest regional library the Donna and Roger Hardesty South Regional Library.

The Hardesty donation was made in response to a $250,000 challenge grant awarded to the library by the National Endowment for the Humanities. To receive the full award the library has to raise at least $750,000 in new or increased contributions by January 1987. Interest from the endowment fund is used to improve existing library services and to develop new services.

NYPL unit restores hours. Thanks to a grant from the National Endowment for the Arts and a private gift totaling $70,000, the New York Public Library's Performing Arts Research Center will increase its hours of service. For the first time in a decade the Lincoln Center facilities will open three mornings a week at 10 a.m. and will remain open until 8 p.m. two evenings a week – a 15-percent increase in the building's hours.

QUICK-Bibs: New and recent books on a timely topic

Bill Ott, compiler

SCIENCE FOR THE PEOPLE

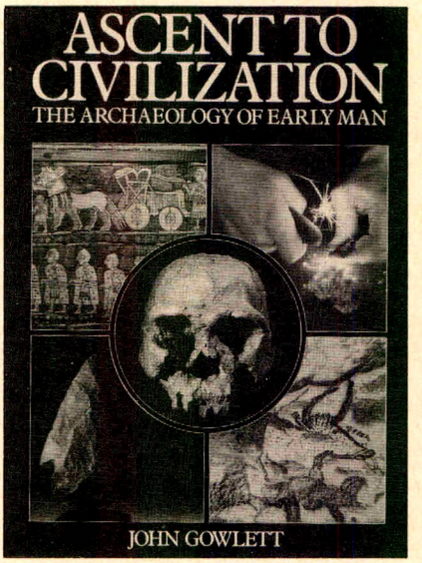
Traditionally, science and art have coexisted about as well as the Hatfields and the McCoys. The uneasy alliance between the two disciplines may explain why so many attempts to write about science for general readers have resulted in either oversimplification or terminal cuteness. With the 1979 publication of Douglas Hofstadter's *Godel, Escher, Bach,* however, popular science writing came of age. The success of recent works by John McPhee, Stephen Jay Gould, and many others has shown both that scientific subjects can attract popular audiences and that today's science writers are capable of being intelligent and entertaining at the same time. The following titles, all published within the last year, are further proof that science writing is thriving as never before.

Christianson, Gale E. *In the Presence of the Creator: Isaac Newton and His Times.* Free Press, 1984, $27.50. (0-02-905190-8, 83-49211)

Finally there is a book for anyone who has ever wondered what Isaac Newton was up to with all those apples. This absorbing study explains Newton's theories in a manner that lay readers can understand (well, almost), and reveals the scientist's obsessive, deeply troubled personality.

Durrell, Gerald and Durrell, Lee. *The Amateur Naturalist.* Knopf, 1983, $22.50. (0-394-53390-9, 83-47940)

Veteran naturalist Durrell and his wife show us what to look for and how to find it in a variety of natural settings—meadows, woodlands, and your own backyard. The authors' unerring way with an anecdote makes this lavishly illustrated volume as entertaining as it is informative.



Gowlett traces three million years of human presence on earth.

Gowlett, John. *Ascent to Civilization: the Archaeology of Early Man.* Knopf, 1984, paper, $14.95. (0-394-72266-3, 83-48713)

With the help of marvelously detailed, visually alluring illustrations—diagrams, maps, photos—Gowlett surveys the grand sweep of human evolution, from early signs of humanity through the advent of bipedalism to the first, tentative gropings toward civilization.

Gribben, John. *Schrodinger's Cat: Quantum Physics and Reality.* Bantam, 1984, paper, $7.95. (0-553-34103-0)

The mysteries of quantum theory unlocked by a cat? Not quite, but Gribben's attempt "to make the difference between the quantum world and the everyday world clear" is an ideal primer for those befuddled by subatomic particles.

Karlen, Arno. *Napoleon's Glands: And Other Ventures into Biohistory.* Little, Brown, 1984, $15.95. (0-316-48319-2)

Did Napoleon's plethora of physical problems affect his career? Did Goya's lead poisoning influence his art? Karlen's speculative work of "biohistory" explores these and other intriguing questions with an appealing mix of science and conjecture, historical research and scholarly gossip.

Lightman, Alan P. *Time Travel and Papa Joe's Pipe.* Scribner, 1984, $12.95. (0-684-18112-6, 83-27142)

Lightman's ability to express scientific principles in the terms of daily life will remind readers of Stephen Jay Gould (*The Panda's Thumb,* et al.). Who'd have believed, for example, that one could discover the basic laws of physics while admiring a pas de deux?

Luria, S.E. *A Slot Machine, a Broken Test Tube.* Harper, 1984, $17.95. (0-06-015260-5, 83-48366)

This autobiography of a Nobel-Prize-winning virologist offers a refreshingly human glimpse of life in a medical research lab. Luria discusses not only his groundbreaking work on bacteriophage and DNA, but also his involvement in various political causes.

Smith, Anthony, *The Mind.* Viking, 1984, $16.95. (0-670-47648-X, 83-47935)

From evolution to anatomy, from speech to memory, Smith explains all aspects of the human mind and its functions. This entertaining yet substantive treatment of an obviously complex subject speaks to the general reader in a tone that is neither condescending nor pedantic. □

***Bill Ott,** who writes this column freelance for* American Libraries, *is books-for-adults editor of ALA's* Booklist *magazine.*

The solution to your financial woes may be staring you in the face.

This American Painting was the solution for one small library.

Catherine Carter Critcher's painting *Indian Women Making Pottery* was thought to be worth a few thousand dollars but realized over $30,000 in a recent Christie's sale.

Perhaps you have a painting or decorative object that could be of such value. Why not call upon Christie's scholarly expertise and marketing knowledge.

Eighteen specialty departments can evaluate single objects or entire collections. And if you want to sell something our worldwide market is the ideal place to realize the top price.

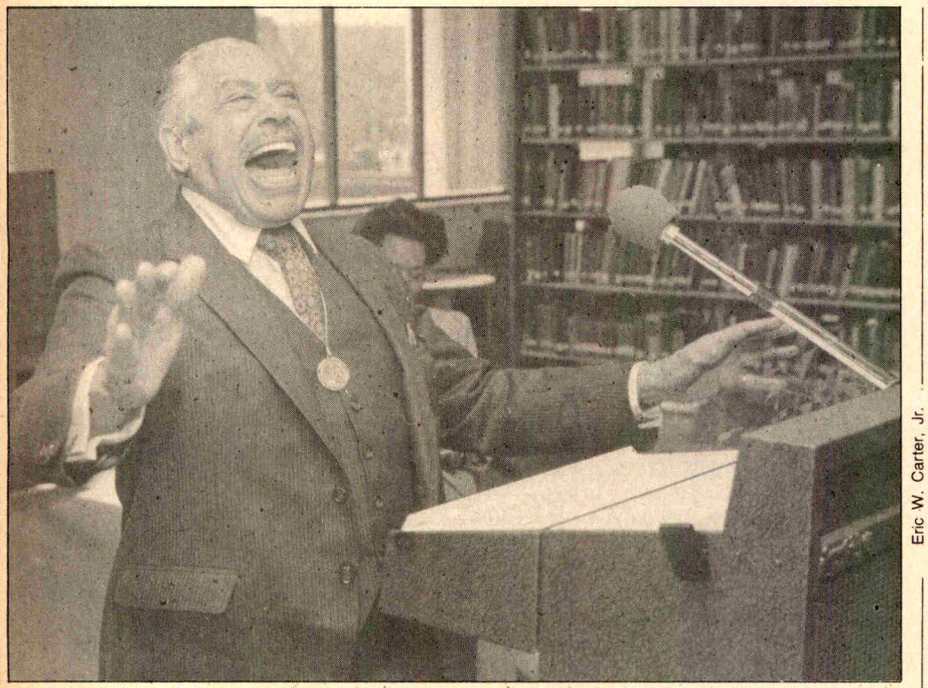
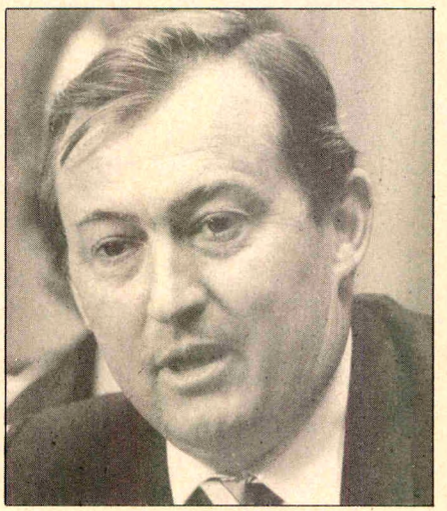
With $3 million for library humanities grants . . .

NEH WANTS YOUR PROPOSAL

The National Endowment for the Humanities is eager to fund FY '85 library projects



Eric W. Carter, Jr.



Among many spirited and culturally diverse NEH-funded library programs was a lecture and performance by Cab Calloway (top) on "Perspectives in Black American Music," March 1983 at the Fisk University Library, Nashville, Tenn. At Sonoma (Calif.) State University, the Ruben Salazar Library and the Office of Extended Education used NEH funds for a series on Indochinese cultures in California called "New Roots in American Soil." A Santa Rosa, Calif., schoolgirl born in Laos (above, left) was one of 24 performers of traditional dances of Cambodia and Laos at one program. Anthropologist Richard Leakey (right) keynoted the first program of "Perspectives on Our Past," an NEH-funded series at Lewis and Clark College Library, Portland, Ore., that explored the human presence in the Pacific Northwest from prehistoric times.

by Lois R. Pearson

Cab Calloway demonstrated his hi-de-ho style during a public lecture at Fisk University Library. . . Some 2,000 Central Valley residents participated in an all-day discussion of "Hill People in the Valley: Hmong and Mien Refugees in Merced, California" at the Merced College Library. . . Rural Vermonters gathered to talk about "Women in Literature" at the Montpelier Public Library. . . Devotees of Baker Street attended a two-day conference on "The Adventures of Sherlock Holmes in Minnesota" at the Radisson Metrodome in Minneapolis.

All these events occurred within Humanities Projects in Libraries programs recently funded by the National Endowment for the Humanities General Programs Division. That division is only one of many NEH grant-awarding entities: the endowment also awards funds through its research, education, state, and fellowships and seminars divisions and the NEH challenge and planning and policy assessment offices.

When Congress created NEH in 1965, it declared that "the term 'humanities' includes, but is not limited to, the study of the following: language, both modern and classical; linguistics; literature; history; jurisprudence; philosophy; archaeology; comparative religion; ethics; the history, criticism, and theory of the arts; those aspects of the social sciences which have humanistic content and employ humanistic methods; and the study and application of the humanities to the human environment with particular attention to the relevance of the humanities to the current conditions of national life." Congress added that the endowment also supports programs using humanities disciplines to study the societal implications of science and technology.

The thousands of programs funded by NEH since 1965 have brought kudos and criticism. The *New York Times* once ac-

cused NEH of funding "artistic circuses," and librarians among others have been charged with contriving trivial programs to obtain funds. Most recipients, however, extol the benefits of NEH library programs. Ruth Hafter, director of the Sonoma State University Library and the Indochinese Cultures Project, says NEH gives libraries and librarians a wonderful opportunity to reach out to their communities and develop new resources for them. Susan Goldberg, deputy director of the Tucson Public Library, declares that NEH projects have changed the library's image (see box below).

Next deadline March 8

Former library administrator Thomas Phelps is senior program officer for the NEH Humanities Projects in Libraries. Phelps wants more librarians to submit program proposals and share in the $3 million authorized by Congress for FY 1985. The next deadline for proposals is March 8; projects may begin as early as next September and cover one or two years.

"Libraries are a natural setting for the interpretation of literature, art, or other cultural works, or presenting an analysis of major historical events, figures, or ideas. What institution could do it better?" asks Phelps.

"Libraries have the resource materials for study and for learning. Humanities programs in libraries could increase the appreciation and use of library collections by the more than 130 million adult Americans," he adds.

Phelps welcomes proposals from all types of libraries serving adults—public, community college, university, and special. Many winning projects include libraries of several types: the Fisk University Learning Library Program on the Black American Experience, for example, was

How to write a winning NEH proposal

by Susan Goldberg
Deputy Director, Tucson Public Library

Since 1978, the Tucson Public Library has won National Endowment for the Humanities grants totaling nearly three-quarters of a million dollars for projects titled "The Sonoran Heritage"; "Tracking the 21st Century: Science, Technology, and Human Values"; and "Writers of the Purple Sage."

The projects have contributed to increased attendance at programs, greater use of resources, higher respect, and a more exciting image in the community. (Voters recently approved a $15.9 million library bond issue.) Residents, including university people, now look to us not just for books but for information in a variety of forms.

Putting together a humanities proposal is hard work, but gives librarians an opportunity to be creative and expansive. These suggestions may help you write a winner.

1. Study the NEH "Grant Program Guidelines and Application Instructions" before you start. Determine the support category for which you are applying and make sure you fit the eligibility requirements. *Underline* the elements required in the application narrative and application format sections. Be sure to understand what is required of your library, the sponsoring institution, before beginning the proposal. *Double underline* the deadline for applications, making certain to note the day the application is due in Washington, D.C., not at your local P.O.

Writing a proposal takes lots of time and resources so don't wait until the last minute. As you write, check the guidelines to make sure you are including all the necessary parts of the narrative. Plan on at least three weeks from the first draft to the final product, and, if possible, use a word processor!

2. Keep in contact with NEH from the idea stage through the drafting of the proposal. Program Officer Tom Phelps reacts to your ideas, offers advice and support, and helps you keep the project within the guidelines. He can also advise on budget and make cost-sharing suggestions.

Phelps can also give you the names of project directors who can send you copies of winning proposals. Reading proposals can give you ideas on organization, content, budget format, and staffing.

3. Focus on the NEH definition of the humanities and determine how your project relates to the humanities. The humanities content must be clearly defined as a major goal for your project.

4. Seek advice from humanities scholars on your local college or university campus. Make appointments with faculty friends or chairpersons in the appropriate departments, such as English, history, or anthropology. Explain your project and ask for help in developing themes, finding resource people, putting together an advisory board, and recommending background sources. In most cases, faculty members are pleased and flattered to be consulted and are willing to help; many universities are looking for ways to reach out to their communities, and your project might be the perfect vehicle. Humanities scholars can also help you define the project's humanities content.

Collect your scholars' vitae and supporting letters from the departments and institutions with which you are working to include in the proposal appendix.

5. Contact your state humanities council. Humanities councils can be a font of information and advice. Staff can refer you to scholars and institutions who might like to cooperate on your project. Staff members can also suggest resources, advise on budget, and might, in some cases, be willing to fund parts of your project.

6. Write in clear, simple prose. Avoid library and other jargon and meaningless catch words of the moment, such as process, linkage, network, and innovative. Your proposal will be reviewed by people from a variety of fields and language familiar to some is gobbledegook to others.

7. Be specific. Your plan of action should answer the questions who, where, when, why, and how the program elements are organized. Include themes, program examples, names of resource people and presenters, and a detailed timetable.

8. Budget realistically and accurately. As you write the proposal, put the budget together so that you can keep track of what items you will need and what staff is necessary. Include in-kind match and cost-sharing figures that represent your library's commitment to the project. Get accurate estimates of what it costs to hire a secretary, print a poster, rent equipment and space. Make sure your library cost-sharing figures really reflect all the time, staff, space, and other items or services that will help make your project work. Don't underestimate your in-kind match—producing a project always takes more time than you anticipate.

9. Enjoy the fruits of your labor—the funded project. Or, if at first you don't succeed, try, try again! □

cosponsored by the Public Library of Nashville and Davidson County. The college and public libraries of Merced, Modesto, Stockton, and Santa Rosa participated in the Sonoma State University Indonesian Cultures Project.

The endowment encourages applicants to consider new themes, test innovative ideas for presentation, and seek projects that can serve as models.

Librarians who wake up one morning with ideas for adult programs using humanities materials in their collections should call Phelps right away, he says. The number is 202-786-0271. A former deputy director of the Salt Lake City Public Library, Phelps offers free consulting service on library programs. If he thinks your idea is a loser, he will say so, kindly. If it sounds promising, he will encourage you to develop it and he and other program officers will coach you in writing the proposal. Phelps and his colleagues will reassure you as the proposal goes through the peer review process. If your proposal doesn't make it this year, they may suggest you rework it and reapply.

For several years the number of library proposals has been waning, Phelps says. He believes librarians might have been discouraged by the 1982 merger of Humanities Projects in Libraries with other projects within the Program Development section. Fewer proposals were received so less money was appropriated for FY 1983 and 1984.

In FY 1981, before the merger, Phelps says the Humanities Projects in Libraries office attracted 78 proposals, of which 44 were awarded $3.3 million. In FY 1982, when the library program was being merged with others, only 53 proposals were received and 25 were awarded $625,000.

In 1983, when the merger was completed, only 27 proposals came in. Fourteen were supported with $1.7 million. Of that total, $.9 million was awarded to "Let's Talk About It," the national reading project sponsored by the ALA Association of Specialized and Cooperative Library Agencies (*AL*, Dec., p. 698).

In FY 1984, only 37 proposals were received and 20 funded at $2.76 million. ASCLA's "Let's Talk About It" won an additional $500,000 in supplemental support extending it until Sept. 30, 1986.

Awards for currently funded library projects generally range from the $15,000 planning grant awarded to the Elmhurst (Ill.) Public Library for "Cultural Heritage: Tools for Understanding Germanic Traditions" to the $199,421 granted to the Cleveland Public Library for an interdisciplinary program to analyze Cleveland's cultural heritage from the Civil War to the Great Depression.

Write for guidelines

This year Humanities Projects in Libraries was reestablished as a distinct office in the NEH General Programs Division. New guidelines are being written for publication Nov. 1. To receive a copy of the guidelines, phone or write Thomas Phelps, Division of General Programs, National Endowment for the Humanities, 1100 Pennsylvania Ave., N.W., Washington, DC 20506.

ASCLA's "Let's Talk About It"

The total of $1.4 million awarded to ASCLA for its three-year "Let's Talk About It" project was the largest grant ever made by his division, Phelps says, and cannot be compared with one-library programs. It will enable 300 public libraries throughout the country to present humanities-based reading and discussion programs exploring contemporary themes. Groups will meet every other week for 10 weeks to discuss five books.

The project advisory committee has chosen six themes: work, family, ethnicity, children's literature, best-selling novels, and citizenship. Brochures containing an introductory essay, recommended titles, and an annotated bibliography are being developed for each theme, along with a promotion kit and poster.

In April and September the ASCLA project held regional training workshops in Wisconsin and California for state teams representing the state library, library association, humanities council, and the humanities community. The third workshop will be held in West Virginia in November.

The project recently announced its first grants to sponsoring teams. The Indiana State Library, the Minnesota Association of Library Friends, the Mississippi Library Association, the State Library of Ohio, and the Wisconsin Library Association will each receive up to $18,000, and the Delaware Division of Libraries and the Arkansas Library Association will receive technical assistance awards to sponsor programs in their states.

At the "Let's Talk About It" training workshops, advisory committee member Pat Bates is introduced as the "mother of the reading-discussion group." In the early '70s, Bates had suffered from "culture shock" when she moved with her husband and three children from Bryn Mawr, Pa., to Rutland, Vt. Over coffee in her kitchen one day, she and some new friends formed a biweekly reading-discussion group which is still meeting.

NEH program officer Thomas Phelps welcomes proposals from all types of libraries serving adults—public, community college, university, and special . . .

Librarians who wake up one morning with good ideas for humanities programs should call Phelps quickly.

As program director at the Rutland Free Library in 1975, she began organizing humanities projects with a book-discussion component. Several years later, backed by a grant from the Vermont Humanities Council, she organized a reading-discussion program on "Women in Literature."

The idea caught fire in New England, where winters are long. In 1980–82 Bates directed an NEH project involving discussion groups on "Women in Literature," "Myths in Marriage," and "Vermont Writers" at 40 Vermont libraries. Last July she completed a second two-year NEH project centering on the theme "The Quest" in 50 libraries in New Hampshire and Massachusetts.

In August, Bates began her third two-year NEH project. Titled "Readings in American History, 1780–1900," the $130,000 project will spread to 30 libraries in rural Vermont and neighboring New York State.

The thousands of men and women who have participated in her programs have convinced Bates that people are eager to read books and discuss issues. In the June-July *Dartmouth Alumni Weekend* she declared, "We must study the past to have a future. When I see people doing that through literature, I know there is hope for the world." □

Libraries stock bags, pencils, and cats

Q. Where can we purchase sturdy containers, with handles, in which to circulate framed art prints? Our experience with boxes from several suppliers are that the handles break or the box is too contained. ***Lois Wood, Audiovisual, Bloomington Public Library, 205 E. Olive, Bloomington, IL 61702.***

A. Some of the boxes our staff members made 20 years ago are still circulating, but the process was too expensive. We experimented with Brodart boxes but they didn't work out for us. Now we are using canvas bags and patrons and staff like them. The bags may be ordered in four sizes from M&M Bags, POB 40006, San Diego, CA 92104 (619-299-0915). *Genene Anderson, Head, Arts and Audiovisual Division, Rockford Public Library, 215 N. Wyman St., Rockford, IL 61101.*

A. We've been circulating art prints successfully for 20 years without wrapping them. Many are too large for packaging, and the patrons just carry them out underneath an arm. If a print or frame were damaged, the patron would be responsible, but this hasn't happened. *Connie Tiffany, Assistant Director for Public Services and AV, Iowa City Public Library, 123 S. Linn, Iowa City, IA 52240.*

Q. What public libraries have installed stationery-supply vending machines for patrons? Do you lease, rent, or purchase outright from a vending machine company or an office supply company? What items are stocked? Does the machine pay for itself? How have patrons and staff reacted? ***Ann G. Brouse, Head, Technical Services Dept., Steele Memorial Library System, One Library Plaza, Elmira, NY 14901-2799.***

A. Four years ago we purchased a pencil machine from Dur-O-Lite, Inc., of Melrose Park, Ill., for $75. It holds 300 no. 2 pencils, which we purchase at $15.50 per hundred and sell at 25 cents each. Patrons buy 50 to 60 pencils a month, and we've had few problems. *William Galaway, Adult Services Librarian, Arlington Heights Memorial Library, Arlington Heights, IL 60004.*

Q. We want to add a library cat to our staff and would like to hear from libraries with feline staff members. How do you deal with allergies? Please share your advice, problems, and comments. ***Carla Bryan, City Librarian, Duncanville Public Library, 103 E. Wheatland Rd., Duncanville, TX 75116.***

A. When we moved into our new library two years ago, we decided it would be nice to have two cats (one would get lonely) and name them Baker and Taylor. After Assistant Director Jan Lauch and I purchased Baker from a Scottish Fold breeder we told the Baker & Taylor representative here. He said he'd buy Taylor and have the library cats photographed (*AL*, June, p. 424). Now librarians from all over the country drop by to see our famous poster cats.

Baker and Taylor, both altered males, have given us no

Official Historical Records Are Now Available From the National Archives Microfilm Rental Program

Now You Can Research Your Family History at Your Local Library

The National Archives research material available on a rental basis includes the following:

- Census Population Schedules from 1790 through 1910 including Soundexes
- American Revolutionary War Service Records including index
- Revolutionary War Pension and bounty land warrant application files

Convenient Program Features Include:

- No Membership Fees
- Longest Rental Period - 30 days
- Low Cost - Only $3.25 per roll
- Fast Service - Most orders filled same day as received
- Convenient Ordering - Through your local participating library
- Official U.S. National Archives first generation microfilm copies

Visit the Inter-Library Loan Division at Your Local Library for Further Details

problems, although one of them does shed a lot of hair. They spend most of their days in the library and sleep in a storage room at night. If a visitor mentions an allergy, we put the cats in the back room. Most people love them. *Yvonne M. Saddler, Director, Douglas County Public Library, 1625 Library Lane, Minden, NV 89423.*

Q. Do any libraries use cordless telephones at the reference desk? What has been their experience? *Susan Kheel, Head of Reference and Information Services, East Brunswick Public Library, Two Jean Walling Civic Center, East Brunswick, NJ 08816.*

A. Many librarians seem to be afraid to use the cordless phone, but we've used one constantly for more than a year and found it works! It's an effective device and you can get a good one for under $300.

As I suggested in "Cordless Telephones: Extending Reference Services" in the Summer 1983 *Library Hi Tech*, p. 21, you should invite several suppliers to test their products in your library to see which works best. Every building contains obstructions to radio phone communication and some models will work better than others. You should also check for other cordless phone users in your immediate area to be sure the frequencies don't overlap. We have only two other cordless phones on the campus so frequency overlap isn't a problem. *Brian Alley, University Librarian, Norris L. Brookens Library, Sangamon State University, Springfield, IL 62708*

Over to you

1. I am interested in physical environments in libraries and would like to know if any library has tried playing classical music during working hours in both public and nonpublic areas. How did staff and patrons accept it? (Ohio)

2. To what extent do business people consider the quality of public library services when making decisions about locating in a new area? (Ore.)

3. Have any public library studies been done on patron use of microfilm COM catalogs vs. microfiche COM catalogs as a replacement for public card catalogs? What are the advantages and disadvantages? (N.Y.)

4. Are any school libraries or school districts using library advisory committees to create public awareness and support for school media programs? (Ind.)

5. Have any medium-sized public libraries (about 170,000 volumes) using OCLC and CLSI abandoned the shelflist catalog? What's been the impact if you have, or how do you justify maintaining the shelflist if you have not? (Wis.)

LETTERS AND BRIEF COMMENT FROM OUR READERS

American Libraries encourages signed comment on recent content in our pages or on matters of general interest to the library profession. Letters beyond 250 words will not be accepted or will be edited to fit space; longer contributions may be submitted to the "On My Mind" department.

Gratitude and consternation

I WRITE TO EXPRESS BOTH GRATItude and consternation: gratitude to Ed Holley for his spirited defense of the accredited MLS degree in the Merwine Case (May, p. 327–30) and consternation at the decision of the ALA Executive Board not to act in defense of the profession's accepted credentials.

It is mind-boggling to contemplate how the Executive Board members justified their decision in the Merwine Case at the same time that ALA was involved in an extensive and costly effort to prevent the Reagan administration from downgrading the educational standards for professional librarians in the federal service.

Rather than adhering to the Emersonian idea ("Consistency is the hobgoblin of little minds"), I would prefer to see ALA's elected leadership commit itself on behalf of the profession to the dictum of Rabbi Hillel ("If I am not for myself, who will be for me?").

SHIRLEY ECHELMAN, ALA member, executive director, Association of Research Libraries

Librarians can propose but not dispose

"HOW MANY LIBRARIES HAVE had the courage to discontinue any services for reasons other than dire fiscal emergency . . . to be candid about what services they no longer wish to offer?" is William Miller's second big question. ("What's Wrong With Reference?" [May, p. 303+] is the first.)

Answer: At least one, probably lots, have had the courage to propose discontinuation of services. The *decision* to discontinue, however, is not the librarian's to make. It usually is in the hands of a higher administrator, who may be persuaded that since librarians are in a service occupation they are conditioned to work harder and longer for less money—i.e., to provide the same or more services with the same or fewer staff members.

Classroom faculty members, on the other hand, consider themselves in a to-be-served occupation, justified in seeking fewer classroom and counseling hours and a lower teacher-student ratio. As a to-be-served occupation, classroom faculty members usually do not go to bat for librarians, because if librarians lead an easier life, classroom faculty will lead harder lives; retainers, after all, are to be always on duty. As a class, also, they wish to retain certain privileges exclusively. If librarians were to have a free summer, free time during the work week, and a comparable hourly salary, the place of professors at the pinnacle of the prestige heap would be shaken.

An acquaintance maintains that librarians, although in a service occupation, are not servile. In academe this is hard to maintain because of the medieval structure of higher education. In sum, then, librarians have had the courage to propose, but not the power to dispose. And the more courageous the librarian, as Daniel Gore has said, the more likely to be disposed of.

JEAN C. PELLETIERE, ALA member, College of Public Affairs and Policy, State University of New York/Albany

Salary range

1) CURRENT U.S. GOVERNMENT executive schedule level-IV salary—that paid to the Librarian of Congress—is $69,000 (Summer 1984 supplement to *Taylor's Encyclopedia of Government Officials*).

2) Median salary for experienced college and university librarians in 1983 was $23,500 (1984–85 *Occupational Outlook Handbook*).

3) Annual starting salaries for entry-level librarians (with ALA-accredited MLS) are frequently below $15,000 (listings on library joblines and in professional journals).

4) "Next ALA Executive Director to earn $70,000 to $90,000," (*AL*, July/Aug., p. 478).

Draw your own conclusions.

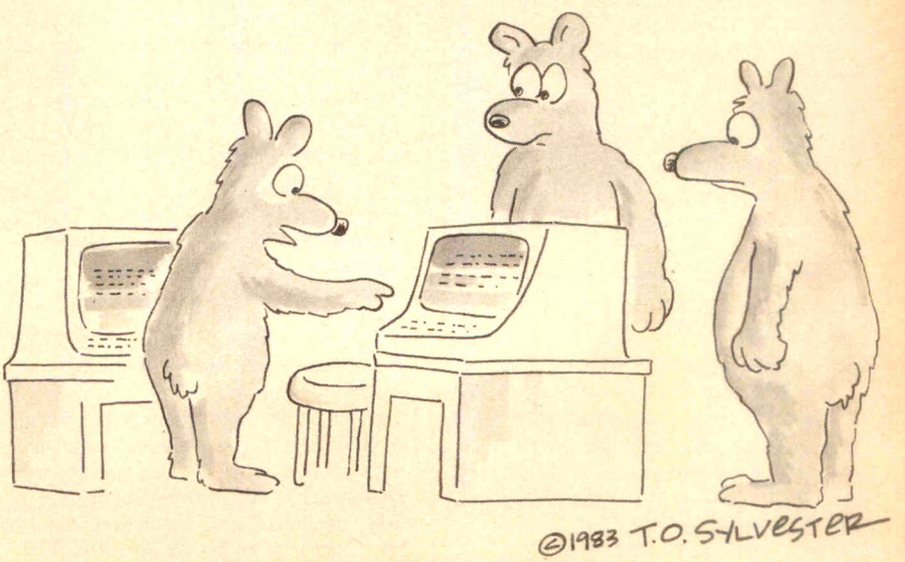
JOAN DELMAN, ALA member, N. Plainfield, N.J.

Insisting on ALA-MLS is "bigotry"

I THINK THAT DISCRIMINATION against nonaccredited-MLS degree-holders is absurd and that its victims can make many claims to win their cases. Just imagine the following scenarios:

Candidate A lived in Terre Haute, Indiana, and wanted to become a librarian. She was accepted at the Indiana University School of Library Science in Bloomington but could not afford the cost of tuition and the time involved in a long commute. Instead, she decides to obtain her MLS from nearby Indiana State University, which has a small, nonaccredited library school. After graduation, she gets a job in a large public library close to a university town and decides to take evening classes towards an MBA. Five years later she gets her MBA and applies for a job where an ALA-accredited degree is a minimum requirement. She is turned down and sues on the grounds of race and sex discrimination. Candidate A is Afro-American.

Candidate B was born and raised in India, where he studied library science and English literature. He worked as the director of a large college library for 15 years before emigrating to the U.S. to get a Ph.D. in English literature. After graduating he cannot find a job teaching English literature and



". . . and someone's been using MY terminal."

looks for a position as a librarian. He is turned down and sues on the grounds of discrimination based on national origin.

Candidate C has a nonaccredited degree in library science and has been a successful school librarian specializing in audiovisual techniques. After a few years he switches jobs to become director of the AV center of a college library. He wants to relocate to New York City and applies for an audiovisual librarian position in a college that requires an ALA-accredited degree. He is turned down and sues on the grounds of discrimination because he is a homosexual, something he revealed during a semi-informal luncheon that was part of the interviewing process.

Discrimination against non-ALA-accredited degree holders is discrimination. As shown above, the reasons for not getting the "right" degree can be socioeconomic, or just being born in the wrong place. Those who feel an accredited degree is a *sine qua non* condition to practice librarianship display bigotry, narrow-mindedness, and chauvinism. It is time that people be judged on their individual talents and merits and not on their image. Why divide librarians into a caste of accredited-degree-holders and a caste of Untouchable nonaccredited degree-holders?

YVELINE A. KALYANPUR, Winchester, Mass.

Charters could be come-uppance

CONSIDERING THE CLOSINGS OF the University of Denver and the University of Southern California library schools (July/Aug., p. 476), I would hazard a guess that USC will follow the lead of the University of Oregon when it closed its library school: i.e., continue to fund important, first-priority, alleged money-making activities (like football, etc.) while aiming mere educational programs down the tube.

It might be enlightening to the regents of these "educational institutions" as well as to the rest of us to see what, if anything, the charters or mission statements of the universities of Denver, Oregon, and Southern California say about the relative merits of jock vs. educational endeavors.

ROBERT K. JOHNSON, ALA member, University of Arizona Graduate Library School, Tucson

That's *more than* Entertainment

AFTER RETURNING HOME FROM the ALA Conference in Dallas I had time to read through all four issues of the conference newsletter *Cognotes*. I was dismayed to find that the videotape I presented at the ALSC President's Program was described as "entertaining," and I would like to set the record straight.

The videotape was of children responding to some of the notable children's books to be discussed by ALSC members attending the program. Some of the responses of the children are funny and often unexpected, which stimulates laughter from adults. However, more importantly, the responses enlighten adults. The tape was shown to enlighten the Notable Books Reevaluation Committee, which is sometimes in doubt about the level of reader maturity necessary to appreciate a book, or whether children are at all interested in certain subjects. It was our intention to illustrate children's critical evaluations of these books from their vantage point. The video instructs adults in the ways children understand and cope with questionable content.

In an age when one in five American children lives in poverty (one in two minority children), when education is criticized but not supported, when a neverending stream of new words enters our vocabulary describing anew the neglect of children (latch-key kids, missing children, etc.), I would prefer to think that librarians, at least, would take children and those adults working with them more seriously, and not relegate their point of view to mere entertainment.

ALICE P. NAYLOR, ALA member, Appalachian State University, Boone, N.C. □

If they'd been librarians **by B.B. Rile**

Hannibal prepares to cross the acronyms.

Is it ethical for faculty to examine circulation records?

Ed. note: The following letters respond to the question posed by the ALA Ethics Committee (June, p. 376) to stimulate thought on professional ethics: In a college or university reserve room, do faculty have the right to examine circulation data to determine which students have been performing reserve reading?

FACULTY SHOULD NOT BE PERMITted to examine reserve circulation records to determine whether their students are performing assigned reading. There are two compelling arguments in support of this position. First, if one accepts the premise that the right to confidentiality extends to college and university students, then there is no justification for treating reserve circulation data differently than other circulation records. Second, whether or not a student has checked out an item is an imperfect indicator of whether or not he or she has actually done the reading. Instructors should evaluate students based on their classroom performance and not on the number of reserve books they have checked out.

ELIZABETH LANG, ALA MEMBER, I.D. WEEKS LIBRARY, UNIVERSITY OF SOUTH DAKOTA, VERMILLION

AS A GENERAL PRINCIPLE, CIRCUlation records of reserve room materials should not be given to any individual. Our institutions should develop and maintain systems which, while providing statistical data on number of circulations and frequency of use and the name of the current user, delete personal data from the file immediately after the return of the item.

The academic library often serves as an extension of the classroom in an indirect laboratory function. This is especially true in the case of audiovisual materials centers. In these situations attendance—i.e., use of specific library materials—may be prescribed by the instructor. Students who are enrolled in such a course are presumed to have given their consent for the release of this circulation data to the instructor. Any other use would clearly violate the general right to privacy.

ARTHUR FRIEDMAN, ALA MEMBER, NASSAU COMMUNITY COLLEGE, GARDEN CITY, N.Y.

IT IS UNWISE FOR LIBRARIANS TO reveal the identity of student borrowers to faculty members for ethical and legal reasons, but also because such information does not prove a student has completed an assignment and does not evaluate how well the student has done the work. A signature or I.D. number on a card is a record of a borrowing transaction, nothing more. Borrowing records do not indicate the circulation of reserve materials among students.

Furthermore, it is the faculty member's responsibility to evaluate student performance, not the librarian's. Test questions and reading cards are better means of determining if students are doing their assignments. Librarians should use the borrowing information to give faculty members an idea of how many students are doing an assignment and how frequently an item is being used.

FRANCINE K. MIDDLETON, ALA MEMBER, ELLENDER MEMORIAL LIBRARY, NICHOLLS STATE UNIVERSITY, THIBODAUX, LA.

Microcomputers and telecommunications: A checklist of books and journals

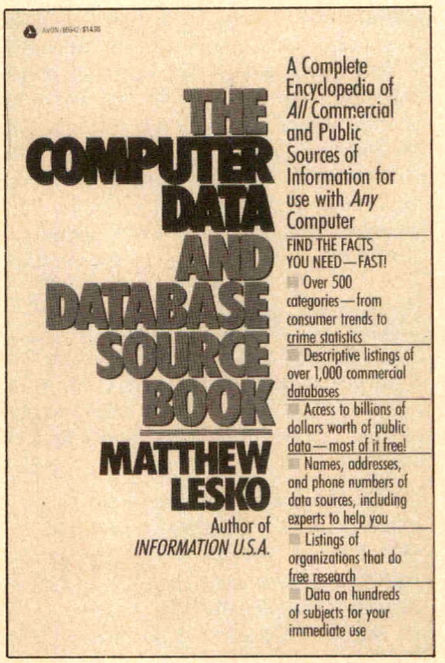
by Patrick R. Dewey

A glance at a computer magazine rack reveals the growing number of publications devoted exclusively to microcomputer telecommunications. Also, computer mags are striving to keep up with new online services and activities: electronic bulletin boards; "telecommuting"; and consumer networks and databases such as NewsNet, Knowledge Index (DIALOG), BRS After Dark, and many others. This publication explosion reflects new masses of people entering the microcomputer community, as well as the graduation of microcomputer users beyond the Pacman syndrome into other, usually more serious areas of interest.

For the purposes of this article, you need only know that a modem is a device to connect your computer to the telephone system. I won't discuss the technicalities of protocol (parity, word length, etc.) or downloading, or similar jargon. My purpose here is mainly to highlight some of the latest resources available for answering questions and selecting materials in microcomputer telecommunications.

Database directories

☐ ***The Computer Data and Database Source Book,*** by Matthew Lesko. 900p. New York: Avon, 1984. $14.95 pap. This massive volume provides capsule summaries of commercial and government databases and descriptions of public data sources (e.g., for bilingual education, testing, veterans, etc.). The public data sources are divided into: Education; Energy; General Economics; Health Statistics; Industry; International; Investment; Miscellaneous; Population and Vital Statistics; and Price, Wage, and Employment. If you work with databases, or need handy information about them, this book should work well. Appended: Free Research to Help Find the Data You Need; How to Use the Freedom of Information Act. Without question, the greatest bargain here.



☐ ***Complete Guide to Dial-Up Databases.*** 600p. Delran, N.J.: Datapro Research Corporation, 1984. $195. A one-volume, loose-leaf service describing over 1,400 databases, with special reports on The Source, CompuServe, Inc., DIALOG, DRI, and others. Many special features are also available with this service, including user ratings of service vendors and reports on 66 microcomputer communications packages. Data about each base includes frequency of update, prices, descriptions, and documentation available. Datapro is well known for its authoritative, in-depth reports on many aspects of computers. Datapro Research Corporation, 1805 Underwood Boulevard, Delran, NJ 08075.

☐ ***Directory of Online Databases.*** Santa Monica, Calif: Carlos Cuadra Associates, $75. Lists 1,700 databases in alphabetical order, and is published primarily for the library and information community. Material can be accessed by subject, producer, and online system. It is published quarterly by Cuadra Associates, Inc., 2001 Wilshire Blvd., Suite 305, Santa Monica, CA 90403.

☐ ***Omni Online Database Directory,*** by Mike Edelhart and Owen Davies. 292p. New York: Collier Books (Macmillan), 1983. $9.95. An inexpensive yet extremely useful volume of database abstracts. No databases are included that cannot be accessed by someone at home. The directory was written with that home user in mind. A good overview of the Source and CompuServe is included at the end. Databases are arranged by subject and indexed by subject and name. Contains a vendor listing and "Choosing an Online Service."

☐ ***Online Bibliographic Databases,*** 3rd ed., edited by James L. Hall and Marjorie J. Brown. 383p. Detroit: Gale Research Co., 1983. $90.

☐ ***Online Database Search Services Directory,*** 2 vols., 1st ed., edited by John Schmittroth, Jr. Detroit: Gale Research Co. Vol. 1, 569p., 1983; vol. 2, about 700p., Oct. 1984. $100 for both. Cumulative index in vol 2.

☐ ***Online Database Search Services Directory,*** 2 vols., 1st ed., edited by John Schmittroth, Jr. Detroit: Gale Research Co., 1983. $75.

☐ ***The Reston Book of Online Databases,*** by Jay M. Shafrity and Louise Alexander. 256p. Reston, Va.: Reston Publishing Co., 1984. $17.95. Descriptions of 500 databases, with addresses, prices, and phone numbers. Listings are arranged by subject.

Communications software packages

☐ ***All About 148 Communications Software Packages.*** 58p. Delran, N.J.: Datapro, 1984. $25. From *Datapro Reports on Microcomputers,* provides comparison data on 148 microcommunications software packages from 107 vendors. Datapro Research Corporation, 1805 Underwood Blvd., Delran, NJ 08075.

Dictionaries

☐ ***Dictionary of Computers, Data Processing, and Telecommunications,*** by Jerry M. Rosenberg. 614p. New York: Wiley, 1984. $14.95. With over 10,000 terms, defined with the layperson as well as the professional in mind, this is clearly one of the best computer dictionaries around. It is easy to read and follow.

☐ ***Facts on File Dictionary of Telecommunications,*** by John Graham. 199p. New York: Facts on File Publications, 1983. $15.95. A good bet for the student, technician, or layperson who wishes to untangle terms such as multiplexing, time sharing, networks (local area, etc.), packet switching, time switching, and other words that are often confusing. Care has been taken to be clear and precise with 2,000 entries, 50 diagrams, and extensive cross-references. Definitions vary in length. Contains 12 appendices, including International Alphabet No. 5, The Electromagnetic Spectrum, and others.

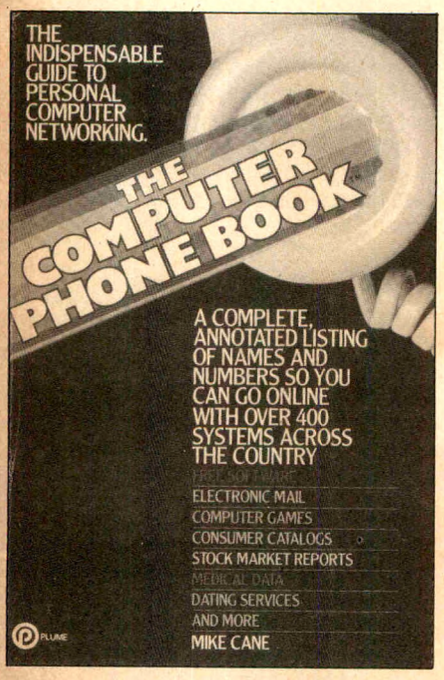
(Continued)

Patrick Dewey, director of the Maywood (Ill.) Public Library, writes frequently on microcomputers and libraries. He pioneered in library-based, electronic community bulletin boards, and has devoted a chapter to this subject in his new book, *Public Access Microcomputers: A Handbook for Librarians* (Knowledge Industry).

Electronic bulletin boards

A bulletin board or BBS is usually a system operated on a microcomputer by a single individual for friends, business associates, or others, for leaving and receiving messages, etc. Comprehensive listings of these boards, describing functions and features—including which supply free software—is something most libraries can provide with only one directory and little effort. At least one directory provides a monthly supplement for an extra fee. Some people will want to purchase a BBS software program in order to start their own. Current listings can always be accessed through the appropriate file on either CompuServe (MAUG XA4) or The Source (PUBLIC 112), and often through many local bulletin boards, free.

☐ ***How to Create Your Own Computer Bulletin Board,*** by Larry Myers. 214p. Blue Ridge Summit, Pa.: TAB Books, 1983. $12.50. If you wish to program your own bulletin board from *scratch,* this book is the one for you. Many of the routines and problems (carrier detection, error handling, etc.) are explained here. It is also good for the person wishing to customize or alter an existing BBS. Appendixes contain the actual listing of a BBS program—Sentry Apple Bulletin Board—which readers can key in and operate. Also contains the program listing for LTERM, a telecommunications package for the TRS-80 Models I and II. Considering the price, an excellent buy.



☐ ***Computer Phone Book,*** by Mike Cane. 466p. New York: New American Library, 1983. $9.95 pap. Besides a good overview of networks, components of modems and their use, and electronic bulletin boards, one finds here brief summaries of over 400 electronic bulletin boards (including access number, type, and a description of the purpose and operation of the board). Included in the appendixes is a separate list of bulletin boards offering free "downloads" of software, grouped by machine. Also included is the documentation for a number of systems. This saves the time and trouble of downloading the "help" files from major BBS systems.

☐ ***Hooking In: The Underground Computer Bulletin Board Workbook and Guide,*** by Tom Tucker and Tom Beeston. 174p. New York: Kampmann & Co. (Computer Food Press), 1984. $12.95. As the name suggests, this book contains mostly surface material for bulletin board novices. The workbook portion (which is most of the book) lists some 400 boards by area code with a handy space for recording your own comments as you run up your phone bill. Includes sample BBS menus for a variety of boards, logon procedures, and download instructions. A quarterly update service costs only $10 per year. Glossary.

Electronic mail

☐ ***Understanding Electronic Mail,*** by Carl J. Naegele. 64p. Sherman Oaks, Calif.: Alfred Publishing Co., 1984. $2.95. A basic introduction, and perhaps the least expensive book on the subject.

☐ ***All About 57 Electronic Mail Systems.*** 39p. Delran, N.J.: Datapro Research Corp., 1984. $19. Includes information about 49 computer mail systems and 8 voice systems. From *Datapro Reports on Word Processing.* Datapro Research Corp., 1805 Underwood Blvd, Delran, NJ 08075.

Multiple topics

☐ ***Datapro Reports on Data Communications*** includes in-depth information in such areas as network architecture, teleprinters, speech technology equipment, standards, basic concepts, automated office systems, and much more. Three volumes, updated monthly. Annual looseleaf subscription: $690. Individual reports available from this set are *All About 47 Local Area Networks* (31p., $19), *All About 600 Modems* (103p., $25), *All About 300 Alphanumeric Display Terminals* (87p., $25), and *Overview of 20 Communications Carriers* (20p., $19). Datapro Research Corp., 1805 Underwood Boulevard, Delran, NJ 08075.

☐ ***Datapro Reports on Telecommunications*** is a comprehensive source of information covering the whole range of telecommunications. Included are reports on software, hardware, telephone systems, and much more. The two volumes are updated monthly. Annual looseleaf subscription: $495. Individual reports from this set are: *All About 36 Telephone Management Systems* (26p., $19), *How to Buy Telephone Systems* (18p., $19), and *All About 37 PABX Systems* (23p., $19). Datapro Research Corp., 1805 Underwood Boulevard, Delran, NJ 08075.

☐ ***Encyclopedia of Information Systems and Services,*** 2 vols., 6th ed., edited by John Schmittroth, Jr. Detroit: Gale Research Co., 1984. Vol. 1, about 1,200p. (Dec. publication, covers the U.S.), $190; vol. 2, about 600p. (Oct. publication, covers international scene), $165. Gale Research Co., Book Tower, Detroit, MI 48226.

☐ ***Telecommunications for the Executive,*** by Ronald R. Thomas. 129p., Princeton, N.J.: Petrocelli Books, 1984. $19.95. A well written book for executives who are responsible for the installation or upgrade of a telephone system—the book's primary interest—or computer network. A number of checklists, vendors, and other useful features are included. Large corporations will need a Datapro volume or equivalent, but this is still an excellent first book for anyone.

☐ ***Telecommunications Systems and Services Directory,*** 3 vols., edited by John Schmittroth, Jr., and Mary Connors. 700p., Detroit: Gale Research Co., 1984. $150. Gale Research Co., Book Tower, Detroit, MI 48226.

Hobbyist

☐ ***Complete Handbook of Personal Computer Communications: Everything You Need to Go Online With the World,*** by Alfred Glossbrenner. 324p., New York: St. Martin's Press, 1983. $14.95. Glossbrenner has just about set the standard for others to follow by writing the best overview of the microcomputer electronic online "universe," at least as far as hobbyists are concerned. Though meant to be read from cover to cover, chapters deal individually with The Source, CompuServe, and the other major consumer databases and utilities. "Telecommuting" is also discussed, and the work is illustrated with many "screens," which help the reader better understand various online services and their menus. Bulletin boards are discussed, but are not presented "directory style" as in Cane and others above. Useful "Online Tips" appear on nearly every page. Only chapter 12, "Getting Technical," becomes jargon-laden, but even here the determined layperson should get by.

☐ ***The First Primer of Microcomputer Telecommunications,*** by Jim Cambron. 154p., Blue Ridge Summit, Pa.: TAB Books, 1984. $14.95, $10.95 pap. In most respects this book is relatively ordinary, giving good treatment for the beginner in telecommunications but nothing above that offered by other books listed here. In complexity and depth of treatment, it is a step above, for example, *World Connection*, and a step below *Micros and Modems*. It does offer a few unique items, however, including a discussion of libel and slander with regard to networks and bulletin boards, and the author describes the pros and cons of a number of Specialized Common Carriers (alternate long distance services.)

☐ ***Getting On-Line: A Guide to Accessing Computer Information Services,*** by M. David Stone. 306p., New York: Prentice-Hall, 1984. $21.95. Stone treats many areas covered by Glossbrenner, but does not reproduce most of the utility help files. Stone does provide the

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries*, 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies

Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line; **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Address

Place all notices with Beverly Goldberg, LEADS, *American Libraries*, 50 E. Huron St., Chicago, IL 60611; (312) 944-6780 x326.

JOBLINES

Joblines will appear in full on a quarterly basis—February, May, July/August, and November—and in abbreviated form the rest of the year. Space saved will be devoted to expanded Positions Open listings.

ACADEMIC LIBRARY

Art and architecture librarian. Manages the Art and Architecture Library which provides library services to users in the School of Architecture, School of Fine Arts, and the Department of Art and Archaeology; performs bibliographic duties and is responsible for collection development in related subject areas; works in general reference services; performs online searches in humanities databases. Qualifications: MLS from an ALA-accredited library school; degree in art or architecture; reading knowledge of German, Italian, or French; academic library experience, preferably in public services; knowledge of online searching, preferably in BRS or DIALOG; supervisory experience with the ability to make independent judgments and to organize work. Minimum salary $19,932. **Send letter of application, resume, and 3 letters of reference by Oct. 31** to: Virginia F. Toliver, Director of Library Personnel and Administrative Services, **Washington University Libraries, St. Louis, MO 63130.** Washington University is an equal-opportunity, affirmative-action employer.

Assistant catalog librarian. Search reopened. Faculty, tenure-track position. Catalogs serials, music, and AV; supervises subject and series authority work. Cataloging experience, knowledge of AACR2, LC classification, LCSH, MARC format essential. Required: MLS from an ALA-accredited program, 3 yrs.' experience. Appointment at assistant librarian or above (equivalent to assistant professor). Minimum salary $20,000 depending on education and experience. University of South Alabama Libraries are a member of SOLINET/OCLC and operate NOTIS, an integrated library system, with an online catalog. Benefits include: 20 days' vacation, university-subsidized insurance, state retirement, TIAA/CREF option. **Submit resume and names of 3 references by Oct. 31** to: Patricia G. Ramage, Chair, University Library Search Committee, **Library Administration, The University of South Alabama, Mobile, AL 36688.** An EEO, AA employer.

Assistant department head, business/engineering library. Developing and implementing innovative information services for the faculty and students of the Amos Tuck School of Business and the Thayer School of Engineering at Dartmouth College will be the challenge of the person selected to fill this position. The individual we are seeking will be capable of working as part of a team providing information services in a technologically sophisticated library environment utilizing the Dartmouth online catalog; RLIN; OCLC; online database vendors such as BRS, DIALOG, I. P. Sharp, Dow Jones, and NEXIS; as well as microcomputers. Under the general direction of the business/engineering librarian, the assistant business/engineering librarian's responsibilities include supervision of the interlibrary loan assistant, participation in collection development, consultation with faculty to determine instructional and research needs, and the provision of reference services including bibliographic instruction and online searching. Feldberg Library has a staff of 3 professionals and 5 staff and is one of 8 libraries in the Dartmouth College Library system. Qualifications: ALA-MLS, educational background in one of the fields of business, engineering, or economics, a minimum of 3 yrs.' post-MLS experience in an academic or special library, and online database searching experience in bibliographic and numeric files are required. Experience with library applications of microcomputers is highly desirable. Salary and rank commensurate with experience and qualifications with a minimum salary of $18,500 for a Librarian II or $22,000 for a Librarian III. **Please send resume before Oct. 31** to: Phyllis E. Jaynes, Director of User Services, **115 Baker Library, Dartmouth College, Hanover, NH 03755.** Dartmouth College is an AA, EEO, M/F employer.

Assistant public services librarian. Permanent tenure-track faculty appointment available Jan. 1, 1985. Duties include general reference service, library instruction, online database searching, selection of reference materials, and support of other public service functions as needed. Schedule will include some evening and occasional weekend hrs. Requires ALA-accredited MLS, minimum 2 yrs.' previous professional experience; ability to interact with students and faculty in a variety of subject areas essential. Salary $17,000 minimum plus liberal faculty benefits including relocation assistance. Send resume and 3 recent references to: Robert L. Burr, Director, **Crosby Library, Gonzaga University, Spokane, WA 99258.**

Assistant special collections librarian, University of Nevada, Las Vegas. (Search reopened.) Special collections contains materials pertaining to southern Nevada, the gaming industry, culinary arts, and the UNLV archives. Responsibilities: acquire, arrange, describe, and provide access to Nevada manuscript collections and archival records of UNLV; develop the Nevada collection, participate in the reference desk and exhibit schedule of the department; and perform other duties as assigned. Qualifications: ALA-accredited degree and formal archive and/or manuscript training required; effective communication skills, ability to establish and maintain harmonious working relationships with co-workers, donors, and patrons, and to organize, analyze, and plan efficiently essential; experience in processing archives, personal papers, or U.S. political or historic manuscripts preferred; advanced subject degree in U.S. history or political science desired. Minimum salary: $17,000. Faculty status, 12-mo. appointment, 24 days' vacation, fringe benefits. **Send letter of application, resume, names, addresses, and phone numbers of 3 references by Oct. 31** to: Mary Dale Deacon, Director of Libraries, **University of Nevada, Las Vegas, 4505 Maryland Parkway, Las Vegas, NV 89154.** The University of Nevada, Las Vegas, is an equal-opp[illegible]ty, affirmative-action, Title IX, 504, 402 [illegible]oyer.

Assistant [illegible]versity librarian for systems and pla[illegible]g. The University of Arizona Library se[illegible]pplicants to fill a new position in systems [illegible] planning. The person filling this vacancy wi[illegible]ave responsibility for continuing development of an integrated online system, as well as resp[illegible]nsibility for more general planning activity, in[illegible]uding chairing the library's Planning Counci[illegible], participating as a member of the administrative group, and directing/coordinating existing automated services. The AUL for systems and planning reports to the university librarian. This new division of the library will have, initially, a small staff but is expected to grow quickly with a possible significant increase in size next fiscal yr. Applicants must have an MLS from an ALA-accredited library school as well as 5 yrs.' professional experience in large, academic libraries. Ability to communicate clearly in both written and oral forms is essential. Preference will be given to persons with degrees and/or experience in computer/information science, planning, systems, and related disciplines, as well as to persons with successful supervisory experience or experience in technical services. Salary range $35,000—$45,000 annually and the position is open immediately. **Application deadline is Nov. 15.** Librarians at the University of Arizona have academic professional status with privileges equivalent to the teaching faculty, 12-mo. appointments (eligible for continuing status), 22 days' annual vacation, 10 university holidays, and several health care and retirement plans. To apply send a resume, including the names of 3 references, to: W. David Laird, University Librarian, **A349 Main Library, University of Arizona Library, Tucson, AZ 85721.** The University of Arizona is an EEO, AA employer.

Reports to the director and assists in librarywide planning and policy formation. Qualifications include at least 5 yrs.' progressively responsible technical service experience in an academic library, MLS degree from an ALA-accredited program, and successful experience in supervision and with automated library systems. Needs to relate with sensitivity to staff at all levels and be responsive to needs and concerns of other library units. Desirable qualifications include work in more than one technical services area and experience with OCLC, AACR2, LC classification, and online catalogs. Salary and benefits: $22,500+ DOE; TIAA/CREF; Blue Cross – Blue Shield. **Application deadline: Nov. 15.** Submit letter of application, current resume, and names and addresses of 3 references to: **Personnel Office, North Dakota State University, Fargo, ND 58105.** NDSU is an equal-opportunity institution.

Head, rare books & special collections department. Administers, develops, and promotes the special collections, which feature the Cordell Collection of Dictionaries (nearly 10,000 volumes representing the entire history of Western lexicography) and the Eugene V. Debs collection (manuscripts, pamphlets, and books). Required: ALA-accredited MLS and an advanced degree in the humanities or social sciences, demonstrated leadership ability with strong emphasis on interpersonal skills, creativity, demonstrated writing and speaking ability, and 3 yrs.' experience in libraries or related areas. Desirable: PhD, 2 yrs.' experience in rare books or a related field; proficiency in 2 languages, preferably one classical and one modern; and knowledge of analytical and descriptive bibliography and lexicography. Salary: minimum $22,500, negotiable depending on qualifications and experience. 12-mo. appointment, faculty status, attractive fringe benefits. **Applications must be postmarked on or before Oct. 29 to ensure consideration.** Send letter of application, resume, and names, addresses, and telephone numbers of 3 current references to: Ron G. Martin, Chair, Library Search Committee, **Indiana State University, Terre Haute, IN 47809.** An equal-opportunity, affirmative-action employer.

Head science-engineering librarian. The University of Arizona is seeking a professional librarian to administer its Science-Engineering Library. Responsibilities include supervision of 6.5 professional librarians and 7 career staff members; administration of reference service, online searching, bibliographic instruction, and collection development; and supervision of the catalog maintenance office and the current periodicals and microforms room in the Science-Engineering Library. The Science-Engineering Library is a separate branch within the library system and houses 350,000 vols. and over 1 million microforms covering all fields of the pure and applied sciences except clinical medicine. A land-grant university with an enrollment of 31,000, the University of Arizona is nationally recognized for its scientific research and education programs and offers 51 doctoral programs in the sciences and engineering. Applicants for this position must have an ALA-accredited degree; demonstrated supervisory, planning, and communication skills; and at least 3 yrs.' progressively responsible experience in an academic or special library public service area. Candidates with substantial supervisory experience will be given preference. Science library experience, an academic background in the sciences, and knowledge of computers and library online systems are desirable. The position is available beginning March 1, 1985. Minimum salary is $28,000; higher salary is negotiable depending on qualifications and experience. Librarians at the University of Arizona have academic professional status, are voting members of the faculty, and may take up to 15 days' professional leave per year. They have 22 days' paid vacation, 12 days' sick leave, and 10 holidays. A standard package of fringe benefits is available. **By Nov. 15,** a letter of application, resume, and names of 3 references should be sent to: W. David Laird, University Librarian, **University of Arizona Library, Tucson, AZ 85721.** The University of Arizona is an EEO, AA employer.

Latin American serials cataloger. Available: March 15, 1985. Salary range for assistant librarian: $14,162 – $25,200; salary range for associate librarian: (5 yrs.' professional experience) $17,139 – $30,400. Initial appointments can be made up to the mid-range level depending on experience. Responsibilities: catalog serials originally or with copy in all subjects and languages for the Latin American collection. Upgrade serial records in the OCLC database with CONSER authorization. Participate in professional activities of the serials cataloging section and aid in general serials cataloging as needed. Qualifications: ALA-accredited MLS and knowledge of Spanish and one other modern European language required; Latin American area studies background preferred. Benefits: 12-mo., tenure-track appointment, with faculty status. 22 working days' vacation per yr., 8 holidays, and state retirement plan at no cost to the employee (optional retirement program also available including TIAA/CREF and 3 other options), Blue Cross – Blue Shield group plan. Course tuition waiver per semester. No local or state income tax. **Send complete resume with names of 5 references by Nov. 15** to: James H. Renz, Associate Director for Technical Services and Bibliographic Control, **University of Florida Libraries, Gainesville, FL 32611.** The University of Florida complies with Section 503, the Rehabilitation Act of 1973, and Section 402 of the Vietnam Era Veterans Readjustment Act of 1974.

Deputy University Librarian and Associate Dean
University of Southern California

The University of Southern California invites applications and nominations for the position of deputy university librarian and associate dean. USC is a private, urban university with approximately 25,000 national and international students in undergraduate, graduate, and professional disciplines. The university librarian and dean is the chief administrative officer for a library system consisting of Doheny Main Library and 11 branches, with 5 independent libraries, and reports to the provost. The aggregate holdings total in excess of 2.2 million vols. and 1.4 million microforms, and there is a staff of 50 librarians and approximately 300 support personnel.

RESPONSIBILITIES. Serve as the deputy administrator responsible for day-to-day operations, reporting directly to the university librarian; provide bold and imaginative leadership in enhancing a major research university library system, utilizing traditional as well as new and innovative technologies; participate in planning and evaluating policies and procedures which support the university's academic objectives and programs; implement further appropriate information technologies; maintain close communication between the various library departments, branches, and their respective heads; supervise all library personnel; coordinate the activities and supervise the library administrative personnel; assist in planning and directing the library budget; administer the library personnel process; and other duties as assigned by the university librarian.

QUALIFICATIONS. An appropriate advanced degree, preferably a doctorate in an established discipline, or an accredited MLS plus a 2nd graduate degree; extensive experience relevant to the design, development, and operation of a substantial academic/research library; demonstrated understanding of the responsibilities of a library system that meets the needs of those engaged in teaching, research, and scholarly activities in a university; knowledge of current trends and applications of library information technologies; proven leadership and motivational abilities; superior communication skills; demonstrated success as an advocate within a university or related community, and within a library community; evidence of continuous growth through scholarly publication and active participation in the individual discipline and/or profession. Salary range is $55,000 – $64,500.

Review of applications begins on Nov. 1. Date of appointment effective July 1, 1985. Send letters of nomination or application (with resume and 3 professional letters of reference) to the: **Chair, Deputy University Librarian Search Committee, Office of the Provost, ADM 102, University of Southern California, Los Angeles, CA 90089-4019, Attn.: Janet K. Chaudhuri, Assistant Provost.**

USC is an affirmative-action, equal-opportunity employer.

operating with the systems librarian in developing automation plans; preparing statistical reports for online database services, demonstrating online database searching; serving as a resource person for other searchers; and participating in general reference desk duty and collection development. Requirements: ALA-accredited MLS; 2 yrs.' academic library experience; demonstrated planning, analytical, interviewing, and communications skills; proficiency in online database searching; knowledge of searching principles, database structures, and reference sources; and the ability to develop innovative services and relate harmoniously with users and staff. Advanced degree desirable. Minimum salary: $19,000, tenure-track, faculty status, 12-mo. appointment, 24 days' vacation, fringe benefits. **Send letter of application, resume, names, addresses, and phone numbers of 3 references by Oct. 31** to: Mary Dale Deacon, Director of Libraries, **University of Nevada, Las Vegas, 4505 Maryland Parkway, Las Vegas, NV 89154.** The University of Nevada,

Associate University Librarian for Public Services
Arizona State University

The Arizona State University Libraries are seeking candidates for the newly created position of associate university librarian for public services. The successful candidate will report to university librarian Donald G. Riggs, be responsible for the leadership and management of all public service units, and participate in overall library planning and policy formulation.

Required qualifications include an ALA-accredited MLS degree; successful administrative experience at the department-head level or above in public services in a university library; a minimum of 7 yrs.' progressively responsible experience in an academic/research library; demonstrated leadership qualities; strong analytic, communication, and interpersonal skills; experience in creating and implementing new public service programs; knowledge of the latest issues and trends in academic librarianship; knowledge of bibliographic instruction and online systems; evidence of university service, research, and/or participation in professional associations. Preferred experience: fiscal, personnel, and other administrative responsibility in 2 or more public service areas; supervision of a large staff; involvement in both undergraduate and graduate programs in an ARL library.

ARIZONA STATE UNIVERSITY AND ITS LIBRARIES: ASU's mission is to continue development as a major research university and to become competitive with the best public universities in the nation. Toward that end, the libraries have experienced dynamic growth during the past 5 yrs., adding 55 new positions and increasing the materials budget from $1.7 million to the current $3.1 million. A new science and engineering library was occupied in 1983, and the other libraries are being remodeled. The libraries are creating a total online integrated system using Tandem hardware and DataPhase software. Collections total 1.8 million vols. and 1.6 million microform units. Of the 243 FTE staff, 127 are employed in public services. Membership is held in ARL, CRL, AMIGOS, and OCLC. The total budget is $7 million. ASU, with 40,000 students, is the nation's 6th-largest university and is located near Phoenix, the nation's 9th-largest city.

Salary: $40,000 minimum, depending on qualifications. TIAA/CREF or state retirement plan; annual paid leave of 22 days' vacation, 12 days' sick leave, and 10 holidays; tuition remission for employee and family at all 3 Arizona universities. Librarians serve on university governance committees and are eligible for continuing employment status and sabbatical leave.

Applicants must include documentation or evidence of specific qualifications and short statements (no more than 2 pages each) concerning 1) their philosophy of public service and 2) what new public service programs they have implemented and are interested in implementing. Recruitment will remain open until the position is filled. **To ensure consideration, applications should be received by Oct. 29,** when review will begin. Send letter of application, resume, supporting documents, and a list of 4 recent references to: **Constance Corey, Assistant University Librarian, Hayden Library, Arizona State University, Tempe, AZ 85287.**

ASU is a committed equal-opportunity, affirmative-action employer. Minorities are encouraged to apply.

Las Vegas, is an equal-opportunity, affirmative-action, Title IX, 504, 402 employer.

Reference librarian. Primary responsibilities include general reference desk work, bibliographic instruction to both graduate and undergraduate students, some selection responsibilities, and evening/weekend reference duty. Some online searching is involved as well as production of bibliographies for general use. Academic experience is desirable. Requirements: MLS from ALA-accredited library school; good written and oral communication skills; willingness to deal with the public and to cooperate with fellow employees; must be service-oriented. Full-time, 12-mo. position; rank and tenure eligibility; salary minimum $15,000. TIAA/CREF. Send resume and names of 3 references to: Kathy Essary, Chair, Library Search Committee, **University of Arkansas at Little Rock, 33rd and University, Little Rock, AR 72204.** An EEO, AA employer.

Reference librarian: 2 positions. Duties for both positions: serve at the reference desk, including one night per week and one Sunday per mo. Participate in bibliographic instruction program. Participate in reference and general collection development. Conduct online bibliographic searches. Minimum qualifications for both positions: ALA-accredited MLS and excellent oral and written communication skills. Successful candidates will be able to work effectively with students and faculty and will be committed to promoting library services and materials to the academic community. Specific positions are: 1) **Reference/circulation librarian:** directs the circulation and interlibrary loan functions of Kimbel Library. Supervises all public services functions in the absence of the public services librarian. Qualifications: 2 yrs.' library experience, including reference experience, required. Experience and/or strong interest in computer applications required. Experience with circulation, interlibrary loan, bibliographic instruction, and computer searching highly desirable. Supervisory experience and strong organizational skills desirable. Minimum salary: $18,500. 2) **Reference/nonprint librarian** (new position): directs the work of Kimbel Library's media collection (audiovisual materials, textbooks, maps), including reference, collection development, circulation, and other services (no media production). Qualifications: 1–2 yrs.' reference experience strongly desired, but not required. Audiovisual experience and bibliographic instruction experience highly desirable. Computer search experience and supervisory experience desirable. Entry-level candidates will be considered. Minimum salary: $17,000. Both positions available Nov. 16; starting dates negotiable. Salary and equivalent faculty rank commensurate with qualifications and experience. Coastal Carolina College is a growing, 4-yr. campus of the University of South Carolina located 9 miles west of Myrtle Beach. **Send application, vita, and 3 letters of reference by Oct. 15** to: Janis W. Chesson, Assistant Chancellor for Academic Affairs/Affirmative-Action Coordinator, **USC-Coastal Carolina College, POB 1954, Conway, SC 29526.** An equal-opportunity, affirmative-action employer.

Senior serials cataloger. 3 library openings at Texas A&M University. 1) **Head, automated information retrieval service** (AIRS), reference division. Search extended. Duties: responsible for general operation of AIRS, including supervision of assistant head of AIRS and one secretary. Conducts literature searches in broad range of subject areas. Develops and supervises the library's programs of computerized reference services, including planning, faculty and staff training, user instruction, public relations, scheduling, and evaluation. Supervises, through the assistant head of AIRS, the management and fiscal aspects of the service. Coordinates work and evaluates searching performance of 5–8 reference librarians and staff who are assigned part-time to AIRS program. Works at reference desk approximately 5 hrs. per week. Assists with bibliographic instruction. Qualifications: ALA-MLS. Minimum of 3 yrs.' professional (post-MLS) experience in public services in an academic library. Minimum of 3 yrs.' experience utilizing online bibliographic databases, including comprehensive knowledge of DIALOG and BRS and substantial knowledge of other systems such as SDC, NLM, RECON, RLIN, WESTLAW, LEXIS/NEXIS, INFOLINE, and NIH/EPA. Previous supervisory experience required; advanced subject degree desirable.

Columbia University Libraries
Instructional Services Librarian

This position has primary responsibility for providing library services to undergraduates and graduate students in the arts and sciences. This includes all aspects of the operation of 3 library units as well as planning, developing, and implementing bibliographic instruction programs for undergraduates and coordinating the same for graduate students and faculty members. The 3 library units are the Burgess-Carpenter, College, and Philosophy libraries, which comprise the Instructional Services Library. The incumbent will be expected to continue current activities and to develop innovative services and programs, including the application of new technologies to the delivery of services. Extensive contacts with faculty members will be necessary. This position, which reports to the chief of the Humanities and History Division, has supervisory responsibility for 3 supervisors, 7 supporting staff, and an FTE of 14 student assistants.

Requirements: MLS from ALA-accredited school, graduate subject degree desirable. Demonstrated evidence of imagination, leadership, and managerial skills is essential, as is the ability to communicate effectively in written and oral forms. Knowledge and understanding of the process of scholarly communication and of the complexities of a major research library are also essential. Candidates with successful administrative experience in pertinent areas of library operations will be sought, with special attention given to responsibility for bibliographic instruction programs and responsibility for public service activities. Position available on or about June 1, 1985. Salary ranges: Librarian II, $26,500–$34,450; Librarian III, $29,500–$42,775. **Deadline for applications: Jan. 31, 1985.** Submit application, indicating salary requirements and 3 references, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.**

An equal-opportunity, affirmative-action employer

Associate Director of University Libraries
Case Western Reserve University

University Libraries, an ARL member, is composed of Sears and Freiberger Libraries and is the largest unit in the Case Western Reserve University library system, housing the collections in the humanities and arts, social and behavioral sciences, engineering, science, management, and music. The collection contains over 1.5 million items (bound vols., government documents, and microforms) and includes over 7,000 current serial subscriptions. The staff includes 33 professionals and 44 nonprofessionals.

The responsibilities of this newly created position will include: coordination of the activities of the public services (including collection development), technical services, and administrative units; participation in the development and preparation of grant proposals; development of an effective research-sharing program, both within and without the university; and working with the director on the development of long-range budget, space, and automation plans for the University Libraries.

Qualifications for this position include a graduate degree in library science from an ALA-accredited library school; active involvement in and commitment to research, publishing, and professional activities; in-depth knowledge of academic library organization and functions, including library automation; and substantive administrative experience, preferably in a comparable academic research institution. Minimum salary: $35,000.

Send letter of application, resume, and names of 3 professional references by Nov. 1 to:

Mary DeVocht-Berges
Department of Human Resources
Case Western Reserve University
10900 Euclid Ave.
Cleveland, OH 44106

Case Western Reserve University is an affirmative-action, equal-opportunity employer.

Chief, Humanities and History Division

Columbia University Libraries

(Search Reopened)

This position has primary responsibility for the public services activities and operations of one of 3 major divisions, including Columbia University's major collection of over 1.5 million vols. in the humanities and history and pre-1974 social sciences. The division includes Butler Library, which houses the Instructional and SLS libraries, and the Music and Paterno libraries. The incumbent will report directly to the director of the Library Services Group and is expected to ensure the effective continuation of current service activities while continuing the development of innovative services and programs, including: exploration with faculty of new approaches to information services; expanding access to computer-based data systems; and developing the application of video, audiovisual, and computer-based bibliographic instruction. The incumbent is also responsible for coordinating, with the staff of the Resources Group, collection development objectives to ensure an effective program of collection building, organization, and preservation.

Requirements for the position: Accredited MLS or equivalent relevant experience required, graduate subject degree desirable. Demonstrated evidence of imagination, leadership, and managerial skills are essential and will be sought in all cases. Knowledge and understanding of the process of scholarly communication and of the complexities of a major research library are also essential. Candidates with 5 yrs.' administrative experience in pertinent areas of library operations will be sought, with special attention given to responsibility for public service activities. Salary ranges: Librarian II, $29,500–$38,350; Librarian III, $32,500–$47,125.

Deadline for applications is Oct. 26. Applications or nominations should be submitted in writing to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.**

An equal-opportunity, affirmative-action employer

Preservation Officer

University Libraries

State University of New York at Buffalo

RESPONSIBILITIES: assists the assistant director for collection development for the General Libraries and the directors of other unit libraries in planning, designing, evaluating, and coordinating the University Libraries' preservation and conservation program, including the review of existing preservation and conservation policies and procedures; the preparation of an overall written plan and related documents (e.g., a disaster plan, requirements for equipment purchases, delineation of standards for environmental controls, etc.); the development of systemwide priorities; and the formulation and implementation of preservation policies. Maintains contact with preservation agencies and organizations and cooperates with other libraries on state, regional, and national programs; represents University Libraries on state, regional, and national conferences and meetings; functions as a systemwide resource person on preservation and conservation matters; helps monitor University Libraries' environmental conditions; develops preservation training and consciousness-raising programs for staff and patrons; and develops funding for the program.

QUALIFICATIONS: MLS from an ALA-accredited library school; advanced training and experience in library preservation/conservation, including knowledge of preservation issues and concerns, physical treatment of library materials, and current directions in the preservation and conservation fields; clear understanding of bibliographic operations in a large academic or research library and familiarity with hands-on conservation techniques; and ability to communicate effectively both orally and in writing and to conduct studies falling within the scope of this position are required.

SALARY: $23,000+, depending on qualifications. Faculty status at the rank of senior assistant librarian/associate librarian.

Send letter of application and resume including the names of at least 3 references to:

M. E. State
Assistant to Director for Personnel
University Libraries
SUNY/Buffalo
432 Capen Hall
Buffalo, NY 14260

(Microcomputers, cont. from p. 632.)

best overall coverage of microcomputer telecommunications, certainly at this price. In addition to being an excellent and authoritative catalog of services found on many utilities, it covers terminal software extensively, as well as many of the technical aspects of modem operation, such as baud rates and standards. It is one of the best and easiest guides on individual modems to be found. There is also a chapter, "Search Strategy," to help reduce your online charges, and many other features. The final chapter, "On the Near Horizon," is an interesting discussion that includes "prestels," the use of color and graphics online. A fine purchase for any hobbyist or information specialist wishing an introduction to the field and information to aid in the selection of hardware or software and utilities. In short, if I were looking for a single book, this would be my first choice. The more you use it, the more you'll like it. Highly recommended.

☐ ***Joys of Computer Networking; The Personal Connection Handbook,*** by Judy Barrett. 188p., New York: McGraw-Hill, 1984. $9.95 pap. Jumps right into a narrative description of many online services and what to do once you are online. Useful for understanding what to expect when using a network. Some of the chapter titles are far out and give some feeling for the content: "Now you can live at the P.O.," "Stumping on the phone lines!" and, best of all, "Finding friends and maybe lovers."

☐ ***Micros and Modems: Telecommunicating with Personal Computers,*** by Jack M. Nilles. 170p., Reston, Va.: Reston Publishing Co., 1983. $16.95. In this design and implementation manual, the author goes to some length to explain the different types of networks (loop, ring, bus, star, etc.) and describes local networks such as Cluster/One, Ominet, C-Net, and CP/Net. A good high-level introduction to the field of telecommunications. Excellent bibliography for further reading.

☐ ***The Small Computer Connection: Telecommunications for the Home,*** by Neil L. Shapiro. 190p., New York: McGraw-Hill, 1983. $15.95 pap. The outstanding feature of this book is the "help" files (printed documentation) for nine popular bulletin-board systems. A second feature, not easily found elsewhere, is an extensive explanation of various aspects of the information utilities. Also contains down-to-earth modem information and notes for first-time callers. Index.

☐ ***The World Connection,*** by Timothy Orr Knight. 142p. Indianapolis: Sams, 1983. $9.95 pap. Orr was 16 years old when he wrote this book. It's fun to read, not dwelling on technicalities (even the BBS list is short). The writer recounts his personal experience with the CompuServe CB channel. Several important modems are discussed, as well as terminals and software packages. Some minimal tips are outlined to aid anyone trying to operate a BBS. Especially appealing to younger or inexperienced computer users, it is perhaps the easiest to understand of all the books listed.

Hobbyist—advanced

☐ ***Microcomputer Data Communications Systems,*** by Frank Derfler. 129p. Englewood Cliffs, N.J.: Prentice-Hall, 1982. $12.95 pap. The first part of the book describes the nuts and bolts of microcomputer data transmission, covering such concepts as synchronous and asynchronous, parallel data outputs, and RS-232. An excellent chapter explains the whys and wherefores of terminals, dumb and smart. Subsequent chapters deal specifically and extensively with "Using the Apple II Microcomputer as a Data Terminal," "Using the TRS-80 as a Terminal," "S-100 Bus Computer Systems and CP/M," and "Atari, Heath, and Commodore Systems." The usual treatment of BBS systems and networks is found, as well as a special chapter on "Communications for the Deaf," which is difficult to find elsewhere.

Specific hardware

☐ ***Communications for the IBM PC and XT,*** by Lisa Stahr and the editors of *PC World.* 224p. San Francisco: PC World Books, 1984 (on press). $16.95 pap. Includes information on how to select communications software, bulletin boards, and how to form a local network using several IBM PCs.

☐ ***The IBM PC Connection: Telecommunications for the Home & Office,*** by Neil L. Shapiro. 192p. New York: McGraw-Hill, 1983. $16.95. This is virtually the same book as *The Small Computer Connection* (listed above), slightly revised and adapted for the IBM.

☐ ***Telecommunications for the IBM PCjr.,*** by David W. Carroll. 224p. Englewood Cliffs, N.J.: Prentice-Hall, 1984. $15.95.

☐ ***Telecommunications with your IBM Personal Computer,*** by Gregory Kearsley, Harold Hunter, and Beverly Hunter. 192p. Glenview, Ill: Scott, Foresman, 1984. $39.95.

☐ ***TRS-80 Data Communications Systems,*** by Frank J. Derfler, Jr. 159p. Englewood Cliffs, N.J.: Prentice-Hall, 1982. $12.95 pap; $22.95. This book covers most aspects of home computing with a modem: terminals, various technical aspects of modems (baud, duplex, etc.), terminals, utilities, bulletin board software (specifically, CBBS, ABBS Forum 80), and other fundamentals. Three chapters cover the TRS-80 specifically. A separate chapter covers "Commmunications for the Deaf".

Magazines and journals

Nearly all computer magazines now carry regular features and departments about micro-telecommunications, and these should not be overlooked. For instance, the first reasonable article I have seen on the operation and maintenance of a BBS (bulletin board system) in a magazine appeared in the March 1984 issue of *Call—A.P.P.L.E.*, p. 20. Saving special issues in the vertical file may be the only way to keep information regarding modems and software current. Keep up with *Microcomputer Index*, a subject guide to some 40 or more microcomputer journals. It is available both in print (through Database Services, Box 50545, Palo Alto, CA 94303) and online (DIALOG/Knowledge Index). The only drawback to the printed version is the rather limited number of subject headings.

Some of the journals devoted exclusively to this aspect of microcomputing are listed and annotated below.

☐ ***Database.*** $28, quarterly. For librarians and information specialists. *Database* complements *Online*, below, and deals exclusively with practical information on databases, including new databases and access procedures. Most articles are lengthy. Online, Inc., 11 Tannery Lane, Weston, CT 06883.

☐ ***Data Base Alert.*** $48, monthly. Newsletter of databases and online services. Knowledge Industry Publications, 701 Westchester Ave., White Plains, NY 10604.

☐ ***Dial-Out Newsletter.*** $25, monthly. Covers all areas of telecommunications. 175 5th Ave., Suite 3371, New York, NY 10010.

☐ ***Library Journal.*** $59, 20 times a year. Has a regular feature entitled "Online Databases." R.R. Bowker Co., Subscription Dept., Box 1427, Riverton, NJ 08077.

☐ ***Micro Communications.*** $55, monthly. Covers most areas of telecommunications with a slant toward the popular hobbyist. 500 Howard St., San Franicsco, CA 94105.

☐ ***Modem Notes.*** $36, monthly. Specifically geared to reports of online services. 2921 S. Brentwood Blvd., St. Louis, MO 63144. Attn.: Robin Elias. Also available through NewsNet.

☐ ***The On-Line Computer Telephone Directory.*** $9.95, quarterly. Devoted exclusively to electronic bulletin boards, it lists about 600. Write OLCTD, Box 10005, Kansas City, MO 64111. Also available through NewsNet.

☐ ***Online.*** $39, bimonthly. For librarians and information specialists, and probably familiar to most readers. Online, Inc., 11 Tannery Lane, Weston, CT 06883.

☐ ***Online Today: The Computer Communications Magazine,*** free monthly. Perhaps the greatest bargain for the hobbyist. Once you join CompuServe you get this magazine free, even if you don't access the network! Topics covered include many not directly related to communications (e.g., word processing, spelling and grammar checkers). Available to nonsubscribers from CompuServe, Box 639, Columbus, OH 43216.

☐ ***RQ.*** $20 to non-RASD members, quarterly. Produced for librarians, and contains a regular feature called "Databases." American Library Association, 50 E. Huron, Chicago, IL 60611.

☐ ***Sourceworld,*** free bimonthly. A newsletter for subscribers to The Source. It does not begin to approach the scope and interest of *Online Today,* listed above and offered by CompuServe. ☐

How much do we earn?

ALA publishes data on U.S. library salaries for 1984

by Mary Jo Lynch
Director, ALA Office for Research

THE FIRST *ALA SURVEY OF LIBRARIAN SALARIES*, published in 1982, was favorably received by the library community. The survey was repeated in 1984 and the new *ALA Survey of Librarian Salaries, 1984* was published in mid-June. As before, ALA's Office for Research and Office for Library Personnel Resources worked together to produce this report. The Library Research Center at the Graduate School of Library and Information Science, University of Illinois at Urbana, again mailed the survey and processed the returns.

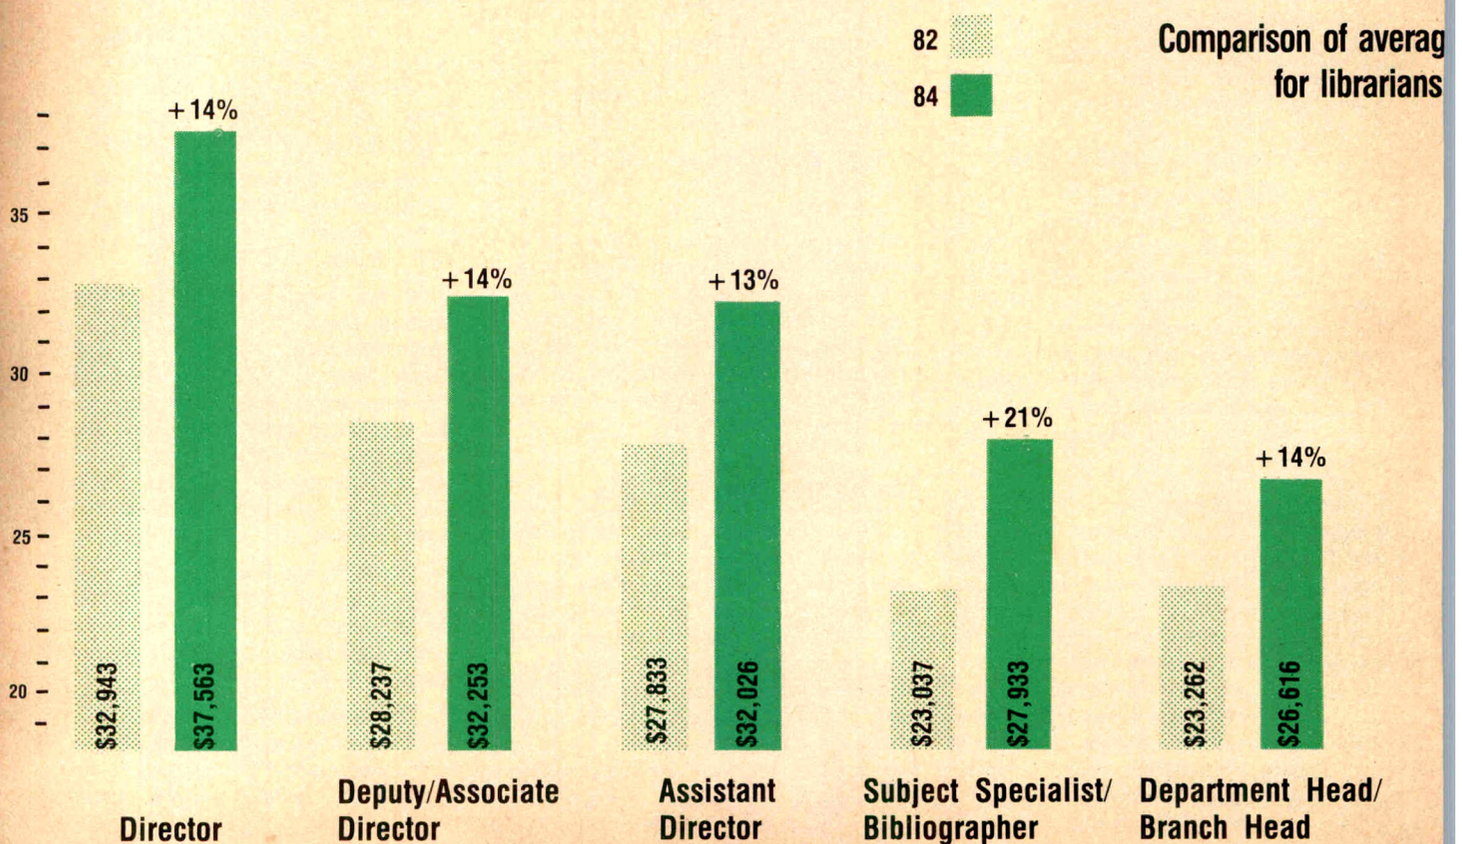
The questionnaire was mailed in January 1984 to a random sample of 1,418 academic and public libraries. The sample was drawn from 20 groups of libraries that were created by stratifying five type-of-library categories by four regions of the United States. The five library types surveyed were: small public (serving populations of 25,000 to 99,999), large public (serving populations over 100,000), two-year college, four-year college, and university. The four regions are those used by the National Center for Education Statistics: North Atlantic, Great Lakes and Plains, Southeast, and West and Southwest. The survey form was similiar to the one used in 1982. Four changes were made, however, in response to requests from users and reviewers.

Survey changes

The 1982 survey universe excluded members of the Association of Research Libraries (ARL) because ARL collects salary information from its members annually. That exclusion was not made in the 1984 survey. Since salaries in ARL libraries are generally higher than salaries in other libraries, their exclusion in 1982 may have led readers to conclude that library salaries are lower than they actually are. (Although the exclusion was noted in the introduction of the 1982 report, it was not repeated on every page.)

Another change is related to salaries paid in academic libraries for less than a 12-month year. In 1982 respondents were asked to circle salaries that represented less than a 12-month year. An appendix to the 1982 report summarized how often this occurred for various positions. However, salaries were recorded as given, and less-than-12-month salaries were used in computing means for the 1982 report. The 1984 questionnaire asked respondents to circle the appropriate number of months if their salary was for less than a full year. A computer program prorated these amounts to their 12-month equivalents; the 12-month figures were used in calculating means.

The third change involved "contributed" salaries, i.e., when an institution pays some expenses or an honorarium to a librarian, but not a true salary. The 1982 questionnaire did not mention such salaries, but some respondents noted that their salaries were contributed—at least partially. Knowledgeable



persons convinced us that including figures on contributed salaries distorted our results. In 1984 the following instruction appeared on the questionnaire: "If services are contributed (i.e. institution pays some expenses or an honorarium but not a true salary) please do not list the incumbent."

The final change involves three positions for which salary information was requested. In 1982 we grouped Children's and/or Young Adult and/or Adult Services Librarians into one category and provided separate categories for Coordinator for Children's Services and Coordinator of Adult and/or Young Adult Services. In 1984 we grouped Children's and/or Young Adult Services Librarians together and made Adult Services Librarian a separate category. Coordinator positions for all three groups were combined into one category.

Results

Usable responses were received from 920 libraries, nearly 65 percent of those selected. The results are displayed in the 26 tables that are the bulk of the report. Thirteen tables show the low, mean, and high for scheduled starting salaries and the low, mean, and high for maximum salaries for each position, based on figures from formal salary schedules. Thirteen other tables display the low, mean, and high for salaries actually paid for the same positions. In addition, one table shows the low, mean, and high of salaries paid to beginning professionals in 1982 regardless of position. Another table shows the percentage of the salary budget given to employee benefits.

The illustration below, prepared by *American Libraries* from survey data, compares figures from the 1982 and 1984 reports. It shows the mean of the maximum salaries reported for each position in all types of libraries and in all parts of the country for both 1982 and 1984.

The changes in the 1984 survey noted earlier complicate comparison of 1982 and 1984 salaries. Three positions—Coordinator of Adult and/or Young Adult and/or Children's Services, Adult Services Librarian, and Children's and/or Young Adult Services Librarian—cannot be compared because they appeared in a different form in the 1982 survey.* It seems likely that salary increases in the other categories are partially caused by the changes noted earlier. Even with this qualification, however, it is clear salaries have increased substantially.

The illustration tells the library administrator and the job seeker the average top-of-the-range salary for each position. In setting the salary range for a particular position, however, the library administrator would need more information, as would the job seeker trying to determine what salary to expect. Both would want to know the salary range for a position in a particular type of library or in a particular geographic area. Both would also want to know what salaries are actually paid to incumbents. The *ALA Survey of Librarian Salaries* provides all this information.

In addition to data about salaries, the 1984 report includes a comprehensive essay on "Employee Benefits: Basic Concepts and Current Issues," an annotated list of "Salary Surveys Providing Information on Library Workers," and text of all ALA policies relating to salary issues.

The *ALA Survey of Librarian Salaries, 1984* by Project Director Mary Jo Lynch, Margaret Myers, and Jeniece Guy, is available for $40 from the ALA Order Dept., 50 E. Huron St., Chicago IL 60611 (0-8389-3301-7; ISSN 0747-7201). □

*The average top-of-the-range salary for these three positions from the 1984 survey was $25,887, $22,856, and $21,949, respectively.

Fall roundup:

Timely products & services for libraries

A generous sampling from the ALA exhibits and recent announcements

THE ROBUSTNESS OF THE LIBRARY marketplace was reflected this summer in another record-breaking trade show at the ALA Annual Conference in Dallas. Thousands of products and services were showcased in more than 780 exhibit units. Since the conference, announcements of more new products have blanketed the *American Libraries* offices like autumn leaves. To provide the armchair shopper with some good leads in a wide range of offerings, we have doubled the size of our annual roundup—yet only hint at the number of products and services we liked. Throughout the year, we'll try to catch up in our regular resource departments.

Books

Blackwell in America. Basil Blackwell, Inc., the international publishing firm that began as a secondhand bookshop in Oxford, England, in 1879, is now publishing in America. Blackwell books previously available under U.S. imprints are now available in North America under their original imprint. The first American list includes more than 200 titles, including *The Resourceful Earth, Girls in the Gang,* and *Halley's Comet,* as well as scholarly and professional books. Write Basil Blackwell, 432 Park Ave. S., Suite 1505, New York, NY 10016.

Historical resources. Research Publications recently published *Iroquois Indians: A Documentary History* and *German and Austrian Drama 1740—1790* on microfilm at $3,300 and $3,000 respectively. *Nineteenth Century Legal Treatises,* in microfiche, are organized into separate units of British and American treatises. Each unit is $2,905, with 15 percent off for a standing order. Research Publications, 12 Lunar Dr., Drawer AB, Woodbridge, CT 06525.

Computer titles. Banbury Books publishes guides, games, and fiction for the users of the 8 million personal computers in the United States. *Cage's Secret,* by Peter W. Tobey and James E. Kelley, Jr., is a November offering. The fall catalog also lists *Wordstar for the Working Writer* and *S B sCenes I* for ages two to four. Write Banbury Books, Inc., 353 W. Lancaster Ave., Wayne, PA 19087.

New from G. K. Hall

Architecture and Art Nouveau. G. K. Hall is plugging two colorful October publications. *The World Atlas of Architecture,* a complete rewrite of the 1975 *Great Architecture of the World,* boasts over 300 full-color pages, 124 architectural plans, and 36 maps. The detailed narrative was written by distinguished architects. The work is 13½-by-9½ inches.

Alphonse Mucha: The Complete Posters and Panels is said to be the first comprehensive guide to the original designs of the Art Nouveau master. The 9½-by-12½-inch volume includes 172 full-cover plates, 103 black-and-white reproductions, and extensive annotations on each entry.

Each book is $75 from G. K. Hall & Co., 70 Lincoln St., Boston, MA 02111.

Pop for YAs. "We're a teenage necessity," declares Pacer, the newest member of the Putnam Publishing Group Books for Young Readers. Pacer publishes paperback originals as well as reprints in all genres. In September, Pacer introduced its Zodiac Club series with the titles *The Stars Unite, Aries Rising, Taurus Trouble,* and *Libra's Dilemma.* The club will have a new title each month at $1.95 each. The Putnam Publishing Group address is 200 Madison Ave., New York, NY 10016.

New social science reference works. The Gale Research Co. plans fall publication for two new reference works: *Psychology Information Resources Directory* and *Economics Information Resources Directory.* Both publications are international guides to organizational sources of information in their subject areas. Sources include research centers, membership groups, government agencies, and university departments. Both are available on approval for 60 days. Each directory is $85 from Gale Research Co., Book Tower, Detroit, MI 48226.

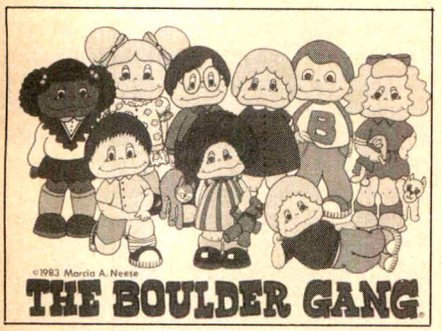
Small presses for small people. Selected titles from 23 publishers are listed in a free catalog from the Children's Small Press Collective. The publications include a natural foods cookbook for children, books teaching children how to prevent sexual assault and abduction, a child development guide based on astrological factors, and *Totline,* an activity newsletter for children's librarians. The collective's address is 719 N. 4th Ave., Ann Arbor, MI 48104.

The National Job Bank is a job-hunting resource containing information on 10,000 employers in 10 major job markets across the country. The entries, taken from previous local "Job Bank" books, list addresses, phone numbers, personal contacts, and brief descriptions of the firms. The 1,600-page volume, arranged geographically and indexed by industry, is available to libraries for 60 days on approval. $79.95 from Bob Adams, Inc., 2045 Commonwealth Ave., Brighton, MA 02135 (0-937860-07-7).

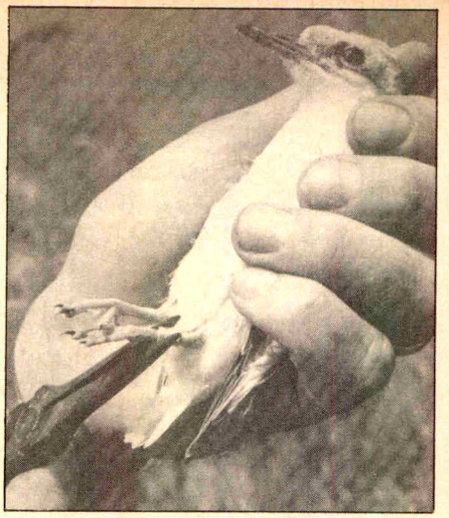
Nutrition resources. The Ryerson Polytechnical Institute's Nutrition Information Service produces bibliographies, resource guides, directories, and audiovisual materials on such topics as nutrition and aging, food and nutrition for the disabled, nutrition and fitness, and infant feeding. A free pamphlet listing the publications is available from the Publications

Office, Learning Resources Centre, Ryerson Polytechnical Institute, 350 Victoria St., Toronto, ON M5B 2K3 Canada.

Much movie memorabilia is found in *The New York Times Encyclopedia of Film*, a 13-volume collection reprinting every article on film published in the newspaper from 1896 through 1979. Over 5,500 news stories, profiles, and interviews are published in facsimile, along with photographs, illustrations, and advertisements. One volume of the set is devoted to a comprehensive subject and title index. A companion to *The New York Times Film Reviews*, the encyclopedia is $2,000 from Times Books, 130 5th Ave., New York, NY 10011 (0-4-5014319-2).



The Boulder Gang *(so named because their heads are shaped like rocks, according to author-illustrator Marcia Neese) are the stars of a new series of books for grades 2–3. Each title focuses on a member of the gang who has to tackle a common problem, such as fear of the dark, lack of popularity, or receiving a low grade. The publisher, Baker Street Productions (POB 3610, Mankato, MN 56002-3610) also offers self-adhesive motivator and award stickers featuring the gang.*



A career in hand. Opportunities in Animal and Pet Care, *from which the illustration above is taken, is one of the recent titles from VGM Career Horizons, 4255 West Touhy Ave., Lincolnwood, IL 60646-1975. New career books for fall cover acting, architecture, federal government, paralegal work, travel, and more. Write for the latest catalog.*

Genealogy guide. *The Compendium of Historical Sources* is subtitled "The How and Where of American Genealogy." The manual contains over 1,000 pages of advice on choosing research methods and sources and lists of state and national record centers, museums with genealogy records, and over 2,400 "little-known but important" information sources. The guide also tells where to find and how to use court records, land records, census records, immigration and naturalization records, passenger lists, military records, railroad records, and other materials. $100 plus $2.95 shipping from Butterfly Publishing Inc., POB 21116, Salt Lake City, UT 84121.

State of the states. *Flying the Colors: Texas* is the first in a series of books providing a county-by-county look at the 50 states. The volume opens with an overview of the state's land, economy, and government and then gives statistical information and other data on each county. The guide also describes the major urban areas in Texas and includes a brief history of the state and background on the formation of each county. Political Research, Inc., 16850 Dallas Pkwy., Dallas, TX 75248.

Periodicals and Indexes

Current Canadiana. Shirley Lewis Information Services, Inc., promises to keep you informed about good Canadian children's materials in the monthly *Current Canadiana*. A one-page annotated list of books, records and tapes, and computer software, it is a review, selection, and ordering tool. $30 per year, monthly except July and August from Shirley Lewis Information Services, Inc., 196 N. Queen St., Etobicoke, Ont., M9C 4Y1, Canada.

New periodical indexes. *Abstrax* provides cover-to-cover indexing of 225 periodicals, including a summary of each article cited. The index is cumulated and issued on 4-by-6-inch microfiche or roll microfiche for COM readers every six weeks. *Abstrax* is also available online on BRS. JA Micropublishing, Inc., POB 218, Eastchester, NY 10707.

Each weekly issue of *Popular Magazine Review* contains an average of 400 abstracts from 75 periodicals, designed to arrive while the issues are still on the current periodicals

DEWEY Decimal Classification® Numbers You Can Count On!

New **Melvil Dewey: The Man and the Classification.** 1983. Proceedings of 1981 Seminar. Contributors: Keyes D. Metcalf, David Kaser, Dee Garrison, Francis Miksa, Wayne A. Weigand, John P. Comaromi, W. Boyd Rayward, Gordon Stevenson. 210 pp. ISBN 0-910608-34-2 $10.00

Also Available **DEWEY Decimal Classification and Relative Index. Edition 19.** 1979. 3273 pp. Set: 3 Vols. ISBN 0-910608-23-7 $100.00 Purchasers of Edition 19 are entitled to receive FREE issues of the DC& supplements to Edition 19. Vol. 4, Nos. 4 and 5 available 1984.

Manual on the Use of the DEWEY Decimal Classification: Edition 19. 1982. 551 pp. ISBN 0-910608-32-6 Paper $20.00

Abridged DEWEY Decimal Classification and Relative Index. Edition 11. 1979. 618 pp. ISBN 0-910608-22-9 $27.00

Sistema de Clasificación Decimal. 1980. 2655 pp. Set: 3 Vols. ISBN 0-910608-26-1 $75.00

All prices plus postage and handling

Forest Press 85 WATERVLIET AVE. ALBANY, NY 12206 U.S.A. (518) 489-8549

shelves. One-year subscriptions include 50 weekly newsletters, monthly indexes, quarterly cumulative indexes, and a binder. Popular Magazine Review, POB 325, Topsfield, MA 01983.

"Health literature is out there; let's get it to the layperson" is the credo of the *Bernoff Index to Consumer Health Literature.* The three-times-yearly publication covers over 25 periodicals designed for or of interest to the layperson; the titles, most not indexed elsewhere, range from *American Health* to the *Harvard Medical School Health Letter.* Annual subscriptions are $45 from POB 15846, Philadelphia, PA 19103.

M300 and PC Report is "the single library-oriented source of information for developments, trends, forecasting, and use of the IBM PC as a technical processing, library management, and collection access tool," according to editor Nancy Jean Melin. The monthly journal will feature reports on the PC's installation, integration, and use at libraries and support agencies, as well as reviews of new library applications programs for the PC. Annual subscriptions are $29 to institutions ($20 to individuals), with sample issues available on request, from Meckler Publishing, 520 Riverside Ave., Westport, CT 06880.

African diaspora newsletter. Howard University Press, marking its 10th year of publishing, is offering the *African Diaspora Studies Newsletter,* edited by Joseph E. Harris. African diaspora studies are concerned with the historical connection between Africans and people of African descent abroad. The newsletter will appear in English, French, Portuguese, and Spanish. Topics in the first issue include "Transformation of Pan-Africanism," reports from across Africa, and diaspora studies at U.S. and African universities. $10 per year (2 issues), $6.50 per issue from *African Diaspora Studies Newsletter,* c/o Howard University Press, 2900 Van Ness St., N.W., Washington, DC 20008.

Microfilm

Black studies microfilms. The latest catalog of National Archives microfilm publications lists records dealing with blacks in the United States, with descriptions of the materials and the offices that issued them. The 100-page catalog includes the records of the Bureau of Refugees, Freedmen, and Abandoned Lands, established by the War Department in 1865, as well as selected records from Congressional committees and hearings, court cases, the Census Bureau, and other federal agencies. Request on library stationery from the National Archives Trust Fund Board, Washington, DC 20408.

Visit to a not-so-small publisher. *At the ALA Exhibits, IFLA President Else Granheim visits the K.G. Saur booth and Klaus Saur, whose firm publishes IFLA materials and a growing number of ambitious microform products. Saur's latest includes the card catalogs of the Harvard Fine Arts Library and Harvard Distributable Union Catalog. Now underway is an enormous project to reproduce the Library of Congress Main Catalog—a dictionary catalog containing approximately 25 million cards—in fiche. Ask for a publications kit from K.G. Saur, 175 Fifth Ave., New York, NY 10010.*

Book info on microfiche. The Library Corporation of Washington, D.C., says that its seven *Any-Book* indexes provide astonishing access to almost every book published during the last 10 years plus earlier titles still in print. Totally republished on standard microfiche each February, June, and October, *Any-Book* indexes by titles, words, authors, subjects, areas, ISBNs, abbreviations, and publishers. Next year *Any-Book* will be published on Laser Memory. To review the complete set write the firm at POB 40035, Washington, DC 20016.

Software

College selection by computer. The Big Decision driving high school seniors and parents nuts this fall can be aided by two software packages from Peterson's Guides. "College Selection Service" searches a college database by 18 catagories such as location, costs, and campus setting, with 600 different descriptive characteristics. It comes with print materials and runs on the TRS-80 II and 12, the 48K Apple II, II+, and IIe, and IBM PC, among others. Cost: About $145. "Financial Aid Service" helps students analyze need and sources, runs on the Apples mentioned above, and costs $195. Write Peterson's Guides, Dept. 4204, 166 Bunn Drive, POB 2123, Princeton, NJ 08540.

EastWind blows in from Kansas. Data Phase Corp. introduced its EastWind series of microcomputer software programs at ALA, featuring totally integrated projects in

Problem Patrons?

The problem patron in the library can be tiresome and annoying—or potentially dangerous. Librarians can find help in dealing with these patrons by reading this new collection of fictionalized case studies.

River Bend Revisited: The Problem Patron in the Library, by Bruce A. Shuman / Available August 1984 / 224 pages / 6 × 9 / Paperbound / ISBN 0-89774-125-0 / $22.50(t)

Be an Assertive Librarian!

You can turn win-lose conflicts into win-win transactions by following the case study examples, self-work exercises, and advice offered in this practical new handbook.

The Assertive Librarian, by Janette S. Caputo / Available August 1984 / 256 pages / 6 × 9 / Paperbound / ISBN 0-89774-085-8 / $19.50(t)

(t)=Tentative price.

THE NEW AMERICAN POVERTY
by Michael Harrington

". . . documents what most of us have known or suspected: that poverty in the 1980s is more profound, more polarizing, and more problematic than it was 20 years ago. With firm grounding, he traces its recent causes and manifestations. . . . After this careful analysis of the problem, Harrington attempts to offer some solutions. . . ."

acquisitions, circulation, and public access. Data Phase has adopted ALIS software into diskette format for use on IBM, Apple, and Data General Computers. For a price break on the $2,500 circulation software and further information, write Data Phase at 9000 W. 67th St., Shawnee Mission, KS 66202.

Micro "Knowledge Explorer." Grolier Educational Corp. is offering software that uses *The New Book of Knowledge Encyclopedia* to promote computer literacy and reference skills. Among five programs available in the Knowledge Explorer series are two of special interest to librarians: WonderQuest helps students learn to use the *Encyclopedia;* and InforMaster teaches us-

From the WonderQuest program in Grolier's Knowledge Explorer series.

ers how to compile a database and manipulate it in various ways. Other programs include a treasure hunt through Vol. A of the *Encyclopedia,* an island adventure in Vol. M, and computer graphics. Programs can be used with 64K Apple IIe, II+, and II micros. Grolier Educational Corp., Sherman Turnpike, Danbury, CT 06816.

Downloading made simple. Personal Bibliographic Software, Inc., urges users to "end the mystery of the MARC tagged fields" with its Data Transfer System, a companion program to the company's well-received Personal Bibliographic System. The new product allows users to download full MARC records from another system (the brochure uses OCLC as an example) into a personal database file. The Personal Bibliographic System then takes over to allow editing of the records and printing in bibliographic citation rather than MARC style. Personal Bibliographic Software, Inc., POB 4250, Ann Arbor, MI 48106 (313-996-1580).

Low-cost computer literacy. The IBM PC APPRENTICE series offered by Prentice-Hall, Inc., teaches popular software applications at reasonable prices. The series consists of Prentice-Hall/Chambers tutorial Workbooks, a teacher pack, and special "educational versions" of widely used software packages covering accounting, database management, electronic spreadsheets, programming languages, and word processing. Workbooks are $14.95; teacher packs, $19.95; and software, $29.95 (higher for programs using more than one master disk). A licensing agreement allows instructors to make copies of master disks for each tutorial workbook purchased. The series runs on all IBM PC products. Prentice-Hall, Inc., General Publishing Division, Englewood Cliffs, NJ 07632 Attn.: Dean Karrel.

Systems

Online system from Science Press. From the heart of Pennsylvania Dutch country, Ephrata, Pa., comes the Automated Library System (ALS) of Science Press, a COM catalog producer. The integrated system runs on IBM hardware and uses Cullinet database management software. It supports cataloging, acquisitions, serials control, film and media booking, and circulation, as well as authority control listing, vendor profiles, fund accounting, and patron files. ALS can accommodate the MARC communication format, and OCLC and MARC-compatible formats. Science Press, Attn.: Alfred W. Baker, 207 E. Holly Ave., Suite 111, Sterling, VA 22170 (703-450-4477).

Two hot in-house systems. Visitors to ALA Exhibits crowded around demonstrations by Virginia Tech and Northwestern University library staff to view much-heralded systems developed and marketed by those institutions. The Virginia Tech Library System is an "online, fully integrated software package which runs on the Hewlett-Packard 3000/Series mini-computers" and "has been selected for use by more than 50 libraries." For features of Release III.1 write: Center for Library Automation, 416 Newman Library, Virginia Tech, Blacksburg, VA 24061.

LUIS is the online catalog module of the Northwestern Online Total Integrated System. It offers subject searching and consolidates and displays bibliographic, holdings, and processing information, including for serials. Write Northwestern University Library, Information Services Dept., Evanston, IL 60201.

Databases

Marquis adds a database. The Marquis Who's Who Database, available through DIALOG, has added Who's Who in Frontier Science and Technology. The new database provides information on more than 16,000 scientists doing work in such fields as genetic engineering, artificial intelligence, holography, robotics, and psychophysics.

(Continued on p. 658)

OCLC UPDATE

WHY CONSIDER LS/2000?

A variety of options exists today for local systems—circulation systems, online catalogs, support systems. Librarians and consultants have told us what they feel sets LS/2000 apart. Our growing list of library users confirms their judgment. We invite you to consider LS/2000 for yourself.

Keyword Access

LS/2000 provides you with keyword access to a word ***anywhere*** in a bibliographic record. Keyword access is standard on every LS/2000 system and does not require any additional hardware or software.

Bibliographic Support

LS/2000 features a subsystem dedicated to the support of the bibliographic files that are at the heart of your local system. LS/2000 provides extensive facilities to significantly enhance technical services productivity.

Database Creation

We can extract your records from OCLC's Online Union Catalog; custom label programs can link a specific barcode to a specific item, and copy-specific records may be built from the MARC records during the load process. We can even convert the headings in your database to AACR2 form using the current Library of Congress Name-Authority File. Our Retrospective Conversion Service can create a file of machine-readable records by adding your holdings to OCLC's Online Union Catalog.

Authority Control

Global changes make catalog maintenance easier and online cross-references get your patrons to the information they need. New records entering your local system are automatically checked against the authority file, "flips" performed, and differences placed in a review file.

Flexibility

LS/2000 offers a wide variety of system configurations. We offer the LS/2000 Micro Series for smaller libraries and provide minicomputers and super-minicomputers for larger systems. And our powerful profiling parameters allow us to work with you to tailor a system that fits the needs of your patrons and reflects your circulation policies.

MARC In & Out

Machine-readable cataloging records, the basis of the system, are loaded directly into LS/2000. Bibliographic and authority records are available online in the MARC format and we support all MARC formats. You may even output a MARC tape from the system for security or resource-sharing purposes.

User Support

OCLC understands libraries. Our librarians are skilled in automation and committed to local systems. Our goal is to ensure that your system is right, the installation is smooth, and the support and assistance are continuous.

6565 Frantz Road, Dublin, Ohio 43017-0702
614-764-6000 TWX: 810-339-2026

Light on serials. Infoserv is The Faxon Company's new serials information database that is available to libraries whether or not they use Faxon's other services. Infoserv contains up-to-date information on all new serials produced during the past three years, serials titles that have undergone major change, and forthcoming titles. Users can search for titles, see descriptions of them, request more information and sample copies, and order subscriptions. The system is compatible with many ASCII terminals and only requires a Faxon password. The Faxon Company, 15 Southwest Park, Westwood, MA 02090.

Hardware

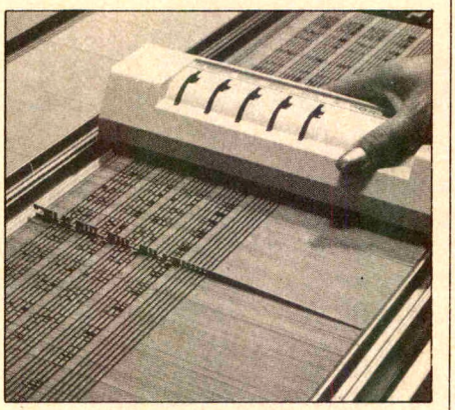
Ordering comes up roses. "The Rose" from Brodart is a hand-held electronic device similar to a portable calculator that allows librarians to input a library order, review it, and automatically send it to Brodart by toll-free telephone line. Brodart sends the library an order confirmation next day, as well as information on o.p. titles and direct order titles. An optional five-part order form can be sent for each book. No minimum or maximum order. "The Rose" and order confirmation service are $275 per year; order form service is $50 more. Brodart Co., On-Line Services, 500 Arch St., Williamsport, PA 17705.

Jumbo microfilm screen and prints. Minolta's RP407E desktop reader-printer can print out documents as large as it displays them—11-by-17 inches—and offers five types of carriers for all the latest in quick-retrieval film packaging. A switch provides positive prints from either positive or negative film. Write Minolta Micrographics Division (101 Williams Dr., Ramsey, NJ 07446) for a brochure.

AV extraordinaire. Among new items for the demanding AV specialist are these:

- The Bell & Howell 850 sound/slide projector is described as "incomparable, the standard by which to measure all others." This deluxe model features a front/rear screen projector with a built-in microprocessor and rapid random access. Keyboard programming is done on the machine or with an infrared remote transmitter. Bell & Howell Audio Visual Products Div., 7100 N. McCormick Rd., Chicago, IL 60645.
- The Professional Videotape Evaluator/Cleaner from RTI finds the wrinkles, creases, edge damage, loose oxide, and other problems in your videotapes and cleans 'em up. RTI, 4700 Chase Ave., Lincolnwood, IL 60646.
- RTI claims its cinescan desktop machines are the latest and greatest for previewing or studying 16mm films. High tech enables viewing at twice running speed without losing comprehensibility of the sound track. Top scanning speed is one-twelfth normal running time. RTI at the address above.

Find a fiche fast. The old keysort concept of matched notches for card retrieval is reborn in a mechanical contrivance (below) from the Russ Bassett Company. Called the Bassett Retrix System, it can produce a desired fiche, film jacket, or aperture card from a random file of up to 12,000 with one sweep of the hand. The demonstrations we watched were impressive. Write the firm at POB 249, 8189 Byron Rd., Whittier, CA 90608.



With a sweep of the hand, the Bassett Retrix System can find a fiche fast.

Personal copying. At the ALA Exhibits, Canon was showing the latest addition to its family of personal copiers, the PC–25. A changeable cartridge holds the key copying innards and lasts for about 2,000 copies. The compact machine pops out eight copies a minute, up to 10-by-14 inches, and reduces and enlarges. Write Canon Headquarters at One Canon Plaza, Lake Success, NY 11042

Compact microfilmer. The latest offering from Alos Micrographics Corp. is a typewriter-sized Simplex Camera 16, into which documents are fed as with a desk-top copier. What comes out is high-resolution microfilm. The firm's address is 239 E. Plains Rd., POB 407, Walden, NY 12586.

Computer money changer. Standard Change-Makers, Inc., advertises that you can convert your present magazine-load standard bill changer into a "smart" new computer changer with convenient hopper-loading, three times your present capacity, and built-in audit and self-diagnostic systems. The company offers computer changer conversion kits for five SCM series as well as a whole new line of "intelligent" bill/coin changers. Write Standard Change-Makers, Inc., 422 E. New York St., Indianapolis, IN 46202.

Carting media. The Worden Company has developed "instant organization on wheels" for storage, transportation, and distribution of audiovisual media in libraries. The Media Transport System uses wire baskets that can be mounted on movable carts or attached to wall units in library buildings or vans. The baskets hold up to 40 lbs. of materials. The Worden Company, 199 E. 17th St., POB 915C, Holland, MI 49423 (616-392-1848).

Miscellany

Reference Book Guides are 5½-by-8½-inch cards containing instructions for using 300 leading reference sources. Each card gives the purpose of the tool, describes its organization, tells how to use it (with an example), and lists other sources to check. The cards can be placed in the inside cover of the book (bright red spine labels stating "To use this book see inside cover" are provided) or photocopied for mass distribution. Mountainside Publishing, Inc., POB 7034, Ann Arbor, MI 48107.

Free videos. Video Outreach will lend videotapes to educators to copy for classroom use at no charge. The 10 titles now available cover such topics as the Treasure of Tutankhamun, Thomas Jefferson as artist, consumer credit, creating safer neighborhoods, and solar energy. The company sends the tapes in ¾-or ½-inch format and asks only that they be returned via UPS within one week. Video Outreach, c/o The JN Co., POB 388, Woodbury, NY 11797.

Domes as libraries. A vendor who has been around Libraryland before is back with an award-winning product he helped develop for the alternative housing market. It's a geodesic dome structure, easy to build and adapt to library use, says Robert M. Baker, president, R.M. Baker Co. Write him for a color brochure at POB 226, Wayzata, MN 55391.

Toll-free to Ingram. Customers may now call an Ingram Book Company service representative free at the following numbers: 800-321-7588, and (in Tennessee) 800-874-0223.

Designing for libraries. The Architects Collaborative Inc. (TAC), Cambridge, Mass., one of the nation's largest architectural firms, has had several college/university and public library clients. Among them are the University of South Florida at Sarasota; Boston College; the University of Virginia, Charlottesville; North Kingstown (R.I.) Free Library; and the Brighton (Mass.) Branch Library. The firm takes a collaborative approach to design that combines experienced design teams, an open design review process, and "a dynamic relationship" with the client. TAC The Architects Collaborative Inc., 46 Brattle St., Cambridge, MA 02138 (617-868-4200). □

youthreach

Finger- and footprinting program gets kudos at public library

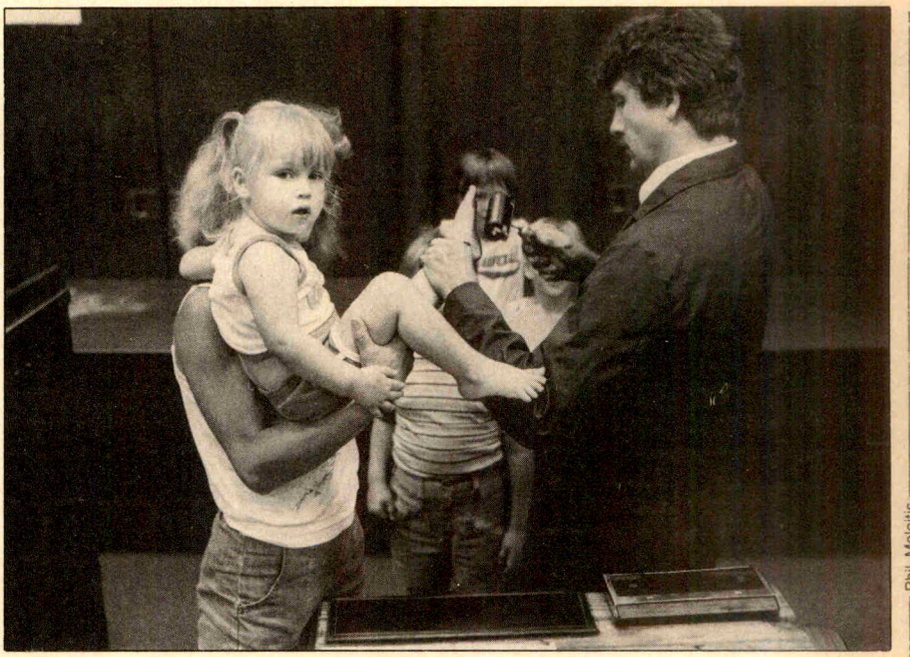
Last summer the Chicago Public Library Children's Services Department launched a free fingerprint identification service at all 18 branches of its southwest district. By September, 30 of 85 branches in the system had participated.

The program was a cooperative venture between CPL and the Chicago Police Department Bureau of Community Services.

One parent responding to the program had experienced the abduction of a child. She was bringing her other children to the library for the service. "Knowing that I have my children's fingerprints on hand gives me a feeling of security," she said.

The fingerprinting is actually a service for parents, who retain the prints for identification purposes. A father of four, who brought his children to the Sherman Park branch, commented he was in favor of the program because the parents, and not the police, kept the records.

Elizabeth Huntoon, head of the CPL Children's Services Department, told *AL:* "This is a fine opportunity to obtain prints of children who may have missed the process in Chicago schools earlier in the year, and a particularly good way to get to the preschoolers who otherwise couldn't participate."



Phil Mololtis

Two-year-old Tammi Rowell is at ease in her mother's arms as Chicago police officer Gene Jaglowski prepares to take her footprints at the Chicago Public Library.

She said that preparing publicity for standardized media and community agencies required little additional effort. An important aspect of the service was to distribute permission slips to parents a week in advance.

Huntoon pointed out that police preferred footprinting children under nine months old. Police also informed Huntoon that younger children often have to be reprinted at the ages of five or six because their prints change.

Only one task required the presence of children's librarians: cleaning up little hands and feet after the prints were taken.

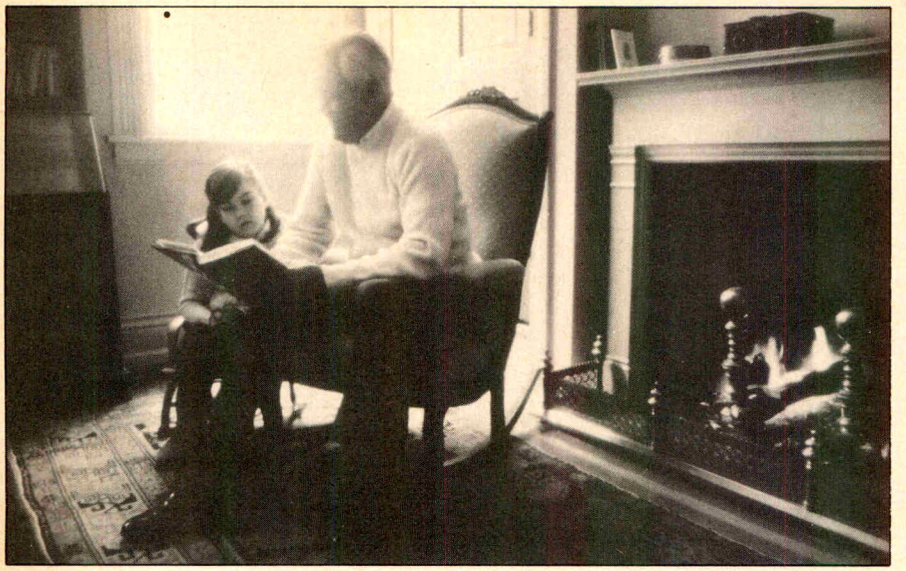
Bringing symbol to life

Mime-librarian Alice Wittig (left) of the Mendocino (Calif.) High School dressed as a clown to star in a 30-second TV spot dramatizing the library symbol. The voice-over says: "Whether you need facts about the past, predictions for the future, or just a bit of relaxation in the present, think of the Reader (symbol) and your local library."

The spot will help children in the Mendocino Unified School District locate the libraries in their three schools. Senior high school video classes helped prepare the presentation.

Wittig told *AL* the spot is part of a week's events this fall to promote school library services. Included will be visits with mime Wittig, contests, and lavish displays. The videotape will appear on a local educational cable TV channel and be rerun for each class in the schools.

ala report



One of the many positive images of public libraries to be seen in **Always in Season,** *a 10-minute slide/sound presentation that can be personalized with local library slides. The production, available from ALA, carries a motivational message.*

Sheldon fundraising workshop available in multimedia

Brooke Sheldon's popular 1984 President's Program, "Raising Funds for Libraries: Paths to the Private Sector," (*AL*, July/Aug., p. 492), can now be obtained from the Public Information Office. A multimedia kit has been prepared for libraries, associations, and agencies sponsoring workshops on fundraising.

The kit includes a 90-minute videotape of the President's Program available in 3/4-inch or VHS-format videotape, and an instruction manual for trainers. It also contains 50 copies of five brochures explaining how fundraising techniques can be adapted to libraries, 50 copies of a general annotated fundraising bibliography, and 50 copies of a list of 64 librarians and library fundraisers who are willing to share their expertise.

The training package has been sent at no cost to the 21 state agencies that participated in preparing the program: Alabama, Alaska, California, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kentucky, Maryland, Mississippi, Missouri, Montana, Nebraska, New York, Ohio, Pennsylvania, Texas, Virginia, and Wisconsin.

The package is $200 from PIO at ALA headquarters.

Always in Season *personalized*

The 10-minute slide/sound production, *Always in Season*, which won acclaim at the 1984 President's Program, is also available from the ALA Public Information Office. The show can be personalized with local library slides.

Designed to present a fresh, realistic, and heartwarming look at public libraries in general and your library in particular, *Always in Season* does not mention fundraising but carries a motivating message. It was produced by Donna Lawrence Productions of Louisville, winner of many awards.

The production is available for $150 in three formats: single-carousel slide tray with sound-synched tape cassette and instructions for localizing the presentations; 3/4-inch videotape for use on local cable TV stations; and VHS-video format. Please specify format, make check payable to the American Library Association, and address request to PIO at ALA Headquarters.

Josey needs 450 volunteers to staff President's Program

President E.J. Josey seeks 450 ALA members to help with his President's Program at Annual Conference in Chicago July 8. The volunteers will act as discussion leaders and reporters in small groups deliberating on the theme, "Building Coalitions for the Public Good" (*AL*, July/Aug., p. 519).

Josey aims to bring together 2,000 members of ALA and other national organizations to reaffirm the concept of the public good and develop coalitions to foster public support of libraries and other public institutions. The conference-within-a-conference is expected to clarify the public-good concept, foster an appreciation of the need for effective action coalitions, and produce a publication that includes position papers, speeches, and summaries of the discussions. The published proceedings can serve as a planning tool for future state, regional, and national efforts, and provide ideas for individual libraries.

The volunteer discussion leaders and reporters must be ALA members who can attend, at their own expense, a training and orientation session at the ALA Midwinter Meeting in Washington, D.C., Jan. 6, 2-4 p.m. Before the session, volunteers will receive at least one position paper to provide a focus for the training.

To volunteer or recommend someone, please send name, address, and phone number by Nov. 1 to Carla J. Stoffle, University of Wisconsin/Parkside, Kenosha, WI 53141. A committee made up of Joseph Boisse, Gloria Coles, Miriam Crawford, Marva DeLoach, and Stoffle will review the applications and make appointments in consultation with President Josey by Dec.7.

PLA inaugurates U.S. jobline for public librarians

The Public Library Association has launched a telephone jobline open 24 hours a day to help public librarians offer and find employment nationwide. The number: 312-664-5627, or 312-664-JOBS.

The jobline, which began July 1, lists position title, location, job description, requirements, salary, closing dates, and application data for each available public library position. The listing is updated every Friday morning to keep it current and accurate.

Employers who wish to list a job vacancy should mail essential information to Penny Spokes, PLA Jobline, 50 E. Huron St., Chicago, IL 60611. PLA will supply job listing forms if requested. A two-week listing costs $30 to PLA members, $35 to others. Checks payable to PLA Jobline should be sent with the listing. For an additional $10, employers may telephone the listing to the PLA office, 312-944-6780 (ext. 412). The PLA jobline can accept only equal opportunity jobs in public libraries.

American Libraries' LEADS Section will continue to offer its services for published listings in all areas of library employment.

ACRL/PLA workshops to unite librarians and humanists

The Association of College and Research Libraries and the Public Library Association have received a $209,436 National Endowment for the Humanities grant to conduct cooperative humanities workshops throughout the country in 1984 and 1985.

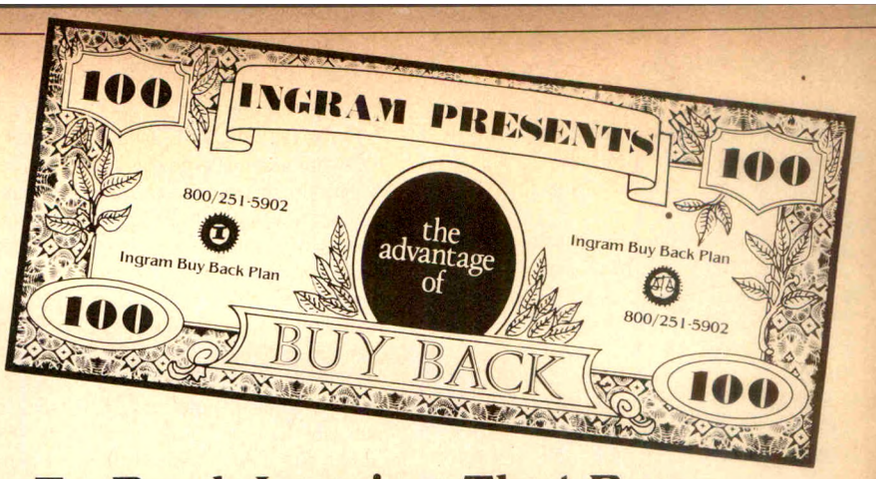
Six two-day regional workshops will be held to bring public and academic librarians and humanist scholars together for the purpose of cooperatively planning humanities programs and attracting funding.

Forty-five applicants (15 teams) will be accepted for each workshop, with preference given to teams of one public librarian, one academic librarian, and one faculty humanist. Librarians are encouraged to bring a

Ingram

Presents

BUY BACK . . .



The Alternative To Book Leasing That Pays

- The Ingram BUY BACK Plan allows you to buy hardcover and quality paperback titles in quantities needed to meet strong reader demand without adding any unnecessary multiple copies to your permanent collection.

- Hardcover and quality paperbacks you purchase from Ingram are eligible for return up to 18 months from purchase date. Each eligible title returned in reusable condition is credited at 10% of its original list price. This allows you to apply the credits from the books you no longer need toward the purchase of additional titles.

- Free Ingram *ReadySystems* microfiche and reader is provided to every BUY BACK participant. Produced weekly, this microfiche does more than you might realize at first glance. It lets you know how many copies of each title Ingram has in stock as well as the number we have on order with the publisher. When you see how heavily Ingram has purchased specific titles, it gives you a strong indicator of the patron demand you can expect. Ingram also keeps pricing information accurate and up-to-date, which in turn helps you control your budget.

- *ReadySystems* microfiche also contains the latest information about author tours, publicity promotions, television and media tie-ins for books, best seller lists, and other publishing facts which greatly affect reader demand. Ingram microfiche helps you anticipate that demand and prepare your collections before patrons queue up at your circulation desks or fill your reserve files.

- Ingram BUY BACK plan requires no contract or time commitments. You are never under any obligation to make returns. Ingram merely gives you that option—and pays you for using that option.

- Ingram BUY BACK. It pays.

For more information, write or call today.

scholar who can be involved in future projects in their regions. The participants will receive lodging and meals at the workshop site and a travel subsidy of up to $150 per participant.

The workshop dates, locations, and application deadlines are: Madison, Wis., Oct. 17–19, deadline past; Santa Barbara, Calif., Dec. 12–14, apply by Oct. 31; Lexington, Ky., Mar. 13–15, apply by Jan. 31; Baltimore, Md., May 1–3, apply by Mar. 22; White Sulphur Springs, W. Va., Aug. 28–30, apply by June 28; and Northwestern/Mountain Plains region (site not selected), November 1985, apply by Sept. 27.

The project directors are Shirley Mills-Fischer, PLA executive director, and Barbara Macikas, ACRL Continuing Education Officer. For more information and application forms write or call ACRL, NEH project, at ALA Headquarters.

ALANET offers ABI/INFORM and ALA bulletin board

ABI/INFORM, a database providing worldwide coverage of business and management information appearing in more than 650 publications, is now available through ALANET, the American Library Association electronic mail and information service. ITT Dialcom, Inc., of Silver Spring, Md., which provides ALANET's computer services, recently added ABI/INFORM to its growing number of database services.

The ABI/INFORM database consists of 200-word abstracts of articles on such topics as data processing and information management, marketing, telecommunication, and all aspects of management. It can be used to locate business case studies, competitive information and trends, or specific industries. Full texts can also be ordered through Dialcom. Access to ABI/INFORM for ALANET subscribers is $28.50 per hour, plus the connect-time rate of $17 per hour; rates are $13 per hour at off-peak times.

Joel Lee, ALANET Systems Manager, announced that the network-wide electronic bulletin board began operating late in June. The bulletin board allows ALANET participants to post announcements, exchange ideas, and help solve practical problems in a variety of categories. To post or read notices, participants can call for such topics as fundraising, microcomputers, solutions wanted, and youth ideas. Users are encouraged to suggest new categories.

Lee says ALANET is the fastest-growing network in the library field, with more than 550 mailboxes activated since it began in January. For more information contact Joel Lee, ALANET Systems Manager, ALA Headquarters Library.

Chicago attorney Nancy Herman appointed to OIF post; Hazel Rochman joins *Booklist*

Attorney Nancy Herman of Chicago was named Assistant Director of the Office for Intellectual Freedom in May, and attended her first Annual Conference in Dallas.

Herman has worked with Herman and Johnson, a civil law firm she established in 1979, and as a law clerk for the Legal Assistance Foundation and the Cook County Public Defender's Office.

Herman received her J.D. from ITT/Chicago-Kent College of Law and has studied at universities in Greece, France, and Israel.

At OIF, she writes and edits the *Memorandum* and the *Freedom to Read Foundation News*. She also serves as staff liaison to the Intellectual Freedom Round Table.

• Certified School Librarian Hazel Rochman joined the *Booklist* staff Sept. 1 as Assistant Young Adult Books Editor.

Born in Johannesburg, South Africa, where she worked as a journalist, Rochman has taught English in Leeds and London, England. She earned an MA in Teaching at the University of Chicago and had served as librarian at the University of Chicago Laboratory Schools since 1976.

JMRT and Baker & Taylor spread $8,500 in grassroots grants

Thirty-four library students across the nation will attend state or regional library association conferences this year as winners of Baker & Taylor/JMRT Grassroot grants.

The students, who will each receive $250, are chosen by the states or districts. The winners are: *Alabama*—Minette D. Bodenhamer of North Birmingham, *Alaska*—Joyce Jenkins of Petersburg, *Arkansas*—Kathy Buchanan of McDougal, *Connecticut*—Christopher Templeton of New Haven, *District of Columbia*—Martha Scheel of Washington, D.C., *Florida*—Tom Wrenn Sloan of Tallahassee, *Georgia*—Gail Garfinkle of Atlanta, *Illinois*—Cheryl Bernero of Champaign, *Indiana*—Eileen Deirdre Burkett of Bloomington, *Iowa*—Mandy Lynn Kirchner of Iowa City, *Kansas*—Sylvia Reimer of Emporia, *Louisiana*—Angela P. Baskin of Downsville, *Maryland*—Carla Kaessinger Coupe of Wheaton, *Mississippi*—Laura Gilham of Hattiesburg, *Missouri*—Carmen King of Columbia, *Nebraska*—Grace Jackson-Brown of Emporia, *New Hampshire*—Robert Reinhard of Suncook, *New Jersey*—Anne Glasser of Westfield.

Also, *New York*—Eileen King of New York City, *North Dakota*—Judy Gram of Grand Forks, *Ohio*—Kent Mulliner of Athens, *Oklahoma*—Sharon June Taylor of Norman, *Oregon*—Joan Roberts of Lake Oswego, *Rhode Island*—Scott G. Carlisle of Kingston, *South Carolina*—Paul Michael McCulley of Columbia, *Texas*—Marilyn Sewell of Arlington, *Utah*—Larry Rex Skidmore of Provo, *Vermont*—Tamara Durfee now of New York City, *Virginia*—Susan Lee White of Richmond, *Washington*—Linda Wooster of Puyallup, *West Virginia*—Kimberly Sanetrik of Pennsboro, *Wisconsin*—Gregg Grisa of New Berlin, *Wyoming*—Sunny Ellen Munns of Casper, *Mountain Plains*—Mary Jensen of American Fork, Utah.

Your input requested

• The Public Library Association is soliciting program proposals for its 1986 national conference on "Public Libraries: Gateways to Growth." The program ideas should relate to public library services and appeal to the broad spectrum of public libraries. The conference will be held in St. Louis, Mo., April 2–5, 1986. The deadline for submitting proposals is Nov. 2, 1984. For proposal forms and additional information, contact Penny Spokes, PLA, at ALA Headquarters.

• Dec. 15 is the deadline for nominations for the new PLA Leonard Wertheimer Multilingual Award, to be granted to a person, group, or organization for enhancing and promoting multilingual public library services. For more information, contact PLA.

• The Government Documents Round Table Notable Documents Committee is compiling the third annual Notable Documents List and seeks suggestions for inclusions. Send your suggestions with full bibliographic information and justifications to Ed Herman, Government Documents Dept., Lockwood Library, SUNY/Buffalo, Amherst, NY 14260.

• The Young Adult Services Division is looking for artists aged 13 to 18 to design a cover for its annual list of outstanding books

for young people. The design should be 9-by-3¾ inches and include the words "Best Books for Young Adults 1984." The artist's name, age, school, and home address must be on the back of the design. YASD urges librarians to hold cover-design contests and generate entries for the competition. The winning artist will receive $50. Send designs by Dec. 1 to Betty Carter, 2310 Lexford Lane, Houston, TX 77080.

• The Genealogy Committee of the Reference and Adult Services Division History Section plans to alert librarians to the potential use of computers in genealogy with a half-day program at Annual Conference in Chicago. The committee invites experts to submit program proposals on aspects of institutional or personal computer applications to genealogy, including drawbacks, problems, and failures. The presentations should be 30 minutes long and may include demonstrations to groups of up to 30 persons after an address to a larger audience. Proposals should be submitted by Dec. 1 to Charles Clement, program chair, 50 E. North Temple, Salt Lake City, UT 84150.

• The Library Administration and Management Association Fundraising and Financial Development Section seeks cosponsors for a regional one-and-a-half day institute on "Fundraising for Libraries." The institute was designed and will be presented by Al Milano, former New York Public Library development director, who masterminded LAMA's fundraising preconferences at the Dallas and Los Angeles conferences. "Fund Raising for Libraries" is the third LAMA regional institute available to cosponsors, joining "Management of the Online Catalog" and "Getting on the Air." For more information about the institutes and cosponsorship, contact Roger H. Parent, LAMA, at ALA Headquarters.

LAMA has announced that beginning with the January 1985 issue, the quarterly *LAMA Newsletter* will accept display advertising from library vendors. The deadline for placing ad reservations in that issue is Oct. 18. For rate and circulation information contact Mary E. Swenson, *LAMA Newsletter*, at Headquarters.

Hot off the presses

The following new publications may be obtained from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611. For details, write Paul Kobasa.

Midwinter Placement Service

The ALA Office for Library Personnel Resources is providing a placement service at the 1985 Midwinter Meeting in Washington, D.C., in the Shoreham Hotel, Exhibit Hall, Lower Level.

Hours of operation will be: Sat., Jan. 5, noon–5 p.m.; Sun., Jan. 6, 9–5 p.m.; Mon., Jan. 7, 9–5 p.m.; and Tues., Jan. 8, 9–2 p.m.

The deadline for preregistration is Dec. 18, 1984. To request forms (indicate employer or job seeker), contact OLPR/ALA, 50 E. Huron St., Chicago, IL 60611 or call 312-944-6780, ext. 293. Enclose a SASE (no. 10) for a single copy, and a mailing label for multiple copies.

TIMELY REPORTS from LTR

The Online Public-access Catalog in 1984: Evaluating Needs and Choices

By EMILY G. FAYEN

A state-of-the-art review with descriptions of a dozen currently available systems by a leading expert who is responsible for the highly acclaimed online catalog at Dartmouth College.

—in the same issue—

The IBM PC and the IBM PC/XT

By AUDREY N. GROSCH

An evaluation of two very popular microcomputers from a library automation perspective. Also discusses the so-called compatibles and summarizes the profession's assessment.

—both in the January/February 1984 issue of LTR—
Volume 20, Number 1, $40.00

SELECTED RESOURCES FOR CURRENT AWARENESS

The Source highlights useful items in major areas of library/information activity. Send materials to department editor Gordon Flagg, American Libraries, 50 E. Huron St., Chicago, IL 60611.

preserv/conserv/ation

LC offers preservation slide show. The Library of Congress National Preservation Program Office has produced "Handling Books in General Collections," a 10-minute slide-tape show directed to staff working with general (nonrare) book collections. In 82 slides and one cassette tape, the show covers shelving for standard-size and oversize books; techniques for removing and replacing books on shelves; and correct methods for transporting, general handling, and photocopying of books. The show may be borrowed from LC under the terms of the Audiovisual Loan Program.

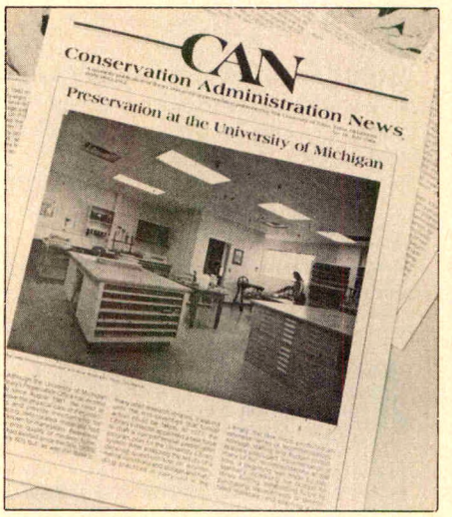
For information on scheduling and shipping, contact the LC Preservation Office, National Preservation Program Office, Audiovisual Loan Program, Washington, DC 20540, or call 202-287-5213.

Recent preservation grants. The Exxon Education Foundation has awarded $1.5 million to the Council on Library Resources for a long-term program to preserve essential holdings of American research libraries. The Council is using the grant to fund a Mid-Atlantic preservation center, develop national strategies for preservation, and devise an information program to gain public support for preservation.

- The Southeastern Library Network (SOLINET) has received $168,401 from the National Endowment for the Humanities to develop a cooperative preservation program among libraries and archives in the southeastern states. The program will provide information, training, field service, and disaster assistance to local preservation activities and will also consult with regional and national preservation efforts. The SOLINET staff will monitor new preservation technologies and also determine whether existing preservation services in the southeast can be coordinated.
- Ten Association of Research Libraries members will conduct the newly developed ARL Preservation Planning Program self-study in their institutions as a result of a $65,375 grant from the National Endowment for the Humanities to ARL. Grant support continues until June 1986 and three or four libraries will begin the project every six months during that period. The ten libraries selected from the demonstration projects were to be announced in early fall.

The ARL Preservation self-study program typically takes six to nine months to complete. During the project, library staff members assess the degree of deterioration of collections, evaluate the effectiveness of their library's current preservation activities, and devise ways to expand and improve those activities. Staff members then prepare a detailed three-to-five-year plan for local preservation program development.

Results of all the projects will be accessible to the general library community. Manuals and resource notebooks used in the preservation self-study program are available for $30 prepaid from the ARL Office of Management Studies, 1527 New Hampshire Ave., N.W., Washington, DC 20036 (202-232-8656).



***CAN* expands.** *Conservation Administration News*, a quarterly publication devoted to library and archival preservation, has appointed a managing editor and added 10 regional/national reporters to expand its content and geographical coverage. Toby Murray, archivist and preservation officer of the University of Tulsa (Okla.) Libraries, is the new managing editor; Robert H. Patterson, director of UT Libraries and founder of *CAN*, continues as editor.

Geographical coverage now includes Australia, Canada, Germany, Britain, and Japan, as well as IFLA and all areas of the U.S. *CAN* now features regular columns on cooperative preservation programs, a who's who in preservation, and a question-and-answer section.

CAN is $18 per year from Richard P. Kearns, *CAN* business manager, McFarlin Library, The University of Tulsa, 600 S. College Ave., Tulsa, OK 74104.

RLG offers preservation union list. Citations for microfilm master negatives and printing masters for over 25,000 works held in Research Libraries Group libraries appear in the *RLG Preservation Union List*. The *List* is a set of 48:1 reduction diazo microfiche accompanied by explanatory documentation. It is the result of two preservation projects in which RLG members have entered records for microfilm masters in the RLIN database since 1981.

Using the information in the *List*, librarians can obtain service copies of master microforms from the participating RLG institutions, subject to copyright restrictions. Complimentary copies of the publication are available as long as the supply lasts from Christina Schmehl, RLG publications clerk, The Research Libraries Group, Inc., Jordan Quadrangle—Oak, Stanford, CA 94305.

Rare jazz recordings preserved. Rutgers University's Institute of Jazz Studies has received a $133,807 grant from the National Endowment for the Humanities for a two-year project to transfer approximately 800 rare recordings to archival quality audio tape using state-of-the-art sound restoration equipment. The recordings include 16-inch, glass-base acetate transcriptions of radio broadcasts; safety acetates of World War II V-disc sessions; and private recordings of concerts, broadcasts, interviews, and conferences. The contents of the recordings will be documented during the recording process and the roughly 4,000 performances will be cataloged online and included in the *IJS Jazz Register and Indexes*.

The grant will also be used to prepare the institute's clipping files for eventual preservation on microfilm. The project will include sorting and arranging the clippings, copying deteriorating materials, and developing a long-term preservation and microfilming plan.

U. Toronto surveys collection. *Preservation of Library Material: A Report of the Collection Preservation Committee* describes the methodology used by the University of Toronto in a computer-generated random sampling collection survey. The report also includes proposals for restoration and maintenance of the collection, a summary of recommendations, and estimated costs. $5 prepaid from M. Davison, Chief Librarian's Office, University of Toronto Library, 130 St. George St., Toronto, ON M5S 1A5 Canada.

school media

Steps to Service: *A Handbook of Procedures for the School Library Media Center* is a practical guide to basic technical and public service functions for library school students, beginning professionals, paraprofessionals, support staff, and their administrators. Author Mildred L. Nickel has updated her manual to reflect the educational and technological changes since the 1975 first edition, including discussion of computers and new filing rules. Also included are samples of forms, a glossary, updated bibliographies, and a directory of publishers, producers, and suppliers. Approx. 144 p., paper, $9.95 from ALA Publishing

Martin Luther King, Jr.: *A Synopsis* is a set of 20 illustrated broadsides designed to acquaint young people with the civil rights leader. The 14-by-17-inch broadsides feature text and photographs describing King's youth, the Montgomery boycott, the "Letter from a Birmingham Jail," the March on Washington, the Selma-to-Montgomery walk (above), and other highlights of King's career. $25 from Albert P. Marshall, 1616 Gregory St., Ypsilanti, MI 48197.

Services, 50 E. Huron St., Chicago, IL 60611 (84-9368, 0-8389-0387-8).

Management by micro. *Media Center Management with an Apple II* offers school library media specialists a hands-on guide to using a microcomputer to develop a media center management system. Author Janet Noll Naumer describes over 50 commercial database management, statistical, and word processing programs available for the Apple II, with step-by-step instructions and ample illustrations. 250 p., paper, $19.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (84-5769, 0-87287-392-7).

Helping Your Child at Home is a set of four free brochures with practical ideas for parents to help their elementary-aged children with reading, spelling, arithmetic, and handwriting. The suggestions can also be adopted by teachers in the classroom. Send a self-addressed, stamped #10 envelope with 37¢ U.S. postage to The Learning Team, 20 Commercial Blvd., Novato, CA 94947-6191.

"Fun-type" activities, as opposed to the traditional teaching of library skills, improve junior high school students' attitudes toward their libraries and librarians, according to a recent study of eighth-grade classes in 17 Arizona schools. Each class was divided into an experimental group and a control group. The experimental group received 45 minutes each week of discussions, activities, and speakers on such topics as sports, science fiction, World War II, and scary stories; the control group continued with its regular schoolwork.

After six weeks, almost 9 percent more experimental group members than control group members used the library, and the experimental group students used the library 26.7 percent more often than those in the control group. Both groups gave their libraries high ratings, but about 12 percent more from the experimental group gave their libraries a grade of "A." However, the reading attitudes of both groups remained unchanged.

For a copy of the 10-page study send $1 to Isabel Schon, Arizona State University, College of Education, Dept. of Educational Technology and Library Science, Tempe, AZ 85287.

The Nova Teacher's Guide for the fall 1984 season, covering the October–January programs of the popular PBS television science series, is now available. The 24-page guide for high school teachers offers synopses of the programs, viewing goals, discussion topics, suggested activities, vocabulary, and a bibliography. $2 from WGBH Nova Teacher's Guide, POB 2222, South Easton, MA 02375.

Multiethnic literature. *Promoting World Understanding through Literature, K-8* presents annotated reading lists of books providing insights into the customs, values and achievements of selected ethnic groups. The book guide covers blacks, Mexicans and Mexican-Americans, Native Americans, and Eskimos; future volumes will cover other groups, including Asians and Asian-Americans. Authors Mary C. Austin and Esther C. Jenkins also offer suggestions for planning a multiethnic literature program, selecting titles, and using the books in the classroom. 277 p., $22.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-22229, 0-87287-356-0).

The Library Media Program *and the School* is a guide to administering and supervising school media centers. Author D. Philip Baker discusses the instructional philosophy and purpose of school media programs, the teaching role of the media specialist, the effects of technology on media centers, collection development, the budget process, public relations, and serving special constituencies such as disabled and bilingual students. A concluding chapter addresses declining enrollments, finan-

SPECIAL REPORT

Serials Control in Libraries: Automated Options

by JUDY MCQUEEN and RICHARD W. BOSS

Discusses the many problems inherent in serials control and describes the various automated systems currently available. Contains a valuable "Checklist of Data Elements and Functions" for the purpose of identifying the specific serial control needs of a particular library, thus enabling the most appropriate option to be chosen.

The longest issue of LTR published to date, this report will be of immediate interest to libraries of all types and sizes.

cial cutbacks, censorship, and other current issues. 186 p., $19.50 from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (83-17515, 0-87287-385-4).

bibliography

Native American materials. Historic and contemporary publications ranging from the *Cherokee Phoenix* of 1828 to recent titles in the fields of law and energy are listed in *Native American Periodicals and Newspapers, 1828-1982*, edited by James P. Danky and compiled by Maureen E. Hady. Bibliographic information and location sources and holdings are given for 1,164 journals, newspapers, and magazines. The 532-page volume also features a brief history of the Native American periodical press; indexes by subject, editor, publisher, location, catchword or subtitle, and decade published; and 49 full-page cover reproductions. $49.95 from Greenwood Press, 88 Post Rd. West, Box 5007, Westport, CT 06881 (83-22579, 0-313-23773-5).

The *Guide to Research on North American Indians*, by Arlene Hirschfelder, Mary Gloyne Byler, and Michael Dorris, is a select, annotated listing of some 1,100 books, articles, government documents, and other items in 27 fields of study. Most of the selections focus on Native Americans of the U.S., although important works about Canadian, Mexican, and Central and South American natives are included. 330 p., $75 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (82-22787, 0-8389-0353-3).

Guide to the Gothic, by Frederick S. Frank, annotates 2,508 critical articles and books published since 1900 on Gothic fiction. In addition to extensive sections covering the English, American, French, and German Gothic, the 437-page bibliography includes references to works covering Gothic drama and dramatists, parodies of the Gothic, the Gothicism of the Romantic poets, the influence of the Gothic on science fiction and detective novels, and many other areas. $30 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-24507, 0-8108-1669-5).

Design Resources lists English-language books, periodicals, nonprint materials, and other resources on architectural and industrial design. Compiler Lawrence Von Bamford's emphasis is on contemporary design, dating from around the Industrial Revolution to the present. The 3,404 annotated entries cover all aspects of design: historic, aesthetic, technical, theoretical, and philosophical. 336 p., $39.95 from McFarland & Co., POB 611, Jefferson, NC 28640 (83-22251, 0-89950-102-8).

Folklore file. The Archive of Folk Culture at the Library of Congress maintains a file of brief bibliographies and other finding aids dealing with about 200 different subjects in the fields of folklore, folk music, and ethnomusicology. Copies of a 12-page inventory of the lists—as well as the bibliographies themselves—are available upon request from Joseph C. Hickerson, Head, Archive of Folk Culture, Library of Congress, Washington, DC 20540.

"Bibliographies for the 80s" is what Vantage Information Consultants is calling its new CompuBibs series. The first four titles in the series of paperback, annotated bibliographies on current topics are: *Robotics, 1960–1983*, by Andrew Garoogian, listing newspaper and magazine articles and government publications on the industrial, educational and home applications of robots (119 p., $16.50); *AIDS, 1981–1983*, by Rhoda Garoogian, covering books and articles from newspapers, popular magazines, the gay press, and non-technical scientific and medical journals (92 p., $15); *Surrogate Parenting*, by Sara Robbins, dealing with legal, medical, and moral issues and including lists of judicial decisions, legislative activity, and organizations involved in the issue (40 p., $10); and *Computer-Assisted Litigation Support*, by Charlotte L. Levy, listing books and legal and general periodical articles on the use of computers to gather data in support of cases (31 p., $10).

Many of the articles listed in the bibliographies are available directly from CompuBibs

HOW LONG WOULD IT TAKE TO ACQUIRE ANNUAL REPORTS FOR 3,000 KEY NON-U.S. COMPANIES?

AS LONG AS IT TAKES TO MAKE ONE PHONE CALL.

No more time-consuming inquiries to individual companies.

Now just one phone call to UMI can put you in touch with full-text annual reports for leading corporations from 40 countries, 6 continents, and 26 industry groups.

Choose the complete 3,000-reports set or a customized collection. Beginning with fiscal year 1983. For as low as $1.00 per company with a charter subscription. In convenient microfiche.

And all the text is completely legible or your money back.

Why wait? All it takes is one phone call.

video

Television Higher Education: *Catalog of Resources* is a descriptive listing of 1,079 videotaped postsecondary-level courses in 23 subject areas. The courses were produced by over 200 colleges, private businesses, professional associations, and television stations. Entries give course descriptions, prerequisite skills, instructor, producer, distributor, and cost of rental or purchase. Courses are indexed by subject, title, and producer. The 349-page paperback is $65 from the Publications Secretary, Western Interstate Commission for Higher Education, P.O. Drawer P, Boulder, CO 80302.

Editor's note. *Video Editing and Post-Production: A Professional Guide,* by Gary H. Anderson, is the latest entry in Knowledge Industry Publications' Video Bookshelf series. The 170-page manual contains sections on the history, technology, and techniques of video editing; preparing for post-production; the off-line and online editing processes; digital video effects; and future trends and directions. $34.95 cloth, $24.95 paper from Knowledge Industry Publications, 701 Westchester Ave., White Plains, NY 10604 (0-86729-070-6).

Ballet on video. Maya Plisetskaya is prima ballerina in the Bolshoi Ballet production of Tchaikovsky's *Swan Lake,* one of eight Russian ballet films available on videocassette from Video Arts International, POB 153, Ansonia Station, New York, NY 10023. The company plans to expand its line in the near future with the release of two full-length operatic performances.

Through history on video. Learning Corporation of America, a producer and distributor of educational media, is now making 38 productions on American and world history available to libraries and schools on videocassettes at prices substantially less than those of the original 16mm films.

The 30-minute presentations feature well-known actors recreating key events and historical turning points. The use of academic consultants and location shooting around the globe, from the Holy Land to Ellis Island, add to the productions' authenticity. Each VHS or Beta videocassette is $49.95, with a 30-day examination policy. For an illustrated brochure describing the series, write Learning Corporation of America, 1350 Avenue of the Americas, New York, NY 10019.

M.D. TV. *First Image,* subtitled "The Video Journal of Medicine," is a monthly publication on videocassette covering the field of obstetrics and gynecology. The premier issue features stories on in-vitro fertilization and embryo transfer, a round-table discussion, and coverage of the annual meeting of the American Fertility Society.

"I believe this journal establishes a new dimension in medical journalism," said Editor-in-Chief Stuart Silverberg, M.D. "It gives subscribers the ability to see the work and hear the views of leading authorities in their specialities in a way that has not been possible in print journals or audio programs alone."

For more information on *First Image* write Frye Adamson Marosits, Inc., 5500 S. Syra-

Software Showcase:

Readability program measures grade levels

Many formulas have been developed to determine the difficulty level of reading material. These readability formulas all involve counting such components of the text as syllables and sentences to compute a reading grade level indicating its complexity.

The Readability program simplifies this time-consuming process by automatically measuring the grade level of text material. Developed by Michael Schuyler, assistant to the director of the Kitsap Regional Library in Bremerton, Wash., the program analyzes passages for difficulty and calculates the grade level according to nine different formulas used by educators, publishers, and librarians. The formulas offered in the current version of the program are: Dale-Chall, Fry, Flesch, Flesch-Kincaid, Fog, ARI, Coleman, Powers, and Holmquist.

Schuyler warns that readability formulas only tell part of the story. "Counting syllables and other empirical variables does not measure motivation nor interest level of the reader," he says. The Readability program frees the user from rote counting and mathematical calculations and allows educators to concentrate on interest and motivation factors.

The program is available for the Apple II and IBM PC computers. In the Apple version, text is input one line at a time at screen prompts. The data is then tabulated and raw scores and results of the nine formulas are given (Figure 1). The program then presents two graphics screens: The first depicts a Fry Graph plotting syllables per 100 words against sentences per 100 words; the second is a composite of all nine formulas, allowing ready comparison (Figure 2).

Text input may be segmented to obtain intermediary scores on portions of the text, and work in progress may be interrupted and saved on the disk.

The IBM version differs from the Apple in two ways. First, the PC's larger memory enables it to run the program much faster. The IBM version also has an option permitting input of text previously typed using a word processor; this allows measurement of the entire file rather than just a sample, resulting in a more valid measurement.

The Apple II version is priced at $44.95 and the IBM PC version at $49.95. For more information write Micro Power & Light, 12820 Hillcrest Rd., Suite 219, Dallas, TX 75230.

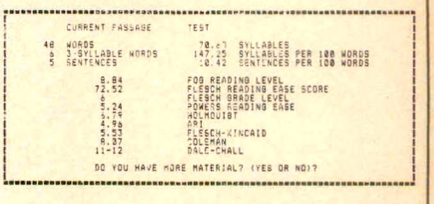

Figure 1: Analysis of the text, including the results of the nine formulas.

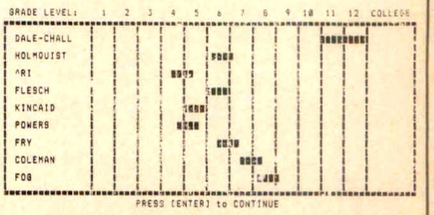

Figure 2: Composite graph allowing comparison of all nine formulas.

Education, overseas.

See also adventure, community involvement, state-of-the-art facilities, student enthusiasm, travel.

At American and international schools around the world, librarians provide more than information services. In Borneo, Tokyo, Geneva, and Khartoum, local English-speaking libraries are also primary sources of recreation and community enrichment programs.

For thirty years, ISS has been placing qualified librarians in overseas schools. Become a vital community resource—work overseas.

1979 and 1985, will be Catherine Loeb, Susan Searing, and Esther Stineman.

Another NEH grant has gone to New York University's Bobst Library to organize the papers of Elizabeth Robins, a playwright, actress, feminist, and novelist involved in social change issues in the late 19th and early 20th centuries. The diaries, letters, manuscripts, photographs, and published works are now kept in crates, trunks, and cardboard boxes due to a lack of funding to process the materials. The one-year, $41,689 grant will go toward hiring an archivist and an assistant to organize the collection and compile a guide to its contents.

resources

American politics: *The Presidential-Congressional Political Dictionary,* by Jeffrey M. Elliot and Sheikh R. Ali, contains detailed definitions of over 300 terms dealing with the executive and legislative branches of the federal government. Entries are grouped into 12 chapters—six for the presidency and six for Congress—covering such areas as presidential and congressional powers, presidential leadership, Congress and the electorate, the committee structure, and rules and procedures. An appendix offers flow charts on how a bill becomes a law, diagrams showing governmental structure, and other tables, and a detailed subject index provides additional access to the entries. 365 p., $28 cloth (0-87436-357-8), $15 paper (0-87436-358-6) from ABC-Clio Information Services, Riviera Campus, 2040 A.P.S., Box 4397, Santa Barbara, CA 93103 (84-6316).

Shakespeare's contemporaries. *The Figurative Language of the Tragedies of Shakespeare's Chief 16th-Century Contemporaries: An Index* analyzes the language of 30 plays by Christopher Marlowe, Thomas Kyd, George Peele, and other Renaissance dramatists. The main, author-by-author index lists citations by key words and phrases; a cross-index is divided into subject subdivisions under seven categories: animals, arts, body and bodily action, daily life, domestic, learning, and nature.

A companion volume to compiler Louis Charles Stagg's earlier index covering 17th-century dramatists, the 1,046-page volume is $104 from Garland Publishing, 136 Madison Ave., New York, NY 10016 (82-49173, 0-8240-9176-0).

The Twentieth Century: *An Almanac* is a day-by-day account of important political events occurring from 1900 through 1983. Advances in technology and medicine, contributions in literature and the arts, and significant changes in lifestyle and customs are listed at the end of each year's entries. The 512-page chron-

icle also includes 250 black-and-white illustrations and maps. $24.95 from World Almanac Publications, 200 Park Ave., New York, NY 10166 (0-345-31708-4).

Charlie Parker, shown above with a young Miles Davis on trumpet, is among the "Jazz Masters" profiled in a new series of books detailing the careers of leading figures in the history of jazz. The first four titles in the series are *Charlie Parker,* by Brian Priestley (0-88254-906-5), *Dizzy Gillespie,* by Raymond Horricks (0-88254-908-1), *Billie Holiday,* by Burnett James (0-88254-907-3), and *Gil Evans,* by Raymond Horricks (0-88254-909-X). Each small, hardcover volume contains approximately 95 pages, including 20 pages of photographs, and features a selected discography. $6.95 each from Hippocrene Books, 171 Madison Ave., New York, NY 10016.

collections

A collection of ornithological and other natural history works consisting of some 6,000 volumes and valued at over $1.2 million has been given to the Watkinson Library of Trinity College in Hartford, Conn. The collection, assembled by Connecticut banker and Watkinson Library trustee Ostrom Enders over a period of 50 years, is strong in rare colored-plate books and includes many scientific texts and periodicals. Among the titles, which date back to the early 17th century, are a chromolithograph of *The Birds of America, From the Original Drawings of John James Audubon,* issued in 1860 by Audubon's son; the six-volume *Histoire Naturelle des Oiseaux D'Afrique* (1802–08) by Francois Le Vaillant; Georges Louis Leclerc Buffon's *Histoire Naturelle des Oiseaux* (1770–85); and Audubon's *The Viviparous Quadrupeds of North America* (1845–48).

A 276-page bibliography listing the Enders collection and other Trinity ornithology holdings is available for $35 from Karen Clarke, Assistant Curator for Ornithology, Watkinson Library, Trinity College, Hartford, CT 06106.

The Bard at Brandeis. The Brandeis University Libraries have purchased the 4,600-volume collection of T.W. Baldwin, a University of Illinois Shakespeare scholar who died in January. The new acquisition includes over 200 18th- and 19th-century Shakespeare editions as well as hundreds of secondary works from the 19th and 20th centuries, supplementing the university's already strong Shakespeare collection. The most valuable works in the Baldwin collection are two 1709 Rowe editions of Shakespeare's complete works, one valued at $2,700 and the other at $2,000.

Special collections in OCLC. *A Guide to the OCLC Database and the Special Collections Therein* describes 267 special collections at 137 OCLC member institutions, from the Reeve Fox Hunting Collection at the Athenaeum in Philadelphia to the Tennessee Valley Authority's fertilizer collection.

The guide also includes brief descriptions of the cataloging formats for materials in the OCLC database, information on national programs in which OCLC participates, and vignettes on the database's holdings of Shakespeare and Bach.

The 88-page paperback is $2 prepaid from OCLC, Dept. 630, Box ONB, Columbus, OH 43265. OCLC members only may be billed by sending their OCLC symbol and network affiliation to OCLC, Documentation, 6565 Frantz Rd., Dublin, OH 43017-0702.

Guide to Latin American Pamphlets is an index to over 12,000 pamphlets in the Yale University Library's Latin American collection documenting political, economic, and social conditions in the region during the 18th, 19th, and early 20th centuries. The six-volume guide is organized into 110 subject categories covering foreign policy, politics, education, science, law, historical events, popular culture, and rural conditions. The pamphlet collection itself will be available on microfiche in 1985.

The guide is $395 until Dec. 31 and $495 thereafter from Clearwater Publishing Co., 1995 Broadway, New York, NY 10023.

"Literary Gifts" of inscribed books from the New York Public Library's Berg Collection on English and American Literature will be on exhibition at NYPL's Central Research Library from November 16 through May 1985.

The 113 items on exhibition will include presentation copies given and inscribed by the author to a fellow author, such as the copy of Charles Dickens' *A Christmas Carol* given to Thomas Carlyle, Oscar Wilde's *Salome* given to George Bernard Shaw, Longfellow's *Kavanagh: A Tale* given to Hawthorne, and Thoreau's *A Week on the Concord and Merrimac Rivers* given to Emerson.

Among the dedication copies (books inscribed to the person to whom the work is dedicated) on view will be the copy of Lewis Carroll's *Alice's Adventures in Wonderland* for Alice Liddell, the original Alice. The dedication copy of Edgar Allen Poe's *The Raven* will be displayed with the letter Poe received from Elizabeth Barrett Browning thanking him for the dedication and praising his ability "of making horrible improbabilities seem near and familiar." □

More than movies. An "Alternative Video" catalog listing over 500 cultural, educational, sports and fitness, music, and children's videocassettes—anything other than movies—is available from Stefaan Janssen Studio, 4615 N. Lincoln Ave., Chicago, IL 60625. "A growing number of people want to use their VCR more than just as a "movie machine," says Janssen, "and alternative video fills that need." The 16-page, illustrated catalog, which costs $2 (refundable with your first purchase), also lists selected laserdiscs and books complementing the video programs.

librarian's library

Working with Library Consultants puts the consulting process into perspective for managers considering bringing in a consultant, as well as for librarians thinking of becoming consultants themselves. Authors Beverly Rawles and Michael Wessells describe the professional skills and personal characteristics required of consultants and explain how to determine whether a consultant is needed, how to develop a request for proposal and negotiate a contract, and how to select the best consultant for the job. They also explore alternatives to hiring a consultant and describe various consulting specialities: automation, systems development, building set-up, staff development, public relations, and collection development and appraisal. 238 p., $24.50 cloth (0-208-02018-7), $14.50 paper (0-208-02019-5) from Shoe String Press, POB 4327, Hamden, CT 06514 (84-7942).

Rewriting history. The new, compact textbook edition of Michael H. Harris's *History of Libraries in the Western World* has been updated and revised in the light of recent scholarship. The volume traces the development of libraries back to Babylon and Assyria in the fourth and third millennia B.C., through the Middle Ages, up to contemporary American and European libraries. The end-of-chapter bibliographies found in the 1976 third edition have been shortened and updated, and some detailed sections of the text have been deleted in order to make the work a more effective overview of the subject. 295 p., $15 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-20133, 0-8108-1666-0).

Interlibrary loan procedures. The *Interlibrary Loan Practices Handbook,* by Virginia Boucher, describes ILL procedures for both borrowing and lending libraries. The 195-page paperback manual contains advice on filling out ILL forms, shipping materials, copyright considerations, dissertations and theses, interlibrary cooperation, international ILL, and other areas. Appendixes offer sample forms and model ILL codes, policies, and guidelines; a bibliography lists 145 verification sources with abbreviations. $20 from ALA Publishing Services, 50 E. Huron St., Chicago, Il 60611 (83-21359, 0-8389-3298-3).

Canadian consultants. *Who Knows What* is a directory of Canadian "library-related expertise": consulting librarians, computer specialists, architects, and other consultants who are particularly interested in applying their expertise to library problems. The 139 entries give each consultant's address, present position, specialties, experience, previous clients, career history, education, publications, and other information. The 174-page paperback, the first in a proposed biennial series, includes geographic and subject indexes. $20 from the Canadian Library Association, 151 Sparks St., Ottawa, ON KIP 5E3 Canada.

women

A demographic portrait of women in the U.S. over the last 30 years is offered in *American Women: Three Decades of Change,* a new study from the Census Bureau. The report depicts trends in marriage, divorce, childbearing, income, education, and employment.

Among the report's findings: participation in the work force has increased from one-third of all adult women in 1950 to one-half in 1980; college enrollment and higher degree attainment by women has also increased; and women

Books that Won't Croak Before Their Time.

At Bound To Stay Bound, we think children's books should hold up as long as the kids who read them. That's why we prebind our books to rigid LBI standards for the greatest circulation possible. Then we inspect each one to make sure it meets our own high standards of quality and durability. With their sturdy buckram bindings, BTSB books will survive over 100 circulations, five times longer than a publisher's edition, substantially reducing your cost per reader.

BTSB understands the special needs of our customers. That's why for the past 64 years, we've been providing libraries with services as reliable as the books we bind. Today these include complete book processing, processing kits and catalog cards; as well as lower prices for volume purchases; discounts for BTSB Book Club members; and free pre-order computer lists of your titles.

For more information on how your library can leap ahead with savings, write today for our free service brochure and 1983-'84 general catalog, listing almost 17,000 in-stock titles.

in the work force still earn less than men, which contributes to the poverty-level rate of single-parent families headed by women.

The 39-page, paperback publication is $3.50 prepaid from Dept. 36-GQ, Superintendent of Documents, Washington, DC 20402 (stock no. 003-024-05743-3).

The Musical Woman: 1983 is the first volume in a proposed series chronicling women's achievements as composers, conductors, critics, scholars, and entrepreneurs—all aspects of music except solo performance.

Each volume will contain a gazette section listing events by country and year in such categories as composers' honors and awards, important performances, published music, contest and competition winners, and conferences and festivals (the premier volume covers 1980–82). An essay section features 15 original articles covering the music business, featured musicians, genre surveys, music education, and other areas. 406 p., $49.95 from Greenwood Press, 800 Post Rd. West, Box 5007, Westport, CT 06881 (83-1637, 0-313-23587-2).

Scarecrow and Ms. King. Scarecrow Press recently published Betty King's *Women of the Future: The Female Main Character in Science Fiction*. Following an introductory chapter giving a historical perspective of the genre from the 1818 publication of Mary Shelley's *Frankenstein* through 1929, King presents annotated, decade-by-decade lists of women main characters, including descriptions of their characteristics and story particulars. Three indexes give access to the entries by characteristics of the characters (age, personality traits, physical appearance, etc.), story particulars (location, theme, time setting) and author/title. 295 p., $18.50 (82-20130, 0-8108-1664-4).

Two other recent Scarecrow releases deal with women who are artistic creators rather than creations. *Women Composers and Hymnists*, by Gene Claghorn, contains brief biographies of over 700 women hymnists and composers of church and sacred music from the 12th century to modern times. 288 p., $22.50 (83-20429, 0-8108-1680-6). *Women Filmmakers*, by Louise Heck-Rabi, features lengthier biographical and critical studies of 11 directors of narrative, documentary, and experimental films. 392 p., $27.50 (83-20070, 0-8108-1660-1). Scarecrow's address is POB 656, Metuchen, NJ 08840.

Women's studies bibliography update. The National Endowment for the Humanities has awarded a $46,569 grant to the Women's Studies Librarian-at-Large for the University of Wisconsin System to prepare a five-year supplement to *Women's Studies: A Recommended Core Bibliography* (Libraries Unlimited, 1979). Collaborating on the project, which will cover publications issued between late

NCLIS/SLA TASK FORCE REPORT

The Role of the Special Library in Networks and Cooperatives
Executive Summary and Recommendations
1984 / 32 p. / ISBN 0-87111-310-4 / **$5**

This terse, concise booklet presents the executive summary and the thirteen recommendations of the NCLIS/SLA task force on the role of the special library in networks and cooperatives. Containing forewords by the chairman of NCLIS and the president of SLA, as well as a chart displaying the recommendations implementation schedule prepared by the task force, this booklet provides librarians with the information they'll need to prepare themselves and their library for changes in the world of information.

WHO'S WHO IN SPECIAL LIBRARIES 1984/1985

December 1984 / Approx. 416 p. / ISSN 0278-842X softcover / **$16.50**

The 1984/85 edition of *Who's Who in Special Libraries* has been redesigned to make it an even more valuable sourcebook. The directory now provides a complete listing of members under subject interest, phone numbers for quick reference, and an employer index. The alphabetical and geographic lists of members have been retained to serve as handy cross-references. *Who's Who* now supplies you with information to make contact—quickly,easily,directly.

MAPPING YOUR BUSINESS

Barbara Shupe, Map Librarian, SUNY Stony Brook
Colette O'Connell, Engineering Librarian, Rensselaer Polytechnic Institute
193 / 96 p. / ISBN 0-87111-307-4 LC 83-14729 / **$14.50**

Maps contain a wealth of untapped information for business professionals—on population/income, sales, marketing, communications. The authors discuss the practical, useful information maps display, and they describe the numerous depositories that store them. They also supply a comprehensive list of federal, state and municipal map sources, as well as map publishers, distributors and jobbers.

READINGS IN TECHNOLOGY

Nancy M. Viggiano, Editor
1984 / 204 p. / ISBN 0-87111-297-3 / **$16.50**

If you want to know where we are and where we are going, this is the book for you. *Readings in Technology* gives insight into the impact of technology on society, tells how to manage technology and the change it is bringing, and provides the background everyone needs on systems.

Following an introduction by SLA's executive director, noted specialists discuss such topics as success factors, the telelibrary, microcomputers, costs and benefits, database development and user evaluations, nonbibliographic databases, utilities and much more. You will need this book in your library.

Write for our publications catalog, which contains a complete list of the information resources available from SLA.

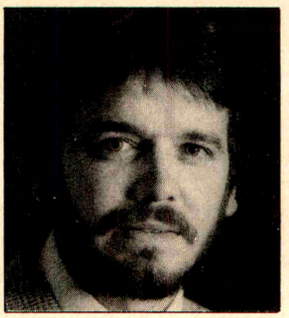
Paula N. Warnken



P. Robert Paustian

Karen Hegge Simmons

PAULA N. WARNKEN has been appointed director of libraries at Xavier University, Cincinnati, Ohio. An ALA member, Warnken is president-elect of the Academic Library Association of Ohio. . . . Sept. 10 ALA member **P. ROBERT PAUSTIAN** became director of the Eugene Shedden Farley Library at Wilkes College, Wilkes-Barre, Pa. He succeeds **HSI-PING SHAO**, who is now dean of library and learning resources and professor of library science at the University of Wisconsin at Whitewater library school. . . . **KAREN HEGGE SIMMONS** has been appointed director of library services at the American Institute of Certified Public Accountants, New York, N.Y. . . . ALA member **BETH ANN KREMER** is now government publications/reference librarian at the Milton S. Eisenhower Library of Johns Hopkins University, Baltimore, Md. . . . **BRUCE M. MANZER** recently became chief of NYPL's Science and Technology Research Center. Manzer, who last served as visiting professor at the University of Illinois at Urbana-Champaign library school, held a Fulbright professorship at the University of Cairo from 1978 to 1979. . . . Oct. 15 ALA member **NEEL PARIKH** becomes coordinator of children's services at San Francisco (Calif.) Public Library. . . . Sept. 1 **CYNTHIA STEINKE** became director of the Institute of Technology Libraries at the University of Minnesota-Twin Cities, Minneapolis. . . . Oct. 1 ALA member **DAVID H. BRUNELL** became executive director of the Bibliographical Center for Research, Denver, Colo. He was formerly assistant network coordinator of the Federal Library and Information Network (FEDLINK) at the Library of Congress. . . . **MICHAEL K. BUCKLAND** is now vice president—library plans and policies for the University of California system. An ALA member, Buckland last served as dean of the UC/Berkeley library school. . . . **BERNICE OLT** recently became librarian at the Millerton (N.Y.) Free Library. She succeeds **ANN GORMLEY**, who retired earlier this year, and in whose honor a special book fund has been established at the library. . . . Recent appointments at Ball State University, Muncie, Ind., include: **DIANE HILL** as head of educational resources technical services; **COLLEEN KELLEY** as educational resources cataloger; **ROSEMARY SACZAWA** as head of general collections; and ALA member **KAREN ANN WEIKERT** as government publications librarian. . . . ALA member **ELLEN STEPANIAN**, director of library media at the Shaker Heights (Ohio) Schools, is 1984 recipient of the Award of Merit from the Ohio Educational Library Media Association. . . . July 1 **WILLIAM E. JARVIS** became acquisitions/collection development librarian at Lehigh University Libraries, Bethlehem, Pa. . . .

The Oklahoma Library Association recently honored two ALA members: **ALFREDA HANNA**, former librarian at Bethany (Okla.) Nazarene College, and **ESTHER MAE HENKE**, head of the Library Services Branch of the Oklahoma Department of Libraries in Oklahoma City. Hanna received the Distinguished Service Award; Henke, who was the 1971 DSA recipient, was further honored with a Special Meritorious Service award. . . . At Michigan State University in East Lansing, ALA member **BETH J. SHAPIRO** is now associate director of libraries and **THOMAS C. VOLKENING** is engineering librarian. . . . The New Mexico Library Association recently presented achievement awards to **JEANNE WINKLES**, director of the Lovington Public Library, and ALA member **ELINOR MCCLOSKEY**, library services coordinator for the Albuquerque Public School System. Winkles was named 1984 Librarian of the Year and McCloskey, who was 1976/77 NMLA president, received the Community Achievement award. . . . Among the 1984 winners of the New York Regents Medal of Excellence are two ALA members: **HAROLD S. HACKER**, director emeritus of both the Rochester and Monroe County Library System and **LUCILLE COLE THOMAS**, who recently retired as assistant director of school media services for the New York City Board of Education. The medals are awarded in recognition of the honorees' contributions to the quality of cultural life in New York State. . . . **KATHY HOLDEN** was recently appointed associate librarian for collection development at Millsaps College, Jackson, Miss. . . . ALA member **FLORENZ WEBBE MAXWELL**, coordinator of children and young adult services at the Bermuda Youth Library, Hamilton, has been awarded the (British) Queen's Certificate and Badge of Honour for outstanding service to the youth of Bermuda. . . . At the University of Missouri-Columbia ALA member **MARSHA STEVENSON** is now director of circulation and interlibrary loan services and **MARY ALLCORN** is journalism librarian. . . . **RONALD MITCHELL** is now executive director of the International Reading Association, headquartered in Newark, Del. . . . In July ALA member **JAMES D. MINGES** became library service development director for the Nebraska Library Commission, Lincoln. . . . At SUNY/Buffalo **SHARON SCHIFFHAUER** has been appointed assistant to the director of libraries and ALA member **DIANE C. PARKER** has resigned as director of the Science and Engineering Library to become director of Western Washington University's Wilson Library in Bellingham. . . . **MARGE BERRY** is now head of central children's services at Lake County Public Library, Merrillville, Ind. . . . ALA member **CHARLENE RENNER**, former assistant director of technical services at Iowa State University, Ames, is now associate director for bibliographic control at the University of Washington Libraries, Seattle. . . . July 1 **KENNETH WARREN** became director of the Lakewood (Ohio) Public Library. . . . ALA member **MICHAEL MILLER** is now head of the Avery Fisher Center for Music and Media at New York University. . . . ALA member **DONALD G. SWEET** is now university librarian of the Banks Library at Prairie View (Tex.) A&M University. . . . **NANCY J. RADFORD** retired as regulations officer in the Library of Congress's Office of the Associate Librarian at the end of June. . . . July 1 ALA member **DAVID WEILL** began a six-month leave of absence as director of the East Brunswick (N.J.) Public Library to become administrator of the local township through December. . . . The 1984/85 president-elect of the British Columbia Library Association is **JACK MOUNCE**. . . . ALA member **LINDA L. GORDON** recently became director of the Library Media Center at Southern Arkansas University, El Dorado. . . . **JOAN ASH**, former associate director of the Oregon Health Sciences University Library, Portland, is now director of the Yale University Medical Library, New Haven, Conn. . . . ALA member **FAITH A. HOLDREDGE** is now director of the Caney Fork Regional Library Center, Sparta, Tenn. She succeeds another ALA member, **MARY LITTLE**, who retired after 27 years of service. . . . **WENDY E. RICE** and **TERESA M. MANTHEY** are now reference librarians at the Norris Medical Library of the University of Southern California, Los Angeles. . . . At DataPhase Corporation **NORENE F. ALLEN** is now director of library services and **RICHARD W. NEWMAN** is corporate vice president. Both are ALA members. . . . Sept. 1 **CHARLES G. PALM** became the archivist at Hoover Institution, located at Stanford (Calif.) University. A past president of the Society of California Archivists, Palm was a member of the Society of American Archivists' Task Force on National Information Systems, where he helped to develop national bibliographic and format standards for archival automation. . . . ALA member **ROBERT W. AUDRETSCH**, former director of the Three Rivers Regional Library Service System, New Castle, Colo., is now director of the Summit County Library, Frisco, Colo. . . . At San Diego (Calif.) Public Library **FRANCISCO PINELL** is now outreach supervising librarian and **BETSY MILICH** is the system's first development officer. . . . ALA member **JOHN E. MILLER** is now director of media services for the Deer Park Community Schools in Cincinnati, Ohio. . . . **PAUL SAENGER**, bibliographer at Northwestern University Library, Evanston, Ill., was recently awarded a grant from the American Council of Learned Societies to research the history of reading to the end of the Middle Ages.

Deaths

JOHN ALLEN HUDSON, director of libraries at the University of Texas at Arlington since 1957, died May 23. . . . **ELLEN RASKIN**, 56, who won the 1979 Newbery Medal for *The Westing Game*, died Aug. 8. . . . **BELLA EVELYN SHACHTMAN**, associate university librarian at the University of California/Berkeley since 1969, died April 19. Shachtman was a member of ALA Council from 1963 to 1967 and served on ALA's Executive Board from 1968 to 1971. □

The great divide.

Faxon's new divisions reward you with better service.

With the formation of our four new divisions, you now get the individual attention of someone familiar with your needs along with access to the vast resources commanded by Faxon.

More than 100 years of dedicated service to libraries have put Faxon at the forefront of the information frontier. We were the first agency to completely automate subscription management. First to develop an international online network. First to establish online links with major publishers.

We'll give you an edge on tomorrow. A frontier we conquer by not resting on our laurels.

How to cut out the most frequently asked question about the world's best-selling encyclopedia.

This way to World Book.

"Which way to *World Book*?" is a popular question around libraries for good reason. According to librarians, it's because *World Book* is the most frequently used encyclopedia in print.

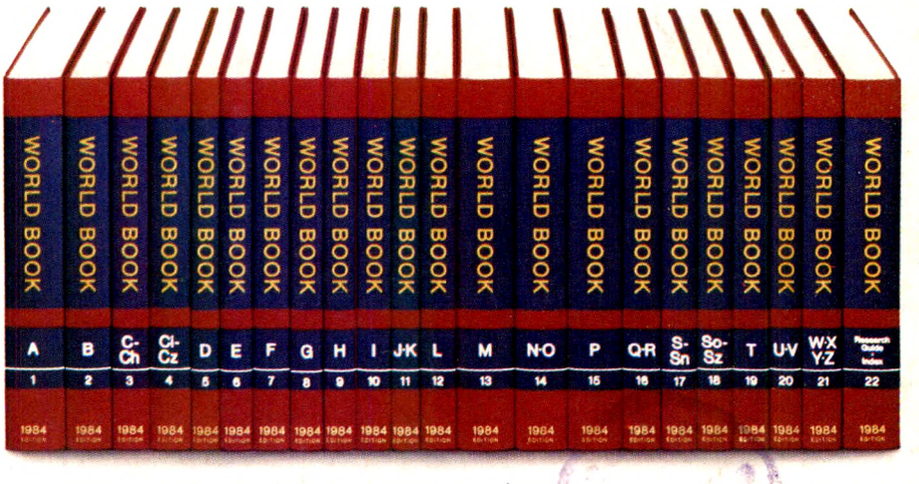
What makes *World Book* so appealing? According to a recent review by the editorial board of *Reference Books Bulletin*, published by the American Library Association,* *World Book*'s accessible, up-to-date, well-illustrated coverage of topics draws people of all ages.

In fact, this best-selling encyclopedia is designed especially to serve the reference and study needs of both students and adults. The review notes, "In these twin purposes it succeeds admirably," and adds, "*World Book* deserves high marks for its overall currentness of information."

People trust *World Book*, too. "*World Book*'s reputation for a high degree of accuracy—typographically, factually, and in matters of interpretation—continues apace," says the review.

From philosopher Aristotle to astronaut Sally Ride, "*World Book* continues to provide impressive, international biographical coverage of persons past and present," states the review.

With its clarity of style, helpful study guides, detailed index, and functional use of illustrations, it's easy to see why all signs point to *World Book*. Isn't it time to put a current set on your shelves?



*The review appears in the 2/1/84 issue.

BLACK-BELTED LIBRARIAN PUTS BEST FOOT FORWARD

SPECIAL 16-PAGE SECTION:
The technologically up-to-date librarian

OCLC UPDATE

Now Introducing

OCLC MicroSystems:

Delivering a Total Micro Package to Libraries

During the past few years the growth of microcomputer technology has made available unequaled processing values for computing, communication, and information retrieval. Your library may be part of this revolutionary scenario . . . or you may still be searching for the right micro system.

A Complete, Cost-Effective Package

Since 1967, OCLC has provided thousands of libraries with technology that is both current and cost-effective. In response to your needs, OCLC has drawn on that experience to offer libraries a full range of micro services, from the M300 Workstation to compatible software and hardware. MicroSystems has what you asked for: a total information processing system backed by OCLC's expertise and commitment to libraries.

Best of Both Worlds

For example, the M300 Workstation, a modified IBM® Personal Computer, combines the versatility of microcomputing with ease of access to the OCLC Online System. By merging the functions of a general-purpose microcomputer with those of an OCLC terminal, the M300 gives you the best of both: local data processing capabilities and more efficient use of OCLC services.

Carefully Evaluated Software

MicroSystems software includes OCLC-developed packages, such as the Micro Enhancers for interlibrary loan and cataloging, plus a selection of commerical programs suitable for a variety of library applications.

In addition, the OCLC Microcomputer Program Exchange (OMPX) enables libraries to acquire useful public domain software for the cost of a diskette and a nominal handling fee.

Compatible Hardware

And, for the first time, OCLC offers a choice of modems and printers, each chosen by MicroSystems staff for its performance with the M300, IBM® PC, or the OCLC model 105 and 110 terminals.

So whether your library is already taking advantage of microcomputer technology or still considering which system is best for you, we invite you to talk with OCLC or participating networks about OCLC MicroSystems services. With the M300 Workstation and compatible software and hardware, OCLC has what you need . . . and we're here when you need us.

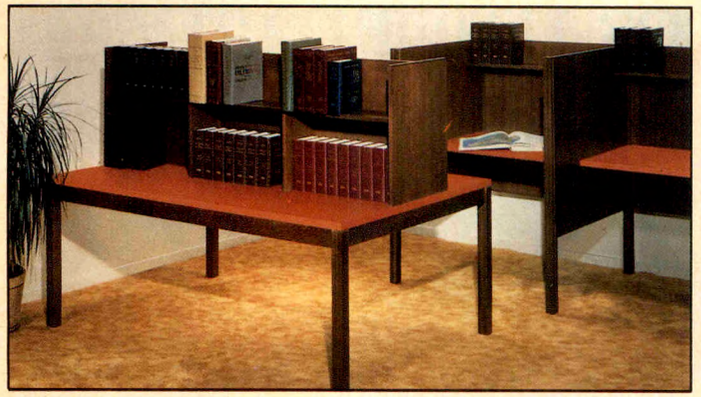
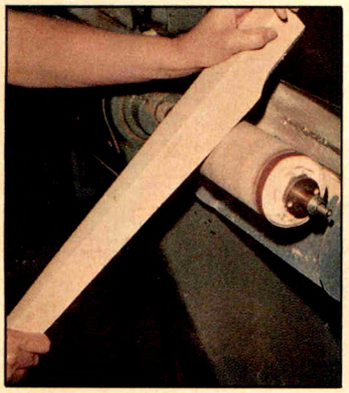
Made by Gaylord, Furniturewise.





Remove the Middle Man. Do Business Directly With the Source—Gaylord. Manufacturer and Marketer of Library Equipment and Supplies Since 1896.

We surpass dealers, catalog houses and other middle men in three ways:

Full Selection

If libraries use it, Gaylord manufactures it.

Expanding, Remodeling, Retrofitting, New construction. With hundreds of special and technical products to choose from, Gaylord Furniture will harmonize with your interior and your intent.

Choices. From Wood shelving to reading, reference and index tables. From magazine and newspaper racks, atlas cases and dictionary stands. To browsers, book trucks and charging desks. And, you have a variety of select hardwoods to choose from—quality oaks or maples in nine stains and finishes. Middle men offer limited choices.

Ship from Stock

DELIVERYwise, we ship orders fast directly from our factory.

With our exclusive "Ship from Stock" program we keep a large central inventory. So your order is shipped in *three to four weeks* because items come from stock, not production runs—that start with your order.

Local Source

With Gaylord, the personal touch still remains. You get more than a catalog.

You're helped by our—your—local Gaylord sales person who values your library's business. And, they understand libraries; in fact, our sales force averages twenty years of service to the library field.

Trusted Source

Depend on a Furniturewise manufacturer . . . Gaylord, your trusted source.

To order, call your local Gaylord representative at: 800/448-6160. In NY call 315/457-5070.

☐ Please send a Gaylord catalog containing wood furniture
☐ Please have a Gaylord sales person call

How a library at a small university makes information accessible in a big way.

"Many of our incoming students are apprehensive about using microforms, simply from lack of personal experience. So we established a library orientation program that includes a hands-on introduction to microforms. It calms the students' initial apprehension and encourages them to use microforms as a source of information."

Donald K. Tribit, Periodicals Librarian at Ganser Library, Millersville University of Pennsylvania, is a believer in serials management with microforms. The library's serials in microform program, under his direction for 23 years, is set up for maximum student use. The microform area is self-service, with staff assistance available, so students have both the access and the support they need to become comfortable using microforms. A technician makes sure the library's 45 microform readers are always functioning properly.

Don Tribit's program has paid off. The 6,000 students at Millersville University, a multipurpose institution located near Lancaster in south-central Pennsylvania, see microforms as an integral part of their research. "Our students use microforms with the same frequency as paper issues of periodicals," says Tribit. "Once they understand that with microforms we can offer much better access to information—a complete run of *The New York Times*, for instance—they treat microforms as a real advantage."

Serials holdings at Ganser Library include 1,800 current subscriptions in microform. As the University expands and changes its focus to meet student needs, new titles in microform are added, with the faculty's blessing. "It's important to refine our holdings continually," Tribit explains. "Right now we're looking at new titles to accommodate a growing emphasis on business and computer science."

Over the years, Don Tribit and the Ganser Library staff have looked to University Microfilms International (UMI) for assistance in developing their serials program. More than 1,500 of the library's current periodical subscriptions in microform are supplied by UMI—and Tribit credits the quality of the subscription program with improving the accessibility of information to the library community.

Serials management with microforms is a success at Millersville University of Pennsylvania—and at hundreds of libraries in all kinds of institutions. Let UMI help make information more accessible in *your* library with a comprehensive serials in microform program. Call or write:

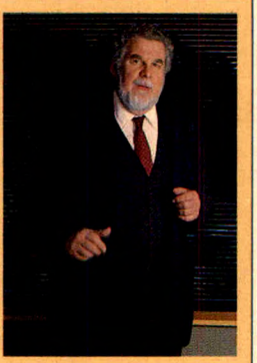
DATA RESEARCH COMBINES LIBRARY AND COMPUTER EXPERTISE TO SOLVE THE SPECIFIC PROBLEMS OF LIBRARY AUTOMATION

Since 1975, Data Research has been providing libraries with state-of-the-art automation systems based on a strategy of combining two sciences: libraries and computers.



"As a librarian, I know that complete integration around a single bibliographic data base and the ability to handle multiple library systems are essential. These are features of our ATLAS system."

James J. Michael
Vice President
Data Research Associates

Data Research's systems, featuring expandable and reliable Digital Equipment Corporation systems, are being used effectively in libraries throughout the country. According to a recent *Library Journal* article, Data Research ranked first in 1983 in providing large systems. Data Research was third that year in number of installations.

Importantly, the efficient installation and operation of turnkey library automation systems is Data Research's only business.

For librarians, Data Research Vice President James Michael offers invaluable practical experience based on his twenty-one years as a librarian and library manager.

Library directors benefit from Data Research President Mike Mellinger's experience in the area of computer systems analysis. He has written and designed hundreds of programs for library applications and works to accomplish total solutions, cost-effectively.

Behind these two is a team of experienced library consultants, experts in their specific areas, ready to apply ongoing service and education to Data Research installations.

A LIBRARY AUTOMATION SYSTEM MUST PROVIDE INFORMATION, CONTROL AND SUPPORT. ATLAS DOES.

Integration, reliability and expandibility. These are the features to look for in a library automation system. With well-designed software that is adaptable to handle each library's special requirements.

NS:

ATLAS, A Total Library Automation System from Data Research, performs all of these functions. It is an easy-to-use, state-of-the-art component system that can grow with you, from one to 1,000 terminals. And our hardware is serviced by Digital Equipment Corporation's 16,000 specialists in 400 locations around the world.

"If you're looking for an integrated total library automation system, call us. Our systems offer excellent performance, high reliability, a broad compatible product line and are serviceable worldwide."

Michael J. Mellinger
President
Data Research Associates

The ATLAS system offers:

- Authority Control
- MARC Database Manager
- Circulation Control
- On-line Cataloging
- Union List of Serials
- Materials Booking
- Serials Control
- Public Access Catalog
- Library for the Blind and Physically Handicapped
- Newspaper Indexing

PLUS...A NEW FEATURE OF ATLAS: DRANET— A COOPERATIVE BIBLIOGRAPHIC NETWORK

More than four years ago, Data Research recognized that in addition to assistance in retrospective conversions, libraries needed a continuing source of high-quality bibliographic data at a reasonable cost. DRANET is a result of that analysis.

DRANET is an on-line network of Data Research users utilizing ISO/OSI networking models. It is available by direct connect or TYMNET. DRANET has been in use for more than a year. It provides the entire LC MARC database on-line and cataloging resources of major Data Research users who have joined DRANET.

If you'd like to speak with managers of libraries who have installed ATLAS systems, please call us. In the meantime, we'll keep you informed of new solutions from Data Research.

Call us at 1-800-325-0888 or 314-432-1100. Or write: Data Research Associates, 9270 Olive Boulevard, St. Louis, Missouri 63132

AUTHORIZED digital™ COMPUTER DISTRIBUTOR

Ode to the bit

AT THE HEART OF MODERN LIBRARY TECHNOLOGY is something smaller than our micros, smaller than our paychecks, smaller than the Dewey Decimal. It is the bit.

The bit. The *b*inary dig*it*. Pure logical simplicity in a bewildering universe. A bit is a single unit that either is or isn't. It is something or nothing. It is on or it is off. It is a pulse or no pulse. It is 1 or 0. It is yes or no. A bit does not waffle.

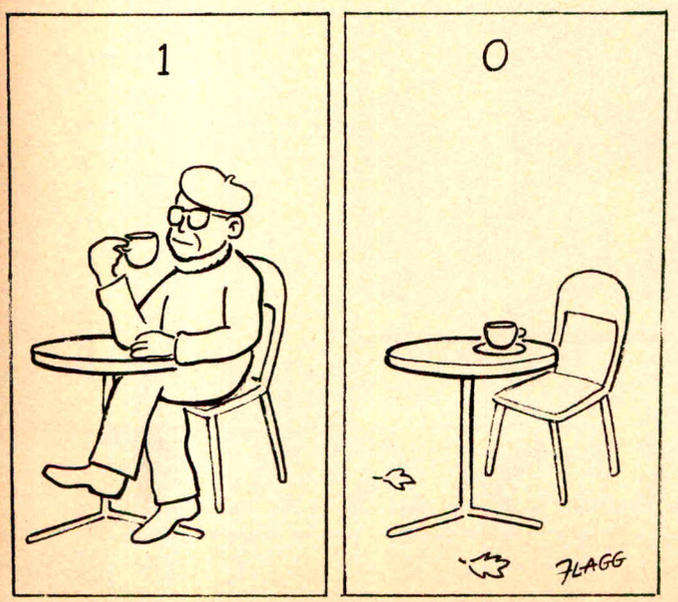
Editors strive to be bit-like. They are expected to be for something or against it. This issue, for example, is about technology; and although I have the same mixed feelings as do many others on the subject, my editorial should have a purity of stance.

Very well. While the larger issues that concern us are on hold until after the elections, I celebrate the bit. After all, we are lucky to have it around. Without the bit, most of the new technology and its triumphs would not exist. Whatever evils have been wrought by technologists, the bit has not been at fault.

A bit is obedient, replicable, and transportable. When we send a 1 to Papua New Guinea, it will remain a 1. When we send a 0 to Harvard, it will thrive as a 0 and not write home for money. A bit is no trouble.

The bit suffers no crisis of identity or of self. It is secure in the lovely certainty of presence or non-presence. It is being or nothingness. It is Sartre at the cafe table, or no Sartre at the cafe table.

Shrill cries from the marketplace imply that more bits are better, that only a 32-bit microprocessor will deliver the megabytes we want within the nanoseconds we have to play with. And yes, megabytes are fine for those in a hurry. But for truth and beauty, give me a good solitary bit, before the programmers string it up and weigh it down with function and output.



Among the lower orders, the first application of bit logic was a simple FOOD or NOT FOOD decision. That was the last simple application. In time, the bit was put to serious work. Charles Babbage designed a mechanical digital computer in the 1830s. Electronic bit-based computers came along a century later. Soon, the ENIAC computer was beating 5,000 operations per second out of its bits to produce ballistic firing tables. The bit had lost its innocence.

Bit logic in librarianship

In many ways, but especially as a democratizing force, technology has changed the bit-like logic with which libraries used to perform: Book chained, or not chained; doors open, or doors closed; on shelf, or not on shelf; open stacks, or closed stacks; main entry by author, or main entry by institution; shelve adult, or shelve juvenile; shelve print, or shelve nonprint; and so on.

Digital storage, retrieval, and telecommunications have enabled us to transcend closed doors, closed stacks, and shelf locations. The main-entry concept is meaningless. Format is secondary to content. And all patrons are equal before a terminal.

Few of us would wish to return to the binary "simplicity" of the past; yet so many lines have blurred in what used to seem like yes-or-no choices that a little yearning for binary decision-making is only natural. Oh where is the bit that indicates when to require an ALA-MLS degree and when not to? The very decision to automate once appeared to be a yes-or-no matter. Now it takes the form of an encyclopedic request-for-proposal, a near-impenetrable catalog of sub-choices and decisions.

ALA itself has set out upon what seems to me a near-impenetrable new process for identifying its objectives and planning how to achieve them, when to the outsider it would appear that a library association is either for libraries and librarians or against them. But the days of simple binary approaches are long gone, as far past as a simple definition of librarianship.

Thus I celebrate the bit as perhaps the last refuge of simplicity in a technological age; as the building block of universal access to information; and as a symbol of the pure being and nothingness between which we must operate. I have a feeling that if Sartre had been a librarian, he'd have figured out a way to be both at the cafe table and not at the cafe table at the same time.

Art Plotnik

BLACKWELL PERLINE™

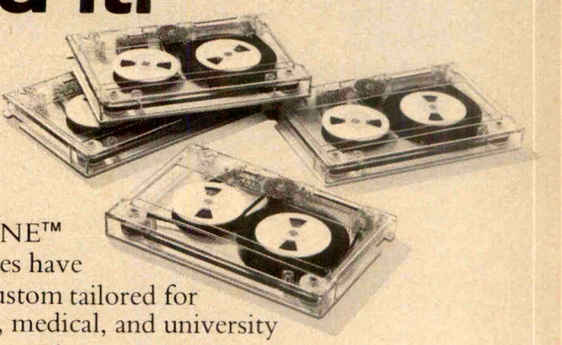
Your serials management system is only as good as what's behind it.

With the profusion of serials management systems, it makes sense to compare system capabilities, costs, and reliability before you make a decision.

PERLINE™ is Blackwell's new distributed serials management system. It gives you freedom of choice by avoiding vendor system tie-ins. That means reduced network telecommunications and processing charges, *and* it puts complete control of your own data in your own hands at all times. Blackwell utilized its extensive resources and the latest technology to incorporate numerous local and network capabilities into the user-friendly system, including:

- Check-in
- Claiming
- Routing
- Public inquiry
- Searching (ISSN, ISBN, CODEN, author, title, subject, local code)
- Ordering, renewing
- Binding
- Holdings control
- Fund accounting
- MARC interfacing
- Management reporting
- Ordering, renewing
- Stand alone
- Custom tailoring
- Password security
- Report writer
- Networking
- Message handling

Unlike other systems, PERLINE™ accommodates various library systems through the MARC interfacing module. Direct connection to the Blackwell databases for on-line ordering, claiming, bibliographic searching, and message handling, is a planned feature.



PERLINE™ packages have been custom tailored for special, medical, and university libraries with up to 50,000 subscriptions. Special packages are available for libraries or networks with over 50,000 titles. Each PERLINE™ package is cost-effective, highly flexible and backed by the type of quality training, documentation, and support long associated with the Blackwell name.

For free descriptive literature or a PERLINE™ demonstration, and information about BOOKLINE™, our new monographic acquisitions system, write or call: (800) 645-5395. In New York, call: (516) 466-5418.

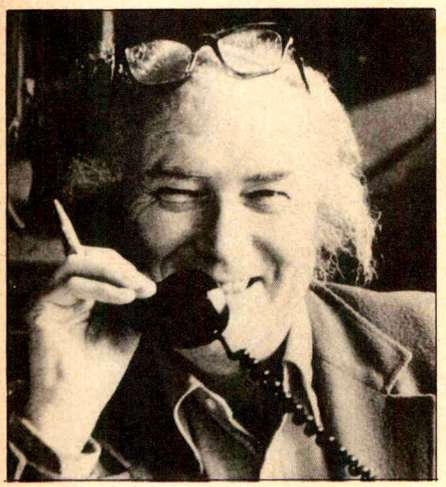
Critic of children's-book "isms" dead at 62; Techniques drew praise and fire from librarians

For the last 18 years of his life, Bradford Chambers blew the whistle on thousands of illustrations, writings, films, and other communications he considered racist, sexist, or ageist and therefore not worth buying—especially for children.

When he died of a cerebral hemorrhage Sept. 28 in New York, the director of the Council on Interracial Books for Children (CIBC) and editor of its *Bulletin* left behind many devoted supporters, several adversaries—largely from the library intellectual freedom community—and very few who felt neutral about his methods.



Bradford Chambers

A member of the American Library Association since 1976, Chambers was recently appointed to ALA President E.J. Josey's special Committee on Library Services to Minorities, and was also coordinator of ALA's Social Responsibilities Round Table Civil Rights Task Force. Within the Association he stirred bitter battles in his efforts to purge children's literature of what he considered prejudice.

Commenting on Chambers' death, *Voice of Youth Advocates* Editor Mary K. Chelton told *AL*: "I think Brad and the CIBC stepped over the line on censorship of libraries in recent years, but I hope the council will continue its work in promoting awareness and consciousness-raising – it is desperately needed."

Barbara Rollock, coordinator of children's services at the New York Public Library, said, "I didn't always agree with Brad's methods—he used the hammer-over-the-head technique rather than praising positive presentations. But the CIBC made a great contribution in the continuing awareness of our pluralistic society and I hope it will not be forgotten."

Sanford Berman, cataloger at the Hennepin County (Minn.) Library and a member of the CIBC *Bulletin* advisory board, told *AL*: "Under Chambers' direction and inspiration—and with his impetus—CIBC easily qualifies as the number-one group that has most sensitized librarians and teachers to the pervasiveness of prejudice in library and teaching materials and pointed to the need and desirability for taking a prejudice-free multicultural approach."

School Library Journal Editor Lillian Gerhardt denounced the CIBC as a would-be censor of the Left in a 1976 editorial. She has not modified her view. Gerhardt dismisses CIBC as having little influence in raising social consciousness, but, she said, "I take off my hat to Chambers' ability to write a grant proposal!"

From prep school to advocate

The son of a well-to-do biologist, Chambers was born in New York City and educated at prep schools in England, Switzerland, and the United States before attending Amherst College and New York University. For his NYU master's thesis, he investigated teenage gangs in Harlem, and later worked in a delinquency-prevention program.

He was a freelance writer and editor of children's books and periodicals when he became committed to racial struggles for equality and learned about the CIBC. Founded in 1965 by a small group of librarians, editors, and writers concerned about the lack of good children's materials about blacks, the CIBC was judging manuscripts for its first annual contest for unpublished children's books by black writers when Chambers joined in 1967. He was named to head the council in 1968.

"Brad built up the CIBC from nothing with the help of grants from Ford and Carnegie," recalls CIBC member David Cohen, chair of the ALA Ethnic Materials Information Exchange Round Table.

Under Chambers, the council developed criteria to determine whether children's materials were racist, later adding guidelines concerning sexism, ageism, and physical handicaps. The CIBC *Bulletin*, originally eight stapled pages issued irregularly, was enlarged to a magazine published eight times a year, with articles and reviews of new children's books, TV programs, and films. (The reviews, Rollock says, have recently become less bombastic and more evaluative.)

In 1975, CIBC set up the Racism and Sexism Resource Center for Educators. The center, headed by Chambers' widow Lyla Hoffman, develops and disseminates bias-free teaching materials, books, pamphlets, lesson plans, fact sheets, and audiovisual materials. In 1982 it won the National Education Association Human and Civil Rights Award.

From the beginning, Chambers worked with publishers and editors to find and publish works by minority authors. He also used his influence in library and education associations to spread the CIBC cause.

Gadfly role in ALA

In ALA, Chambers found many allies and as many opponents. One member describes him as forceful and charismatic, another as a self-serving manipulator. "You were either for Brad or against him," says Mary K. Chelton.

His chief opponents were the intellectual freedom advocates. In the early '70s, Children's Services Division librarians debated and finally adopted a statement proposing that librarians continuously reevaluate their old materials "in the light of growing knowledge and broadening perspectives." The CSD Intellectual Freedom Committee argued that the division could not, "with logic, endorse the Library Bill of Rights . . . and at the same time maintain that as adults we have a responsibility and a right to make value judgements about what materials are 'appropriate' to give to children." CSD rescinded the statement at Midwinter Meeting in 1976.

At the Centennial Conference the same year, Chambers and his allies fought for racism and sexism awareness resolutions in Membership and Council meetings. The rhetoric was heated, with charges of censorship and threats to academic freedom. Finally Council resolved to increase awareness of

AL freebie at Midwinter

Registrants at the ALA Midwinter Meeting Jan. 5 – 10 in Washington, D.C., can pick up a free copy of the December *American Libraries* with its many Meeting-related features—and a special bonus. Each of 4,000 copies to be distributed at the meeting site will contain a 26-page guidebook published by Access Press. The full-color guidebook provides detailed descriptions, diagrams, and maps of features in the East Mall—from the Lincoln Memorial to the Library of Congress, including the White House and major museums.

For all *AL*'s 43,000 subscribers, the December issue will include an exclusive interview with one of the library world's favorite people in Washington, a report on the American Association of School Librarians' critical national conference in Atlanta, and much more.

racism and sexism as it may appear in the library profession and in library service.

In a 1983 interview with Noel Peattie, published in *Sipapu*, vol. 13, no. 2, Chambers dismissed the censorship charges by asking, "What better way do librarians have to achieve intellectual freedom than by offering perspectives that have traditionally been left out?"

Discussing the realities of the '80s, he told Peattie, "I believe the mess we are in goes well beyond majority vs. minority, whites vs. people of color. It is the value system of our society—with values like acquisitiveness, competitiveness, aggressiveness—that is at the root of the mess. These anti-human values must be changed before we can hope to attain race and sex equity and social justice." That explains why, he said, CIBC is working to change the societal values reflected in children's learning materials. (The interview is reprinted in *Alternative Library Literature* 1982/83, pages 14-21, Oryx Press, 1984).

What now for CIBC?

"Since the onset of Reagan and the New Right," Sandy Berman says, "CIBC is even more needed. Muted forces of discrimination are becoming more visible and vocal, and have a greater impact. One can see it in government documents on civil rights . . . and in the de-emphasis on bilingual education."

In the *Black Experience in Children's Books* (NYPL 1984), Barbara Rollock writes, "The volumes of material on the Black Experience which were available in the late 1960s and early 1970s have dwindled to a trickle of titles by the same familiar authors." In the fall issue of *Bookmark*, she notes the lack of encouragement given minority authors.

Mary K. Chelton points out that the minority-interest books being published can be counted on one hand. "Although four states will soon be predominantly Hispanic, few books by Hispanic authors are published and Hispanic characters are rare in young people's materials. Publishers pay no attention to demography."

David Cohen believes "the need is as great as it ever was—technology is drowning the problem." He would like to see CIBC reinstitute the minority-author contest dropped in 1978 due to lack of funding.

At the CIBC office in Manhattan, *Bulletin* Managing Editor Ruth Charnes declared: "We are committed to continue the work of the council. We are initiating a search for a new director and would welcome suggestions from ALA members."

Beryle Banfield, CIBC president and director of the Women's Equality Program at the NYU Metro Center, added, "We owe it to Brad to continue the work. Just developing a job description for his position made us realize how many hats he wore."

Children's-book critic Donnarae MacCann agreed that Chambers' position will be difficult to fill. "More than most educators and information specialists, Brad had a strong grasp of how complex social and cultural institutions tend to be, and how unresponsive they can become over time. Above all, he could and did translate his deep sense of compassion into effective forms of action. He has left us a rich legacy of activism and sensitivity, and its timeliness is perhaps greater now than in the '60s, in the years when the war was stirring national conscience." —*L.R.P.*

Battle for excellence in federal libraries continues

For the first time since January 1982, the federal government opened its register for professional library positions from Sept. 17 through Oct. 12. Librarians noted that applicants were required to qualify under the old standards for grades GS – 7 through GS – 12 since the Office of Personnel Management has failed to issue its proposed classification and qualification standards. Librarians would have started at GS-5 under those standards, with no MLS required.

The general register had closed three years ago just as the library community launched a protracted controversy over the proposed librarian and library-technician standards. The American Library Association and other library groups demanded that OPM rewrite the standards, which ALA considers "blatantly discriminatory."

OPM Director Donald Devine suspended all standards projects and placed the proposed librarian standards on hold pending an internal review of its standards development work. His action was prompted in part by the 1983 General Accounting Office review of the proposed librarian standards (*AL*, Oct., 1983, p. 580). Librarians suspect that Congressional interest in the issues of pay equity and comparable worth have also inhibited Devine's inclination to publish disputed standards in a female-dominated profession.

Late in 1983 ALA filed two Freedom of Information requests for the data OPM used to develop the draft standards. OPM supplied some data, but requested $925 to search and disclose the remaining information. In the meantime, the ALA Washington Office notes, Devine's staff is reading *American Libraries*. In recent letters to two members of Congress, the OPM director quoted *AL* articles by Herbert S. White and Patricia Battin to bolster his arguments for lowering federal librarian qualifications.

Owens sees "ominous implications"

Rep. Major Owens (D-N.Y.) linked OPM's efforts to reclassify and downgrade librarians to Office of Management and Budget attempts to contract out entire federal libraries at a Congressional hearing on the implementation of OMB Circular A-76 in September. "Both these efforts," Owens said, "have ominous implications for the future and the age of information."

Contestant wins double prize

Reference Librarian Sara Eklund Payne and her new husband, Warren, celebrate their Sept. 22 wedding in the Morley Library, Painsville, Ohio. The groom, a computer programmer, met Eklund last year when he came to the library searching for answers in a local trivia contest. Payne won the grand prize, a tape recorder, as well as the librarian. After the ceremony, some 80 guests showered the couple with confetti produced by the Gaylord charging machine at the circulation desk.

The House Post Office and Civil Service Subcommittee oversight hearings reviewed the circular setting forth executive branch policy on the performance of "commercial" activities by the federal government and its effects on the federal work force.

Subcommittee Chair Don Albosta (D-Mich.) asked OMB Deputy Director Joseph R. Wright, Jr., if the contracting out of federal libraries was appropriate. Albosta said that OMB was "walking a thin line" in including the entirety of library operations in its emphasis on turning government activities over to the private sector.

Wright testified that OMB has selected library activities among 14 categories to be studied for productivity improvement. In the category list, "libraries" falls between "mail and file" and "laundry and dry cleaners."

Rep. Owens declared that libraries are one of the few professional functions on OMB's list and characterized A-76 as making "a blind attack on libraries in the name of cutting costs." Contracting out a government function is useful only when done on a temporary basis for short-term projects, but dangerous for long-term, ongoing operations like federal libraries, Owens said.

As a result of the A-76 hearings, Rep. Acosta is considering the establishment of a commission to recommend to Congress those functions inherently governmental which should be performed by federal employees.

Twelve against OMB policy

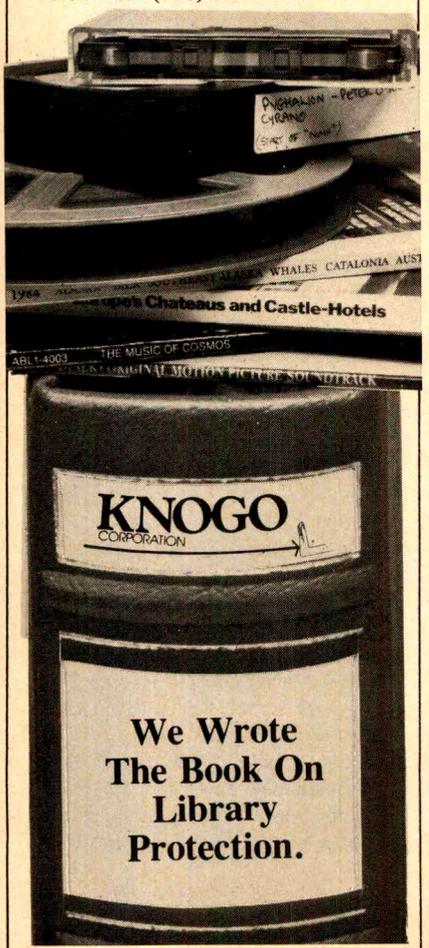
Rep. Acosta and 11 other Democratic members of Congress expressed their concerns about the effects A-76 in a letter to

The more your library has to protect, the more you need KNOGO protection.

A KNOGO electronic article surveillance system can discreetly and effectively protect your library from losing as much as 10% of your books, tapes, records and cassettes to pilferage every year.

KNOGO systems have been proving themselves in worldwide applications for almost two decades. And that's no surprise, since we were the ones who designed and introduced electronic article surveillance in the first place.

For full information and a free proposal on a complete KNOGO Library Protection System, call toll-free 1-800-645-4224, or in New York (516) 822-4200.



100 Tec St., Hicksville, N.Y. 11801

Donald Sowle, administrator of the OMB Office of Federal Procurement Sept. 14. "While we believe that proper implementation of the A-76 circular can help achieve more cost-effective performance of government activities, we oppose its application to library operations, which are inherently connected to the government's ability to make sound policy judgments," the letter states.

The four-and-a-half page letter notes that many federal libraries already contract with private firms to access online information retrieval systems, cataloging data, and periodical subscriptions. What disturbs the members of Congress is the contracting out of entire federal libraries, including Department of Defense, research, and technical libraries. Albosta and his colleagues wrote: "It is difficult to conceive of how a federal library can adequately fulfill the information needs of its users with a constant turnover in personnel, who may have little or no familiarity with the agency's history and mission."

The letter also warned that "by allowing the independent review of each federal library under the A-76 program, the government is clearly risking the disintegration of its information-sharing network."

ALA fights threat of 43% postage increase

Shortly after the U.S. Postal Rate Commission recommended raising all classes of postage rates early next year, ALA Washington Office Director Eileen Cooke wrote the U.S. Postal Service Board of Governors in protest. The USPS board will meet Nov. 13 – 14 to rule on the rates.

The rate commission, an independent agency, had recommended increases of 10% for first class mail, 11% for third class nonprofit, 8% for fourth class special or book rate, and an average of 21% for fourth class library rate. The USPS had requested a 12% increase for the library rate, but the commission said 21% was needed to cover higher transportation costs.

In her letter of Sept. 26, Cooke argued that the proposed library rate for a two-pound package would average 43%, not 21%, over current rates, and have an adverse impact on libraries. "Every extra dollar spent for postal costs means a dollar less for purchase of materials," Cooke wrote.

Basic as well as specialized and cooperative library services would be cut, Cooke wrote. She cited examples such as the Ohio Valley Area Libraries Mail-A-Book program benefiting rural as well as handicapped, homebound, and elderly people; the New York State Library program distributing state documents and interlibrary loan; and Indiana's Tri-ALSA authority, which fills some 7,000 interlibrary loans a year benefiting 240 libraries of all types.

Postmaster General promotes libraries

Postmaster General William F. Bolger, shown here with U.S. Postal Service Librarian Jane F. Kennedy, took part in ceremonies dedicating the Nation of Readers postage stamp at the Library of Congress Coolidge Auditorium Oct. 16. Bolger will retire Dec. 31 and plans to join Gray and Company, a Washington, D.C., public communications firm.

"The inevitable result [of the proposed increases] will be diminished library service to the American people," Cooke concluded.

Congress extends LSCA and increases funding

By voice votes early in October, both houses of Congress approved HR 2878, extending and expanding the Library Services and Construction Act from FY 1985 through FY 1989.

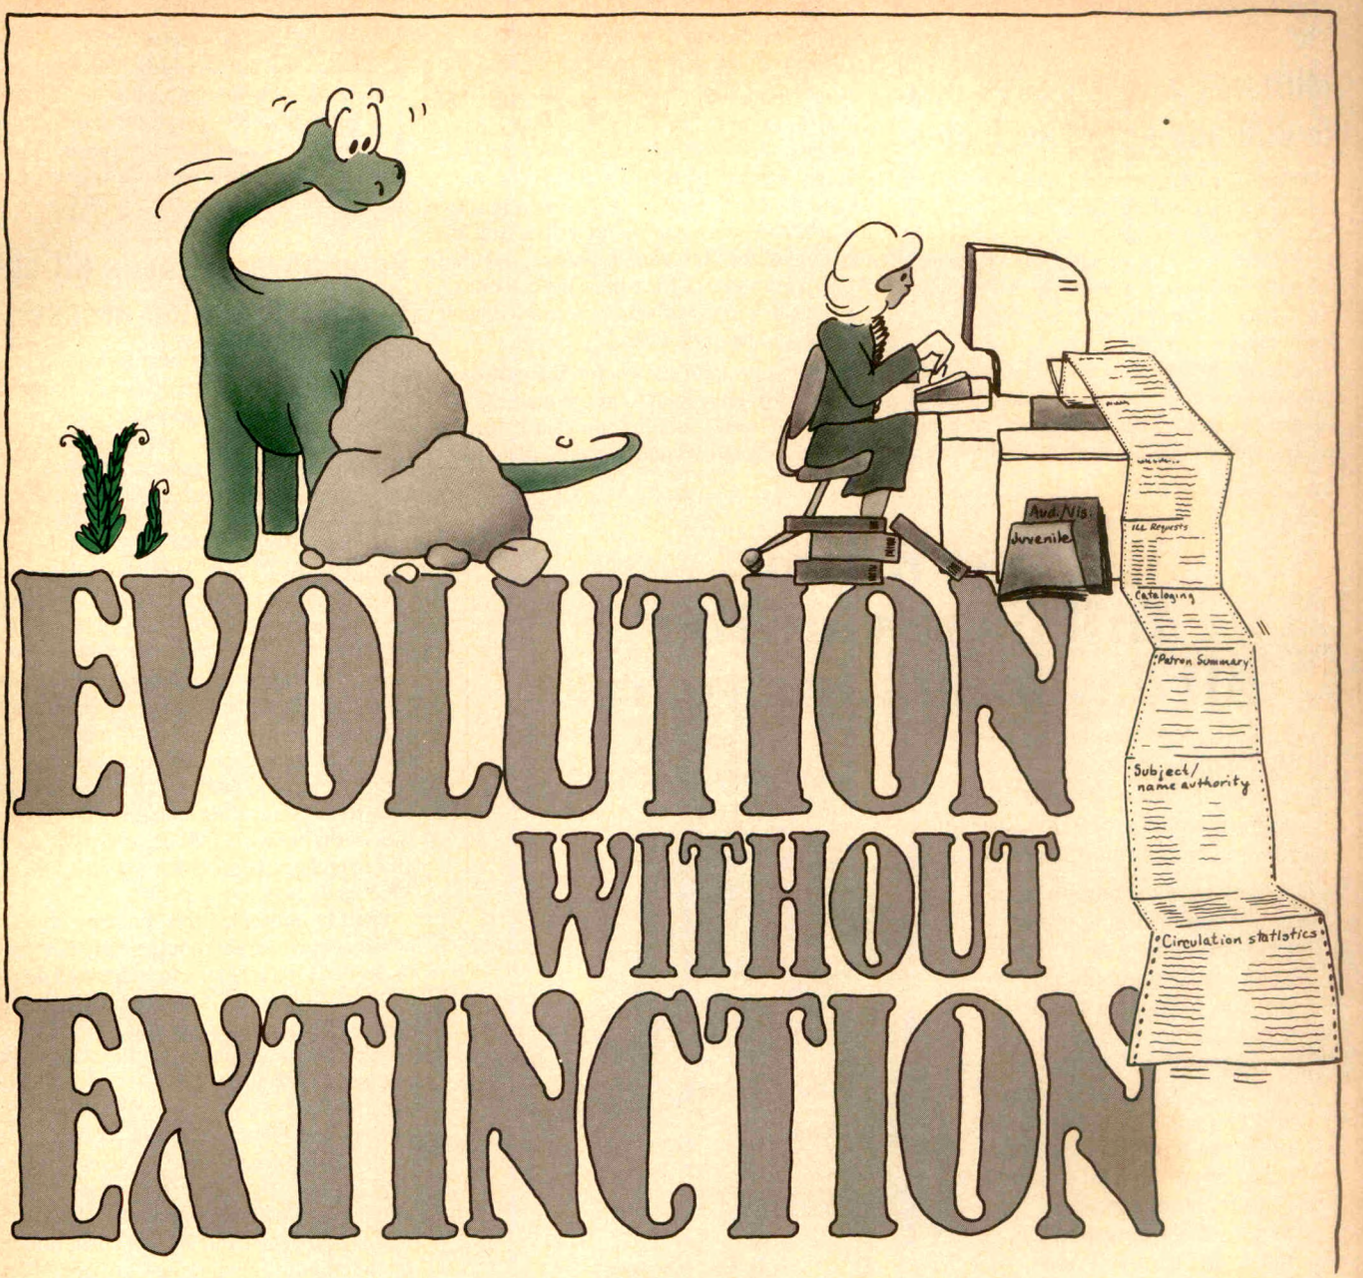
The House-Senate conference committee had agreed to add the three new titles proposed by the House, providing for services to Indian tribes, foreign language materials, and library literacy programs. The bill was sent to the White House Oct. 5 for President Reagan's signature.

The Labor-Health and Human Services-Education appropriations bill funding library programs was passed Oct. 10 by a vote of 313 – 70 in the House and by voice vote in the Senate.

The conference report (HR 98-1132) increased the 1984 funding levels for LSCA Title I, public library services, from $65 million to $75 million and Title III, interlibrary cooperation, from $15 million to $18 million. Title II, public library construction, was not funded in 1984 but was included at $25 million for 1985.

For the Higher Education Act, Title II-A, college library resources, again was not funded. Title II-B, library training and research, increased from $800,000 to $1 million, and Title III, research libraries, remained at $6 million.

The Education Consolidation and Improvement Act Chapter 2 state block



EVOLUTION WITHOUT EXTINCTION

There **is** a way to be sure your automation system stays current. It's simple: let **us** worry about technological advances.

With Brodart, you can have a fully integrated library — without buying a computer.

That means you'll never have to worry about hardware going out of style. Never be stuck with obsolete software. Never have to justify capital investment for equipment.

Other vendors require a long-term commitment. We don't. We leave you free to grow and change as your environment requires.

Planned NON-obsolescence

Over the last decade we've automated a broad range of functions:

- bibliographic database conversion, access, maintenance
- resource sharing
- subject, name authority control
- reference desk research
- interlibrary loan with/without circulation control
- patron access
- circulation control
- materials management
- collection, circulation statistics reporting
- COM and printed catalogs
- shelflists
- spin-off catalogs, subject guides, bibliographies

Modules under development include acquisitions and serials check-in.

Each new module has evolved from earlier forms. And yet, each lets you add on — **without** throwing away your previous work, and **without purchasing new equipment**. Because all Brodart modules are compatible, you can expand at your own pace.

grants increased from $479,420,000 to $500 million.

MIDLNET presents $118,000 to CLR and ALA-Washington

The Midwest Regional Library Network (MIDLNET) dissolved itself as a corporation Sept. 28 and gave its remaining assets of $118,183.59 to the Center for Research Libraries in Chicago and the ALA Washington Office. CLR received $88,637; ALA-Washington, $29,546.

MIDLNET was founded in 1975 to help provide library services to member libraries in the Midwest. The consortium brokered OCLC and also offered other database services to its 15-to-20 members at a discount. But in the Midwest other networks grew stronger, and MIDLNET could not compete.

Last spring the consortium President John P. McGowan of Northwestern University Library polled members on their options and chaired a final telephone conference Sept. 28. MIDLNET board members voted to dissolve the group and disperse its assets to the Center for Research Libraries and the ALA Washington Office on a three-fourths/one-fourth ratio to "advance the services and interest of the profession."

Expressing appreciation for the gift earmarked for collection management, CLR President Donald B. Simpson said it would be used to improve and expand collections and benefit CLR's 159 member libraries.

ALA Executive Director Robert Wedgeworth said the gift would be of great assistance to ALA in strengthening the information and advisory services provided by Washington Office Director Eileen Cooke and her staff in their work on behalf of the library community.

Penn governor goes all out to fund statewide access

"To open the doors of information to all Pennsylvanians at every publicly supported library in the Commonwealth," Gov. Dick Thornburgh recently proposed "Access Pennsylvania: An Agenda for Knowledge and Information Through Libraries."

The plan was presented at the annual meeting of Pennsylvania Citizens for Better Libraries (PCBL) in Harrisburg Sept. 26. "Access Pennsylvania" fulfills a pledge Thornburgh made to PCBL when he received its Citizen of the Year award in 1981.

At that time, Thornburgh asked State Librarian Elliot Shelkrot to convene a Pennsylvania Library Planning Council of 95 leading citizens representing business, education, industry, labor, government, and libraries, to study the problems and potentialities of the state's 4,000 libraries. The council researched 26 issues throughout 1982 and 1983 and prepared a plan.

Shelkrot presented the council's comprehensive report to Thornburgh early this year. Its 19 recommendations for improved access to library resources form the basis for the Access Pennsylvania program.

Thornburgh proposes that the state library initiate a statewide library card allowing every citizen to use every publicly supported library, and requests the Education Department to develop a course teaching school children how to use library computer catalogs to search for information. Thornburgh will ask the legislature to reimburse libraries for interlibrary lending and provide greater aid to libraries in economically distressed communities.

Access Pennsylvania calls for a budget of $3 million in additional state funds and $1.5 million in federal funds, which will be included in Thornburgh's 1985–86 budget request. This year, his administration committed $18 million in aid to publicly supported libraries and $3 million to the state library.

PCBL President Dodson Dreisbach applauded the proposal as "a breath of fresh air." University of Pittsburgh library school dean Thomas Galvin, past president of the American Library Association, called Access Pennsylvania "a bold new initiative to mobilize the total resources of all Pennsylvania libraries and information services to serve every citizen of the Commonwealth."

Pennsylvania State University Libraries Director Stuart Forth said, "It is good news indeed that the governor has incorporated so

Comfortable, full page viewing all day long...for years!

Dukane MDP Manual Microfilm Reader

It's easy to see why the MDP is the preferred reader for 35mm roll film, 16mm film and aperture cards.

A gently slanted screen assures comfortable viewing even over long stretches of time. Operating instructions are up front, in plain view. Loading is a snap. And you'll appreciate the MDP optical system. Choose our Zoom 13-23x or 18x lens. Both present images that are precise...crisp...crystal clear. High resolution from corner to corner allows you to view full pages as if you were reading the original.

Dukane's MDP...it's your best value for operating ease and reliability— any way you view it.

many recommendations from our Planning Council in these new services for libraries." Other prominent educators also hailed the proposal.

An attractive 20-page illustrated booklet on "Access Pennsylvania" may be requested free from the Pennsylvania Department of Education, Office of Press and Communications, 333 Market St., Harrisburg, PA 17126.

OCLC loses tax exemption, will pay $1 million tax bill

OCLC has lost its real estate tax status as an educational and charitable institution in Dublin, Ohio, and is paying $1,027,316 in school taxes reaching back to 1980. Beginning next year, it will also pay an annual school tax of $375,000, based on present assessed value.

OCLC had been exempt from real estate taxes since its founding in Columbus by university presidents in 1967. After the utility moved into its new computer and office facility in Dublin in 1980, the local board of education challenged the tax exemption.

On June 20 the Ohio Supreme Court upheld a Board of Tax Appeals decision denying exempt status for the OCLC property. The court ruled that OCLC offers a product to charitable institutions for a fee exceeding cost and is not itself a charitable institution.

The opinion cited fee-paying research projects for the private gain of Bank One of Columbus, Warner Amex QUBE, and Source Telecomputing Corporation as examples beyond the realm of a charitable institution. OCLC President C. Rowland Brown contends that the court erroneously interpreted facts related to OCLC research investigating library patrons' use of new technology.

"We will pay the taxes, of course, but we will also ask for legislative relief from this

(Continued next page.)

"TV Turnoff" organizer resists lures and lucre from Letterman

In a show broadcast during the wee hours of Oct. 3, the comedian David Letterman, host of NBC-TV's "Late Night with David Letterman," read a newspaper story announcing that the Farmington, Conn., Library Council plans to hold a second "TV Turnoff" next January to follow this year's successful campaign. That effort resulted in more than a thousand Farmington residents giving up television "cold turkey" for the entire month, and some 4,000 others reducing their viewing hours. (*AL*, March, p. 126.)

In view of this threat to his livelihood, Letterman placed a telephone call on the air to organizer Nancy DeSalvo, children's librarian at the Village Library, "to talk some sense into this woman" and to get her "to call this nonsense off."

"We make our living in television," Letterman told her, "and I'm calling to see if I can't get you to reconsider." After telling DeSalvo about some of the great programs Farmington residents missed during the turnoff last January—the two-hour debut episode of "Riptide" and the premiere of "Foul-Ups, Bleeps, and Blunders"—Letterman enticed her with features he said were scheduled for next January: "Children's Librarians: Guardians of Tomorrow," "Farmington: Town of Destiny," and "From Mrs. Reagan to Mrs. Sluggo: Nancys in American Culture."

When DeSalvo's resolve remained firm in the face of these temptations, Letterman tried unsuccessfully to bribe her by offering a Sony Trinitron television set if she'd "play along and call off the boycott."

Letterman tried again the following week. On his Oct. 9 show, he called DeSalvo and described new additions to the January television schedule, including "It's De-Lightful, It's De-Lovely, It's De-Salvo" and "Check Me Out: A Story of Librarians After Dark." He then repeated his offer of the television set and upped the ante by adding water skis, a riding lawn mower, and a year's supply of tanning oil to "Nancy DeSalvo's Prize Wonderland" ("total retail value $2,850"). DeSalvo brushed off the goodies and asked Letterman to join her in the "TV Turnoff" by giving up his show during January. "You're a tough nut to crack," he told her, promising to make another attempt to change her mind on a future show.

A color television, water skis, and a riding lawn mower were all part of "Nancy DeSalvo's Prize Wonderland."

DeSalvo told *AL* that despite her willingness to kid with Letterman, the Library Council is very serious about the campaign. She said next year's efforts will include workshops to educate parents and teachers on the effects of television and related topics.

"I was hoping he'd offer me a car," DeSalvo said when asked if she was tempted by Letterman's bribes, "because I want to know how it feels to turn down a car."

— Gordon Flagg

ruling," Brown said. "The Ohio Supreme Court decision places a new and additional burden on our member institutions and taxpayers, and it provides a major windfall of new revenue to a single school district."

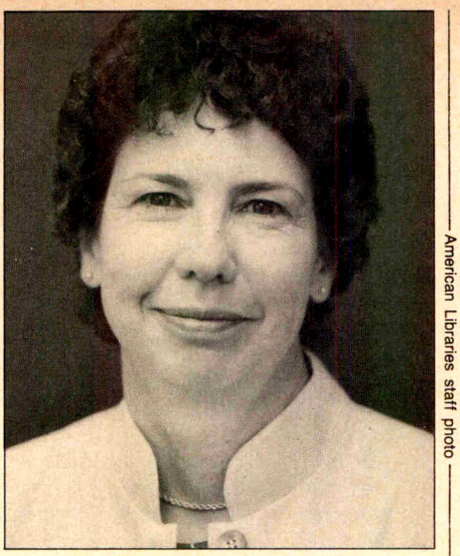
Brown also declared: "We will continue to operate as a charitable and educational organization under our broad public purpose of furthering ease of access to knowledge and information."

OCLC paid $205,463, the first of five semi-annual installments on the $1 million bill, to the Franklin County Treasurer's Office July 26. OCLC also pays local water and sewer taxes for the Dublin facility, and remits the city income taxes of its 660 employees.

Penny Abell to direct Yale University Library

Millicent D. Abell, library director at the University of California/San Diego, will succeed Yale University Librarian Rutherford D. Rogers when he retires at the end of this year.

In announcing the appointment, Yale President A. Bartlett Giamatti said: "We are delighted that someone with Penny Abell's experience, ability, and vision will be the next university librarian. She will build on the splendid work of Rudy Rogers and her selection promises that the Yale Library tradition of high standards of professionalism and service to scholarship will continue with vigor."



American Libraries staff photo

Millicent D. Abell

Abell, an American Library Association member since 1968, was president of the Association of College and Research Libraries in 1980–81 and currently serves as ACRL member of the ALA Council. In 1981–82 she was president of the Association of Research Libraries and was recently named to chair the Center for Research Libraries.

Born in Wichita, Kans., 50 years ago, she holds master's degrees in personnel administration, library science, and political science.

Her career as a librarian began at West Point in 1964, when her husband Julian became an instructor at the U.S. Military Academy. She has also worked at the Colorado Springs Public Library, the University of Washington Libraries, and at SUNY/Buffalo. She was appointed university librarian at San Diego in 1977.

At Yale, she will head one of the world's largest scholarly research libraries, with 8 million volumes scattered in 37 locations. The Yale system incorporates the Beinecke Rare Book and Manuscript Library and the Seeley G. Mudd Library of social science materials.

Laura X awaits sentence of fines, not imprisonment

Laura X, founder of the Women's History Research Center in Berkeley, Calif., has been sleeping easier since July 12, when the local prosecutor dropped 22 of the 24 criminal charges against her and requested she not be incarcerated. In November, the Alameda County Higher Court is expected to sentence her to restitution and fines, as she originally asked.

Last March Laura X was charged with conspiracy, forgery, and grand theft in her alleged abuse of the federal work-study program (*AL*, May, p. 278). She pleaded not guilty and appealed for support from librarians, academics, and users of the center and its National Clearinghouse on Marital Rape.

In a plea-bargaining accord in July, District Attorney Jim Anderson dropped all but two charges against Laura X and requested that she not be incarcerated. In exchange, she agreed to plead no contest on one charge of forgery and one charge of theft. Municipal Judge Carol Brosmahan convicted her, put her on three years' probation, and turned the case over to Alameda Superior Court for monetary sentencing.

"We are most grateful for the support we received from librarians and other academics," Laura X told *AL* in mid-October. "Their letters convinced the prosecutor of the center's importance. And those letters with big and small donations built up our morale as well as the defense fund."

Lawsuit fails to force listing in *Current Contents*

Om Johari, editor of the quarterly *Scanning Electron Microscopy* (*SEM*), wants his biology journal included in *Current Contents—Life Sciences*, published by the Institute for Scientific Information (ISI).

SEM is indexed in *Biological Abstracts, Index Medicus, Excerpta Medica,* and ISI's

Public Performance

VIDEO™

License Your Library

Many libraries lend movies on video cassettes for their patrons to view at home. But what they don't realize is that these same cassettes can be used for exhibition to audiences inside the library.

MGM/UA's Public Performance Video Licensing Program enables you to do just that: to show all our classics and most recent blockbusters anywhere within the library.

Why should cassettes sit idle on the shelf when MGM/UA's Video Licensing Program will enhance the value of your video collection.

With MGM/UA's Public Performance Video License:

- Cassettes serve a dual purpose:
  PATRON HOME USE
  IN-HOUSE EXHIBITION
- In-house video entertainment draws additional patrons, increasing your library's popularity with the community.
- Video cassette format offers your staff the ease and convenience of programming video for small group showings, as well as large audience screenings.

Your library can select and exhibit titles from the worlds's largest catalog of classic and current movies. Choose drama, comedy, family entertainment, action and adventure... THE CHOICE IS YOURS!

Our Video Licensing Program is an easy and economical way to provide major motion picture entertainment in your library.

To license your library and/or get more information about MGM/UA's Public Performance Video Program...

annual *Journal Citation Reports,* but Johari feels a *Current Contents* listing would increase *SEM's* circulation (now 2,000), sell more reprint articles, and attract more scientists to submit manuscripts.

Three years ago SEM, Inc., filed suit against ISI, Inc., in federal district court in Chicago. SEM charged that ISI excludes competition and controls prices. "By virtue of this monopoly power," SEM declared, ISI "effectively controls the exposure to scientists and technicians of a publication in the field of technological sciences, and the access scientists and technicians have to scholarly works necessary for scientific and technological research and development." SEM requested treble damages, fees, and immediate inclusion in *Current Contents.*

Judge John F. Grady began hearing the case in June. Eugene Garfield, founder and president of ISI, testified Oct. 2. The next day, Judge Grady delivered an oral decision, finding that ISI is not abusing its monopoly, preventing competition, or controlling prices. Grady recognized *SEM* as a journal of significant scientific material and agreed that its absence from *Current Contents* may be damaging, but he said relief is not in the existing law. After ruling that SEM must pay all court costs, Grady dismissed the case.

Johari told *AL* he planned to ask Garfield to treat *SEM* as the significant journal the judge said it is and include it in *Current Contents.*

news in brief

Administrators, librarians pair off. Nineteen pairs of library directors and university administrators from across the continent shared views on information issues at a symposium at Northern Illinois University in DeKalb Sept. 17–18.

The symposium was entitled "Administrative Perspectives on the Changing Role of Libraries in Higher Education: Critical Issues and Challenges for the 80's." It was funded by the NIU Office of the Provost and the University Libraries directed by Theodore F. Welch, who chaired the planning committee.

Keynote speakers were Robert Wallhaus of the Illinois Board of Higher Education and Roderick T. Groves of the Illinois Board of Regents, who discussed how the shifts in demography, the increasing use of computer networks, and the impetus for educational reform are affecting academic libraries.

Illinois Secretary of State and State Librarian Jim Edgar said that an increasingly college-educated public must have free access to academic library materials through networks housed in local public libraries. Support for research-sharing provided to the state university system has made the University of Illinois at Urbana the largest "public-academic library" in Illinois, he said.

—from a report by George Eberhart

Casey returns to NCLIS. President Reagan appointed ALA Councilor Daniel Casey of Syracuse, N.Y., to the National Commission on Libraries and Information Science (NCLIS) in October. Casey, an Onondaga County Public Library trustee and former president of the American Library Trustee Association, served on the commission in 1973–78.

Casey and Pat Barbour of Dearborn Heights, Mich., will fill terms that began in July and will end in 1989. Their appointments require the approval of the Senate. Also pending in the Senate are the NCLIS appointments of Margaret Phelan of Kansas and Wanda L. Forbes of South Carolina. Reagan appointed Phelan and Forbes to fill the five-year terms that began in 1983.

Ladd to leave Copyright Office. David Ladd, who succeeded Barbara Ringer as Register of Copyright in June 1982, has resigned effective Jan. 2. Ladd, who is also assistant Librarian of Congress for Copyright Services, will join the communications-law firm of Wiley and Rein in Washington, D.C.

"Karibuni Kenya"—Welcome to Kenya!

First IFLA in Africa inspires delegates

by Josephine Riss Fang

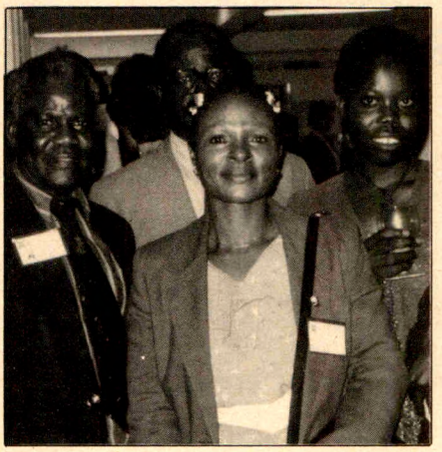
DELEGATES ATTENDING THE 50TH General Conference of IFLA in Nairobi, August 19–25, were well aware of the historic occasion: For the first time in its 57-year existence, the International Federation of Library Associations and Institutions met on African soil. It was only the second meeting in what is considered a developing country; the first was 1980 in Manila. The conference theme—"The Basis of Library and Information Services for National Development"—focused on the need for effective library services and their support by governments in developing countries.

Ever since extending an official invitation at Copenhagen in 1979, Jafred S. Musisi, president of the Kenya Library Association and chair of the Local Organizing Committee, had labored with a dedicated group of colleagues to make the conference a success. Their efforts were well rewarded: after a week of intensive programs, working sessions, discussions, and cultural and social activities, delegates generally rated this conference as one that had confronted them with the issues and concerns of the Third World. ALA President E. J. Josey, who headed a group of ALA Black Caucus members for a pre-conference seminar with the Kenya Library Association, observed: "Many of us do not understand the difficulties in which libraries in the Third World work."

Nairobi, the capital of Kenya, is still the "Green City in the Sun," with high-rises, international offices, and luscious tropical gardens in modern hotels, despite the great drought in Africa. Good will and pleasant weather prevailed throughout the conference. Librarians could visit Nairobi libraries and choose excursions to see the area's famous wildlife and scenery. Many participated in safaris or took time to shop for Akamba wood carvings, Kisii stone sculptures, or the popular Kenya bags, which were distributed to each registrant. Festive receptions took place in the Parliament Building and the American Cultural Center, site of an Electronic Age Book Exhibit.

A memorable evening at the home of Library of Congress Field Service Director James C. Armstrong, and another one featuring the colorful dances of the Bomas of Kenya, offered relaxation and informal exchanges.

Josephine Riss Fang, professor at the Graduate School of Library and Information Science, Simmons College, chairs the IFLA Section on Library Schools and Other Training Aspects and the IFLA Division of Education and Research.



Gathered in Nairobi, at top, are Elinor Hashim, NCLIS chair; Guy Brown of USIA; Gerald Thomas, U.S. ambassador to Kenya; William Lukasavich, director of the American Cultural Center in Nairobi; Anne Mathews, University of Denver library school; and Robert Wedgeworth, ALA executive director. Below, J. S. Musini, left, chair of the Kenya Library Association, and colleagues attend an American Cultural Center reception, and children entertain IFLA guests in the home of C. K. Wambugu, deputy chief librarian of the Kenya National Library Service.

Third World challenges

The Government of Kenya—used to international meetings at the modern, sprawling Kenyatta International Conference Centre (KICC)—was represented by several high officials. Vice President Mwai Kibakii, opening the first Plenary Session, set the tone for the conference in an eloquent, pointed speech. He encouraged libraries in developing countries to promote children's reading habits and adult education, while being aware of the important role of oral tradition.

Some current challenges facing Kenya are the high cost of producing reading materials (there was much talk of strengthening indigenous publishing in the Third World), the use of modern technology for the storage of available material, and conditions in rural areas making teaching and literacy more difficult. These points were emphasized by P. R. Kinyanjui (Kenya), who called librarians "adult educators par excellence." Kinyanjui voiced a special concern of the Third World, namely that "by the year 2000 the world will be divided by those who have access to relevant information and those who have not."

Among the estimated 800 participants were a large number from developing countries and representatives from Unesco, FID, ICA, and other international organizations, with a good number of delegates from the United States.

Exhibits by local bookstores, publishers, and other enterprises were spread throughout the Conference Centre. The forthcoming

1985 IFLA Conference in Chicago was heralded by a handsome poster display. Brochures described the first "World Conference on Continuing Education for Library and Information Science Professionals," organized by ALA and the IFLA Section on Library Schools for August 1985.

The usual combined exhibition for IFLA did not materialize. Apparently, customs held up the shipments of books, periodicals, library equipment and other items from IFLA publisher K. G. Saur, Swets and Zeitlinger, Springer-Verlag, Library Association Publishing, and additional participants. This material, valued at some $60,000, was meant to be donated to the Kenya Library Association after the conference. Librarians from Kenya and other developing countries were thus unable to see IFLA publications and some of the library equipment firsthand.

The "Nairobi Manifesto"

Papers presented in more than 200 sessions dealt with topics ranging from grass-root-level beginnings and literacy programs to UNIMARC (Henriette Avram, U.S.A.), the Universal Availability of Publications (Maurice Line, U.K.), education and training (A. Wambugu, Kenya; V. Lesokhina, U.S.S.R.; M. Benjeloun, Morocco; S.A.H. Abidi, Uganda; M. M. Aman, U.S.A.), and personnel resources.

A pre-conference seminar focused on aspects of grass-roots training, resulting in a "Nairobi Manifesto, 1984," which reaffirmed the need for effective library services, stressed the importance of oral tradition, and called on governments for support.

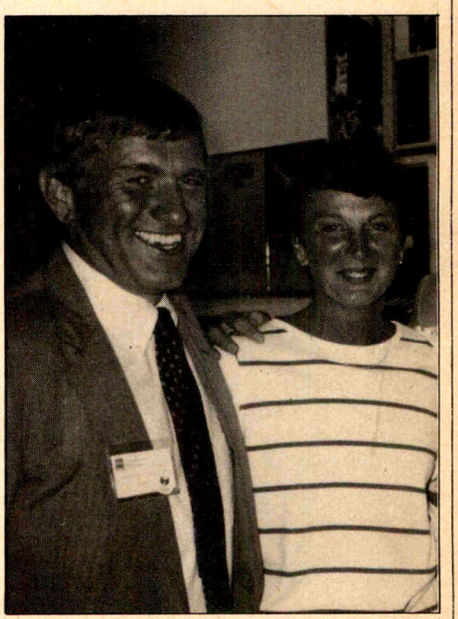
The African Section reported on its pioneering projects and proudly distributed the second number of its newsletter *IFLA Africa News*.

Three major core programs will be incorporated in IFLA activities: Advancement of Librarianship in the Third World, Conservation and Preservation, and Trans-Border Data Flow (TDF).

The Chinese delegation, headed by Sha Hu, deputy director of the National Library, presented to the Section on Library Schools a proposal that was enthusiastically endorsed: to hold a first seminar in China following the IFLA Conference in Tokyo, 1986.

In the festive closing session, Kenya Minister for Culture and Social Services K.S.N. Matiba thanked the delegates on behalf of the government and the people of his nation and welcomed future assistance in shaping the young generation of Kenya into readers. When Margreet Wijnstroom, in her private role as a librarian from The Netherlands, presented a check for $6,500 as a gift from her nation's librarians towards the establishment of school libraries in Kenya, all were visibly moved.

IFLA President Else Granheim of Norway presented the IFLA Medal to former British Library Director Sir Harry Hookway "for great contributions to international librarianship and IFLA, 1978–84." Pleased with the exceptional press coverage of IFLA during



Faces at IFLA included David Bender, executive director of the Special Libraries Association, and Pat Moholt, associate director of libraries, Rensselaer Polytechnic Institute.

HOW LONG WOULD IT TAKE TO ACQUIRE ANNUAL REPORTS FOR 3,000 KEY NON-U.S. COMPANIES?

AS LONG AS IT TAKES TO MAKE ONE PHONE CALL.

No more time-consuming inquiries to individual companies.

Now just one phone call to UMI can put you in touch with full-text annual reports for leading corporations from 40 countries, 6 continents, and 26 industry groups.

Choose the complete 3,000-reports set or a customized collection. Beginning with fiscal year 1983. For as low as $1.00 per company with a charter subscription. In convenient microfiche.

And all the text is completely legible or your money back.

Why wait? All it takes is one phone call.

the Conference, she expressed hope that this interest in libraries in Kenya will continue, along with support by the government.

IFLA 1985: Chicago

Robert Wedgeworth, ALA executive director and co-chair of the U.S. IFLA Conference Planning Committee, invited colleagues to the next IFLA Council and General Conference, August 18–24, 1985, in Chicago. In addition to sessions on the theme, "Libraries and the Universal Availability of Information," the conference will include a full program of cultural and social events, including an American-style block party.

To request a detailed Preliminary Program and other information on the 1985 conference, contact Robert Doyle, IFLA '85 Coordinator, 50 E. Huron St., Chicago, IL 60611, U.S.A. (phone: 312-944-6780). □

At his Kenya exhibit, IFLA '85 coordinator Robert Doyle demonstrates to Lenore Coral of Cornell the warm reception guests can expect at the Chicago international conference.

QUICK-BIBS: New and recent books on a timely topic

Bill Ott, compiler

ABORTION

Abortion may have polarized the American public more widely than any other social issue. As the debate rages over the moral, political, and legal aspects of abortion policy, the need grows for libraries to provide reliable materials on all aspects of the subject — particularly after an election campaign in which abortion became a major area of disagreement between the presidential candidates. The following list of recently published books encompasses both the right-to-life and pro-choice positions, as well as titles that strive for an impartial presentation of the facts behind the controversy.

Corsaro, Maria and Korzeniowsly, Carole. *A Woman's Guide to Safe Abortion.* Holt, 1983, $12.95. (0-03-060603-9, 82-15652)

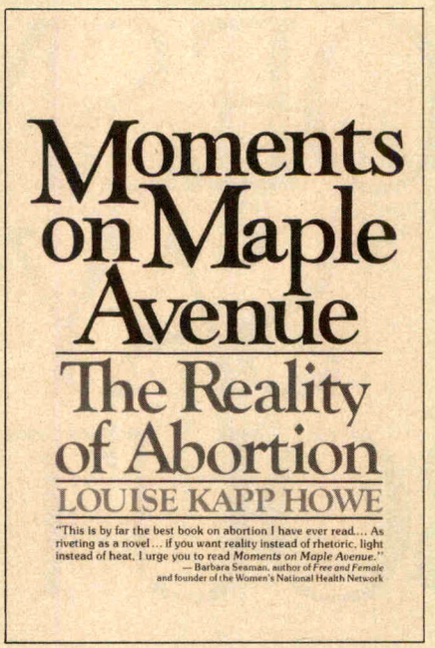
For women who have made the decision to have an abortion, this practical guide describes the operation itself and discusses such related issues as medical complications, emotional recovery, and what to look for in an abortion clinic.

The Death Decision. Ed. by Leonard J. Nelson. Servant Books, 1984, $7.95. (0-89283-144-8).

This collection of essays examines the ethical implications of various technical advances in biomedics. The authors, speaking from a Christian point of view, address not only abortion but also amniocentesis and euthanasia. They argue that the "New Biology" undermines a fundamentally human respect for life.

Hekman, Randall J. *Justice for the Unborn: Legal Abortion and How We Can Stop It.* Servant, 1984, $8.95. (0-89283-194-4, 84-5424)

A Michigan judge discusses a case in which he denied a 13-year-old girl's petition to have a court-ordered abortion. Hekman's arguments in support of the right-to-life position are clearly stated, and he does a good job of exploring the legal ambiguities of current abortion law.



Howe focuses on a day in the life of an abortion clinic to present the abortion issue in microcosm.

Howe, Louise Kapp. *Moments on Maple Avenue: the Reality of Abortion.* Macmillan, 1984, $13.95. (0-02-555170-1, 84-12244)

A day in the life of an abortion clinic. This graphic portrait moves away from ideology to focus on people — employees and patients at a White Plains, N.Y., clinic. Readers with different viewpoints will draw different conclusions from Howe's very vivid book.

Luker, Kristin. *Abortion and the Politics of Motherhood.* Univ. of California. 1984, $14.95. (0-520-04314-6, 83-47849)

This scrupulously researched study of the abortion issue combines revealing profiles of right-to-life and pro-choice advocates with fascinating historical surveys of both movements. Luker's account should be a first choice for libraries needing an impartial, closely reasoned statement of what the abortion controversy is all about.

Milbauer, Barbara and Obrentz, Bert. *The Law Giveth: Legal Aspects of the Abortion Controversy.* Atheneum, 1983, $21.95. (0-689-11312-9, 82-45184)

A straightforward detailing of the role the law has played and is continuing to play in determinng national abortion policy, this valuable resource provides excellent background material on the question of legislating ethical concerns.

Paige, Connie. *The Right to Lifers: Who They Are, How They Operate, Where They Get Their Money.* Summit, 1984, $13.95. (0-671-43180-3)

Although the author of this survey of the right-to-life movement is herself a pro-choice advocate, her profiles of prominent anti-abortion activists and her analyses of their beliefs are presented with notable even-handedness. The chapters on how the movement is financed are especially interesting.

Reagan, Ronald. *Abortion and the Con science of the Nation.* Thomas Nelson, 1984, $7.95. (0-8407-4116-2)

President Reagan doesn't pull any punches in this forthright statement of his anti-abortion position. Along with the president's by-now-familiar opinions, the volume includes related writings by Malcolm Muggeridge and U.S. Surgeon General C. Everett Koop. □

Bill Ott, *who writes this column freelance for* American Libraries, *is books-for-adults editor of ALA's* Booklist *magazine.*

SOME THINGS OUR COMPETITION DOESN'T SAY ABOUT US.

(AND WE DON'T BLAME THEM.)

Everybody is talking about our Tandem-based ALIS III system.

Even our competition.

But we'd be surprised if they were telling you everything.

For example, have they mentioned that ALIS III has more powerful built-in design features than any other software?

Or told you how those features can save you time and money, and improve your productivity?

No? We didn't think so. So here are some facts we'd like you to know.

HOW DATA PHASE SOFTWARE LETS YOU ACCOMPLISH MORE IN LESS TIME AND WITH LESS EFFORT.

With every keystroke, ALIS saves you searching and updating time. Because all of the critical information and procedures you need are thoroughly linked together at one terminal, right at your fingertips, there's never a need to retrieve separate files for related information.

And with the abundant access points provided by ALIS' full MARC database, your patrons are assured that their searches are finding everything your library has to offer.

HOW EASILY DATA PHASE LETS YOU CHANGE MANAGEMENT POLICIES.

Data Phase gives you literally thousands of bibliographic, circulation, acquisitions and management parameters for customizing your system's online limits to your library's policies.

With an authorized password and a keystroke, you can change dates, fine policies and all library guidelines quickly and accurately.

HOW DATA PHASE PUTS YOU IN CONTROL IMMEDIATELY.

Right from the beginning, ALIS III is easier to use.

Clear, simple information is delivered in well-defined user friendly form. One-half of the screen gives you the data, the other half prompts and directs you to all of the additional files of information that are available.

There's less to memorize. And less valuable staff time required to learn the system.

HOW DATA PHASE'S FAULT-TOLERANT DESIGN IS BETTER THAN THEIR "FAIL-SAFE" DESIGN.

ALIS III has built-in fault tolerance.

It is designed to automatically anticipate and operate around failures, not simply react to them.

Any hardware component can fail and the system will continue to run without interruption, without losing a single transaction, and without erasing information from the database.

You can expand the system, make repairs, remove parts and replace them while the system keeps on running.

Today, only ALIS III provides your library with a truly fault tolerant system.

HOW THE COST OF OWNING A DATA PHASE SYSTEM IS ACTUALLY LESS THAN THEIRS.

A competitive system might be bid less than Data Phase, but over a period of time, the economics of ALIS III are far more cost effective. And the cost of ownership over the life of the system is significantly less.

The powerful interaction of Data Phase software and Tandem hardware provides you with a per transaction cost that is lower than that of any other system. Its unparalleled integration and efficiency gives you increased staff productivity. And dramatically decreased administrative demands.

And we protect your investment by programming ALIS in the most common language utilized by computers — COBOL. So that your system will be compatible with any new technology you would like to integrate into your system.

FIND OUT THE REAL FACTS ABOUT ALIS III.

Just call us today at 913-262-5100. We'll tell you even more that our competition isn't talking about.

Data Phase

A superior approach to library automation.

LETTERS AND BRIEF COMMENT FROM OUR READERS

American Libraries encourages signed comment on recent content in our pages or on matters of general interest to the library profession. Letters beyond 250 words will not be accepted or will be edited to fit space; longer contributions may be submitted to the "On My Mind" department.

Books for babes

I READ ROSE MARIE ANTHONY'S article, "No Signature, No Library," (Sept., p. 567–68) with great interest. At the San Francisco Public Library children are not required to wait until they can print their names before applying for a library card. Parents (with child in arms) may apply for them from the moment they are born.

Since the late 1960s, SFPL has targeted service to preschool-age children and their parents as a top priority. Our Early Childhood Project, the "You, Your New Baby, and the Library" programs, and the current "Infant-Toddler Lap-Sit" programs have all recognized the importance of infants and young children being exposed to books, literature, and libraries. By allowing parents to apply for library cards in their infants' names, SFPL has supported its programming and the parents who need not be penalized when they exceed the circulation "limit" in selecting books for themselves and their young children. When the policy was first implemented, juvenile library card applications were available in Chinese, Japanese, Spanish, and Tagalog as well as in English to facilitate the process for many parents.

I hope that Anthony's article will lead other libraries to drop the printed name system and "encourage library use from the youngest age on."

GRACE W. RUTH, ALA member,
San Francisco (Calif.) Public Library

Is it ethical?

The ALA Ethics Committee has asked *American Libraries* to publish some hypothetical questions designed to stimulate thought on ethics in professional library service. Here's the sixth in the series:

Is it ethical for library staff to have benefits exceeding those of users: i.e., first crack at reading bestsellers; free photocopying privileges; or returning overdue books without penalty?

Comments under 150 words sent to *American Libraries* (Editor, "Reader Forum") will be considered for publication.

Winning in a walk

SOME INFORMATION WAS OMITted concerning the ALA Fun Run and Walk at the Dallas Conference (July/Aug., p. 491). I was the first male to cross the finish line and the fifth finisher overall in the walk. Although it was announced that the first male and female finishers would be recognized, my achievement keeps being omitted or ignored by the media. The trophy intended for me was given to the second female finisher. It's not a big deal to me, but those around me insist I've been a victim of sex discrimination, so please print this to set the record straight.

JIM COOMBS, ALA member,
Southwest Missouri State University Library, Springfield

Bundle of joy

I WAS UNPLEASANTLY SURPRISED to read that many libraries require a child's signature before issuing a library card (Sept., p. 567–68). Since when is the ability to sign one's name a prerequisite for enjoying library materials?

The Windsor (Conn.) Public Library, where I am children's librarian, has a very different attitude toward children and library cards. Because we believe it is important to instill a love of books and reading at the earliest possible moment of a child's life, we actually invite newborns' applications for library cards. We distribute "Baby Bundles" to new parents. Each bundle contains a library card application and a bibliography of materials useful to new babies and new parents. Response to the Baby Bundles has been positive and enthusiastic.

It is important that all children of all ages and abilities can use and enjoy the many benefits of the public library. I hope that signature requirements represent a dying trend in a profession dedicated to serving the community at large.

BETSY WILKENS, Windsor (Conn.) Public Library

Philoxentic, not xenophobic

I ENJOYED ART PLOTNIK'S XENOphobic diatribe against outside speakers at the recent ALA convention (July/Aug., p. 474). But I must confess that rather than being xenophobic to outsiders, I'm philoxentic, and phlogistic toward the encephlophonics within the profession. I am, quite candidly, sick of these library philologasters telling us which button to push next, and how démodé books are.

Although I am not in agreement with all the outsiders had to say, much of the advice in your catalogue raisonné of "pap" that ALA-goers got is just the sort of beef we need. The fact that we need this kind of talking-to is quite easy to understand: we haven't done it ourselves yet. When a child still acts like an enfant terrible, you can't complain when everyone treats him like a brat. And when the library profession hasn't achieved most of its elementary goals, like making the library a sanctuary of books, you can't very well complain when outsiders tell us this is what they want from us. If anything, library flaneurs—otherwise known as the pundits of the profession—are telling us quite the opposite. The library, we hear stridently proclaimed, is hardly a place of books or a place of the mind. Oh, sure,

"We're a small library, with a small library's budget."

"But thanks to the ISI® Grant Program, we can afford the big library coverage and the currency of the Arts & Humanities Citation Index™ and the Social Sciences Citation Index®."

For over ten years, the ISI Grant Program has been helping "small" libraries just like yours purchase ISI's major indexes at significant discounts. Today, libraries at California State College, Eastern Kentucky University, the Illinois State Library, and the Minneapolis Public Library are just a few of the institutions that own ISI indexes as a direct result of these discounts. Thanks to the ISI Grant Program, the patrons of these libraries now have access to the thorough, precise literature search capabilities of the *Arts & Humanities Citation Index* and the *Social Sciences Citation Index*.

Isn't it time *your* library discovered the ISI Grant Program? To find out how your library can qualify, just mail the coupon. We'll send you a free, no-obligation evaluation form that will help us determine your library's eligibility. Or, if you'd like more information about the ISI Grant Program, call our Customer Services Department at 800-523-1850, extension 1371. In Pennsylvania, call collect 215-386-0100, extension 1371.

Send me a preliminary application form for the ISI Grant Program. I am interested in purchasing:

- ☐ *Social Sciences Citation Index®*
- ☐ *Arts & Humanities Citation Index™*

it's that, but it's so much more than we're told. Consider, Mr. Plotnik, that the outsiders handed the profession a report card. They consider us to have flunked in the most important area. •

Rather than spend all our time worshipping the machine, crying about this or that technicality, and attempting to play the schadenfreude by driving a wedge between parents and children, why not return to the first tenet of librarianship: books? I know it sounds corny, but it may very well be our last and only cure for a profession hell-bent on obsolescence.

MARK Y. HERRING, King College Library, Bristol, Tenn.

Making mountains out of no-hills

I WANT TO POINT OUT WHAT APpears to be an error in the news item about the closing of the Denver library school (July/Aug., p. 476). The story reads: "No consideration was given to the high quality of or need for the 52-year-old school, which directs the only ALA-accredited program in 11 mountain states. . . ."

If you count Brigham Young University's accredited program in Utah (next door to Colorado) I don't see how the number of mountain states could possibly total 11, even if the Dakotas, Kansas, and Nebraska are included (some would consider them to be plains states).

We at the BYU library school were saddened to learn the fate of the Denver library school. We have many friends there and have great respect for their quality program. We wish them success in their endeavor to find a new home in one of Colorado's schools of higher education.

NATHAN M. SMITH, ALA member, director, Brigham Young University library school, Provo, Utah

Info stress for libinfospecialists

YOUR DRAMATIC EDITORIAL ON "information stress" (Sept., p. 549) prompts me to forward the following definitions from the latest version of my "Selections from a *Dictionary of Libinfosci Terms*." The article, which offers further definitions from the April 1, 2050, edition of the dictionary, is to be published in a forthcoming issue of *Technical Services Quarterly*.

Information stress: A professional mental disorder, first diagnosed in 1984, which had become endemic in the United States by 1995. The inability of librarians and information specialists to cope adequately with information stress was another element of the information disaster of 1996. The ability of libinfospecialists to properly diagnose and treat this disorder has largely eliminated it. Information stress was characterized by a feeling of insecurity in dealing with either the quantity of information to be organized or with the quality of information as it dealt with information science.

Libinfosci: The most lucrative and prestigious profession of the second half of the twenty-first century, libinfosci holds the place of public prestige once accorded to doctors and lawyers. Libinfosci is the profession that deals with the care and treatment of information, and information disorders, and the application of information to all aspects of human existence.

If they'd been librarians **by B.B. Rile**

King Arthur spends his nights at round tables.

Supervisors' salaries at UC

IN THE ARTICLE ON THE AGREEment between the librarians' union and the University of California (Sept., p. 550), chief union negotiator Joyce Toscan is quoted as saying, "We've had a strong belief at the University of California that there should be no difference in salaries between administrators and working librarians."

This statement is misleading and needs clarification. Administrators at UC libraries (assistant and associate university librarians who administer public services, technical services, personnel, etc.) do indeed have a pay scale both separate and higher than other librarians. It is true that supervisors (typically department heads) and non-supervisors have the same pay scale and that this state of affairs has been supported by a majority of the members of the UC Librarians Association—the majority of whom, of course, are non-supervisory librarians!

In what is perhaps unprecedented in the history of collective bargaining, those employees who are excluded from the librarians' union (supervisors) have the exact same salaries, benefits, and conditions of employment as do those employees (non-supervisors) who are included in the union and are covered by the bargaining agreement.

At UC libraries, administrative librarians have a separate pay scale, and there is a strictly demarcated library-assistant series (ranging from LA I–V). It is only mid-management librarians whose role and responsibilities are not accorded the compensatory recognition that is standard in other academic libraries.

I will leave to the reader's imagination how this personnel policy affects the morale of supervisory librarians at the University of California.

GREGOR A. PRESTON, ALA member, Shields Library, University of California, Davis

Costs discouraging member input

ONE OF THE PRINCIPAL REASONS for my having run for Council two years ago was my feeling that someone should be voting against dues increases. Considering the many grants and special projects which the Association handles, dues income is now well below the 20 percent of total revenue claimed by ALA, possibly even below 10 percent.

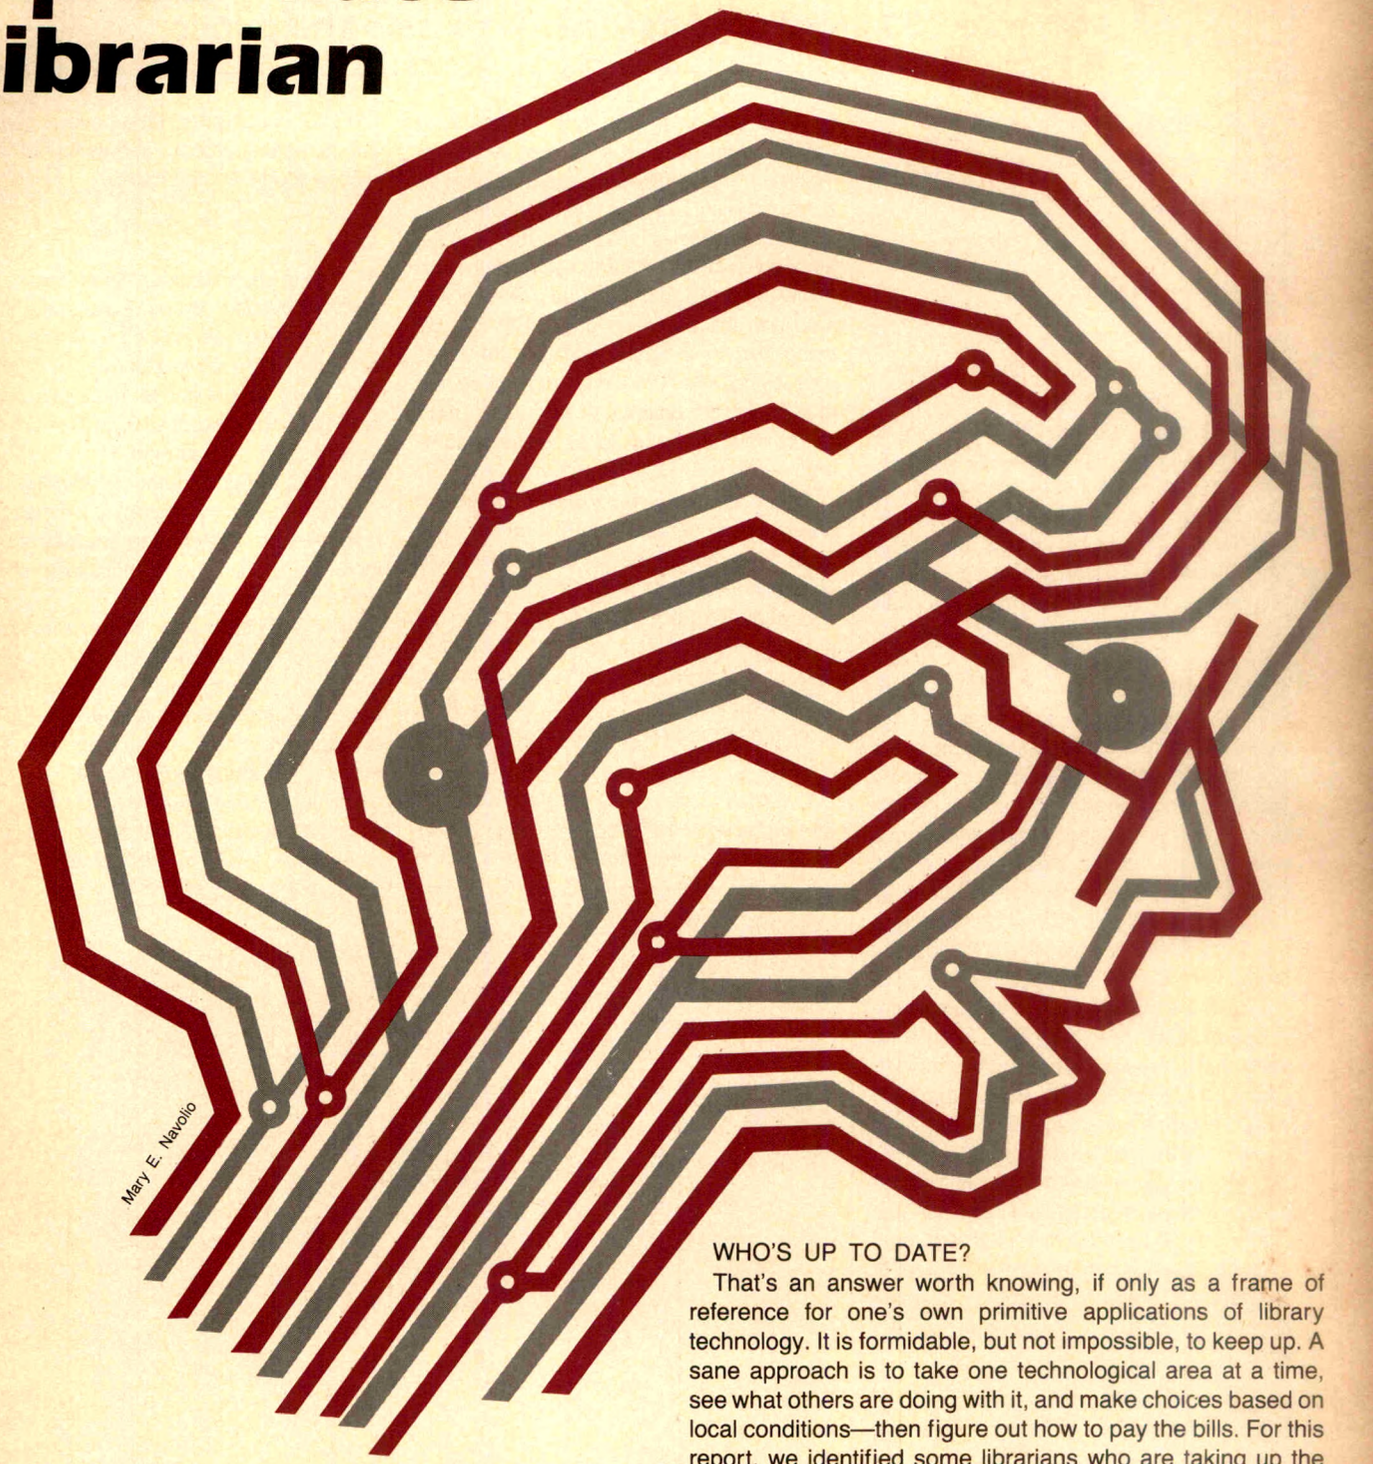
As a result, we must face the fact that members are becoming less and less important to a very large organization. When we elect a president, he/she is able to work on policy for only one year. The conferences are obviously attended more and more by directors and well-funded persons. At the same time, the ordinary librarian who earns under $20,000/year cannot handle the costs of these meetings often enough to run for Council, or attend once a year, or even alternate years. The organization can easily escape input from members, and perhaps it does not even need them other than for structure.

In the meeting this past summer at Dallas, as well as last Midwinter in Washington, I found myself outvoted and out-argued by people who like the ALA we have now, and who are willing to pay increased dues without fearing that we shall lose members thereby.

I feel it is important at this time to invite the contributions of members who may be considering dropping membership because of cost (April, p. 258) so that their voices are heard. I have always been very proud of the American Library Association and its capacity for giving voices to a diverse collection of dedicated professionals. I do not want to lose this quality by losing a strong membership base which includes the chronically underpaid but extremely valuable working librarian from the "real" world.

ELIZABETH MORRISETT, ALA member and Councilor at Large, Butte, Montana □

The technologically up-to-date librarian



Mary E. Navolio

A special report from American Libraries

WHO'S UP TO DATE?

That's an answer worth knowing, if only as a frame of reference for one's own primitive applications of library technology. It is formidable, but not impossible, to keep up. A sane approach is to take one technological area at a time, see what others are doing with it, and make choices based on local conditions—then figure out how to pay the bills. For this report, we identified some librarians who are taking up the technological challenges in specific areas and asked them to describe their technology, rate its value to the library, and make some wishes for the future. We strove for interest and variety in selecting our examples.

We also introduce a technological prototype from ALA, and hear from an administrator now designing a high-tech library from scratch. Many thanks to our technologically-up-to-date contributors. —*A.P.*

REFERENCE POWER

A corps of librarians performs 1,500 searches yearly on some 300 electronic databases to help the public

by Evelyn Greenwald, director of the Southern California Answering Network, Los Angeles Public Library

A LIBRARY PATRON IN CHINO WANTS information on the "queen bee syndrome," a term for women in management. A researcher in Los Angeles needs information "right now" on the poisonous skin secretions of the Pardacherus Marmoratus, a sole fish found only in the Gulf of Aqaba. A Hollywood scriptwriter wants examples from literature and drama of the concept of the "alter ego." A businessman in Norwalk must have within the hour a list of the top new-car dealers by sales volume in southern California.

To answer questions such as these from public library patrons, the librarians in the Southern California Answering Network (SCAN) use an array of databases. SCAN is a federally funded regional resource center located at the Los Angeles Public Library. The center provides a reference referral service for six public-library cooperative systems encompassing 173 libraries in southern California. Since 1976, beginning with the old New York Times Information Bank, databases have been an integral part of the service. Now SCAN subject-specialist reference librarians perform 1,500 searches a year using BRS, DIALOG, NEXIS, and ORBIT databases.

SCAN librarians view databases as powerful reference sources, available for use along with a multitude of standard print sources. Each librarian, in the course of answering a reference question, decides if a database search is appropriate. SCAN does not perform "on-demand" searches. If the librarian finds it prohibitively expensive to print all citations found, a short list of from five to 10 citations is printed and given to the patron as an indication of what is available in the database. If patrons want all the citations or need more extensive searching, they are referred to fee-based retrieval services.

IBM to the rescue

SCAN staff conduct their searches using a Televideo 950 CRT, a Texas Instruments 820 RO printer, and a Vadic 3434 1200-baud modem. (Dial-up is via local Tymnet or Telenet.) This equipment was also used to send and receive a high volume of electronic mail, resulting in jam-ups at the terminal as people waited for turns at the keyboard. A few months ago that situation was alleviated with the purchase of an IBM PC. By using the new microcomputer for word processing, file creation, and electronic mail, the "old" equipment has been freed and is now dedicated to database searching.

SCAN librarians, early and enthusiastic users of computerized information retrieval, have seen the number of databases available to them grow from a modest 50 or so to a bewildering 300-plus. The librarians are subject specialists expert in the bibliography of a particular field. Each librarian concentrates on specific databases, reinforcing and deepening the subject specialization.

Database use has enhanced and strengthened third-level reference service in California. Public-library patrons, often the information-poor, now have access to the increasing amount and variety of information found in databases.

* * *

As high-speed printers type citations to reports, articles, proceedings, and documents, a new need is born. Library users, accustomed to rapid retrieval of information, want to get those materials easily, quickly, and inexpensively. Telefacsimile transmission of material from library to library is a possible method, not widely used at present. As transmission times decrease—and if telephone charges do not increase drastically—telefacsimile should become more viable.

Another answer may be transmission of stored full-text articles from computer to computer, printed at ever-higher speeds; or better yet, transmission of material from a storage library to a screen or printer in the home. Until this glorious future, I'll just be happy to get the two-page article I requested last week via interlibrary loan (yes, I put it on an ALA form) by next week. □

Evelyn Greenwald, director of SCAN, in the center's office at Los Angeles Public Library.

KURZWEIL-PLUS

Good technology for disabled people—and getting it used—is the idea at the Phoenix Public Library Special Needs Center

by Mary A. Roatch, special needs librarian, Phoenix Public Library

A PUBLIC LIBRARY, WHICH EXISTS FOR everyone, should be accessible to everyone. In Phoenix, with the help of technology, it is. Our Special Needs Center was developed to make the library available to handicapped people, their families, and the agencies serving them. Our high-tech aids supplement such basic resources as periodicals, newspapers, large-type books, circulating toys, braille, audio tapes, and videocassettes.

Computers and other new technology can help equalize learning opportunity for handicapped people. For example, synthetic speech and the "artificial intelligence" of the Kurzweil Reading Machine have made most of the library's books instantly available to blind users. A book is placed on the machine, an optical scanner photographs the print, and the information is sent to a computer unit to be read in a synthetic voice. The reading machine—combined with a VersaBraille paperless braille computer, Apple IIe computer with Echo II synthetic speech, and a letter-quality Diablo Printer—enables a blind person to read and write braille or printed material electronically, edit manuscripts, and print out corrected copies. The full circle is completed when the new copy is placed on the Kurzweil and the blind person can hear the revised text. Now that individual can read and write without dependence on a sighted person.

The Center's computer software programs include several word processing programs for blind users, such as Braille-Edit, Documents, Directories, and Textalker. There is also a Braille Fingerspelling program, and education software with synthetic speech. Other technological aids at the Center include a TDD (telephone device for the deaf), video print enlarger, and a microfiche enlarger.

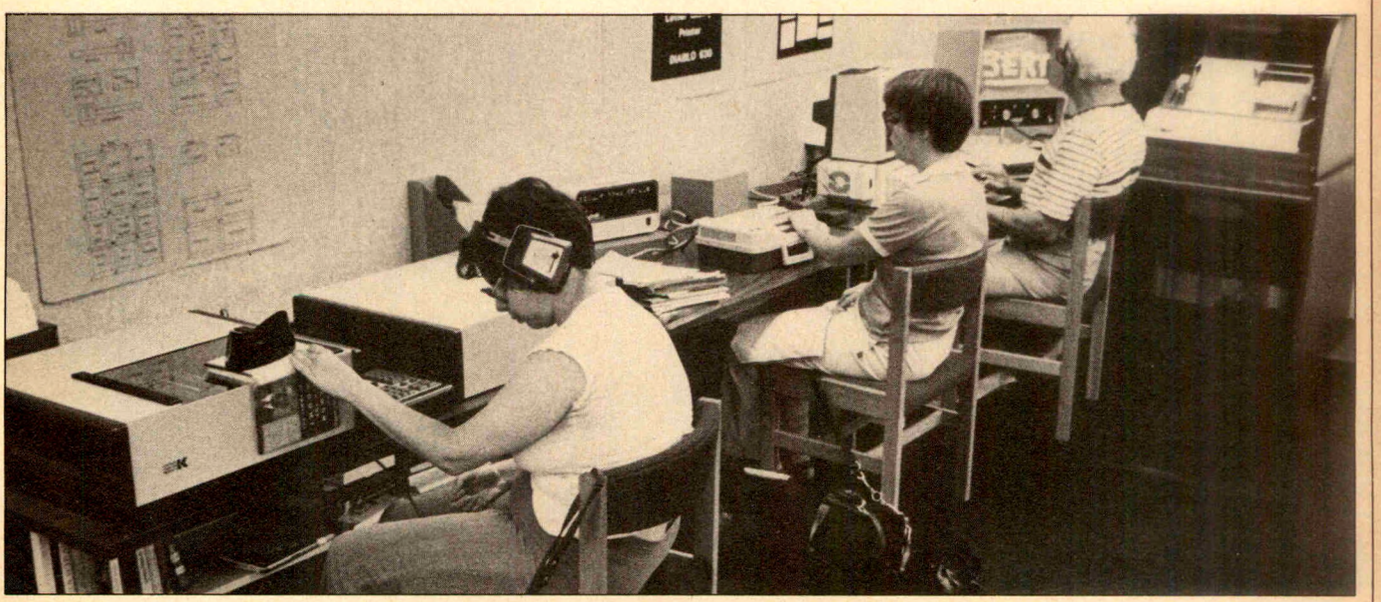
Using these machines has been an exciting venture for both staff and disabled patrons. Our blind library users have ranged from four to 80. A four-year-old has been taught braille on the VersaBraille by one of our blind volunteers. A professor of literature who lost her sight several years ago now reads books not available on tape recordings by using the Kurzweil.

A braille proofreader for the Library of Congress types her weekly reports on the Apple computer, then edits and prints them to be mailed to Washington. For the first time in her life she can do her own proofreading and produce materials independently. A 60-year-old gentleman is learning to type with the Talking Typewriter program so he can write his life story using the computer. A blind student of computer programming uses the synthetic speech of the Textalker to monitor her work; previously, her mother had to read her the text on the screen. These are but a few examples of what blind people are doing with the help of technology.

This forthcoming year, additions to the Special Needs Center will include a Cramner hard-copy braille printer, a computer with a large-type screen, and a copier to enlarge print. Staff will stay up to date on rapidly changing technology for the handicapped by reviewing newsletters, periodicals, and new books.

* * *

We have envisioned the ideal Special Needs Center. Paperless braillers and computers with synthetic speech would be owned in quantity and lent to eligible blind patrons to use for employment, education, and enjoyment. Databases would be accessed by telephone modems and an electronic bulletin board would be produced. The card catalog of library holdings would be put into a computer to become available to blind patrons via synthetic speech. The Center would add more staff and be able to stay open evenings and weekends. Perhaps some day . . . □



Patrons of the Phoenix Public Library's Special Needs Center use, from left, a Kurzweil Reading Machine, a VersaBraille computer, and an Apple computer with Echo II synthetic speech.

MICROFORM TO LINK GENERATIONS

Since 1938, microform technology has figured in the success of one of the nation's foremost genealogical libraries

**by Dan Hogan,
Library Services Division,
The Church of Jesus Christ
of Latter-Day Saints**

BY EFFECTIVELY USING MICROFORM technology, the Genealogical Department of The Church of Jesus Christ of Latter-Day Saints has acquired an extensive collection of manuscript materials from archives and other repositories throughout the world. This collection, now more than 1.4 million rolls of microfilm, includes vital records, church registers, deeds, wills, censuses, and numerous other records having important genealogical information.

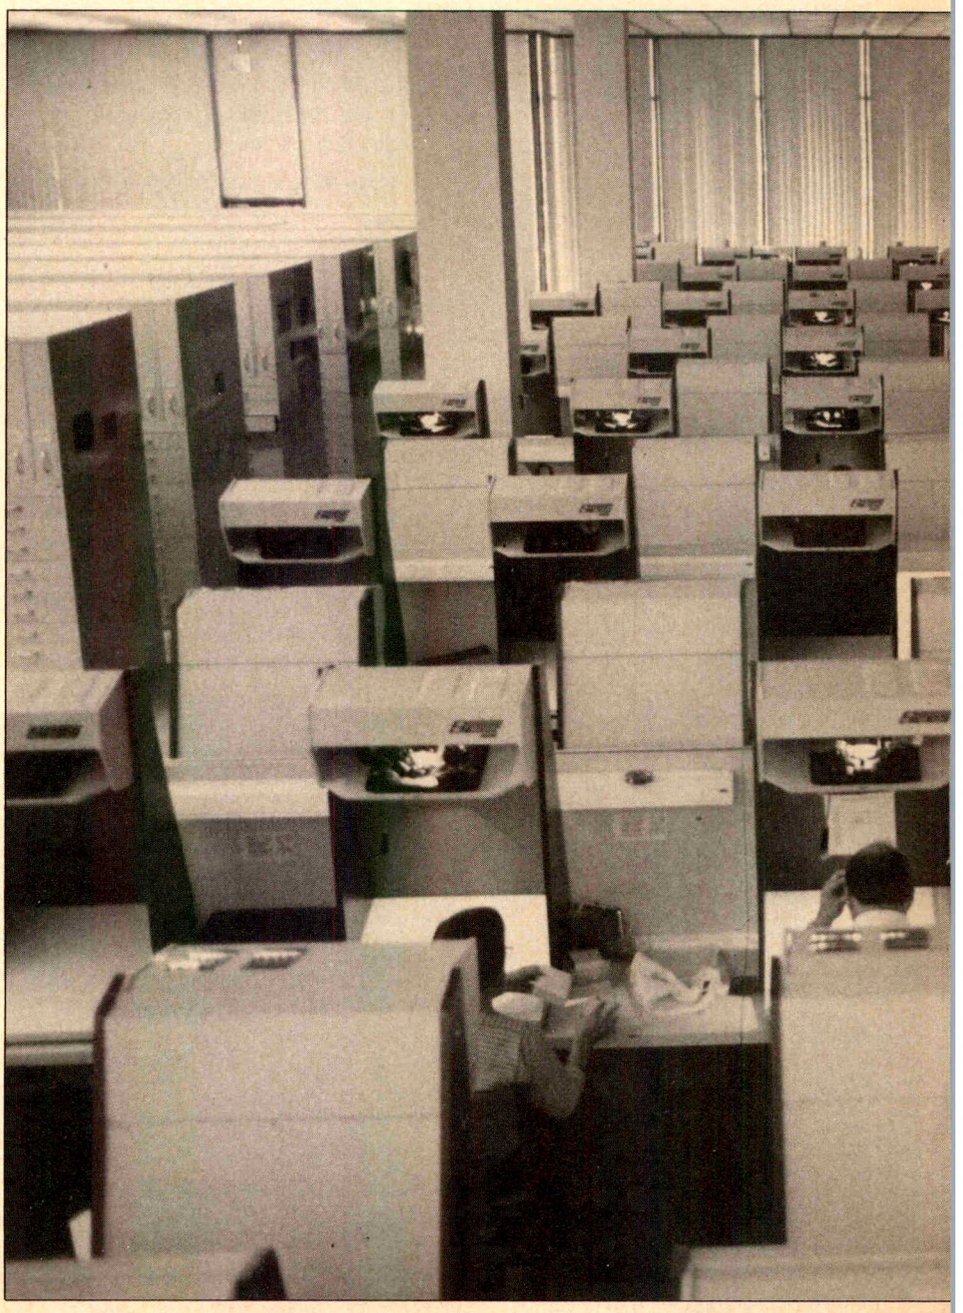
Why such commitment to microforms? Because of our religious conviction of the importance of families and searching out our ancestors, our goal is to provide patrons with the records they need to identify their forebears. Microforms have been the best solution for our collection development objectives. They are a means for making obscure and distant documents available, thus significantly reducing the need for correspondence in research while leaving the original records in the possession of their owners.

The combined use of micro*film* circulation and micro*fiche* collection development has allowed genealogical research to move forward at an unprecedented rate in our branch genealogical library system. Compact, duplicate microfilms can be easily circulated in the mail.

Last year, microfilms were circulated almost 260,000 times to more than 500 branch libraries. To reduce circulation time, we are now helping these branches develop substantial local collections using microfiche. Microfiche's extra compactness allows us to provide collection support for effective research in numerous, more accessible, small branch libraries rather than being limited to a few larger but more distant ones.

Thousands of archives, libraries, and other repositories have given the Genealogical Department permission to microfilm their documents. The owners benefit by having their records thus preserved. A master negative copy of each film is housed in our Granite Mountain Records Vault, where it can be maintained indefinitely at ideal temperatures and humidity. Copies of the films are usually made for the institution that owns the original documents, and replacement films are available at cost.

Unless copying restrictions have been made by the custodians of the original records, copies are also often made for use in the main library in Salt Lake City and for circulating to our branches. This use of



Hundreds of microfilm readers are available to patrons of the Genealogical Department,

duplicate films helps ensure preservation of the information and eliminates unnecessary handling of the master negative.

Filming began in 1938

Microfilm technology was in its infancy when we began filming vital records in 1938. To meet our needs, we adapted equipment made for the movie industry and developed one of the first friction-drive microfilm duplicators. We also worked with Kodak to establish tests and requirements for determining how to ensure archival-quality film preservation. Since then, we have kept abreast of technological advancements and incorporated them in our operation where feasible.

Using some commercially available parts and having a special lens made to meet our specifications, our micrographics division recently developed a 16mm microfilm camera that enables us to photograph three-and-a-half times more information on half as much film than possible with the standard 35mm camera. The new camera can be assembled or taken down in 15 minutes, and fits into two small suitcases. It allows for much greater variety in the size of documents that can be filmed with a single exposure, which is important when filming older manuscripts. When teamed with a 42X reader designed for us by Northwest Microfilm, Inc. (NMI), it produces an image as legible as that of a standard 35mm camera.

Church of Jesus Christ of Latter-Day Saints, Salt Lake City.

We also use computer output microform (COM) extensively. Though we are investigating the use of laser technology, COM remains the most economical medium for distributing automated data throughout our library system. Most branch libraries have COM copies of four major genealogical databases: 1) the International Genealogical Index, which contains vital information on about 88 million deceased individuals; 2) the Genealogical Library Catalog, which will provide complete bibliographic descriptions of all our holdings once the card catalog conversion is completed in 1986; 3) the Family Registry, which helps bring together people who are doing research on the same family lines; and 4) the Accelerated Indexing Systems database, which contains 37 million names indexed from numerous early American documents and censuses. Combined, these four databases are on 10,100 microfiche, yet can be stored easily on a small table top in a five-drawer fiche cabinet. This year we will distribute five million microfiche to branch libraries.

We have made extra efforts to ensure that patrons find our microforms easy to use. All of our microforms are readily available to patrons in open stacks. The main library has 532 film readers, 78 fiche readers, and 28 reader/printers. We frequently experiment with various makes of equipment to find those best suited to our patrons' needs. Presently, we acquire primarily NMI film and fiche readers and Minolta reader/printers.

We will likely see a much greater interface with computers as technology improves. Already we can integrate computer technology to enhance the images that we film and to store, retrieve, and transmit selected image data.

* * *

Ideally, we would like a database that would contain all the vital genealogical information in our collection and could be accessed by patrons coming into the library. That database would also be open to our branch libraries through personal computers and modems. Such a database is not in the near future; but when it does materialize, it will likely be a partner to, and not a replacement for, our extensive microforms collection. In the Genealogical Library, microforms will be a means of linking generations for many years to come. □

UNIVERSITY WELCOMES DOWNLOADERS

Canada's York University encourages free community downloading of its online circulation system, with good results

by Mary Stevens, assistant director for library systems, York (Ont.) University

YORKLINE IS YORK UNIVERSITY'S VERsion of the "Community Access Module" (CAM) of Geac's online circulation system. CAM was first developed by Gene Damon at the University of Waterloo to provide information about the library's holdings to users beyond the confines of the library.

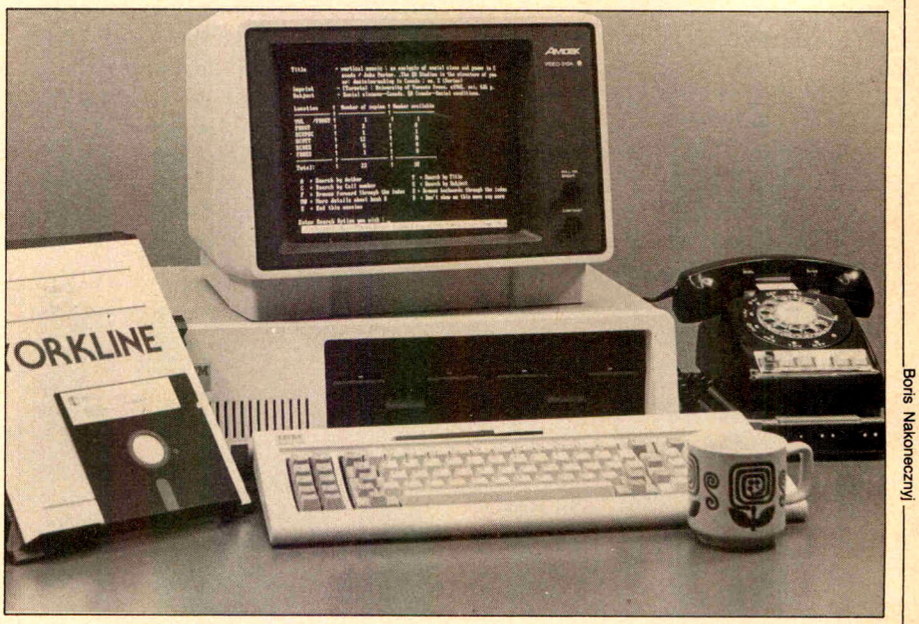
Since January 1984, YORKLINE has made it possible for anyone with a terminal or a personal computer with modem and communications software to dial into the Geac circulation system database for information about the collections in York's five libraries on two campuses.

YORKLINE is a menu-driven system that provides access by author, title, subject, and call number. Brief browsable records may be expanded to a fuller form. The full display shows the call number and up to three lines each of authors, titles, imprints, and subject headings, followed by a grid indicating the number of copies at each location, the number currently available, and the location of reserve copies. A note showing locations and holdings for serials is a local modification.

York's present configuration of one 1200-baud and two 300-baud telephone lines will be expanded according to demand. The time limit on a terminal session, now set at 30 minutes, can also be manipulated to accommodate demand. YORKLINE normally operates 24 hours a day, but on Saturday night the bibliographic indexes are rebuilt. The facility is used at all hours of the day and night, weekends and holidays, providing access when the online system is down and the libraries are closed. There is no charge for the service.

Imaginative users

YORKLINE's users find novel ways to exploit the facility. More and more of them dial in from microcomputers equipped with modems and communication software, rather than from "dumb" terminals. These users take advantage of disk storage and the general-purpose nature of microcomputers to download bibliographic data for later manipulation off-line by word processing or database management software.



Boris Nakoneczny

A cup of coffee, a PC, and . . . . The well-equipped searcher need only add communications software and a modem to access YORKLINE.

Instructors use YORKLINE to produce reading lists. Faculty and students use it to produce bibliographies. One downloader exulted: "I'll never have to write down another call number!" A professor used his lap computer to produce a list of books on his subject to take along on a one-year appointment in China. A computing services staff member downloads selected items into a dBase II database. As microcomputers and word processing software become more available, librarians will make increasing use of the facility to produce a quick reading list or bibliography.

Use of the system is by no means confined to the York University community. It is used by other libraries for interlibrary loan and cataloging, by faculty and students of other universities, and by individuals in business and government. Many are first-time users of computer communications.

YORKLINE has had unanticipated benefits for the libraries. One librarian takes a portable terminal to antiquarian bookstores to check out the libraries' holdings before she buys. System staff use the dial-up facility to test the waters after making changes that could affect bibliographic files in the main system.

Response time on YORKLINE is fast, even at the busiest hours. The service runs in background mode in a small partition of internal memory, and has no adverse effect on the response time of the circulation system. Because users bear the cost of terminals, the cost to the libraries is minimal.

Virtually any configuration of terminal or of microcomputer, modem, and communications software, may be used with YORKLINE. It may be accessed effectively, for example, with an IBM-PC class personal computer, Hayes SmartModem, and the low-cost, user-supported communications software, PC-TALK.

A one-page handout provides basic information on how to use YORKLINE—telephone numbers, baud rates, and terminal settings—and refers potential users to a 15-page booklet illustrating a terminal session. The booklet displays screens as they would appear to a YORKLINE user and offers further explanation. It was produced by "capturing" a terminal session to disk on a personal computer and editing the file with word processing software.

Future plans include working with York's Computer Services staff to make YORKLINE accessible from public terminals throughout the university. YORKLINE's function will no doubt be replaced one day by dial-up access to an online catalog. □

THE IDEAL PRESERVATION BUILDING

At one great research library, new technologies help house and preserve the heritage of centuries

by Bonnie Jo Cullison, Preservation Librarian, The Newberry Library

LARGE-SCALE PRESERVATION OF THE Newberry Library's treasures has taken the form of a 10-story bookstack building, windowless, of double-shell construction, and with computer-monitored environmental, security, and fire-detection systems, and a highly efficient air-filtration system.

The optimum conditions for preserving library materials are not the same as those for human comfort. Therefore, the library chose to separate its book storage areas from the reading areas and support functions. This allows us to maintain a storage environment that will reduce the rate of deterioration for all library materials.

Paul Banks, Conservator of the Newberry Library in 1964–1981, established the environmental standards for the bookstack building, which was completed in 1982. A system was designed to maintain the temperature at 60° ±5°F and the relative humidity (RH) at 50%, with a diurnal fluctuation of no more than ±3% and a seasonal allowable fluctuation of ±6%. The Microtext Masters Storage Room is kept at 35% RH.

These conditions are monitored and controlled by a Johnson Controls JC/85/40 building automation system. Electronic sensing devices located on each level of the bookstack building and in the Microtext Masters Storage Room signal Field Processing Units. These, in turn, report the temperature and RH to the Central Processing Unit (CPU) in the Building Control Systems Room. There, a CRT and printer make it possible to "call up" this information as well as the status of all the individual components of the heating, ventilating, and air-conditioning system at any time.

At periodic intervals, a printout on the status of any of the field data points is run off. Presently the CPU produces a Trend Log for both temperature and RH, storing readings taken at two-hour intervals and printing them out in a specified format every 24 hours. Although the Trend Log has eliminated the need for manually rotating hygrothermographs throughout the bookstack areas, the Conservation staff still uses a Bendix psychrometer regularly to ascertain the accuracy of the thermostats and humidistats. It has been found that the humidistats need frequent recalibration.

High- and low-level limits for all the temperature and RH points have been programmed into the system. If these are exceeded, an alarm is activated at the CRT and, when the library is closed, on a pager worn by the security personnel on duty 24 hours a day. This alarm will sound until it has been acknowledged at the CRT, thus ensuring that the condition is responded to by a trained staff member. A printout of the alarm condition is produced simultaneously.

Clearing the air

Banks' standards for air quality specified that levels of sulphur dioxide and oxides of nitrogen should not exceed 10 micrograms per cubic meter (m^3) and that the ozone level should be no more than 2 micrograms/m^3. To achieve this quality of air in a city like Chicago, we use a three-stage filtration system: an initial particle filter; a second-stage chemisorbant filter (Purafil) of pelletized activated alumina impregnated with potassium permanganate, capable of absorbing, adsorbing, and chemically oxidizing gases; and a final, high efficiency (90–95 percent) particle filter.

The performance of this filtration system will soon be monitored on a continuing basis by Meloy nitrogen oxides and sulfur analyzers. This equipment will sample outside air and air from a stack level to determine the effectiveness of the Purafil. The analyzers will also be tied into the JC/85/40 to signal alarms and provide permanent records.

Although the fire-detection system is not part of the JC/85/40 (it is a stand-alone system with its own auxiliary power source), it is interfaced with the computer to interlock with HVAC functions. If a fire alarm sounds, for example, the computer will automatically shut down the supply-fan units.

The bookstack building has no fire-suppression system (with one exception), relying instead on a high concentration of ionization smoke detectors. The exception is the Special Collections Vault, which has a Halon system, a chemical combustion suppressant. This arrangement eliminates the need for water in the bookstack building.

In fact, there is no vertical penetration between stack levels at all. The levels are self-contained "boxes" stacked one on top of another. The building is attached to the original library by a service link. All plumbing and electrical risers and the elevators are located in this service link.

* * *

Being able to prolong the useful life of library materials by maintaining a stable environment is terrific; but the current environmental conditions are actually a compromise. If economic and user constraints could be eliminated, it would be ideal to literally freeze most of the library's materials—theoretically extending their lives indefinitely. However, this would require "decompression" time and facilities, so that items could be brought gradually into equilibrium with the reading room environments. Also to be considered is the attrition rate of shelvers and pages working under those "ideal" conditions! □

Trend log indicating temperature variations over a 24-hour period. The asterisks in the final two columns indicate that the temperatures in these locations have exceeded the programmed high-level limits.

PUBLIC-ACCESS MICROS

A little equipment can serve scores of walk-in patrons and a whole community of dial-in participants

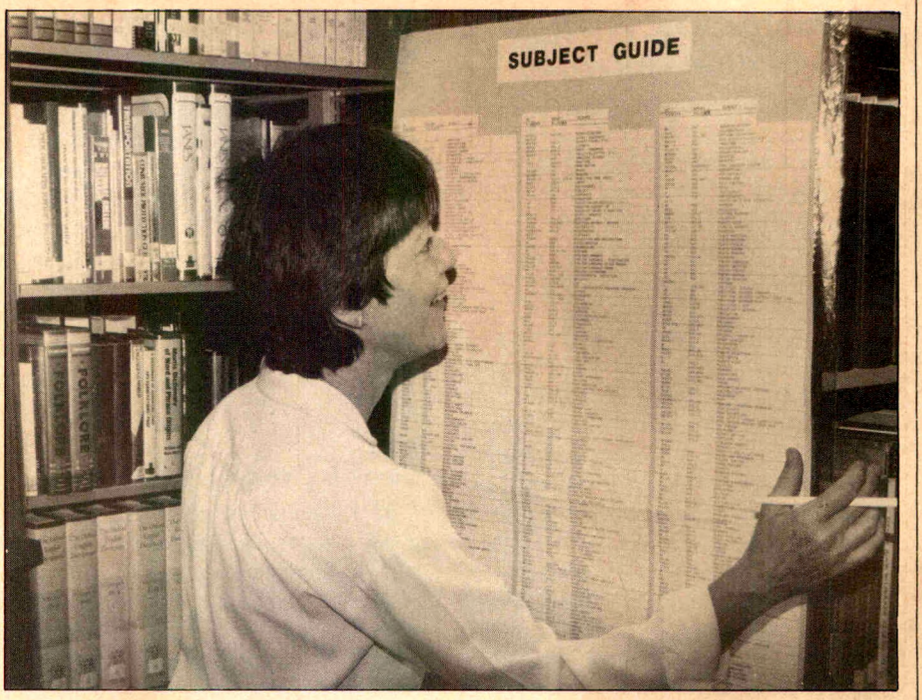
by Patrick R. Dewey, administrative librarian, Maywood (Ill.) Public Library

PUBLIC-ACCESS MICROCOMPUTERS are now seen everywhere. In Chicago, a three-year project at the North-Pulaski Branch Library—the Personal Computer Center—began in 1981 with funds from the Friends of CPL. It received national interest and has led to the establishment of similar Centers at a dozen other branch libraries.* The equipment was complete, but basic: one 64K Apple II+, two disk drives, one dot matrix Epson MX-70 printer, one 300 baud modem, and one BMC monitor—no 80-column card, and the monitor was not color. No matter how many times it was counted, it still came to only *one* microcomputer. The whole package cost just over $4,000. Just what could be done with so little?

Neither we nor anyone else knew the full range of public services this small machine would provide. We did know that success would depend less on the equipment than our own ingenuity. Our first goal was to make the hardware and several dozen diskettes of software available for public use—by appointment. The second was to be the first public library to operate an electronic bulletin board system (BBS). This we planned to make available during our night and weekend off-hours.

Soon the Apple was in use 24 hours a day, seven days a week, a track record that is still proudly maintained. Daytime use of the system has always been booked solidly ahead for up to a week. Off-hour use of the BBS has reached approximately 1,000 calls per month—clearly making it the most successful part of the whole effort. The BBS carries announcements of library activities, book and movie reviews, and contributed columns on pet health, food, and romance by three freelance writers. Public-domain software is put on the system to be downloaded by any home-computer owner, anywhere in the nation.

As time permitted and our expertise grew, we added other new services: a public-domain-software copy library; word-processing seminars; short courses in assembly and Basic programming; game days; computer reading clubs; and demonstrations to well over a hundred librarians. In between, we also managed to develop two extremely popular public tools: a subject-guide reference chart offering a quick, efficient way to find books (and which cut our simple reference questions almost in half); and a software collection wall chart for the benefit of patrons asking the perennial question, "What will it do?"



A much-loved product of the Apple micro at Chicago Public Library's North Pulaski Branch is this subject guide to books in the collection.

Only a little equipment was added: a clock card to enhance the BBS, and a fan to keep the equipment cooled during its 24-hour workday. But we never concentrated on hardware. We knew even before the boxes were opened that the project could be kept alive and exciting by the addition of new software. From only 20 diskettes in the beginning, the total has now reached 175.

We also engaged in a massive marketing campaign to ensure that the equipment served the entire community. That also meant having software that appealed to adults: for example, spreadsheets, word-processing packages, database-management systems, chess, and diet programs. To have only games means to have only kids, though the library has developed a good collection of software for preschoolers and older children.

* * *

The equipment has held up well. In the early days, we had the only Apple in town. I have often said that North-Pulaski—or any public-access site—should have two microcomputers: one for the public, and one for the staff. A color monitor, an 80-column card, and CP/M capability would also have been great—and should be added—but such frills would not, in and of themselves, make a project work. If anything, we have always needed more "humanware"—an extra staff member to help manage the single machine—even if just a page.

In three years, North-Pulaski has not stood still. It is doing more than any public library center I have visited or of which I have knowledge, even taking into account those that have amassed mountains of hardware. In short, lots of hardware is nice, but that will always be a rare condition, so make the most of what is in-hand. And in the end, that means going with your staff. Their excitement will pull you through. □

(Technology articles cont. on p. 721.)

*Dewey previously headed the North-Pulaski branch.

LATE JOB NOTICE

For December issue, call 312-944-6780 x326 BEGINNING NOV. 12. Listings taken BY PHONE AS SPACE PERMITS. 10 lines maximum (approximately 100 spaces per line). ALA institutional members receive 10% discount.

HD. LN. Resp. for complete oper. of a major art museum lib. containing 125,000 vols., 1,500 current titles, 260,000 slides, 100,000 photographs, & extensive microform & special visual resources holdings. Duties incl. acq., currently 4,500/yr., w/budget in excess of $150,000, bibliography, admin., persnl., provision of reader svcs. to museum staff as well as univ. faculty & grad. students in art history, museum mem., & the gen. pub. Oversees staff of 22--8 prof. & 14 clerical--as well as an RLIN-based tech. svcs. system, incl. coop. origination of SCIPIO, an RLIN special database of art auction catalogs. Rpts. to museum dir. Qual. incl. an ALA-MLS, BA min. in art history, extensive acq. work, incl. familiarity w/some of the appropriate lang. (e.g., Grmn., French, Ital., & Chinese or Japanese), 5 yrs.' admin. exp. in museum or univ. art lib., familiarity w/RLIN or comparable bibl. utility, & demon. commitment to special lib. svc. in an art museum environ. Sal. from $30,000, + ben. Send ltr. containing resume & ref. to: Evan H. Turner, The Cleveland Museum of Art, 11150 East Blvd., Cleveland, OH 44106. An equal-opportunity, affirmative-action employer.

DIR., PUB. LIB. SVCS.: Kansas City, KS. Pop. 170,000. Sal. range $35,500+ dep. on trng. & exp. Main lib., 2 branches, bkmbl., new suburban $4-million branch under construc., 1984/85 oper'g. budget $1.665 million. Reqs. ALA-accred. lib. sci. degree, 10 yrs.' prof. lib. exp., w/bkgrd. in bus. admin., supvsn., persnl., PR, & tech. proc'g. Resume & ref. to: O.L. Plucker, Superintendent of Schls., Pub. Lib. Bldg., 625 Minnesota Ave., Kansas City, KS 66101; 913-621-3073.

LIB. DIR. 4 branches & bkmbl. srvg. 18,000 in a rural area, HQ'd. in St. Marys, Kans. Master's degree in lib. sci. pref. or equiv. prof. exp. Sal. range $14,000-$16,000/yr. Submit res., offcl. transcript of grad. work, & 3 ltrs. of ref. to: Jane Elliott, Pres., Pottawatomie-Wabaunsee Reg'l. Lib. Bd. of Trustees, Rte. 1, Box 92, Olsburg, KS 66520.

CATLGR., the Cleveland Museum of Art Lib. Under the dir. of the hd. catlgr., catalog mat'ls. in all areas of art history for a major art museum lib. in a catalog dept. of 7 (3.5 prof., 3.5 clerical FTE) using AACR2 & RLIN. Qual.: ALA-MLS, MA art history or equiv. exp., appropriate foreign lang. (e.g., Grmn., Ital., French, Japanese, Chinese). Available immediately. Competitive salary from $16,000. Appl. w/names of 3 ref. to: J. P. Brown, Ln., The Cleveland Museum of Art, 11150 East Blvd., Cleveland, OH 44106.

DOC'TS. LN. Resp. for providing gen./in-depth ref.; dvpg. & main'tg. doc'ts. collec., incl. eval'g. & possible redefining of scope, structure, & procedures; dir. of clerical & prof. persnl. in duties related to doc'ts. ALA-accred. MLS req.; at least 2 yrs.' prof. ref. exp., incl. exp. w/gov't. doc'ts. & U.S. depository syst.; excellent pub. svc. attitude & people skills; strong org'l. abil.; flexibility. Salary $16,642-$19,623. Ltr. & resume to: Jim Fish, Dir., Springfield City Lib., 220 State St., Springfield, MA 01103.

CHLDRN.'S DIV. LN. Complete programming, selection for $11,500 budget, ref., dial-a-story, for dept. of over 20,000 bks. Help in adult ref. Desirable: exp. in plng. new chldrn.'s facility. Position available immediately. Closing date Nov. 30. ALA-accred. MLS, 3 yrs.' exp. Beginning salary $15,500. For further info., send ltr. of appl., resume, & recent ref. to: Hester H. Coward, Dir., Franklin-Johnson Co. Pub. Lib., Madison at Home Ave., Franklin, IN 46131.

Attention: LEADS Advertisers

Now you can telecommunicate your ads to *American Libraries*. *Introducing LEADSAD*

You can now get your last-minute ads to *American Libraries* with a new online order form called LEADSAD, available on ALA's full-service database, ALANET. Using LEADSAD not only guarantees same-day delivery of your ads to our electronic mailbox (AL.LEADS), but offers you an up-to-the-minute rundown on the latest in LEADS services and rates. Acknowledgement is automatic, and you can even request an electronic carbon of your completed order!

And thanks to ALANET's flexibility, you can also contact us electronically by sending a memo directly to our AL.LEADS mailbox via the basic electronic mail system.

ALANET subscribers: You'll find our LEADSAD online order form in the ALANET Main Menu under either FORMS or SERVICE. Or simply type)REQUEST LEADSAD when you're at system level to begin your order.

If you're not already an ALANET subscriber: Contact Joel Lee at ALA Headquarters for further information.

LEADSAD: At Your Command

LATE JOB NOTICES CONTINUED FROM PAGE 705.

FINE ARTS LN./ASST. AGENCY HD. Resp. & flexible individual req. to support agency hd. in mgmt. of fine arts dept. Strong bkgrd. in fine arts subj. or AV expertise, commitment to outrch. svcs., prev. supvsy. & mgmt. exp., superior human relations & communication skills w/both pub. & staff, evidence of willingness to go the extra mile & negotiate multiple demands. Salary range of $17,304–$26,880. Competitive ben. incl. 22 days' vacation annually. Resume should be submitted by Nov. 16 to the: Persnl. Off., Salt Lake City Pub. Lib., 209 E. 5th S., Salt Lake City, UT 84111. An equal-opportunity, affirmative-action employer.

ASST. SUPVSR./BRANCH LN. Assist in supvsg. staff & branch oper.; providing ref. & rdrs.' advisory; assist in dvpg. & implementing programs for adults/young adults; share resp. for collec. dvpt. & display. ALA-accred. MLS req.; at least 2 yrs.' prof. lib. exp. in pub. svc., incl. ref.; proven pub. svc. commitment; collec. dvpt. exp. Salary $17,513–$20,668. Ltr. & resume to: Jim Fish, Dir., Springfield City Lib., 220 State St., Springfield, MA 01103.

DIR., Southern Ore. State Col. Lib. Admins. all lib. svcs., incl. media ctr. & lib. sci. dept. Resp. for budgeting, policy dvpt., persnl. mgmt., & long-range plng. Directs prof. staff of 9 & support staff of 16. Req.: MLS from ALA-accred. inst. & a doctorate; candidates w/2nd master's degree will be considered. 10 yrs.' prof. exp. w/min. of 5 yrs.' progressively more resp. admin. exp. in a 4-yr. col. or univ. lib. Demon. abil. in implementing autom. lib. syst. des. Appt. at rank of professor w/3-yr., fixed-term, renewable contract. Sal. range: $41,000–$46,500. Appl. deadline: Dec. 31. Complete position descrp. avail. upon req. Send ltr. of appl. & summary vita incl. names of 5 ref. w/ph. nos. & adds. to: Ch., Srch. Committee for Lib. Dir., c/o the Lib., Southern Ore. State Col., Ashland, OR 97520.

REG'L. LN. Supervises pub. svcs. in main lib. & a small branch. Systemwide resp. for interlib. loan & ref. svcs. Reqs. ALA-accred. MLS & 2 yrs.' exp. Hiring range $16,128–$17,784. Available Jan. 1, 1985. Apply to: Garland Strother, Dir., Saint Charles Parish Lib., POB 975, Luling, LA 70070.

HUMANITIES REF. LN., SUBJ. SPECIALIST FOR ENGLISH & AMERICAN LITERATURE. Duties incl. ref. svcs., online literature searching (DIALOG), orientation & instruction, faculty liaison, shared collection dvpt. Evening & weekend hrs. req. Qual.: ALA-accred. MLS, w/undergrad. or grad. degree in the humanities, preferably English or American literature. Strong communication skills. Exp. &/or coursework in Black Studies desirable. Training &/or exp. w/DIALOG or similar system. 3 yrs.' exp. or equivalent. Faculty status, instructor or assistant professor rank. Salary from $15,901.40. 9-mo. appointment w/possibility of summer work. Resume, transcripts, 3 ltrs. of ref. by Dec. 1 to: Shirley M. Johnson, Chair, Lib. Search Committee, Clarion Univ. of Pennsylvania, Clarion, PA 16214. An EEO, AA employer. Minorities are encouraged to apply.

LIB. DIR. City of Paris (Tex.) is accepting appl. for lib. dir. to Nov. 30. Req. MLS & exp. in small city lib. Sal. range $18,044–$22,334 w/excellent fringe ben. incl. annual/sick leave, health/life insurance, holidays, retirement, & others. Send resume to: Persnl. Dept., POB 1037, Paris, TX 75460.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Box numbers: *AL* will provide box numbers on request for employers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries,* 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Ads placed and subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.
2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.
3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

Late Job Notices

As space permits, Late Jobs are taken after the general copy deadline has passed. **By phone only, beginning 10th of the month.** $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies

Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line; **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Address

Place all notices with Beverly Goldberg, LEADS, *American Libraries,* 50 E. Huron St., Chicago. IL 60611; (312) 944-6780 x326.

JOBLINES

AMERICAN SOCIETY FOR INFORMATION SCIENCE Jobline: (202) 659-1737. To list a position, obtain a form from: ASIS Jobline, ASIS Hdqrtrs., 1010 16th St., NW, Washington, DC 20036 or phone (202) 659-3644.

ARIZONA Job Hotline: (602) 278-1327. To list a position, write Arizona Job Hotline, c/o Maricopa County Library, 3375 W. Durango, Phoenix, AZ 85009 or phone (602) 269-2535.

ASSOCIATION OF COLLEGE AND RESEARCH LIBRARIES Jobline: (312) 944-6795. To list a position, obtain jobline form from: ACRL Jobline, ACRL/ALA, 50 E. Huron St., Chicago, IL 60611. Listing fee: $30 ACRL members; $35 nonmembers.

BRITISH COLUMBIA Library Association Jobline: (604) 263-0014. To list a position write: BCLA Jobline, British Columbia Library Association, POB 46378, Station "G," Vancouver, B.C., V6R 4G6 Canada.

CALIFORNIA Library Association Jobline: (916) 443-1222 or (213) 629-5627. To list a position: write CLA, 717 K St., Suite 300, Sacramento, CA 95814-3477 or phone (916) 447-8541.

CALIFORNIA Media and Library Educators Association (CMLEA) Job Hotline: (415) 697-8832. To list a position: write CMLEA, 1575 Old Bayshore Highway, Suite 204, Burlingame, CA 94010 or phone (415) 692-2350.

(CALIF.) SAN ANDREAS-SAN FRANCISCO BAY/Special Libraries Association: (415) 339-9541. To list a position: call Elaine Zacher at (415) 271-4357.

(CALIF.) SOUTHERN CALIFORNIA CHAPTER, Special Libraries Association: (818) 795-2145. To list a position: write Duane M. Helgeson, Millikan Library 1-32, California Institute of Technology, Pasadena, CA 91125 or phone (818) 356-6422.

COLORADO State Library Jobline: (303) 866-2210. To list a position: write the Jobline, 1362 Lincoln, Denver, CO 80203 or phone (303) 866-2175. **COLORADO LIBRARIES ONLY.**

CONNECTICUT Library Association Jobline: (203) 727-9675, 24 hrs., updated weekly. To list a position: write CLA Jobline, Connecticut State Library, 231 Capitol Ave., Hartford, CT 06106.

(D. C.) METROPOLITAN WASHINGTON Library Jobline: (202) 223-2272. To list a position: write Jobline, Metropolitan Washington Library Council, 1875 Eye Street NW, Suite 200, Washington, DC 20006 or phone (202) 223-6800, x458. There is a $30 listing fee for nonmembers.

DELAWARE Library Association Jobline: call the New Jersey and/or Pennsylvania Job Hotlines, which include Delaware job listings. Prospective employees should contact the employer directly. Delaware jobs are also listed on the New Jersey, Pennsylvania, and Maryland joblines.

Supervises one FTE staff member in the library data processing office and provides project services, programming, and advice concerning equipment and advances in technology. Required: ALA-accredited MLS degree; minimum of 5 yrs.' professional library/data processing and systems experience in designing, implementing, or operating library automated systems; demonstrated ability to write computer programs; supervisory experience; demonstrated ability to work with supervisors and staff in the application of data processing systems; familiarity with commercially available data processing applications; knowledge of ALGOL, PASCAL, or TAL programming languages. Desirable: knowledge of COBOL programming language; experience with microcomputer technology plus large data processing systems; additional data processing systems experience. Salary range: $25,000–$32,000 for 12 mos. with faculty rank and status. Perquisites include TIAA/CREF and usual vacation and sick leave benefits. Applicants should send resume plus names, addresses, and telephone numbers of 3 references by closing date. **Apply by Dec. 15** to: Leo W. Cabell, Chair, Search Committee, **University Libraries, University of Colorado at Boulder, Boulder, CO 80309.** The University of Colorado at Boulder is an equal-opportunity, affirmative-action, and Section 504 employer. Minorities and women are encouraged to apply.

Assistant engineering librarian. Search reopened. MLS (ALA-accredited). Minimum of 2

University Librarian
University of California, Davis

The University of California, Davis, invites applications and nominations for the position of university librarian. The Davis campus is a general campus consisting of 3 colleges (Letters and Science, Agricultural and Environmental Sciences, Engineering), 4 schools (Graduate School of Administration, Law, Medicine, Veterinary Medicine), and 3 divisions (Biological Sciences, Environmental Studies, Statistics), with an enrollment of 19,000 students. The university librarian is the chief administrative officer for the General Library system, including the General Library and its branch libraries in the health sciences, physical sciences, and agricultural economics, with aggregate holdings in excess of 1.7 million vols., a staff of 60 professional librarians and 220 support staff, and a budget of $10 million.

RESPONSIBILITIES: planning and establishing goals and priorities for development of collections in support of instruction and research; for physical facilities; and for the development of systematic approaches to library operations and application of computer and other technologies to library functions. Budgetary planning and allocation and management of resources. Recruiting and supervising professional and staff personnel; administering academic and staff personnel policies and the affirmative-action plan of the library. Developing policies and procedures for provision of services and administration of the General Library system. Serving as liaison officer with the Academic Senate, the administration, and other faculty and staff agencies within the university on library matters. Serving as a member of the Universitywide Library Council and of the Board of the Northern Regional Library Facility. The university librarian reports to the vice chancellor—academic affairs.

QUALIFICATIONS: a graduate degree in librarianship from an ALA-accredited institution or its equivalent. An advanced degree in an established discipline or demonstrated understanding of the responsibilities of a library system that meets the needs of those engaged in teaching, research, and scholarly activity in a university; substantial experience relevant to the design, development, and operation of a large academic/research library system; knowledge of current trends and application of library information technologies; superior interpersonal skills in providing leadership for a large professional and support staff and ability to interact with an academic community and its publics; demonstrated communication and verbal skills. Experience in planning for construction of facilities and in the area of labor relations in the context of collective bargaining is desirable but not essential.

SALARY: commensurate with qualifications and experience ($61,500–$75,000). Position will remain open until filled. **Send application or nominations with resume by Dec. 20** to: **Robert M. Cello, Vice Chancellor—Academic Affairs, University of California, 521 Mrak Hall, Davis, CA 95616.**

An equal-opportunity, affirmative-action employer

---

ASU is a committed equal-opportunity, affirmative-action employer. Minorities are encouraged to apply.

NEW POSITION—DEADLINE EXTENDED

Director, Division of Technical Services
University of Louisville
(Associate Professor)

The University of Louisville Libraries invites applications and nominations. The university is a state-supported, urban institution of over 19,000 students. The city supports a wide range of cultural activities with particular emphasis on the performing arts. A major effort is underway to revitalize the downtown area. The libraries have been designated as a primary beneficiary of a $40 million fundraising campaign. The library system contains approximately 1 million vols. and consists of 6 libraries.

Director, Division of Technical Services: This position has administrative responsibility for acquisitions, cataloging, and serials, reports to the university librarian, and is a member of the Administrative Advisory Council. The division employs 10 professional librarians and 24 support staff and serves all libraries except Health Sciences. The library has an acquisitions budget in excess of $1 million, adds 30,000 vols. annually, belongs to SOLINET, and uses Data Phase ALIS II.

Responsibilities: The library system is presently experiencing significant change and progress in a number of areas. The director of the Division of Technical Services will provide strong leadership within this environment and will be expected to integrate organizational change with technological development. This position will be expected to take a substantial role in meeting the division's goals, which include the development of a centralized database and an online public catalog, and will direct the division's ongoing functions related to automation development. This person will plan and organize the programs and activities of the division and coordinate those activities with the collection development program, the Public Service Division, and other library units. The director will be a member of the university libraries faculty and will be expected to meet criteria for promotion, tenure, and award of merit.

Requirements: MLS from an ALA-accredited library school; a minimum of 6 yrs.' professional library experience in an academic or research library, at least 3 yrs. of such experience in an administrative position in technical services including the supervision of professional librarians; demonstrated knowledge and understanding of acquisitions, cataloging, and serials processes, OCLC (or other network cataloging system), and the application of computer systems to library processes; proven record of creative leadership, strong interpersonal and communication skills, and ability to plan, organize, and coordinate the work of a technical services unit; appreciation and understanding of the goals of scholarship and research in an academic setting and of the interaction between technical services and other library functions.

Benefits: Competitive.

Salary: $28,000 – $33,000.

Letter, vita, & names of 3 references received by Dec. 7 will be given first consideration. Apply to:

David Horvath, Chair
Search Committee for Director, Division of Technical Services
Ekstrom Library
University of Louisville
Louisville, KY 40292

An equal-opportunity, affirmative-action employer

Government documents librarian. Position to be filled by Jan. 17, 1985. Coordinates the overall operation of the U.S. Government Depository Collection. As a member of the reference department, the government documents librarian will assist users at a central reference desk and take part in library use instruction. Qualifications: the successful candidate will be service-oriented; able to work effectively with students, faculty, and the general public; and committed to promoting library services and collections to the academic community. ALA-accredited MLS required. Master's degree in a field related to government documents is desired and is expected for tenure. Government documents experience desired. Salary and benefits: starting salary $17,000 – $24,000 for 12-mo. appointment depending on experience and qualifications. Successful candidate will be eligible for tenure review. TIAA/CREF, Blue Cross—Blue Shield or HMO. **Send letter of application and resume by Dec. 15** to: Stephen K. Stoan, Head of Reference, **Box 68, Wichita State University, Wichita, KS 67208.** Finalists will be invited for an expense-paid interview. Wichita State University is an affirmative-action, equal-opportunity employer.

Government publications librarian. University of California, Irvine. Appointment at assistant librarian rank. Salary range $21,021 – $26,892 effective Jan. 1, 1985. Cost of benefits equal to approximately 40 percent of salary. Benefits include 24 vacation days and 12 sick leave days per yr., retirement plan coordinated with Social Security, reductions in incidental fees, and a variety of group life, medical, and dental insurance plans. Responsible for development and bibliographic control of U.S. collection, substantial reference service for all collections, database searching, bibliographic instruction, and policy and procedure development. Qualifications: MLS, knowledge of database searching and library instruction concepts and methods, strong commitment to effective public service and personal professional development, good oral and written communication skills, ability to work effectively with patrons and staff. Desirable: familiarity with government publications, and MA in social sciences. **Deadline for receipt of letters Jan. 1, 1985.** Send letter, resume, telephone numbers, and names/addresses of at least 3 references to: M. J. MacInnes, Personnel Director, **Main Library, University of California, Irvine, POB 19557, Irvine, CA 92713; 714-856-7115.** An affirmative-action, equal-opportunity employer.

Head, automated cataloging section, Monograph Cataloging Division. Under the direction of the head of the Monograph Cata-

logint Division, manages, directs, and coordinates monograph copy cataloging unit, one of 2 sections within the Monograph Cataloging Division. The section is responsible for searching newly acquired items on the OCLC database, cataloging with LC and OCLC member-contributed copy, and processing added copies and added volumes. Thorough knowledge of current and past cataloging rules and LC cataloging practice and classification required. Working knowledge of an automated cataloging system, preferably OCLC, required. Knowledge of at least one Western European language required. Salary: $23,000 minimum. 24 days' vacation, TIAA/CREF, premium fully paid for medical, dental, and life insurance plan. No state or local income tax. **Application deadline: 5:00 pm, Friday, Nov. 30.** Send letter of application, resume, names of 3 references, and salary requirements to: Charles E. Chamberlin, Head, Personnel and Administrative Services, **University of Washington Libraries, FM-25, Seattle, WA 98195.**

Department Heads

Head, Reference Department

Provides leadership to 4 FTE librarians, 2.5 FTE support staff, and student assistants. Coordinates reference service, bibliographic instruction, database searching, and other information services. Salary depends on qualifications with the range beginning in the low $20s.

Head, Serials Department

Coordinates the activities of 4 support staff and is responsible for serials acquisitions, cataloging, check-in, invoices, union list, bindery, and duplicate exchange. Salary depends on qualifications with the range beginning in the high teens.

Requirements include an ALA-accredited degree; knowledge of current theory and practice of librarianship and experience in appropriate areas in academic and research libraries; skills in communicating orally and in writing, in analyzing problems, in generating creative solutions, in responsibly managing resources, and in working as a team member.

IIT, a private, medium-size, coeducational university, is expanding its library services and collections. Available space in the main university library will triple, and the collections and staff will double in the forseeable future. Planning is underway for an online catalog. We seek individuals who can tolerate ambiguity and respond to the challenge of helping to shape the services needed by students and faculty in our advanced technology curriculum and research center. IIT is a member of CRL and participates in OCLC and LCS.

Send a letter of application, resume, and 3 letters of reference as soon as possible to: **David Dowell, Illinois Institute of Technology, Chicago, IL 60616.**

Chief, Bibliographic Control Division

Columbia University Libraries

Search Reopened

The chief of the Bibliographic Control Division is responsible for managing cataloging production and maintenance activities for the majority of collections of the Columbia libraries (except East Asian vernacular, Health Sciences, and Law) and for coordinating bibliographic control policies systemwide. The incumbent will report directly to the director of the Technical Services Group and work closely with the Services and Resources Groups to ensure the effective development of bibliographic, reference, and support services to provide access to instructional and research resources, including continuing development of the online catalog. The staff of the division consists of 26 librarians, 36 supporting staff, and an FTE of 10 student assistants. The incumbent is a member of the libraries' senior staff Operations and Planning Council.

Requirements for the position: accredited MLS or equivalent relevant experience; demonstrated evidence of imagination, leadership, and managerial and analytical skills; broad knowledge of cataloging theory and practice; substantial knowledge of computer-assisted technical processing activities and systems; effective writing, speaking, and interpersonal skills; ability to work effectively in a complex, participative environment; knowledge and understanding of the process of scholarly communication in various disciplines. Candidates with 5 yrs.' relevant administrative experience will be sought, with special attention given to responsibility for cataloging activities. Salary ranges (through June 1984): Librarian II, $29,500–$35,350; Librarian III, $32,500–$47,125.

Deadline for applications is: Dec. 14. Applications, listing 3 references and salary requirements, or nominations should be submitted in writing to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.**

An equal-opportunity, affirmative-action employer

The University of South Dakota

Director, I. D. Weeks Library

The University of South Dakota invites applications and nominations for the position of director of library services. The director is the chief administrator of the I. D. Weeks Library including budget preparation, personnel management, policy development, collection building, facility planning, public relations, and resource sharing and networking. The director reports to the vice president for academic affairs.

QUALIFICATIONS: candidates must possess a master's degree in library science from an ALA-accredited school and a doctoral degree in a disciplinary area. The candidate should have held progressively more responsible administrative positions in an academic or research library and should be able to demonstrate knowledge of collection development, personnel management, budget planning, fundraising, automated systems, and library space planning and use. The candidate should have a record of appropriate scholarly and professional achievement and should be eligible for appointment as a full professor.

SALARY: open and competitive with a minimum of $35,000; 12-mo. contract, comprehensive benefit program.

DEADLINE FOR APPLICATIONS: **Dec. 1;** position to be filled as soon as possible thereafter.

Applications should include a letter indicating interest in the position, a current resume, and names, addresses, and telephone numbers of 3 references. At least one of the references should be able to evaluate the candidate's performance in his/her current position.

Send applications and nominations to: **John A. Day, Acting Vice President for Academic Affairs, The University of South Dakota, Vermillion, SD 57069.**

The University of South Dakota is an equal-opportunity, affirmative-action employer.

Head, catalog department, Central University Library, University of California, San Diego. Associate Librarian, $24,828–$35,748 or Librarian $33,372–$46,260. (Salaries to be increased by 3.8 percent effective Jan. 1, 1985.) The catalog department, which currently consists of 9 FTE librarians, 36.55 FTE library assistants, and 2.82 FTE students, provides original and copy cataloging for the departments in the Central University Library, the Science and Engineering Library, and the Cluster Undergraduate Library. The library is in the process of automating all of its technical processing operations using the Biblio-Techniques Library Information System (BLIS), and the department may undergo organizational changes in response to changes in workflow and procedures. This position directs and administers the operations of the Central University Library catalog department. Oversees formulation and implementation of departmental policy and workflow. Responsible for organizational and personnel planning, and for allocation and assignment of staff within the department. Represents the library within the UC system on matters relating to cataloging policy. Maintains awareness of national and UC systemwide issues regarding bibliographic control and automation of library catalogs, communicates these issues within the library, and contributes to the identification and resolution of these issues through appropriate professional activities. Qualifications: successful managerial and supervisory experience in a research or academic library; substantial knowledge of bibliographic control policies and processes as applied in research libraries; knowledge of issues and trends relating to the automation of library processing; demonstrated ability to work effectively with library public and technical services staff at all levels; and understanding of the scholarly use of library collections. MLS from an ALA-accredited library school. An appointee at the Librarian level is expected to bring to the position well-developed managerial skills and cataloging expertise. **Deadline for applications extended to Nov. 30.** Available Jan. 1, 1985. Submit a letter of application, enclosing a resume and a list of references, to: Jacqueline Coolmah, Personnel Librarian, **University of California, San Diego, Library, C-075-H3, La Jolla, CA 92093.** UCSD is an equal-opportunity, affirmative-action employer.

Head circulation librarian. Responsible for planning, policies, procedures, and supervision of department of 2 librarians and 12 staff, 5 of whom are in the adjunct reserve division. Reports to the library director; participates in library planning. Plans call for the current batch system to be integrated with a librarywide online system. The University of North Carolina at Greensboro is a doctoral-degree-granting institution with library holdings of approximately 1.5 million serving 10,000 students and 700 faculty. Requirements: ALA-accredited MLS; minimum 5 yrs.' experience, preferably in a medium-size academic library; supervisory experience in a comparable-size circulation department and expertise in the design and operation of a computerized circu-

lation system highly desirable; strong communication skills and ability to interact well with staff and campus community. Faculty status, tenure-track, 12-mo. appointment, liberal benefits. Salary $25,000–$30,000 range, dependent upon qualifications. Position now open. **Deadline for applications is Jan. 15, 1985.** Send application letter, resume, 3 current letters of recommendation, and library school transcript to: Marla Edelman, Chair, Search Committee, **Jackson Library, University of North Carolina at Greensboro, Greensboro, NC 27412-5201.** An affirmative-action, equal-opportunity employer.

Head librarian, Chiropractic College. Responsible for budget management, collection development, provision of overall direction for library services to faculty, students, and staff. Qualifications: ALA-accredited MLS, minimum 3 yrs.' professional library experience. Preference given to candidates with technical services background, supervisory experience. Salary dependent on education and experience (minimum $18,000). Faculty status, excellent fringe benefits. Applications accepted until position filled. Apply with full resume to: Leroy Moore, Vice President, **Sherman College of Straight Chiropractic, POB 1452, Spartanburg, SC 29304.**

Head of special collections department, Roland R. Renne Library, Montana State University. Montana State University seeks a creative and energetic person to head the special collections department, which houses books, manuscripts, photographs, and artifacts relating to the history of Montana, the Pacific Northwest, and Native Americans. The head of special collections is responsible for the organization and management of special collections and the university archives; provides access to and reference service in these collections for students, faculty, and other researchers; prepares grant proposals for special project funding; is active in the acquisition of additions to these collections; trains and supervises clerical and student staff; and is expected to participate in the library and university committees. The head of special collections reports to the assistant director for public services. Qualifications: MLS from an ALA-accredited institution required. Master's or PhD degree in history, history of science, Native American studies, or other related area of study desired and eventually required for promotion. 3 yrs.' training and experience in special collections work in an academic library (including processing, cataloging, and indexing special collections materials) required. Training and experience in archival organization and management and records management desired. Experience in computer applications in libraries desirable. Must demonstrate ability to work effectively with colleagues, administrators, patrons, and donors in an academic environment. Must demonstrate ability to communicate effectively, both orally and in writing. Appointment and salary: position available Feb. 1, 1985, or as soon as possible thereafter. Tenure-track, FY position at the assistant professor level, $22,000 minimum. Candidate must meet university requirements for promotion and tenure. Montana State University, the state's land-grant institution, is located in the Gallatin Valley of southwestern Montana 90 miles north of Yellowstone National Park. The university has an enrollment exceeding 11,000 in 47 undergraduate and 38 graduate fields with an emphasis on programs in science and technology. Renne Library, which houses special collections, holds a collection of 500,000 volumes with strengths in science, technology, and regional history. **Application procedures: applications must be postmarked or received no later than Nov. 30.** Send letter of application, resume, and 3 letters of recommendation which specifically address the qualifications for this position to: Special Collections Search Committee, **Dean's Office, Roland R. Renne Library, Montana State University, Bozeman, MT 59717-0022.** Montana State University is an affirmative-action, equal-opportunity employer and encourages applications from female, minority, and disabled persons.

Associate University Librarian for Technical Services
Arizona State University

The Arizona State University Libraries are seeking candidates for the position of associate university librarian for technical services. The successful candidate will report to university librarian Donald E. Riggs, be responsible for the leadership and management of all technical service units, and participate in overall library planning and policy formulation.

REQUIRED QUALIFICATIONS include the ALA-accredited MLS degree; successful administrative experience at the department-head level or above in technical services in a university library; a minimum of 7 yrs.' progressively responsible experience in an academic/research library; demonstrated organizational abilities and leadership qualities; demonstrated skills in written and oral communication, interpersonal relations, management, and planning; comprehensive working knowledge of the functions of technical services in a major research library; successful supervisory experience, including supervision of professional and classified staff; knowledge of current issues/trends in technical services, including automation and established standards; evidence of university service, research, and/or participation in professional associations. *PREFERRED EXPERIENCE:* as assistant/associate university librarian for technical services (or its equivalent); fiscal, personnel, and other administrative responsibility in 2 or more technical service areas; supervision of a large staff.

ARIZONA STATE UNIVERSITY AND ITS LIBRARIES: ASU's mission is to continue development as a major research university and to become competitive with the best public universities in the nation. Toward that end, the libraries have experienced dynamic growth during the past 5 yrs., adding 55 new positions and increasing the materials budget from $1.7 million to the current $3.1 million. A new science and engineering library was occupied in 1983, and the other libraries are being remodeled. The libraries are creating a total online integrated system using Tandem hardware and DataPhase software. The transition from a COM catalog to an online public-access catalog will be made in the near future, with acquisitions and serials subsystems to follow. A funding base has been established for an ongoing retrospective conversion project. Collections total 1.8 million vols. and 1.6 million microform units. Of the 243 FTE staff, 88 are employed in technical services. Membership is held in ARL, CRL, AMIGOS, and OCLC. The total budget is $7 million. ASU, with 40,000 students, is the nation's 6th-largest university and is located near Phoenix, the nation's 9th-largest city.

Salary: $40,000 minimum, depending on qualifications. TIAA/CREF and other alternatives to the state retirement plan; annual paid leave of 22 days' vacation, 12 days' sick leave, and 10 holidays; tuition remission for employee and family at all 3 Arizona universities. Librarians serve on university governance committees and are eligible for continuing employment status and sabbatical leave.

Applicants must include documentation or evidence of specific qualifications and short statements (no more than 2 pages each) concerning 1) their philosophy of technical service and 2) what new technical service programs they have implemented and are interested in implementing. A copy of the complete position description is available upon request. Recruitment will remain open until the position is filled. **To ensure consideration, applications should be received by Dec. 31,** when review will begin. Send letter of application, resume, supporting documents, and a list of 4 recent references to: **Constance Corey, Assistant University Librarian, Hayden Library, Arizona State University, Tempe, AZ 85287.**

ASU is a committed equal-opportunity, affirmative-action employer.
Minorities are encouraged to apply.

Head, processing control dept. (acquisitions/serials). Within an emerging technological environment, administers all monographic and serials ordering and receiving for academic and medical campuses (materials budget over $1.9 million). Direct dept. staff (13 full-time) and set dept. priorities. Additional responsibilities: liaison to the collection management division; implement automated acquisitions system (Data Phase ALIS II); coordinate selection and implementation of a new serials control system; develop comprehensive plans, policies, and procedures; implement approval plan; oversee routine departmental operation; select bibliographic vendors and be primary vendor liaison; conduct vendor performance studies; monitor materials expenditure; analyze statistical and budgetary data and compile reports; monitor workflow and adjust work load; hire and evaluate staff; coordinate staff training and development; participate in the division dept. head group, Division Advisory Committee, and the Library Administration Advisory Group. Position reports to the associate director for technical services and automation. Qualifications: the following are preferred: successful record in acquisitions of monographs and serials; experience in automated acquisitions or serials control system; supervisory experience; current knowledge of acquisitions practices for monographs and serials, and of the publishing trade and vendor sources; experience with managing large library materials budget; ability to analyze statistics and budget, particularly using automated methods; competence in setting priorities and preparing detailed reports within a deadline; ability to work well under pressure; excellent written and oral communication skills; ability to design and implement research studies; good interpersonal skills; record of professional achievement; evidence of managerial initiative and creativity; sensitivity to the concerns of a research library; aptitude and enthusiasm to work with administrative groups to develop effective solutions to problems. ALA-accredited MLS required. Environment: university library services serves 20,000 students on the academic and medical campuses. The Data Phase ALIS II system is used for circulation and will be used for acquisitions; plans for serials control and the online catalog are underway. There are over 8,000 active serials subscriptions. Approval plans are maintained with major vendors. Salary $24,000 minimum, depending on qualifications. **Deadline: Nov. 30 or until a suitable applicant is found.** Application: submit resume and 3 current references to: Arnold Hirshon, Associate Director for Technical Services and Automation, **Cabell Library, Virginia Commonwealth University, 901 Park Ave., Richmond, VA 23284.** VCU is an equal-opportunity, affirmative-action employer.

Latin American serials cataloger. Available: March 15, 1985. Salary range for assistant librarian: $14,162–$25,200; salary range for associate librarian (5 yrs.' professional experience): $17,139–$30,400. Initial appointments can be made up to the mid-range level depending on experience. Responsibilities: catalog serials originally or with copy in all subjects and languages for the Latin American collection. Upgrade serial records in the OCLC database with CONSER authorization. Participate in professional activities of the serials cataloging section and aid in general serials cataloging as needed. Qualifications: ALA-accredited MLS and knowledge of Spanish and one other modern European language required; Latin American area studies back-

ground preferred. Benefits: 12-mo., tenure-track appointment, with faculty status. 22 working days' vacation per yr., 8 holidays, and state retirement plan at no cost to the employee (optional retirement program also available including TIAA/CREF and 3 other options), Blue Cross–Blue Shield group plan. Course tuition waiver per semester. No local or state income tax. **Send complete resume with names of 5 references by Nov. 15** to: James H. Renz, Associate Director for Technical Services and Bibliographic Control, **University of Florida Libraries, Gainesville, FL 32611.** The University of Florida complies with Section 503, the Rehabilitation Act of 1973, and Section 402 of the Vietnam Era Veterans Readjustment Act of 1974.

Berkeley
Head, Serials Department

Management of a large, complex department with 32 FTE plus student assistants, responsible for the annual processing of 40,000 titles. Liaison work with 21 branch units for which the department is a central receiving location is of particular importance. Implementation of online serials control will be a major activity.

Requires MLS degree from an accredited library school; demonstrated supervisory experience, preferably in a large research library; demonstrated organizational skills; previous work with serials processing and/or cataloging; familiarity with one or more European languages; good oral and written communication skills; an aptitude for training and instruction. Candidates with previous experience with automated systems and knowledge of MARC-S will be given special consideration.

Full job description mailed on request. Salary in the $33,372–$46,260 per annum range, depending on qualifications. Position available Feb. 1, 1985, or as soon thereafter as possible.

To apply, please send your resume, including the names and addresses of at least 3 professional references by Dec. 14 to:

William E. Wenz
Library Personnel Officer
Room 447 General Library
University of California
Berkeley, CA 94720

The University of California is an equal-opportunity, affirmative-action employer.

Islamica Librarian
University of California/Berkeley

Responsible for development and maintenance of Islamica collections in humanities, social sciences, and broad interdisciplinary areas. Provide specialized reference service to faculty and students in the use of Arabic, Persian, and Turkish materials and to a broader library clientele through service at the catalog information desk. Perform original cataloging of monographs in Arabic, Persian, and Turkish including descriptive cataloging. Some weekend work required.

Requires good knowledge of Arabic and working facility in either Persian or Turkish. Broad knowledge of Middle Eastern scholarship, book trade, and understanding of current development in research libraries and of systems of bibliographic organization and access. Graduate degree from accredited library school preferred. An appointee lacking such a degree will be expected to earn the MLS within 2–3 yrs. of appointment.

Full job description mailed on request. Salary in the $20,316–$46,260 per annum range depending on qualifications. Position available Feb. 1, 1985.

Send resume including the names of at least 3 professional references by Dec. 14 to:

William E. Wenz
Library Personnel Officer
Room 447 General Library
University of California
Berkeley, CA 94720

The University of California is an equal-opportunity, affirmative-action employer.

Librarian—head of cataloging, Jerome Library and coordinator of cataloging services, Bowling Green State University Libraries. Reporting to chair of access services, is responsible for supervising original cataloging, editing, catalog maintenance, and retrospective projects. Coordinates cataloging efforts and policies of main collection with those of Music Library, Center for Archival Collections, Firelands College, and other areas within libraries and learning resources. Supervises 3 faculty and 6 classified staff; sets priorities and determines workflow; has collection development responsibility in at least one subject area. Participates in planning for new integrated online system. Participates in library and university governance. All librarians at BGSU have full faculty status and must meet normal requirements for promotion and tenure. Qualifications: ALA-accredited MLS; familiarity with OCLC, AACR2, LC classification and subject headings; supervisory experience; and a minimum of 3 yrs.' cataloging experience are required. Preferred qualifications include 2nd master's degree; foreign language background; demonstrated administrative skills; flexibility; commitment to integration of cataloging activities into total online library system; professional commitment to librarianship. Salary for 12-mo. appointment is $23,000–$27,000 depending on experience and qualifications. Tenure-track at assistant or associate professor level, 24 days/yr. vacation, state retirement plan. Position available January 1985. **Send resume by Nov. 30** to: Joan Repp, Chair, Access Services, **Jerome Library, Bowling Green State University Libraries, Bowling Green, OH 43403.** EO, AA employer.

Librarian, science. Reporting to assistant dean of libraries, responsible for managing the Frank C. Ogg Science and Health Library of 170,000 volumes serving the hard sciences, health, and technology. Supervises one professional and 4 clerical staff; provides reference, instruction, online searching, and individual research guidance to faculty, graduate students, and undergraduates. Serves as collection development liaison with science departments. Qualifications: ALA-accredited MLS required, plus 2 yrs.' reference/collection development experience. Demonstrated familiarity with the bibliography and literature of science. Advanced subject degree in science area preferred. Commitment to active public service, instruction, and searching program required. Librarians at BGSU have faculty status and must meet usual promotion and tenure requirements. Salary for 12-mo. appointment is $21,000–$28,000 depending on experience and qualifications. Tenure-track, 24 days/yr. vacation, state retirement plan. Position available January 1985. **Send resume by Nov. 30** to: William Miller, Chair, Science Librarian Search Committee, **Dean's Office, Jerome Library, Bowling Green State University, Bowling Green, OH 43403.** Expanded position description available on request. EO, AA employer.

Library personnel officer: a staff officer with responsibility for coordinating libraries' personnel policies in the areas of recruitment, compensation, employee relations, and staff development; these services are provided for 271 employees including 63 professionals, 66 paraprofessionals, 44 clerical staff, and 93 FTE student assistants. The library personnel officer uses independent judgment in handling problems in all the above areas and works closely with department chairs and other employees to develop and apply internal personnel procedures. The personnel officer represents the university libraries in university work groups on personnel issues. Qualifications: a broad knowledge of all functional areas found in a large academic library; a clear understanding of individual jobs, job levels, and the interrelatedness of library functions; a knowledge of trends and developments in research librarianship nationally; ability to maintain effective working relationships with colleagues in the library and the university and the ability to communicate logically, clearly, and efficiently in oral and written form; and ability to be objective, equitable, confidential, and consistent in interpreting and applying university and library personnel policies and procedures and sufficient independence of thought and maturity to sustain the resultant decisions are required. MLS degree from an ALA-accredited library school is required. 3–5 yrs.' progressively responsible experience in a research library (including some supervision) strongly preferred. Rank and salary: appointment at associate librarian level, $17,139–$30,400; full librarian level, $20,385–$36,200. Initial appointment up to $30,000 depending upon experience. Benefits: 12-mo., tenure-track appointment with faculty status. Florida state retirement of TIAA/CREF, Blue Cross–Blue Shield group plan, 22 days' vacation per yr., no state or local income tax. **Send letter of application with complete resume and names and addresses of 3 references by Dec. 15** to: James H. Renz, Associate Director, **University of Florida Libraries, Gainesville, FL 32611.** The University of Florida complies with Section 503 of the Rehabilitation Act of 1973 and Section 402 of the Vietnam Era Veterans Readjustment Act of 1974. Preliminary interviews available at ALA Midwinter.

Director of Libraries
State University of New York – College at Potsdam

Potsdam College, a selective liberal arts unit of the SUNY system, invites nominations and applications for the position of director of libraries. The director is the chief administrator of the main and music libraries, with a collection of 333,000 vols. and 1,600 current periodicals, and reports to the provost.

The college, enrolling 4,500 students, grants the BA and MA degrees, participates in a 4-college consortium, and is a selective depository for state and federal documents. The libraries utilize all OCLC subsystems and provide online computerized reference services. The director provides leadership and assumes responsibility, within a collegial structure, for planning, directing, and evaluating all library operations.

QUALIFICATIONS: MLS from ALA-accredited school; 5 yrs.' progressively more responsible experience in library administration; evidence of professional growth through scholarly activity; a strong liberal arts orientation; experience at a 4-yr. college; familiarity with current developments in college librarianship; working knowledge of library operations. An additional advanced degree is desirable. Prospective candidates should support an integrative approach to public and technical services; offer a record of accomplishment in attracting external funding; and demonstrate expertise in financial planning and management. Salary range: $35,000 – $45,000. Starting date: July 1, 1985, or negotiable.

The college is located in New York's beautiful North Country, close to Lake Placid and the Adirondacks, with easy access to Syracuse, Ottawa, and Montreal.

Applications should be accompanied by a vita and 3 letters of recommendation. **The committee will begin its deliberations on Dec. 10 and will continue until a suitable candidate is identified.**

Please send nominations or application to: **Kay Brown, Chair, Director of Libraries Search Committee, c/o Office of the Provost, State University College of Arts & Science, Potsdam, NY 13676.**

Women and minorities are encouraged to apply. An equal-opportunity, affirmative-action employer.

Qualifications include an MLS or equivalent experience, knowledge of management and archival management, strong writing skills, familiarity with history and genealogy research, and ability to work effectively with Board of Trustees, volunteers, and a diverse public. Salary range is $14,000 – $18,000, depending upon qualifications. Send cover letter, resume, and 3 letters of recommendation to: Director, **Monmouth County Historical Assn., 70 Court St., Freehold, NJ 07728.**

CONSUMER CLASSIES

AVAILABLE AT NO CHARGE

HUMANITIES CLIPPING FILE. Extensive and comprehensive. 1930s–1980s. Strengths: Arts, Music, Philosophy, History, Literature, Religion, etc. Belonging to Estate of late scholar, writer, and Arts Administrator. Address requests for information to: J. Bloom, 79 Division St., South River, NJ 08882.

FOR SALE

INSTANT LIBRARY. Approx. 12,000 titles, all new professional, scientific, technical, medical, and scholarly areas. Art, behav. sci., business, computers, chemistry, education, history, medicine, natural science, physics, political science, psychology, urban studies, and more. Comprehensive collection of new (1981–present) and current titles. Wide representation of publishers. No secondhand or remainders. Perfect for new or expanding college or research library. Professional Book Center, P.O. Box 298, Alexandria, VA 22314, Attn.: Instant Library.

LIBRARY MUST SELL entire collection of 152 16- & 8mm sound films. Old-time classics & documentaries. $13,000 or best offer. Non-commercial use only. Library catalog: 503-440-4310. Douglas County Library System, Roseburg, OR 97470. Offers accepted until Dec. 1. Library reserves right to refuse all offers.

WANTED

WANTED: COMPLETE SET OF KINGSBOROUGH, *ANTIQUITIES OF MEXICO*, colored copy. Library duplicate acceptable. Reply to: Box B-862-W.

SUNDAY COMIC SECTIONS: 1900–1960. C. Held, Box 140, Buffalo, NY 14225.

VOLUMES OF NEWSPAPERS purchased. Collections of any size. HUGHES', 2410 North Hills Dr., Williamsport, PA 17701.

WANTED: THEOLOGICAL BOOKS AND PERIODICALS FOR SEMINARY COLLECTION. Would like to purchase duplicates, discards, weeds, out-of-scope material. Perhaps a religious collection no longer needed by a college or university. Contact: Jim Stitzinger, Calvary Baptist Seminary, Valley Forge Rd., Lansdale, PA 19446; 215-368-7538.

WANTED: NATIONAL UNION CATALOG, pre-56 Imprints (Mansell). Please contact: Jim Stitzinger, Calvary Baptist Seminary, Valley Forge Rd., Lansdale, PA 19446; 215-368-7538.

OUT-OF-PRINT BOOKS

EXCLUSIVE WANT LISTS get prompt attention, wide search, reasonable prices from International Bookfinders, Inc., Box 1-ALA, Pacific Palisades, CA 90272.

MORE THAN 100,000 OP BOOKS available now from UMI. Send for free catalog. Call toll-free: 800-521-0600. Write: University Microforms Int'l.—OP Books, 300 N. Zeeb Rd., Ann Arbor, MI 48106.

PERIODICALS AND SERIALS

KRAUS REPRINT AND PERIODICALS, Route 100, Millwood, NY 10546. Journals, books, and monographs in original edition, reprint, and microform. All subjects bought and sold. Want lists invited.

FREE & QUICK QUOTATIONS with SASE. Jay Bee Magazine Store, 134 W. 26th St., New York, NY 10001; 212-675-1600.

IRREGULAR SERIALS are one of our specialties. Foreign books and periodicals, current and out-of-print. Albert J. Phiebig, Inc., Box 352, White Plains, NY 10602.

ABRAHAM'S MAGAZINE SERVICE, INC., BL Dept., 56 E. 13 St., N.Y., NY 10003. Est. 1889. Please submit your lists of Duplicates for Sale. We buy sets, runs, and volumes in all fields and languages. No single issues wanted.

ALFRED JAEGER, INC., DEPT. AL, 66 Austin Blvd., Commack, NY 11725. COMPREHENSIVE PERIODICAL BACK-VOLUME SERVICE including out-of-print journals and microforms.

PERIODICALS, SERIALS, BOOK COLLECTIONS bought & sold. Jerry Alper, Inc., 274 White Plains Rd., Eastchester, NY 10707.

MARV BROADBENT, Beltsville, MD 20705-0996. Government publications. Standing, single, subscription, and search orders. 301-937-8846.

ASK AND YOU SHOULD RECEIVE. Back issues from Way's Magazines Unlimited. Est. 1947. Box AL-193, Seattle, WA 98111.

PERIODICALS bought and sold. J.S. Canner & Co., 49-65 Lansdowne St., Boston, MA 02215.

BOOK COLLECTIONS built through global agents. All fields A to Izzard. BOOQZ, No. 291, 3010 Santa Monica Blvd., Santa Monica, CA 90404.

PERIODICALS, BOOK COLLECTIONS, AND SERIALS bought and sold. Frank R. Snyder, 8 Palmer Ave., Croton-on-Hudson, NY 10520.

SERVICES AND SOURCES

RELOCATION SPECIALISTS, complete service or equipment rental, specialized book cart method, shifting, vacuuming, spec planning and shelving work. Diversified or shelf-to-shelf moves. Reasonable cost, yrs. of experience. Call or write for free estimate anywhere in the U.S.A. American Library Consultants Corp., 1841 New York Ave., Huntington Station, NY 11746; 516-423-1225.

GETTING QUESTIONS ABOUT COLLEGE? Future freshmen may find help in new bulletin (newsletter format) based on prof.'s extensive advising. Send $2 and a self-addressed, stamped envelope to: The College/University Report, POB 17943, Oak Park Station, Salem, OR 97305.

PATRON & I.D. CARDS . . . All types, plastic and vinyl. Call collect or write: ID RECALL, 306 Kennedy Rd., Los Gatos, CA 95030; 408-356-5462.

PRO LiBRA IS A PROVEN TEMPORARY/CONTRACT PERSONNEL RESOURCE for libraries, information centers, and other data repositories. If you welcome challenge and have current expertise, come join us. We offer opportunity and change. PRO LiBRA Associates, Inc., 106 Valley St., South Orange, NJ 07079; 201-762-0070.

BIBLIOGRAPHIC DATA CONVERSION: catalog records converted to MARC II, OCLC/MARC, and other computer formats. Database extraction and reformatting of existing tape files. Call toll-free 800-325-4984 or write: ELECTRONIC KEYBOARDING, INC., 140 Weldon Pkwy., St. Louis, MO 63043.

MARCIVE AUTOMATED CATALOGING SERVICE. Customized cataloging, fast & inexpensive. Catalog Cards, COM catalogs (microfiche and microfilm), Original Cataloging and Retrospective Conversion. MARCIVE, INC., P.O. Box 12408, San Antonio, TX 78212. Call toll-free 800-531-7678; in Texas, call collect 512-828-9496.

***THE ONE-PERSON LIBRARY:* A NEWSLETTER FOR LIBRARIANS AND MANAGEMENT.** Professional isolation is one of the major problems of working alone. We want to change that. This new newsletter is informal, informative, and above all, quick and to the point. Charter subscriptions (one yr.—12 issues) for $35, a saving of over 20%. Prepaid orders to: OPL RESOURCES, LTD., POB 948, Murray Hill Station, New York, NY 10156.

PRO LiBRA INVITES YOU TO CALL ON OUR PROVEN BASE OF SKILLS AND RESOURCES. To facilitate development and change, we transform obstacles into accomplishments. Access our current expertise for custom project design. Let us apply practical solutions to your dilemmas. PRO LiBRA Associates, Inc., 106 Valley St., South Orange, NJ 07079; 201-762-0070.

CREATE YOUR FUTURE. Unique program to focus your mid-career development, continuing education directions, and professional networking. *ALA Midwinter special:* workshop to help you plan your own professional networking. Friday, Jan. 4, 1985, 1 pm–4 pm. Cost: $45. **Preregistration by December 21.** For more information, contact: Career Connections, POB 9331, Santa Fe, NM 87504; 505-983-9217.

BAR CODE LABELS AND PATRON CARDS with preprinted bar codes or OCR imprints. Large and small quantities. Customized. Economical. Prompt delivery. Contact: John Morrison, DATA SYMBOLOGY, P.O. Box 18077, Rochester, NY 14618; 716-442-3152.

MEXICAN monographs and serials. Government publications. Free referral service and book lists. Selective blanket order service for academic libraries. Selection and distribution of single or multiple copies of textbooks. MACH, Apartado Postal 13-319, Delegacion Benito Juarez, 03500, Mexico, D.F.

BAR CODE/OCR LABELS to support all automated circulation and inventory control systems. Highest quality phototypesetting and adhesive products, first-scan readability, competitive prices, and prompt delivery. Toll-free outside California 800-227-2121, collect in California 415-232-6200 or write: Optical Scanning Sales, Data Composition, Inc., 1099 Essex, Richmond, CA 94801-2185.

BAR CODE LABELS for all library automated circulation systems. Guaranteed to exceed library bar code specs for readability, wear, and adhesion. Check our low prices. For more information, write or call collect: ID RECALL, 306 Kennedy Rd., Los Gatos, CA 95030; 408-356-5462.

(Technology articles, cont. from p. 704.)

CATALOG MAINTENANCE ONLINE

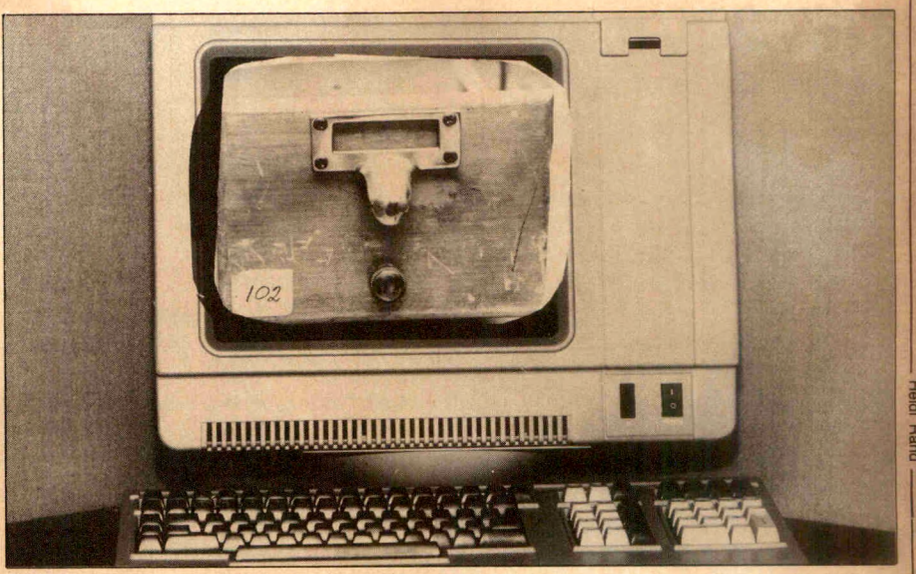
An in-house, online processing system called GLADIS has gladdened the lives of bibliographic services staff

by Russell Gardiner, head, Bibliographic Services Dept., General Library, University of California/Berkeley

IN SEPTEMBER 1983 WE UNVEILED A new online library processing system at Berkeley. Developed in-house by the library's Systems Office on a Tandem computer, it goes by the name of GLADIS—the General Library Automated Database and Information System.* At present the GLADIS database consists of those records, coming from bibliographic utilities, that represent monographs, serials, and nonbook material added to the collection since 1977. GLADIS is Berkeley's direct link to MELVYL, the online catalog for all nine campuses of the University of California system. It is through GLADIS that Berkeley's records are maintained and loaded into MELVYL.

We first applied GLADIS in catalog maintenance. This changed our lives dramatically in the Bibliographic Services Department, the unit responsible for copy cataloging of monographs and maintenance of the catalog database.

Maintenance work that once had to be done through the utilities on a record-by-record basis could now be done with a great deal of ease on GLADIS. Tandem terminals are easy to operate; word processing techniques are used for editing. Response time is fast. Especially attractive is the way the file is structured. A heading is stored once, in a headings file, and is then linked by a number to bibliographic records in which it is used. For the first time we were able to make global heading changes by one press of a key on the terminal—a far cry from the days of the electric eraser! Work that used to take hours could now be completed in a matter of seconds.



Heidi Rand

GLADIS transforms tedious catalog maintenance into a touch of the terminal.

GLADIS had a positive effect on the department's staff development. It allowed us to reorganize in such a way that jobs were significantly enriched. Before GLADIS, the work of five FTE comprising a unit called the Maintenance/Authorities Division was devoted entirely to such tedious tasks as corrections to records and updating holdings. The complexity of the procedures mandated a separate group of staff devoted to this work. For example, a person doing copy cataloging who happened to come across something needing correction would write the information on a slip of paper to give to maintenance staff to fix. But with GLADIS, one could go straight to a terminal and correct the problem on the spot.

We abolished the divisional concept, and reorganized according to functional area. A work leader is responsible for each such area. Staff are now assigned to the department at large and work in any number of functions depending on workload and the employee's interests and abilities. Virtually all staff have been trained in GLADIS procedures, and all five terminals are busy eight hours a day.

Putting GLADIS to work

We all know that "authority work" is the killer in cataloging, time consuming and expensive. We had always done post-cataloging authority work for copy cataloging—that is, checking headings for conflict from a shelflist card after releasing the book to the shelves. Since we had no way of knowing if any particular access point appearing on a shelflist card had been checked before, we were potentially duplicating a significant number of look-ups.

With GLADIS we get a weekly printout of headings that are unique to the database as new records are loaded. In this way we check only those headings that do not match exactly on a heading already in GLADIS. This has reduced our look-ups from an average of three per record to one per record.

Another area in which GLADIS works actively for us is quality control. Certain checks, such as identifying duplicate call numbers or records, are built into the system. Reports on these problems are provided in the form of error logs. Although the error logs do not totally compensate for the occasional human error, these notices allow us to correct mistakes promptly—in contrast to the occasional notification that emanated from a public service librarian.

This is just the beginning; much is yet to come for GLADIS. First will be an automated circulation system to replace the antiquated tab-card system. And to mention a few other future functions: serials control, book ordering, and the loading of Berkeley's authority file to support interactive control of headings. □

*The GLADIS system runs on a Tandem computer and currently has the capacity to store over one million MARC records. The Tandem was selected for its fault tolerance, ease of expansion, and a hardware/software architecture that is well suited to a "real-time" transaction environment. The GLADIS programs are written in Tandem languages and are therefore not transportable to other computers.

A MIGHTY, MENTORING CATALOG

The name "Socrates" suits the online, mainframe catalog developed for the full Stanford University community

by James N. Myers, director of technical services, Stanford University Libraries

THE JURY IS STILL OUT, AND THE PROgrammers still poised at their keyboards. The decision that Stanford made to go with local development and the University's mainframe computer for its online catalog "Socrates" is not necessarily final. However, the choice is looking like the right one after a year's experience with Socrates—and in anticipation of a parallel, administrative-database system called "Prism."

The online catalog of the Libraries was developed in-house in a joint effort with the Stanford Information Technology Services. It became available to the university community in September 1983.

Today, Socrates provides access to some 1.05 million bibliographic records in most formats. With tapes from the Research Libraries Information Network (RLIN) loaded in, it grows at the rate of about 35,000 titles a month.

The computer behind Socrates is the IBM 3081 operated by Information Technology Services. The catalog can be used from 28 library terminals placed in 17 library locations and from over 5,000 terminals and microcomputers located on the Stanford campus network. Dial-up access is available as well.

Mentoring mode

Socrates provides the user with the power of two modes of operation: lookup mode for the novice, and command mode for the experienced. Lookup mode, through a system of prompts, teaches the user the rudiments of command mode, while making the catalog's contents available to the less practiced. A help system further enhances the user's abilities to go it alone, with approximately 90 context-dependent messages and 180 messages which teach Socrates use and provide directory information.

Thirteen indexes are available to the user of command mode, with choices of keyword and phrase searching available on most of the searchable fields. Searches in command mode can be indefinitely chained by the boolean operators (and, or, not). Six of the indexes are available in lookup mode. The results of searches are reported in lists of headings or in brief citations, depending on the nature of the search. Fuller citation displays are also available. Socrates users may send the results of their searches to an electronic mailbox for later manipulation.

Off-campus access is available via telephone to members of the Stanford community and to others at the university's standard rates for such service. Any terminal is sufficient to access the Socrates system. For students, faculty, and staff, night and weekend access is free; for others it is very inexpensive.

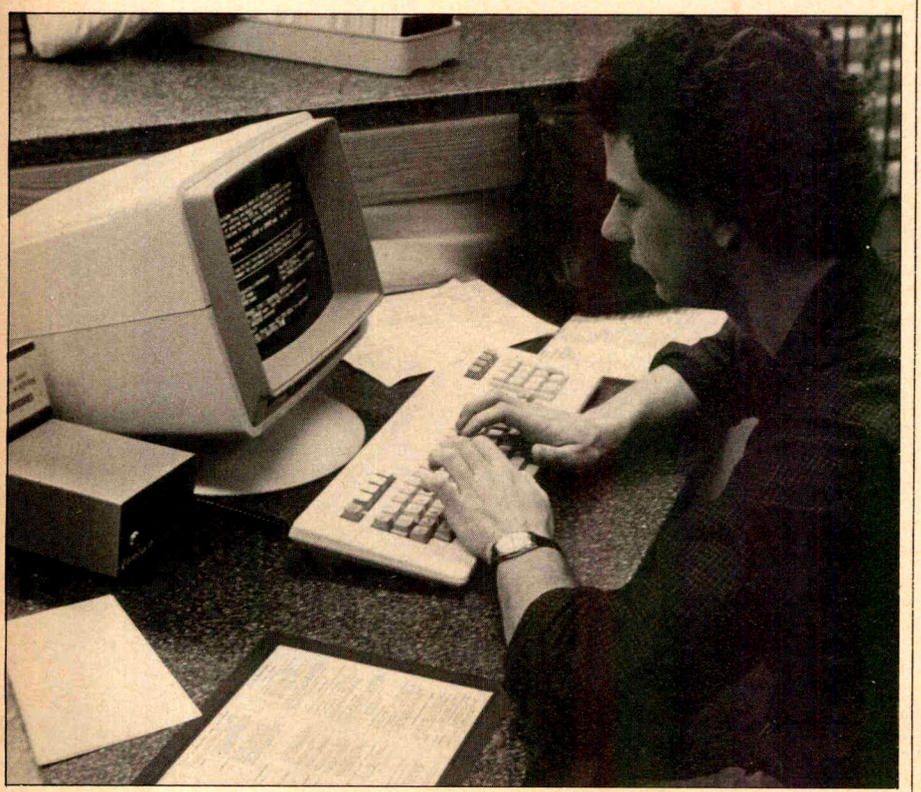
The greatest call for improvement in the system is for the addition of terminals. About 18 were added in September. Socrates has some skeptics, few detractors, and a growing number of fans. Its built-in message system, "suggest," is often used to request the purchase of library materials, to ask for rush cataloging, or to suggest improvements in the catalog itself.

A number of enhancement projects are underway. Among these is a Socrates system for access to collections of technical reports. Addition of the format for archives and manuscripts will follow. Other features under review are the power to limit searches by other than indexed fields, centralized printing, linking of automated circulation and serials control (acquisitions records are already available), and an improved message system to allow more convenient requests for material orders, holds, and rush cataloging.

* * *

In the future, we hope to provide the power of hierarchical searching on the RLIN system and on commercial databases with the familiar Socrates search arguments, which will return familiar Socrates displays. Prism, the Stanford-wide administrative database system, parallels Socrates, taking advantage of the single-command language and commonality of presentation for search arguments and data displays.

If the advantages of the joint availability of Socrates and Prism are as great as anticipated, it's most unlikely that Socrates will have to drink the hemlock. Already it is clear that Socrates is useful from sites outside the Libraries, and undeniable that the wide access to Socrates and Prism could not be replicated on today's minicomputer-based systems. □



Socrates users can access some 1.05 million bibliographic records from over 5,000 terminals and micros in the Stanford campus network.

THE WELL-CONNECTED IMC

A rural school district is in the thick of mainstream technology thanks to state, staff, and student interest

by Carolyn Servais, IMC director, Little Chute (Wis.) Area School District

TECHNOLOGY HAS BECOME THE NUTS and bolts of our Little Chute High School Instructional Materials Center. It's hard to imagine ever being a books-only operation; yet, when I entered education 20 years ago that's exactly what I found. Now every year new technologies provide new challenges.

What do we have here? Videotape recorders, computers, microfilm and fiche, film projectors, cassettes, loop projectors, slide projectors, cameras, overheads, and opaques, to name but a few of the items put to daily use within our high school. Our building is, however, particularly strong in the use of video and computer technology.

Videotaping came to our school as a means of enriching all curriculums. It also provides supplemental material not available by other means. The technology itself has proved extremely valuable; but membership in our regional television agency (NEWIST) has been most important in getting the fullest use out of the programs.

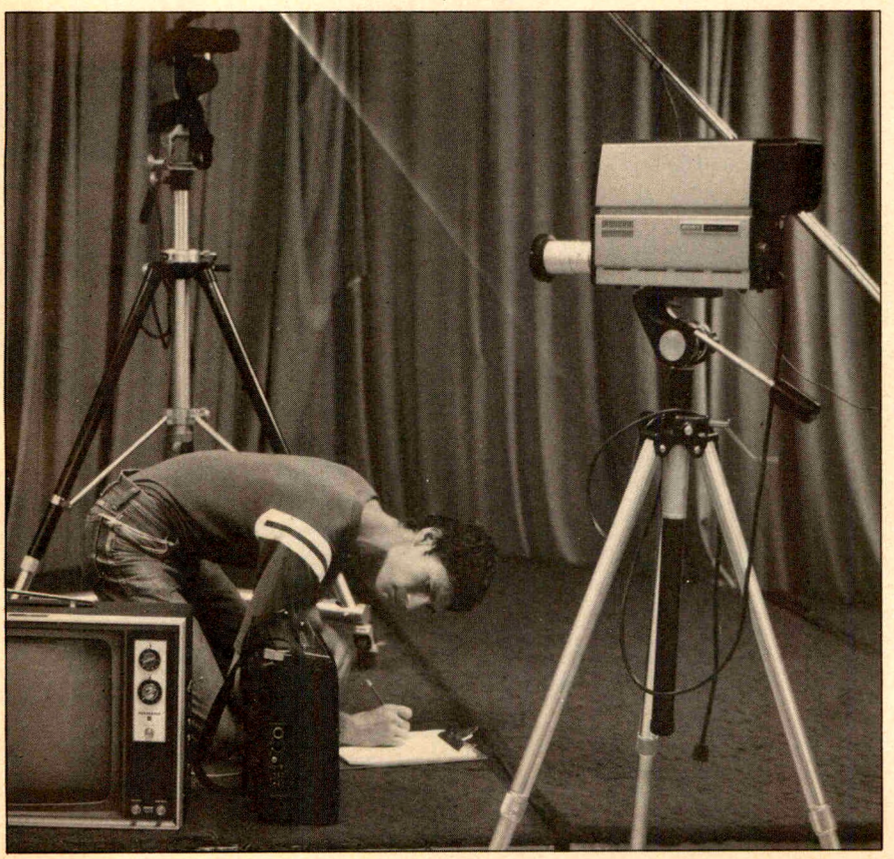
We've used video equipment for 10 years. We are currently in the process of converting from ¾-inch format to ½-inch VHS equipment for all recording and playback. For the 84 – 85 school year, we will be operating with three ½-inch units (one Hitachi, two JVCs) at our head end where all recording is done.

One unit will be what I term a "floater." This unit is made up of a playback unit and a monitor on a cart. This gives our staff the opportunity to take the unit and use videotapes directly.* Currently, we can record and/or playback through three separate in-house channels. We can also broadcast live to any classroom in the building.

All video equipment is located and housed in our video studio (a classroom we took over out of necessity). We have two Hitachi color cameras and a black-and-white Sony. For our field work, we have a ¾-inch Sony and a ½-inch JVC portable video unit.

Our varied equipment needs preventative maintainence, and much of this work is done by students through a student-aide program. The program trains students to operate as well as maintain equipment, and soon they become indispensable to the IMC.

*In addition to the three ½-inch units, we have four ¾-inch floaters going out to teachers. As we make the changeover to ½-inch tapes, we plan acquisition of additional ½-inch playback units.



Jerry's Studio, Kaukauna, Wis.

Student Kurt Krzyzak keeps track of equipment from the Instructional Materials Center at Little Chute High School.

On to micros

For the immediate future, getting video and our micros working together (interactive video) is of great interest. Our school district emphasis has shifted to the use of the microcomputer, and the IMC is totally involved in all activities. The high school houses 32 Apple computers. Acquiring this technology is part of my work as media director. Like video, computers keep me on my toes, continuously prepared to launch something new. How do I keep up? With workshops, college courses, conventions, and the resources of professional organizations, special groups, and the Wisconsin Department of Public Instruction.

* * *

I often wish I had unlimited funds. I'd expand our facility (go out the roof and add a second floor). Another dream I have is to assume the role of full-time district media director (I currently squeeze that in along with my high school position), and still keep a full-time professional in each of our three buildings, plus such necessary help as an AV-repair person. I'd then proceed to loop all the schools together and make the high school the district broadcasting facility. After I had that done, I'd establish a full-scale, district-wide production lab.

But I'm proud of what has been accomplished in our small school, and always proud of the fact that I work closely with young people. That's really what my job—and technology—is all about: providing the best for the kids at LCHS. □

PLUG-IN CENTER FOR STUDENTS

At Clarkson University in Potsdam, N.Y., every student gets a micro, and the library offers applications

by J. Natalia Stahl, associate director, and Richard D. Valente, director, Clarkson University Educational Resources Center

Ed. note: A misreading of Clarkson's plans in 1980 for a high-tech resources center led to no less than six items in the New York Times *that year with such headlines as "College library does away with books." In letters and editorials, Clarkson became a symbol of dehumanizing technomania. In truth, the school was only evolving along the same paths as hundreds of other institutions.* American Libraries *asked the authors to report on the state of technology in the Resources Center today.*

A VIEW OF THE LIBRARY AS AN "INformation switching center" influenced the design of the Educational Resources Center at Clarkson University. The computing center and the audiovisual office, having similar information functions, were also integral components of the new ERC. And in 1983, a new program to provide every entering freshman with a personal computer gave the ERC an opportunity to make resources electronically available to all members of the Clarkson community.

Before the creation of the ERC, the library had used the services of the computer center to create a batch-mode serials list and several statistical packages. For various reasons, however, new applications were difficult to develop. The library staff was unfamiliar with computing, and there were difficulties of communication between people in different disciplines with different sets of priorities and in different buildings.

The proximity of library and computer personnel in the ERC helped break down some of the communications barriers that had previously delayed automation projects. Terminals with access to a new IBM 4341 host computer became readily available to all who needed them. The most important factor in the progress was education of both professional and nonprofessional staff members. Over a one-year period, a staff member with expertise in computing worked closely with every department. We completed small projects such as creating missing-book lists, acquisitions and weeding lists, and a circulation database with automatic generation of overdue notices.

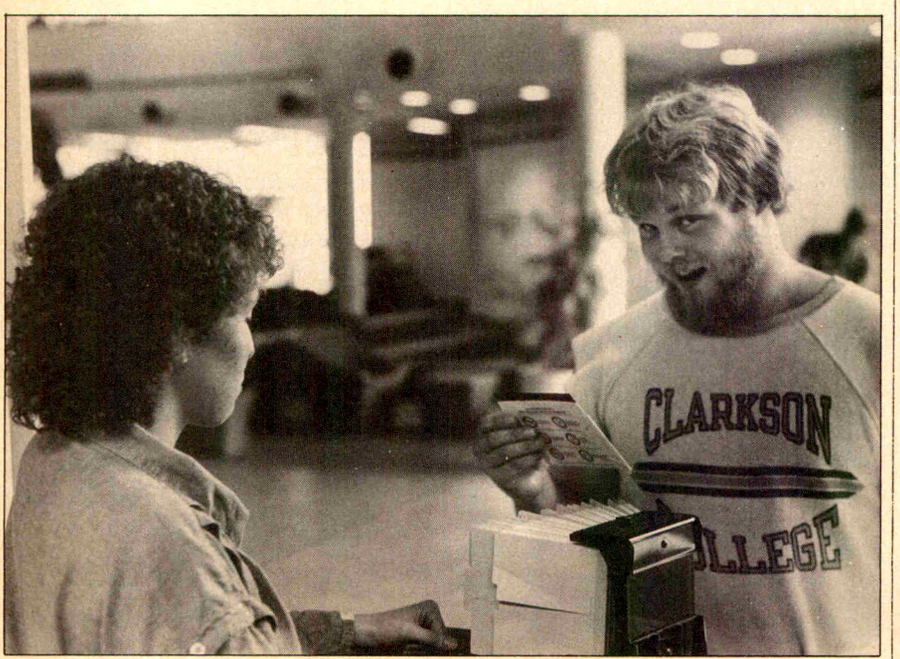
In fall 1983 Clarkson initiated its program to provide every incoming freshman with a microcomputer. An immediate concern for us was to develop an area for distribution of software written by faculty for instructional use. This function was combined with the traditional reserve room and located in a "curriculum support" area. Three Zenith Z-100 microcomputers (currently the university standard machine) were provided for copying disks and for letter-quality printing. This area has proved very successful in implementing Z-100 support.

A most significant step was taken in September 1983 when the in-house software package "Termite" was released. Termite allows Z-100s to act as terminals to the IBM 4341 and other host computers. Files can be transferred, and students can have access to public files the library creates on the mainframe. Presently, network-connected Z-100s are located in the curriculum support area and in special laboratories across the campus. We plan to extend the network to the dormitories.

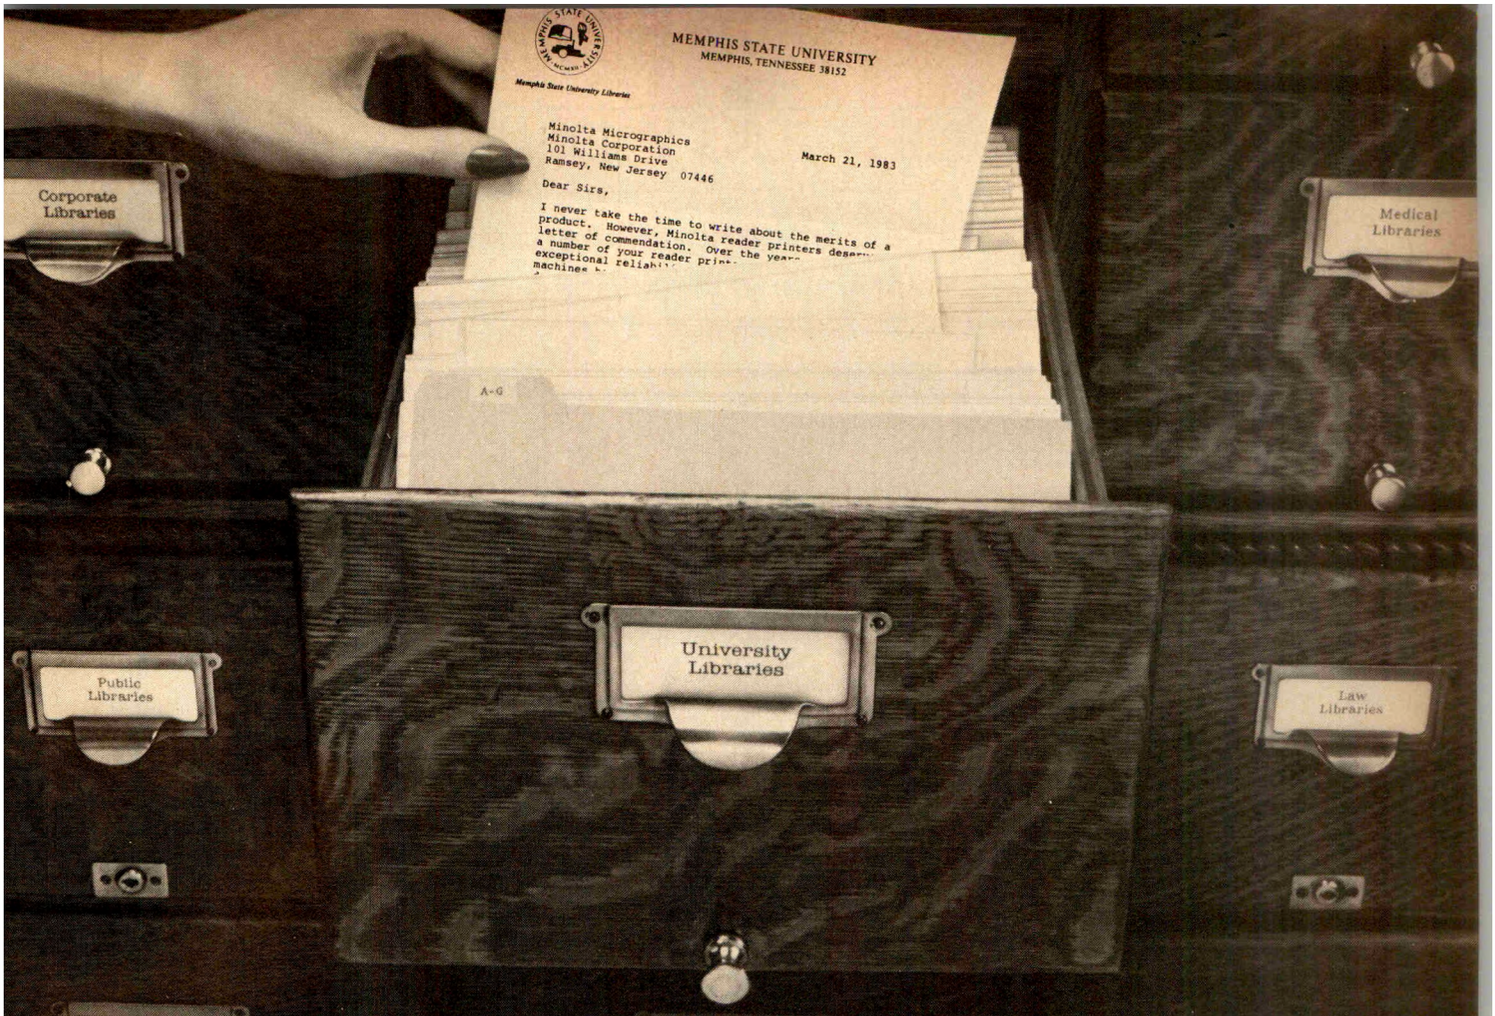
A special committee of computer consultants and librarians has projected uses of the network and set priorities for application development. Online access to serials control was identified as a primary need. Programming began in-house, with plans to merge information on OCLC serials tapes into the database. Phase one of this project is nearing completion.

Automation at Clarkson has taken a course of gradual evolution rather than spectacular change. Large traditional functions (such as acquisitions on OCLC) and small programs (such as a software-awareness registry for the local network) are computerized only when rationalized economically and in terms of usefulness to our clientele.

Our approach allows us the flexibility to develop applications without large expenditures. Potential projects include user alerts to newly received serials of interest, access to subject bibliographies of material in our collection, and access by users to the lists of books they have checked out. Imaginations can easily outrun the time available to set up new programs—which is perhaps the biggest drawback to in-house automation. □



Two Clarkson University students select circulating software in the "curriculum support" area of the school's Educational Resources Center



THEIR REFERENCES WOULD FILL A LIBRARY.

Libraries from A to Z have written us referencing the quality and reliability of Minolta RP 405E and RP 407E reader-printers.

We're pleased, but not surprised. Because both models have a lot to offer libraries. They give you sharp, positive, permanent prints from either positive or negative film. Prints you can write on with just about any writing instrument.

They feature Minolta's exclusive fully automatic exposure control for quality prints the first time. Saving time and reducing paper costs.

And they accept virtually every microformat made. With carriers that permit even untrained operators to switch from roll film to fiche in seconds.

See them at any authorized Minolta dealer in our nationwide network. Check the Yellow Pages for the one nearest you. Or call toll free 800-221-3333. In N.Y., (212) 775-1395.

Minolta reader-printers. Because libraries are where classics belong.

IF YOU DON'T INSIST ON A MINOLTA THIS TIME, YOU WILL NEXT TIME.

A COPIER EASY ON BOOKS

An ALA service that ordinarily reports on new technology takes the initiative and develops a much-needed copier

by Howard S. White, editor, *Library Technology Reports*, American Library Assoc.

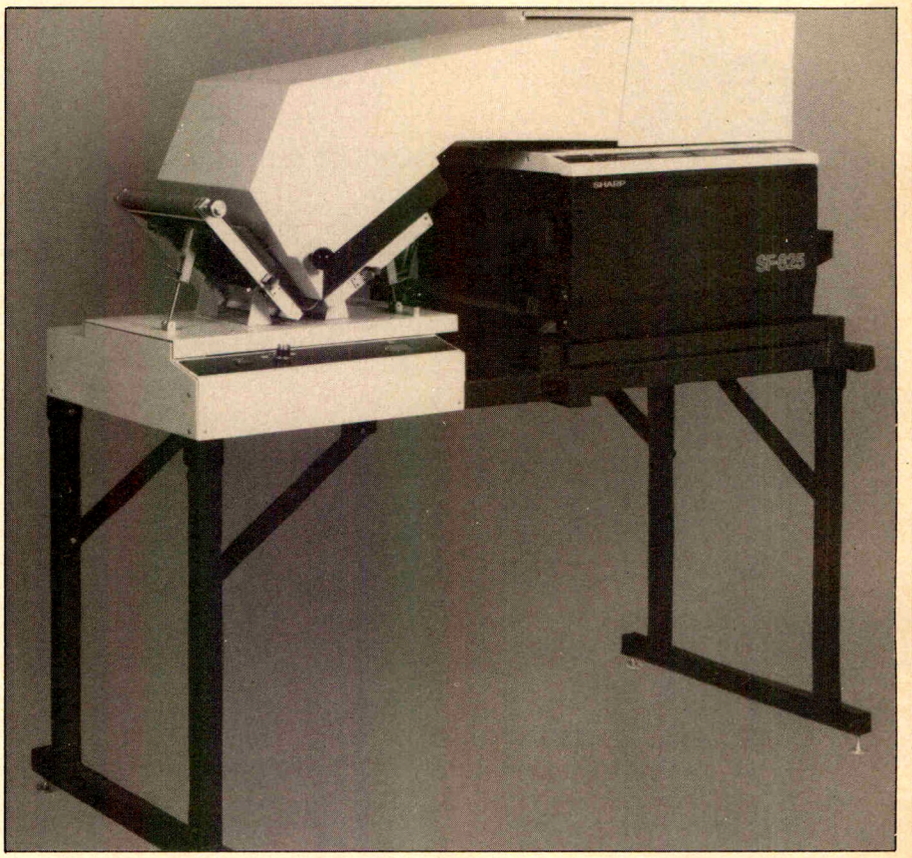
PHOTOCOPIERS THAT REQUIRE A book to be pressed flat against a glass have damaged untold numbers of volumes. Letters alerting copier manufacturers to the book copying needs of libraries have been to no avail. Manufacturers have often claimed that libraries represent too small a market to warrant consideration of their unique copying needs.

In the mid '70s a one-of-a-kind, face-up book copier was designed and built at the New York Public Library under the supervision of Ladislaw Sajor, then assistant chief of the Photographic Service. The design for this device was unorthodox and its appearance was less than elegant—but it worked. In its half-dozen years of service, the FUBC (face-up book copier) was used extensively for copying rare and sensitive library material that could not otherwise have been copied. Thousands of books were copied before the copier, an antiquated Olivetti Copier III, became so old and unreliable that it was retired and dismantled.

It was against this background that Francis Spreitzer, head of micrographics and reprography at the University of Southern California library, Robert A. Morgan, longtime consultant to *Library Technology Reports* and inventor of various optical and micrographic devices, and the editor of *LTR* met to discuss the possibility of seeking outside funding for a specialized piece of equipment that would safely copy bound material. The machine could then be licensed to a manufacturer.

Morgan sought to conceptualize a machine based on state-of-the-art copier technology that would accomplish the same goals as the FUBC at NYPL, but in a form that could be mass produced and marketed to libraries at an affordable price. The final design concept included an adjustable book cradle and an optical device for projecting the image of a page to be copied onto the exposure platen of a standard plain-paper office copier. A mock-up was constructed and tested with an available copier.

Having demonstrated that the engineering concept was sound, the group sought input from various groups within ALA and approval from the ALA Executive Board to apply for a grant. The National Endowment for the Humanities funded the proposal in March, 1983. Actual work on the project began several months later and a manufacturing prototype was delivered in time for exhibition at ALA Annual Conference in Dallas.



Innovative copier features book cradle (left) for face-up copying.

How it works

The device is based on a Sharp SF-825 plain-paper copier equipped with an alternate projection system that permits pages from bound volumes to be copied without opening the book more than 100 degrees. The copier is able to make clear, undistorted prints from pages that are tightly bound and have narrow inner margins.

The book to be copied is placed on an adjustable book cradle to the left of the photocopier. The alternate projection system is lowered into the open book so that it focuses on the right-hand page. The page image is reflected onto a mirror, then through a lens and onto another mirror, and finally onto a fresnel lens system resting on the exposure platen of the copier.

The photocopier "sees" this image as if it were the original book page, removed from the book and resting face-down on the glass. From this point on, the copier takes over and produces a xerographic copy of the page image. The operation takes no longer than a regular copier and in some ways is more convenient, since the book is face-up in a normal reading position and the print image quality is comparable to that of a conventional photocopy print.

After Annual Conference, the machine was returned to the contractor for modification prior to field testing. The final step in the project will be to license the manufacturing rights, thus assuring the machine's commercial availability. It is hoped that the first production models will be available by early 1985. □

Circulation Plus. Check it out!

f you're looking for library utomation software, be sure to heck out **Circulation Plus** from he Library Software Company. **irculation Plus** is a low cost, ard disk management system esigned by the same award rinning team of librarians and rogrammers who developed **The verdue Writer.** It is capable of andling 30,000 to 65,000 books nd 8,000 patrons on a 5-10 egabyte hard disk drive. **Cir-ulation Plus** utilizes barcode echnology for fast check in and ut, and provides an impressive umber of print options and tatistical reports.

Because The Library Software Company understands that even at the comparably low cost of $695.00, **Circulation Plus** may be a significant investment for a small library, we have developed a Demo Pack that runs on a computer with dual floppy disk drives, and allows you to check out the many features of the complete system. The Demo Pack comes equipped with its own manual and costs $25.00 - which can be applied toward the purchase of a **Circulation Plus** Program.

Circulation Plus is designed to operate on an Apple IIe, TRS-80, or IBM PC — equipped with a 5-10 megabyte hard disk drive.

To find out more about **Circulation Plus** and the other products of the Library Software Company, or to order a Demo Pack, please fill out and mail this coupon today!

PLANNING FROM SCRATCH

Not many librarians get a chance to plan an up-to-date facility from ground zero. Here's what it feels like.

by Richard T. Sweeney, dean of library and information services, Polytechnic Institute of New York

Ed. note: Richard Sweeney, formerly director of the Public Library of Columbus and Franklin County, Ohio, was hired Aug. 1 at Polytechnic "to develop a state-of-the-art library system," according to the school's announcement. AL *asked Sweeney to elaborate for this special issue.*

I'M A LUCKY GUY. I'M CHALLENGED, excited, a bit scared, and having fun. I'm in on the planning of a state-of-the-art library at one of the nation's leading technological universities.

Consider this my "before" article, when our hopes are very high. Whether we're making the right decision will be weighed in my "after" article, after the new Bern Dibner Library and Information Center opens its doors in 1986.

The 60,000-square-foot facility will be a major educational research resource here at Polytechnic Institute of New York. With a $9.4 million capital budget and a $3 million budget for building maintenance and operation, it's the first centralized library created at Polytechnic in the school's 130-year history. State-of-the-art information storage and retrieval technology will help establish a truly integrated library system, electronically linking Polytechnic's three campuses in Brooklyn, Long Island, and Westchester.

The library is being designed to provide integrated automation program functions, both for internal operations and new direct user services. From networking of local microcomputers to developing connections to satellites for global access to databases, we hope to meet today's exploding information needs and be flexible enough for tomorrow's requirements.

Guesswork

The truth is that there's still a lot of guessing that goes with developing tomorrow's library. Sometimes librarians make the right "professional judgment" calls, sometimes they don't. In my own case, there was that brilliant talk I gave in 1972, when I predicted that all homes in major metropolitan areas would have interactive cable television connections by the mid-'80s.

Recently I visited a nearby educational institution to check out its library, built in 1968. I wanted to see how well they had planned for the next 20 years—which is what we're trying to do at Polytechnic. They did a pretty good job, but the technological changes of the years have caused some snags. The library has insufficient electrical wiring for today's microcomputers. Four people use the same terminal when one terminal per staff member is what's really needed now. None of us were marketing services to outside clients then, so the single work area is overloaded with phones ringing and people talking. Anticipating future trends, the library had set up a video studio, a sensible enough idea at the time. Today, the studio houses microcomputers.

> **"The truth is that there's still a lot of guessing that goes with developing tomorrow's library. ... So what you try for is an up-to-the-minute design with adaptability to changing needs."**

You simply can't anticipate everything tomorrow's library will need. So what you try for is an up-to-the-minute design with adaptability to changing needs. For example, microcomputer labs need pop-out floors for cables, and they need temperature controls. Allowing for additional computers and cables down the road can save a lot of money. The modular point of view makes sense. The challenge is deciding whether to spend perhaps five percent more of your budget now for changes that might never come about—or might cost 10 times today's expenditures if they do.

That's where the professional judgment comes in.

Cast not the old aside

Mature technology must sometimes be allowed to run its course as new technology evolves. Bound journals take up a lot of room, so we use microfiche or film as much as possible. But soon the profession may be involved with full-text retrieval systems. Already the Library of Congress offers a pilot text-retrieval service using interactive videodiscs. For other libraries, such services may be a decade away. So the question is: How do we design the journal area to meet today's needs for bound volumes and microforms and still prepare for possible changes requiring a lot more computer terminals?

And if we move to interactive videodiscs, are we going to be able to put the equipment in the same space as today's microcomputers? What will storage costs be? Power needs? Will we have to redesign our lighting to avoid glare problems on terminal screens? How do we cable the building? Do we make allowances for future installation of fiber optics?

We're excited about the technological equipment and services we'll be able to offer to Polytechnic students and faculties, to researchers, and to businesses who become part of a planned high-technology industrial park called MetroTech. We're looking at direct user services such as electronic mail, electronic bulletin boards, computer conferencing, creation of local databases, networking of local microcomputers, resident commercial databases, public-access cataloging, downloading and manipulating of files, and searching of remote databases (including those of other libraries).

Ultimately, the much-discussed "library without walls" may come about, but not in our generation. A better description of where we're heading in the next 20 years is the "library *beyond* walls." What we learn at Polytechnic in the mid-'80s may help others design their libraries for the '90s and beyond. But basically, we're only trying to do what every library has existed to do from the beginning: provide the information people need when they need it. As long as we keep a clear sense of our mission, the technology will fall into place. □

Dynix automation saves volumes for your library.

Whether or not to automate is no longer the question for libraries. Even small ones. The question is how to do it. How can your library have all the advantages of automation, and do it within your budget?

Affordable Automation.

At Dynix, we have the answer: The Dynix Automated Library System. The Dynix System lets you put *less* money into automation so you can put *more* money where it belongs—into new volumes for your shelves. Yet your system will have *all* the capabilities (and more) offered by other, more expensive, systems.

System Flexibility.

The key to the Dynix System is flexibility. Because the Dynix System software runs on over 20 different hardware systems, your library can choose the system that best fits your needs and your budget. With complete library hardware/software packages installed for as low as $35,000, Dynix has made automation affordable for all libraries, regardless of size.

The Dynix Commitment.

From Conversion Software to the Public Access Catalog, we at Dynix are committed to product excellence at an affordable price. And we are just as committed to excellence following installation.

Learn more about affordable automation from Dynix—call or write:

action exchange

Security tapes, range markers, and high school aides

Q. Who knows of a new method for inserting security tapes in paperbacks? *Mary K. Chelton, Editor, Voice of Youth Advocates, POB 6569, University, AL 35486* (*AL*, Sept., p. 560).

A. I've been hiding security tapes in paperbacks so that they can't be found, let alone removed, but I don't broadcast security methods. However, I'll put the information into every SASE that comes to me from the technical services department of any library listed in the '83 edition of *American Library Directory*. *David R. Lane, Gallagher Library, California Maritime Academy, POB 1392, Vallejo, CA 94590.*

Q. Our library uses standard three-by-five-inch "V" shaped brackets at the end of ranges to give call number information. What other methods do librarians use to guide patrons through the stacks? What size, shape, and data can markers contain, and how are they produced? *Doris Weingart, Head, Circulation Services, University of California/Riverside Library, POB 5900, Riverside, CA 92517* (*AL*, July/Aug., p. 488).

A. We felt the usual brackets weren't large enough to hold information visible from a distance, so we contracted with a sheet metal firm to design and make larger frames. They measure five-by-seven inches and may be attached to the end of a shelf range. They hold thick poster board if desired, with attached screws that are hidden from public view. Send me an SASE if you'd like a detailed drawing. *Ron G. Martin, Director, Library Public Services, Indiana State University Libraries, Terre Haute, IN 47809.*

New! $10 for published replies

To recognize the efforts of Action Exchange respondents, *AL* will pay $10 for each reply published. (ALA staff not eligible. Payment upon publication.)

Q. What small-to-medium-sized libraries have developed written quantitative and qualitative performance standards for high-school-student aides? *Gerald J. Fadlalla, Director, Glen Rock Public Library, 315 Rock Rd., Glen Rock, NJ 07452* (*AL*, July/Aug., p. 488).

A. Library aides at the Hancock (Mich.) School Public Library measure their performance against six written goals and the corresponding objectives and procedures. Evaluation is based on the individual student, since students may apply to work in the library during one or more years in grades 7–12.

CLASS

1415 Koll Circle, Suite 101 San Jose, CA 95112-4698 (408) 289-1756

Verbal evaluation and graded tests have supported the letter and attitude grades earned by students every six weeks. This year we have introduced a formal evaluation sheet based on the written goals. *Susan Beck, Director, Hancock School Public Library, 417 Quincy St., Hancock, MI 49930.*

Q. What policies have libraries, particularly academic libraries, instituted to deal with circulation of R-rated videotapes to patrons under 17? *Penny Elkins, Reference Librarian, Jessie Ball du Pont Library, University of the South, Sewanee, TN 37375-4005.*

A. "Unless directly and specifically prohibited by law from circulating certain motion pictures and video productions to minors, librarians should apply the same standards for circulation as to books. Just as 'labeling' of books is deemed 'an attempt to prejudice attitudes,' so is the affixing of MPAA rating codes to motion pictures and video productions," according to "Circulation of Motion Pictures and Video Productions: An Interpretation of the Library Bill of Rights." The two-page policy was adopted by Council at the ALA Annual Conference in Dallas June 27, and is available for an SASE from the *Office for Intellectual Freedom, ALA Headquarters.*

Q. What academic libraries share a building with their computer center? Any problems, suggestions, ideas? *Richard Pantano, Director, Shapiro Library, New Hampshire College, 2500 River Rd., Manchester, NH 03104* (AL, Sept., p. 560).

A. Housing the mainframe terminals and microcomputers in the Mansfield (Pa.) University Library has benefited both service areas. The library provides a secure, aesthetically pleasing space at much lower cost than other campus locations.

For libraries contemplating a similar arrangement, we suggest that the computer area provide a separate entrance, rest rooms, and a book detection exit gate, because patron use will soon justify longer hours. In addition, a room immediately adjacent to the computers should be available for classes or to relieve congestion.

The only persistent problem we have experienced is that completing computer assignments seems to be a communal project generating noise, so the computer area should be completely separate from the library. *Larry Nesbit, Director of Libraries, Mansfield University, Mansfield, PA 16933.*

Q. What automated circ system can notify a borrower that another user requests the material and can also tell the original borrower when the second user returns it? *Barbara Weir, Information Specialist, Academy of Natural Sciences, 19th & The Parkway, Logan Sq., Philadelphia, PA 19103* (AL, June, p. 370).

A. Most turnkey-automated library systems contain a feature that allows the library to recall an item that has been checked out to an individual prior to the due date. Once the item has been returned for use by another patron, the original user can place a hold or reserve on the item. When it has been returned it can be checked out (regardless of the check-out period) to the original user. *Joseph R. Matthews, J. Matthews and Associates, Inc., POB 2201, Grass Valley, CA 95945.*

Q. What public libraries classify juvenile collections by LC and also obtain cataloging preprocessed through a

jobber who uses MARC records? How do you cope with class changes that have not been updated on MARC for older titles that you reorder periodically? *Laura Culberg, Assistant Division Head, Catalog Division, Chicago Public Library, 425 N. Michigan Ave., Chicago, IL 60611* (AL, July/Aug., p. 488).

A. Our juvenile collection is a combination of LC (nonfiction) and Dewey (fiction and easy-reads). When we receive preprocessed cataloging from Brodart that is not updated, a cataloger assigns that title LC classification and subject headings, and we change the jobber's cards to the newly assigned cataloging. Surprisingly, the number of titles for which this is necessary is not as great as one might anticipate. *Denise Listovitch, Technical Services Librarian, Pawtucket Public Library, 13 Summer St., Pawtucket, RI 02860.*

Over to you

1. What public libraries subscribing to between 500 and 600 journals have automated their serial operations? What system do you use and what are the results? (N.Y.)

2. For a research project, I would like to receive video catalogs (VHS or Beta) from public libraries. *Stephen Harvey, AV Librarian, Upper Arlington Public Library, 2800 Tremont, Columbus, OH 43221.*

3. What libraries have policies concerning patrons bringing portable microcomputers to use in the library? (Fla.)

4. Our task force on vandalism wants to educate students and faculty members about the negative results of theft and mutilation of materials, especially in terms of reduced service and inconvenience. What commercial source produces posters on vandalism in libraries? What other efforts can academic libraries suggest? (N.J.)

5. What experiences have librarians had in providing subliminal or hypnosis audio tapes for patron use? (Ia.)

6. Do any public libraries have service level descriptions (hours, collections, staff, programming) for different sizes or different types of branch libraries? We need help in developing service level goals for our main library; large, medium, and small branches; and a popular branch. (Fla.)

7. What library is using a telephone-answering machine on the reference telephone line during busy hours to record questions and allow the librarian to return the call with the requested information? What are your experiences? (Calif.)

Early English Newspapers

A rare, comprehensive collection on microfilm, by title.

Now, the combined collections of Dr. Charles Burney, the Bodleian Library, and major American sources are available for the study of the social, intellectual, and political history of Europe from 1622 to 1900. Encompassing thousands of volumes preserved on 35mm microfilm, this collaboration of early English newspaper collections has been — for the first time — completely catalogued by title with an accompanying bibliography/reel index for accuracy.

Based on The British Library's Burney collection, this microfilm collection is available in units consisting of approximately 50 reels each. Units 1-24 may be ordered at the standing order price of $1,600. per unit and units 25 onward for $2,000. per unit. Prices slightly higher outside the U.S. and Canada.

Nominating Committee report

The American Library Association Nominating Committee is pleased to submit a slate of candidates for the 1985 election of officers and Council members in accordance with Bylaws/Article III, Sections 1 – 5; and Article IV, Section 2(b) and (d); Section 3; Section 5.

It is also appropriate to call attention to Bylaws/Article III, Section 2(b): "At the Midwinter Meeting any member of the Council may present a petition signed by not fewer than 25 councilors proposing additional nominations. Such nominations shall be included on the official ballot."

Bylaws/Article III, Section 3(b) further states, "The ALA Nominating Committee shall also include on the official ballot other nominations filed with the executive director by petition of any 25 members of the association at least four months before the annual conference, provided written consent of these nominees shall have been filed with the executive director of the association."

Nominating Committee members are Sul H. Lee, Suzanne J. LeBarron, Patricia H. Mautino, Ilse B. Moon and Chairperson Thomas E. Alford.

In accordance with Constitution Article VIII, Section 1, and Bylaws Article III, Section 1(b), two nominations are presented for the office of vice president and president-elect. One will be elected to office.

Vice President and President-Elect

Regina U. Minudri, director of library services, Berkeley Public Library, 2090 Kittredge Street, Berkeley, CA 94704.

Donald J. Sager, city librarian, Milwaukee Public Library, 814 W. Wisconsin Ave., Milwaukee, WI 53233-2385.

Council

In accordance with Bylaw Article III, Section 1(c), 50 nominations are presented, 25 to be elected for the four-year term, 1985 – 89. Nominees are: *Cecil Beach,* director, Libraries Division, Broward County Board of County Commissioners, Ft. Lauderdale, Fla.; *Rebecca J. Taylor Bingham,* director, library media services, Jefferson County Public Schools, Louisville, Ky.; *Nancy M. Bolt,* president, JNR Associates, Milford, Ohio; *June Breland,* serials librarian/cataloger, Mississippi State University, Mississippi State, Miss.; *Kay Ann Cassell,* director, Huntington Public Library, Huntington, N.Y.; *Connie Champlin,* assistant supervisor, computer education, Omaha Public Schools, Omaha, Nebr.; *Luis F. Chaparro,* public services librarian, El Paso Community College, El Paso, Tex.; *Barbara Cooper,* public affairs director, Gale Research Company, Ft. Lauderdale, Fla.; *Linda D. Crowe,* system director, Peninsula Library System, Belmont, Calif.; *Julie Cummins,* children's services consultant, Monroe County Library System, Rochester, N.Y.; *Marva L. DeLoach,* head, CRM Division, Illinois State University, Normal, Ill.; and *Kenneth E. Dowlin,* director, Pikes Peak Library District, Colorado Springs, Colo.

Also, *Paul Fasana,* associate director, preparation services, The New York Public Library, New York, N.Y.; *Jack Forman,* reference/bibliographic services librarian, Mesa College Library and University of California, San Diego, Calif.; *George C. Grant,* director of library services, Stockton State College, Pomona, N.J.; *Kathleen Gunning,* assistant director for public services and collection development, University Libraries, University of Houston, Houston, Tex.; *Rodney M. Hersberger,* director of libraries, California State College-Bakersfield, Bakersfield, Calif; *Edwin S. Holmgren,* director, The Branch Libraries, The New York Public Library, New York, N.Y.; *Barbara Hull,* Samuel Gompers Vocational Technical High School, Bronx, N.Y.; *Stephanie Hutcheson,* assistant librarian—resources support, Harriet Irving Library, University of New Brunswick, Fredericton, N.B., Canada; *Richard D. Johnson,* director of libraries, State University College, Oneonta, N.Y.; *Judith M. King,* library media specialist, Montgomery Blair High School, Silver Spring, Md.; *Sheila M. Laidlaw,* university librarian, Harriet Irving Library, University of New Brunswick, Fredericton, N.B., Canada; *June Saine Level,* education program specialist, library media, Kansas State Department of Education, Topeka, Kans.; *Bernard A. Margolis,* director, Monroe County Library System, Monroe, Mich.; *Virginia H. Mathews,* vice president, Library Professional Publications, Hamden, Conn.; *Cheryl M. McCoy,* assistant director, Montclair Public Library, Montclair, N.J.; *Sue O. Medina,* consultant for planning and research, Alabama Public Library Service, Montgomery, Ala.; and *Albert J. Milo,* reference services coordinator, Santiago Library System, Orange, Calif.

Also nominated were: *Orthella Polk Moman,* head, technical services, Jackson State University Library, Jackson, Miss.; *Judy Mucci,* head, planning/local government department, Orange County Library System, Orlando, Fla.; *James B. Nelson,* director of libraries, Jacksonville Public Library, Jacksonville, Fla.; *Joan Neumann,* executive director, New York Metropolitan Reference and Research Library Agency, Brooklyn, N.Y.; *Richard Panz,* director, Finger Lakes Library System, Ithaca, N.Y.; *Ruth J. Person,* associate dean, Catholic University of America, Washington, D.C.; *Molly Raphael,* assistant to the director, District of Columbia Public Library, Washington, D.C.; *Lelia G. Rhodes,* dean of libraries, Jackson State University, Jackson, Miss.; *Carlton Rochell,* dean of libraries, New York University, New York, N.Y.; *Joseph A. Rosenthal,* university librarian, University of California at Berkeley, Berkeley, Calif.; *Al Saley,* director, Manville Public Library, Manville, N.J.; *Marilyn J. Sharrow,* chief librarian, University of Toronto, Toronto, Ont., Canada; *Ernest Siegel,* county librarian, Contra Costa County, Pleasant Hill, Calif.

Concluding the list are: *Kenneth G. Sivulich,* deputy director, Queens Borough Public Library, Jamaica, N.Y.; *Carol Starr,* branch manager, Pleasanton Branch, Alameda County Library System, Pleasanton, Calif.; *Nancy Stiegemeyer,* Editor, American Library Trustee Association *Newsletter,* Cape Girardeau, Mo.; *Susan J. Vaughn,*

associate librarian for collection development, Brooklyn College Library, Brooklyn, N.Y.; *Louella V. Wetherbee,* executive director, Amigos Bibliographic Council, Inc., Dallas, Tex.; *Evie Wilson,* visiting professor, School of Library and Information Science, Peabody College, Vanderbilt University, Nashville, Tenn.; *Blanche Woolls,* professor, University of Pittsburgh, School of Library and Information Science, Pittsburgh, Pa.; and *Christina Carr Young,* research associate, National Commission on Libraries and Information Science, Washington, D.C.

Further, the Nominating Committee recommends that wording be added to the ballot informing members that votes for fewer than 25 candidates will be counted, but more than 25 votes on the ballot will cause the ballot to be determined void.

Thomas A. Alford, Chair
ALA Nominating Committee

Al Trezza a petition candidate

Alphonse F. Trezza, associate professor at the Florida State University library school in Tallahassee, will run as a petition candidate for the ALA presidency in next spring's election. Trezza directed the National Commission on Libraries and Information Science in 1974–1980 and served as Illinois state librarian in 1969–74.

ALA, AASL representatives meet to discuss future structure

A group representing the ALA Executive Board and the American Association of School Librarians Board of Directors met at ALA Headquarters Sept. 26 to discuss AASL's demands for more autonomy if it is to continue as a division of ALA.

Most of the day-long meeting of the ALA/AASL Future Structure Subcommittee was devoted to discussion of seven conditions submitted by AASL for negotiation with ALA. The division said it wanted the right:

- to act as "the singular voice for school librarians on all matters pertaining to" school librarianship.
- to offer a "differentiated dues structure" permitting school librarians to join AASL without joining ALA.
- to invest unexpended funds in any of its accounts with ALA.
- to determine the frequency and location of its division conferences and to publish and hold copyright.
- to choose to contract with ALA offices for certain services and not for others.
- to determine its own staff employment policies.
- to affiliate with other associations.

The discussion resulted in modification and clarification of several of the conditions. ALA Executive Director Robert Wedgeworth advised on ALA's copyright position as an incorporated body, and the item on publishing was dropped. AASL is free to publish independently, he noted.

On contracting outside ALA for services, AASL Past-President Judith King said the division was mostly interested in obtaining additional services, not replacing ones it currently gets from the Association.

Executive Board member Regina Minudri asked King whether the right to "act as the singular voice" for school librarians should be interpreted as the freedom to act independently of ALA policy. King replied that AASL was not seeking that degree of independence, but that the division wants to be able to submit a minority report if it disagrees with an Association action.

Other of AASL's conditions were viewed by the Executive Board representatives as unworkable. Minudri called the idea of changing AASL's dues structure "a radical departure from current practice" that would require a membership vote on a bylaws change. Wedgeworth suggested that the Subcommittee look at alternate ways of reducing the dues burden of AASL members, such as reduced initial dues.

ALA Comptroller Si Wilson provided information on the Association's system of

Modular Carousel Filing Systems

Information Design Products' carousel filing systems offer space-saving, expandable lightweight storage to meet your library's growing collection needs. And they can easily be placed on top of existing storage systems. Call or write for a free brochure.

fund accounting to demonstrate the infeasibility of investing funds from a particular division account, as AASL is requesting.

Ernest Martin, ALA Associate Executive Director for Administrative Services, addressed the difficulty of allowing AASL to set its own employment policies. Martin feared such an action would result in inequities in pay for similar positions at Headquarters and competition for employees between ALA units. He also pointed out that the ALA personnel office must monitor equal-opportunity and affirmative action programs for all positions.

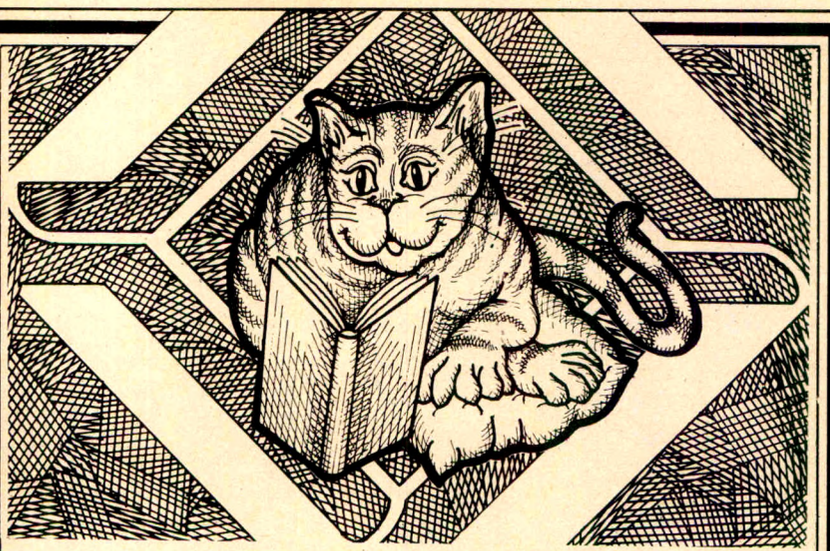
Minudri will draft a report on the meeting to be reviewed by King and Executive Board member Jane Anne Hannigan and submitted to the Executive Board. The subcommittee hopes to have the approved report ready in time for AASL's third national conference Oct. 31 – Nov. 4 in Atlanta, where division members will discuss future actions.

— *Gordon Flagg*

COA reaccredits library programs

Seven programs in library education leading to the first professional degree will continue to be accredited by the American Library Association, the Committee on Accreditation has announced.

The master's programs are those of the Graduate Library School at the University of Chicago, the School of Library Service at Columbia University, the School of Library and Information Science at North Texas State, the School of Information and Library Studies at the State University of New York/Buffalo, the Graduate School of Library and Information Science at Simmons College, the School of Library and Information Management at the University of Southern California, and the Graduate School of Library and Information Science at the University of Washington.



Bound to Purr-fection.

At Bound To Stay Bound, we're perfectionists about our books. That's why every prebound book is produced according to rigid LBI standards for the longest shelf life possible. Then we inspect each one to make sure it meets our own high standards of quality and durability.

Bound To Stay Bound books have brightly illustrated covers and strong buckram bindings which will last more than 100 circulations, five times longer than the average publisher's edition. And with nearly 17,000 in-stock titles for grades K through 12, BTSB books are sure to be popular with your young readers.

BTSB also offers a variety of special services to reduce your paperwork and make ordering from us economical and efficient. And for new or expanding libraries, we offer pre-sorted catalog cards to minimize the cost of acquisition.

For more information on books that are "bound to purr-fection", write today for our free service brochure and 1983-'84 general catalog.

ALA awarded $45,764 to explore accreditation process

The American Library Association will receive $45,764 in Higher Education Act Title II funds to examine and make recommendations on the accreditation process in cooperation with other interested groups, the U.S. Department of Education announced in mid-September.

The ALA Committee on Accreditation/USDE project is designed to explore procedures and guidelines for the participation of a variety of associations in the accreditation of library and information science education programs. A steering committee composed of two COA members and one member from each of the participating societies will coordinate the work of six task forces representing the groups. Each of the task forces will meet three times over the 18-month project period beginning in October.

The effort is expected to produce a report with a set of recommendations for procedures and guidelines providing a basis for group participation in accreditation and a possible revision of the ALA *Standards for Accreditation, 1972*.

Your input requested

Libraries using new technologies in providing community information services are asked to make themselves known to the Public Library Association's Community Information Section Technologies Committee. The committee is collecting information for a directory.

Names and addresses of libraries using or planning to use innovative technologies for community information services, including computers and cable TV, should be sent to committee chair Jane Light, Redwood City Public Library, 881 Jefferson Ave., Redwood City, CA 94063. Light will send a questionnaire to the libraries to obtain specifics about the technology used and the service provided.

• For the Public Library Association President's Program slide presentation being planned as part of "The Low-Budget, Feel-Good, Multisensory Public Library Road Show," PLA is collecting slides celebrating small and medium-sized libraries in the

In the same way that Libraries are more than just books, Integrated Library Systems are more than just software!

When you buy a Geac Library Information System you buy a "total solution." A complete Geac system consisting of hardware, software and support–to provide you with ease of operation, productivity and reliability–by design, not adaptation.

We have your experience.

Geac is a leading designer and manufacturer of hardware and software systems for computer-assisted library functions.

Our extensive experience and expertise are reflected in our impressive list of applications in major libraries throughout the world.

Our hardware family.

Geac builds a family of compatible transaction processors, ranging from the single processor 2000 to the four processor 8000. Our priorities are the same as yours: uptime and throughput–essential for library applications.

Our terminals suit different functions.

Geac terminals are purpose-designed for the library environment. Three models are available: Public Access, Circulation, and Technical Services terminals providing the full ALA/BLA character set.

Our software is flexible.

We implement needed features at all software levels in the System. We also know how to help you get the best out of today while working to take you where you want to be tomorrow. As library standards are developed, we can modify the operating system to incorporate them. The Library System continues to be designed by librarians, to meet your needs. Our first and newest customers work with us to design and improve the integrated system.

Our support services really support you.

Machinery without people to support it is not what a library needs. Geac is the only library vendor manufacturing its own hardware. Also, we provide our customers with on-going software and hardware support that continues for the life of the system.

Geac has information for you.

To find out all there is to know about Geac Integrated Library Systems call or write: Arlene Rowell, Manager of Marketing Library Systems Division, Geac Computer Corporation Limited, 350 Steelcase Road West, Markham, Ont., Canada, L3R 1B3. Telephone: (416) 475-0525

Geac

continuing the commitment to excellence and efficiency in information processing

United States. The slides should use 35mm color film, horizontal format, scenic identification in at least one slide (mountains, desert, or ski slope) focus on people, and indicate a variety of services and users.

Slides, which cannot be returned, should be mailed by Nov. 31 to Kathy Coster, Library Video Network, Blue Sky Studio, 1811 Woodlawn Dr., Baltimore, MD 21207.

Midwinter Placement Center: OLPR to sell job lists

Individual job hunters and employers seeking to fill positions will be able to purchase sets of completed job listings and application forms at the ALA Midwinter Meeting Placement Center in Washington, D.C., in January. The Office for Library Personnel Resources will mail out the materials to people who cannot pick them up in the Shoreham Hotel.

The center will operate in the Shoreham Exhibit Hall, lower level, Saturday, Jan. 5, from noon to 5 p.m.; Sunday, Jan. 6, from 9 a.m. to 5 p.m.; Monday, Jan. 7, from 9 a.m. to 5 p.m.; and Tuesday, Jan. 8, from 9 a.m. to 2 p.m.

Price lists and information for purchasing the completed sets by classification category (e.g., type of library or function) or whole sets as well as the forms themselves may be requested from OLPR at ALA Headquarters.

OLPR Director Margaret Myers urges jobseekers and employers to preregister by Dec. 18 to facilitate processing. To request a single form, indicate employer or jobseeker and enclose a self-addressed stamped no. 10 envelope. Requests for multiple forms should enclose a mailing label.

$1,500 scholarships offered by LITA and ALSC

Students preparing for a library career in automation or children's literature are eligible for two new $1,500 scholarships to be awarded by the Library and Information Technology Association and the Association for Library Service to Children.

C.L. Systems, Inc., is funding the LITA/CLSI scholarship to be given to a student entering a master's degree program emphasizing library automation at an ALA-accredited school. Applicants should not have completed more than 12 hours toward the degree before June 1.

The deadline for completed applications, including all references and transcripts, is Dec. 15. For an application and reference form, write LITA/CLSI Scholarship, LITA, ALA, 50 E. Huron St., Chicago, IL 60611.

Bound to Stay Bound Books, Inc., is financing the ALSC/Bound to Stay Bound Scholarship for men and women pursuing an MLS or an advanced degree for future work in the area of children's services. The applicant must be enrolled full time at an ALA accredited library school offering a full range of courses in children's materials and library service to children.

Five copies of the application form must be submitted by March 1, 1985. The winner will be announced at ALA Annual Conference. For information and application forms, write ALSC/Bound to Stay Bound Scholarship, ALSC, at ALA Headquarters.

ALANET provides mail link to worldwide Telex network

ALANET Systems Manager Joel Lee recently announced that the ALA electronic mail and information service has introduced XMAIL (cross mail) to connect the ALANET system with the worldwide Telex and telegram networks.

XMAIL is a new service of ITT Dialcom, Inc., which provides ALANET's computer services. XMAIL allows users to send and receive messages on communicating personal computers, word processors, or computer terminals. The service links users to some 200,000 public Telex terminals in the United States and more than 1.8 million terminals overseas. Messages can also be sent simultaneously to other ALANET electronic mailboxes.

The XMAIL links to Telex, TWX, mail-

GRCCOM GRCCOM GRCCOM GRCCOM

grams, and other networks dramatically expand the utility and range of the growing ALANET electronic network, Lee points out. The service eliminates the need for special Telex terminals and enhances the privacy of the incoming message. XMAIL can also deliver the same message to as many as 500 addresses simultaneously, lowering transmission costs and speeding message distribution. The system can be reached through all major telecommunications networks – Telenet, Tymnet, Uninet, and Datapac—as well as direct-dial connections in New York City and Washington, D.C. The price includes ALANET's normal hourly rates of $17 or $13, plus the telex transmission rates, which vary according to destination.

Like the ITT Dialcom electronic mail system, XMAIL includes the ability to prepare texts offline, an integrated online text editor, a spelling-error detection and correction system, and text justification.

In addition to electronic communications, ALANET offers special information services to the library and information community, among them several electronic newsletters, interactive forms for interlibrary loans, a library supplier's service menu, a network-wide bulletin board, and special databases such as the Official Airlines Guide, UMI Article Clearinghouse, and ABI/INFORM. For information, contact Lee at the ALA Headquarters Library.

Action Exchange to give $10 for published replies

For the many hundreds of readers who send answers to *AL*'s Action Exchange column, sharing information with colleagues has been its own reward. In token recognition of respondents' efforts, however, *AL* will now send a check for $10 to the authors of published replies. See p. 730 for this month's Qs and As.

New faces, new jobs at HQ

Emily Melton, a graduate of the Indiana University library school, was appointed assistant Headquarters librarian Sept. 24. A resident of Evanston, Melton formerly was librarian at the Bank of Wheaton, Ill. In 1979–81, she worked in the Documents Department at the University of Illinois/Chicago Libraries.

Former Case Western Reserve University library school Librarian Bettina MacAyeal began working Sept. 17 as an associate editor in Publishing Services. A graduate of Case Western's Matthew A. Baxter School of Library and Information Science, MacAyeal is developing and editing manuscripts, issuing contracts, and obtaining prepublication permissions.

Ray Olson, a former reference librarian at the St. Paul (Minn.) Public Library, was appointed assistant editor, Adult Books, at *Booklist*. Olson, who earned his master's at the University of Minnesota library school, has published book, theater, music, and film reviews in *Library Journal, Voice of Youth Advocates,* and other journals and newspapers.

ALA's new public information officer is Deborah Robertson, who has worked at Headquarters since January 1982. A University of Michigan graduate, Robertson began as an editorial assistant at *Booklist* and then became copy editor in Publishing Services' Central Production Unit.

Barbara Macikas, Association of College and Research Libraries continuing education officer since November 1981, was appointed assistant Conference Arrangements manager for planning and promotion Sept. 24.

On Nov. 1 Vee Freisner became Public Library Association program officer. Currently chair of PLA's Education of Public Librarians Committee, Freisner has served at the Kansas State Library since 1978, most recently as director of both the Library Development Division and the Network Board.

Freisner earned a master's in library science at the University of Illinois at Urbana and a master's in English at Kansas State University. □

NOVA UNIVERSITY

Doctor of Arts in Information Science

A Computer-Based Program for Information and Media Professionals

The Program—
"Study while you work"
The computer-based doctor of arts in information science program brings Nova University to you. Most of the program can be completed at your place of employment and in your home in as little as three years.

Courses—
"Computer instruction"
You will use the computer to study in such areas as computer science, systems analysis and design, networking, telecommunications, and strategic management techniques for libraries and media and information centers.

Practicums—
"Research that counts"
You will address significant problems in your institution or organization. Nova "oncampus" faculty are available through electronic mail or telephone for guidance.

Regional Seminars—
"Bringing it all together"
Each year you will attend four weekend seminars. These meetings give you an opportunity to share your progress and experiences with other students.

Tuition—
"Partial payment plan available"
Tuition is $3500 per year. Quarterly payments of $875 help make tuition manageable.

Enrollment—
"Targeted admission"
An important condition for entering the program is that you be currently employed in a library, media/or information center and hold a master's degree in library, media, or information science.

Information—
"Immediate answers"
Call us today at **(305) 475-7047** or write to:

publicity

"Crisis PR" documented. *Impact! A Community Awareness Project* is a detailed account of a three-year project to implement a full-scale public relations program at a Saskatchewan branch library. Authors Patricia Cavill and Karen Labuik thoroughly document all phases of the program, from the initial community survey through the subsequent advertising campaign and publicity drive.

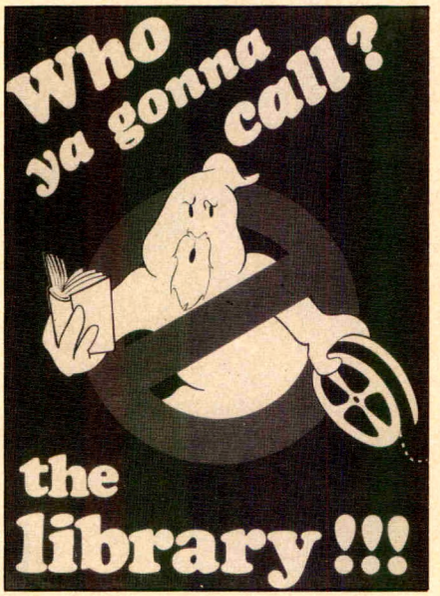
A section of the report titled "Crisis PR" describes efforts made in response to a town referendum to decide whether the library should remain open. The library's campaign involved personal letters sent to residents, telephone calls, handbills, a library open house, and calls to an open-line radio show. On election day, 89 percent of the voters chose to keep the service.

The 119-page paperback, which reprints dozens of press releases, newspaper ads and articles, survey forms, and other materials used in the campaign, is $15 from the Canadian Library Association, 151 Sparks St., Ottawa, ON K1P 5E3, Canada.

A different kind of library catalog at the Sacramento (Calif.) Public Library encourages patrons to purchase items needed by the library. Among the items listed in the eight-page, illustrated catalog are stuffed storybook animals for $15, language audiocassettes for $20, magazine subscriptions for $25, and a puppet show for youngsters for $40. Big-ticket items include a computer terminal for $2,150; a new circulation desk to replace a broken, 40-year-old one at a neighborhood library for $3,000; and an offset printing press for $15,000. In the Neiman-Marcus range is a new wing for a regional library, priced at $400,000.

Marketing and the Library, edited by Gary T. Ford, encourages library administrators to use marketing applications and research. The volume contains essays on "Megatrend Marketing: Creating the Library's Future," "Library Market Segmentation," "The ABCs of Implementing Library Marketing," "Distribution of the Library's Product: The Need for Innovation," and "Marketing Myopia."

The 80-page volume, originally published as vol. 4, no. 4 of the *Journal of Library Administration,* is $14.95 from Haworth Press, 28 E. 22nd St., New York, NY 10010 (84-668, 0-86656-307-5).



That's the spirit! Fast on the moon-walking heels of a Michael Jackson – inspired "Read It!" poster (see July/Aug. Source, p. 539) comes yet another promotion from the West Virginia Library Commission. This decidedly bookish ghost (bearing a spooky resemblance to State Library Commissioner Frederic Glazer) is featured on a 17½-by-23-inch poster, available in limited supply for $5 from the West Virginia Library Commission, Cultural Center, Charleston, WV 25305.

Library Fund-Raising: *Vital Margin for Excellence* addresses theoretical and philosophical approaches to fundraising as well as practical considerations. Five essays, edited by Sul H. Lee, discuss fundraising at large public universities, establishing a trust at a public library, relationships with donors at a private university, and fundraising strategies presented in kit form. A selected bibliography suggests further readings in the area. 88 p., $18.95 from Pierian Press, POB 1808, Ann Arbor, MI 48106 (84-60638, 0-87650-180-3).

librarian's library

Popular Culture in Libraries is a guide for librarians who wish to develop popular culture resources in their collections. Author Frank Hoffman begins by offering a definition of popular culture and then presents an overview of popular literature genres such as science fiction, mysteries, romances, and westerns; popular music; Hollywood films; comic books and strips; radio; television; the underground press; and other areas of the field.

In other chapters, William Schurk describes the popular culture library at Bowling Green (Ohio) State University, and Haynes McMullen and Jay E. Daily discuss the study of popular materials in the library school curriculum. Approx. 350 p., $29.50 cloth (0-208-01981-2), $18.50 paper (0-208-01983-9) from Shoe String Press, Inc., POB 4327, Hamden, CT 06514 (84-17165).

Problem patrons portrayed. A drunk looking for shelter in the library; a cigar smoker who refuses to heed "no smoking" signs; a bully who picks fights with strangers in the library; an Italian woman demanding that the library remove *The Godfather* from the shelves; an obscene graffiti artist; and a member of a religious sect soliciting funds in the library's doorway are among the 40 cases presented by Bruce A. Schuman in *River Bend Revisited: The Problem Patron in the Library*. The cases are followed by questions for discussion and lists of additional readings relating to the problem.

A sequel to the author's *River Bend Casebook,* the 186-page paperback is $22.50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (84-10451, 0-89774-125-0)

History of Libraries: *Ancient and Mediaeval* is a survey of the growth and development of libraries as repositories of information and knowledge. In his introduction, author D.N. Marshall of the University of Bombay department of library science says that his book is "intended primarily as an introduction to the subject for those interested in the study of how human records have evolved and how they have been preserved, processed, and organized for use." Chapters cover the subject from Ancient Egypt, Assyria, and Babylonia through the New World. Not indexed.

Published by India's Oxford & IBH Publishing Co., the 151-page text is distributed in the U.S. by Humanities Press, Inc., Atlantic Highlands, NJ 07716 at $13.50.

The Library in Society was written as a text for "Foundations of Librarianship" courses, to impart a sense of professionalism to beginning librarians and serve as a vehicle of socialization into the profession.

Authors A. Robert Rogers and Kathryn McChesney, with other contributors, open with a discussion of the social, philosophical, and historical background of librarianship. Part two contrasts the major types of libraries: national, governmental, public, school, academic, and special. Part three covers international librarianship continent-by-continent. The concluding section examines professional organizations and literature, the impact of industrial and post-industrial societies on the library, and the role of the library in combating illiteracy in the Third World.

297 p., $28.50 cloth (0-87387-379-X),

$19.50 paper (0-87287-398-6) from Libraries Unlimited, POB 263, Littleton, CO 80160-0263 (84-15440).

info briefs

Effective Online Searching: *A Basic Text* is a tutorial volume designed for one-semester introductory courses on information retrieval. Authors Christine Borgman, Dineh Moghdam, and Patti Corbett offer background on online retrieval systems and sections covering search strategy and execution, databases, vocabulary control, advanced searching techniques, performance measurement and evaluation, equipment considerations, and other areas. The 201-page guide also includes end-of-chapter exercises reinforcing the concepts covered in the text. $27.50 from Marcel Dekker, Inc., 270 Madison Ave., New York, NY 10016 (84-9409, 0-8247-7142-7).

Another introductory manual to database searching is *Online Information Retrieval Systems*. Bernard Houghton and John Convey have updated and expanded their 1977 work to reflect advances in the field in the past seven years. Part one of the guide describes the development of online services in the U.S. and Europe, hardware, and searching principles and strategies. The second part is a practical guide to searching techniques for six American and European online systems. Published by Britain's Clive Bingley Ltd., the 205-page volume is $21.50 from Shoe String Press, 995 Sherman Ave., Hamden, CT 06514 (0-85157-363-0).

Bulletin board survey

Patrick Dewey, director of the Maywood (Ill.) Public Library and author of *Public Access Microcomputers: A Handbook for Librarians* (Knowledge Industry), is conducting a survey on the operation of electronic bulletin boards by libraries. The survey includes questions on hardware and software used, staffing, publicity, services offered, and amount of use.

"I am far less interested in performing a statistical measure of how many libraries are maintaining a bulletin board system than I am in determining what they are doing with it," said Dewey. He plans to use the anecdotes, problems, and experiences offered by respondents in writing a guide for librarians who are considering setting up bulletin boards.

For a copy of the survey form, write Dewey at the Maywood Public Library, 121 S. 5th Ave., Maywood, IL 60153 or phone him at 312-343-1847.

Online services in British PLs. *The Development of Online Information Retrieval Services in Public Libraries* is a brief overview of 18 research projects on the use of online databases in public libraries in Great Britain. The research, funded by the British Library Research and Development Department (BLR&DD), covered services ranging from major bibliographic utilities such as DIALOG to the creation of local databases. Author Nick Moore's review summarizes the nature and volume of use, fee policies, publicity, equipment, training, and the overall effect on library services. The 33-page paperback, number 5 in the British Library Research Reviews series, is $5 prepaid from the British Library Research and Development Dept., 2 Sheraton St., London W1V 4BH England.

By the numbers. Although numeric databases have been proliferating in recent years, they have not enjoyed the type of acceptance librarians have given bibliographic databases. Editors Ching-chih Chen and Peter Hernon set out to remedy that with *Numeric Databases*, a guide to the fundamentals and usefulness of these files. The first chapters provide an overview of the field; the next section discusses databases in specific subject areas, including science and technology, the social sciences, census information, and public opinion polls; the final chapters deal with the role of libraries and information centers in using numeric databases. 332 p., $29.95 from Ablex Publishing Corp., 355 Chestnut St., Norwood, NJ 07648 (83-25761, 0-89391-247-6).

Nonbibliographic databases containing both numeric and textual information were the subject of a recent survey of 34 Association of Research Libraries members. Thirty-one of the respondents access nonbibliographic databases

BEYOND THE WALL
Essays from the Outside
by Edward Abbey

"Abbey transports readers well beyond the confines of urban life, and his primary focus is the 'great brooding solemnity' of the western deserts and the exploration of diverse wilderness areas, including his experience hunting grizzly bear in Alaska. Ever the militant conservationist, Abbey deftly employs both humor and rage in dealing with the excesses of civilization. . . . For aficionados of nature, backpacking, and good writing."

through online vendors; 12 acquire their own databases; but only four have developed collection policy statements for this area.

Over half of the respondents offer services beyond database retrieval: 15 libraries provide advice on database guides and other resources, nine offer help on using programs, and one offers programming services.

The results of the survey, along with two committee and task force reports, two examples of manuals and descriptions, two documents on the use of nonbibliographic databases, and a list of resources, have been published by the ARL Office of Management Studies. The 100-page paperback (SPEC Kit #105) is $15 ($7.50 for ARL library members) from the SPEC Center, ARL/OMS, 1527 New Hampshire Ave., N.W. Washington, DC 20036.

special services

Closing the Gap is a tabloid newspaper devoted to the use of microcomputer technology in special education and by disabled people. A recent issue featured articles on speech synthesizers, a word-processing system for blind persons, a pressure-sensitive keyboard for disabled persons, telecommunication systems, and other products; software reviews and announcements; book reviews; and a list of conferences and other events. Six bimonthly issues are $15 ($22 for Canadian and Mexican subscriptions) from Closing the Gap, POB 68, Henderson, MN 56044.

Deaf Heritage Week packet. A free packet of materials to promote Deaf Heritage Week, including suggestions, resource lists, and publicity materials, is being distributed by the District of Columbia Public Library to state libraries and appropriate agencies.

ALA has been involved in promoting Deaf Heritage Week, set for December 2 through 9. At Midwinter Meeting in January, Council passed a resolution urging President Reagan to issue a presidential proclamation observing the week.

For more information on the publicity packet write Alice Hagemeyer, Librarian for the Deaf Community, District of Columbia Public Library, 901 G St., N.W., Washington, DC 20001.

Large print award winner. The Jackson-George Regional Library in Pascagoula, Miss., has won the first G.K. Hall Large Print Community Service Award. The $1,000 prize, given annually to the library or librarian demonstrating outstanding efforts in promoting or using large print books, was presented at ALA Conference in Dallas.

Under Outreach Coordinator Flo Scholtes, the Jackson-George Regional Library launched numerous projects involving its large print program:

- February 1983 and 1984 were designated "Large Print Month," during which librarians wore "I Love Large Print Books" buttons; bookmarks, posters, and handouts were distributed in library branches, churches, and businesses; and notices about large print books were placed in area church bulletins and the in-house publications of local firms.
- An ongoing media campaign resulted in stories on the program appearing in local and regional newspapers, as well as on television.
- Publicity materials on large print books were displayed in doctors' and optometrists' offices, hospitals, and senior centers.
- Rotating collections of large print titles were circulated to 11 senior centers, five nursing homes, and the occupational therapy sections and psychiatric wards of three nearby hospitals.
- Solicitations for funds and materials were made to local churches, businesses, civic groups, and national organizations such as the American Bible Society.
- A workshop sponsored by the library on services for the visually impaired and other handicapped individuals was attended by 69 librarians, special education teachers, speech therapists, and representatives from senior centers, hospitals, home health agencies, and nursing homes.

Films depicting blind people living their lives to the fullest are available for sale or rental from Phoenix Films. The films, produced by the American Foundation for the Blind, show successful blind and visually impaired men and women, methods of educating blind children,

- —Abstracting and secondary sources
- —Computer databases
- —Patents and patenting
- —Market surveys
- —Directories of company, product and research project information
- —Organizations
- —Providing information and library services in Biotechnology

Biotechnology is a wide-ranging subject with applications in several industrial sectors. So, as you may have found out, it is not an easy topic for information gathering. Over the last five years literature has materialized at an alarming rate. Many publications in biotechnology are expensive. Periodicals overlap. The quality and coverage of newsletters is disparate. And many sources remain unknown to many people. Getting the information you need, when you need it, at an affordable price is a constant challenge.

Information Sources in Biotechnology will help the researcher, businessman and librarian alike, because it systematically and critically reviews all the important information sources in biotechnology.

Professional Information Manager discusses the ten major types of Information Sources
Dr. Crafts-Lighty, who is responsible for Information and Library Services at Celltech, Ltd., Britain's foremost biotechnology company, assesses books, conferences, trade periodicals, research periodicals, computer databases, patents, market surveys, directories, organizations and secondary sources (abstracts, title lists, indexes and bibliogrraphies)—each with its own complexities.

Covers difficult and elusive sources of information
As well as covering difficult areas such as patents, market surveys and databases, where lack of familiarity with these sources could cost large amounts of money, **Information Sources in Biotechnolgoy** assesses the literature of traditional biotechnologies, such as brewing, agriculture and food processing, scattered over a wide variety of sources. With the new biotechnologies expanding so fast, it is hard to keep up with the growth of information. **Information Sources in Biotechnology** is right up-to-date and provides an index of publishers and their addresses, some of whom are difficult to locate.

Information Sources in Biotechnology is an invaluable guide to information sources in technical and commercial biotechnology.

Examine on approval—Money-back Guarantee
Take **Information Sources in Biotechnology** on approval for 10 days without commitment. Study the numerous tables. Compare your own experience of certain sources with Dr. Crafts-Lighty's assessment. Then, if you decide to keep this unique guide, simply pay the invoice accompanying the book. If you are not entirely convinced that this new book can help you to select your biotechnology information sources more effectively, just return the book in good condition within 10 days. For prepaid orders, money will be refunded **in full** upon receipt of the book. To ensure that you receive your copy promptly, complete and return the order form **today.**

descriptions of types of visual impairment, how to guide a blind person, and how to communicate with deaf/blind people. For a brochure describing the films write Phoenix Films, 468 Park Ave. South, New York, NY 10016.

"Library Services to the Aging" is the theme of the winter 1984 issue of the New York State Library's *Bookmark*. Eight articles deal with such topics as the Brooklyn Public Library's SAGE (Service to the Aging) program, outreach to older adults in a rural library system, film programming for older adults, and legislative programs for the elderly in New York State. A selective bibliography lists over 125 articles on "Library Services and Older Americans." Single copies are $1 prepaid, $2 foreign (payable to the New York State Library), from Gift and Exchange Section, New York State Library, Albany, NY 12230.

Medicare rights. Legal Counsel for the Elderly, a nonprofit legal services project sponsored by the American Association of Retired Persons, has published a self-help series to inform individuals of legal rights under Medicare.

The four booklets are in question-and-answer format and include sample letters and forms. Book One covers eligibility rights and application procedures; Book Two discusses overpayment, termination of benefits, and how to help others with Medicare problems; Book Three tells how to assure maximum coverage in hospitals, nursing homes, and hospices, and how to minimize out-of-pocket costs; Book Four tells how to assure maximum coverage for doctor services, how to get reimbursed, and how to obtain a review of a Medicare decision.

Each booklet is $5.95 ($19.95 for all four) plus 50¢ postage from Legal Counsel for the elderly, POB 19269-K, Washington, DC 20036.

Standards for service revised. *Revised Standards and Guidelines of Service for the Library of Congress Network of Libraries for the Blind and Physically Handicapped 1984* contains the standards adopted by the Board of Directors of ALA's Association of Specialized and Cooperative Library Agencies on Jan. 9, 1984.

The 55-page paperback contains a forword giving a history of the development of standards for libraries in the national network; an introduction describing the scope and purpose of the document; standards covering such areas as administration, staffing, physical facilities, resource development, and service to users; guidelines to assist libraries in developing measures to meet the standards; a glossary; and a bibliography. $6.50 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (84-6356, 0-8389-3306-8).

Library needs of the deaf. The IFLA Working Group on Library Needs of the Deaf, established at the 1983 IFLA Conference in Munich, has inaugurated a newsletter to report on activities, publications, and events concerning information services for deaf people. For a copy of the first issue of the *Deaf Newsletter*, send an International Postal Reply Coupon sufficient to cover 15 grams weight to the IFLA Working Group on Library Needs of the Deaf, c/o Leeds Polytechnic, School of Librarianship, Beckett Park, Leeds, West Yorkshire LS6 3QS, United Kingdom.

microcomputing

How to Get Free Software is a guide to obtaining thousands of public-domain programs, most available free or at-cost. The 436-page paperback tells how to get word processing, communications, database management, game, educational, and other programs from user groups, bulletin board services, and other sources.

Author Alfred Glossbrenner also includes a section called "How to Help Your Own Local Library," suggesting that computer buffs donate disks of public-domain programs to their libraries to establish circulating software collections.

Software Showcase:

Programs generate book and periodical indexes

Two new programs from Capital Systems Group, Inc., allow indexers to produce high-quality, manual indexing while minimizing the tedium of keying and editing. Newsdex generates indexes for newspapers and other periodicals; Bookdex prepares back-of-the-book indexes. The programs, available for the IBM PC and compatible microcomputers, eliminate the need to write, file, and sort index cards and to type and retype manuscripts.

Newsdex and Bookdex operate in conjunction with standard word-processing programs such as Wordstar and PFS: Write. For Bookdex, page numbers and indexing terms are entered (Figure 1); for Newsdex, issue dates, page numbers, and indexing terms are entered (Figure 2). The input is then edited on the word processor as an ASCII text (non-document) file. Any number of posted and sorted files can be merged to cumulate the index. The final product is a printed, paginated index (Figures 3 and 4), showing the first entry on each page as a header.

The software also has the capability to subordinate index terms up to six levels; to produce an authority file from proper names entered as index terms; and to use the ASCII text file as input for electronic typesetting.

Newsdex and Bookdex were developed by the Capital Systems Group, based on indexing programs developed by the late Theodore H. Hines. The firm also distributes Checkmate and Golden Retriever, the serials and bibliographic database management systems developed by CLASS.

Each program is $395. For more information write Capital Systems Group, Inc., 11301 Rockville Pike, Kensington, MD 20895 (301-881-9400).

Glossbrenner's guide to giveaway games, graphics, and other goodies.

Tutorial for Sperry and IBM PCs. "Learning PC-DOS and MS-DOS the Easy Way" is a diskette tutorial for the Sperry and IBM PCs, using graphics, sound effects, and interactive step-by-step instructions to teach the computer's most useful functions. The diskette covers keyboard familiarization, diskette formatting, copying and comparing, file directories, file copying and erasing, and other aspects of the microcomputer at the user's own pace. $39.95 from Sperry Computer Education, POB 2191, Princeton, NJ 08540 (800-222-0966).

instruction

Atlanta U. receives BI grant. The Atlanta University School of Library and Information Studies has received a grant of approximately $250,000 from the U.S. Department of Education's fund for the Improvement of Post-Secondary Education for a three-year bibliographic instruction program.

The project will train librarians from 17 historically black institutions in methods to introduce computerized bibliographic and information resources to faculty, students, and administrators at their schools.

Lorene B. Brown, dean of Atlanta's library school, said the program "will bring the information users in these historically black institutions to the cutting edge of modern information retrieval technology and provide minority students with the skills and techniques required for competitive positions in today's technological society."

BI clearinghouse guide. *The Bibliographic Instruction Clearinghouse: A Practical Guide* contains information on the 11 state, two regional, and three subject-specialized clearinghouses that act as a support system for bibliographic instruction librarians. The manual also includes chapters on clearinghouse depository collections, surveys and directories of bibliographic instruction programs, planning a bibliographic instruction workshop, and publishing a clearinghouse newsletter.

The 77-page paperbound guide is $9 to Association of College and Research Libraries members and $12 to others from ACRL, 50 E. Huron St., Chicago, IL 60611 (0-8389-6775-2).

Psychology research guide. *Library Research Guide to Psychology*, by Nancy E. Douglas and Nathan Baum, is the latest volume in Pierian Press's Library Research Guide series. Aimed at college students confronting their first assignments requiring in-depth research, the 83-page handbook teaches basic

search strategy and reference sources by working through a sample term paper in psychology.

Chapters cover choosing a topic, using the card catalog, conducting a computer search, locating recent material through *Current Contents*, using guides to the subject literature, and requesting material on interlibrary loan. Appendixes offer guidance on using *Index Medicus* and the *Monthly Catalog* and list basic reference sources for psychology courses. $17.95 cloth (0-87650-156-0), $9.95 paper (0-87650-175-7) from Pierian Press, POB 1808, Ann Arbor, MI 48106 (84-60640).

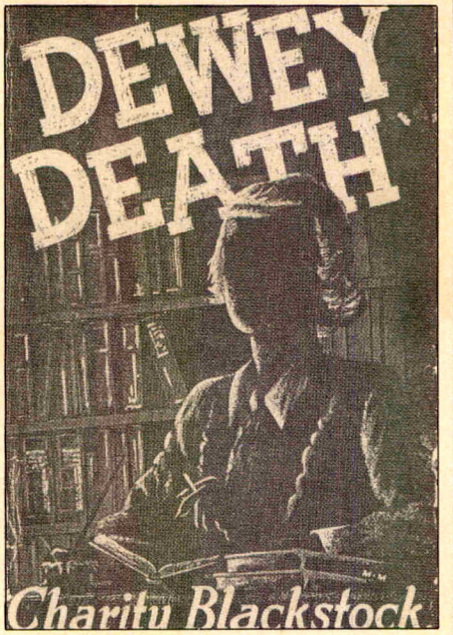
Bibliographic instruction is the theme of the April 1984 issue of *Catholic Library World*. Articles deal with library instruction in high schools, undergraduate libraries, community colleges, and graduate programs in education. Single copies are $3 from the Catholic Library Association, 461 W. Lancaster Ave., Haverford, PA 19041.

bibliography

Things that go bump in the bookstacks. *Occult/Paranormal Bibliography: An Annotated List of Books Published in English, 1976 through 1981* lists over 1,800 nonfiction titles published or reprinted during the period. Most entries include lengthy descriptions and critical commentaries, often including excerpts from reviews. A continuation of author Thomas C. Clarie's *Occult Bibliography: 1971 – 1975*, the volume covers all areas of the occult, ranging from witchcraft, magic, and monsters to astrology, alchemy, and reincarnation. Includes author, title, and subject indexes. 579 p., $35 from Scarecrow Press, POB 656, Metuchen, NJ 08840 (83-20319, 0-8108-1674-1).

Many, many musicals are described in *Musicals! A Directory of Musical Properties Available for Production*, compiled by Richard C. Lynch. For approximately 400 shows available through U.S. licensing agents, the book gives the date and place of first production; credits for writers, composers, and lyricists; publication information; recordings; cast requirements; awards; and a brief plot summary indicating any potential production problems. A valuable resource for college, school, community, and other theatre groups selecting works for production, the 197-page volume is $19.50 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 60611 (84-486, 0-8389-0404-1).

A catalog of "biblio-mysteries"—mysteries having a bookselling, library, publishing, or other bookish setting—has been compiled by The Bookpress Ltd., a rare book dealer. The 554 titles, all offered for sale and given brief annotations, include such library tales as *Murder in a Library*, *Dewey Death*, and *The Mobile Library Murders*. Prices range from $2.50 for recent paperbacks to $2,000 for a first edition of Vincent Starrett's 1920 *Adventure of the Unique Hamlet*, thought to be the first piece of "Sherlockiana," about the search for a book. For a copy of the catalog write The Bookpress Ltd., POB KP, Williamsburg, VA 23187.



A classic library murder mystery listed in The Bookpress Ltd.'s "Biblio-Mysteries" catalog. Each chapter of the novel is headed with a title and its Dewey Decimal number.

nonprint

***Media and Microcomputers** in the Library: A Selected, Annotated Resource Guide*, by Evelyn H. Daniel and Carol I. Notowitz, describes literature dealing with nonprint media published since 1978 (earlier items are covered by Daniel's *Media in the Library*, published by the ERIC Clearinghouse on Information Resources in 1978). The 579 entries are divided into sections on general information, audio, film, slides and photographs, toys, video, computers, functional activities, copyright, and telecommunications. 157 p., $24.95 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (83-42935, 0-89774-117-X).

***Audiocassettes as Library Materials:** An Introduction* is a revised edition of a work by George H. Saddington and Eric Cooper first published in 1976 by the audiovisual groups of Britain's Library Association and Aslib. Chapters cover the development and potential of the medium, technical data, the cassette repertory, copyright considerations, and collection maintenance. 92 p., paper, $10 from Nigel Macartney, Treasurer, *The Audiovisual Librarian*, c/o The Library, The Hatfield Polytechnic, POB 110, Hatfield, Herts. AL10 9AD, United Kingdom (0-85365019-5).

Humanities programs offered. "Soundings" is a weekly, half-hour radio series featuring scholars and visitors at the National Humanities Center discussing history, literature, philosophy, religion, and other subjects. Program topics range from "Bioethics and Modern Medicine" and "Afro-American Culture and Literature" to "Philosophy and Public Policy" and "The Art of Literary Biography." Participants in the series include Amiri Imamu Baraka, Mortimer Adler, Leslie Fiedler, and hundreds of other figures from education, business, government, and the professions.

The center plans to make the entire backrun of 215 programs available on audio cassettes for $200, payable upon shipment. In order to offer the series at this price, which covers only the cost of tape, duplication, and shipping, the center needs a commitment for 250 orders by March 1, 1985. Librarians can receive more information, including a complete listing of "Soundings" programs and guests, by writing Marcia Ritchie, National Humanities Center, 7 Alexander Dr., Research Triangle Park, NC 27709 or phoning 909-549-0661. □

Statement of ownership and management

American Libraries is published monthly except in July-August, a combined issue (11 times yearly), by the American Library Association, 50 East Huron St., Chicago, IL 60611. American Library Association, owner. Arthur Plotnik, editor. Susan Brandehoff, managing editor. Second class postage paid at Chicago, Ill., and additional mailing offices. Printed in U.S.A. As a non-profit organization authorized to mail at special rates (Section 448.31, **Postal Manual**), the purpose, function and non-profit status for federal income tax purposes have not changed during the preceding 12 months.

Extent and nature of circulation

("Average" figures denote the number of copies printed each issue during the preceding 12 months; "Actual" figures denote number of copies of single issue published nearest to filing date—the October 1984 issue.) **Total number of copies printed:** Average 45,000; Actual 44,000. **Paid circulation:** not applicable (i.e., no sales through dealers, carriers, street vendors, and counter sales). **Mail subscriptions:** Average 42,921; Actual 42,023. **Total paid circulation:** Average 42,921; Actual 42,023. **Free distribution:** Average 469; Actual 477. **Total distribution:** Average: 43,390; Actual 42,500. **Office use, left-over, unaccounted, spoiled after printing:** Average 1,610; Actual 1,500. **Total** (sum previous two entries): Average 45,000; Actual 44,000.

Statement of Ownership, Management and Circulation (PS form 3526) for 1984 filed with United States Post Office Postmaster in Chicago, Sept. 24, 1984.

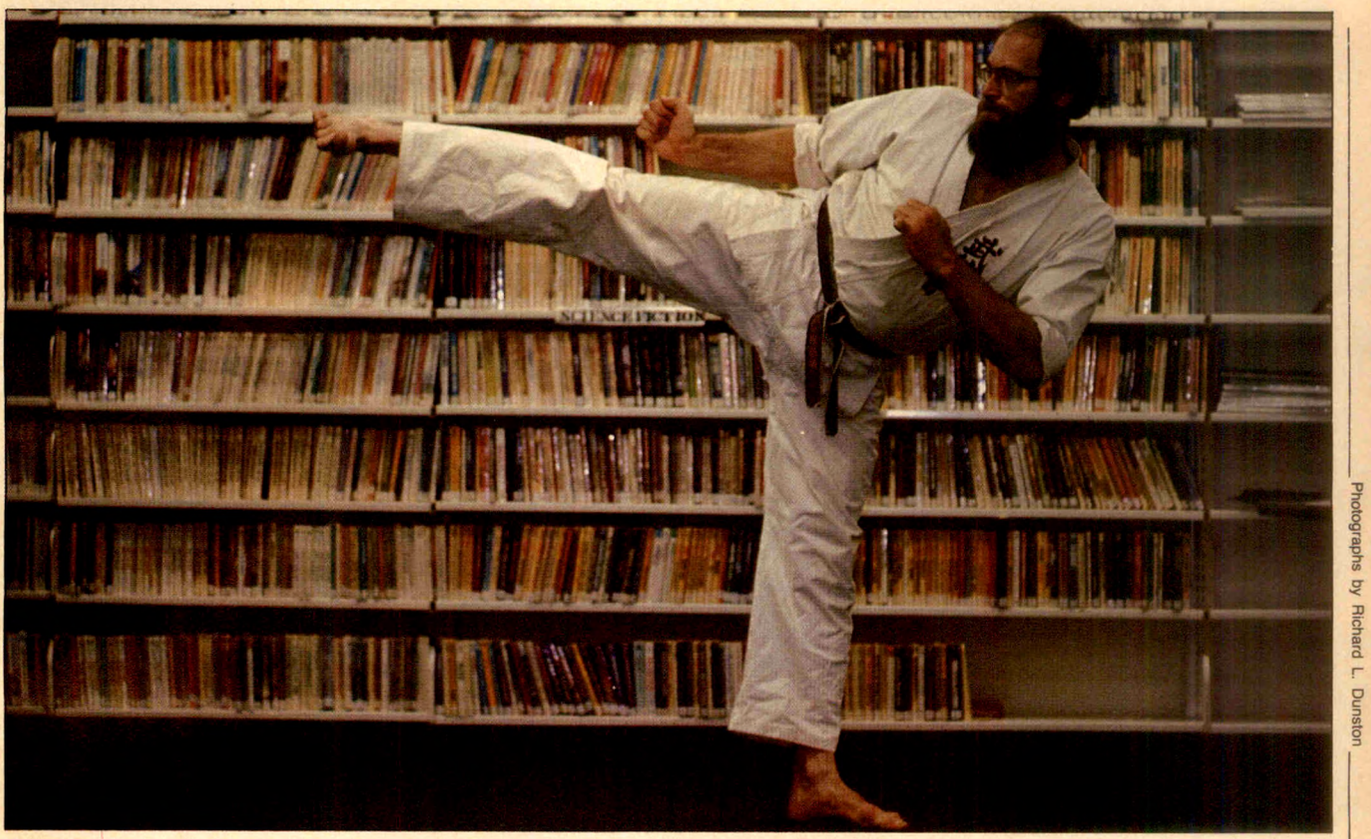
Black-belt children's programmer

Once-hot-tempered librarian teaches confidence and self-control of karate



Photographs by Richard L. Dunston

Wearing his gi, branch librarian Stockey executes a side kick at the Hilliard Library.

BILL STOCKEY SAYS THAT CHILdren's programming provides a fresh experience for him in his new job. He directs the Hilliard branch of the Chesapeake (Va.) Public Library.

"The number of children staying home and watching television disturbs me. I want to get them in here to change their habits and let them know there's a world outside of MTV."

Stockey presents an awesome physical presence for young patrons especially. The 200-pound, six-foot-two former football lineman has a dark beard and the forearms of a weightlifter. He also holds a fifth-degree black belt in karate and could cripple most attackers with one quick kick to the knee.

He believes karate has a place in children's programming. Since taking over the Hilliard post in July, he has given three karate demonstrations for youngsters in Chesapeake branches.

"Karate is a physical exercise with a philosophical purpose, which is to learn about yourself and know yourself," Stockey told young patrons during a recent program he gave at the South Norfolk branch. "We're constantly teaching you about your limits and what you can and cannot do."

School of hard knocks

Stockey believes that by teaching young people how to face adversity, they will learn how to take a hard knock and keep coming back.

"Most children have serious self-confidence problems in this day and age. I see so many youngsters who don't play team or competitive sports well. I like to give these kids a sense of their own worth and teach them they don't have to compete to measure it."

Karate has appealed to Stockey since he was seven or eight, but at that time, in the late '50s, few people were teaching martial arts. "Maybe it was the control I saw at a very young age. The depth of mind karate practitioners possessed always impressed me," Stockey said. "When I started taking lessons in my twenties, it was like coming home."

At 17 Stockey starred as a high school football player in White Plains, N.Y. He attended the College of William and Mary in Williamsburg on a football scholarship.

After graduating in 1976 with a specialization in European history, he worked as a stack supervisor at the college library for 2½ years. He supervised 33 student assistants. "I was a big brother and father confessor to a bunch of them, and I enjoyed that very much. That's when I decided to go to library school, because I liked the concept of working with people."

He went to the University of Kentucky and earned his MLS in 1979. For the next two years he ran the John Wood Community College library in Quincy, Ill., then spent a year teaching martial arts. By 1982 he sorely missed libraries. He joined the Chesapeake library system as a cataloger.

Image-buster

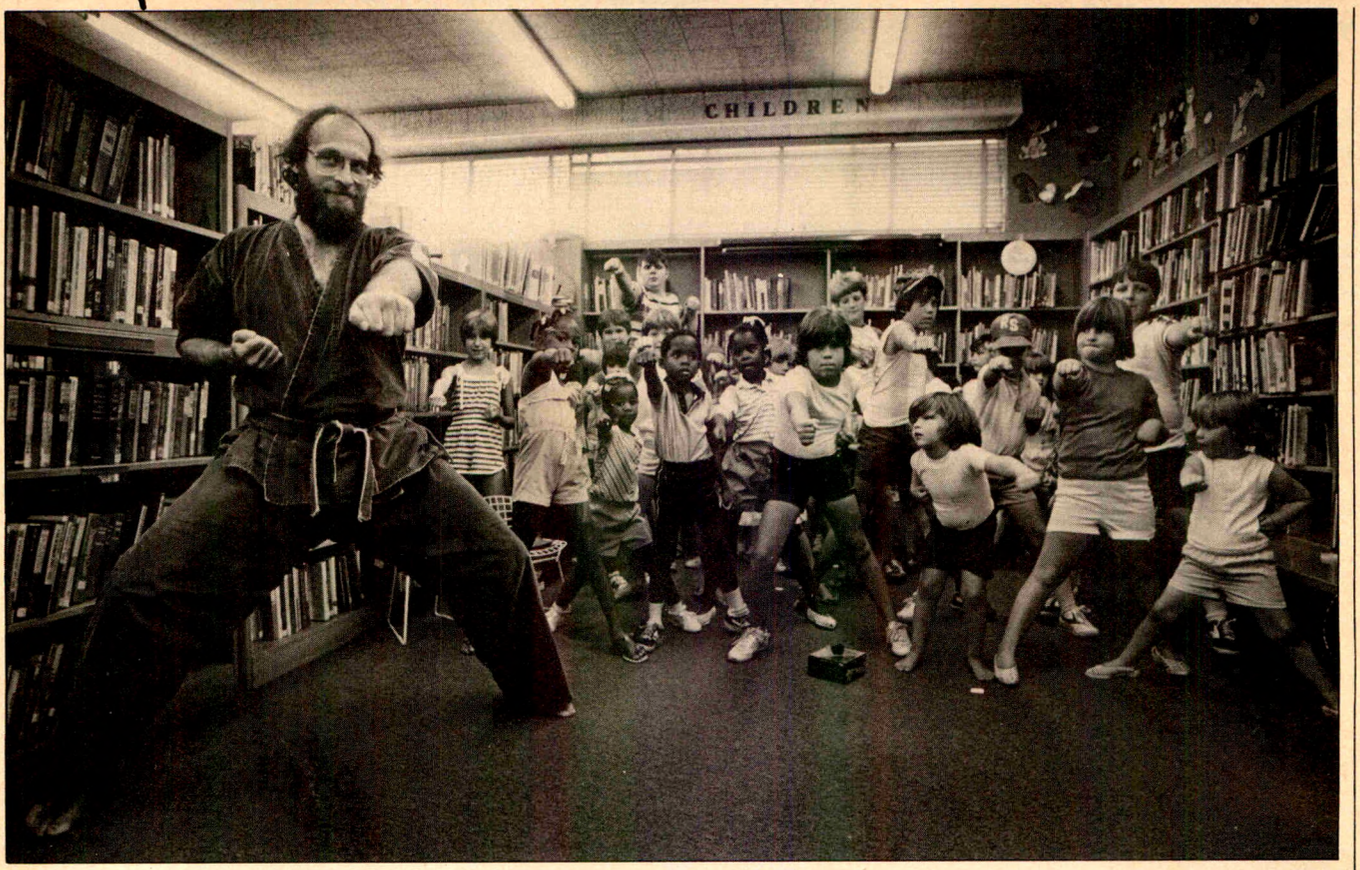
Most outsiders who meet Stockey are startled to learn he's a librarian.

"They carry around that stereotype with them of a little old lady or an effete, intellectual, thin, and Waspish male. Unfortunately, a few librarians out there do match the stereotype," Stockey said.

How does he respond? "There's not much you can say. I usually tell them they had a wrong idea about what librarians do and say. You can see now it was not correct."

His martial arts associates have the same stereotype. "They all say, 'What—you can't be!' "

(Continued next page.)



Bill Stockey teaches youngsters the basic horse stance and the blow that goes with it during a South Norfolk branch program.

Stockey is comfortable with the duality. "I like to think I'm an image-buster. Maybe it goes back to my days of radicalism. In fact, I'll deliberately go out of my way and try to blow the image apart. It creates a lot of fun times."

Stockey prefers public to academic libraries. "Unfortunately, for me academia tends to be too isolated and ivory-towerish."

Teaching karate principles

Stockey thinks adults talk down to children too much. "If you explain a concept in enough detail, allowing enough questions, children can understand. You can talk to them as peers."

He finds that children who are shy, lack concentration, or are socially withdrawn are helped most by karate training. "They end up with better grades, a better sense of what they want, a more considerate attitude toward their parents, and are more comfortable socially."

Most children who take his classes quickly learn the need for hard work and discipline; there are no instant Bruce Lees.

"They also learn that if they ever use karate in any situation *except* self-defense, it makes them less of a person. I tell them that if they can run, run! There is no shame in running." Stockey also advises students to try to talk themselves out of a difficult situation first.

Confrontation in Chicago

Only once in 13 years of studying karate has conversation failed Stockey. While in Chicago attending an Online conference last October, he was accosted on a dark street near his hotel. The attacker grabbed him and went for a weapon. "I knew instantly I had to do some serious self-defense. I locked his hand with my right hand and hit his elbow with my left hand. I probably dislocated his elbow. He went down and I ran."

"In football, the emphasis is on strength and one's ability to hit or maim someone," Stockey said. His own injuries included knee damage, several concussions, cracked ankles and ribs, and a dislocated shoulder. "I would never recommend football to any child before eighth grade. After age 13, maybe—if football is the kid's choice."

Once had a short fuse

In the early '70s when Stockey marched for peace and was considered a campus radical, he had an explosive temper. "I always met conflict with yelling and screaming—my reactions were very emotional. Karate hasn't made me a saint, but it has helped me learn how to control myself."

Today Stockey has his own karate studio called the Chesapeake Body Image, where he teaches students from seven to 40. He also conducts classes at the Old Dominion University Martial Arts Club, where he trains under eighth-degree black belt Tesshin Hamada. "When you talk to a high-ranking black belt, you feel in the presence of calm that is hard to describe," Stockey told *AL*. He teaches karate about 12 hours a week.

He wants to bring every Chesapeake branch at least one karate program. During the 45-minute sessions, he demonstrates basic control.

When he brings the audience into the demonstration, the first thing children learn is that all martial arts begin and end with respect. "We show them how to bow properly, and tell them they must learn to respect everyone."

Though Stockey says he doesn't have a large budget for programming, he is always looking for agencies and people in the community who can give presentations at the library. "The more patrons we can get to go through our programs the better. Then we have a base from which we can build community interest and have something to show the city council. My director, Robert Schalau, is very supportive."

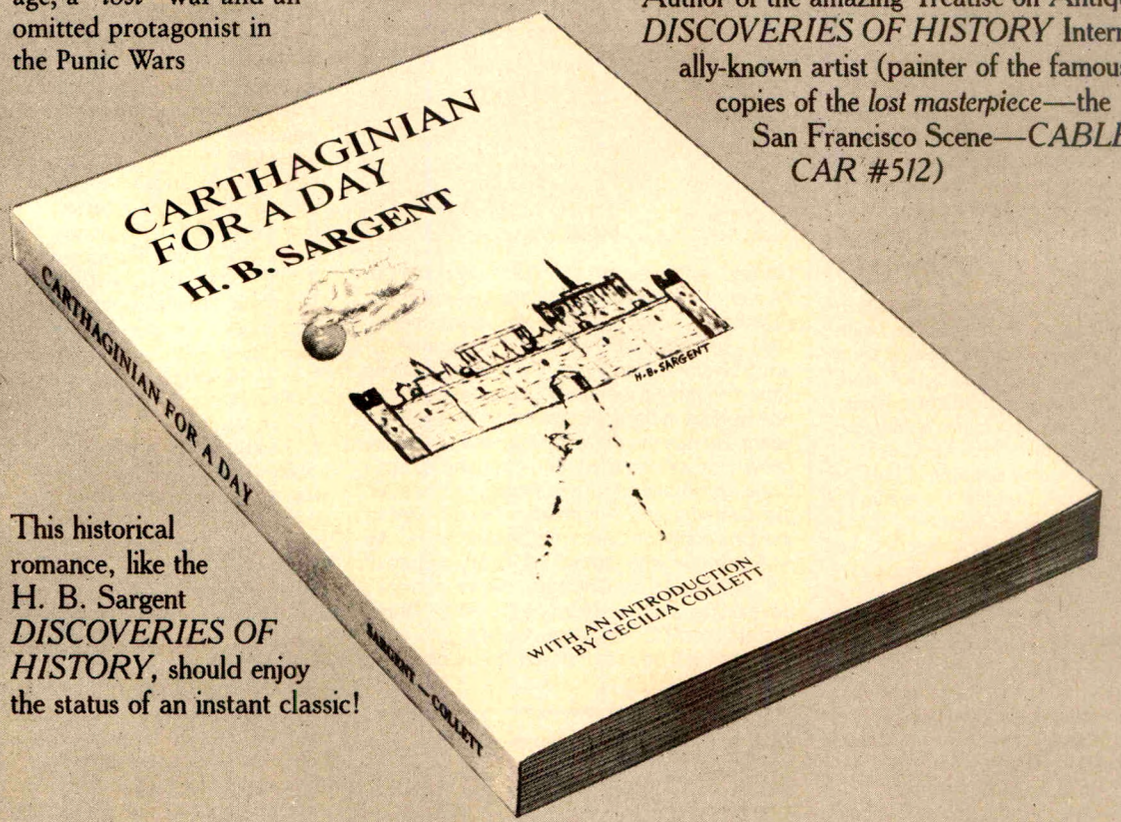
He cited a forthcoming program on child abuse to be presented by representatives from the Chesapeake Social Services Department.

Controversial programs, irate patrons, or excess noise may threaten equilibrium in most libraries; but the same calmness prevails at Hilliard as in a karate class. Stockey lives what he preaches. —*E.McC.*

The Carthaginian Classic

By the discoverer of an overlooked age, a "*lost*" war and an omitted protagonist in the Punic Wars

A sensational novel by H. B. Sargent
Author of the amazing Treatise on Antiquity *DISCOVERIES OF HISTORY* Internationally-known artist (painter of the famous oil copies of the *lost masterpiece*—the San Francisco Scene—*CABLE CAR #512*)



This historical romance, like the H. B. Sargent *DISCOVERIES OF HISTORY*, should enjoy the status of an instant classic!

The novel *CARTHAGINIAN FOR A DAY* is not alone a most timely work in that it interrelates the present historical hour and the distant past, but it is very likely the definitive book on that inscrutable *lost city*, Carthage.

The story unfolds simultaneously as a parable, comparing two eons two thousand years apart, and a chronicle of a fabulous, most eventful visit to the long ago by a hardy individual of the present-day scene. Thus, for the skillful manner in which it blends fantasy, realism, history, and philosophy—it is indeed a unique book!

Published in a limited edition, each copy signed and numbered by the author—they are superbly suited for libraries! **Only $15,** postpaid. As a set, with *Discoveries of History*, **only $18.** All prices postpaid; for Canada add 10%.

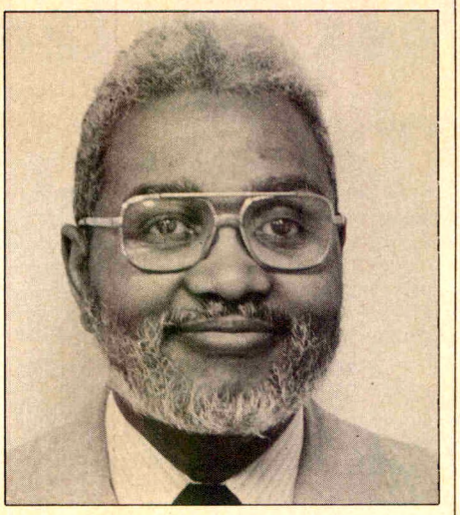
ALA member ESTHER LOPATO, trustee of the Brooklyn (N.Y.) Public Library since 1973 and the first woman to be board president, is the 1984 recipient of the New York Library Association's Velma K. Moore award. Lopato chairs the New York City Reading Is Fundamental program and spearheaded the establishment of RIF clubs in each of the 58 Brooklyn PL branches. . . . Oct. 1 JOHN S. ROBLING retired as vice president for public affairs for Encyclopaedia Britannica, Chicago, Ill., to pursue interests in the field of television. Prior to joining EB in 1961, Robling was director of National Library Week, organizing it into the first major nationwide reading program in the U.S. He received the Distinguished Service award from ALA's American Association of School Librarians and was the first recipient of the Illinois Library Association's Gerald Campbell Memorial award. . . . SUSAN MONTIGNY and ALA member MARY SUE FERRELL recently became sales representatives for The Faxon Company, Westwood, Mass. Montigny's professional background includes service as assistant librarian in the Science Library at Simmons College, Boston; Ferrell, who was 1983 president of the Nevada Library Association, was formerly director of the Learning Resources Center at Western Nevada Community College in Carson City. . . . ALA member LINDA LESTER is now director of reference services at the University of Virginia's Alderman Library in Charlottesville. . . . ALA member EDWARD J. DELONG is now audiovisual librarian at the Virginia Military Institute's Preston Library in Lexington. . . . E. S. BEACOCK, former director of the London (Ont.) Public Library, has been appointed coordinator of the Cooperative (Work/Study) Enrichment Program at the University of Western Ontario library school in London. . . . At the Association of Research Libraries, Washington, D.C., DUANE WEBSTER is now deputy executive director, SUSAN JUROW is training program specialist in ARL's Office of Management Studies, and JAIA BARRETT and JEFFREY HEYNEN are ARL program officers. All are ALA members. . . . LARRY OSTLER is now assistant university librarian for information services at the Lee Library of Brigham Young University, Provo, Utah. . . . In July ALA member JOHN SCHROEDER resigned as director of the Research Libraries Group, located at Stanford University, to become director of software development at Datastream Communications, Inc., Santa Clara, Calif. . . . JANE LIGHT is now director of the Redwood City (Calif.) Public Library, succeeding KARL VOLLMAYER, who retired. Both are ALA members. . . . At the Tennessee Library Association annual conference, ALA member MARY GLENN HEARNE, director of the Nashville Room of the Public Library of Nashville/Davidson County, became 1984-86 president-elect and JESS A. MARTIN and ALA member JOHN DAVID MARSHALL were both 1984 recipients of special citations. Martin, director of the University of Tennessee Center for the Health Sciences Library in Memphis, won TLA's Honor award; Marshall, librarian at the Middle Tennessee State University Library in Murfreesboro, received the Frances Neel Cheney award. . . . BARBARA M. PRESCHEL is now executive director of the Public Affairs Information Service, Inc., a nonprofit publisher of bibliographies and indexes in the social sciences. An ALA member, she is a past president of the American Society of Indexers. She succeeds another ALA member, WILHELM K. BARTENBACH, who resigned to become director of online services at H. W. Wilson. . . . In August HOWARD M. SMITH retired as city librarian of the Richmond (Va.) Public Library. He was succeeded by ROBERT N. COSTA, formerly director of the Cambria County Library, Johnstown, Pa. Both are ALA members. . . . July 15 KATHLEEN MCHARG became director of the Oregon State Library's Division for the Blind and Physically Handicapped in Salem. . . . ALA member DANIEL G. ARMSTRONG recently became director of the Tippecanoe County Public Library, Lafayette, Ind., succeeding another ALA member, RALPH A. VAN HANDEL, who retired. . . . Among the library professionals recently receiving special recognition for their achievements are: ARLENE C. BIELEFIELD, director of Connecticut State Library's Division of Readers' Services; ALA member SHIRLEY HELFRICH, consultant for the Southern Maine Library District; ALA member LINNEA HENDRICKSON, former reference librarian at Pennsylvania State University, University Park; ANTJE LEMKE, professor of information studies at Syracuse (N.Y.) University library school; ROBIN M. PRICE, of the Wellcome Institute for the History of Medicine, London, England; WAYNE A. WEIGAND, professor in the library school at the University of Kentucky, Lexington; and ALA member KIETH C. WRIGHT, professor at the University of North Carolina/Greensboro library school. Bielefield received the Distinguished Alumnus award from the School of Library Science and Instructional Technology Student-Alumni Association of Southern Connecticut State University, New Haven; Helfrich was named School Library Media Specialist of the Year for 1984 by the Maine Educational Media Association; Hendrickson was awarded an NEH grant to complete a bibliography of criticism of children's literature; Lemke was voted one of 12 Outstanding Teachers for 1984 by Syracuse University students; Price was the recipient of the José Toribio Medina award from the Seminar on the Acquisition of Latin American Library Materials (SALALM) for his annotated catalog on the Wellcome Institute's collection of medical Americana; Weigand received a research grant from Forest Press to prepare a biography of Melvil Dewey; and Wright won a Frederick A. Thorpe Travelling Fellowship from the Ulverscroft Foundation of Anstey, England, to develop a course for the University of West Indies library school on serving the special needs of its community. . . . ALA member MARY J. CRONIN, former assistant director for public services at Marquette University Memorial Library, Milwaukee, Wis., is now director of libraries at Loyola University, Chicago, Ill. . . . D. PHILIP BAKER, 1980/81 president of ALA's American Association of School Librarians, recently became director of curriculum for the Stamford (Conn.) Public Schools. Baker, who was 1977 recipient of the Connecticut Educational Media Association's Rheta Clark award, had been Stamford's coordinator of library media programs since 1971. . . . THOMAS M. PEISCHL has been appointed dean of Mankato (Minn.) State University Memorial Library. An ALA member, he formerly held a joint position at SUNY College at Potsdam as director of the Frederick W. Crumb Memorial Library and director of computer services. . . . Two school library system directors recently retired: ALA member RHODA APPEL MOSESOF, supervisor of the Division of Fine Arts and Media for the Newark (N.J.) Public Schools, and ALA member FRANCES THOMPSON, supervisor of library services for the Omaha (Nebr.) Public Schools.

MAKING WAVES



Library automation specialist WALTER J. FRASER is now director of library services for Advanced Library Concepts, Sacramento, Calif., producer of the ADLIB Integrated Library System. Coming to the firm in 1983 as library technical services consultant, Fraser has worked in library automation for some 20 years. He has taught at the Rutgers University (New Brunswick, N.J.) and Emporia (Kans.) State University library schools and headed the Systems and Automation Department of the University of California/Davis Library. An ALA member who earned his library degree at the University of Chicago, he is currently developing a new automated serials control system for ALC, to be introduced early next year, and will be working with library clients to customize ADLIB specifications.

Deaths

ELIZABETH JOHNSON, 72, 1957 winner of the Junior Literary Guild award for her children's book *The Little Knight,* died Aug. 26. Johnson, who retired as librarian of Lynn (Mass.) Public Library in 1971, also contributed children's book reviews for ALA publications. . . . MARIETTA DANIEL SHEPARD, 71, retired chief of library development for the Organization of American States and former ALA Executive Board member, died Aug. 21. . . . MARY JANE NEFF, head of the Periodicals Department of William Allen White Library at Emporia (Kans.) State University, died July 21. . . . CAROL RIGGS HOLBROOK, director of the University of Michigan Business Administration Library, Ann Arbor, died July 19. A memorial fund has been established by the UM library school for a student award for excellence. □

Baker & Taylor's Cataloging and Complete Processing 99¢ 89¢

A SIGN OF GOOD NEWS!

Effective September 1, 1984, Baker & Taylor is reducing the price of cataloging and complete processing by 10%. That's good news for customers who order books fully cataloged, processed and ready for shelving. At 89¢ per book, it's the lowest standard cataloging and processing price in the industry.

Shouldn't you take advantage of lower prices? Three types of cataloging and a wide variety of processing options are available.

For complete details, contact the Sales Department of the division nearest you.

How to cut out the most frequently asked question about the world's best-selling encyclopedia.

This way to World Book.

"Which way to *World Book*?" is a popular question around libraries for good reason. According to librarians, it's because *World Book* is the most frequently used encyclopedia in print.

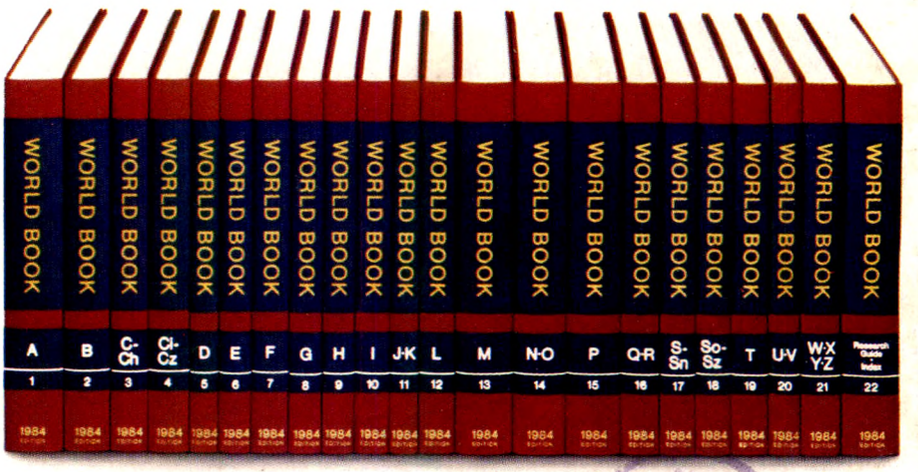
What makes *World Book* so appealing? According to a recent review by the editorial board of *Reference Books Bulletin*, published by the American Library Association,* *World Book*'s accessible, up-to-date, well-illustrated coverage of topics draws people of all ages.

In fact, this best-selling encyclopedia is designed especially to serve the reference and study needs of both students and adults. The review notes, "In these twin purposes it succeeds admirably," and adds, "*World Book* deserves high marks for its overall currentness of information."

People trust *World Book*, too. "*World Book*'s reputation for a high degree of accuracy—typographically, factually, and in matters of interpretation—continues apace," says the review.

From philosopher Aristotle to astronaut Sally Ride, "*World Book* continues to provide impressive, international biographical coverage of persons past and present," states the review.

With its clarity of style, helpful study guides, detailed index, and functional use of illustrations, it's easy to see why all signs point to *World Book*. Isn't it time to put a current set on your shelves?



*The review appears in the 2/1/84 issue.

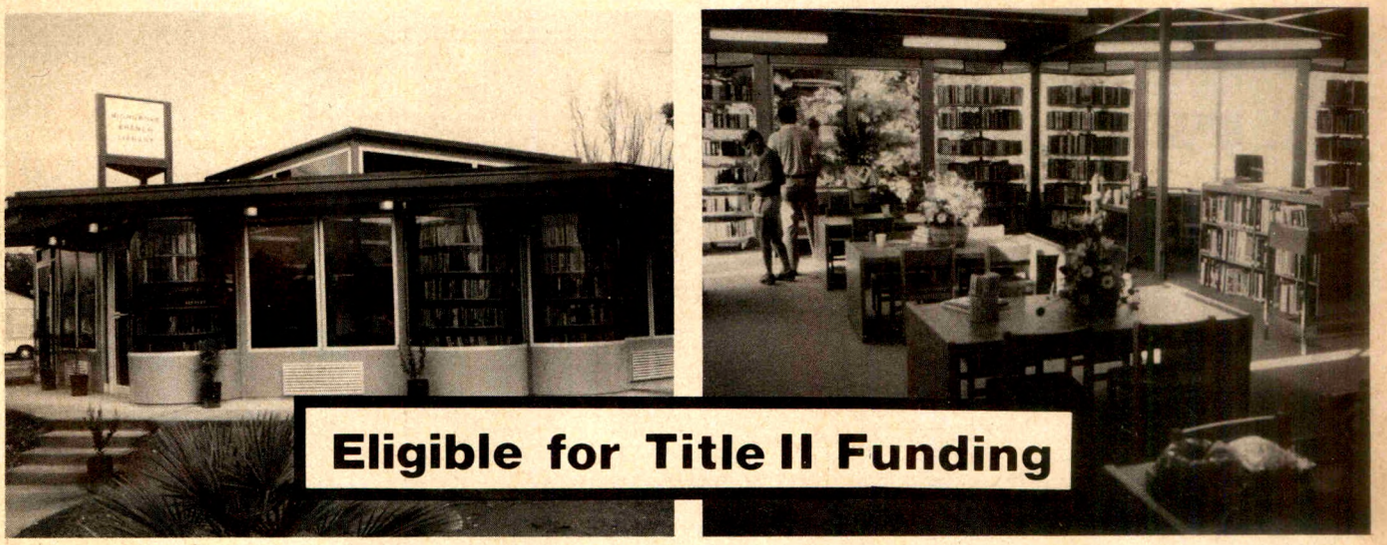
Are you really being honest in your planning process . if you overlook Porta-Structures?

Deciding *not* to take just 2 hours from your time at ALA Midwinter in Washington could be the most expensive decision you ever made!



We'll provide the transportation for a visit to operating Porta-Structures and Porta-Kiosks in the Washington area. Call 301-951-0500 collect for reservations or visit Booth 418 in the ALA Midwinter exhibit area.

- See how the 1600 square foot Porta-Structure can seat as many patrons and house as many books as a conventionally constructed 4500 square foot building. Imagine the operational savings in energy and personnel alone.
- See how Porta-Structures, Porta-Kiosks and Porta-Boutiques are setting record circulation figures at unbelievably low costs of operation.
- See how municipalities are using street corners, islands, town squares, recreation centers, parks, parking lots in front of malls or aisle space in enclosed malls to attract new patrons.
- See how you can install new facilities with no land acquisition costs, no architects fees, no expensive site development, no sewer and water hook-ups, and no cost increases due to time delays.
- See how you can have the flexibility of moving your Porta-Structures to a new site when traffic patterns and community needs change. Obsolete locations and buildings can be a thing of the past.
- In today's world of escalating prices and appropriation squeezes, Porta-Structure units provide a viable solution to the problems facing your system ... We call it the alternative library- ...You might call it the best idea since Gutenberg invented moveable type...

PROCEEDINGS OF THE IEEE, VOL. 68, NO. 10, OCTOBER 1980

Structures, Parameters, and Transmission Properties of Optical Fibers

TINGYE LI, FELLOW, IEEE

Abstract—Signal-transmission characteristics of optical-fiber waveguides are determined largely by their structural geometries, physical parameters, and materials properties. This paper reviews these factors and discusses the roles they play in determining loss and bandwidth in both single-mode and multimode fibers. Effects of polarization and of waveguide perturbations are included, and recent work on tailoring the bandwidth spectrum of single-mode fibers is presented.

I. Introduction

ALTHOUGH the first theoretical study of wave propagation in dielectric waveguides appeared in 1910 [1], little interest developed until the advent of microwaves in the late 1940's [2] and of lasers in the early 1960's [3]. These early fundamental studies were concerned with wave properties of low-order guided modes, but did not include considerations of signal attenuation and pulse distortion, aspects important to the transmission of information. Only in the past decade was significant progress made in the understanding of the optical fiber as an information transmission medium. Indeed, the progress has been so rapid that multimode-fiber communication systems have been developed and installed in the field for commercial use. Meanwhile, research work is steadily forging ahead to broaden areas of application of both single-mode and multimode fibers. Many excellent review papers and books that cover the subject of signal propagation in fibers are available [4]–[14].

In this paper, some of the important optical-fiber structures, parameters, and properties associated with signal transmission will be considered. The discussion will cover both single-mode and multimode waveguides and will include their basic structural features and physical parameters, materials properties, polarization effects, various loss mechanisms, loss and bandwidth spectra, dependence of bandwidth on materials effects and refractive-index profiles, and techniques for broadening the wavelength range of maximal bandwidth. Special emphasis will be given to recent advances.

II. Basic Structural Features and Physical Parameters

Fig. 1 shows cross-sectional views and refractive-index distributions of a single-mode and a multimode fiber. Important parameters and typical dimensions are also given. Multimode fibers with these specifications are now in commercial production, but the required specifications for single-mode fibers will depend on the wavelength of operation.

A. Single-Mode Fiber

A step-index fiber operates in the single-mode regime if its V number, or normalized frequency, defined by [6]

Manuscript received June 30, 1980.
The author is with the Crawford Hill Laboratory, Bell Laboratories, Holmdel, NJ 07733.

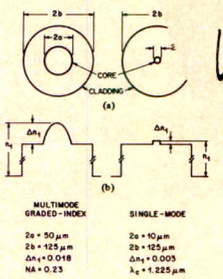

Fig. 1. Structures and parameters for conventional single-mode and multimode optical fibers. (a) Cross-sectional views. (b) Refractive-index profiles. (c) Typical parameters.

$$V = ka(n_1^2 - n_2^2)^{1/2} \tag{1}$$

is less than 2.405. In the above equation, $2a$ is the core diameter, k is $2\pi/\lambda$, λ is the free-space wavelength, and n_1 and n_2 are the refractive indices of the core and cladding, respectively. For the example of the single-mode fiber shown in Fig. 1 ($2a = 10\ \mu m$ and $n_1 - n_2 = 0.003$), the cutoff wavelength λ_c, above which higher order modes cannot propagate, is 1.225 μm. In actual single-mode fibers made by the modified-chemical-vapor-deposition (MCVD) process [15], index profiles tend to be graded and to exhibit a dip on the axis (due to the "burnoff" of dopants at the center during collapse). The effect of such perturbations is to increase the cutoff value of the V number (as defined by (1) where n_1 now represents the *maximum* value of the refractive index in the core) and, consequently, to decrease λ_c [16]–[21]. An approximate but much simpler method for determining λ_c consists in defining an effective V number such that

$$V_{\text{eff}}^2 = 2k^2 \int_0^a [n^2(r) - n_2^2]\, r\, dr \tag{2}$$

where $n(r)$ represents the index variation as a function of the radius r, and in setting $V_{\text{eff}} = 2.405$. As an example, consider the case of a power-law profile described by

$$n(r) = n_1[1 - 2\Delta(r/a)^g]^{1/2} \tag{3}$$

How much does "free" cost?

About $30 in the case of an average interlibrary loan transaction.* Recent studies break down the costs of obtaining a journal article in the following way:

Cost of borrowing	$18
Cost of lending	$13
Total cost	$31

While this includes direct costs—such as photocopying and postage—it primarily reflects the costs of your staff's time and labor. (It does not include the price of the article, although a growing number of libraries now charge up to $15 to process a loan.)

An article supplied by the UMI Article Clearinghouse, on the other hand, costs a total of $4 to $8. That's right. You'll never pay more than $8 per article when you place your order online through DIALOG's Dialorder, OCLC's ILL Subsystem, OnTyme, or ITT Dialcom which offers a gateway to ALANET. Price variation depends on your method of payment, not on the article length. (Online system charges are not included and vary from vendor to vendor.)

Your biggest savings, however, is in time. Online ordering is fast; availability of more than 8,000 titles from 1978 forward is guaranteed; and your article is on the way to you within 48 hours or you don't pay anything at all.

If "free" interlibrary loans are costing you more than you bargained for, then it's time you started saving your money *and* your valuable time, by using the UMI Article Clearinghouse.

For more information and a copy of our current title catalog, call us toll-free at 1-800-732-0616. In Michigan, Alaska, and Hawaii, call collect at 313-761-4700.

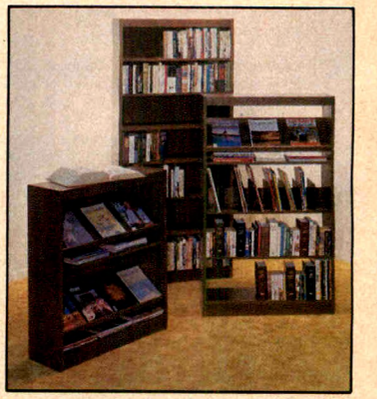
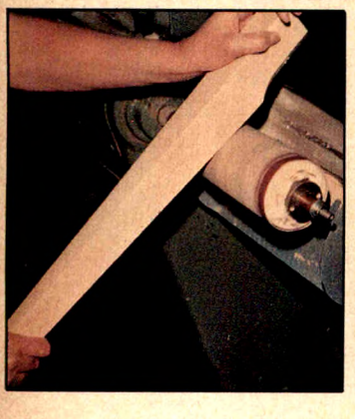
Made by Gaylord, Furniturewise.





Remove the Middle Man. Do Business Directly With the Source—Gaylord. Manufacturer and Marketer of Library Equipment and Supplies Since 1896.

We surpass dealers, catalog houses and other middle men in three ways:

Full Selection

If libraries use it, Gaylord manufactures it.

Expanding, Remodeling, Retrofitting, New construction. With hundreds of special and technical products to choose from, Gaylord Furniture will harmonize with your interior and your intent.

Choices. From Wood shelving to reading, reference and index tables. From magazine and newspaper racks, atlas cases and dictionary stands. To browsers, book trucks and charging desks. And, you have a variety of select hardwoods to choose from—quality oaks or maples in nine stains and finishes. Middle men offer limited choices.

Ship from Stock

DELIVERYwise, we ship orders fast directly from our factory.

With our exclusive "Ship from Stock" program we keep a large central inventory. So your order is shipped in *three to four weeks* because items come from stock, not production runs—that start with your order.

Local Source

With Gaylord, the personal touch still remains. You get more than a catalog.

You're helped by our—your—local Gaylord sales person who values your library's business. And, they understand libraries; in fact, our sales force averages twenty years of service to the library field.

Trusted Source

Depend on a Furniturewise manufacturer . . . Gaylord, your trusted source.

To order, call your local Gaylord representative at: 800/448-6160. In NY call 315/457-5070.

☐ Please send a Gaylord catalog containing wood furniture
☐ Please have a Gaylord sales person call

THE HOLIDAY SEASON AND ITS EXPLOSIVE BUYing sprees bring to mind once more America's greatest consumer value: the library. Knowing that the nation's citizens spend about $2.5 billion a year on public libraries, and knowing the lifelong benefits they get in return, we note with wonder some of the other American expenditures of a recent year.

The source is Set No. 3 of the *1982 Economic Censuses*, a series of reports being released to the press this fall by the U.S. Bureau of the Census.

Let's have a look.

Liquor stores—just twice as numerous as our estimated 17,000 public library outlets—nevertheless gulped some $17.1 billion from American pockets. Californians alone spent $2.2 billion, about equal to the cost of operating all those main and branch libraries in the nation.

This is not to decry the purchase of liquor by those who enjoy it. Goodness knows, librarians enjoy their share. We merely offer a perspective. And if the American people want to drop $8.6 billion a year in 61,188 bars, that's their business.

Other expenditures:

America bought $8.3 billion worth of jewelry.

Those lovable used-car dealers generated $6.4 billion in sales. Mobile-home dealers did $3.9 billion; retail boat dealers, $2.9 billion.

Encouraging to librarians, perhaps, is that Americans spent $3.1 billion in 9,312 bookstores. But they spent $3.2 billion in toys-and-games shops, and about $32 billion on computers.

Sales of ice cream and other frozen goods exceeded the library expenditures by a half-billion dollars.

Americans, it turns out, spend less for very few commodities than for their family library services. The only such item in Set 3 of the census report was "coffee whiteners." Americans spent less for these "dry dairy substitutes"—$260 million—than they did for public libraries.

But that $260 million becomes a stirring figure when compared to what ALA asked for last year as the 1985 federal investment in the nation's community libraries. ALA asked for $150 million. The President considered that an unnecessary use of the people's money, and proposed zero. Congress gave $118 million.

Are we grateful? Yes. Is that a lot of money? Well, figure that $118 million plus $142 million more will put non-dairy creamer in the nation's mugs, but it won't pay for the coffee. But $260 million in library programs—oh Happy Day, our cups would bubble over!

For all their other spending, the American people appreciate this value. They spent generously in the Nov. 6 elections by passing library bonds and defeating stingy propositions. We hope our President understands *this* mandate, and some relative values, as he prepares the nation's budget next month. Happy holidays. —*A.P.*

Official Historical Records Are Now Available From the National Archives Microfilm Rental Program

Now You Can Research Your Family History at Your Local Library

The National Archives research material available on a rental basis includes the following:

- Census Population Schedules from 1790 through 1910 including Soundexes
- American Revolutionary War Service Records including index
- Revolutionary War Pension and bounty land warrant application files

Convenient Program Features Include:

- No Membership Fees
- Longest Rental Period - 30 days
- Low Cost - Only $3.25 per roll
- Fast Service - Most orders filled same day as received
- Convenient Ordering - Through your local participating library
- Official U.S. National Archives first generation microfilm copies

Visit the Inter-Library Loan Division at Your Local Library for Further Details

If you know COAST you know VIDEO

COAST TELECOURSES combines network-quality video with a coordinated print component (text, study guide and faculty manual) to serve your educational or training needs with total learning systems. Our program catalog contains more adult-level, college-credit courses than any other single producer or distributor in North America. All COAST TELECOURSES are available in ½", ¾", 1" or 2" formats to allow applications ranging from broadcast and cable television to various location-cassette programs. This explains why more than *900* institutions and corporations of all sizes have come to COAST TELECOURSES — if you know COAST, you know VIDEO!

Landslide reelection of Rep. Owens tops election-day triumphs for library advocates

In the mixed bag of Nov. 6 election results, advocates of federal and state aid to libraries could point to a number of cheering votes, headed up by the reelection of the librarian-congressman, Rep. Major R. Owens (D-N.Y.).

Brooklyn voters gave Owens a second term by a whopping 90-percent margin. Owens, the first graduate librarian ever elected to Congress, has frequently sounded off for libraries against Reagan Administration policies reducing support. The efforts to downgrade federal librarian standards and contract out entire federal libraries have "ominous implications for the future and age of information," Owens told a Congessional hearing recently.

In addition to Owens, two other opponents of the proposed library classification standards were reelected: Mary Rose Oakar (D-Ohio) and Pat Schroeder (D-Calif.). Oakar and Schroeder also led the fight for pay equity, along with Geraldine Ferraro.

Other library friends reelected to the House of Representatives include Rep. William Ford (D-Michigan), Rep. William Natcher (D-Ky.), and Rep. Edward Roybal (D-Calif.). Don Albosta (D-Mich.), who chaired the subcommittee oversight hearings on the controversial Office of Management and Budget Circular A-76 on contracting out, lost his race for reelection.

Simon and Rockefeller in Senate

Among the new faces in the Senate will be two well-known library supporters, Paul Simon of Illinois and John D. Rockefeller IV of West Virginia, both Democrats. As a member of the House of Representatives, Simon developed and pushed through the revision and extension of the Library Services and Construction Act, now PL 98-480. As three-term governor of West Virginia, Rockefeller extended library service to every resident and raised the state per-capita aid to libraries to $3.

And reelected to the Senate were these friends of the ALA Washington Office programs: Sen. Mark Hatfield (R-Ore.), Sen. Claiborne Pell (D-R.I.), and Sen. Larry Pressler (R-S.D.).

Three states reject tax cuts

California, Oregon, and Nevada voters turned down potent tax-cutting measures that threatened library funding, and Nevada opted for library construction.

Californian Howard Jarvis, co-author of Proposition 13, which cut property taxes almost 60 percent and decimated library operating budgets throughout the state, had not gone away. This year he was back with "Jarvis 4," Proposition 36, designed to close court-mandated loopholes in the implementation of the 1978 law.

The California Library Association joined a successful coalition of organizations fighting the Jarvis initiative: voters defeated Prop. 36 by a margin of 55 percent. Jarvis vowed to be back again in two years.

In Oregon, proponents of Ballot Measure 2 asked voters to limit property taxes and gain more control over local units to force them to cut "fat." Brandon Public Library trustee Phyllis Lichenstein told Friends that the community already controlled its tax spending and "The 'fat' to be trimmed from our budget by a 34-percent expected cut would come from reducing an already overworked staff, cutting the book and magazine budgets, and reducing and eliminating some services."

The vote on Measure 2 was close, but a last-minute count of absentee ballots resulted in its defeat.

Nevada State Librarian Joseph Anderson reported on two measures affecting libraries. Question 12 limited state and local taxes as well as fees for services offered to the public. To raise library patron fees, counties would have to call special elections. The measure was defeated, with 52 percent of the votes in the negative.

Question 9, giving the state authority to issue $10 million obligation bonds to construct or expand library facilities, was passed, Anderson said. Localities in Nevada will now be able to apply to the state for 50 percent of construction costs. The measure was roundly defeated in 1982, but passed by a handy 57 percent in 1984.

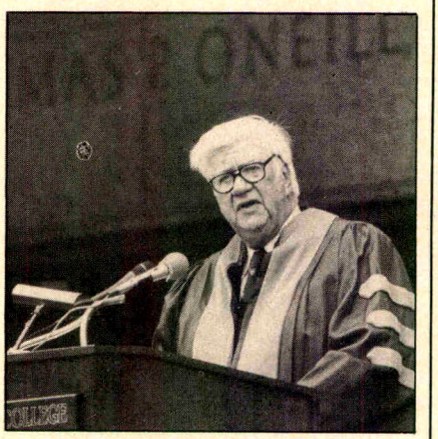
For Boston College library, Tip O'Neill breaks a rule

Some 1,500 well-wishers celebrated the dedication of the new, $28 million Thomas P. O'Neill, Jr., Library at Boston College Oct. 14. President J. Donald Moran singled out the Speaker of the House of Representatives as "the greatest example of an alumnus who embodies the ideals of learning and leadership."

Tip O'Neill, who had banned political discussion for that day, told listeners he doesn't believe buildings should be named after public officials who are still in office, and said he has declined many offers. "But this time," he said, "I made an exception because this college has meant so much to me, to my family, and to my community."

University Librarian Thomas O'Connell, who also spoke at the ceremonies, told a campus reporter, "The academic ethos of the university will be raised considerably by this library." O'Connell is a 1950 Boston College graduate who returned as its librarian in 1976. He said he considers the new library "wonderful" because of its 30 librarians and 70 other staff members.

The grey-pink granite structure sits astride a rocky hill crossed by a major campus footpath. Three stories high on the uphill side and five on the downhill side, the 203,000-square-foot library houses 700,000 volumes, nonprint materials, and a Geac computer system. The university Computer Center, Telecommunications Center, and nine classrooms are also located in the building.



Speaker of the House O'Neill

Librarian's pension suit forces unisex changes at TIAA-CREF

Early in the 1970s, ALA-member Diana Spirt, a Long Island University library school professor, decided to protest the fact that her pension plan offered higher benefits to men than to women. Along with the first of many pension cases, *Diana L. Spirt* v. *the Teachers Insurance and Annuity Association and the College Retirement Equities Fund* (TIAA-CREF) *and Long Island University* entered the federal court system in 1974.

Ten years later, on Oct. 9, Spirt finally won her case. The U.S. Supreme Court declared it would not review a ruling by the U.S. Court of Appeals for the Second Circuit on the *Spirt* case. The lower court had ordered that men and women who retired after May 1, 1980, should receive equal

Decision Maker **5**

Dr. Hardy R. Franklin
Director
District of Columbia Public Library
Washington D.C.

"We have a close working relationship with CLSI. Their people understand and respond to our unique needs."

10 years ago when Dr. Franklin decided to put the D.C. Public Library in the forefront of library automation, he began with the limited resources available to him at the time, namely, some modest federal grant funds. Within several years the success of his pilot program at the central Martin Luther King Library led to solid budgetary support for extending the LIBS 100 throughout the main library and to all 20 branches.

The entire DCPL database, including the online catalog and Community Information Service will also be available at the University of the District of Columbia and in public high schools.

"Personal attention from local CLSI staff assigned to our area for sales, installation and field service gives our staff the daily, ongoing support it needs to best serve our patrons."

Because CLSI knows there's more to library automation than just hardware and software. It's people with very special skills to work with you to bring out the best in your system. Of our 200 employees, 100 are in customer service positions. That's how CLSI guarantees a network of dedicated professionals who know how to make the technology do what you want. Right now and on into the future.

"The software was flexible enough for our staff to develop an on-line Community Information Service listing the day to day services of D.C. agencies and more than 700 community organizations."

You can expand your system to include more libraries and more functions in one integrated system. There's no need to convert data, retrain your staff or discard one penny's worth of your original investment. With CLSI's ongoing research and development program you expand your existing system with the latest in computer technology. So the system grows as your automation budget grows as your library grows.

"As a community institution supported by city taxpayers, the D.C. Public Library has to keep a careful eye on efficiency and economy."

Statistics provided by CLSI's integrated library automation system help demonstrate the strong demand for library service. They'll show you who's reading what—right down to specific titles. And you know where, when, how many and how often your patrons are borrowing. These reports can be used in the training of staff in book selection.

"CLSI's people meet our needs now and their automation provides management data that are vital at budget time."

WHAT YOUR LIBRARY PATRONS DON'T KNOW ABOUT THE LAW MAY HAVE A PROFOUND EFFECT ON THEIR DAILY LIVES

If you haven't seen the magnificent new *Guide to American Law*, you and your patrons may be missing the most important new reference tool of the last decade.

As a major American legal publisher, West Publishing Company has provided the federal government, courts and practicing attorneys legal materials for over 110 years. Today we are indeed proud to introduce *The Guide to American Law*—a plain English legal encyclopedia.

The Guide to American Law boasts hundreds of to-the-point explanations of every facet of the legal principles which impact our daily lives. This handsomely bound twelve volume set will provide your patrons an easy to follow A-Z tour of the American legal landscape.

To receive an information packet of sample pages and details of the limited time introductory offer, send the attached coupon today.

* Selected by the ALA Reference and Adult Services

monthly benefits, as will all participants who retire in the future.

In a prior ruling on an Arizona pension lawsuit known as the *Norris* case, the Supreme Court had ruled that pension companies must adopt unisex mortality tables for contributions paid in after Aug. 3, 1983. On that date TIAA-CREF had amended its pension system to conform, but retirement benefits based on contributions made before Aug. 1, 1983, were still paid out under the old tables.

When the Supreme Court ruled on *Norris,* it had remanded *Spirt* back to the appeals court for reconsideration. The lower court reinstated its original retroactive decision, which TIAA-CREF and others brought back to Supreme Court.

The rejection by the court caused TIAA-CREF to immediately announce it would apply the lower court decision nationwide. A spokesperson assured all policy holders and participating institutions that conforming to the unisex requirements "will not in any way threaten the financial soundness of TIAA-CREF." Monthly income payments will be adjusted Jan. 1.

"This is a great victory. We're just delighted," said Ruth Weyand, a lawyer for the Equal Opportunity Commission, which had intervened on Spirt's side. Lawyers for the American Association of University Professors and women's-rights groups also expressed pleasure.

Spirt told *AL* that she is happy and "eternally grateful—but it took too long."

Bell's record: supported library role, not LSCA

As had been expected, Department of Education Secretary Terrel H. Bell announced in November that he will leave the Reagan cabinet on Dec. 31. He will return to a post as professor of education at the University of Utah in Salt Lake City.

Bell had been Utah Commissioner of Higher Education in 1979 when President Reagan named him to dismantle the department created by President Jimmy Carter. Instead, Bell transformed the agency into a forum urging excellence in the nation's schools and libraries.

"His greatest contribution as Secretary of Education was *A Nation at Risk* and the multiplier effect it had," a noted educator commented. Bell also backed publication of *Alliance for Excellence: Librarians Respond to A Nation at Risk,* but opposed reauthorization of the Library Services and Construction Act.

In announcing his resignation Bell said, "We're involved in a real renaissance in American education." He candidly acknowledged disagreement with the Office of Management and Budget over the proper level of educational spending.

"To move in the radical direction of abolishing all of our programs and dramatically withdrawing all federal concern and support of education would be a mistake," Bell told the media.

The *Chicago Tribune* said his departure was expected to trigger efforts among ultra-Right Reaganites to replace him with a conservative. Among possible successors are Chair William J. Bennett of the National Endowment for the Humanities, President John R. Silber of Boston University, and U.S. Office of Personnel Resources Director Donald J. Devine. Devine, who backs the proposed federal standards downgrading librarians, formerly taught politics and government at the University of Maryland.

New rural library powwow draws 320 to Minnesota

"The only way for cash-strapped American farmers to straighten out their current financial situation is to get involved in the political process. And, by providing accurate farm information and timely periodicals, rural libraries are the place where that involvement can begin." Ann Kanten, Minnesota Deputy Commissioner of Agriculture, gave that message to 320 rural librarians at the Mankato, Minn., Holiday Inn Sept. 28.

Kanten, a former rural library trustee, quoted from both William Jennings Bryan and Jessica Lange in her moving address on "Power and the Rural Political Structure" at the final session of the first Midwestern Rural Library Conference.

The two-day meeting was expected to attract some 150 rural librarians from Minnesota and Iowa; it drew more than twice that number from 16 states and Canada. People came from as far away as Twin Mountain, N.H., and Olympia, Wash. The conference and turnout were significant, Kanten told a local reporter, "because we're all concerned about the survival of the family farm, and nobody's sure what's going to happen next."

ALA member John Christenson, director of the Traverse des Sioux Library System covering 13 counties in south central Minnesota, had planned the conference to encourage people to use rural libraries to their full capacity. The idea came from a district rural library meeting he attended last year in Eau Claire, Wis. The Wisconsin conference had been supported by an LSCA grant; Christenson had only the moral support of his board and the help of four Traverse des Sioux staff members.

In addition to Agriculture Commissioner Kanten, speakers included a University of Minnesota Extension Service executive, who emphasized the drastic economic changes shaping the rural scene, and Minneapolis *Star-Tribune* book editor David Wood, author of *Wisconsin Life Trip.* Kathryn Rynders, University of Minnesota Technical College librarian, chaired a panel examining the information needs of rural residents as opposed to urbanites. Christenson addressed a small group on "How to be the place to go

for those who need to know.''

Because the conferees were ''tuned to the same wave length,'' Christenson said, the open exchange of ideas included some common solutions to rural library issues and problems.

Christenson, who was reelected mayor of Good Thunder Nov. 6, told *AL* the conference cost $9,200 and took in only $8,600. The $600 loss was chiefly due to printing costs. Bibliographies on farm magazines, rural ferment, children's books on agriculture, and other pertinent topics were distributed and are available free from Christenson while the supply lasts.

The mayor of Good Thunder hopes to replicate the conference on Rural Library Day at the Second National Public Library Association Conference April 2 – 5, 1986, in St. Louis.

Erie County residents rally to block library shutdown

Late in October Erie County Executive Edward J. Rutkowski ordered Donald H. Cloudsley, director of the Buffalo & Erie County (N.Y.) Public Library, to plan for the elimination of all library services Jan. 1, closing the Central Library, 16 Buffalo branches, 38 suburban libraries, and all other outlets.

The county projected a revenue shortfall, Rutkowski said, and had no money for nonmandated services like libraries, parks, mental health, and highways.

The library director and his staff worked out a plan for dismissing all employees except a handful of maintenance and security people. They also alerted trustees, librarians, and other residents to the possibility of life without the libraries.

The response proved overwhelming. Library and Friends groups bombarded county legislators and officials, school principals, and Gov. Mario Cuomo with postcards of protest and scheduled a march from the main library to the legislature Saturday, Nov. 17.

A Nov. 4 *Buffalo News* photo pictured a young patron at the Eggertsville branch library pondering a sign attached to a large cut-out dinosaur. The sign asked: ''Will our public libraries become extinct?'' Friendly members of the county legislature vowed they would not.

Suddenly, the county executive shelved Cloudsley's shutdown plan, and presented a budget preserving the 1984 figures and requesting a tax increase to finance nonmandated services. The legislature must act by Dec. 10.

Library supporters relaxed slightly, but said they would still march to urge the legislatures to support and increase library funding.

Group proposes changes in (British) Library Assoc.

Although Queen Victoria granted a royal charter to the Library Association in 1898 ''to unite all persons engaged or interested in library work,'' most of the organization's 24,000 current members are working librarians. Last year the association council expressed a need to increase the ''hospitality'' of its register and appointed a six-member Futures Working Party chaired by Philip Gill to consider the policy implications and make recommendations.

Gill presented a 31-page blueprint for future development of the association to the council Nov. 1. Recognizing the radical technological, social, and cultural changes which have brought people with a wide range of skills and training into the information world, the working party believes the association should relax the barriers between disciplines within the library and information community and ''take an active and crusading role on behalf of the importance of information skills and of those working in that area.''

Specifically, the Library Association should recruit authors, journalists, editors, publishers, booksellers, and database providers for membership as well as library and information service managers, technicians, and librarians. The association should provide relevant and meaningful services, structure, and policies to attract new members,

Comfortable, full page viewing all day long...for years!

Dukane MDP Manual Microfilm Reader

It's easy to see why the MDP is the preferred reader for 35mm roll film, 16mm film and aperture cards.

A gently slanted screen assures comfortable viewing even over long stretches of time. Operating instructions are up front, in plain view. Loading is a snap. And you'll appreciate the MDP optical system. Choose our Zoom 13-23x or 18x lens. Both present images that are precise...crisp...crystal clear. High resolution from corner to corner allows you to view full pages as if you were reading the original.

Dukane's MDP...it's your best value for operating ease and reliability— any way you view it.

and should also reorganize its secretariat, permit its staff to act on its own, and consider making other changes, perhaps even a new name.

The association will become "increasingly and dangerously out of touch with the rapidly changing world in which it has to survive" if it fails to act, the report warned. Taking up the challenge of change would provide the 107-year-old association with "a fresh vitality and a dynamic role now and in the future"

Cross-Atlantic regards

In the September Library Association *Record,* an editorial cites articles in a recent *American Libraries* that indicate much similarity in the library concerns of the U.K. and U.S. The editorial also reports, on "a sad note," ALA Executive Director Robert Wedgeworth will leave next July. "While wishing him well in whatever future career he chooses (he is still only 48)," the editorial says, "we must spare some good wishes for the ALA in searching for as notable a man or woman to succeed him."

R.I. citizens, librarians get down to *Realities*

At a two-day conference on "Libraries in the Future of Education: A Rhode Island Perspective," some 80 private citizens, educators, and librarians focused on the recommendations of ALA's *Realities: Educational Reform in a Learning Society* and the U.S. Department of Education publication, *Alliance for Excellence: Librarians Respond to A Nation at Risk.*

The conference held at Rhode Island College in Providence Oct. 12–13 had been proposed by Victoria Lederberg, a psychology professor at the college who had been inspired by a Department of Education regional seminar on the library role in a learning society. Lederberg, a leader in the Rhode Island Coalition of Library Advocates (COLA), convinced the group of library, media, and friends' organization representatives to sponsor a conference exploring how all libraries can be linked more effectively with citizen and community resources.

COLA conference planners solicited funds from state library associations, colleges and universities, banks, business people, and library vendors. They developed 15 discussion topics based on *Realities, A Nation at Risk,* and *Alliance for Excellence,* and briefed discussion leaders.

Lederberg's keynote address was followed by a champagne reception and dinner program. Next day, a panel of educators and one of librarians informed the conference before the small group discussions took place.

ALA Past President Peggy Sullivan wound up the conference by telling the audience that the problems were old but should be addressed with renewed initiative. She compared *Realities,* in its simplicity, to certain Ranganathan publications and urged the ALA recommendations be implemented.

Jean Sheridan, librarian at the University of Rhode Island College of Continuing Education, told *AL* she felt that the conference participants from the academic and public libraries gained a new awareness of the plight of school librarians. She said that community meetings will be organized to follow up the conference and develop permanent linkages among schools, libraries, and community organizations.

"I had hoped for more of a cross-configuration," said Fay Zipkowitz, director of the Rhode Island Department of State Library Services. "But we did get the school people by scheduling the conference at the weekend." Zipkowitz and Director Richard Olson of the John P. Adams Library at Rhode Island College offer to share their experiences with conference planners in other states.

news in brief

Merwine Case hearing. Three U.S. Court of Appeals judges heard oral arguments in the Glenda Merwine sex discrimination case against Mississippi State University Nov. 14 in New Orleans. Both sides had submitted briefs in May, after Merwine had appealed U.S. Magistrate Charles Powers' decision overruling the district court jury verdict in her favor (*AL,* Feb., p. 72).

The appeals court judges questioned why the jury had thought Merwine qualified for the position that advertised for an ALA-accredited MLS. Merwine's lawyer argued that his client was qualified by her experience and her master's in education. The university's lawyer stressed that the ALA-accredited degree is an "industry standard."

The judges' decision on the appeal might come in two weeks to a year, a court clerk told Office for Library Personnel Resources Director Margaret Myers, who attended the hearing with Kathleen Heim, OLPR Advisory Committee chair. (For other stories, see *AL* index, this issue.)

New home for Crerar. Ninety years after the John Crerar Library was established in downtown Chicago, its new $22 million, three-story building opened to the public on the University of Chicago campus Sept. 27. On its 39 miles of shelves are 900,000 volumes combining the Crerar collection in applied sciences with the university library's holdings in pure sciences.

The Crerar Library, housed at the Illinois Institute of Technology since 1962, is now part of a two-acre landscaped science quadrangle, linking several buildings devoted to basic physical and biological sciences. The Crerar's 25,000 rare books, including works by Galileo, Copernicus, and Newton, are nearby in the Joseph Regenstein Library Special Collections Department.

At ceremonies Nov. 1, University of Chicago President Hanna H. Gray said: "The dedication of this building marks the culmination of a collective effort by a great many people over a period of years to ensure the continuation and enrichment of a great scientific institution." A *Chicago Tribune* editorial called it "a happy ending to a long story."

Librarian pleads guilty. James B. Alsip, former director of the George Washington University Library and former ALA member, pleaded guilty to a book theft charge in U.S. District Court in Washington, D.C., Oct. 19, the *Washington Post* reported.

Alsip admitted transporting interstate some 175 books, some of them rare, stolen from the University of Oklahoma Library. He had been director of the Oklahoma library before he was appointed to GWU in 1979. Alsip said he would return the books, but he faces a $10,000 fine and up to 10 years imprisonment.

The charge against Aslip originated in an investigation of some $70,000 in GWU library book orders never delivered. The money had been deposited in Alsip's bank account and was repaid to the university by his wife when questions were raised. Alsip resigned from GWU in 1983.

Pueblo PL moves into schools. The Pueblo Library District in Colorado is installing

computer terminals in six high school media centers in the county to provide online access to its fully automated data base. The project, funded by a $31,635 LSCA grant, aims to establish the service by January.

Project Director Richard Tucey, tech services director at Pueblo, reports that four city schools were scheduled to have direct access by the end of November. In December, Pueblo County High, 10 miles away, and Rye High, in a mountain community 30 miles distant, will have dial access.

OCLC inaugurates Linked Systems Project. OCLC President Rowland Brown announced Sept. 27 that the utility will acquire computer equipment for the name-authorities phase of the Linked System Project. LSP involves computer to computer links between the Library of Congress, the Research Library Information Network, the Washington Library Network, and OCLC.

"This substantial application of funds will provide support for OCLC's participation in the first phase of the Linked Systems Project and underscores our commitment to international library cooperation and to our goal of removing barriers to access to bibliographic information," Brown said.

Good news from Tampa. "Words can barely express our relief and optimism at this point," Director John M. Adams of the Tampa-Hillsborough County Library System said Oct. 26. "I think the sun has just come out of the clouds."

The county board of commissioners had just acted to increase library funding 30 percent, including money to build the system's 14th and largest branch, a 70-percent increase in the book budget, and $607,000 to install an integrated automation system.

"For at least 10 years, an adequate materials budget and automation funding have been impossible due to our political situation," Adams explained. The city and county bickered over funding and allowed only one book budget increase in the last five years. A bitter censorship controversy over children's sex education materials further complicated matters (*AL*, Dec. 1981, p. 660).

Finally, the city agreed to turn the library over to the county, which took responsibility Oct. 1. □

QUICK-BIBS: New and recent books on a timely topic

Bill Ott, compiler

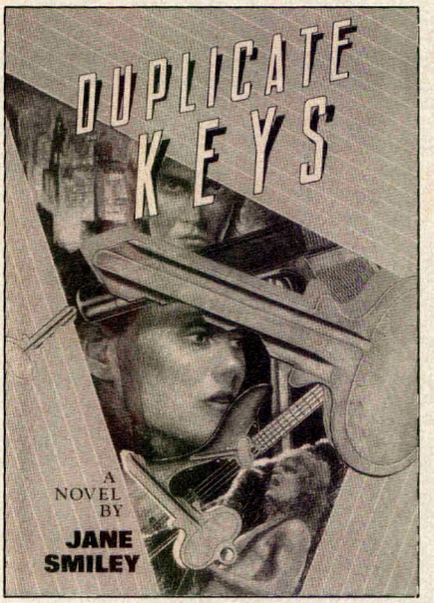
CITIES

Everybody has an opinion on cities: What is Sodom and Gomorrah to one is a cultural smorgasbord to another. The titles listed below are indicative of how widely we disagree over what's good and bad about our cities. One author details the flight from Rust Belt to Sun Belt, while another celebrates the city in art; one novelist finds in urban renewal a metaphor for the destruction of dreams, while another documents the way a group of Yuppies uses the resources of the city to sustain itself during an emotional crisis. From cockroaches to quiche, from the A-Train to the chauffeured limo, the diversity and complexity of city life are as befuddling as they are bedazzling. As a famous traveler once put it, "I have a feeling we're not in Kansas anymore."

Cities: the Forces That Shape Them. Ed. by Lisa Taylor. Cooper-Hewitt Museum/Rizzoli, 1983, $14.95. (0-8478-0415-1, 81-51718)
Looking at the city from a wide variety of sociopolitical perspectives, this collection of essays offers an insightful overview of what happens when many people share little space.

Conrad, Peter. *The Art of the City: Views and Versions of New York.* Oxford, 1984, $17.95. (0-19-503408-2, 83-24935)
Conrad sees all cities as posing an indelible challenge to the creative imagination. His analysis of the work of various New York writers and visual artists reveals the multifaceted ways that this challenge has been met.

Estleman, Loren D. *Sugartown.* Houghton, 1985, $13.95. (0-395-36449-3, 84-12910)
Estleman's Amos Walker mysteries are brilliant evocations of contemporary Detroit. Here the plot involves a missing person, but the real subject is urban renewal—how the wrecker's ball destroys not only buildings but also the dreams and very histories of the city's residents.



In Smiley's mystery, a group of friends from the Midwest are shattered when two of their number are murdered in New York. A librarian is among the cast in this urban novel.

Franke, David and Franke, Holly. *Safe Places for the 80's.* Doubleday/Dial, 1984, $19.95. (0-385-27876-4, 83-45187)
Tired of hiding behind a dead bolt? Not only do the Frankes tell you where to find the safest places to live, they also rate them qualitatively. Distances from metropolitan areas are also noted for anyone who fears such withdrawal.

Hayden, Delores. *Redesigning the American Dream: the Future of Housing, Work and Family Life.* Norton, 1984, $17.95. (0-393-01779-6, 83-9339)
Hayden argues forcefully that basic changes need to be made in the design and use of housing. We are no longer a nuclear-family culture, she contends, and housing must reflect the realities of an urban-centered, largely single populace.

Jacobs, Jane. *Cities and the Wealth of Nations: Principles of Economic Life.* Random, 1984, $17.95. (0-394-48047-3, 83-43184)
Renowned urbanologist Jacobs exposes the inflexibility of urban economic theory and proposes a program for the future based on the positive effect that healthy cities can have on the rest of the country.

Louv, Richard. *America II.* Tarcher, 1983, $15.95. (0-87477-241-9, 83-9324)
This study of America's migration to the Sun Belt outlines a chilling scenario: High taxes and crime still ravage the industrial North, while the growth of stultifying planned communities threatens the Southwest.

Schmidt, Peggy. *Making It Big in the City: A Women's Guide to Living, Loving and Working There.* Coward-McCann, 1983, $16.95. (0-698-11228-8, 82-25264)
No subject is too complex for that familiar modern panacea, the how-to book. Fortunately, this one avoids trendiness—e.g., how to mix and match bow ties and jogging shoes—while providing generally solid information on the everyday realities faced by women living in the city.

Smiley, Jane. *Duplicate Keys.* Knopf, 1984, $14.95. (0-394-53065-9, 83-12910)
A thirtyish librarian finds two friends murdered in their New York apartment. Smiley's mystery offers a sensitive look at the much-satirized life of the young urban professional. Yes, Virginia, Yuppies have feelings too. □

***Bill Ott,** who writes this column freelance for* American Libraries, *is books-for-adults editor of ALA's* Booklist *magazine.*

Can Bill Welsh conquer time and space for libraries?

A forthright conversation with the leading force in 20 years of national bibliographic, cooperative, and preservation programs

by Arthur Plotnik

THE MAN FROM THE TINY mining town of Weatherly, Pa., now sits in a government suite with one of the best views on Capitol Hill. From his desk, Deputy Librarian of Congress William J. Welsh looks out on the Capitol Building —where hundreds of millions of dollars have been appropriated over the years for his library programs—and on the original building of the Library of Congress, the ornate Thomas Jefferson Building. Welsh arrived there in 1947, seeking work while awaiting a security clearance for a career in the Foreign Service. He stayed, and the library world is vastly changed because of him.

Now, in the mammoth James Madison Memorial Building, the Library's third and final structure on Capitol Hill, Welsh shares a top-floor wing with Librarian of Congress Daniel Boorstin. Boorstin is the third Librarian with whom Welsh has worked, and the two believe they complement each other perfectly: Boorstin as a creative connection with the Washington leaders and the world beyond the library, spreading the gospel of the Library's achievements and bringing in extraordinary talent; and Welsh translating Boorstin's vision and his own into specific technical programs.

Welsh turned 65 on November 15. For anyone with fixed notions about age, that number would be hard to believe, looking at Welsh and watching him go. He knows a time will come when he should hang it up; but that time is not now, in the early stages of two huge projects to help answer the most staggering questions facing libraries today: what to save, and how to save it.

Thus, Welsh may continue to be a force in national library programs for years. But an interview was timely now in light of his landmark birthday, the honors and praise coming his way in recognition of a distinguished career (see box next page), and the importance of his current technical projects for mass preservation and storage of the nation's library resources.

Welsh contemplating disk of—Homer? *Each of the Library of Congress electronic disks being developed could hold some 300 editions of Homer or 54,000 images of, say, Greek sculpture. Welsh sees his disk project as a hope for overcrowded, deteriorating collections.*

An insuppressibly assertive social creature, Welsh has raised a few brows and hackles in his time. He does not fit the bureaucratic stereotype. His candor during this interview, most would agree, was only typical.

We talked for most of the morning of Monday, October 22. Here's what emerged.

You worked as a library aide at Notre Dame and coordinated library services as a major in the Air Force. Did this lead you to seek library work later?

No, the library sequence was coincidental. When I stopped at the Library of Congress all I wanted was an interim job. I interviewed with Lucile Morsch [then chief of descriptive cataloging], but I couldn't be a cataloger because I had no library degree. I knew German, however, which helped me get a spot in a postwar project for cooperative acquisitions.

Did you ever have second thoughts about not continuing the law training you began before the war?

Never—but someone else did. Early in my career here, I innocently exposed the head of the Law Library for not spending his budget. He was furious—and subsequently adamant that I should finish studying law and join forces with him.

But in the way of training, my major in philosophy at Notre Dame was as important as anything else. Why? Because it helped me think clearly and logically. Imagine explaining, say, why we were acquiring Burmese materials before we had developed our comprehensive acquisitions policies. My predecessor as Processing Department director, John Cronin, was masterful at reducing complex issues to fundamentals. When the Librarian—Luther Evans—asked him about those Burmese acquisitions, Cronin

summed up a whole new approach by declaring: "When we need 'em, we'll have 'em."

Have you ever been hassled, poohpoohed, or treated as an "outsider" because you didn't have a library degree?

I've felt sensitive about it, but I haven't been hassled. Probably when I step down, my replacement should have the degree—or my experience.

Do you consider yourself a librarian?

Yes! After all, I've worked in library acquisitions, cataloging and classification, budgeting and personnel, and I've had more exposure to library practice and policy than most people these last 30 years. I wouldn't mandate an MLS degree for all librarian positions, but we do need some measure of a person's training and preparation.

Should the next Librarian of Congress have a graduate library degree?

That depends on the relationship between the Librarian and the Deputy. If the Deputy has enough expertise in the practice of librarianship to go along with the Librarian's skills in leadership and rapport with the outside world, then the library degree wouldn't be necessary at the top. And Dan Boorstin, by the way, has not been exceeded in this type of rapport.

Did you ever have aspirations to be Librarian of Congress?

I did not.

Why? Wouldn't you have enjoyed that role?

No, I'm not sure I would have. The social responsibilities are so great—serving for this arts center, that literary board, on the embassy trail, and so on. The dealings with Congress are of more interest to me, and I've had no lack of opportunity there. I certainly did aspire to be head of the Processing Department. That seemed to me to be the ultimate in librarianship; I could say something, and it could happen. I could almost predict the results. That's not so easy today.

In many countries your job description would define the "National Librarian," especially as a planner of national bibliographic services. What, besides your title, makes you NOT the National Librarian of the United States?

Nothing. Two-thirds of our activities are to serve the national library community. In fact, I now chair the Conference of Directors of National Libraries.

Then why not create two positions here: The Librarian of Congress, and the National Librarian or Director of the National Library?

It wouldn't gain us a thing. Also, it might raise the old question of whether a national library belongs in the Executive Branch, and if so, how low down? Under the Legislative, we perform more national services and have been more successful with our funding body than any other library in the world.

So it's a cockeyed system that works?

For 184 years so far.

How many times have you represented the Library of Congress abroad—a hundred? Two hundred?

Somewhere in there.

What kind of role do you play? Does it get political?

Consider that the Library carries out some 15,000 exchanges for foreign materials. That's a basis for countries to acquire a lot of information about us and vice versa. We exchange understanding. Also, we set up offices for foreign acquisitions.

We've consistently stayed away from politics. For one thing, we don't acquire any materials specifically for the U.S. intelligence community. Our non-political stance has helped us to maintain programs in unfriendly political environments.

From the Congressional Record:

A U.S. representative shares the Bill Welsh story

by Rep. Vic Fazio of California*

• MR. FAZIO. Mr. Speaker. We all too often fail to recognize the many fine Government officials who give so much of themselves in serving the American people. It was with particular delight that I learned that one of our officials in the legislative branch was honored at commencement exercises at the University of Notre Dame in Notre Dame, Ind., on Sunday, May 20. The Reverend Theodore M. Hesburgh, C.S.C., bestowed an honorary doctor of laws on an alumnus, William J. Welsh, the Deputy Librarian of Congress, for "his imagination and good judgment . . . in this country and abroad as an innovative leader in librarianship."

As chairman of the Subcommittee on Legislative Appropriations, I have come to know and admire Bill for his deep dedication to the Library of Congress and to service to Congress and the Nation.

Bill's service at the Library of Congress dates to 1947 when he joined the staff following service in the U.S. Air Force, being discharged as a major. Bill's career at the Library of Congress has made him one of the top library experts in the world. In 1971, the American Library Association awarded him the Melvil Dewey Award for his imaginative leadership of the Processing Department "which has the most immediate and wide-ranging impact on other libraries of any of the departments of the Library of Congress." In 1976, Daniel J. Boorstin, Librarian of Congress, named him Deputy Librarian of Congress, the second-highest post in the Library of Congress.

As Deputy Librarian of Congress, Bill has become a frequent visitor to our subcommittee and has been a most effective advocate for Library of Congress programs. Bill's wit and keen insight have made it a pleasure to work with him.

In the last several years, Bill has devoted tremendous energy to preservation programs designed to preserve the vast storehouse of knowledge at the Library of Congress and other libraries in the United States. He has been in the forefront of the application of optical disk technology to library services and to the storage of knowledge. In 1983, he was awarded the Library of Congress' highest award, the Distinguished Service Award, for these efforts and others in behalf of the Library.

He has served in numerous positions of importance for the American Library Association, the Association of Research Libraries, the International Federation of Library Associations and Institutions, the National Library of Medicine, and the National Commission on Libraries and Information Science.

Bill's vitae establishes him as a leading U.S. librarian, but even more important are his warm human qualities as an administrator and his wide popularity with Library staff. If you travel with Bill through Library of Congress buildings, you are struck by his friendliness and his vast circle of friends on the staff.

I commend Father Hesburgh and the University of Notre Dame for bestowing this high honor on such a devoted and talented public servant. •

*Tribute published in the May 21, 1984, *Congressional Record—Extension of Remarks*, E2297.

Weren't some past projects at the Library funded by the CIA—the Monthly Index of Russian Accessions, for example?

Yes, a couple were covertly supported by the CIA. I found out no sooner than everyone else.

What was your most enlightening experience abroad?

A 1979 trip to China was one of the most exhilarating experiences of my life —and a follow-up this spring. The Chinese paid the way, eager to hear our approaches. I learned that China was not Westernizing, but modernizing in their own way. The openness of our discussions on the Cultural Revolution was astounding—how China lost 10 years' worth of trained staff, training that will take another 10 years to replace.

You've sat through thousands of meetings on networking and cooperation. What really counts when it comes to getting cooperative projects going? And how have you endured those meetings?

It takes a lot of patience, which I don't always have. People seem to need a period of hard times before they'll contribute to cooperation and actually give something up. The RLG [Research Library Group] initiative is the beacon of modern cooperation, allowing for libraries—even the Library of Congress!—to accept another institution's cataloging.

John Cronin brought it down to basics once again in launching early cooperative programs. "Let's find out what we're doing alike," he said, "rather than what we're doing differently."

Recognizing the importance of authority work in cooperative cataloging has been another leap forward. OCLC has finally accepted it. I wish we could bridge all the differences between OCLC and RLG, but we're doing better now.

Some people say that the Library of Congress itself is the hitch in building a better library world. How do you feel when the Mitch Freedmans or the Sanford Bermans knock the Library in print or at ALA conferences?

It ticks me off! I'm more understanding of the Bermans, because I appreciate his purpose [reform of subject-heading language] if not always his judgment. But with some others, especially those who have experienced the problems of bigness, I have less patience. We need critics to keep us honest, but I prefer the constructive style, similar to, say, Pauline Cochrane's. You have to accept criticism. It's the style that's aggravating.

Above, Welsh with Vice Premier Fang Yi on "exhilarating" tour of China. Below, LC's "complementary" leaders—Welsh and Librarian Daniel Boorstin—share ceremonial cake.

What else bums you out?

Lack of imagination . . . negative personality. A negative approach to life —and no sense of humor. I feel sorry for those types; they can't survive.

Also, managers and would-be leaders who are not people-oriented. I try to make every last staff member feel a part of the institution—even to the extent of backing a staff golf tournament to get people at ease with each other.

(Continued next page.)

That's right—I understand you're a golfer. What's your handicap?

Playing golf is my handicap. But talking about leadership qualities—we've got a crisis in leadership in this country from the top down. It's becoming more and more onerous to be a manager; there are fewer benefits from it. And there are fewer people with the imagination and creativity to run libraries.

What's the most frustrating aspect of managing here?

For me it's been the affirmative action effort. It goes without saying that we must provide equal opportunities for women and minorities. Yet it's so difficult to implement, made more so by the confusion between goals and quotas, philosophical differences, and the challenges of recruitment and motivation for people who start out behind the pack.

What's the answer to the leadership crisis?

Again, we need to track the best people, give them opportunities, and motivate them. The Council on Library Resources has taken one initiative in its program to identify good people at the second level in the hierarchy and prepare them for top jobs. And young people with potential need opportunities like the Intern Program at the Library and the CLR Intern Program.

Unions?

Not as helpful as they might be. I was one of the people who established the labor-management approach here. But unions could be more constructive, especially in their testimony before Congress. Still, this is the right approach; the employees need representation.

The professional library association—ALA. You've served ALA as a councilor, on many committees, and you've won its highest technical services award. But now tell us: Is ALA as effective as it could be?

My council stint [1978 – 82] was a little frustrating. I think ALA is most effective as a forum for exchange of ideas. The politics have sometimes been less than productive. My experience in discussion groups like the Big Heads [Technical Services Directors of Large Research Libraries] has been more rewarding. That size gathering is small enough for good exchange. What I always enjoy most is corridor talk, getting to know people.

Coffee break and videodisks

Bill Welsh addresses innumerable groups in ALA and other associations, usually opening with a wisecrack and answering the scattered laughter with a "Thank you, Mother." He donates his honorariums to various funds, including the now-completed Campaign to Get a Respectable Set of China for Office Use. We drink coffee out of that handsome, gilded china now, and turn to some topics that are clearly dear to his heart.

Asked "Who is Bill Welsh outside the library world?" he produces a photo of a cabin on a pond and describes his beloved country retreat: 17 acres in Maryland, with horse, that he and his family share. He and his wife Winifred have two sons, Jim and Doug, and one grandchild. He reads every night—often escape fiction à la Ludlum and L'Amour to balance the briefcase full of work he brings home. And does he draw strength from Higher Sources? "Yes, I'm a believer. With a brother who's a bishop [of Allentown, Pa.], I'd better be."

When the inevitable question was asked—the greatest satisfactions of your career—Welsh was ready: he had a list. Among its items:

- Closing the Library's main card catalog. "Many libraries didn't know why we were automating; it was to get rid of card-catalog maintenance."
- Selecting and motivating outstanding staff, including support of the Library's 38-year-old Intern Program for training potential leaders. "Its future is always uncertain because people consider it an elite group—and I've always said it's exactly that and I'm very high on it."
- An incentive awards program, executive discussion sessions, division chiefs' luncheons, and other activities he has launched or expanded to improve motivation and communication in the library.
- A Foundation Library Committee, developed to advise the nine top foundations on needed support for libraries.
- And a newly funded $81 million program to renovate the two older Library buildings.

But Welsh believes the two most gratifying achievements of his career might be the two great mass-conservation projects now underway.

Both have been described briefly in *American Libraries* (July/August 1982, p. 476 ff., and updates), but have advanced considerably this year:

- Congress has authorized $11.5 million to launch a mass deacidification facility in Ft. Detrick, Md. There, some half-million volumes a year will be treated with diethyl zinc vapor in twin vacuum chambers to extend their lives hundreds of years.
- The optical-disk pilot program—to explore the feasibility of storing pictorial and textual material on ultra-compact analog and digital disks—has already proved that the idea is technically feasible.

> "We've got a crisis in leadership . . . there are fewer people with the imagination and creativity to run libraries."

An analog video player in the Prints and Photographs Reading Room can be used by the public to call up selected images from the P&P collections—stored up to 54,000 to the disk. And in the inner sanctum of the Library's Automation Systems Office stands a 15-square-foot electronic "jukebox" that stores in digital form the equivalent of one million pages of printed text. Engineers expect that the storage capacity can soon be quadrupled.

The jukebox "plays" on demand any part of the 100 disks it holds. Each disk stores about 300 books. The digital information can be sent to remote terminals. If and when the rights and permissions are worked out with participating publishers, the disk system could figure big in the future of publishing and libraries.

We asked some questions:

What's all this going to cost?

We don't know all the costs yet; but whatever, they have to be measured against the alternatives. You can look at the jukeboxes as a fourth-building concept for the Library. We're never going to get another building on the Hill, so what will we do with the 10 new items coming into the collections every *minute* of every work day? Can we save everything? Should we? Because you acquire something, do you have to keep it?

The jukebox is the best technology we have today for compact storage and retrieval. It offers random access. It's interdepartmental in organization. It seems permanent as a storage medium, and makes perfect copies. You can enhance the image. An item can be shared simultaneously, remotely. It puts an end to the not-on-shelf problem forever. We're using compact digital disks for audio as well;

there are no limits to the range of original music that can be stored.

You sound pretty serious about this project.

People just don't realize how serious the problem is. The way libraries grow, if the Alexandrian Library hadn't burned down in 47 B.C., today every inch of Egypt would be the Alexandria Public Library.

So what should be saved?

No one can agree. Not even Mortimer Adler could figure it out when we discussed it during his visit here. But the decisions must be made. It costs $35 to $100 to microfilm a volume. Some 23 percent of our collections are already brittle. We can no longer afford a total Planned Deterioration Program—doing nothing. When an item comes into the library, we're going to have to decide right then how long should we keep it, and in what format?

The proprietor of a commercial preservation process called Wei T'o claims that Wei T'o is simpler and cheaper than your mass deacidification technique. What's your response?

Yes, Dick Smith peppered the Congress with complaints to that effect; we've issued papers in response, and we convinced Congress that our method was preferable for our particular needs. In doing so, we sharpened our look at both processes, and in fact we do use Wei T'o for some work.*

How have the bibliographic utilities changed the role of the Library?

They've gotten us out of the business of selling catalog cards. In 1968 we sold some 79 million cards. Now it's down to about 11.5 million a year.

Has the Library made some big mistakes?

I'd say that at least our biggest misjudgment was underestimating the cost of automation. Way back when a consultant predicted the cost of an automated systems approach, we thought it was beyond our means. Later, we went ahead, not realizing that even the first cost predictions were greatly underestimated. The costs of software and maintenance just explode the totals.

If you had it to do all over again, what would you have done differently?

I'm pretty happy with the way things have come out. Some programs could stand re-evaluation; but when I've identified a project I felt was needed, I've had the courage to follow it through. I've helped establish the Library's integrity in Congress. I've turned human concern with our staff into a level of productivity that still surprises me.

I wonder who'll replace you when the time comes.

Ah well . . ., I guess it'll be someone younger and more vigorous.

More vigorous? Are you kidding?

Okay—strike "more vigorous." □

*A House of Representatives Report (98-938) to accompany H.R. 5607 gives the Library's argument against non-aqueous and aqueous liquid techniques for mass deacidification, "which are known to cause transfer of certain inks, dyes, and other soluble materials between pages and between books. . . . this problem could lead to very difficult pre-selection workloads and damage to materials that were not selected out."

DUKANE'S UNIVERSAL

Performance and Economy In a Roll Film Reader

Dukane's Model 27A66 (Universal) is engineered for your convenience

Please be seated and enjoy these Model 27A66 benefits: quality optics and controlled illumination to give desired eye comfort . . . highly visible instructions to make operation easy, even for the first time user . . . film handling, loading and all controls conveniently reached from the viewing position . . . eye-level screen for comfortable viewing.

The 27A66 projects 35mm and 16mm roll film with either manual or motorized film drives. It also offers the option of projecting microfiche or aperture cards.

Next to its tasteful styling and troublefree performance, the economical price and minimal operating costs are appealing, too! Covered by Dukane's one-year warranty on parts and labor. UL approved.

For added information, contact us or your local authorized Dukane micrographics dealer.

Comestibles, Conveniences and Curiosities

in the Midwinter Meeting area of Washington, D.C.

By Diane E. Nester, David Kresh, and Stephen Paul Davis,
with menu consultants Linda Jarschauer Johnson and Thompson Yee

Editor's note. The authors are on the editorial staff of the Library of Congress Professional Association's LCPA Newsletter, *the highly unofficial "insider's" guide to LC. This unique publication deciphers LC policies, practices, and events for LC staff and adds a bit of levity to life on the Hill with such features as "The Adventures of Bulldog Hammer, Hard-Boiled Reference Librarian," and "Ms. L.C. Conduct," for the etiquette-conscious.* AL *asked the staff to unleash their investigatory powers and wit on the Midwinter Meeting area; they came up with this guide for our readers. Menu consultants Johnson and Yee are also LC staff members.*

Comestibles

Most of the restaurants listed below honor all major credit cards and do not have a dress code. If nothing appeals to you, however, don't despair. Escape is possible via Metro's Red Line, with stops conveniently located near the conference area at Woodley Place and Connecticut Ave., and at 24th and Connecticut.

Baron's Gourmet Delly (2643 Connecticut). Inexpensive. A luncheonette-style New York deli where transplanted natives can sample the best in potato pancakes, matzo ball soup, kishka (served hot), knishes, noodle kugel, and blintzes. Top off your meal with an egg cream (according to a source close to the authors, an egg cream has neither egg nor cream). The restaurant also boldly offers "just a little bit of Italia" with subs, homemade pizza, spaghetti, and lasagna. Carry-out hot meals are available. Breakfast served all day. *(See photo next page.)*

David Lee's (2661 Connecticut). Moderate. If you like Chinese, why not fill up on some excellent Mandarin food prepared without monosodium glutamate (the culprit of the "bloat/headache/still hungry" syndrome). David Lee's is highly recommended for its Szechuan-leaning cuisine, generous servings, fresh ingredients, restful atmosphere, good service, and penetrating fortune cookies. All dishes may be prepared without MSG on request. Full bar, reservations recommended.

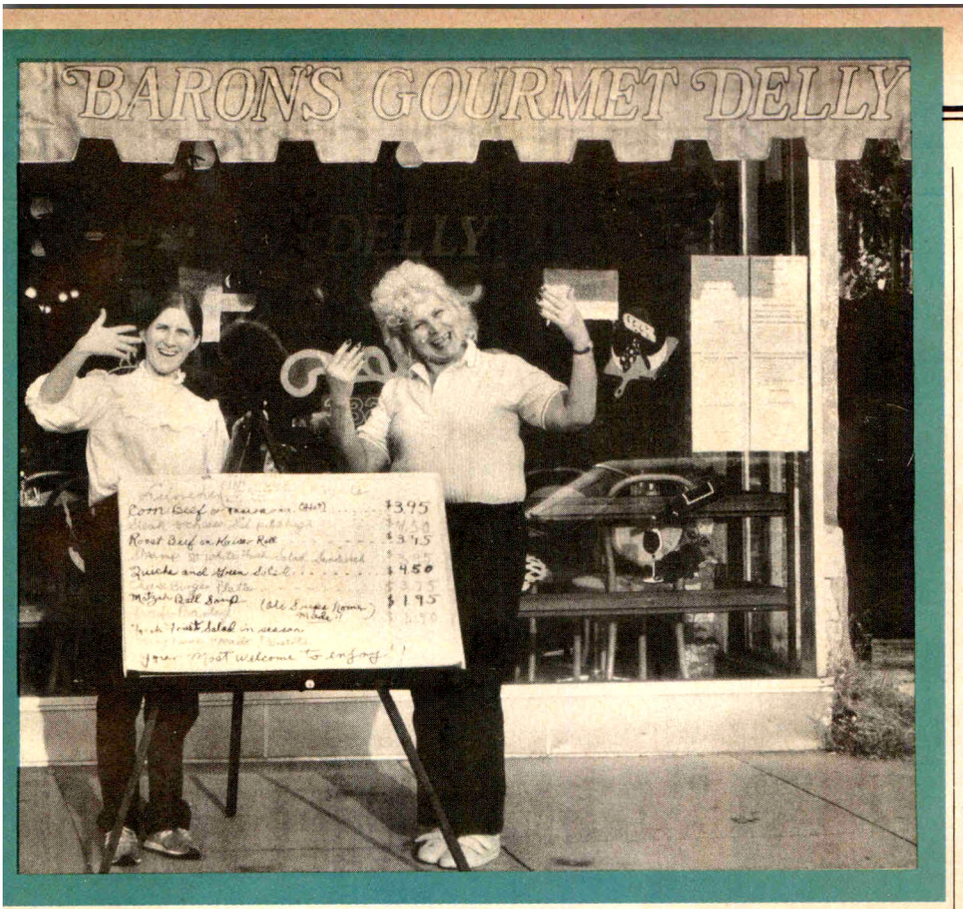
Park Place Cafe (2651 Connecticut). Moderate. The owners declare this cozy spot to be a "French Restaurant" on the awning. We prefer "french-i-fied." Sunday brunch, featuring homemade biscuits and blintzes, is recommended. Caffeine-free espresso and Viennese cappucino are available. Complimentary wine tasting every evening after 6. Live local jazz Friday and Saturday evenings.

Pettito's (2653 Connecticut). Moderate. Reservations suggested. "No man is lonely while eating spaghetti . . . it requires too much attention"; however, don't expect pasta with your meal unless you order it. Good food in an unoppressively elegant atmosphere, and the couple at the next table may be discussing Sweden's contribution to the defense of the Western alliance. Be sure to try the homemade tortoni.

Rajaji (2603 Connecticut). Moderate. Pleasant, relaxed dining, not for the faint of palate at this Indian restaurant. It's your choice whether to go "hot" or "mild," but be prepared for the "hot." Not as "Anna-and-the-King-of-Siam"-ish or as expensive as its neighbor the **Tandoor.** The varied menu includes tandoori (meat or seafood cooked in a clay oven) and both vegetarian and carnivore curries. Goat Masala (it tastes a little like tough pot roast) and the 22-oz. Golden Eagle Indian beer are recommended.

Thai Taste (2606 Connecticut). Inexpensive to moderate. These dishes are spiced to taste so let your tastebuds be your guide. Try dining with a group: order several dishes (seafood, poultry, noodle, or vegetarian) and eat Chinese-style. If Suchat (a.k.a. Stan) is your waiter, be sure to take his advice. Cool off with a bottle of Thai beer (Singha).

Trumpet's (2655 Connecticut). Moderate. "Let the trumpets blare . . . strike up the band." This place is reminiscent of a Mickey Rooney-Judy Garland movie: "Hey kids, if we work real hard, we can run a restaurant!" In an art deco-style dining room, the usual bar/restaurant fare is offered—salads, omelettes, zucchini strips, and burgers with a twist, e.g. a garlic burger (accompanied by a breath mint) and a Maui burger with slices of pineapple and swiss cheese (accompanied by an Alka Seltzer). The restaurant gets an "A" for effort if only because the glass-topped tables are Windexed between seatings. A live piano man plays standards Tuesday through Saturday.



Waitress and proprietor (rt.) invite ALAers to Baron's Gourmet Delly.

Tucson Cantina (2605 Connecticut). Inexpensive. Okay, so you have a craving for Tex-Mex and are fairly bursting for a burrito. You will find the portions plentiful and the food heavy on the heavy side with a taste you will keep tasting long after you have departed. Better to skip the restaurant entirely and move straight to the **Lord Telford Pub,** located in the rear of the Cantina, where you can toss a few darts and hoist a few Carta Blancas.

Conveniences

Debonair Cleaners (2612 Connecticut). One-hour special, shoe repair, cleaning, and tailoring.

Peoples Drug (2616 Connecticut).

Woodley Photo (2627 Connecticut). Instant passport pics, camera repairs, developing.

Sherry's (2600 Connecticut). "We chill any bottle of wine in minutes." Liquor (free delivery), cigarettes, postcards, maps, film, rolling papers, munchies, DC lottery tickets, and mittens in case you left yours at home.

The Perfect Touch (2601 Connecticut). Souvenirs of your visit to Washington—tin ashtrays, plates, polyhedral paperweights encasing monuments, "Politicards."

Moda Beauty Salon (2309 Calvert St.). Monthly style specials—in October the Jheri (Ferraro?) curl was $70.

Curiosities

Book Market (2603 Connecticut). Old mags, Harlequin Romances, used records ("Christmas with Glen Campbell," "Glamorous Holiday" with Jean Houben at the organ), a deaccessioned book from a local PL branch. Heavy on social science (a 1948 symposium on the Kinsey Report, *The Decline of the American Male).* Some old reference books (1966 *PDR,* 1976 *CIS Index,* July-September 1975 LC subject catalog). Armed services editions and pulps. They take any book in trade if physically saleable and give you a credit voucher for half the expected sale price.

Baskin-Robbins (Hand Packed) Ice Cream (2604 Connecticut). Quarterback Crunch, Mississippi Mudd, Gold Medal Ribbon, Almond Bon Bon—need we say more? Diet flavors available at 90 calories a scoop.

"I Am" Temple (2307 Calvert St.). If "I Am" happens to be your thing.

Mrs. Dixon (2647 Connecticut). Marriage counselor, reader-advisor (no relation to the reference tool), ESP.

Marilyn Monroe Mural (Connecticut). She's hard to miss.

Sherry's South Window. A beer-can display featuring lots of Olde Frothingslosh (depicting Miss Olde Frothingslosh), Zodiac Malt Liquor, Utica Club Cream Ale, Stite (since 1847), and Topper.

William H. Taft Memorial Bridge. Walk across this bridge to get to the other side and check out the politically inspired graffiti and, before they crumble, the Roland Hinton Perry sculpted lions. LC trivia buffs should note that Edward P. Casey, supervising architect for the Thomas Jefferson building, was the consulting architect for this bridge.

National Zoological Park (3001 Connecticut). Lions and tigers and bears, oh my—and a short hike or Metro ride from the conference area.

Added Attraction

Walking Tour of Adams Morgan District. Conferees will have missed an enjoyable experience if they neglect to stroll through the nearby Adams Morgan shopping and residential area, a ten-minute walk from the convention hotels (east on Calvert St. over the bridge, and north on Columbia Rd.). This is one of the few really user-friendly areas of D.C. and is full of good restaurants, small cafes, and interesting shops. Do yourself a favor and stop by **Noteworthy** (card shop), **Home Rule** (health food store), **Home Works** (art deco *objets),* **Endangered Species** (antique housewares), **Brass Knob** (architectural antiques), **Blue Moon** (costumes and unusual gifts), **Editorial El Mundo** (U.S. and foreign newspapers), **De Gustibus Cafe and Wine Bar, Cafe Lautrec, New Orleans Cafe, Mr. Henry's** restaurant (Jazz and entertainment on weekend evenings), and **La Plaza** restaurant (Spanish/Mexican cuisine—highly recommended). And don't forget to wander up and down the side streets to check out the wonderful old townhouses. □

1985 ALA Midwinter Meeting

January 5 – 10, Washington, D.C.

Council agenda and other highlights of the mid-year meeting

ALA Council meetings

Sunday, Jan. 6, 9 a.m. – 12:30 p.m.
Monday, Jan. 7, 9 – 11 a.m.
Tuesday, Jan. 8, 9 – 11 a.m.
Wednesday, Jan. 9, 9:30 a.m. – 12:30 p.m.
Presiding: E. J. Josey, president, and Beverly P. Lynch, president-elect
Secretary of the Council: Robert Wedgeworth, executive director.
Parliamentarian: Russell F. Anderson

Council orientation

Sunday, 9 – 11:15 a.m.
Coffee
Introductions
Welcoming Remarks—Gloria J. Coles, chair, Council Orientation Committee
Orientation—The Underlying Political Process
Skit

Council and Executive Board information meeting

Sunday, 11:30 a.m. – 12:30 p.m.

The Council/Executive Board information meeting (called under ALA Policy 5.6.2) focuses on essential Association business before the Council at this meeting.

Freedom and Equality of Access to Information Commission Report
Professionalism issues
ALA-AASL discussions
Executive Director search

Council I (Monday)

Adoption of the Rules (*action*) —E.J. Josey
Establishment of the Agenda (*action*) —E.J. Josey
(*New items may be introduced here*)
Approval of 1984 Annual Conference Minutes (*action*)—E.J. Josey
President's Report—E.J. Josey
Treasurer's Report—Patricia G. Schuman
Announcement of Appointments Committee/Executive Board Appointments to 1984/85 ALA Nominating Committee (*information*)—Beverly P. Lynch, chair, Appointments Committee
Council Committee on Committees Report: Nominations for Executive Board Election (*action*)—Beverly P. Lynch, chair
Appointment of Tellers —E.J. Josey
ALA Nominating Committee Report (*information*)—Thomas A. Alford, chair
(See *AL*, Nov. p. 734 – 35)
Policy Monitoring Committee Report (*action*)—Norman Horrocks, chair
Implementation of ALA Conference Council Resolutions (*information*)

Executive Board candidates forum

At the 1984 ALA Midwinter Meeting, Council voted that time be held after the first Council Meeting when Executive Board nominees are established for the purpose of eliciting their views to assist Councilors in voting. The formal meeting will adjourn at 10:30 a.m. to provide time for this Forum. (Balloting will commence at 3 p.m., Monday, Jan. 7; balloting will close at 4 p.m., Tuesday, Jan. 8. Tellers will count at 4:15 p.m., Jan. 8, and report results at Council III.)

Council II (Tuesday)

ALA Strategic Long-Range Planning and Management Accountability Program —Brooke Sheldon, chair, Process Planning Group
Program Evaluation and Support Committee Follow-up Report—Barbara Markuson, chair
Constitution and Bylaws Committee—Ernest DiMattia, chair
Executive Director's Report (including follow-up on Council Resolution on Trade Publishers Discounts)—Robert Wedgeworth

Council III (Wednesday)

Intellectual Freedom Committee Report—Eric Moon, chair
Organization Committee Report—Samuel Morrison, chair
Legislation Committee Report—Ching-chih Chen, chair
Council Committee on Minorities Concerns—Mary Biblo, chair
Bibliographic Data Bases Task Force: Progress Report—David Laird, chair
Teller's Report

Hotel Reservations

The September issue of *American Libraries* carried hotel and general information on the Midwinter Meeting. Although the official cut-off date for reservations is Dec. 5, the reservation form in that issue may still be used. Late housing assignments will be made on the basis of availability and not necessarily at the published rates.

Membership, Subscription and Order Services

Personnel from the ALA Membership, Subscription, and Order Services Office will be on duty in the ALA registration area in the Sheraton Washington Hotel to handle any questions or problems concerning memberships and subscriptions. Please bring along such related items as correspondence and purchase orders. Payment of 1985 membership dues can also be made at that desk.

Placement

Placement service will be provided by the ALA Office for Library Personnel Resources in the Shoreham Hotel. Hours of operation are: Saturday, Jan. 5, 12 noon – 5 p.m.; Sunday, Jan. 6, and Monday, Jan. 7, 9 a.m. – 5 p.m.; Tuesday, Jan. 8, 9 a.m. – 2 p.m. The deadline for preregistration for placement service is Dec. 18. Indicate if you are an applicant or employer.

Shuttle bus

Shuttle-bus service will be provided free for four days of the Midwinter week, beginning on Saturday, Jan. 5, and ending on Tuesday, Jan. 8. The shuttle loop, starting and ending at the Sheraton Washington Hotel, includes the Dupont Plaza Hotel, Mayflower Hotel, and the Ramada Renaissance Hotel. A detailed schedule will be available at the ALA registration desk after opening on Friday, Jan. 4.

LC Information Place

Midwinter attendees can again enjoy the LC Information Place—an informal reception center for visiting librarians and other professionals—on Monday through Wednesday, Jan. 7 – 9, from 10 a.m. to 2 p.m. each day. The Information Place will provide visitors with tours, computer and optical disk demonstrations, special ap-

(Continued on p. 776.)

NOW
ONLINE ACCESS TO THE WILSON INDEXES
WILSONLINE℠

Now, after years of planning, testing, and refinement, The H.W. Wilson Company announces WILSONLINE, an online retrieval service offering access to the Wilson indexes.

WILSONLINE is the first and only online system developed that meets the Wilson standards of:

Quality
Currency
Ease of use
Affordability

WILSONLINE is priced to make it affordable for more libraries than any other comparable online service. The Wilson Company's commitment to fair pricing ensures that WILSONLINE will rapidly become an indispensible reference tool in libraries throughout the world.

User-friendly WILSONLINE features

WILSONLINE is designed to meet the needs of a wide range of users. A novice can quickly master the basic commands to conduct a successful search, while experienced searchers can take full advantage of WILSONLINE's more sophisticated features to get the most out of the databases in the shortest amount of time.

- *Current*—WILSONLINE databases are updated as often as necessary—at least twice weekly.
- *Compatible with all types of terminals*—WILSONLINE can be accessed with any standard ASCII computer terminal. If you are using an online retrieval service now, you can access WILSONLINE with your existing equipment.
- *Up to 43 different access points to bibliographic records.*
- *Multi-file searching*—allows searching of up to eight Wilson databases simultaneously.
- *Automatic switching to preferred headings.*
- *Free text as well as controlled vocabulary* information retrieval.
- *Online thesaurus* of all subject headings that helps expand or refine your search.
- *Neighboring (browsing)*—for searching alphabetically related terms.
- *Truncation*—allows searching through word stems or roots.
- *Ranging*—limits searches to a particular range or span of dates, covering a specific period of publication.
- *Boolean operators (AND, OR, AND NOT)*—allow users to broaden or narrow searches.
- *Rename*—users can substitute their own terminology for names of WILSONLINE commands and logical operators.
- *Save/Savesearch*—searches can be saved for use in another database or at another time.
- *Offline printing*—up to 1,500 citations per search can be printed offline in all print formats, with a variety of sorting options.
- *Ease of access*—WILSONLINE is available through TYMNET or TELENET (a local phone call in most cities).

We make it easy for you to use WILSONLINE

The Wilson Company provides several user aids that clearly explain WILSONLINE benefits and search procedures.

- *Online help command*—a menu of common situations faced by searchers using WILSONLINE with detailed explanations of their solutions.
- *Online explain messages*—users can request detailed explanations for each system command, message, and feature.
- *Quick Reference Guide*—a one-place look-up summarizing system commands and features.
- *WILSONLINE Guide & Documentation*—a complete user's manual describing search procedures and databases in detail.
- *A WILSONLINE training program* offered at regional sessions throughout the U.S.
- *A toll-free phone number*—a professional searcher will be available to answer your questions if you need help while searching.
- *Accessibility*—WILSONLINE is available Monday, 7:00 A.M. through Sunday 7:00 A.M., except 3:00 A.M. to 5:00 A.M. each morning. (Eastern Standard Time).

WILSONLINE Databases

The records in the WILSONLINE databases contain the same information as the Wilson Company's printed indexes, as well as additional features which enhance retrieval. Articles are indexed by professional librarians and specialists in the subject areas covered by each database. Each database provides at least one year of indexing coverage.

Available now

The following Wilson databases are available now for online searching:

Applied Science & Technology Index
Biological & Agricultural Index
Book Review Digest
Business Periodicals Index
Cumulative Book Index
Education Index
Index to Legal Periodicals
Readers' Guide to Periodical Literature
Journal Directory
Publishers Directory
Name Authority File
LC MARC File

Available in 1985

Other Wilson indexes, listed below, will become available for online searching in 1985.

Humanities Index (February 1985)
Social Sciences Index (February 1985)
General Science Index (May 1985)
Biography Index (July 1985)
Art Index (October 1985)
Library Literature (October 1985)
Bibliographic Index (November 1985)

How to open your WILSONLINE account

To receive a Rate Schedule and Order Form with complete information on WILSONLINE subscription rates, rates for non-subscribers, and prices for training sessions, offline printing, telecommunication access, and *WILSONLINE Guide & Documentation*, and a brochure describing WILSONLINE service in depth, please call the Wilson Customer Service Department, toll free, 1-800-367-6770 (In New York State, call 1-800-462-6060).

Midwinter schedule (cont'd. from p. 773.)

pointments with LC staff, coffee, and conversation. It is located in the James Madison Memorial Building, 101 Independence Avenue, S.E., Room 139.

Child care

ALA will reimburse to any *registered* parent the charges expended on child care for each day of the Midwinter Meeting, Jan. 5 – 10. This covers only child care in the parent's hotel room or other residence in the Midwinter Meeting city and does not include charges for children's food or transportation, or transportation or gratuity for the sitter or service. Parents may contact their hotel child care center/baby sitting service where it is available, or select one from the classified telephone directory.

Reimbursement forms, available at the ALA registration desk, must be signed by the individual performing the child care services and presented by the parent to the ALA registration desk before noon on Wednesday, Jan. 9.

Message center

ALA will operate a message center for exhibitors and attendees in the ALA registration lobby of the Sheraton Washington Hotel 9 a.m. – 5 p.m., Friday, Jan. 4, through Tuesday, Jan. 8, and 9 a.m. – 1 p.m. on Wednesday, Jan. 9. The on-site telephone number is 202-328-2000, extension 2586. Midwinter attendees and exhibitors whose offices will need to reach them during the Midwinter week can use the above number. Staff members will take only "leave-word" messages for posting in the message center.

Exhibits

Exhibit hours are: Saturday, Jan. 5, 4 – 7 p.m. (official opening at 4 p.m.); Sunday and Monday, Jan. 6 and 7, 11 a.m. – 5 p.m.; Tuesday, Jan. 8, 11 a.m. – 2 p.m.

President's Program

The President's Program is being held on Monday, Jan. 7, 2 – 4 p.m. In keeping with ALA President E.J. Josey's theme, "Forging Coalitions for the Public Good," the program will feature Arthur Curley, deputy director of the New York Public Library Research Libraries, speaking on "Libraries and the Public Good"; Mary Hatwood Futrell, president of the National Education Association, speaking on "Library Service to Minorities and the Public Good"; and Winn Newman, attorney in the landmark *AFSCME* v. *State of Washington* case, speaking on "Pay Equity and the Public Good."

—Conference Arrangement Office

Training courses offered at Midwinter Meeting

The Association of College and Research Libraries will sponsor four continuing education courses at Midwinter Meeting Jan. 3 and 4. For details on the courses covering job training, improving job performance, teaching how to teach science reference materials, and writing and publishing journal articles, call Gail Russell, ACRL Continuing Education director, at Headquarters.

- More than 200 volunteer discussion leaders and reporters are expected to attend the President's Program Training Session at 2 p.m. Jan. 6. The volunteers will learn how to lead small discussion groups at President E. J. Josey's forthcoming Annual Conference program on the theme "Forging Coalitions for the Public Good." Carla J. Stoffle chairs the committee in charge.
- The Continuing Library Education Network and Exchange (CLENE) will again sponsor free counseling on continuing education and staff development programs during Midwinter.

The one-to-one tutorials offer providers of continuing education and staff development personnel an opportunity to review projects, discuss proposed plans, try out new ideas, or receive advice or feedback from experienced continuing education and staff development professionals.

To participate in a tutorial, call Thomas J. Hehman, continuing education consultant at the Virginia State Library, 804-786-2975, before Dec. 15.

Reports, discussions and a copyright database hearing

- The Library of Congress will present the first in a series of Midwinter Meeting and Annual Conference reports to Resources and Technical Services Division members on Saturday, Jan. 5, 2 – 4 p.m. The session was scheduled at the request of members who miss the LC report given at the earlier meeting of Technical Services Directors of Large Research Libraries.
- The ALA Committee on Accreditation will hold an open meeting Sunday, Jan. 6, at 8 p.m. to report on the ALA/COA project designed to involve a variety of associations in the accreditation process. The project has been funded by the U.S. Department of Education under the Higher Education Act Title II-B.

The public is invited to express concerns and raise questions about the accreditation of graduate library and information science programs. The meeting will take place in the Dover Room of the Sheraton Washington Hotel.

Presidential candidates debate

ALA presidential candidates Donald Sager, Regina Minudri, Alphonse Trezza, and any new petition candidates will participate in the Social Responsibilities Round Table Presidential Forum Saturday evening, Jan. 5, at 8 p.m.

The candidates will also address the presidential forum sponsored by the Association for Library Service to Children, the American Association of School Librarians, and the Young Adult Services Division Sunday evening, Jan. 7, at 8 p.m.

The candidates have also been invited to speak at the ALA Chapter Conclave Tuesday, Jan. 8, at 2 p.m.

Midwinter show boasts 330 booths

Last year's record number of Midwinter exhibit booths has been exceeded by 15 percent, with 330 booths selling out to 225 firms. The show will feature the full range of library services and products, from books to bytes. The ALA Store, a smash success in its debut at Annual Conference, will make its second appearance, offering ALA publications, library-symbol items, and other library merchandise. Admission to the exhibits, which run Saturday evening to Tuesday afternoon, is limited to Midwinter registrants and those who requested a free exhibits pass in advance from ALA Headquarters.

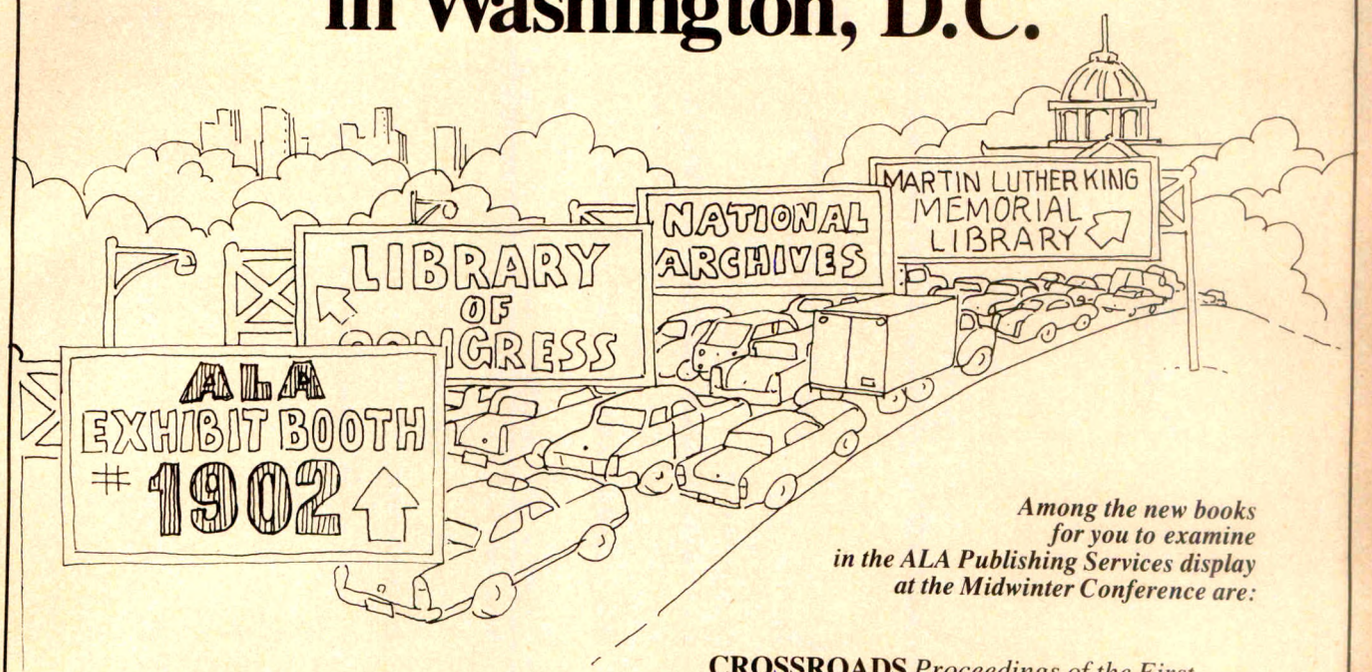
Discount on ALA publications

Visitors to the Midwinter exhibits can purchase new or backlisted ALA publications at 20 percent off the regular price. The special convention discount on publications will be offered at the ALA Store. Among titles available will be the new *Exciting, funny, scary, short, different, and sad books kids like about animals, science, sports, families, songs, and other things*, by Laverne Carroll and Mary Meacham; also, the first two titles in a new Library and Information Technology Series, a new edition of Thomas Hart's *Instruction in School Library Media Center Use, K – 12*, plus more practical aids.

Free publishing workshop

The ALA Publishing Committee will present a workshop 9 – 11 a.m. Jan. 6 at the Shoreham Hotel for anyone interested in the Association's publishing program. The workshop is especially geared for members of divisional publishing committees and published and potential ALA authors. ALA Publishing Director Gary Facente offers an overview. □

Where to find important reading in Washington, D.C.



Among the new books for you to examine in the ALA Publishing Services display at the Midwinter Conference are:

THE FIRST FREEDOM TODAY
Critical Issues Relating to Censorship and to Intellectual Freedom edited by **Robert B. Downs** and **Ralph E. McCoy**
Provides an informative overview of the debate on the threat to freedom of expression from emerging conservative groups for concerned readers, viewers, listeners, writers, and you, the professionals who serve them.
$40.00cl. xv, 341p. 0-8389-0412-2 Sept. 1984

RESEARCH FOR DECISION MAKING
Methods for Librarians by **Robert Swisher** and **Charles R. McClure**
Action research helps librarians make sound decisions. The book explains how to identify appropriate decision areas for study and how to design an action research project.
$25.00cl. xv, 209p. 0-8389-0398-3
Sept. 1984

NATIONAL PLANNING FOR LIBRARY SERVICE, 1935-1975 by **R. Kathleen Molz**
This analysis of why planning evolved as it did shows today's planners how to approach similar library and related public policy issues.
$15.00pbk. 112p. 0-8389-0422-X Dec. 1984

CROSSROADS *Proceedings of the First National Conference of the Library and Information Technology Association, September 1983* edited by **Michael Gorman**
41 research and progress reports on pilot programs in library automation and the implications of information technology for traditional library functions. First title in the new Library and Information Technology Series.
$40.00pbk. x, 262p. 0-8389-3307-6
Oct. 1984

INSTRUCTION IN SCHOOL LIBRARY MEDIA CENTER USE (K-12)
by **Thomas L. Hart**
A comprehensive guide to hundreds of instructional activities, games, tests, microcomputer software modules, AV materials, instructional strategies, and other sources helpful in encouraging school library media center use by students.
$12.50pbk. 288p. 0-8389-0418-1 Nov. 1984

All the above available for purchase at the ALA Store next door!
Sure to be as popular in Washington as it was in Dallas. Come early for books, posters, and library logo items.

SOME THINGS OUR COMPETITION DOESN'T SAY ABOUT US.

(AND WE DON'T BLAME THEM.)

Everybody is talking about our Tandem-based ALIS III system.

Even our competition.

But we'd be surprised if they were telling you everything.

For example, have they mentioned that ALIS III has more powerful built-in design features than any other software?

Or told you how those features can save you time and money, and improve your productivity?

No? We didn't think so. So here are some facts we'd like you to know.

HOW DATA PHASE SOFTWARE LETS YOU ACCOMPLISH MORE IN LESS TIME AND WITH LESS EFFORT.

With every keystroke, ALIS saves you searching and updating time. Because all of the critical information and procedures you need are thoroughly linked together at one terminal, right at your fingertips, there's never a need to retrieve separate files for related information.

And with the abundant access points provided by ALIS' full MARC database, your patrons are assured that their searches are finding everything your library has to offer.

HOW EASILY DATA PHASE LETS YOU CHANGE MANAGEMENT POLICIES.

Data Phase gives you literally thousands of bibliographic, circulation, acquisitions and management parameters for customizing your system's online limits to your library's policies.

With an authorized password and a keystroke, you can change dates, fine policies and all library guidelines quickly and accurately.

HOW DATA PHASE PUTS YOU IN CONTROL IMMEDIATELY.

Right from the beginning, ALIS III is easier to use.

Clear, simple information is delivered in well-defined user friendly form. One-half of the screen gives you the data, the other half prompts and directs you to all of the additional files of information that are available.

There's less to memorize. And less valuable staff time required to learn the system.

HOW DATA PHASE'S FAULT-TOLERANT DESIGN IS BETTER THAN THEIR "FAIL-SAFE" DESIGN.

ALIS III has built-in fault tolerance.

It is designed to automatically anticipate and operate around failures, not simply react to them.

Any hardware component can fail and the system will continue to run without interruption, without losing a single transaction, and without erasing information from the database.

You can expand the system, make repairs, remove parts and replace them while the system keeps on running.

Today, only ALIS III provides your library with a truly fault tolerant system.

HOW THE COST OF OWNING A DATA PHASE SYSTEM IS ACTUALLY LESS THAN THEIRS.

A competitive system might be bid less than Data Phase, but over a period of time, the economics of ALIS III are far more cost effective. And the cost of ownership over the life of the system is significantly less.

The powerful interaction of Data Phase software and Tandem hardware provides you with a per transaction cost that is lower than that of any other system. Its unparalleled integration and efficiency gives you increased staff productivity. And dramatically decreased administrative demands.

And we protect your investment by programming ALIS in the most common language utilized by computers — COBOL. So that your system will be compatible with any new technology you would like to integrate into your system.

FIND OUT THE REAL FACTS ABOUT ALIS III.

Just call us today at 913-262-5100. We'll tell you even more that our competition isn't talking about.

Data Phase

A superior approach to library automation.

OCLC UPDATE

Resource Sharing: A Dream Comes True

OCLC was founded 17 years ago with the goal of enabling libraries to serve their patrons more effectively through resource sharing. Resource sharing had long been practiced among libraries, but, to many, the concept of a cooperative computer database for shared cataloging was a novel idea. In 1971, when the Online System became available, that vision became a reality.

Today, with an Online Union Catalog approaching 12 million bibliographic records and nearly 5,000 member libraries worldwide, OCLC has since expanded that original concept to encompass much more than shared cataloging. OCLC Union Listing and the Interlibrary Loan Subsystem are just two of the ways in which libraries can use OCLC's unique automated resources to gain access to a wealth of online information.

In the '80s, the exchange of materials and information among libraries need not be tedious and time-consuming. OCLC's commitment to online resource sharing has created an electronic environment that is helping to make the concept of a "global village" a reality for participating institutions.

Union Listing

Union Listing, a valuable online resource-sharing tool, has been available to OCLC members and non-members alike since 1981. In just three years, 56 union list groups have been formed, representing about 3,000 libraries.

Union Listing has loosened many constraints on access to information. For example, smaller libraries in a union list group can now view the serial holdings of much larger institutions, enabling their patrons to use resources previously either unavailable or difficult to obtain. Union Listing fosters a community spirit among participants, promoting cooperative collection development and enhancing librarians' traditional goal of meeting patron needs effectively.

And Union Listing provides libraries with the added benefit of slowing the rate-of-rise in the cost of offering these improved services . . . further evidence that OCLC technology not only expands informational horizons through resource sharing, but enables participants to do a better job more cost effectively.

Interlibrary Loan

The Online Union Catalog is the world's largest resource for interlibrary borrowing and lending. In fact, nearly 7 million interlibrary loan requests have been processed via the OCLC Interlibrary Loan Subsystem.

The **Group Access Capability,** a new resource-sharing feature, enables both member and non-member libraries to expand access to materials and information within cooperative groups. Like Union Listing, group access greatly enlarges the scope of interlibrary resource sharing. Participants are no longer restricted to their own collections or even to those of other group members, but become part of a 2,300 library OCLC Interlibrary Loan network comprising many millions of location symbols.

And More to Come

Union Listing and the Interlibrary Loan Subsystem are only two of the ways in which OCLC has used its vast automated capabilities to further resource sharing among libraries . . . and it is part of our mission to continually seek new and better means of making information more accessible. Through the efforts of OCLC and cooperating libraries, the vision of thousands of institutions exchanging useful information at the speed of light is a dream come true.

Testing Telemarc, supervising moonlighters, and playing music

Q. Can you comment on the use of the Gaylord Telemarc III automated catalog card production system? *Linda Bennett, Director, Allen Parish Library, POB 400, Oberlin, LA 70655* (*AL*, June, p. 370).

A. Our public library received Telemarc on a 30-day basis, which was ultimately extended to 90 days. Although we felt that its sophisticated features justified its relatively high price tag, the fact that it would not drive our Qume printer proved to be an insurmountable barrier and we did not purchase it. We listed 10 good points and 10 limitations in working with Telemarc, which I will send to anyone who is interested.

Telemarc III has been reviewed in the excellent newsletter *Small Computers in Libraries*, but I firmly believe there is no substitute for hands-on use of a complete program, not just a demo disc, in trying to evaluate software. I have found that almost all vendors will either allow previews of their software or will send the documentation and a set of sample cards.

I would also be happy to share my experiences with Catalog Card and Label Writer (K-12 MicroMedia and SVE Singer), Catalog Card Maker II (Winnebago), Catalogue Card Assembler (Jon Mauch), Cardprep (Library Software), and Cardpro (Hugh Starke). I'm not a catalog-card-producing junkie: I simply refuse to settle for a program requiring a drastic change in our catalog card format and offering no improvement over our current, noncomputerized method. *Susan Rosenthal, Head of Technical Services, Oakland Park Library, 1298 N.E. 37th St.. Oakland Park, FL 33334.*

Q. What libraries have written policies regarding moonlighting by reference staff members, particularly as research assistants or consultants? *Lynn Westbrook, Reference Librarian, Main Library, University of Georgia, Athens, GA 30602.*

Q. How do libraries handle the conflict-of-interest issue and the involvement of staff members in financially profitable professional activities where their expertise is developed and enhanced by their library positions but where they are not representing the library? *Charlene P. Holly, Personnel Manager, Allen County Public Library, 900 Webster St., Fort Wayne, IN 46801.*

A. Answers to both these questions on outside employment vary depending on local circumstances, but all libraries should have a specific written policy to avoid misunderstandings. If no policy exists, librarians should seek clarification with an appropriate administrator prior to taking on any activity which might be construed as one for personal gain.

Two ALA policies speak to this issue on a general level. The "Code of Ethics" adopted by ALA Council in 1981 states: "Librarians must avoid situations in which personal interests might be served or financial benefits gained at the expense of library users, colleagues, or the employing institution." The Reference and Adult Services Division "Commitment to Information Services: Developmental Guidelines" (1979) states: "No personal financial gain should result because of the librarian/information specialist role as a representative of the library in dealing with a user."

ALA staff policy requires that staff members discuss with an appropriate supervisor any offers of short-term or part-time professional employment to determine the effect on the workload. Vacation leave may be applied or administrative leave with pay may be approved. Such employment should avoid violating any existing ALA policy and not commit ALA materials, facilities, or personnel for the gain or benefit of an outside enterprise.

Kenneth G. Peterson discusses "Ethics in Academic Librarianship: The Need for Values" in the July 1983 *Journal of Academic Librarianship* 9, p. 132–37. *Margaret Myers, Director, Office for Library Personnel Resources, ALA Headquarters.*

Q. Has any library tried playing classical music during working hours in both public and nonpublic areas? How do staff and patrons react? *Dale Greenbaum, Audiovisual Librarian, Geauga County Public Library, 110 E. Park St., Chardon, OH 44024* (*AL*, Oct., p. 628).

A. I began playing selections from Saint-Saëns, Pachelbel, and Tchaikovsky when kindergarten through third-grade groups came in for their scheduled times. I played the same pieces for six-week periods to introduce children to music they might not otherwise hear. It worked—mothers reported that when the children heard the selections elsewhere they reported it was "the library music."

This encouraged me to buy a stereo and a small record collection to play all day long. Early in the morning, before school started, I chose Bach and other baroque music that I

enjoyed. "What a wonderful way to begin the day!" staff members exclaimed. Some of them brought their paperwork to the IMC to read in the pleasant atmosphere. Junior high school students changed the records to their favorites.

If my experience proves anything, it proves that only positive reinforcement, enjoyment, and learning follow. I've *never* had a complaint! *April Hoffman, IMC Director, Randall School, 1802 Regent St., Madison, WI 53705-4199.*

A. The Lighthouse Point Library has played cassette music for the past three years. Patrons donate tape or discs for us to record, giving us a wide variety of sounds.

Staff members vary the program with classical, easy-listening, traditional jazz, and seasonal music. Patrons enjoy the music and will ask about it when the music isn't playing.

We plan to install a complete sound system in our new building so that music can be heard in all public and nonpublic areas or be eliminated if requested. *Doreen A. Wildman, Director, Lighthouse Point Library, 3770 N. Federal Highway, Lighthouse Point, FL 33064.*

A. Our K – 12 school had a central music system donated by the student council which we used until it was stolen. We discovered that students at all grade levels felt the music was conducive to study and made the library more effective and appealing.

However, students complained about most classical music, calling it "Woolworth music" and "elevator music." They said they found it distracting. Playing "their" music was greeted enthusiastically and didn't seem to interfere with perhaps 90 percent of the students.

We concluded that the selection of music should be geared to the tastes of the patrons, not the library staff. Adults, young adults, researchers, and recreational patrons require different types of music just as they need different materials. We have used different music in different areas with success. *Robert V. Vaughn, Head Librarian, Good Hope School, Frederiksted, St. Croix, VI 00840.*

Over to you

1. How do libraries minimize the damage to microfilm due to users' failure to lift the glass film plane on the 3M Microfilm Reader/Printer before advancing or rewinding the film? (Md.)

2. What libraries, preferably academic, have tried job sharing in Reference positions? How was it done, what are the problems, was the salary split proportionately, and how did you convince the administration to try it? (N.C.)

3. Who manufactures a security system that detects security tapes from floor level to at least 7 feet 8 inches above? (Calif.)

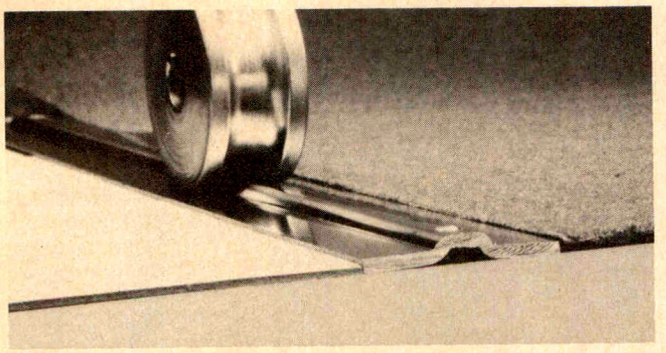
RHC-Spacemaster movable shelving . . . featuring the "no problem" floor



Low-profile track, virtually flush with carpet or tile, rises only 3/16" in center of outer guide tracks (intermediate tracks are perfectly flat). No hazard to personnel, no impediment to carts, no debris-catching openings.

When you acquire movable shelving to solve a space problem, you may acquire a floor problem in the process. Most movable shelving systems have high tracks that require a built-up floor. Such floors are expensive, add non-structural weight, and require ramps. By consuming vertical space, they may also reduce the number of shelf openings you can have.

Another problem is that tracks recessed in built-up floors leave gaps. The gaps accumulate debris, impede the use of carts, and pose a hazard to personnel. Similar problems are caused by ramps.

RHC-Spacemaster tracks do not require a built-up floor. As illustrated, they are virtually flush in normal installations. They save on initial costs, and they offer the long-run benefits of easy maintenance and safety.

In short: no problems.

Call or write for "A Library Space Study" and brochures describing RHC-Spacemaster's complete line.

When your students need information, go directly to the source.

The best teachers need the best teaching tools. That's why UMI Curriculum Products can help you teach, and help your students learn.

UMI Curriculum Products in microform are great tools for young minds. They provide easy access to stimulating sources of information which cover both broad topics and specific details. And they provide students with material in a relevant, rewarding form that nurtures the joy of learning.

Products like *The New York Times* Current Events Edition, Critical Issues, Great Personalities, and Documentary Sources of Western Civilization support virtually all academic curricula. They're particularly useful for teachers of English, Journalism and Social Studies. And new products are constantly being developed.

Most of the UMI Curriculum Products include lesson plans, printed guides, and study questions. Because they're in microform, they're durable space-savers. And, because they're a one-time investment and last indefinitely, they're cost-effective.

For more information, call UMI toll-free at 1-800-423-6108, and ask for a Curriculum Products representative. In Michigan, Alaska, and Hawaii, call collect 313-761-4700.

AASL answers the challenge

Programs take precedence over politics at the division's third national conference in Atlanta

by Gordon Flagg

THE CONTINUING CONTROversy over the future of the American Association of School Librarians as a division of ALA was far from the minds of most of the 3,255 registrants (2,543 delegates and 712 exhibitors) who attended the third national conference of AASL in Atlanta Oct. 31 – Nov. 4. But if the status of AASL wasn't much of an issue at the conference, the status of school librarians themselves was, as programs on leadership skills, professionalism, management techniques, and political lobbying augmented sessions on educational techniques and technology.

In fact, the scope and number of program offerings was such that the conference theme—"Challenge '84: Mission Possible"—could have referred to the efforts of conferees to attend as many of the sessions of interest as possible. A common complaint of frazzled school media specialists, many of whom were attending their first national library conference, was that too many worthy programs were scheduled concurrently. The jam-packed schedule seemed to bear out AASL President Bettie Day's claim to a conference that "met the needs of all types of people—building-level, school district, county, and library educators."

The wide array of programs, well-received speakers, bustling exhibit show, and record attendance (two years ago in Houston the registration was 2,824) all testified to AASL's growing experience in mounting ever-larger, more ambitious conferences. The entire five days went off without a hitch until the final morning, when the late arrival of several shipments of books delayed the opening of the "author fest" autographing session by about a half-hour; and considering the types of disasters that can befall a conference of such scale, that qualifies as merely a near-miss.

The Atlanta gathering was the first national conference of ALA or a division held in a southeastern city since the 1962 ALA Conference in Miami Beach. At the conference banquet, ALA Executive Director Robert Wedgeworth praised AASL for its groundbreaking decision to meet in Atlanta, indicating that ALA may consider the city for a future annual conference.

The Atlanta location also gave the conference a decided southern accent. Fifty-nine percent of the preregistered conferees came from 12 southeastern states, with on-site registrations expected to push that proportion even higher. Every state was represented except Idaho.

Cunningham tells all

In the first of two general "theme sessions," businesswoman and author Mary Cunningham addressed an audience of over 2,000 on the theme of personal excellence. In her introductory remarks AASL Executive Director Alice Fite expressed the goal of seeing school media professionals achieve the success of professionals in other fields, and Cunningham suggested ways individuals can bring this about.

Cunningham told her audience she had been looking forward to speaking to the group because she had been greatly influenced by a childhood librarian—an almost obligatory remark by speakers from outside the library profession. But rather than inspiring Cunningham to discover the importance of literature, her sixth-grade school librarian served as her first female role model outside her family. Twenty years ago it was unusual to have a female authority figure, she said, and unlike many male teachers the librarian was "infinitely approachable."

There are two major areas of impediments to success, Cunningham warned the predominantly female crowd: the external impediments of prejudice, corporate politics (which, she stressed, are found in education as well), and media distortion; and the internal or personal impediments of lack of energy, lack of self-confidence, and lack of faith.

Women appointed to senior management positions should approach the challange with "optimism adjusted just a bit for savvy," which she defined as a combination of sensitivity and judgement. Cunningham advised women in this situation to retain their enthusiasm, but also to be aware of how threatening they may be to those around them: "Go for it, but do it with a bit more subtlety," she recommended.

The speaker's advice was based on personal experience: The story of how Cunningham's promising executive career was endangered by rumors of a romantic involvement with her boss at the Bendix Corporation was recounted in her bestselling book *Powerplay: What Really Happened at Bendix*.

Cunningham's speech and the question-and-answer session that followed was perhaps the best-received program of the conference. The reaction to Cunningham's thoughtful combination of warmth and frankness was summed up by Judy L. Cooper, a school media consultant from Lexington, Ky., who called the speaker "sensitively aggressive."

The second theme session, on professional excellence, was addressed by Atlan-

Against a political backdrop, Mary Margaret Rogers offers tips on lobbying techniques for school librarians as Thomas Hart, chair of the legislation committee of the Florida Association for Media in Education, looks on.

INGRAM

THE LIBRARIAN'S ADVANTAGE

Ingram customers consider us to be the state of the art in the book industry. We are proud of our reputation for excellence.

Over 3,000 libraries have turned to Ingram for the many advantages we offer:

1. Weekly updated microfiche listing of our entire book inventory—over 55,000 titles and growing.
2. Toll-free telephone ordering.
3. On-line order entry.
4. Instant stock verification.
5. 24-hour order turnaround guaranteed.
6. Ingram Delivery, a program offering up to 50% savings over other modes of transportation.
7. The most current and authoritative marketing information in the industry.
8. Professional promotional materials to boost circulation.
9. The most comprehensive, innovative catalogs and monthly magazines to assist in selection and ordering.
10. Programs designed to serve libraries and patrons.
11. The best wholesale discounts uniformly available to all libraries.
12. Efficient, courteous service on which you can rely.

ta Public Schools Superintendent Alonzo Crim, who described the educational philosophy and programs of his school system in a talk that appeared to have been originally developed for delivery to local civic and business groups. Crim's serious points on such issues as the plight of children, future educational directions, and community involvement were nearly swamped by an overabundance of figures and facts, enumerated with the aid of an overhead projector. He detailed the purpose and goals of education, but made no observations or suggestions on how school librarians, as opposed to classroom educators, could carry them out.

Educational seminars

On the first afternoon of the conference, after a morning devoted to tours of local school media centers and system facilities, conferees could choose among 12 four-hour educational seminars devoted to topics ranging from storytelling with puppets to school library public relations programs. Several of the seminars, rather than dealing with librarianship itself, focused on such routes to personal achievement as management styles, strategic career planning, and dressing for success.

One of these seminars, conducted by management consultant Thomas H. Lawrence, was designed to teach leadership skills using a combination of management science, workbook exercises, and platitudes (''Even a turtle has to stick its neck out to make progress,'' ''Success is getting what you want; happiness is wanting what you get'').

Leadership was also the focus of a program later in the conference on ''Personal and Professional Excellence.'' Kinzey Green, dean of the Oregon State University College of Home Economics, spoke on ''the fine line between the pressure of duty and the challenge of excellence.'' Green, who is also immediate past-president of the American Society of Association Executives, enumerated such obstacles to excellence as myopia, turf-guarding, fear, and an unwillingness to try the new.

She then described such leadership roles as mentor (''a way to replenish the profession we are in''), global thinker (who can ''think globally and act locally''), visionary and actor, and futurist. To demonstrate the last role, Green mentioned three trends that educators should be aware of: the shift of the U.S. from an industrial to an information economy in which the teaching of skills is as important as the teaching of facts; changes in demography, including the population shift from the northeast to the south and southwest; and the increasing number of women entering the paid labor force.

The "First-Timers Coffee" attracted several hundred delegates attending their first AASL conference, including Mary Farris of Memphis, Tenn.

Comparing librarianship to her own field of home economics, Green characterized both as women-dominated, educational, and public-funded—all factors resulting in low pay. ''We have spent a lot of time talking about image, when I think we should have been increasing our stature in the economy,'' she stated. ''If we are paid well, the image will follow.''

Nuts and bolts

But if such intangibles as leadership and professionalism were to be found throughout the conference schedule, most of the program slots were still filled with sessions on such ''nuts-and-bolts'' concerns as booktalks, library media skills instruction, public and private funding sources, mission statements, copyright policies, inservice programs, and author visits.

It's a sign of the times that AASL conference programs on microcomputers have become as much a tradition as sessions on storytelling and puppetry. Among the microcomputer matters covered by a dozen different programs were security for microcomputer equipment, choosing a computer and living with it, cataloging computer software, courseware evaluation, the production of computer curriculum guides, and interactive fiction using the microcomputer.

The evidence at the conference would indicate that, for many schools at least, the Microcomputer Revolution is over and media centers are the victors. But there were warnings that only the battle has been won, not the war. ''The honeymoon period with computers is about to be over and we have some hard questions to face,'' cautioned Joan Burleigh, consultant to the Birmingham (Mich.) Public Schools, at a panel discussion on microcomputer implementation and integration in the curriculum. The choice facing us now, she said, is either to use technology to provide a better-quality education or to simply give it lip service. Burleigh concluded her remarks by quoting Representative Albert Gore: ''Our failures in the past have had to do less with overestimating the power of new technologies than with underestimating the effort necessary to exploit that power.''

Librarians get lift-off

At a pair of programs titled ''Lift-off for *Alliance*,'' librarians and educators discussed the recommendations for improving education through libraries made in *Alliance for Excellence: Librarians Respond to a Nation at Risk* (*AL*, Sept., p. 551). Participants agreed that the report's 13 recommendations were worthwhile suggestions, but that the challenge lies in implementing them. The recommendations, said Marilyn Scott of the Anchorage (Alaska) School District, are just ''pie-in-the-sky statements'' until the profession develops standards to quantify them.

Calling *Alliance* a report ''by librarians to librarians,'' Kenneth Neal of the Utah Office of Education urged dissemination of the publication to teachers' and principals' associations. ''We can talk to ourselves and blow our whistles just so much,'' he said. ''We have to get this report out to those who are in decision-making positions.'' According to Ray Fry, director of the U.S. Department of Education Division of Library Programs, about 1,500 copies of *Alliance* were mailed to all governors and chief state school offices and to all members of Congress on education committees, and Sen. Claiborne Pell (D.-R.I.) read the entire text into the *Congressional Record*.

The participants hoped that *Alliance* would serve as an impetus to action for librarians. ''It's becoming increasingly apparent that professionals in education must take control of their own destiny,'' said North Carolina Division of Educational Media consultant Paula Short.

Lobbying for libraries

Following a mock political rally, with the Florida delegates entering the room to the tune of ''When the Saints Go Marching In,'' Mary Margaret Rogers told about

her successful experience as a lobbyist for school library media programs in the Florida state legislature. Rogers, who was hired as lobbyist by the Florida Association of Media Educators in 1978, has been instrumental in getting legislation passed mandating five school media program areas and appropriating funds for library media materials and equipment in the state budget.

Speaking from a platform decorated with red-white-and-blue bunting, Rogers offered tips to librarians in other states who might be planning their own lobbying efforts. Because of the leadership system, she suggested, efforts should be concentrated on key legislators who hold the greatest influence. Librarians should also set up a network of people throughout the state who will contact legislators on short notice regarding pending bills.

"Building-level media specialists can and do make a difference by involving themselves in legislation," Rogers said, pointing out an added benefit of this political power: "When your school district knows you can influence state legislation, they become far more amenable to your needs on a local level."

AASL and ALA

Association politics rather than state politics became the focal point later in the conference at a "Challenge Forum." There, the AASL Board of Directors answered questions and heard members' opinions about issues facing the division. As expected, most of the discussion centered around the future of AASL within ALA (*AL* July/Aug., p. 496–97 and Nov., p. 735–36). A handful of the several hundred delegates scattered throughout the large auditorium voiced an opinion on the issue. Critical of AASL's current status was Stephen Matthews, a representative to the ALA/AASL Future Structure Subcommittee, who condemned ALA's recent dues hike. "ALA has a responsibility to us, too," he said. "I think it's about time ALA saw the red flag."

On the other hand, Judith Davie read a unanimous statement from the 900-member North Carolina Association of School Librarians declaring that association with other types of librarians is beneficial, and encouraging the AASL board to seek better communications to improve the division's role within the current structure.

A frequent complaint, voiced not only during the forum but also by members throughout the conference week, was that AASL does not do enough to keep the rank and file informed about the rift with ALA and other matters facing the division.

Later in the conference, President Day agreed that a lack of information was probably the reason for the relatively small interest in the AASL/ALA controversy at the conference. "The best way to convey our message is in person, in small groups," she said, adding that AASL hopes to hold another Challenge Forum for its members at the 1985 ALA Conference in Chicago.

The forum audience also wanted to know the status of the standards for school library media programs being developed by AASL and the Association for Educational Communications and Technology. Executive Director Fite reported that the joint committee overseeing the project has engaged a consultant on standards and is now seeking funding from foundations.

Grand finale

The last hours of the conference contained many of the week's most entertaining moments. Maya Angelou, banquet speaker, gave more a performance than a speech. The author of *I Know Why the Caged Bird Sings* and numerous plays, poems, and screenplays scolded librarians for neglecting the works of black poets; judging from most libraries' collections, she said, "It would seem that white people write poetry and black people 'do ditties.' " She then proceeded to put the lie to that assessment by not merely reciting but acting out and even singing verses by Georgia Douglas Johnson, Anne Spencer, James Weldon Johnson, and other black poets.

Angelou concluded by reminding the audience of its responsibility to young readers. "The role of the librarian is *so* serious," she observed. "It is holy, in fact." Urging librarians to take a closer look at black American literature, she stated that "every piece of work written is written for the human being—It is written for us all. . . . Share that understanding with those young girls and young boys who come into your libraries."

As the final event on the program, this year's conference featured two author brunches held simultaneously. While Judith Viorst, X.J. Kennedy, and N.M. Bodecker spoke on light verse in one ballroom, three young-adult novelists a floor below described their experiences with Hollywood.

Six of Betsy Byars' books have been turned into "ABC Afterschool Specials." Although she had numerous complaints about the first four adaptations, the fifth one—*Pinballs*—was so well-done that Byars now visualizes the lead character Carly as actress Kristy McNichol. However, the title of the last production was changed from Byars' *The Night Swimmers* to *Daddy, I'm Their Mama Now*, making it unlikely that young viewers would be able to seek out the book.

Alice Childress wrote the screenplay for the movie of her *A Hero Ain't Nothin' But a Sandwich*, but that didn't stop the filmmakers from moving the locale from Harlem to California and turning it into a story about middle-class people. The playwright and author proclaimed books to be her favorite form of writing "because you bear all the criticism—good or bad," adding "There's nothing in life that we can do—motion pictures or anything else—without books."

But perhaps the most outrageous tale of Hollywood commercialization was told by Robert Cormier, whose *Chocolate War* was optioned during the days of "Charlie's Angels" and other "jiggle programs." The locale was changed to a girls school, with girls in tights in every scene, and the fight at the end was turned into a roller derby. Fortunately, Cormier was able to squelch the project before it went into production.

Cormier's experience with the movie of *I Am the Cheese* was much happier. Although a new, less ambiguous ending was shot after preview audiences said the original one was confusing, Cormier is pleased that 85 percent of his story was left intact. He described his first look at the character of Adam coming to life on the screen as "one of the greatest moments of my life."

Morale-builder

But despite the multitude of informative and entertaining programs and the opportunity to exchange practical suggestions with colleagues from across the country, one of the biggest benefits of AASL III—especially for those who seldom attend national conferences—was the boost in morale it gave school media specialists, who often feel unappreciated by teachers and principals—as well as by other types of librarians. As Martha Hooper of the University School of Nashville (Tenn.) put it, "I realize how much uplifting I need when I get here; I don't get that much support locally. The conference is a real support system for me." The next such opportunity, it was announced at the conference banquet, will be in Minneapolis, Sept. 24–26, 1986. □

Preliminary interviews may be arranged at ALA Midwinter. Equal-opportunity employer.

CATLGR. OF LATIN AMER. MAT'LS. w/OCLC, LC class. & subj. hdgs., MARC, AACR2. Reqs.: ALA-MLS; one yr.'s cat'lg. exp.; Spanish; work w/French, German, Portuguese. Sal. $1,420/mo. 9-mo.-term appt. available immediately. Deadline Jan. 15, 1985. Ltr., resume, names of 3 ref. to: Pre-Columbian Studies, Dumbarton Oaks, 1703 32nd St. NW, Washington DC 20007.

CAREER OPPORTUNITIES

Guidelines

A salary range is required for all "Positions Open" ads per the guidelines of the American Library Association. "Faculty rank" and "status" are variable and should be explored carefully by applicants. ALA opposes residency requirements. Direct or implied biases will be edited out of ads. Job titles should reflect responsibilities as defined in ALA personnel guidelines.

General Deadline for Copy

Copy must be received by the 5th of the month preceding date of issue. (Job openings subsequently filled can be stamped "Filled" up to three weeks preceding date of issue; advertiser is billed for original ad.)

Late Job Notices: Space permitting, Late Jobs are taken by phone only, **beginning on the 10th.**

Address

Place all notices with Beverly Goldberg, LEADS, American Libraries, 50 E. Huron St., Chicago, IL 60611; (312) 944-6780 x326.

Electronic Mail: Ads may also be submitted electronically via ALANET by 1) sending a memo directly to our AL.LEADS mailbox; or 2) completing the LEADSAD online order form.

Rates

PLEASE STATE IF ALA MEMBER. INSTITUTIONAL MEMBERSHIP REQUIRED FOR INSTITUTIONAL DISCOUNTS.

Joblines: Free listing of numbers and addresses for nonprofit job clearinghouses. Please provide numbers and addresses for employers to contact joblines. No commercial agencies. (*AL* does not supply job lists or forward jobs to clearinghouses.)

Positions Wanted: ALA members receive first 50 words free, 50¢ each word over. Nonmembers: 50¢/word. Limit 3 issues per year.

Educational Notices: Line-by-line or display format. For price schedule, see Rates for Advertisement box in **Datebook.**

Positions Open, Professional Exchange, or Requests for Proposals (Please state format desired):

Line-by-line: $5/line. ALA institutional members receive 20% off ($4/line).

Display: Boxes, larger type, prominent format. $50/column inch. 20% off for ALA institutional members. Available only for job positions or educational programs.

Late Job Notices: By phone only, beginning 10th of the month. $10/line. ALA institutional members 10% off. See complete instructions in section.

Consumer Classies: Includes Available At No Charge, For Sale, Wanted, Barter, Personal, Out-Of-Print Books, Periodicals & Serials, and Services & Sources. (Please state section desired.) $5/line; **multiple insertion discounts on total cost:** 2–5 months per year, 5% discount; 6 months or more, 10%. No ALA membership discounts applicable.

Box numbers: *AL* will provide box numbers on request for advertisers wishing to run blind ads. Surcharge is $10. For Positions Wanted, box numbers are free-of-charge.

To reply to box numbers, write: Box (number), c/o *American Libraries,* 50 E. Huron St., Chicago, IL 60611. Mark mailing envelope "Confidential."

NOTE: Institutions using purchase orders should notify LEADS editor of purchase order number **within 2 weeks of placement of advertising.** Later receipt will result in incomplete billing.

Ads by Phone

The following applies only to regular classified ads due on the 5th of the month. Late Jobs are not included.

1) Telephoned copy will be accepted **only at the discretion of the LEADS editor,** depending on time available.

2) **A surcharge** of $5 total for line-by-line and $10 total for displays will be charged for all accepted telephone ads.

3) All accepted telephone ads **must be followed by written confirmation, including full text of the ad,** within two weeks.

JOBLINES

Joblines will appear in full on a quarterly basis—February, May, July/August, and November—and in abbreviated form the rest of the year. Space saved will be devoted to expanded Positions Open listings.

For complete Jobline info.: Nov. *AL*, p. 706.

Columbia University Libraries

Instructional Services Librarian

This position has primary responsibility for providing library services to undergraduates and graduate students in the arts and sciences. This includes all aspects of the operation of 3 library units as well as planning, developing, and implementing bibliographic instruction programs for undergraduates and coordinating the same for graduate students and faculty members. The 3 library units are the Burgess-Carpenter, College, and Philosophy libraries, which comprise the Instructional Services Library. The incumbent will be expected to continue current activities and to develop innovative services and programs, including the application of new technologies to the delivery of services. Extensive contacts with faculty members will be necessary. This position, which reports to the chief of the Humanities and History Division, has supervisory responsibility for 3 supervisors, 7 supporting staff, and an FTE of 14 student assistants.

Requirements: MLS from ALA-accredited school, graduate subject degree desirable. Demonstrated evidence of imagination, leadership, and managerial skills is essential, as is the ability to communicate effectively in written and oral forms. Knowledge and understanding of the process of scholarly communication and of the complexities of a major research library are also essential. Candidates with successful administrative experience in pertinent areas of library operations will be sought, with special attention given to responsibility for bibliographic instruction programs and responsibility for public service activities. Position available on or about June 1, 1985. Salary ranges: Librarian II, $26,500–$34,450; Librarian III, $29,500–$42,775. **Deadline for applications: Jan. 31, 1985.** Submit application, indicating salary requirements and 3 references, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.**

An equal-opportunity, affirmative-action employer

Associate University Librarian for Technical Services
Arizona State University

The Arizona State University Libraries are seeking candidates for the position of associate university librarian for technical services. The successful candidate will report to university librarian Donald E. Riggs, be responsible for the leadership and management of all technical service units, and participate in overall library planning and policy formulation.

REQUIRED QUALIFICATIONS include the ALA-accredited MLS degree; successful administrative experience at the department-head level or above in technical services in a university library; a minimum of 7 yrs.' progressively responsible experience in an academic/research library; demonstrated organizational abilities and leadership qualities; demonstrated skills in written and oral communication, interpersonal relations, management, and planning; comprehensive working knowledge of the functions of technical services in a major research library; successful supervisory experience, including supervision of professional and classified staff; knowledge of current issues/trends in technical services, including automation and established standards; evidence of university service, research, and/or participation in professional associations. *PREFERRED EXPERIENCE:* as assistant/associate university librarian for technical services (or its equivalent); fiscal, personnel, and other administrative responsibility in 2 or more technical service areas; supervision of a large staff.

ARIZONA STATE UNIVERSITY AND ITS LIBRARIES: ASU's mission is to continue development as a major research university and to become competitive with the best public universities in the nation. Toward that end, the libraries have experienced dynamic growth during the past 5 yrs., adding 55 new positions and increasing the materials budget from $1.7 million to the current $3.1 million. A new science and engineering library was occupied in 1983, and the other libraries are being remodeled. The libraries are creating a total online integrated system using Tandem hardware and Data Phase software. The transition from a COM catalog to an online public-access catalog will be made in the near future, with acquisitions and serials subsystems to follow. A funding base has been established for an ongoing retrospective conversion project. Collections total 1.8 million vols. and 1.6 million microform units. Of the 243 FTE staff, 88 are employed in technical services. Membership is held in ARL, CRL, AMIGOS, and OCLC. The total budget is $7 million. ASU, with 40,000 students, is the nation's 6th-largest university and is located near Phoenix, the nation's 9th-largest city.

Salary: $40,000 minimum, depending on qualifications. TIAA/CREF and other alternatives to the state retirement plan; annual paid leave of 22 days' vacation, 12 days' sick leave, and 10 holidays; tuition remission for employee and family at all 3 Arizona universities. Librarians serve on university governance committees and are eligible for continuing employment status and sabbatical leave.

Applicants must include documentation or evidence of specific qualifications and short statements (no more than 2 pages each) concerning 1) their philosophy of technical service and 2) what new technical service programs they have implemented and are interested in implementing. A copy of the complete position description is available upon request. Recruitment will remain open until the position is filled. **To ensure consideration, applications should be received by Dec. 31,** when review will begin. Send letter of application, resume, supporting documents, and a list of 4 recent references to: **Constance Corey, Assistant University Librarian, Hayden Library, Arizona State University, Tempe, AZ 85287.**

ASU is a committed equal-opportunity, affirmative-action employer.
Minorities are encouraged to apply.

Haworth, Personnel Officer, **Libraries, Stewart Center, Purdue University, West Lafayette, IN 47907.** An equal-opportunity, affirmative-action employer.

Latin American documents and reference librarian. Responsibilities: maintain and expand the official publications of Latin America and the Caribbean, and the publications of international, inter-American, and regional organizations. Provide reference and bibliographical services, including the preparation of guides and orientation lectures for classes. Responsible for the collection in the absence of the librarian. Qualifications: ALA-accredited MLS required. Latin American studies or specialization in fields covered by Latin American studies required. Proficiency in Spanish required. Reading knowledge of Portuguese and French desirable. Salary: minimum $15,715 depending on qualifications. Benefits: faculty status, 22 working days' vacation, retirement options. **Send resume and names and addresses of 3 references by Dec. 31** to: R. Max Willocks, Deputy Director of Libraries, **215 Library West, University of Florida Libraries, Gainesville, FL 32611.** The University of Florida is an affirmative-action, equal-opportunity employer.

Library automation coordinator. Responsible for providing technical expertise and support in the implementation of an integrated online system for the library and for acting as liaison to the library consortium maintaining the system. Coordinator is to identify microcomputer applications for some library functions and to implement and maintain them. Qualifications: experience with both integrated online systems and microcomputers preferred and required with at least one, including a knowledge of programming, system design and organization, and telecommunications; ALA-accredited MLS; problem-solving and communication skills; ability to work well with all levels of staff. Faculty rank on a tenure track. Salary: $19,000 minimum with fringe benefits. **Deadline: Dec. 15.** Send letter of application, resume with a description of experience in library automation, and 3 letters of reference to: Director's Office, **Olson Library, Northern Michigan University, Marquette, MI 49855.** NMU is an EO, AA employer.

Library conservator, Columbia University Libraries. This is a new position with primary responsibility for planning and developing procedures and methods for the treatment of library materials in the Columbia University Libraries. Initial duties will involve space and equipment planning for the establishment of a conservation laboratory. The incumbent will then establish procedures for the treatment of library materials, perform the treatments, and train and supervise the staff. Other duties will include assisting in exhibits, disaster recovery programs, testing materials, and related environmental projects. The position will report to the head of the preservation department and participate in the libraries' overall preservation program, which includes microfilming and commercial binding. In addition to an undergraduate degree, requirements are knowledge of conservation practices and procedures, as demonstrated through previous relevant experience and/or successful completion of a formal program in the conservation of library materials. Evidence of the ability to perform a wide range of conservation treatments in a research library environment, creativity, and supervisory capabilities will be sought. Preference will be given to applicants with an accredited MLS. Salary ranges are: Librarian II, $21,000–$27,300; Librarian III, $24,000–$34,800. Excellent benefits include free tuition and assistance with university housing. **Deadline for applications is Jan. 4, 1985.** Submit resume, listing salary requirements and 3 references, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.** An affirmative-action, equal-opportunity employer.

Library personnel officer: a staff officer with responsibility for coordinating libraries' personnel policies in the areas of recruitment, compensation, employee relations, and staff development; these services are provided for 271 employees including 63 professionals, 66 paraprofessionals, 44 clerical staff, and 93 FTE student assistants. The library personnel officer uses independent judgment in handling problems in all the above areas and works closely with department chairs and other employees to develop and apply internal personnel procedures. The personnel officer represents the university libraries in university work groups on personnel issues. Qualifications: a broad knowledge of all functional areas found in a large academic library; a clear understanding of individual jobs, job levels, and the interrelatedness of library functions; a knowledge of trends and developments in research librarianship nationally; ability to maintain effective working relationships with colleagues in the library and the university and the ability to communicate logically, clearly, and efficiently in oral and written form; and ability to be objective, equitable, confidential, and consistent in interpreting and applying university and library personnel policies and procedures and sufficient independence of thought and maturity to sustain the resultant decisions are required. MLS degree from an ALA-accredited library school is required. 3–5 yrs.' progressively responsible experience in a research library (including some supervision) strongly preferred. Rank and salary: appointment at Associate Librarian level, $17,139–$30,400; full Librarian level, $20,385–$36,200. Initial appointment up to $30,000 depending upon experience. Benefits: 12-mo., tenure-track appointment with faculty status. Florida state retirement of TIAA/CREF, Blue Cross–Blue Shield group plan, 22 days' vacation per yr., no state or local income tax. **Send letter of application with complete resume and names and addresses of 3 references by Dec. 15** to: James H. Renz, Associate Director, **University of Florida Libraries, Gainesville, FL 32611.** The University of Florida complies with Section 503 of the Rehabilitation Act of 1973 and Section 402 of the Vietnam Era Veterans Readjustment Act of 1974. Preliminary interviews available at ALA Midwinter.

Monographic cataloger, Mississippi State University Libraries (search reopened). Qualifications: ALA-accredited MLS degree strongly preferred. Working knowledge of AACR2 and LC classification necessary. Experience with OCLC/SOLINET system preferred. Working knowledge of at least one foreign language, preferably Spanish, desirable. Willingness to accept responsibility, ability to work harmoniously with other professionals and paraprofessionals, and the ability to supervise the work of library student assistants are all essentials. Duties: shares in the cataloging (some original) of new monographic materials including music, microforms, and sound recordings using LC classification and subject headings, AACR2, OCLC-MARC format; some assignments in reclassification and catalog maintenance. Other duties as assigned. Benefits: includes faculty rank, status, privileges, and responsibilities; enrollment in the state retirement system; comprehensive medical coverage; university holidays and annual and health care leave. Salary: approximately $14,500. **Application procedure: send application and resume, including names and addresses of at least 3 references (preferably work) by Jan. 16, 1985,** to: Frances Coleman, Chair, Search Committee, Monographic Cataloger, **Mississippi State University Libraries, POB 5408, Mississippi State, MS 39762.** Mississippi State University is an equal-opportunity, affirmative-action institution.

Public services librarian, Bethel College, McKenzie, Tenn. Position open Feb. 1, 1985, at a small, church-related college for energetic, self-starting librarian with supervisory skills. Responsible for public services with emphasis on reference, circulation, ILL, stack supervision, AV, and bibliographic instruction. Knowledge of technical service functions helpful. Share night and weekend desk duty with other staff. ALA-MLS required. Experience preferred. Tenure-track, 10-mo. position; Instructor or Assistant Professor rank. Minimum $13,000, depending on rank. Position open until filled. **Send letter of application, resume, and list of 3 references by Dec. 15** to: John Langfitt, Academic Dean, **Bethel College, McKenzie, TN 38201; 901-352-5321.**

University of Illinois at Urbana-Champaign
Director of Departmental Library Services

A permanent position available Feb. 1, 1985. *Required qualifications:* master's degree from an ALA-accredited school or its equivalent; 8 yrs.' professional library experience, including more than 5 yrs.' experience in increasingly responsible public service positions in large academic or research libraries; research and publication record appropriate for appointment at rank of Associate Professor or Professor; evidence of ability to work effectively with others. *Preferred qualifications:* experience with a departmental library or decentralized library system; experience in managing large budgets; experience with automated systems. Salary $42,000 upward, depending on appointment rank and experience. Complete job description mailed upon request.

Search extended. **Application and nomination deadline Jan. 15, 1985.** Send complete resume with names and addresses of 5 references to: **Allen A. Dries, Library Personnel Manager, University of Illinois Library at Urbana-Champaign, 127 Library, 1408 W. Gregory Dr., Urbana, IL 61801; 217-333-8168.**

Affirmative-action, equal-opportunity employer

Reference librarian. Duties include reference work, bibliographic instruction, collection development, acting as liaison with faculty departments, and assisting in technical services as needed. The 8-mo. position, to replace a librarian on leave, begins Jan. 1, 1985, with possibility for an additional semester appointment. The successful applicant will work in a technologically sophisticated and exciting environment. Candidates must have an MLS degree from an ALA-accredited institution. Experience in public services is highly desirable. The ability to work effectively with students, faculty, and staff is especially important. Salary $1,250 per mo. maximum. **Submit a letter of application, resume, credentials, and 3 letters of reference by Dec. 15** to: Philip C. Wei, Director of Library Services, **Plymouth State College, Box E, Plymouth, NH 03264.** AA, EOE employer.

Reference librarian. General reference librarian with interest in business reference services to coordinate online searching in an academic library. Requirements: MLS with experience in reference services and online searching. Must demonstrate good communication skills and desire to work with the public. Salary range: $19,000–$23,000. Appalachian State University, located in the northwestern corner of North Carolina in the Blue Ridge Mountains, has 10,000 students and is one of the 16 campuses of the University of North Carolina system. **Deadline for accepting applications: Jan. 1, 1985.** Send letter of application, resume, transcript(s), and 3 names as references including addresses and telephone numbers to: Richard T. Barker, University Librarian, **Appalachian State University, Boone, NC 28608.** An affirmative-action, equal-opportunity employer.

Reference librarian. MSLS; 4 yrs.' varied experience at a reference desk in a large public, college, or community college library, and experience in the use of microcomputers. Regular evening and weekend hrs. Salary $1,690 per mo. and up, depending on experience. For applications and job description, contact: **Central Piedmont Community College, Personnel Office, Charlotte, NC 28235; 704-373-6631.** EOE, AA.

Reference librarian. Reports to head, reference department. Responsible for assisting with ILL services, general reference services, and bibliographic instruction. May also participate in online database searching and collection development. Schedule requires some evenings and weekends. Qualifications: an ALA-accredited master's degree, some reference experience, and demonstrated ability to communicate effectively required. Academic library experience is preferred. An additional subject master's degree and experience in interlibrary loan and bibliographic instruction are desirable. Position available: June 1, 1985. Salary: minimum $17,000, negotiable, depending upon qualifications and experience. Excellent fringe benefits. **Applications must be postmarked on or before Jan. 18, 1985.** Send letter of application, resume, and names, addresses, and telephone numbers of 3 current references to: O. Gene Norman, Chair, Library Search Committee, **Indiana State University Libraries, Terre Haute, IN 47809.** Indiana State University is an equal-opportunity, affirmative-action employer.

Reference librarian with specialization in business. Provides general reference service with 11 full-time reference specialists. Specialist activities include extensive online database searching, bibliographic instruction, department liaison, and collection development. ALA-accredited MLS or equivalent required. Preferred qualifications include 2 yrs.' post-MLS reference experience with business-related resources and an undergraduate major in business, economics, or a social science. Advanced degree in a related discipline is desirable. Tenure-track position. 24 days' annual leave, tuition remission, usual benefits. Rank and salary dependent upon education and experience. Assistant Professor $18,000 minimum; Associate Professor $20,000 minimum. **Send letter of application, current resume, and the names, addresses, and telephone numbers of 3 recent references by Jan. 15, 1985,** to: Jill Keally, Personnel Librarian, **The University of Tennessee Library, Knoxville, TN 37996-1000.** UTK is an EEO, affirmative-action, Title IX, Section 504 employer.

Reference librarians (2). Opportunity to work in an environment where services are expanding and where there is considerable scope for implementing new program initiatives, including the application of new technologies to the delivery of services. Responsible for collection development, library instruction, and computerized database searching in assigned disciplines. Provides service at the reference desk, including some weekend and evening hours. 1) **Social science reference librarian.** Requires master's degree from ALA-accredited library school and undergraduate degree in a social science discipline. Reference experience highly desirable. 2) **Engineering reference librarian.** Requires master's degree from ALA-accredited library school and significant coursework in pertinent science disciplines or science reference experience. $16,000 minimum salary depending on qualifications and experience. Excellent benefits including choice of retirement programs. The University of Houston–University Park Libraries have 1.4 million volumes, a materials budget of $2.4 million, and a staff of 58 professionals and 200 support staff. **To ensure consideration, applications must be received by Jan. 15, 1985.** Send letter of application, names of 3

RMG Consultants, Inc., presents
TWO SEMINARS IN AUTOMATION
prior to ALA Midwinter, January 3–4, 1985
Embassy Row Hotel
2015 Massachusetts Ave. NW
Washington, DC

Planning and Buying Integrated Library Systems
Thursday, January 3, 9 am–5 pm

- State of the art
- Costs and budgets
- Data conversion strategies
- Planning and evaluating systems
- Procurement and contract negotiations
- Preparing for effective leadership for change

Rob McGee, President of RMG Consultants, Inc., will present approaches to planning and buying automated systems, approaches that RMG designed to assist libraries in selecting the best systems and in building support for their decisions. **Dan Iddings,** RMG, will join the seminar to discuss converting bibliographic data.

The Online Public Access Catalog: A Close-Up
Friday, January 4, 9 am–5 pm

- State of the art
- The marketplace
- An in-depth look at functions, features, and capabilities
- Integrating vs. interfacing with other library systems
- Costs/benefits/risks of purchasing now

Based on RMG's recent comprehensive study of online public access catalogs, the seminar focuses on the state of the art of online public access catalog designs, capabilities, problems, and promise. The seminar will also provide guidelines and methods for analyzing demonstrations of online public access catalogs and communicating with vendors effectively. The featured speakers are **Howard Harris, Rob McGee, Dan Iddings,** and **Neal Kaske** of RMG Consultants, Inc.

RMG Consultants, Inc., offers library automation consulting services to libraries nationwide. We work with public, academic, state, federal, special, and school libraries as well as with multitype library consortia. In these seminars RMG's consulting staff present proven approaches and the latest information from their constant involvement in planning and buying automated systems and data conversion services for libraries.

Registration: $95 for one day; $145 for both days. ☐ **Both days**

☐ Check payable to RMG Consultants, Inc., is enclosed. ☐ **Planning and Buying Integrated Library Systems** ☐ **Online Public Access Catalog**
☐ Please bill my organization.

ASU is a committed equal-opportunity, affirmative-action employer. Minorities are encouraged to apply.

Search analyst, Mississippi State University Libraries (search reopened). Qualifications: master's degree in library science required. MLS from ALA-accredited school strongly preferred. One yr. or more work experience in an academic library with several online database systems; in-depth searching experience in at least one online system preferred. Knowledge of searching principles and machine-readable databases. Effective interviewing and communication skills. Logical, thorough, analytical mind. Applicant must have the ability to be innovative and work effectively with students and faculty. Supervisory capabilities and organizational abilities necessary. Duties: responsibilities include: database searching, supervising search records, billing and statistics compilation, training other staff members in online searching, coordinating the continuing education of other search analysts and library administrators with respect to database services, giving demonstrations of the database services to interested groups, performing evaluation studies of the database services, promoting and publicizing the services of computer-assisted information retrieval service (CAIRS), and other duties as assigned. Benefits: includes faculty rank, status, privileges, and responsibilities; enrollment in the state retirement system; comprehensive medical coverage; university holidays and annual and health care leave. Salary: $18,000 range. Position available: immediately. This position will be filled only if a suitable applicant is found. **Application procedure: send letter of application and resume, including names and addresses of at least 3 references (preferably work) by Jan. 16, 1985,** to: Bette M. Rice, Chair, Search Committee, Search Analyst, **Mississippi State University Libraries, PO Drawer 5408, Mississippi State, MS 39762.** Mississippi State University is an equal-opportunity, affirmative-action institution.

Senior assistant librarian, reference department (12 mos.). Works in active and dynamic academic reference department. Plans, coordinates, and provides instruction for automated reference systems (OCLC, RLIN, online serials systems, and future online catalog) including microcomputer applications for internal reference use and CAI. Participates in reference desk work, library instruction, general and reference collection development in specific areas, faculty liaison activities, and online searching. Qualifications include an MLS from an ALA-accredited school, and at least 4 yrs.' experience in academic reference work. (A master's degree in a subject field is required for promotion or tenure.) In addition, experience in systems development and microcomputers and coursework in computer and/or information science are highly desirable. Knowledge of microcomputer hardware and software is also desirable. Salary dependent upon qualifications (from $20,800 annually, for 12 mos.). **Deadline for applications is Jan. 15, 1985.** Letter of application, current resume, and 3 letters of reference should be sent to: David B. Walch, Library Director, **Robert E. Kennedy Library, California Polytechnic State University, San Luis Obispo, CA 93407.** California Polytechnic State University is an affirmative-action, equal-opportunity employer.

Serials recon project supervisor, Columbia University Libraries. This position will report to the head of the serials cataloging department and will have responsibility for assisting in the implementation of the serials conversion project to retrospectively convert the records of approximately 18,000 current serials. Duties will include supervising the project, including hiring, training, and revising of student assistants in basic cataloging, MARC tagging, and RLIN database searching and inputting procedures. The position will also assist in the project to reclass from Dewey to Library of Congress classification approximately 2,000 current serials. Responsibilities include ensuring that the projects proceed as scheduled, maintaining quality control over the converted serials portion of the database; coding difficult records and other database-related tasks; classifying serials for which no LC classification can be found; problem solving; assisting staff as needed; and preparing progress and statistical reports. In addition to an accredited MLS, requirements are aptitude for analytical and detail work as demonstrated through previous relevant experience; previous experience with serials and with machine-readable bibliographic databases (preferably RLIN) and/or superior performance in a formal course in cataloging; working knowledge of German and one or more Romance languages; broad subject background; ability to work well with others; and ability to supervise staff. Some experience with retrospective conversion projects desirable; preferential consideration will be given to candidates with previous cataloging experience. Work schedule is Monday to

Systems Office Head

Stanford University Libraries seeks a systems officer to manage its systems office. Under the general direction of the director of administrative services and in coordination with university departments, bibliographic networks, and systems vendors, the systems officer provides primary staff assistance in coordinating a transition to a linked, distributed data processing environment. The systems officer will be involved in the development of an integrated online library system, which will include new and/or enhanced existing system components such as online catalog, circulation, acquisitions, cataloging, serials control, and innovative personal computer capacities.

The candidate should have experience working in a systems capacity in a university and/or in a research library; demonstrated understanding of current and developing technologies which will affect the delivery of information services; experience with microcomputer applications to the academic and administrative needs of library departments and users also preferred; knowledge of and/or working experience with a large bibliographic network such as RLIN or OCLC; proven analytical skills and problem-solving abilities; strong interpersonal and communication skills; and the ability to negotiate complex issues.

Beginning salary range: Senior Librarian, $33,000–$42,000; Librarian, $28,000–$37,200; depending on qualifications and experience. **Apply by Dec. 31 to: Carolyn J. Henderson, Stanford University Libraries, Stanford, CA 94305.** Cite #259-A on all correspondence.

STANFORD UNIVERSITY LIBRARIES

We are an equal-opportunity employer through affirmative action.

Assistant University Librarian for Public Services
University of California, Irvine

The UC Irvine Library has reopened its search for candidates for a newly created position, assistant university librarian for public services. The main focus of an AUL position is the welfare of the library as a whole, within the context of specific divisional or functional responsibilities. The incumbent will report directly to the university librarian and will be a member of the Council of Department Heads. The AUL for public services is administratively responsible for the departments of circulation, government publications, reference, and special collections, each supervised by a manager at the Librarian rank, and for the branch Physical Sciences Library.

University of California, Irvine, with a total campus area of 1,510 acres, is located in Orange County, 40 miles south of Los Angeles and 5 miles from the Pacific Ocean. It has an enrollment of 12,500 students with a faculty of 700 including the Medical School. There are 30 doctoral programs in addition to the MD. The library has a total collection of approximately 1.1 million vols., and is on the OCLC, ORION, MELVYL, and CLSI online systems. It is an integral part of the University of California's research library system. The library staff consists of 47 academic FTE, 102 support staff FTE, and employs over 200 students.

Qualifications: graduate degree in library science and substantial library experience in an academic library. Demonstrated administrative skills and knowledge in planning, organizing, and setting priorities. Commitment to a consultative/participative managerial style with demonstrated ability to work effectively with people at all levels. Successful management experience with special attention to personnel concerns, preferably including those in a collective bargaining environment. Ability to provide creative leadership in dynamic and rapidly changing circumstances. Commitment to active programs in bibliographic instruction. Commitment to the overall goal of public service. Strong oral and written communication skills. Commitment to the importance of strong interaction between public and technical service operations in improving and extending the library's information services. Evidence of university service, research, and/or participation in professional associations. Highly desirable is academic background at MA or MS level in one or more subject areas.

Salary will be dependent on the candidate's qualifications for the position. Salary range as of Jan. 1, 1985: $35,500–$56,400. Benefits are equal to approximately 40 percent of salary.

Appointment will be made as soon as possible following successful completion of the search process.

Applications should be received by March 1, 1985, but will be accepted until the position is filled.

In their first letters, candidates should supply 1) a complete statement of their qualifications; 2) full resume of their education and relevant experience; and 3) the names, addresses, and telephone numbers of 5 persons who can supply frank and objective references on their qualifications for this position. Letters and documents should be addressed to: **Michael J. MacInnes, Acting AUL for Personnel Services, University Library, University of California, Irvine, POB 19557, Irvine, CA 92713; 714-856-7115.**

UCI is an equal-opportunity, affirmative-action employer.

Friday, five 7-hr. days, including 5 pm–9 pm each day. Salary ranges are: Librarian I, $19,000–$24,700; Librarian II, $21,000–$27,300. Excellent benefits include free tuition and assistance with university housing. This is a temporary 2-yr. position, with possibility of extension for one additional yr. **Deadline for applications is Jan. 5, 1985.** Submit resume, listing 3 references and salary requirements, to: **Box 35, Butler Library, Columbia University Libraries, 535 W. 114th St., New York, NY 10027.** An equal-opportunity, affirmative-action employer.

Special collections librarian, University of Arkansas, Fayetteville. Responsible for management of Arkansiana book collection, rare books, serials, newspapers, theses, ephemera, and faculty reprints. Duties include collection development, reference desk service, security, preservation, hiring and supervision of 1.5 FTE student and technical assistants, preparing occasional displays, maintaining department card catalogs and indexes, and serving as liaison with cataloging department. Reports to head of department and is acting head in his absence. MLS from ALA-accredited school required; knowledge of OCLC and AACR2; special collections experience desirable. Salary dependent upon qualifications and experience, $16,500 minimum. 12-mo., tenure-track appointment, TIAA/CREF, 22 days' annual leave. Available Dec. 1. As the major research and graduate institution in the state, the University of Arkansas, Fayetteville, a land-grant university, offers a full range of graduate, undergraduate, and professional degrees. Located in scenic northwest Arkansas, Fayetteville is a university town of 37,000 in a picturesque setting in the foothills of the Ozarks, an unspoiled region with clean air, a temperate climate, and a variety of cultural and recreational opportunities. Letter of application and curriculum vitae, with the names of 3 references should be submitted to: John A. Harrison, Director, **University Libraries, University of Arkansas, Fayetteville, AR 72701.** The University of Arkansas is an equal-opportunity, affirmative-action employer.

Technical services librarian. Reports to assistant director and is responsible for planning and directing the work of the acquisitions and cataloging staff of the library. Must be familiar with OCLC and experienced in original cataloging using LC. Will be involved in implementing automated systems in ordering and serials and in long-range planning for online catalog. Additional duties: part-time reference, some nights and weekends, collection development in specified subject areas. ALA-MLS and experience essential. Salary range $17,500–$19,000. **Apply by Dec. 15** to: Director, **D'Amour Library, Western New England College, 1215 Wilbraham Rd., Springfield, MA 01119.** An EOE.

Reports to head, acquisitions division. Qualifications: ALA-MLS. Minimum of 2 yrs.' professional (post-MLS)

ALA

Executive Director

Library Administration and Management Association

A Division of the American Library Association

Responsible for the management and leadership of the Library Administration and Management Association (LAMA), a type-of-activity division of ALA, providing overall direction for its programs that are applicable to all types of libraries.

Position manages LAMA Headquarters operations. Implements LAMA programs including regional continuing education institutes, publications, and annual conference programs; facilitates professional relationships among librarians and libraries. The LAMA executive director is the chief operating officer for the activities and budgets of the division. Serves as coordinator, advisor, and spokesperson within ALA and the profession-at-large in LAMA's areas of responsibility: buildings and equipment, personnel administration, library organization, fundraising, public relations, statistics, and systems and services.

Analyzes policies and programs, recommends changes to the LAMA Board of Directors, and serves as the board's secretary at annual conference and midwinter meetings. Represents LAMA at educational, professional, and governmental meetings. Provides liaison with other organizations and agencies. Works with other ALA program directors and staff on ALA activities and on joint unit activities and projects.

Position qualifications: extensive knowledge of librarianship; demonstrated competence in a management and administrative position; ability to communicate effectively; demonstrated competence in the planning process, the design of continuing education offerings, and in proposal writing. The ability to work effectively with a wide range of groups and individuals, and a sensitivity to working with a volunteer membership organization. Evidence of qualifications may consist in part of an advanced degree in librarianship, and relevant experience in management.

Salary schedule: $28,900–$43,400, negotiable within the range. **Application with resume must be received at ALA by Dec. 28.** Interviews of final candidates will be conducted in late January at ALA Headquarters. LAMA intends to fill this vacancy by April 1, 1985.

Send resume to: **Personnel Office, American Library Association, 50 E. Huron St., Chicago, IL 60611.**

An equal-opportunity, affirmative-action employer

experience in technical services, preferably in an academic library. Basic knowledge of OCLC; prefer experience with OCLC Acquisitions Subsystem. Ability to work with foreign-language materials. Knowledge of library automation. Previous supervisory experience required. Acquisitions experience and knowledge of AACR2 and basic bookkeeping principles desirable. Salary: minimum $18,000; negotiable. 2) **Resource development librarian, humanities.** Search extended. Duties: responsible for all collection development activities in humanities disciplines, including selection of materials, evaluation of collections, and intensive collection building in specific area (selected annually) of total collection. Responsible for monitoring of funds associated with collection development activities. Works closely with approval plan personnel in refining approval plan profiles and with teaching faculty in collection building. Participates in formulation of resource development division policies and procedures. Trains and supervises 5 support staff. Qualifications: ALA-MLS. Minimum of 2 yrs.' professional (post-MLS) experience, preferably in an academic library. Academic background in the humanities required. Knowledge of at least one foreign language. Familiarity with OCLC and major bibliographic tools. Supervisory and organizational abilities. Salary: minimum $18,000; negotiable. 3) **Reference librarian, business (entry-level).** Search extended. Duties: provides comprehensive reference assistance, with emphasis on business and related social sciences, from a centralized reference collection. Prepares bibliographies and guides to the literature. Assists with bibliographic instruction and computerized reference services. Serves as reference division resource person in business. Responsible for reference collection development in assigned areas. Qualifications: ALA-MLS. Academic background in business, economics, or public administration required. 2nd master's degree in business-related field or 2 yrs.' preprofessional library experience preferred. Experience with online systems of bibliographic data retrieval desirable. Salary: $16,000; $16,500 with additional master's degree. Benefits: up to $85/mo. paid on health, life, and disability insurance package; 87.3 percent of Social Security paid for first $16,500 of salary; choice of retirement plans including TIAA/CREF; tax-deferred annuity program available; no state or local income taxes; 10.5-mo. appointment; faculty rank; 14 state holidays; dynamic, growing institution and community. **Closing date for applications: to ensure full consideration, applications should be received by Jan. 11, 1985.** Applicants should submit letter of application, complete resume, and names and phone numbers of 3 professional references. Employer will attend ALA Midwinter Placement Center in Washington, D.C. For additional information and to apply, contact: Susan S. Lytle, Head, Personnel Operations, **University Library, Texas A&M University, College Station, TX 77843; 409-845-8111.** An EEO, AA employer.

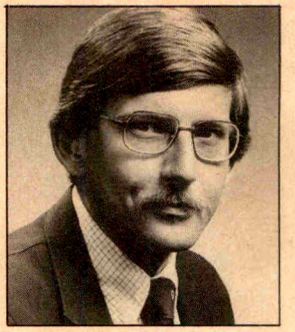
currents

Daniel Davila



Rodney Hersberger

Nancy Allen

Aug. 1 ALA member **Rodney M. Hersberger** became director of libraries at California State College/Bakersfield. . . . **Daniel Davila**, former chief librarian and dean of learning resources and cultural affairs at Passaic County Community College, Paterson, N.J., is now chief librarian at CUNY's Queensborough Community College, Bayside, N.Y. Davila, who has published extensively in the field of library services for Hispanics, has served as board president of the Hispanic-Purpose Center in Paterson and was a member of the New Jersey Arts Council's committee for the development of the arts for minorities. . . . ALA member **Nancy Allen** is now assistant director for public services at Wayne State University Libraries, Detroit, Mich. . . . The University of Illinois at Urbana-Champaign library school has named **Marie Bruce** the 1984 winner of its Robert B. Downs Award. Bruce, who is director of Huntington Memorial Library in Oneonta, N.Y., was honored with the library school's intellectual freedom award for protecting the privacy of library users during the federal investigation of a scrawled threat on the life of President Reagan that was found in a returned book. She refused federal agents access to Huntington's circulation records for five days, until they obtained the necessary court order provided for in New York State law. . . . **John C. Van Horne** is now librarian of the Library Company of Philadelphia (Pa.), succeeding **Edwin Wolf II,** who recently retired. . . . **Madeline Hendrix**, coordinator of libraries and instructional materials for the Sewanhaka Central High School District (N.Y.) has won the Distinguished Alumni Award from the Division of Library and Information Science Alumni Association of St. John's University, Jamaica, N.Y. . . . ALA member **Margaret Kimmel**, professor in the School of Library and Information Science at the University of Pittsburgh, Pa., is now president of the U.S. Board on Books for Young People, a section of the International Board on Books for Young People. . . . **Thomas T. Surprenant**, former associate professor at the University of Rhode Island Graduate Library School, Kingston, is now director of the Queens College library school in Flushing, N.Y. He succeeds ALA member **Richard J. Hyman**, who resigned as of Sept. 1 to return to full-time teaching and research. . . . ALA member **Michael Furl** recently became director of the Auglaize County Public Library in Wapakoneta, Ohio. . . ALA member **Jordan Scepanski**, former director of the Central/Science Library at Vanderbilt University, Nashville, Tenn., is now director of university library and learning resources at California State University/Long Beach. . . . **John Fuchs** is now director of the Berkshire Athenaeum in Pittsfield, Mass. . . . At University of California/Berkeley **Carol Alexander** is now head of the Science Libraries Department and **Elizabeth Byrne** now heads the Environmental Design Library. Alexander last served as director of the Office of Library Systems and Services at the Environmental Protection Agency; Byrne was head of the Design, Architecture, Art and Planning Library at the University of Cincinnati (Ohio). . . . **Barbara Pratt Mladinov** is now director of Bethlehem Public Library, Delmar, N.Y. She succeeds **John S. Hodges**, who resigned to become director of the Hewlett-Woodmere Public Library on Long Island. Both are ALA members. . . . ALA member **Terri Delke** recently became director of a new public library in Greenfield, Wis. She last served as library consultant for the Arrowhead Library System in Virginia, Minn. . . . ALA Councilor-At-Large **Charlotta C. Hensley** is now assistant director for technical services at the University of Colorado Libraries, Boulder. Hensley was also 1981/82 president of ALA's Resources and Technical Services Division. . . . ALA member **Stephen A. Kershner**, former director of the Geauga County Public Library, Chardon, Ohio, became joint director of the Baldwin and Bloomfield Township Public Libraries, Bloomfield Hills, Mich. He was succeeded at Geauga County PL by another ALA member, **Larry Corbus**. . . . **William D. Matthews** is now manager of the Computer Services Division at Engineering Information, Inc., New York, N.Y. A former editor-in-chief of the *Journal of Library Automation*, his other library appointments have included those of staff associate for information technology for the National Commission on Libraries and Information Science, Washington, D.C., and director of systems for the New England Library Information Network (NELINET). . . . The College of Insurance, New York, N.Y., recently appointed two ALA members to its library staff: **Beverly Rosignolo** as chief librarian and **Gladys Hodapp** as associate librarian. . . . ALA Member **Deborah Voight Loeding**, formerly with the Kanawha County Public Library System in Charleston, W. V., has been appointed library relations coordinator at H.W. Wilson Company, New York, N.Y. . . . ALA member **Katherine Chiang**, former head of the Entomology Fisheries and Wildlife Library at the University of Minnesota, Minneapolis, is now computerized data services librarian at Cornell University's Albert R. Mann Library in Ithaca, N.Y. . . . ALA member **Renwick Garypie** is now director of Garfield County Library, New Castle, Colo. . . . **John W. McGinty** is now associate university librarian at Fairfield (Conn.) University. . . . ALA member **Bill Serynek** is now director of the Massapequa Public Library, Long Island, N.Y. . . . **G. Garry Warren** is now director of libraries at Fort Hays State University, Hays, Kans. An ALA member, Warren last served as director of the Henderson State University Library in Arkadelphia, Ark. . . . **Debra J. Holland** recently became adult services consultant at the Mid-York Library System in Utica, N.Y. . . . June 30 **E. Graham Roberts** retired as director of the Price Gilbert Memorial Library at Georgia Institute of Technology, Atlanta. An ALA member, Roberts was instrumental in establishing GIT's School of Information and Computer Science in 1963 and also served on the first Board of Directors of the Southeastern Library Network (SOLINET). An endowment fund for library resources has been established in his honor at GIT. . . . ALA member **Nancy Sykes Strachan** is now reference librarian at Roanoke (Va.) Public Library. . . . ALA member **Julius F. Ariail** is now director of libraries at Georgia Southern College, Statesboro. . . . ALA member **John Dunkelberger** recently became head of reference at Urbana (Ill.) Free Library. . . . Recent library appointments at Harvard University, Cambridge, Mass., include: **Robin M. Carlaw** as curatorial associate in the Harvard University Archives; **Timothy Edward Connor** as head of public services for Harvard-Yenching Library; **Cathleen H. Conroy** as serials conversion project coordinator of Harvard University Library; and ALA member **Assunta Pisani**, specialist in book selection in the Harvard Collection Library, who will also be administrative head of the Collection Development Department of Harvard College Library for a three-year period. . . . ALA member **Sarah Mathewes Sartain**, recently became associate librarian for books and serials at the Virginia Historical Society in Richmond, Va. . . . Recent appointments at Columbia University Libraries, New York, N.Y., include: **John Aubry** and **Ellen Scaruffi** to the Rare Book and Manuscript Library, Aubry as reference librarian/bibliographer and Scaruffi as curator, Bakhmeteff Archive; **Susan Barnes** as head of reference in the Health Sciences Library; **Yukino Nakashima** as curator of Japanese collections in the Law Library; **Alan Schaplowsky** as head of serials acquisitions; **Sarah Spurgin** as reference librarian in the Humanities and History Division; and **Virginia Kerr** and ALA members **Ann Bevilacqua, Edward Goodman**, and **Janice Woo** as indexers of the *Avery Index of Architectural Periodicals*.

Deaths

Anne English Stewart Furlow, 50, former chief librarian at the Treasury Department, died Sept. 13. She also helped to establish the Federal Maritime Commission's law library. . . . **Charles R. Joyce**, 55, director of the Kansas City (Kans.) Public Library since 1978, died Oct. 3. . . . **Ruth Ulman**, former associate editor in the General Publications Department at H. W. Wilson, died Oct. 6. □

New kind of library launched in Scotland

For teens only, "experiment" goes over big with unemployed youth

by Janet Rae

A TEENAGE LIBRARY, described as "a complete anathema to many librarians," has proved so popular in Johnstone, Scotland, that young people are traveling as far as 25 miles to use its facilities.

Johnstone, near Glasgow, is a town where unemployment among the young currently stands at 82 percent. To provide a service for the unemployed and attract an age group normally passive about libraries, the District Council's Library Service decided to go out on a limb. Last February it opened the experimental Johnstone Information and Leisure Library (JILL) in a classroom of a former elementary school.

The building already housed a training workshop for unemployed youth and an information service on welfare and housing. The library was meant as an extra resource.

Although specifically aimed at the 16-to-19-year-old age group, the library's appeal proved wider. At the end of the first six months, 3,500 young people from 12 to 20 had joined as members.

What makes JILL popular is that it breaks so many rules of conventional library collections and management. And this is the chief reason why head librarian Monica McBride describes it as the type of place that would make many librarians flinch.

Noise part of the scene

First, she points out, there is "the noise level." In the background, the noise comes from a hi-fi system and its speakers, blurting out a continuous stream of pop music, some played by special request. There is foreground noise, too, either from groups of teenagers gathered around the hot-beverage vending machine, or around a table and a lively game of Monopoly. "Everyone anticipated problems with behavior," says McBride, "problems with vandalism or hooliganism. But, touch wood, we've had no problems yet. Even if they sit and swear we don't interfere, because that's the way these kids talk to each other. But if they become abusive, they are asked to leave."

Janet Rae is a freelance writer and regularly contributes to *The Scotsman* newspaper and *The Times Educational Supplement Scotland.*

Leniency pays off

In a library without controls such as fines or other fees, one would expect to suffer vanishing stock. Surprisingly, this hasn't proved the case. Some early troubles, such as false names and addresses appearing on membership cards, were easily resolved by requiring new members to provide proof of their address.

Lending rules are lenient. Members may check out library materials for one month. This includes two items from the library's collection of cassette tapes, computer games, and long-playing records. (Singles from the Top Twenty, which the library keeps up to date, are allowed out for only one week.)

JILL doesn't distinguish between fiction and nonfiction, or between juvenile and adult. All the books are shelved according to subject category, and each category is identified with a symbol on the spine of the book. For example, "Magic and Supernatural" has a witch on a broomstick; "Family and Home," a house; "Space and Fantasy," a

Patrons can borrow long-playing records for one month, except for singles from the Top Twenty that the librarian keeps up to date.

rocket ship; "War," a tank, and so on. The category of "Sexy Books," with its distinctive heart symbol, includes new-wave paperback romances and titles by Harold Robbins and Jacqueline Susann.

One of the benefits of displaying books by category is that teens with literacy or numeracy problems are not made to feel out of the ordinary. Easy-reading books have been unobtrusively included in relevant categories.

Materials strategically placed

The library's policy of "face-out" display—an attempt to attract reluctant readers—is also credited with capturing a new audience. Paperbacks make up most of the collection and are displayed in four sections of burgundy-colored shelving (comfortable chairs and tables are part of the same color scheme), and the audiovisual materials are similarly presented.

Though most of the library's offerings reflect the demands of the current teenage pop culture, weightier materials are also close at hand and sometimes strategically placed. For example, the category of "Language and Literature," with its Oxford's *Annals of English Literature* and its collection of Graham Greene novels, has been shelved next to the collection of books on "Pop and Rock." Other similar material includes language tapes and computer software for educational exercises.

Strangely, the library's collection on careers and jobs—categorized as "Help Yourself" (with titles ranging from *Jobs in the Building Trade* to *Coping With Interviews)*—has received scant attention. In a high unemployment area, this is an incongruity which McBride hopes to rectify by changing the shelf location.

AV outstrips book loans

When the library first opened, the enthusiasm for computer games was overwhelming. The library's one microcomputer, available for half-hour sessions, is still booked up one month ahead. The use of this machine, plus the demand for computer software on loan, outstripped the demand for books. As teenagers became used to the library, however, it was discovered that book circulation increased. During the first month, figures were: 1,745 audio; and 1,162 books (579 fiction and 583 nonfiction). By the seventh month circulation had increased to: 2,784 audio; and 1,715 books (1,165 fiction and 550 nonfiction). Library holdings currently stand at 5,000 books and 4,000 audio. In print material, preferences are clear: comics and comic-books circulate the highest in the fiction category, followed by "Spine-chillers" and "Humor." Books about pop and rock music are the most frequently borrowed in the nonfiction section.

Close quarters belie activity

Perhaps the most startling fact about JILL is the space it occupies, a 20-by-30-foot room. At any given time, one usually finds a full house: A group of 36 youngsters drinking coffee, listening to music, reading comics or magazines, or playing one of many board games. Some might also be watching a video of their favorite British television show, "Top of the Pops," which is featured twice weekly in the library. Since the regular staff of three librarians has discovered that demands often have to be met on a one-to-one basis, which is very labor-intensive, 36 is a full house indeed.

This past summer, during school vacations, the librarians had part-time use of an additional room to screen music video, an activity which has resulted in the YAs writing and producing a bi-monthly magazine. The magazine is distributed to schools and youth clubs. The library also operates a "swap box" for comics and tapes, and a computer club is taking shape.

JILL was started through an urban aid program with an initial grant of almost $26,000 U.S.: $18,450 for materials and $7,380 for furniture and equipment. Although it is not yet one year old and was "an experiment" meant to last three years, JILL's success is so unequivocal that its funding is about to be included in the district's mainstream library budget. □

There is no one good reason to use Book Trak™ from Follett. . . There are FIVE!

1. On-line circulation system
2. Ordering system
3. Cataloging system
4. Catalogue card and label printing system
5. Magazine control system

Book Trak from Follett is the most widely used system in the marketplace.

There are now over 1,000 Book Trak installations in the field helping librarians all over the country save hundreds of workday hours. And, Follett *doesn't just sell* Book Trak. Follett provides back-up support and service. Call toll free any of our on-staff MLS degreed librarians who are ready to answer any questions you may have regarding the Book Trak system. Book Trak's unique features—combined with its support—make Book Trak the wisest decision for library management applications.

ala report

Executive Board fall meeting

Exec Board will hand Council list of AASL issues

ALA Executive Board members had rescheduled their regular fall meeting at Headquarters so that representatives of the American Association of School Librarians could participate in a discussion of AASL concerns before traveling to their national conference in Atlanta. President E. J. Josey called the full board to order just after 8:30 a.m. Oct. 24, but no one representing the school librarians' group appeared at that time.

Present were: President-elect Beverly P. Lynch, Treasurer Patricia Glass Schuman, Executive Director Robert Wedgeworth, Immediate Past President Brooke E. Sheldon, Judith R. Farley, Regina U. Minudri, David P. Snider, F. William Summers, Arthur Curley, Jane A. Hannigan, Margaret E. Chisholm, and Elizabeth Futas.

As chair of the board subcommittee appointed to address the AASL Future Structure Report requesting more autonomy, Minudri presented the seven issues discussed at the joint ALA–AASL meeting Sept. 26 (*AL*, Nov., p. 735–36). Minudri also distributed a follow-up report from AASL Executive Director Alice Fite in which AASL leaders reviewed the Sept. 26 discussion. They asked the Exec Board to recommend to Council that the ALA governing body affirm the division's right to speak as the "singular voice for school librarians," offer a "differentiated dues structure" permitting people to join AASL without joining ALA, seek interest on unexpended cash balances, schedule its own conferences, contract for the ALA services it desires, determine its own salaries, and affiliate with other organizations without Council approval. These measures, AASL believes, will allow the division to increase its membership and revenues and permit AASL to represent school librarians more effectively.

Minudri said she did not favor all of the measures but suggested some issues might be explored by appropriate ALA channels. Board members expressed sensitivity to AASL concerns, but said many of the issues had been debated and resolved in the Operating Agreement of 1982. Lynch commented: "It's an insult to ALA that no one from AASL bothered to come to the Executive Board meeting."

The board voted to present to Council at the Midwinter Meeting a full information report on the AASL discussions. The board will also express to Council its belief that the current ALA Constitution, Bylaws, and policies governing the relationships of the divisions to the Association are appropriate. The board also asked COPES to report on payment of interest on division unexpended cash balances as stated in the Operating Agreement.

After the action had been completed, Fite entered the board room and apologized for being delayed. Board members had no questions.

Overhead study approved

Si Wilson, ALA controller, presented the 1982–83 overhead study, explaining that it will be used to allocate overhead costs to ALA units during the coming year. Wilson defined overhead as real expenses that could not be precisely identified with a direct activity.

Wilson said the study shows the overhead allocated to divisions was $1,002,000. It covered the ALA distribution center, reprographics, the Headquarters Library, Public Information Office, membership services, and general and administrative costs. The overhead allocated to AASL, for example, was $103,137; the division dues revenue amounted to $77,000.

The board accepted the study.

ALA general fund meets target

Wedgeworth reported that the ALA general fund ended the 1983–84 fiscal year on target, with revenues at $8,692,810 and expenditures of $8,668,898.

The state of Illinois, he said, has granted the ALA request for a continued real estate tax exemption on Headquarters property.

Committee on Program Evaluation and Support Chair Barbara Markuson said that staff and members "can take pride in the results of restraint, economy, and continued creative actions in revenue generation" in the 1983–84 fiscal year.

COPES recommended a 1984–85 budget ceiling of $9,564,278, slightly larger than the figure adopted at Annual Conference. Citing an "emergency-or-critical-situation" option, COPES recommended adding $22,550 for the executive director search, $25,000 for a new employee in accounting, and $500 for Josey's Presidential Committee on Library Services to Minorities. COPES deleted the conference reserve and recommended a zero balance to begin the 1985–86 budget process against projected annual revenues, moving toward a pay-as-you-go philosophy.

The 1984–85 budget was unanimously adopted by the board. The budget reserves $120,990 for revenue-generating and program activities and sets the general fund reserve at $76,690. Final figures will be presented at Annual Conference.

Endowment "loss" questioned

Senior ALA Endowment trustee William Jackson reported ALA assets of $3,423,000, including $1.2 million for Huron Plaza, and indicated satisfaction with the Northern Trust Company's present management of ALA funds. The strategy, he noted, was to shift slightly to fixed income investments (see box).

Treasurer Schuman, chair of the board's Finance and Audit Committee, expressed concern over the loss of nearly $100,000 in the market value of ALA holdings. Hannigan demanded to know if the loss was explicable.

Jackson said that after the ALA funds were moved from the First National Bank of Chicago to Northern Trust at the board's request in 1983, the officer in charge of the ALA account left abruptly and was not replaced for several months. The losses were on paper only, Jackson said, and if the account had been active during that period, ALA might just as well have lost as gained income. He said it was premature to judge Northern Trust in its first year of ALA fund management and he has confidence in its supervision.

Strategic planning put on hold

Past President Brooke Sheldon presented the board's Directions and Program Review Committee (DPRC) redefinition of the Process Planning Group charge stated on page 4 of the new *ALA Handbook of Organization 1984–85*. The charge, unanimously approved by the Executive Board, now specifies that the Process Planning Group is a broadly based representative ad hoc committee composed of the 1984–85 Executive Board DPRC members plus representation from the Planning Committee (1), divisions (2), round tables (1), chapters (1), Committee on Organization (1), and COPES (1). It was established to initiate strategic long-range planning for the organization as a whole. When the working draft for the plan is approved, the committee will be dismissed, January 1986 at the latest.

Sheldon also presented the 22-page report of the PPG meeting at Headquarters Sept. 21–22, facilitated by consultant Glenn

ALA endowment investments

As of Aug. 31, 1984, ALA owned stocks in Merck & Co., Inc., Warner-Lambert, American Greetings, K-Mart, Masco Industries, AMP Inc., Hewlett-Packard, International Business Machines, Minnesota Mining and Mfg., Schlumberger, Inc., Atlantic Richfield, Knoll International Inc., Masco Corp., Celanese Corp., Loctite Corp., Morton Thiokol Inc., Westvaco Corp., Nucor Corp., Sundstrand Corp., General Electric Co., Thomas & Betts Corp., and USF & G Corp.

OCLC UPDATE

LS/2000: Five-Star Support

"I'm just delighted with the User Support Center—I can't imagine getting any better service. I get immediate response to every problem."

Carolyn Fishel
Glendale Adventist Medical Center
Glendale, California

When you're evaluating local systems, support is just as important as system features and cost. There are many local systems; only OCLC provides the depth and quality of support that is currently experienced by 31 sites. When you choose a local system, you want one organization that is responsible for all system support. At OCLC, we accept that responsibility. When you choose LS/2000, depend on us for five-star support. For more information, call today.

7-days-a-week, 24-hours-a-day, one toll-free call puts you in contact with our User Support Representatives and System Analysts. With our issue tracking system, we keep you current on the status of problems.

Our ten Project Managers are librarians with extensive library automation experience who ensure that LS/2000 meets your automation goals. They translate your policies and procedures into system parameters to make LS/2000 work for you.

Our hardware team works with you to design a system that meets your current needs and allows for growth. One of these specialists will work with you throughout the implementation process.

Our **software engineers** can dial directly into your computer to **analyze and fix software problems** and regularly update your system with new software releases.

Our **training and documentation** enables your staff to utilize LS/2000's powerful capabilities to operate your library more efficiently. Extensive on-site training is provided, and the **training database** on your system simplifies new staff instruction.

Tecker. The report outlines activities that would be necessary to develop a strategic long-range plan and a management accountability program. The PPG asked the Exec Board to appropriate $48,000 for its FY 1985 activities and authorize Wedgeworth to execute a contract with Tecker. The contractual costs for the three-year project outlined by Tecker in October would total $80,000, Sheldon said.

Board members expressed varying views on the project's objectives, timing, costs, and final outcome. Wedgeworth said the questions indicated the board was not yet ready to move forward on the project.

Hannigan and Lynch moved the COPES recommendation that the board submit the PPG action plan to Council for review and approval. Summers suggested that Council would need more front-end information on Association planning in recent years and more back-end data on costs and benefits.

The board agreed that with more background and revision the PPG proposal should go to Council at Midwinter. The motion was passed by a vote of 7 – 3 with one abstention.

Merwine Case and the MLS

Responding to Council's concern over the Merwine Case and ALA support for the accredited MLS expressed at Annual Conference, the board had asked Wedgeworth, Hannigan, and Chisholm to prepare an action program on professionalism.

A roundup summarizing the Association's activities related to the professionalism issue was presented and the board requested the review be prepared on a recurring basis.

The report said the Merwine Case is scheduled for oral appeal arguments in the U.S. District Court of Appeals in New Orleans Nov. 14. Margaret Myers, director of the Office for Library Personnel Resources, will attend and report to ALA. If the case is remanded back to a lower court, the Association will determine its position.

The review also reported that six library schools will be discontinued between now and mid-1986.

OLPR has issued T.I.P Kits on "Employee Selection and Minimum Qualifications for Librarians," and "Writing Library Job Descriptions." OLPR also has established a task force to begin review of the ALA "Library Education and Personnel Utilization" statement and is planning a program on that issue for the 1985 Annual Conference.

The executive director search

Lillian Bradshaw, chair of the Executive Director Search Committee, provided a detailed progress report presented by Staff Liaison Ernest Martin. After the position was advertised (*AL*, Oct., p. 637), the committee met in Chicago Oct. 11 to establish procedures and timetables. The committee asked Bradshaw to write a "Dear Colleague" letter to a broad mailing list inviting nominations, with applications due by Dec. 1.

At a meeting scheduled for Dec. 17 – 18, the committee will review the list of applicants and agree on those to be interviewed Jan. 28 – 29. The committee will present a report and recommend a list of non-ranked candidates to President Josey by April 1, so that the Executive Board may interview and choose a successor to Wedgeworth at its spring meeting. The new appointment should be announced May 31. The new executive director is to take office Aug. 1.

Summers commented the board should be pleased at the committee's initiative.

ALA staff policies

Board Personnel Committee Chair Summers asked the board to adopt a tuition reimbursement policy which would encourage ALA staff members to continue their education. Subject to its ability to fund, the Association would absorb 50 percent of tuition costs, up to $500 for each employee. Summers also asked the board to authorize the expenditure of not more than $5,000 from the reserves to implement the policy. Both motions were unanimously adopted.

The board also adopted personnel policies regulating employment of unit staff by other ALA units as independent contractors and granting compensatory time to exempt employees for prolonged assigned overtime work.

A Revolutionary, Inexpensive Way to Protect your Periodicals...

ADVANCED HANDI-BIND™

Don't risk the loss or shelf wear of documents and periodicals before they are scheduled for hard-cover binding.

Advanced Handi-Bind is a fully automatic, one-step unit that can help you temporarily protect your collections.

YOU can do instant, easy and accurate binding.

It takes under 1 minute to bind office papers and records into sturdy volumes up to 2" thick.

It's 2 in 1! HANDI-BIND is both a Document Binder and a Paper Drill. Desk-top compactness!

Cooperative publishing ventures

Publishing Services Director Gary Facente told the board that ALA's new data entry equipment resulted in savings of $46,000 to *Booklist*. The department came within a tenth of 1 percent of its $4.5 million budget for both revenues and expenses. The Publishing Committee is working with division directors on a Midwinter Meeting workshop.

Evelyn Shaevel, executive director of the Young Adult Services Division, said unit leaders met with Publishing Services during the summer to learn the terms of the publishing business, how to deal with customers, and standard discount and billing procedures. YASD, the Association for Library Service to Children, and the Reference and Adult Services Division are working with Publishing on experiments to increase the sales value of division pamphlets.

Membership goal 40,000

Associate Executive Director Peggy Barber presented the first report from the new ALA Communications Department. The goal for the 1985 membership development program is 5,800 new members, an increase of 4 percent from 1984. To compensate for non-renewals following a dues increase, the membership efforts also will focus on retaining members in order to make the grand total of 40,000.

Past President Betty Stone is continuing to build the National Library Week Partnership Program begun in 1984; 50 national organizations representing more than 50 million members have joined in the NLW activities.

Conference Arrangements reports the Jan. 5–10 Midwinter Meeting in Washington will be the biggest ever, Barber said. All exhibit booths have been sold.

Programs and projects

Office for Library Outreach Services (OLOS) Director Jean Coleman presented an activities update on the Coalition for Literacy, which continues to raise funds for its three-year public awareness campaign. The Advertising Council and Benton & Bowles will launch the campaign at a press conference in New York City Dec. 12.

The Department of Education has granted $82,275 to staff a project director and part-time secretary for one year to be supervised by OLOS.

- In his management report, Wedgeworth said an ALA seminar for 70 armed forces librarians in connection with the Frankfurt Book Fair in October was so successful ALA has been asked to repeat it next year. Publishing Services Marketing Manager Paul Kobasa coordinated the seminar, and Wedgeworth and Communications Director Peggy Barber participated.
- The American Library Trustee Association proposes a new affiliate relationship between ALTA and public library boards for an annual fee of $35.

ALTA affiliates would receive a quarterly *ALTA Digest* of pertinent articles, a packet of orientation materials, and be able to participate in an ALTA hotline providing counsel, referrals, and kits of relevant materials. ALTA affiliates would not have the privileges of ALA and ALTA personal memberships, but would become part of a national network of lay library leaders.

Action on Realities

At the annual meeting of the White House Conference on Library and Information Services Taskforce (WHCLIST) in September, participants formally requested ALA President Josey to appoint an advisory committee to coordinate the full and effective use of two "powerful tools," ALA's *Realities: Educational Reform in a Learning Society* and the federal Department of Education publication *Alliance for Excellence: Librarians Respond to A Nation at Risk*. The board authorized Josey to name three ALA members to follow through.

Sheldon reported that 35,000 copies of *Realities* had been published in June and 20,000 more are being reprinted. She said the Texas Library Association, for one, is using the pamphlet.

ALA Report, cont. from p. 811

ALA Washington Office Director Eileen Cooke reported that President Reagan signed HR 2878, the Library Services and Construction Act Amendments, into law Oct. 17 (*AL*, Nov., p. 682). The law extending and expanding LSCA is PL 98-480. Reagan also signed the resolution continuing the appropriations for LSCA funding.

Action on telecommunications rates awaits further action by the Federal Communications Commission or Congress, Cooke advised.

She reported that the legislative workshop sponsored by the Legislation Committee at Midwinter Meeting Jan. 5 will involve representatives of ALA divisions in drafting legislative statements and developing fact sheets for use with Congress and community allies. The working tools at the session will be *Realities* and *Alliance for Excellence*.

Cooke called the attention of ALA members to the October *Lion Magazine* cover story on functional illiteracy. It features an insert by President Josey.

Robert Doyle, coordinator for IFLA '85, gave a progress report on the 51st Council and General Conference of the International Federation of Library Associations and Institutions to be held in Chicago next Aug. 18–24. The U.S. Organizing Committee has raised more than $120,000 in cash contributions and an additional $30,000 in pledges, he said.

Some 187 commercial and educational exhibits are being organized for the conference, and ALA will be given four free exhibit booths for the ALA Store in the Palmer House Lower Exhibition Hall. The National Commission on Libraries and Information Science is creating a Model Information Center to demonstrate how technology can provide information to organizations or developing countries.

Poster-session applications for Chicago due by Jan. 30

Poster sessions, the bulletin board displays of research, programs, and problem-solving ideas that have been featured at ALA Annual Conference since 1982, will be presented in Chicago in July. The two-hour sessions give members an opportunity to share ideas, publicize their research, and develop professional contacts.

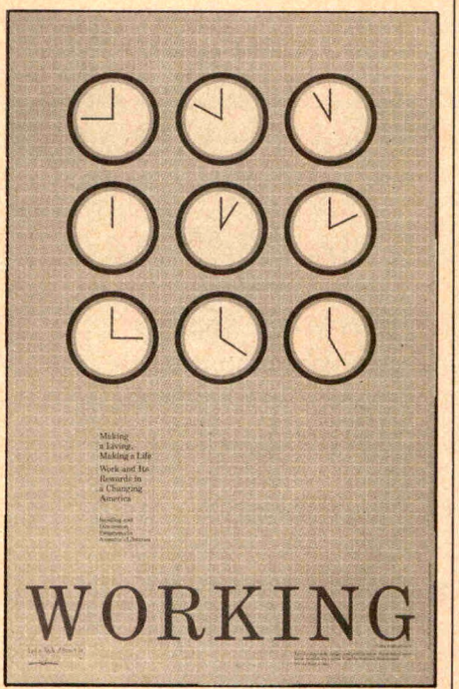
A slide/tape show explaining the sessions, giving examples of successful presentations and providing suggestions on how to create displays, is available from the ALA Headquarters Library via interlibrary loan. The show, developed by the Library Administration and Management Association Public Relations Section, can help promote the poster sessions concept at state association meetings and other conferences.

Booklets containing abstracts of 1984 presentations are available, as are application forms, from Poster Sessions, PIO/ALA, 50 E. Huron St., Chicago, IL 60611.

Publisher cooperates with "Let's Talk About It" project

After Studs Terkel's *Working* had been selected as one of the books to be discussed in the "Let's Talk About It" reading programs in libraries across the nation, Project Director Sandy Cooper learned that the paperback might go out of print.

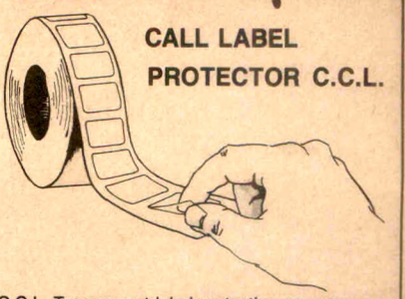
"We began calling Random House-Pantheon promotion people to see if they would put out a new paperback edition for the project," recalls Cooper, executive director of the Association of Specialized and Cooperative Library Agencies. "They told us the publisher planned to sell the rights in a package with Terkel's new book."



"Making a Living, Making a Life: Work and Its Rewards in a Changing America" is one of six themes selected for the "Let's Talk About It" reading and discussion project developed by the Association of Specialized and Cooperative Library Agencies. In addition to* Working, *by Studs Terkel, the reading list includes* Growing Up, *by Russell Baker,* Death of a Salesman, *by Arthur Miller,* The Professor's House, *by Willa Cather, and* Confessions of an Advertising Man, *by David Ogilvy.

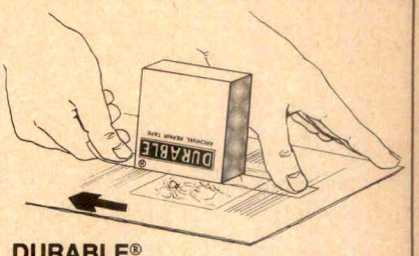
ALA persisted, and Pantheon saw the merits of "Let's Talk About It." A special trade paperback at under $10 is being published to accommodate the project. Cooper comments: "We're grateful for Pantheon's cooperation, and we encourage all libraries to get involved in the project."

Pilot programs will begin at local libraries in Minnesota, Mississippi, Ohio, Indiana, and Wisconsin next year using materials developed by ASCLA on themes of work, family, ethnicity, or children's literature.



CALL LABEL PROTECTOR C.C.L.

C.C.L. Transparent label protection are pressure sensitive and made of "Mylar", the polyester film that does not yellow with age nor becomes brittle. Comes with round corners, 1,000 labels per roll. sizes: 2" x 2-1/2" and 1" x 1-1/2"



DURABLE®
Archival Repair Tape

For the discerning librarian, book-binder, archivist, preservationist, etc. Plastic tape, the favorite tool of the layman discolours and weakens paper and is often impossible to remove without inflicting damage. Professionals have been deprived for a long time of a reasonably priced and archivally approved mending tape tissue paper. DURABLE - archival repair tape is a low bulk, ultra-thin transparent repair tape pressure sensitive, non-yellowing, reversible with a neutral PH. It has successfully passed tear and fold strength tests during artificial aging of up to 170 years.

Write or call today for more information and samples;

PLANET EARTH
No other globe tells you so much so simply about our world.

A gem among modern visual aids: COLUMBUS Planet Earth. Provides more information on this world than any globe before. Illuminated, with dual maps: political and physical; 34 cm (13-1/2") dia. (System B. Diewerge). Base in white or black satin paint finish. With instruction booklet by Prof. W. Gleissberg.

Differences in the time of day, duration of travels crossing the date line, sunrise and sunset, the birth of the seasons, day and night, the solar orbit, polar night — everything to be seen or read from the "Planet Earth".

For colleges, universities, schools and public libraries

Dual Map, Political light off, Physical light on.

With best holiday wishes, McFarland would like to quote a few quotes about our books. Suitably for the season, we hope they ring a bell.

Of, for instance, Eisner & Krinsky's *Television Comedy Series: An Episode Guide to 153 Sitcoms in Syndication* (McFarland, $49.95), it was said: "monumental...exhaustive index"—*AL*; "exhaustive...excellent"—*Choice*; "extensive index...gold and dross treated factually"—*WLB*; *LJ* was more modest: "useful." Even has guest stars.

Said the *Christian Science Monitor* of Sigoloff's *The Films of the Seventies: A Filmography...* ($29.95), it is "informative...useful...enjoyable"; restrained *LJ* observed, "the index is very thorough." Now, *Classic Images* called it "a whale of a deal" but they're of course a bit Hollywood.

Speaking of which, Glut's *The Frankenstein Catalog* (McFarland, 539p., $29.95; a 47-word subtitle classifies its contents) has, fittingly, excited some awed talk: "comprehensive...valuable"—*LJ*; "remarkable... recommended"—*Choice*; "beautifully annotated"—*RBB*. *The Big Reel* called it "incredible," natch.

"For those who dote on quotes" (we do, it's clear in this ad) *American Libraries* found Maikovich's *Sports Quotations: Maxims, Quips and Pronouncements for Writers and Fans* fit. It's $15.95 and not only edges the competition in total entries (1,782) but also is much better indexed.

Of Havlice's *Earth Scale Art* ($29.95: bibliography, artist directory, reproductions index): "Accurate... comprehensive...recommended," said *Choice*, adding, of Smith's *U.S. Television Network News: A Guide...* ($29.95), "convenient...recommended."

In its third printing, Marshall's late '83 *Back to Books: 200 Library Games to Encourage Reading* ($12.95, paper) is "a useful source of information" (*Booklist*) "ideally suited for the school library" but destined to "circulate well" in PL's to educators and caregivers (*Public Library Quarterly*) since it's "a welcome fund of ideas...clear and concise" (*Public Libraries*).

McFarland & Company, Inc., Publishers, Box 611, Jefferson, North Carolina 28640 (919-246-4460). Come see us in Washington (Booth 1713).

ALA Report

Theme materials on bestselling novels and citizenship are in the works. For information, write or call the "Let's Talk About It" Project, ASCLA, at Headquarters.

Baryshnikov, Cosby, and Sting to promote "A Nation of Readers"

Posters of Mikhail Baryshnikov, Bill Cosby, Bette Midler, and Sting will urge Americans to become a "Nation of Readers" in 1985.

Celebrity posters and other colorful graphics with specific ideas on how to celebrate the library during National Library Week April 14–20 and throughout the year are available from the ALA Public Information Office.

The "The Nation of Readers" graphics will also provide support for the Coalition for Literacy Advertising Council campaign scheduled to begin in early December. The coalition of 11 national organizations organized by ALA aims to recruit voluntary tutors across the nation, motivate adult illiterates to ask for help, and seek the involvement of the business community.

For the free, four-color *1985 Library Graphics Catalog* showing all posters and order information about ALA promotion materials, contact the Public Information Office, ALA, 50 E. Huron St., Chicago, IL 60611 (312-944-6780).

PIO also offers a free promotion kit (one per library) for the nationwide photo contest on the "Nation of Readers" theme which will highlight National Library Week. ALA encourages libraries to hold local contests for photographs about reading, announce the winners during NLW, and forward the winning photographs to ALA for judging in the national contest. National winners will be announced at Annual Conference in Chicago.

TV Travel offers prizes to Annual Conference goers

Two round-trip air tickets to Bermuda, including hotel accommodation and two meals a day, is the grand prize for one of the first 500 ALA Annual Conference attendees to book transportation through T.V. Travel, Inc., of Chicago.

Second prize is two free American Airlines tickets to any U.S. city, and third, fourth, and fifth prizes are certificates giving a 10-percent discount on the next ticket purchased through T.V. Travel. The winning names will be drawn by an ALA representative at the June conference in Chicago.

T.V. Travel is also offering free $150,000 flight insurance to all conference attendees and their families who purchase tickets through the firm. It also gives special negotiated discounts of 35–50 percent on American Airlines coach flights and low fares on alternate carriers. Attendees must book and purchase their tickets by May 1 to qualify.

Your input requested

• Informal tabletop presentations on end-user searching are needed by the Reference and Adult Services Division Machine-Assisted Reference Section for its 1985 Annual Conference program. Presentations will consist of materials and displays that will fit in a six-to-eight foot table, and participants should be available for 90 minutes to discuss their displays. Areas of interest include case studies, training, publicity, and research related to end-user online systems. Send your one-page proposals by Jan. 9 to Charles Gilreath, Head, Central Reference Dept., University of Arizona, Tucson, AZ 85721.

• The Library Research Round Table has issued a call for papers for presentation at its Research Forum at Annual Conference. Completed projects receive priority; authors should emphasize methodology and significance of research findings for library and information science. Selection decisions will be made at the Midwinter Meeting.

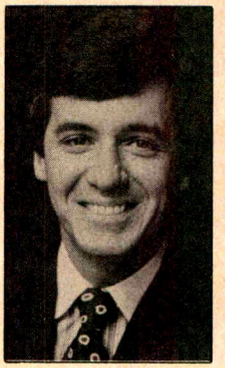
A notice of intent, including title and a 250–300 word abstract, must be sent by Dec. 15 to Pamela Snelson, Periodicals Dept., Drew University, Madison, NJ 07940. Papers sent to the Research Forums Committee may also be submitted to the Research Development Committee for consideration in the research competition if both committees are so informed.

• The ALA Commission on Pay Equity and the Office for Library Personnel Resources (OLPR) seek information on job evaluation studies comparing library workers with other employees, efforts to develop specific comparable worth legislation, union negotiations involving comparable worth, litigation cases, and other actions to achieve pay parity for library workers. Send data to Margaret Myers, OLPR, at Headquarters.

Parent, Wallace, and Russell appointed to HQ positions

Roger Parent, who has been executive director of ALA's Library Administration and Management Association since 1979, was appointed ALA deputy executive director effective Nov. 12. He replaces Ruth Frame, who retired from the post Jan. 31.

Parent, who earned an MLS at Simmons College, came to ALA from Princeton University Libraries, where he was staff development librarian in 1977–79. He has also served at the Mercantile Library in New York, Baruch College, and the Springfield (Mass.) Public Library.



R. Parent

L. Wallace

Linda Wallace, community relations coordinator for the Mideastern Michigan Library Cooperative, will start work as director of the ALA Public Information Office Dec. 2. Wallace had worked for the state-funded service agency for 47 public libraries since 1976.

Wallace received a BA in journalism from Ohio University in Athens and worked as a reporter for the *Flint Journal* for several years. The winner of two John Cotton Dana special awards, she chaired the LAMA Public Relations Section in 1983.

• Gail Russell was appointed continuing education officer in the Association of College and Research Libraries Oct. 15. Russell, who earned both a master's in Christian education and a doctorate in ministry at McCormick Seminary, has served as associate executive for personnel at the Presbytery of Chicago.

LEADS editor cited; McWaters joins *AL* staff

Beverly Goldberg, editor of the LEADS department of *American Libraries,* was cited recently for "extraordinary service to ALA members" in a ceremony attended by the *AL* staff, Publishing Services Director Gary Facente, and ALA Executive Director Robert Wedgeworth. In addition to recognizing Goldberg's contribution to the growth and quality of the LEADS job listings, the citation noted: "You have continually upheld the highest possible standards for equal opportunity by persuading hundreds of advertisers to disclose salary information in published advertisements and by closely monitoring the equality of opportunity represented in each and every advertisement. . . ."

Assisting Goldberg in providing expanded LEADS services will be new editorial assistant Lorene McWaters, formerly with ALA's *Booklist/Reference Books Bulletin*. A graduate of Illinois Wesleyan University, McWaters will assist in several *AL* editorial activities as well as in direct services to readers.

UTLAS *...effective solutions for libraries everywhere.*

LOOKING FOR A "LOOK-ALIKE" LIBRARY SYSTEM? THEN UTLAS IS NOT FOR YOU!

UTLAS is unique. We don't look like any other bibliographic utility. Over the past decade, we have developed systems that offer distinctively original solutions to library automation.

When you join the UTLAS network, ownership and control of data stay where they belong — with you. This concept, so fundamental to the UTLAS approach, provides many benefits:

Permanent storage of records in your database, just the way you edit them.

Multiple uses of your data, both for local functions and those better carried out on a centralized system.

Direct, dynamic linkage to a powerful, full-scale authority system.

A wide variety of products, including catalogues (COM, book, card); acquisitions and other specialized printed lists; locally-generated products (labels, purchase orders, management reports); and magnetic tapes of your data for loading into local systems.

Why not find out for yourself what UTLAS looks like? To make it easier, we've opened a new office in the U.S. Contact:

Joanna Rood
Manager, Sales — U.S.A.
UTLAS
701 Westchester Avenue
Suite 308W

Place of honor for ALA friends

A pair of handsome bronze tablets has been installed in the lobby of Huron Plaza, ALA's expanded Headquarters facility, to honor many members and other friends who helped raise the structure. The heading of the left tablet reads:

THE AMERICAN LIBRARY ASSOCIATION
IS RICH IN LOYAL MEMBERS
WE THANK THE 2596 MEMBERS AND FRIENDS WHO CONTRIBUTED
TO THE FIFTY EAST HURON FUND FROM 1981-83 AND HELPED TO FINANCE
THE HEADQUARTERS BUILDING PROJECT.
IN THIS PLACE WE PROVIDE A SPECIAL THANK YOU
TO OUR
PATRONS, GUARANTORS, AND CONTRIBUTORS.

Unit offerings from 50 E. Huron

Academic Libraries: Myths and Realities—Proceedings of the Third National Conference of ACRL, held in Seattle April 4–7, 1984. 414 pages, $20 to ACRL members, $28 to others from ACRL (0-8389-6787-6).

Coordinators of Children's Services and of Young Adult Services in Public Library Systems Serving at least 100,000 People, a directory compiled by the Association for Library Service to Children. 62 pages, $7.50 prepaid from ALSC, ALA. Make checks payable to ALA (0-8583-6774-4).

Financial Assistance for Library Education, Academic Year 1985-86, comp. by the ALA Standing Committee on Library Education. 48 pages, $1, from SCOLE (0-8389-6792-2).

"Graduate Library Education Programs Accredited by the American Library Association," by the Committee on Accreditation. Single copies free with a stamped, self-addressed no. 10 envelope. Intellectual Freedom for Children, a packet of letters, handouts, and program and display ideas collected by the Association for Library Service to Children. $6.50 from ALSC, ALA.

"Junior High Contemporary Classics," comp. by *Booklist*. Reprint from Dec. 15 issue, free with self-addressed, no. 10 envelope stamped with 37 cents postage. Multiple copies 25 cents each with discounts of 10 percent on 25–50 copies, 20 percent on 51–250 copies, 30 percent on 251–500 copies, and 40 percent on 501 or more, from Booklist/Junior High Classics.

Library Statistics of Colleges and Universities, NCES data published by ALA/ACRL, 180 pages, $12 to ACRL members, $16 to others, from ACRL (0-8389-6640-3).

State Publications on School Library Media Facilities, Library Administration and Management Association Buildings and Equipment Section School Library/Media Facilities Committee. 21 pages, $3.50 from LAMA.

"Without Technical Standards, Systems Cannot Grow," poster, Library and Information Technology Association. 28 x 20 inches, $5 from LITA, ALA.

ALA Handbook distribution. The *ALA Handbook of Organization 1984–85* will be mailed (without request) to all personal members who hold an office or an appointment in ALA and its units.

The *ALA Handbook of Organization and Membership Directory 1984–85* will be mailed (without request) in November 1984 to all organization members.

If you are an ALA personal member who holds no office or appointment and you wish a copy of the 1984–85 handbook, send a note of request for your free copy (include your membership number) to Elaine Wingate, Executive Office, ALA, 50 E. Huron, Chicago IL 60611. □

"We are drowning in information but starved for knowledge."

— John Naisbitt, Author of MEGATRENDS

You are a professional. A knowledge worker. And your job gets tougher every day.

Information is being generated at an unprecedented rate. But without the ability to quickly pinpoint essential data, information loses its value.

How do you cope with this deluge of data?

DIALOG® is your key to survival. It helps you extract key knowledge from a world flooded with information. It provides online access to over 200 databases in all fields of knowledge. With instant retrieval of precisely the information you need from among more than 100 million items.

To make your job easier, use the most powerful knowledge tool you can. Check DIALOG first, and find it faster.

For more information, contact DIALOG Marketing, 3460 Hillview Ave., Dept. 20, Palo Alto, CA 94304. Or call 800/227-1927; in Calif., 800/982-5838.

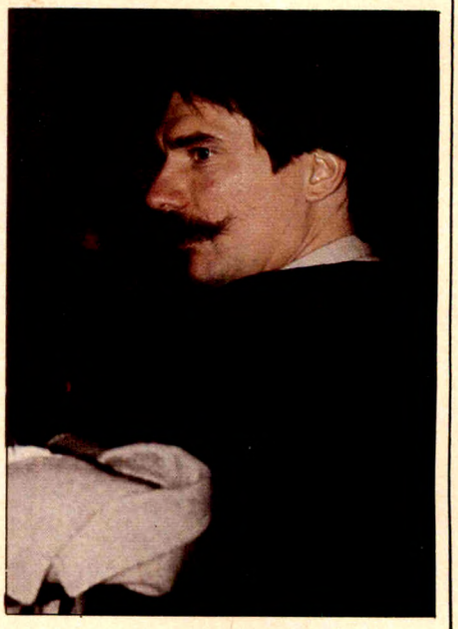
Gathered at the monthly Librarians' Table are, left to right along wall, Kathleen Johnson, Baker Library; Joe Bourneuf, Widener Library; Maria Woodman, Museum of Comparative Zoology Library; Cathy Conroy, HUL; and head of table: Karen Carlson, Widener. Facing wall, right to left, are Cathy Balshone Becze, Hilles Library; Mary Anna Krause, Law School Library; Althea Aschmann, Andover-Harvard Theological Library; Joe Mazuranic and Christine Conroy, HUL; and opposite head of table, Pam Matz, HUL.



Joe Mazuranic, who joined HUL as systems librarian in July, finds the Librarians' Table an antidote to Harvard's decentralized structure. "It gives us the opportunity to see more distant librarians we wouldn't normally communicate with."

Librarians' Lunch Table fosters easy exchange of ideas at Harvard

A group of 11 librarians from separate locations at Harvard University Library gathered in October for the first Librarians' Lunch Table of the '84 – '85 academic year. Initiated in 1980, the Librarians' Table gives colleagues scattered throughout some 100 separate HUL libraries the chance to meet in a relaxed setting. No reservation is necessary.

Sponsored by the University Library's Committee on Communications and Orientation, the luncheon takes place on the first Thursday of each month at the Harvard Faculty Club main dining room.

"That's where we take any original ideas we want to run past our colleagues," said Kathleen Johnson (below), corporate information librarian in the Business School's Baker Library. "We're not embarrassed there, as we might be before an administrator.

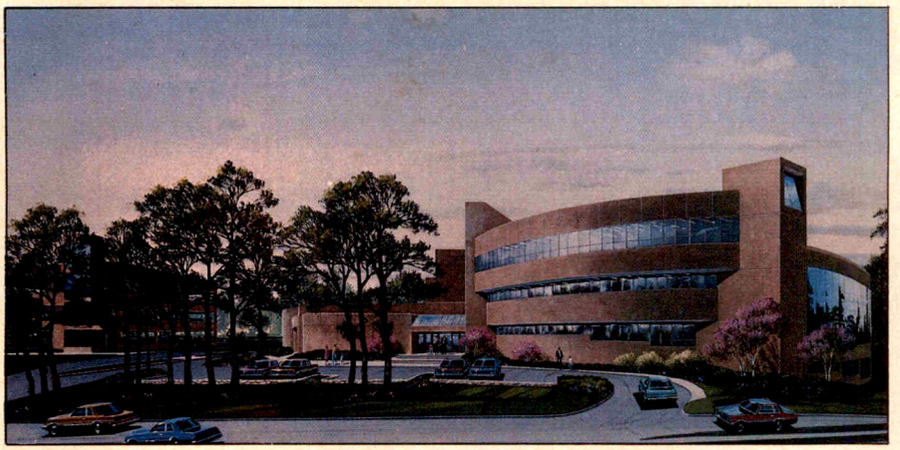
"Some of my colleagues might ask, say, whether we should establish small databases on an IBM PC, such as a career advisory service for students. So we would chat about setting up such a database, what should be put into it, and so on. It's very helpful."

The monthly event allows those who have spoken on the phone but never met to exchange information face to face. It gives new staff members, such as Joe Mazuranic and Christine Conroy from the Office for Systems Planning and Research, an easy introduction to a varied group of associates.

"We can talk shop there in a fairly broad context," said Mazuranic, systems librarian. "A librarian from the Business School, for instance, was talking about a query concerning a national education database. So we can pick up information by talking to people we wouldn't routinely meet."

At the Librarians' Table, apartments have been found for incoming staff, databases evaluated, restaurants reviewed, and—most important—friendships fostered.—*Based on a report from Pamela Matz, editor in the University Library.*

Pam Matz, left, shares a story with Kathleen Johnson and Joe Bourneuf.



Postcards celebrate Irving groundbreaking

To help celebrate the recent groundbreaking for the $7.2-million Irving (Tex.) Central Library, an artist's depiction of the building (above) was made into a postcard.

Designed by the firm of Foster + Meier Architects, the new 85,000-square-foot library is part of the Civic Center Complex. Its unusual shape, in part resembling a cathode ray tube, represents a functional solution to constraints of the site. Consisting of three floors plus a basement, the facility could accommodate another 120,000 square feet by adding a fourth floor.

At the left of the photo, just to the left of the entrance, is a meeting room complex and video production studio. The studio is linked to the city's cable TV network.

Those who collect library memorabilia may obtain a postcard free by sending Director Lamar Veatch an SASE at the Irving Public Library System, POB 152288, Irving, TX 75015.

Diane Tebbetts, assistant librarian, looks at a day's trash accumulation.

Messy message causes a stir

That pile of trash in the lobby at the University of New Hampshire library forced students to confront their own mess. Whether or not they get the message, however, remains to be seen.

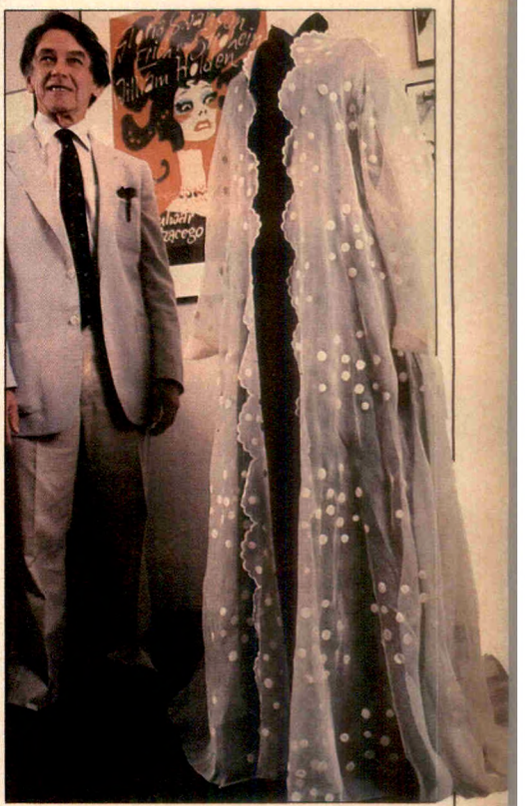
Donald Vincent, UNH librarian, conceived the exhibit, which was mounted for two days in October. He told *AL* that the display "was meant as a dramatic gesture to let students know how much material was gathered from their snacking on one day."

The library's vending room is one of the largest suppliers of food and drink through machines on campus. Vincent dreamed up the trash heap when students ignored appeals to confine pop cans and candy wrappers to the vending area. "A lot of bad spills on the library's six floors resulted," Vincent said, "and the litter could attract vermin."

He doesn't hold out much hope that he can change student habits. "Right now student government is demanding vending machines in the library. Our display is more of a political ploy than anything," Vincent said.

Salute to Gloria Swanson

Two hundred of the half million Gloria Swanson items in the Harry Ransom Humanities Research Center are on display through January. This is the first major showing since the University of Texas/Austin received her archives in November 1982.



"Theater is big business for us," said Decherd Turner, director of the Harry Ransom Humanities Research Center. Beside him is a gown from the Gloria Swanson collection.

"A Visit with Gloria Swanson" includes photographs, movie posters, and wardrobe selections from the actress, whose career spanned 70 years in film, theater, and TV.

"Her favorite color was black; you would always see her wearing it," said exhibit curator Raymond Daum, who maintained a 25-year friendship with Swanson. "She also loved anything Oriental, so we used black and Chinese red throughout the exhibit."

The display addresses her widely varying interests, including the environment, art, and science. Two video compilations present significant moments in Swanson's life.

Center Director Decherd Turner said of the Theater Arts collection, which encompasses the Swanson material, "Theater is big business for us, because it is the visualization of a profound literary base. The Swanson collection is important because it profiles the whole period of modern moviemaking."

LETTERS AND BRIEF COMMENT FROM OUR READERS

American Libraries encourages signed comment on recent content in our pages or on matters of general interest to the library profession. Letters beyond 250 words will not be accepted or will be edited to fit space; longer contributions may be submitted to the "On My Mind" department.

Reagan was right

IN PRESIDENT REAGAN'S REmarks to the students of Jefferson High School ("Editors' Page One," Sept.), he was not discounting automation in media centers; he was merely reiterating what is ostensible to most as mere common sense.

Moore and Plotnik fail to see the facts: those things which forever get in the way of modernism. With all the super-duper fancy media centers, the nation's schools are still turning out stultified and uninformed high school dandiprats who can give you a history of Luke Skywalker, but think Plato is something you make into clay figures in elementary school. Far from needing more of such institutions, we need more *humans* running these chromatic monsters.

Only someone intentionally wanting to misunderstand the President's remarks would think he means to say that libraries and/or librarians are not important, or that media centers are useless in today's education. The inutility with which we are plagued today has nothing to do with Reagan's comments. It takes more than a CRT and an accessible database to unleash genius.

MARK HERRING,
E.W. King Library, King College, Bristol, Tenn.

"Phony non-issues"

IT IS TEMPTING TO TRY TO IGNORE Yveline A. Kalyanpur's emotional three case studies which seek to "prove" discrimination in the requirement of an ALA-accredited library degree (Oct., p. 629–30), but her Case A strikes close enough to home to warrant a response. I don't know why Kalyanpur's Afro-American female friend (assuming the facts are real and not contrived) chose to pursue a library degree at Indiana State rather than at Indiana. I am sure she had reasons, but it wasn't because of the tuition, nor is the "inconvenience" of a long commute race-related. We have had many of our students with jobs and family responsibilities travel farther than that because they knew what degree they wanted, and I cannot allow that effort and sacrifice to be ignored or trivialized. We have also had a substantial number of students from Terre Haute, and some of them carpool. Tuition for Indiana residents at state universities is fairly comparable, so it wasn't that. In addition, we have financial assistance opportunities, particularly for highly qualified and motivated minority students.

Qualifications considered worth having are also worth some effort and inconvenience, and that has nothing to do with Kalyanpur's charge of discrimination. Nowhere in her letter does Kalyanpur attempt to prove that her candidates were qualified for the positions for which they applied, or suggest that they were rejected because they were members of minorities. She only attempts to frighten us by telling us they sue because of their minority status.

I think this is very unfortunate, because we have enough real cases of discrimination without diluting them with phony non-issues. As we all sadly know, lawsuits are easy to file and difficult to defend. If we allow such fear of "trouble" to dissuade us from what we consider a fair and proper course of action, however, we will indeed deserve the low esteem in which so many now hold us. Furthermore, such cowardice does not deter legal entanglement, it invites it. This is a lesson I hope ALA leadership will learn, and learn quickly.

HERBERT S. WHITE, ALA member and dean, Indiana University library school, Bloomington

Bibliography Blues

by Carole Carpenter

Carole Carpenter runs a one-librarian library with an aide at a rural high school in Delaware. She received her library training at Bowling Green State University, where she also earned a master's in popular culture.

"I'm happy where I am," Carpenter reports, "but I know a lot of people who are underpaid." She had a staff member RIF'd recently and laments these tough times.

A lover of music and amateur rock singer, she has taken to the blues to express her anxiety for the put-upon and underrated. —*Ed.*

I work for a living. This is what I am:
A book pushing, underpaid librarian.
Be a professional: pay those L.A. dues
And try to present everybody's views.

Get serious, Jack!
I don't drive no Cadillac
And my house ain't big
And my clothes ain't the news.
Get serious, man!
I ain't got no KEOGH plan,
Ain't got no I.R.A.
And don't take no leisure cruise.
All I got is
I got the never ending
title sending
Bibliography Blues.

We hustle books (and buy 'em when we can)
To loan to J.Q. Public, understand?
We scrimp and save and salvage,
pinching every dime,
But they cut us back, anyway,
at budget time.

Get serious, Mack!
We ain't got no atlas rack
And subscription money's due.
Get serious, Joe!
The roof's about to go;
The door needs a lock;
And the heater blew a fuse.
All we got is
We got the never ending,
overspending,
Bibliography Blues . . .

You pick one for research and another to amuse.
You try to balance everybody's views.
But someone will censor,
no matter what you choose,
And leave you with a feeling
you're never gonna lose:

All we got is
We got those never ending
volume lending
library tending
Bibliogr . . .
griography Blues . . .
ooooooooo!

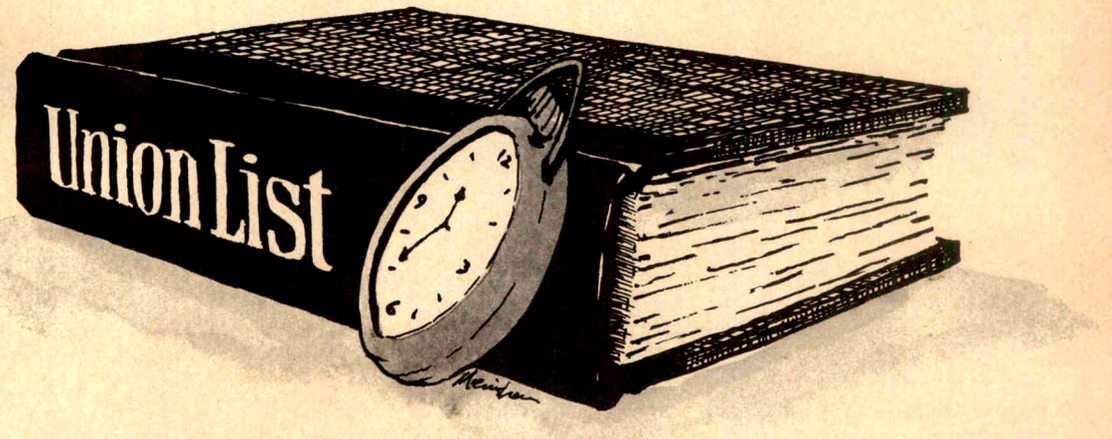
"Bibliometrics is non-science"

I HAVE NOT DENIED THE NEED TO weed, but if even the weeding which Bruce Farrar and Bill Bailey confirm (Sept., p. 588–90) continues, those traditional friendships between librarians and scholars, donors and patrons will evaporate, leaving no librarian unabashed.

Bibliometrics is non-science. Exact sci-

(Reader Forum, continued on p. 826)

Currency without the cost.



The cost of keeping a Union List current can be prohibitive. The staff hours alone are enough to make the best funded libraries cringe. Unless Faxon is there to help.

Our Union List incorporates the perfect combination of online maintenance and offline products. Data conversion takes 1–4 months. You can add holdings without full cataloging of records. And Union List is fully compatible with your local system.

Now you can generate the up-to-date information you want as hard copy, tape, or microfiche. More frequently and accurately than previously possible. And at reduced cost.

Let the savings begin. The call's on us.

800 225-6055 or 617 329-3350 collect

ence requires more sophistication than eighth-grade arithmetic. Empty shelves cost taxpayers more than bulging shelves. Moreover, all books are not created equal, they don't become obsolete in the same ways, and cold circulation is not the only criterion for measuring a book's use.

Whether used or not, Chalmers' *English Poets* (1810) and many other books are a cultural insurance policy, and the premium of retention must be paid whether the books circulate or not. Again, library publics are constantly changing, and amidst the rhythm of decay and renewal and successive waves of ethnics, the public library must be a center of stability at the same time that it is responsive in positive human terms. Each generation must build new additions and install balconies to house inevitably growing collections.

Library directors should be generalists with a traditional Ph.D. as well as training in cataloging and fundraising; and unemployed Ph.D.s in the humanities would probably make better librarians than most library school graduates because they know what's *in* the books.

I wish Farrar would read some Cooper criticism and get a copy of Waller's West Virginia book, *Deep in the Hearts of Men* (1924), for his library. In any case, extreme moderation in the weeding of library collections is a virtue. It is no vice. Better unread than dead.

J. Wesley Miller,
Springfield, Mass.

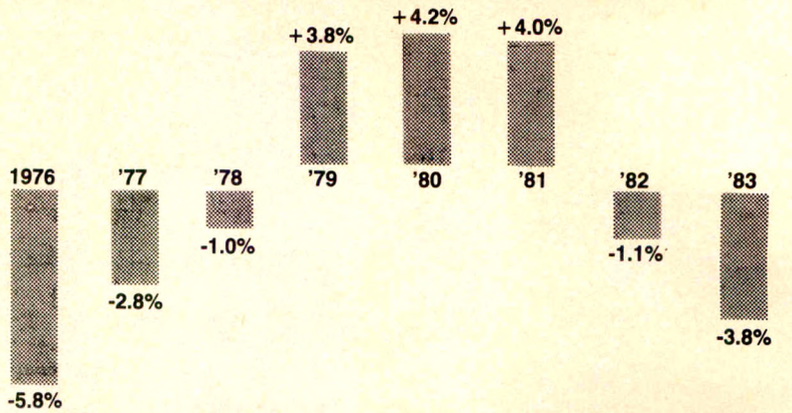
Are libraries back to boom and bust?

ARE LIBRARIANS BEGINNING TO slip back into some of the more wasteful and mindless spending practices of yesteryear? Things I saw and heard, and failed to hear, at the ALA Dallas conference aroused my apprehension. Sadly, the apprehension was strongly reinforced by statistics on library performance presented by Herbert Goldhor (July/Aug., p. 526).

At Dallas, the general mood seemed very cheerful and upbeat, after years of grimness. Nothing wrong with that. Many colleagues had recently gotten big raises or had changed to better-paying jobs, and most said that their libraries' budgets had been increased substantially—nothing wrong with that either. But there seemed also to be a suggestion that the new relative affluence of libraries was being regarded by many as simply a personal reward and not as an increased challenge or responsibility. Did I imagine it, or was there a lot less concern this year about giving better service to patrons and employers? And did I correctly observe an increased tendency to spend library funds on frills for the sheer joy of spending and of following fads?

Of course my observations were limited and unscientific, and so my concern might well be dismissed as baseless. However, it is much harder to dismiss what Goldhor's statistics indicate: that, very clearly, library productivity is once more declining rapidly after a few years of improvement.

Public library productivity*



***An interpretation based on Herbert Goldhor's indexes of the circulation and constant-dollar expenses of public libraries.**

The accompanying graph is derived from two of the indexes that were compiled for public libraries by Goldhor: the annual index of circulation level and the annual index of library expenses in constant dollars. The ratio of these two indexes is itself an index of productivity or efficiency (circulation versus expense); and the year-to-year change in this productivity ratio tells us whether productivity is increasing or decreasing and how fast.

As the graph shows, productivity in 1976 was decreasing at an annual rate of close to 6 percent. There was steady improvement for the next four years; but since then, the situation seems to have deteriorated, with productivity decreasing rapidly in 1983.

Admittedly, the data only reflect public libraries; and admittedly, circulation is not the only service indicator. Still, it would seem prudent for all librarians to take seriously the message in this graph.

Are librarians right back in the fools' paradise of a decade or two ago?

Ben-Ami Lipetz, ALA member,
State University of New York at Albany

"Knowledge base" not debased

IN PAULINE WILSON'S EXAMINATION (Sept., p. 563–68) of the issues surrounding the Merwine Case she complains about the "careless criticism" often leveled against library education. She presents two examples of this criticism and concludes that they amount to attacks on "the knowledge base of librarians—the knowledge [that librarians] use to provide library services."

I believe the two criticisms make a claim different than the one portrayed by Wilson. The first example suggests that what is taught in contemporary library education programs could be compressed into a few months if it were properly presented. By inference, it is reasonable to assume that this would free up many months for the presentation of substantial topics *not* currently covered by MLS programs.

The second criticism suggests that 10 percent of what is currently taught in MLS programs should continue to be taught in the programs, and that 90 percent should be taught on the job. There is an implication that coverage of more substantial materials should supplant the "90 percent" that would be better learned at work or during training for a particular position.

Neither of these examples denigrate the profession's knowledge base. Rather, they criticize the manner in which the base is taught and the degree to which the base is covered. They claim that what is presently taught can be learned quickly and that the "details" presented in library schools constitute only a small portion of the profession's knowledge base. Wilson equates criticism of library education with attacks on the utility and validity of the body of knowledge that distinguishes the library profession. With reference to the two examples cited, Wilson's equation is fallacious.

NOVA UNIVERSITY

Doctor of Arts in Information Science

A Computer-Based Program for Information and Media Professionals

The Program—
"Study while you work"
The computer-based doctor of arts in information science program brings Nova University to you. Most of the program can be completed at your place of employment and in your home in as little as three years.

Courses—
"Computer instruction"
You will use the computer to study in such areas as computer science, systems analysis and design, networking, telecommunications, and strategic management techniques for libraries and media and information centers.

Practicums—
"Research that counts"
You will address significant problems in your institution or organization. Nova "oncampus" faculty are available through electronic mail or telephone for guidance.

Regional Seminars—
"Bringing it all together"
Each year you will attend four weekend seminars. These meetings give you an opportunity to share your progress and experiences with other students.

Tuition—
"Partial payment plan available"
Tuition is $3500 per year. Quarterly payments of $875 help make tuition manageable.

Enrollment—
"Targeted admission"
An important condition for entering the program is that you be currently employed in a library, media/or information center and hold a master's degree in library, media, or information science.

Information—
"Immediate answers"
Call us today at **(305) 475-7047** or write to:

women

Employer-supported child care programs are examined in a new videotape available on free loan from the Women's Bureau of the U.S. Department of Labor. "The Business of Caring" depicts approaches taken by employers ranging from a retail store chain to a high-tech firm, including a daycare center at the workplace, a voucher system, and information-and-referral programs.

The 23-minute, color videocassette is available on free loan in ¾-inch format. Submit a written request to the Women's Bureau National Office at 200 Constitution Ave., N.W., Room S3305, Washington, DC 20210 or to any of the bureau's 10 regional offices. It can also be purchased in ¾-inch, Beta II, or VHS formats for $90 from the National Audiovisual Center, Order Section, Washington, DC 20409 (make checks payable to the National Archives Trust Fund Board).

Business Notes for Women was compiled by librarian Alice Sizer Warner as a teaching tool for seminars she has held on "Women and Business Ownership" and "The House-based Business" during the past five years. The 48-page, spiral-bound paperback is an expansion of the pathfinders Warner wrote about in the March 1983 *AL* (p. 150–51), describing over 100 suggestions, organizations, networks, agencies, books, articles, and other resources. $9 prepaid, $10.50 if billed from the Information Guild, POB 254, Lexington, MA 02173-0254.

Double discrimination. According to a recent statistical report from the President's Committee on Employment of the Handicapped, most disabled women did not participate in the massive movement of working-age women into the labor force during the 1970s.

The report, based on data from the Census Bureau, says that less than one-quarter of the nation's disabled women have overcome the dual barriers of disability and sex discrimination to find employment, and that disabled women also have smaller incomes and less education than nondisabled women.

Single copies of the report, titled *Disabled Women in America*, are available at no charge from the President's Committee on Employment of the Handicapped, Washington, DC 20210.

Bibliography on women in China. Over 1,100 monographs, articles, reports, and other materials on Chinese women are annotated in *Women in China*, compiled by Karen T. Wei. The emphasis is on 19th- and 20th-century English- and European-language publications dealing with women's economic conditions, the status of women, and modern women's movements. Includes author and title indexes.

The first title in Greenwood Press's Bibliographies and Indexes in Women's Studies series, the 250-page volume is $35 from Greenwood Press, 88 Post Rd. West, POB 5007, Westport, CT 06881 (0-313-24234-8, 84-10863).

Women and Wilderness profiles 15 women whose lives and careers center on the outdoors. Included are a marine biologist, a speleologist, a kayaker, and an Alaskan homesteader. Author Anne LaBastille, a wildlife ecologist who has lived for 19 years in a log cabin she built in the Adirondack Mountains, also examines the traditional barriers that have kept women indoors and how the feminist and environmental movements have changed these factors. The new paperback edition is $8.95 from Sierra Club Books, POB 3886, Rincon Annex, San Francisco, CA 94119 (0-87156-828-4).

nonprint

Media and Microcomputers *in the Library: A Selected, Annotated Resource Guide*, by Evelyn H. Daniel and Carol I. Notowitz, describes literature dealing with nonprint media published since 1978 (earlier items are covered by Daniel's *Media in the Library*, published by the ERIC Clearinghouse on Information Resources in 1978). The 579 entries are divided into sections on general information, audio, film, slides and photographs, toys, video, computers, functional activities, (such as selection, organization, and storage of materials), copyright, and telecommunications. 157 p., $24.95 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (83-42935, 0-89774-117-X).

Films on free loan. *Driving Drunk*, a half-hour film aimed at getting people who drink off the road, is available for a free 24-hour loan. The film was produced by the Walter J. Klein Co. in cooperation with the National Automobile Dealers Association, the Motor Vehicle Manufacturers Association, the Auto Importers Association, and several anti-drunk-driving groups.

Klein has produced hundreds of other consumer education, health, and safety films financed by industry, organizations, and government; most titles are available on free loan. For a free catalog write the Walter J. Klein Co., 6301 Carmel Rd., POB 2087, Charlotte, NC 28211 or phone 704-542-1403.

Delving into intershelving. *Accessible Storage of Nonbook Materials* contains suggestions for making nonprint items available for browsing by integrating them with print collections. Author Jean Weihs describes ways to intershelve and partially intershelve phonograph records, tapes, films, art reproductions and other two-dimensional opaque materials, three-dimensional and boxed materials (games, dioramas, globes, and other realia), videodiscs, and microcomputer disks. The 102-page, illustrated paperback also offers tips on introducing the idea of intershelving to staff and patrons. $19.50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (84-5281, 0-89774-084-X).

Non-Book Materials in Libraries is an illustrated guide covering the development, acquisition, cataloging, care, and use of nonprint media ranging from art reproductions and photographs to video and audio cassettes. Authors Richard Fothergill and Ian Butchart have updated their 1978 first edition to reflect recent developments in media librarianship.

Published by Great Britain's Library Association under its Clive Bingley Ltd. imprint, the 308-page manual is available in the U.S. for $23 from the Shoe String Press, 995 Sherman Ave., Hamden, CT 06514 (0-85157-345-2).

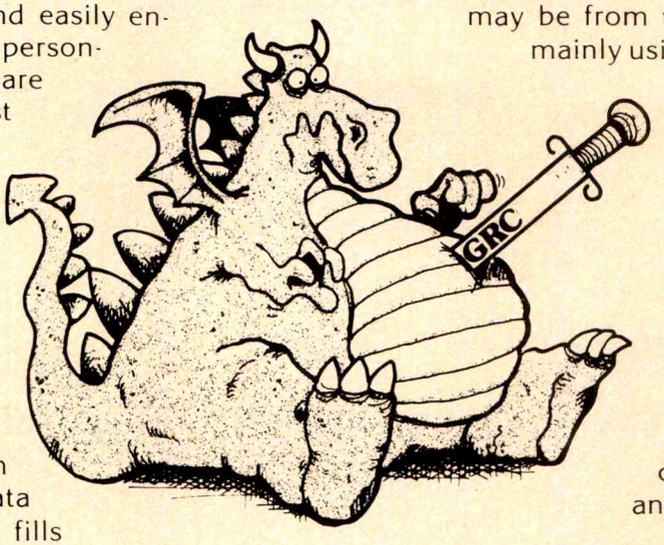
Maher, contains eight essays exploring uses of computers in the special-education setting. Among the applications discussed are computer-based assessment of special-needs students, computer-

GRCCOM Quest

CONQUER YOUR CONVERSION

General Research Corporation announces GRCCOM/QUEST, the microcomputer work station, designed to facilitate a library's retrospective conversion project. Transactions are quickly and easily entered by data entry personnel. These requests are then matched against the powerful GRCCOM resource database. Full MARC records, in all six LC defined formats, are returned to the library.



Easy to use forms. The form remains on the screen. The data entry person simply fills in the blanks.

No annoying repetitive prompts. The entry form is clear and selfexplanatory. Wasteful prompting is eliminated. Free access to all parts of the screen allows instant changes without re-entering the entire transaction.

Memory keys. Each field is remembered from the last transaction. When data is entered in order, much information is often the same. The entry person need only use a single key to duplicate a previously used field.

Individuals have different typing habits, from the very experienced to the one-finger typist. GRCCOM/QUEST does not require everyone to be the same. Input may be from the full keyboard or mainly using the 10-key keypad.

Short cuts are defined easily by the individuals and are saved from session to session.

Branch codes are defined by a single digit. The assignment to a particular number can be changed at anytime by anyone.

Call number prefixes can be defined by three characters and expanded to many characters when displayed on the screen.

General Research Corporation is a pioneer in the library automation field, supplying computerized catalog services since 1967. The bibliographic database represents holdings of more than 1000 U.S. and Canadian libraries receiving GRCCOM products and services.

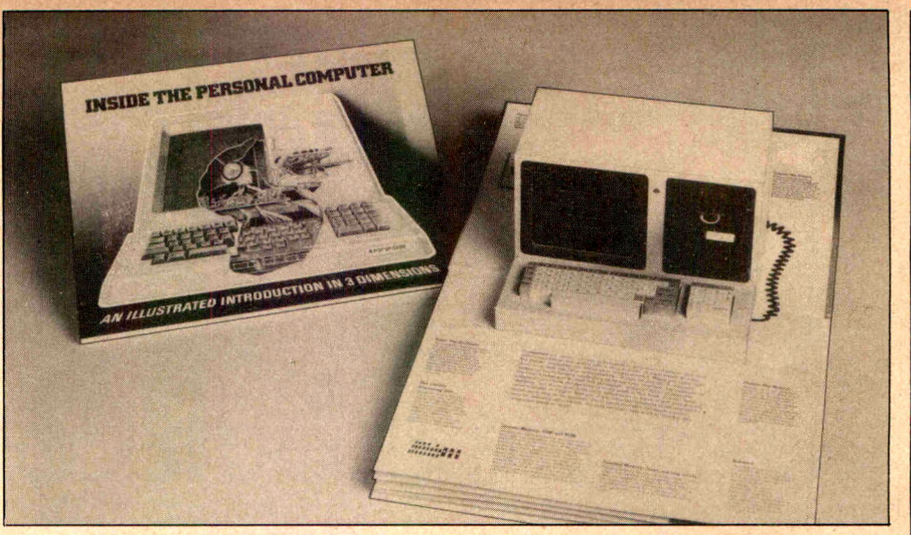
Educational software collections featuring dozens of instructional programs for Apple computers are available from the Educational Computer Network. Among the collections offered by the firm are a Biological Collection featuring 36 interactive tutorial programs on two disc sides for $49.95; a Chemistry Collection with 70 programs on two disc sides for $79.95; a Computer Programming Group with over 150 programs, including two different Basic tutorials, on eight disc sides for $75; and a Problem Solving Collection containing over 125 programs from various disciplines on 12 disc sides for $125.

ECN also offers a collection of programs for guidance counselors, a simulation/gaming collection, and a collection of business programs. A sampler disc containing 10 assorted programs is $10.

The company guarantees satisfaction with a



Pop-up PC and peripherals. *Inside the Personal Computer* offers neophyte computer users a three-dimensional introduction to hardware. The book contains six colorful spreads featuring pop-up models of a terminal, keyboard, circuit board, and printer; moving-part models of a disc drive, floppy disc, and CRT; easy-to-understand definitions of basic computer terms; and diagrams, charts, and other illustrations. $19.95 from Abbeville Press, 505 Park Ave., New York, NY 10022 (0-89659-504-8)

Software Showcase:

Outputm simplifies output measures record-keeping

Outputm—Output Measures for Public Libraries—is a microcomputer program offering librarians a simple method of recording and calculating output statistics for all types and sizes of libraries. From raw data input by the user, the program can average or total statistics for a single library or for all libraries in the district or system.

The software stores data on 20 library transactions and services described in the publication *Output Measures for Public Libraries,* by Douglas Zweizig and Eleanor Jo Rodgers (American Library Association, Chicago, 1982). Outputm calculates circulation per capita; in-library use of materials; library visits per capita; program attendance per capita; reference transactions per capita; reference fill rate; title fill rate; browsers fill rate; and registration as a percentage of population.

The program was created by William Schell, assistant professor of computer science at Clarion University of Pennsylvania, under the direction of Bernard Vavrek, Clarion professor of library science. LSCA Title I funds provided by the State Library of Pennsylvania were used to develop the program.

Title fill rate                21.6%
```

Sample output from Outputm.

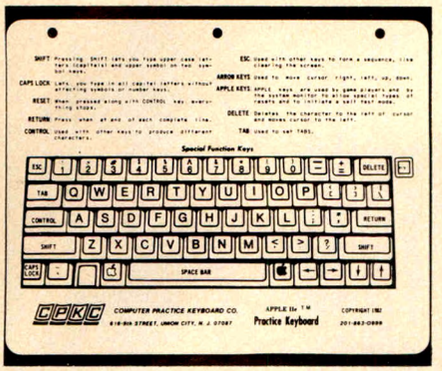
Data on the 20 output measures can be cumulated for a single year only or for up to 10 years. Because the data entered can be updated regularly, the program never becomes obsolete. The system can compile information by file, by district, and by library. One to five districts may be included under each file, and one to 50 libraries may be included under each district. Therefore, in one file it is possible to include five districts, each with 50 member libraries, for a total of 250 libraries.

The program provides a sample file for users to work with to gain familiarity with the methods and options available to them. Two help options have been built into the program: users can request computational help, causing the screen to show the mathematical formulae used in computing values; and they can request library code help, which will bring up displays of the libraries under each district.

The menu-driven program, written in interpreter BASIC for the IBM PC and IBM PC-XT, can also be run on a Columbia microcomputer with at least 128K of RAM memory.

Outputm is priced at $99. The program can be examined on approval for $15, which can later be applied to the total purchase price. For more information on Outputm contact Bernard Vavrek, Center for the Study of Rural Librarianship, College of Library Science, Clarion University of Pennsylvania, Clarion, PA 16214.

30-day refund policy. For a free catalog write Educational Computing Network, POB 8236, Riverside, CA 92515.



Practice keyboards for Apple, IBM, TRS-80, Atari, Commodore, and other popular microcomputers are available for $3.95 each (two for $7.50) plus $1 shipping from the Computer Practice Keyboard Co., 616 9th St., Union City, NJ 07087. Useful for learning and practicing finger positions while away from the actual computer, the "keyboards" are printed on heavy 8½-by-11-inch stock and laminated in plastic.

academia

College Librarianship, published by Britain's Library Association, contains 25 essays dealing with major issues facing non-university academic libraries in the U.K. today. The essays, edited by A. Rennie McElroy, are grouped into three sections dealing with the educational environment in which colleges work; the role of libraries in different types of colleges; and such specific tasks facing librarians as management, staffing, finances, and services. Individual chapters cover college libraries in Europe, North America, and Australia. Concerns recurring in a number of the essays include the role of the librarian as educator and manager, the need to promote the library to users and administrators, and the development of nonprint collections and information technology.

The 428-page volume is available in the U.S. for $50 from Oryx Press, 2214 N. Central, Phoenix, AZ 85004-1483 (0-85365-785-8).

Research libraries quantified. A new publication from the Association of Research Libraries attempts to determine which academic institutions should be considered research libraries. *Quantitative Criteria for Academic Research Libraries* is based on statistical data on nearly 3,000 libraries from the 1978–79 Higher Education General Information Survey. Compiler Kendon L. Stubbs, under contract to the National Center for Education Statistics, computed component scores for each library based on such statistical variables as volumes held and volumes added. A cutoff score was then established, above which a library could be said to show the characteristics of a research library.

The 137-page paperback report, which includes a lengthy appendix giving component scores for each of the 2,943 libraries, is $15 prepaid for ACRL members and $19 for nonmembers from ACRL/ALA, 50 E. Huron St., Chicago, IL 60611 (0-8389-6788-4).

The role of university archives was the subject of a survey conducted by the Association of Research Libraries in late 1983. Fifty-eight ARL member libraries at public universities were asked about the place of the archives within the institutional structure, collection responsibilities and scope, staffing levels, and the relationship of the library to the school's records management programs.

Of the 53 respondents, one reported there

The Top Ten Now eleven!

Bell & Howell Publication Products offers ten of the top newspapers which lead the country in circulation in microform making any reference collection more valuable and complete.

Through either current subscription or backfile issues, enhance your newspaper treasury with: the history of business and finance as charted in *The Wall Street Journal;* unbiased, thought-provoking treatment of national and world affairs in *The Christian Science Monitor;* *The Miami Herald's* in-depth reporting and analysis of the controversial happenings in Latin America; as well as the world, national, regional, state and local events covered in the other top newspapers. And since it is all reproduced on microfilm, you get a lasting resource of information. Most of these "Top 10" papers have indexes available making their information even more accessible.

USA TODAY is now #3

For more information about the "Top 10" newspapers Bell & Howell offers in microform, their accompanying indexes and the 7000 other titles available, complete and return the attached coupon, or contact: Pam Shea, Quotations Editor, Bell & Howell Publication Products, Old Mansfield Road, Wooster, OH 44691-9050. Call toll free 1-800-321-9881. In Ohio call 1-216-264-6666.

The only comprehensive reference on American and international schools abroad

The ISS Directory Of Overseas Schools
1984/85 Edition

Designed for internationally mobile educators, families, and businesses, the *Directory* lists over 600 English-speaking schools in Asia, Europe, the Middle East, the Caribbean, and Central and South America.

With the *Directory*, teachers and administrators can gain a global view of opportunities abroad. Transferring employees with dependents can investigate the major international schools available before choosing a new post. And corporations considering overseas locations can determine the need for new schools.

Paperbound: $15 domestic mail, $25 air mail. ISBN: 0-913663-01-8

International Schools Services
PO Box 5910, Princeton, NJ 08540

were no university archives, one said the archives were not part of the library organization but did report to the university librarian, and eight stated the archives were not part of the library.

Archives staff ranged from none to 27, with a median of five full-time staff members. Professional archivists are employed at 31 libraries, with the number varying from one half-time to five. In 22 of 27 cases the salary ranges for the archivists were essentially the same as those of their peers in the libraries.

Approximately half the libraries are charged with collecting all official records of the parent institution. Regarding "non-official" materials of a historical nature relating to the institution, 17 archives collect everything they can identify and obtain, 13 collect a substantial part, 5 a small fraction, and 7 are not mandated to collect such items.

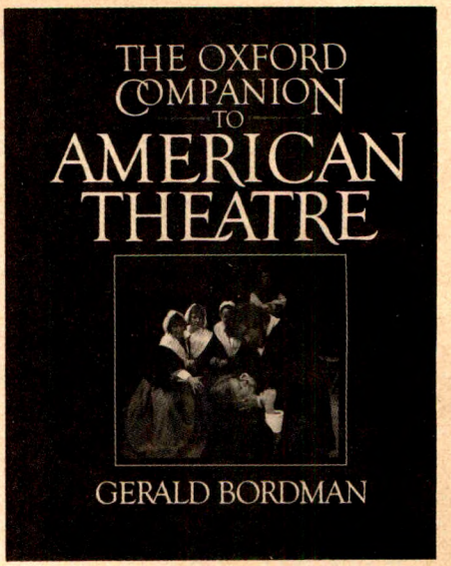
Campus-wide record management programs have been instituted at 26 of the institutions, with 21 of these formally linked to archives.

The results of the survey, along with information on issues and trends; examples of policy statements, annual reports, and other documents; and a list of selected sources on university archives are collected in *University Archives in ARL Libraries*, SPEC Kit #107 from ARL's Office of Management Studies. The 108-page paperback is $15 prepaid ($7.50 for ARL library members) from SPEC Center, ARL/OMS, 1527 New Hampshire Ave., N.W., Washington, DC 20036.

Australian Academic Libraries *in the Seventies* examines what was a decade of expansion and development for that nation's libraries. The 12 essays by practicing Australian librarians were collected in honor of Dietrich Borchardt, who retired in 1980 as chief librarian of La Trobe University. Topics include the formulation of a national information policy, library automation, online searching, library cooperation, the Australian Advisory Council of Bibliographical Services, the librarian in academe, and librarians and scholars. 331 p., $37.50 from the University of Queensland Press, 5 S. Union St., Lawrence, MA 01843 (0-7022-1883-9).

resources

Teaching positions abroad. *Educators' Passport to International Jobs* tells teachers and school administrators how to find overseas jobs in their field, how to get hired, and how to get back home. Authors Rebecca Anthony and Gerald Roe offer tips on finding suitable employers and positions abroad, completing the necessary paperwork, interviewing for overseas jobs, negotiating an employee contract, adjusting to culture shock, and finding a job back in the U.S. The 181-page paperback includes a bibliography of useful publications, a selected list of embassies and other information sources in the U.S., and addresses of teacher certification offices in each state. $9.95 plus $1.25 shipping from Peterson's Guides, Dept. 4702, POB 2123, Princeton, NJ 08540 (0-87866-271-5, 83-25094).



A dramatic addition to the Oxford Companion series, *The Oxford Companion to American Theatre* contains nearly 3,000 entries on plays, playwrights, performers, producers, directors, songwriters, playhouses, and organizations dating back to the beginnings of the American stage. The 734-page volume is $49.95 from Oxford University Press, 200 Madison Ave., New York, NY 10016 (0-19-503443-0, 83-26812).

Bill of fairs. Hundreds of festivals and events ranging from the Black-Eyed Pea Jamboree in Athens, Tex., to the Ice Worm Festival in Cordova, Alaska, are covered in *A Guide to Fairs and Festivals in the United States*. Author Frances Shemanski describes cultural programs, parades, religious celebrations, food festivals, patriotic events, and many other types of festivals, tracing the origin and development of each one. The volume also includes an appendix listing the events according to type and a month-by-month calendar of fairs for each state. 339 p., $35 from Greenwood Press, 88 Post Rd. West, POB 5007, Westport, CT 06881 (0-313-21437-9, 82-21080).

Band books week. *The Marching Band Handbook*, compiled by Kim R. Holston, is an information source for marching bands, color guards, drum and bugle corps, military bands, and baton twirlers. The manual contains listings of associations, competitions, sources for uniforms and equipment, nationally known parades, recommended music, instrument manufacturers, music publishers, clinicians and clinics, fundraising organizations, and more. The 208-page paperback also features interviews with experts, numerous bibliographies, and 45 black-and-white photos. $18.95 from McFarland & Co., POB 611, Jefferson, NC 28640 (0-89950-105-2, 84-25575).

The Works of John Philip Sousa contains information on the over 500 known musical and

YOU'VE FOUND WHAT YOU'RE LOOKING FOR

SIRE

A BREAKTHROUGH IN INFORMATION RETRIEVAL

You no longer have to know exactly what you want to find what you need — and in the order you're most likely to use it. SIRE does the work so you don't have to.

Retrieve information by:

- **Natural Language**
- **Heuristic Word Associations**
- **Word Roots**
- **Like Documents**
- **Full Boolean Logic and Adjacency**
- **Truncation and Wild Cards**
- **Specific Fields**

Add SIRE's "ranked output" - documents ordered by their probable usefulness - and the result is the best retrieval system at ANY price on ANY computer.

And don't overlook these features:

- **Up to 256 Fields Per Document**
- **No Limits on Document or Field Lengths**
- **Automatic Full-Text Indexing and Manual Indexing**
- **Sort Documents on Any Field**
- **All Fields Variable Length**
- **Full-Screen Data Entry**

SIRE runs on the IBM PC, XT and AT, DEC PDP-11 and VAX, and other 16 and 32 bit computers running UNIX, MS-DOS and RSX. You'll find that SIRE provides power and ease-of-use not available on the most expensive mainframe systems — and does it at a fraction of the price.

"This We Find Remarkable"
- The Seybold Report, July 1984

Find out for yourself. Order the SIRE Demonstration System and Manual (for IBM PC/XT) for $25, which will be applied towards your purchase.

literary compositions of "The March King." An updated and enlarged revision of author Paul E. Bierley's *John Philip Sousa: A Descriptive Catalog of His Works*, the volume covers Sousa's marches, operettas, suites, songs, arrangements and transcripts, and other musical works, as well as describing his books, articles, and other writings. A bibliography lists books and articles about Sousa and appendixes provide a chronology of his compositions. 234 p., $28.50 from Integrity Press, 3888 Morse Rd., Columbus, OH 43219-3014 (0-918048-04-4, 84-080665).

Afield guide. The *Field Guide to Alternative Media* describes 164 directories, bibliographies, review sources, catalogs, and other selection tools for accessing alternative and small press publications and independently produced nonprint media. The guide's introduction encourages librarians to acquire such materials, observing that "without alternative media, we limit ourselves and our collections, reduce the size and diversity of our clientele, and leave a gaping hole in our national bibliography."

Compiled by Patricia Case and published by the Task Force on Alternatives in Print of ALA's Social Responsibilities Round Table, the 44-page paperback is $6 from the Office for Library Outreach Services, ALA, 50 E. Huron St., Chicago, IL 60611 (0-8389-6780-9).

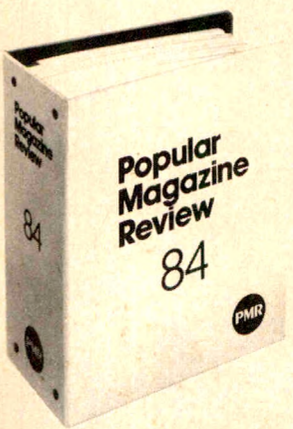
collections

Paul Tillich's manuscript collection will be made more accessible to researchers, thanks to a $56,856 grant from the National Endowment for the Humanities to the Harvard University Divinity School. "The NEH project allows us to arrange the works and correspondence, prepare an inventory, take steps to preserve the materials, and microfilm the entire collection," said Alan Seaburg, curator of manuscripts at the Andover-Harvard Theological Library, who is directing the project with Andover-Harvard Librarian Maria Grossman. "We can then publish a guide to the collection and, once it is microfilmed, make copies available."

The 100-linear-foot collection of the noted Protestant theologian includes his scholarly and personal papers, published and unpublished sermons, lecture notes, diaries, correspondence, tapes, photographs, and memorabilia.

The collection of micrographics pioneer Vernon Dale Tate has been acquired by the University of Michigan Library. The 230-linear-foot manuscript and book collection covers the history of micrographics and such related topics as photoduplication, photography, and information storage and retrieval. The gift also includes personal and professional records from Tate's career at the Library of Congress, the National Archives, the U.S.

Your most-used magazines, indexed and abstracted — within two weeks of publication!



Using computer technology, POPULAR MAGAZINE REVIEW has revolutionized periodical searching. Compare PMR to any other general-interest periodical reference. PMR is:

- MORE TIMELY: You receive it every week, while the issues indexed are still on your "current" shelf or the newstand.
- MORE INFORMATIVE: PMR goes beyond mere listings and *abstracts* articles, to narrow the search quickly and save time.
- MORE EXTENSIVE: PMR's specialist/editors abstract 300 popular magazines each month, nearly twice as many as *Reader's Guide*.
- MORE VERSATILE: Junior high school students, adult scholars, business persons, consumers — anyone can use PMR's clearly-written abstracts to find one essential article, or to get an encyclopedia-like overview of current ideas on any topic.
- MORE CONVENIENT: PMR is indexed monthly, quarterly, and annually.

UNIQUE: There is no comparable method of tracing a chain or current events from one week to the next.

PMR is the marriage of human judgement and computer speed that periodical librarians have been waiting for.

A 1-YEAR SUBSCRIPTION includes 50 weekly Newsletters, the monthly Indexes, the quarterly, semiannual and annual Indexes, and the deluxe buckram binder. $375.00

Dynix automation expands your time by volumes.

Any library automation system should save you *some* time. But with complicated programs and time-consuming computer glitches, some automation systems *take* more time than they *save*.

Simplicity and Service.

Dynix announces a library automation system so simple to operate, your frantic time will turn into productive time. The Dynix Automated Library System utilizes the unique PICK™ Operating System, which lets you use simple English sentence commands to access all data fields. With very little training, your library staff can operate the system with ease.

In addition, Dynix service personnel are available around the clock. Instead of disappearing after installation is complete, our customer support team forms a close relationship with each Dynix client to satisfy any future needs.

Affordable Automation.

While you are saving time with the Dynix system, you will also be saving money. Dynix software can be run on over 20 different hardware systems, so your library can choose the system that best fits your needs and budget. With complete hardware/software packages installed for as low as $35,000, Dynix has made automation affordable for all libraries.

The Dynix Commitment.

From Conversion Software to the Public Access Catalog, we at Dynix are committed to product excellence at an affordable price. And we are just as committed to excellence following installation.

Naval Academy, and M.I.T.; records gathered by Tate as executive secretary and archivist of the National Microfilm Association; and the collections of two prominent NMA members, Carl Nelson and Richard Batchelder.

Crime collection. When the San Francisco–based National Council on Crime and Delinquency closed its east-coast office earlier this year, the council's extensive collection of criminal justice books and documents was purchased by Rutgers University for $150,000.

The collection, now housed in the John Cotton Dana Library on the school's Newark Campus, encompasses approximately 8,000 books, 400 bound periodical volumes, 37,000 reports, 3,000 newspaper clippings, and 6,000 documents on microfiche. Disciplines represented include public administration, sociology, psychology, economics, and anthropology.

Phyllis Schultze, who served as librarian for the NCCD, will continue to oversee the collection in its new academic setting.

China mission resources. A series of works identifying U.S. repositories of materials on American church missions in China has been launched by the Princeton Theological Seminary. The first volume of the *Scholars' Guide to China Mission Resources in the Libraries and Archives of the United States* locates and describes the collections of 42 repositories in Pennsylvania containing over one million documents; the next volume, scheduled for early 1985, will cover the Mid-Atlantic region. Each volume contains a detailed index, and the final volume in the series will be a cumulative index and union list.

The initial volume of the guide, featuring a foreword by leading China scholar John King Fairbank, is $19.50 from the Scholars' Guide to China Mission Resources, Speer Library, Box 111, Princeton, NJ 08540.

Aeronautics and Space Flight *Collections,* edited by Catherine D. Scott, is a guide to collections dealing with aviation and space flight. In addition to detailed descriptions of the subject holdings of the Library of Congress, the New York Public Library, the U.S. Air Force Academy, the National Air and Space Museum, and other major collections, the volume also includes a survey of smaller special collections in the field. A concluding chapter deals with bibliographic control of aerospace materials. The volume was originally published as vol. 3, nos. 1 and 2 of *Special Collections*. Approx. 295 p., $29.95 from Haworth Press, 28 E. 22nd St., New York, NY 10010 (84-15725, 0-86656-251-6).

National Geographic reopens library. The reference reading room of the National Geographic Society's staff library has been reopened to the public, after being closed for construction for over a year. The library's refurbished quarters now include a second reading room where visitors may use the society's map collection, not previously available to the public. The map library is one of the few places in Washington, D.C., where the public has access to the major map series of the U.S. Geological Survey and the Defense Mappin Agency, as well as foreign national surveys

The library's holdings include 78,000 book 100,000 maps, 800 atlases, 750 periodica titles, and a clipping file containing ove 1.5 million items. The society's collection c polar exploration is one of the nation's mo complete.

librarian's library

Preparing for the worst. The Preservati Committee of the New York University Libra ies has developed a *Disaster Plan Workbook* enable libraries to gather together the inform tion needed to cope with emergencies. Th binder contains sections on procedures for fir evacuation, flood, bomb threats, vandalis rodents, and collapse of shelving. Other ar covered include the failure of a compu system, safety equipment and other supplies have on hand, branch library disaster plans, a information for insurance purposes. Space left for institutions to fill in local informat such as the names and phone numbers of staf be called in an emergency, and the loose-l format allows libraries to insert additional pag if needed. $10 from New York Univers Libraries, Collection Development Office, Washington Square South, New York, N 10012.

Research for Decision Making: *Methods for Librarians* is a guide to the methodology of action research—research intended primarily to clarify and support library decision-making Authors Robert Swisher and Charles McClure explain how to design an action research project, discuss the use of performance measure tell how to identify appropriate decision area for study, show how to construct a question naire, and discuss the rationale of inferentia statistical techniques. The volume is also usefu in helping librarians understand research re ports on library and information services an assess their applicability to other situations Approx. 220 p., $25 from ALA Publishing Services, 50 E. Huron St., Chicago, IL 6061 (0-8389-0398-3, 84-12381).

Organizational Structure *of Libraries,* the latest title in Scarecrow Press's Library Administration Series, discusses the theory and concepts of organization, the organization of library service, the external and internal organization of individual libraries, and othe aspects of the topic.

In his introduction, author Lowell Martin known for his studies of city library systems around the nation, says, "This volume seeks t present structure as a living, multidimensiona body of relationships. If it succeeds, even in part, it should help administrators to use organ zation to further the ends of their libraries.

304 p., $14.50 from Scarecrow Press, PO 656, Metuchen, NJ 08840 (0-8108-1696-2, 8 4859).

Author/Subject Index to Vol. 15, Numbers 1-11 (Jan.-Dec. 1984)

How to cut out the most frequently asked question about the world's best-selling encyclopedia.

This way to World Book.

"Which way to *World Book*?" is a popular question around libraries for good reason. According to librarians, it's because *World Book* is the most frequently used encyclopedia in print.

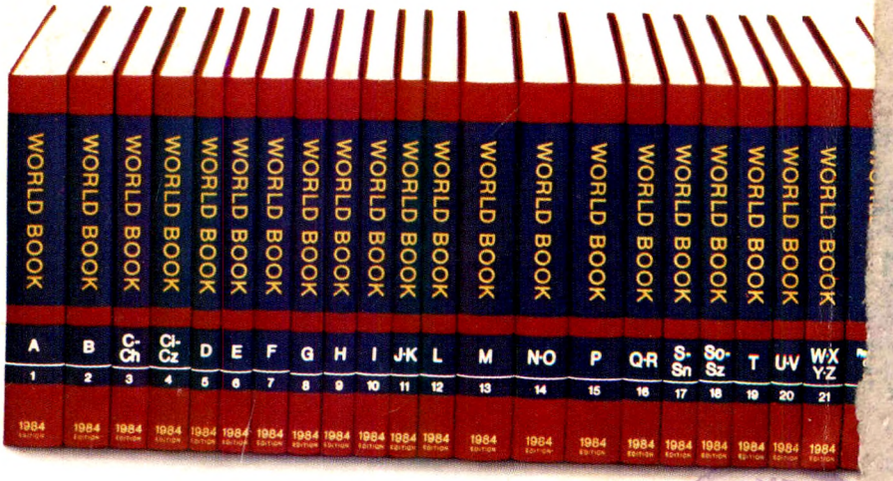
What makes *World Book* so appealing? According to a recent review by the editorial board of *Reference Books Bulletin*, published by the American Library Association,* *World Book*'s accessible, up-to-date, well-illustrated coverage of topics draws people of all ages.

In fact, this best-selling encyclopedia is designed especially to serve the reference and study needs of both students and adults. The review notes, "In these twin purposes it succeeds admirably," and adds, "*World Book* deserves high marks for its overall currentness of information."

People trust *World Book*, too. "*World Book*'s reputation for a high degree of accuracy—typographically, factually, and in matters of interpretation—continues apace," says the review.

From philosopher Aristotle to astronaut Sally Ride, "*World Book* continues to provide impressive, international biographical coverage of persons past and present," states the review.

With its clarity of style, helpful study guides, detailed index, and functional use of illustrations, it's easy to see why all signs point to *World Book*. Isn't it time to put a current set on your shelves?



*The review appears in the 2/1/84 issue.
